

Neuroscience

Graduation Requirements

In addition to the requirements listed below, students must satisfy:

1. the University regulations (see the Academic Regulations of the University in this Calendar),
2. the common regulations applying to all B.Sc. students (see the Academic Regulations for the Bachelor of Science Degree).

Students enrolled in the Neuroscience and Mental Health programs should consult with the Department of Neuroscience when planning their program or selecting courses. Those enrolled in the Neuroscience Combined Honours program should consult with either the Department of Biology or the Department of Neuroscience.

Course Categories for B.Sc. Programs

The program descriptions for B.Sc. Combined Honours Neuroscience make use of the course categories defined for all B.Sc. programs (see Academic Regulations for the Bachelor of Science Degree):

- Science Faculty Electives
- Science Continuation Courses
- Free Electives

Program Requirements

Neuroscience and Mental Health B.Sc. Honours (20.0 credits)

A. Credits Included in the Major (9.5 credits)

1. 4.0 credits in:	4.0
NEUR 1201 [0.5] Introduction to Mental Health and Disease	
NEUR 2001 [0.5] Introduction to Research Methods in Psychology	
NEUR 2002 [0.5] Introduction to Statistics in Psychology	
NEUR 2200 [0.5] Biological Foundations of Behaviour	
NEUR 3200 [1.0] Principles of Neuroscience	
NEUR 3204 [0.5] Principles of Psychopharmacology: From Drugs to Behaviour	
NEUR 4200 [0.5] Seminar on Current Research in Neuroscience	
2. 1.0 credit in:	1.0
BIOL 1003 [0.5] Introductory Biology I	
BIOL 1004 [0.5] Introductory Biology II	
3. 1.0 credit in:	1.0
PSYC 1001 [0.5] Introduction to Psychology I	
PSYC 1002 [0.5] Introduction to Psychology II	
4. 1.0 credit from:	1.0
NEUR 3202 [0.5] Sensory Processes	
NEUR 3301 [0.5] Genetics of Mental Health	
NEUR 3302 [0.5] Sex and the Brain	
NEUR 3303 [0.5] The Neuroscience of Consciousness	

NEUR 3304 [0.5] Hormones and Behaviour	
NEUR 3305 [0.5] Immune-brain Interactions	
NEUR 3306 [0.5] The Neural basis of Addiction	
5. 0.5 credit from:	0.5
NEUR 3401 [0.5] Environmental Toxins and Mental Health	
NEUR 3402 [0.5] Impact of Lifestyle and Social Interactions on Mental Health	
NEUR 3403 [0.5] Stress and Mental Health	
6. 0.5 credit from:	0.5
NEUR 3501 [0.5] Neurodegeneration and Aging	
NEUR 3502 [0.5] Neurodevelopmental Determinants of Mental Health	
7. 1.0 credit from:	1.0
NEUR 4907 [1.0] Honours Essay and Research Proposal	
NEUR 4908 [1.0] Honours Research Thesis	
8. 0.5 credit in Advanced Science Faculty Electives	0.5
B. Credits Not Included in the Major CGPA (10.5 credits)	
9. 2.0 credits in:	2.0
CHEM 1001 [0.5] General Chemistry I	
CHEM 1002 [0.5] General Chemistry II	
PHYS 1007 [0.5] Elementary University Physics I	
PHYS 1008 [0.5] Elementary University Physics II	
10. 0.5 credit from:	0.5
MATH 1007 [0.5] Elementary Calculus I	
MATH 1107 [0.5] Linear Algebra I	
11. 1.0 credit in:	1.0
BIOL 2107 [0.5] Fundamentals of Genetics	
BIOL 2201 [0.5] Cell Biology and Biochemistry	
12. 1.0 credit in:	1.0
STAT 2507 [0.5] Introduction to Statistical Modeling I	
STAT 2509 [0.5] Introduction to Statistical Modeling II	
13. 0.5 credit from:	0.5
PSYC 2100 [0.5] Introduction to Social Psychology	
PSYC 2301 [0.5] Introduction to Health Psychology	
PSYC 2500 [0.5] Foundations of Developmental Psychology	
PSYC 2700 [0.5] Introduction to Cognitive Psychology	
PHIL 2501 [0.5] Introduction to Philosophy of Mind	
14. 1.0 credit in Science Continuation courses (not in NEUR)	1.0
15. 1.5 credits in Approved Arts or Social Sciences	1.5
16. 0.5 credit in:	0.5
NSCI 1000 [0.5] Seminar in Science or Approved Arts or Social Sciences	
17. 2.5 credits in free electives.	2.5
Total Credits	20.0

