Biochemistry

Requirements for the program Biochemistry and Biotechnology are presented in the Biotechnology program section of this Calendar.

Co-operative Education Option is available (see the Co-operative Education section of this Calendar).

Graduation Requirements

In addition to the requirements listed below, students must satisfy:

- 1. the University regulations (see the Academic Regulations of the University section of this Calendar).
- 2. the Faculty regulations applying to all B.Sc. students including those relating to Science Continuation and Breadth requirements (see the Academic Regulations for the Bachelor of Science).

Students should consult with the Institute when planning their program and selecting courses.

Course Categories for Biochemistry

The program descriptions below make use of the following course categories that are defined in the Faculty of Science Regulations section of this Calendar.

- · Approved Arts or Social Sciences
- · Free Electives

Program Requirements

Biochemistry

B.Sc. Honours (20.0 credits)

A. Credits included in the Major CGPA (13.5 credits) 1. 2.0 credits in:

		,	
1.	2.0 credits in:		2.0
	BIOL 1103 [0.5]	Foundations of Biology I	
	BIOL 1104 [0.5]	Foundations of Biology II	
	BIOL 2104 [0.5]	Introductory Genetics	
	BIOL 3104 [0.5]	Molecular Genetics	
2.	0.5 credit from:		0.5
	BIOL 2001 [0.5]	Animals: Form and Function	
	BIOL 2002 [0.5]	Plants: Form and Function	
3.	0.5 credit from:		0.5
	BIOL 3205 [0.5]	Plant Biochemistry and Physiology	
	BIOL 3305 [0.5]	Human and Comparative Physiology	
	BIOL 3307 [0.5]	Advanced Human Anatomy and Physiology	
4.	1.0 credit from:		1.0
	BIOL 3102 [0.5]	Mycology	
	BIOL 3201 [0.5]	Cell Biology	
	BIOL 3202 [0.5]	Principles of Developmental Biology

Seminar in Science (or an

Institute of Biochemistry Faculty of Science

Total Credits

NSCI 1000 IO 51

BIOC 2200 [0.5 credit] Cellular Biochemistry

Cellular functions and their interrelationships. Introduction to thermodynamics, membrane structure and function, transport mechanisms, basic metabolic pathways, energy production and utilization, communications between cells. It is strongly recommended that Biology Majors and Honours students take this course in their second year of study.

Also listed as BIOL 2200.

Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), (CHEM 1006 or CHEM 1002) or permission of the Institute. It is strongly recommended that students in Biochemistry programs take this course in their second year of study.

Lectures three hours a week, laboratory or tutorial four hours a week.

BIOC 2300 [0.5 credit] Physical Biochemistry

Energy of biological systems, molecular interactions, diffusion principles, introduction to protein folding, structure and thermodynamics, ligand binding and nucleic acid structures; experimental design and data management.

Precludes additional credit for CHEM 2103.

Prerequisite(s): BIOC 2200 (can be taken concurrently with BIOC 2300) and MATH 1007 and MATH 1107, and (PHYS 1007 and PHYS 1008) or (PHYS 1003 and PHYS 1004).

Lectures three hours a week, tutorials three hours a week.

BIOC 2400 [0.5 credit] Independent Research I

Students carry out a laboratory research project under the supervision of a faculty member from the Institute of Biochemistry. A research report must be submitted by the last day of classes for evaluation by the Director and Faculty supervisor.

Prerequisite(s): restricted to Honours students of secondyear standing in a Biochemistry program with a GPA of 10.0 or higher in first year, and approval of the Director and a Faculty supervisor.

Laboratory research for at least three hours a week over two terms.

BIOC 3008 [0.5 credit] Bioinformatics

20.0

A practical exploration in the application of information technology to biochemistry and molecular biology. Insight into biological knowledge discovery via molecular structure and function prediction, comparative genomics and biological information management.

Also listed as COMP 3308.

Prerequisite(s): BIOC 2200 or BIOL 2200; or permission of the Institute.

Five hours a week, computer workshop three hours a week.

BIOC 3101 [0.5 credit] General Biochemistry I

Chemistry, structure and function of proteins, lipids, carbohydrates and nucleic acids. Monomers, linkages and types of biochemical polymers that are formed. Mechanism of action of enzymes, regulatory control mechanisms of proteins and integration of biochemical pathways.

Precludes additional credit for CHEM 3401.

Prerequisite(s): (BIOC 2200 or BIOL 2200), and (CHEM 2203 and CHEM 2204) or (CHEM 2207 and CHEM 2208) or permission of the Institute.

Lectures three hours a week.