Note: for Item 9 above, students in this program without the prerequisites for CHEM 1001 and CHEM 1002 may substitute CHEM 1005 and CHEM 1006, but will be required to obtain a grade of B- or higher in CHEM 1006 to advance to second year CHEM courses.

Neuroscience and Mental Health B.Sc. Major (20.0 credits)

A. Credits Included in the Major CGPA (9.5 credits)

1. 4.0 credits in:	4.0
NEUR 1201 [0.5]	Introduction to Mental Health and Disease
NEUR 2001 [0.5]	Introduction to Research Methods in Psychology
NEUR 2002 [0.5]	Introduction to Statistics in Psychology
NEUR 2200 [0.5]	Biological Foundations of Behaviour
NEUR 3200 [1.0]	Principles of Neuroscience
NEUR 3204 [0.5]	Principles of Psychopharmacology: From Drugs to Behaviour
NEUR 4200 [0.5]	Seminar on Current Research in Neuroscience
2. 1.0 credit in:	1.0
BIOL 1003 [0.5]	Introductory Biology I
BIOL 1004 [0.5]	Introductory Biology II
3. 1.0 credit in:	1.0
PSYC 1001 [0.5]	Introduction to Psychology I
PSYC 1002 [0.5]	Introduction to Psychology II
4. 1.0 credit from:	1.0
NEUR 3202 [0.5]	Sensory Processes
NEUR 3301 [0.5]	Genetics of Mental Health
NEUR 3302 [0.5]	Sex and the Brain
NEUR 3303 [0.5]	The Neuroscience of Consciousness
NEUR 3304 [0.5]	Hormones and Behaviour
NEUR 3305 [0.5]	Immune-brain Interactions
NEUR 3306 [0.5]	The Neural basis of Addiction
5. 0.5 credit from:	0.5
NEUR 3401 [0.5]	Environmental Toxins and Mental Health
NEUR 3402 [0.5]	Impact of Lifestyle and Social Interactions on Mental Health
NEUR 3403 [0.5]	Stress and Mental Health
6. 0.5 credit from:	0.5
NEUR 3501 [0.5]	Neurodegeneration and Aging
NEUR 3502 [0.5]	Neurodevelopmental Determinants of Mental Health
7. 1.0 credit in NEUR courses at the 2000-level or above	1.0
8. 0.5 credit in Advanced Science Faculty Electives	0.5
B. Credits Not Included in the Major CGPA (10.5 credits)	
9. 2.0 credits in:	2.0
CHEM 1001 [0.5]	General Chemistry I
CHEM 1002 [0.5]	General Chemistry II
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II
10. 0.5 credit from:	0.5
MATH 1007 [0.5]	Elementary Calculus I
MATH 1107 [0.5]	Linear Algebra I
11. 1.0 credit in:	1.0
BIOL 2107 [0.5]	Fundamentals of Genetics
BIOL 2201 [0.5]	Cell Biology and Biochemistry
12. 1.0 credit in:	1.0

STAT 2507 [0.5]	Introduction to Statistical Modeling I	
STAT 2509 [0.5]	Introduction to Statistical Modeling II	
13. 0.5 credit from:		0.5
PSYC 2100 [0.5]	Introduction to Social Psychology	
PSYC 2301 [0.5]	Introduction to Health Psychology	
PSYC 2500 [0.5]	Foundations of Developmental Psychology	
PSYC 2700 [0.5]	Introduction to Cognitive Psychology	
PHIL 2501 [0.5]	Introduction to Philosophy of Mind	
14. 1.0 credit in Science Continuation courses (not in NEUR)		1.0
15. 1.5 credits in Approved Arts or Social Sciences		1.5
16. 0.5 credit in NSCI 1000 or Approved Arts or Social Sciences		0.5
17. 2.5 credits in free electives		2.5
Total Credits		20.0

Note: for Item 9 above, students in this program without the prerequisites for CHEM 1001 and CHEM 1002 may substitute CHEM 1005 and CHEM 1006, but will be required to obtain a grade of B- or higher in CHEM 1006 to advance to second year CHEM courses.

Neuroscience and Mental Health B.Sc. General (15.0 credits)

A. Credits Included in the Major CGPA (7.5 credits)

1. 3.5 credits in:	3.5
NEUR 1201 [0.5]	Introduction to Mental Health and Disease
NEUR 2001 [0.5]	Introduction to Research Methods in Psychology
NEUR 2002 [0.5]	Introduction to Statistics in Psychology
NEUR 2200 [0.5]	Biological Foundations of Behaviour
NEUR 3200 [1.0]	Principles of Neuroscience
NEUR 3204 [0.5]	Principles of Psychopharmacology: From Drugs to Behaviour
2. 1.0 credit in:	1.0
BIOL 1003 [0.5]	Introductory Biology I
BIOL 1004 [0.5]	Introductory Biology II
3. 1.0 credit in:	1.0
PSYC 1001 [0.5]	Introduction to Psychology I
PSYC 1002 [0.5]	Introduction to Psychology II
4. 1.0 credit from:	1.0
NEUR 3202 [0.5]	Sensory Processes
NEUR 3301 [0.5]	Genetics of Mental Health
NEUR 3302 [0.5]	Sex and the Brain
NEUR 3303 [0.5]	The Neuroscience of Consciousness
NEUR 3304 [0.5]	Hormones and Behaviour
NEUR 3305 [0.5]	Immune-brain Interactions
NEUR 3306 [0.5]	The Neural basis of Addiction
5. 0.5 credit from:	0.5
NEUR 3401 [0.5]	Environmental Toxins and Mental Health
NEUR 3402 [0.5]	Impact of Lifestyle and Social Interactions on Mental Health

NEUR 3403 [0.5]	Stress and Mental Health	
NEUR 3501 [0.5]	Neurodegeneration and Aging	
NEUR 3502 [0.5]	Neurodevelopmental Determinants of Mental Health	
6. 0.5 credit in	Advanced Science Faculty Electives	0.5
B. Credits Not Included in the Major CGPA (7.5 credits)		
7. 2.0 credits in:		2.0
CHEM 1001 [0.5]	General Chemistry I	
CHEM 1002 [0.5]	General Chemistry II	
PHYS 1007 [0.5]	Elementary University Physics I	
PHYS 1008 [0.5]	Elementary University Physics II	
8. 0.5 credit from:		0.5
MATH 1007 [0.5]	Elementary Calculus I	
MATH 1107 [0.5]	Linear Algebra I	
9. 1.0 credit in:		1.0
BIOL 2107 [0.5]	Fundamentals of Genetics	
BIOL 2201 [0.5]	Cell Biology and Biochemistry	
10. 1.0 credit in	Science Continuation courses (not in NEUR)	1.0
11. 1.5 credits in	Approved Arts or Social Sciences	1.5
12. 0.5 credit in	NSCI 1000 or Approved Arts or Social Sciences	0.5
13. 1.0 credit in	free electives	1.0
Total Credits		15.0

Note: for **Item 7** above, students in this program without the prerequisites for CHEM 1001 and CHEM 1002 may substitute CHEM 1005 and CHEM 1006, but will be required to obtain a grade of B- or higher in CHEM 1006 to advance to second year CHEM courses.

Neuroscience

B.Sc. Combined Honours (20.0 credits)

Co-operative Education Option is available (see the Co-operative Education section of this Calendar for details).

A. Credits Included in the Major CGPA (12.5 credits)

1. 3.0 credits in:		3.0
BIOL 1103 [0.5]	Foundations of Biology I	
BIOL 1104 [0.5]	Foundations of Biology II	
BIOL 2001 [0.5]	Animals: Form and Function	
BIOL 2200 [0.5]	Cellular Biochemistry	
BIOL 2104 [0.5]	Introductory Genetics	
BIOL 3305 [0.5]	Human and Comparative Physiology	
2. 1.0 credit in	BIOL, BIOC or CHEM	1.0
3. 1.5 credits in	BIOL, BIOC or CHEM at the 3000-level or above	1.5
4. 4.5 credits in:		4.5
PSYC 1001 [0.5]	Introduction to Psychology I	
PSYC 1002 [0.5]	Introduction to Psychology II	
NEUR 2001/ PSYC 2001 [0.5]	Introduction to Research Methods in Psychology	
NEUR 2002/ PSYC 2002 [0.5]	Introduction to Statistics in Psychology	
NEUR 2200/ PSYC 2200 [0.5]	Biological Foundations of Behaviour	
PSYC 2700 [0.5]	Introduction to Cognitive Psychology	

NEUR 3200 [1.0]	Principles of Neuroscience	
NEUR 4200 [0.5]	Seminar on Current Research in Neuroscience	
5. 1.0 credit from:		1.0
NEUR 3202 [0.5]	Sensory Processes	
NEUR 3203 [0.5]	Field Course in Animal Behaviour	
BIOL 3605 [0.5]	Field Course I	
NEUR 3204 [0.5]	Principles of Psychopharmacology: From Drugs to Behaviour	
NEUR 3205 [0.5]	Psychopharmacology and Behavioural Medicine	
PSYC 3207 [0.5]	Human Neuropsychology	
PSYC 3700 [1.0]	Cognition (Honours Seminar)	
NEUR 4001 [0.5]	Special Topics in Neuroscience (with permission)	
NEUR 4207 [0.5]	Neuropsychology of Memory Disorders	
6. 0.5 credit from:		0.5
BIOL 3802 [0.5]	Animal Behaviour	
BIOL 4317 [0.5]	Neuroethology: The Neural Basis of Animal Behaviour	
BIOC 4007 [0.5]	Membrane Biochemistry	
7. 1.0 credit from:		1.0
NEUR 4907 [1.0]	Honours Essay and Research Proposal	
NEUR 4908 [1.0]	Honours Research Thesis	
BIOL 4907 [1.0]	Honours Essay and Research Proposal	
BIOL 4908 [1.0]	Honours Research Thesis	
B. Credits Not Included in the Major CGPA (7.5 credits)		
8. 1.0 credit from:		1.0
MATH 1004 [0.5]	Calculus for Engineering or Physics	
or MATH 1007 [0.5]	Elementary Calculus I	
MATH 1107 [0.5]	Linear Algebra I	
9. 1.0 credit in:		1.0
PSYC 3000 [1.0]	Design and Analysis in Psychological Research	
10. 1.5 credits in:		1.5
CHEM 1001 [0.5]	General Chemistry I	
& CHEM 1002 [0.5]	and General Chemistry II ²	
CHEM 2203 [0.5]	Organic Chemistry I (see Note 2, below)	
11. 1.0 credit from:		1.0
PHYS 1007 [0.5]	Elementary University Physics I	
& PHYS 1008 [0.5]	and Elementary University Physics II	
PHYS 1001 [0.5]	Foundations of Physics I	
& PHYS 1002 [0.5]	and Foundations of Physics II	
12. 0.5 credit in:		0.5
NSCI 1000 [0.5]	Seminar in Science (or in the Faculty of Arts and Social Sciences or Faculty of Public Affairs, not in Psychology)	
13. 1.5 credits in	Approved Arts or Social Sciences, not in PSYC or BIOL	1.5
14. 1.0 credits in	free electives	1.0
Total Credits		20.0

Notes

1. The topic for Item 7 above must be in neurophysiology, animal behaviour, neuropsychology or a related topic.
2. For Item 10 above, CHEM 1001 and CHEM 1002 are strongly recommended for this program. Students may substitute CHEM 1001 and CHEM 1002 with CHEM 1005 and CHEM 1006, respectively. Students choosing CHEM 1005 and CHEM 1006 will be required to obtain a grade of B- or higher in CHEM 1006 to take BIOL 2200 and more advanced courses in BIOC and CHEM. Students completing CHEM 1005 with a grade of B- or higher are encouraged to register for CHEM 1002.
3. For Item 11 above, students who enrol in PHYS 1001/PHYS 1002 must have completed MATH 1004 for Item 8.

Minor in Neuroscience and Mental Health (4.0 credits)

The Minor in Neuroscience is available to students registered in degree programs other than those offered by the Department of Neuroscience.

Requirements (4.0 credits):

1. 1.0 credit in:		1.0
NEUR 1201 [0.5]	Introduction to Mental Health and Disease	
NEUR 2200 [0.5]	Biological Foundations of Behaviour	
2. 1.5 credit from:		1.5
NEUR 3202 [0.5]	Sensory Processes	
NEUR 3204 [0.5]	Principles of Psychopharmacology: From Drugs to Behaviour	
NEUR 3301 [0.5]	Genetics of Mental Health	
NEUR 3302 [0.5]	Sex and the Brain	
NEUR 3303 [0.5]	The Neuroscience of Consciousness	
NEUR 3304 [0.5]	Hormones and Behaviour	
NEUR 3305 [0.5]	Immune-brain Interactions	
NEUR 3306 [0.5]	The Neural basis of Addiction	
3. 0.5 credit from:		0.5
NEUR 3401 [0.5]	Environmental Toxins and Mental Health	
NEUR 3402 [0.5]	Impact of Lifestyle and Social Interactions on Mental Health	
NEUR 3403 [0.5]	Stress and Mental Health	
NEUR 3501 [0.5]	Neurodegeneration and Aging	
NEUR 3502 [0.5]	Neurodevelopmental Determinants of Mental Health	
4. 1.0 credit in any 2000-level or higher NEUR course		1.0
Total Credits		4.0

Neuroscience (NEUR) Courses

NEUR 1201 [0.5 credit]

Introduction to Mental Health and Disease

Common mental health diseases; clinical symptoms of disease, genetic, developmental, experiential and environmental risk factors contributing to disease; the neurobiological basis of disease. Topics may include depression, Alzheimer's Disease, schizophrenia and ADHD.

Lecture three hours a week.

NEUR 2001 [0.5 credit]

Introduction to Research Methods in Psychology

A general introduction to research methodologies employed within contemporary psychology. Topics covered include research designs (experimental, quasi-experimental) and techniques (observations, surveys), basic descriptive statistics, and how to interpret and report research findings.

Also listed as PSYC 2001.

Precludes additional credit for PSYC 2000.

Prerequisite(s): PSYC 1001 and PSYC 1002.

Lecture three hours a week.

NEUR 2002 [0.5 credit]

Introduction to Statistics in Psychology

A general introduction to statistical techniques employed within contemporary Psychology. Topics covered include basic data analysis using descriptive and inferential statistics (t-tests, ANOVA, correlation, chi-square).

Also listed as PSYC 2002.

Precludes additional credit for GEOG 2006

Prerequisite(s): PSYC 1001, PSYC 1002, and PSYC 2001.

NEUR 2003 [0.5 credit]

Introduction to Techniques in Neuroscience

Introduction to common techniques used in neuroscience research. Brain imaging, animal behaviour, electrophysiology, immunohistochemistry and microscopy, genomics, transgenics, cell culture, and DSM-IV-based clinical assessment.

Lectures three hours a week.

NEUR 2200 [0.5 credit]

Biological Foundations of Behaviour

How molecular, cellular, and systems-level processes primarily within the brain underlie sensation, movement, motivation, emotion, learning and cognition.

Also listed as PSYC 2200.

Prerequisite(s): PSYC 1001 and PSYC 1002, or permission of the Department of Neuroscience.

Lectures three hours a week.

NEUR 2801 [0.5 credit]**Neuroscience and Creativity**

Abnormal brain function, associated with mental illness or substance abuse, has been commonly depicted in, or been the inspiration for important cultural works including movies, music, paintings and literature. The neurobiological basis of creativity in individuals with and without mental illness.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3200 [1.0 credit]**Principles of Neuroscience**

Core principles of neuroscience, including neural signaling, sensation, movement, neurodevelopment, neuroplasticity, neuroendocrinology, learning and memory, and other complex brain functions.

Precludes additional credit for PSYC 3200.

Prerequisite(s): PSYC 2001 or NEUR 2001, PSYC 2002 or NEUR 2002, and PSYC 2200 or NEUR 2200, third-year standing and permission of the Department.

Lectures, colloquia and seminars, three to six hours a week.

NEUR 3202 [0.5 credit]**Sensory Processes**

The physiological basis of sensation. Topics include sensory mechanisms, neuropsychological bases of perception and psychological phenomena encountered in the various senses.

Precludes additional credit for PSYC 3202.

Prerequisite(s): PSYC 2200 OR NEUR 2200.

Lectures and seminars three hours a week.

NEUR 3203 [0.5 credit]**Field Course in Animal Behaviour**

Offered in the Department of Biology as BIOL 3605. Only those modules dealing with animal behaviour topics may be offered for Neuroscience credit.

Also listed as BIOL 3605.

Precludes additional credit for PSYC 3203.

Prerequisite(s): permission of the department.

NEUR 3204 [0.5 credit]**Principles of Psychopharmacology: From Drugs to Behaviour**

Introduction to synaptic mechanisms and the arrangements of the transmitter-specific brain systems, followed by a discussion of neuro-pharmacological bases of normal and abnormal behaviour and of the behavioural effects of various classes of psychoactive drugs such as stimulants, tranquilizers, opiates.

Precludes additional credit for PSYC 3204.

Prerequisite(s): PSYC 2200 OR NEUR 2200.

Lectures and seminars three hours a week.

NEUR 3205 [0.5 credit]**Psychopharmacology and Behavioural Medicine**

An examination of the relationship between endogenous neurochemical, hormonal and immunological states and various physiological and behavioural pathologies. The contribution of psychological variables to these pathologies will be assessed.

PSYC 3205

Prerequisite(s): NEUR 3204, PSYC 3204 or permission of the Department.

Lectures and seminars three hours a week.

NEUR 3301 [0.5 credit]**Genetics of Mental Health**

Most common mental health diseases have a genetic component. By focusing on specific diseases, this course will discuss how disease susceptibility genes are identified, and describe the genetic, genomic and epigenetic mechanisms through which DNA alterations can predispose to disease.

Prerequisite(s): BIOL 2104 and one of NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3302 [0.5 credit]**Sex and the Brain**

Neurobiological processes behind reproductive behaviours in various animal species including humans. Evaluation of data concerning neurobiological differences between sexes, biological determinants of sexual orientation, and relating to neurobiology of sex disorders.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3303 [0.5 credit]**The Neuroscience of Consciousness**

Consciousness remains one of the least understood aspects of the nervous system. This course explores neural mechanisms underlying consciousness, changes in consciousness associated with sleep, coma, vegetative states, drugs, and other stimuli, and considers the evolutionary basis of consciousness, and its relationship with awareness.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3304 [0.5 credit]**Hormones and Behaviour**

The effects of hormones throughout life at all levels of the nervous system. The role of hormones in mediating behaviours that are both basic (feeding, reproduction and social interactions) and complex (motivation, emotion, learning and memory).

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3305 [0.5 credit]**Immune-brain Interactions**

This course will discuss growing evidence of communication between the brain and the immune system, and of the messengers mediating the interaction. We will discuss how disturbances of immune-brain signaling can lead to disease (multiple sclerosis, Parkinson's) and to changes in mood and cognition.

Prerequisite(s): NEUR 3200 or PSYC 3200.

Lectures and seminars three hours a week.

NEUR 3306 [0.5 credit]**The Neural basis of Addiction**

How substance and behavioural addictions impact neural function to ultimately lead to the neuropathology of addiction in vulnerable populations. The neurobiological mechanism of action of each drug class; contemporary neurobiological theories of addiction.

Precludes additional credit for PSYC 3403.

Prerequisite(s): NEUR 3204 or PSYC 3204.

Lecture and seminar three hours a week.

NEUR 3401 [0.5 credit]**Environmental Toxins and Mental Health**

Exposure to environmental toxins from the air, water or food can interfere with neuronal function, alter neurodevelopment, and damage the brain. This course will explore associations between toxins and diseases such as Parkinson's disease, multiple sclerosis and depression, focusing on mechanisms underlying development of pathology.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3402 [0.5 credit]**Impact of Lifestyle and Social Interactions on Mental Health**

Healthy lifestyle choices and positive social interactions can reduce the incidence of pathological conditions such as depression, obesity, cardiovascular disease and impaired immunity. This course focuses on psychosocial and neurobiological mechanisms that underlie the relationship between lifestyle, social interactions and health.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3403 [0.5 credit]**Stress and Mental Health**

Stressful events can have profound repercussions on physical and psychological well-being. This course examines the psychosocial and biological processes by which stressors predispose to both physical (immune-related disorders, diabetes, heart disease) and psychological (acute stress disorder, posttraumatic stress disorder, depression, anxiety) pathologies.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3501 [0.5 credit]**Neurodegeneration and Aging**

Neurodegeneration is particularly acute in the aging population, and is characteristic of diseases such as Alzheimer's, Parkinson's, multiple sclerosis and Huntington's disease. This course will explore mechanisms underlying neurodegeneration, plus recent advances aimed at the restoration of nervous tissue, potentially curing these pathologies.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3502 [0.5 credit]**Neurodevelopmental Determinants of Mental Health**

Development of the human brain, the generation and differentiation of the various cell types, and the formation of the vast network of neural connections. How neurodevelopmental dysregulation can result in pathologies including dyslexia, ADHD, schizophrenia and autism.

Prerequisite(s): NEUR 2200 or PSYC 2200.

Lectures and seminars three hours a week.

NEUR 3999 [0.0 credit]**Co-operative Work Term****NEUR 4001 [0.5 credit]****Special Topics in Neuroscience**

Each section of NEUR 4001 deals with a different topic. Topics change yearly. Students may register in more than one section of NEUR 4001 but can register in each section only once.

Prerequisite(s): each section will have its own.

Lectures three hours a week.

NEUR 4200 [0.5 credit]**Seminar on Current Research in Neuroscience**

A seminar discussing how research on brain structure and function can lead to development of novel pharmacological, surgical and behavioral therapies of mental health diseases. Students will gain insight into the relationship between clinical observations and hypothesis-driven research into the biological basis of disease.

Precludes additional credit for PSYC 4200.

Prerequisite(s): PSYC 3200 or NEUR 3200.

NEUR 4207 [0.5 credit]**Neuropsychology of Memory Disorders**

Memory disorders that have a neuropsychological origin will be covered.

Precludes additional credit for PSYC 4207.

Prerequisite(s): PSYC 3207.