BIOC 3102 [0.5 credit] General Biochemistry II

Anabolic and catabolic processes. Regulation of cell compartment (membranes, mitochondria, chloroplast, peroxisome, nuclei) composition. Genetic controls of transcription, translation and post-translational modification of protein structure and function. Biochemical processes of disease, development, and toxicology. Prerequisite(s): BIOC 3101 and BIOL 2104. Lectures three hours a week.

BIOC 3103 [0.5 credit] Practical Biochemistry I

Introduction to experimental biochemistry and the theory and concepts dealt with in BIOC 3101, and BIOC 3202. Precludes additional credit for BIOC 3006 (no longer offered).

Prerequisite(s): BIOC 2200/BIOL2200 and CHEM 2203 or permission of the Institute. CHEM 2204 and (BIOC 2300 or CHEM 2103) are also recommended. It is highly recomended that BIOC 3101 and BIOC 3202 be taken concurrently.

Laboratory four hours a week, tutorial one hour per week.

BIOC 3104 [0.5 credit] Practical Biochemistry II

Introduction to experimental biochemistry and the theory and concepts dealt with in BIOC 3101, BIOC 3102, and BIOC 3202.

Precludes additional credit for BIOC 3006 (no longer offered).

Prerequisite(s): BIOC 3103. It is highly recommended that BIOC 3102 be taken concurrently.

Laboratory four hours a week, tutorial one hour a week.

BIOC 3202 [0.5 credit]

Biophysical Techniques and Applications

Theory and applications of current biochemical/biophysical instrumentation and techniques including biophysical spectroscopy, molecular structure determination, calorimetry, and mass spectrometry.

Precludes additional credit for BIOC 4002.

Prerequisite(s): BIOC 2200 or permission of the Institute. Lectures three hours a week.

BIOC 3400 [0.5 credit] Independent Research II

Students carry out a laboratory research project under the supervision of faculty member from the Institute of Biochemistry. A research report must be submitted by the last day of classes for evaluation by the Director and Faculty supervisor.

Prerequisite(s): restricted to Honours students of third-year standing in a Biochemistry program with a GPA of 10.0 or higher in second year, and approval of the Director and Faculty supervisor.

Laboratory research for at least three hours a week over two terms.

BIOC 3999 [0.0 credit] Co-operative Work Term

Practical experience for students enrolled in the cooperative option. Students must receive a satisfactory evaluation from their work term employer; and present a written report describing their work term project. Graded Sat or Uns.

Prerequisite(s): registration in the Biochemistry cooperative option and permission of the Institute.

BIOC 4001 [0.5 credit] Methods in Biochemistry

Principles and applications of modern biochemical methodology, including ultracentrifugation, electrophoresis, ELISA, EMSA, experimental planning, ligand binding kinetics, fluorescence spectroscopy, affinity purification, and in vitro translation.

Prerequisite(s): BIOC 3103 and BIOC 3104 or permission of the Institute.

Lectures and discussion two hours, laboratory four hours a week.

BIOC 4004 [0.5 credit] Industrial Biochemistry

The application of biochemistry to the production of biological compounds useful in nutrition, medicine, and the food and chemical industries. General strategies for efficient production of these compounds by controlling the activities of living cells or enzymes.

Prerequisite(s): BIOC 3101 and BIOC 3102 (BIOC 3102 may be taken concurrently), or permission of the Institute. Lecture three hours a week.

BIOC 4005 [0.5 credit] Biochemical Regulation

Regulation at the transcriptional, translational and metabolic level; regulation of cell and subcellular organelle function and other timely topics may be included. Prerequisite(s): BIOC 3101 and BIOC 3102. Lectures three hours a week.

BIOC 4007 [0.5 credit] Membrane Biochemistry

Biochemical and biophysical aspects of biomembrane structure and function. Topics may include: membrane lipids and proteins, lipid polymorphism, model membranes, liposomes, membrane biogenesis, the membrane cytoskeleton, membrane trafficking, membrane fusion, exocytosis and signal transduction across membranes. Prerequisite(s): BIOL 2200 or BIOC 2200, or BIOC 3101 (which may be taken concurrently with BIOC 4007), or permission of the Institute.

Lectures two hours a week and workshop two hours a week.

BIOC 4008 [0.5 credit]

Computational Systems Biology

Modeling and simulation of metabolic and regulatory networks towards understanding complex and highly dynamic cellular systems. Biotechnological applications include metabolic engineering, synthetic biology, and drug discovery.

Also listed as COMP 4308.

Prerequisite(s): BIOC 3101 or permission of the Institute. Lecture one and a half hours per week, workshop one and a half hours per week.

BIOC 4009 [0.5 credit] Biochemistry of Disease

The biochemical basis of disease including genetic and metabolic disorders such as cancer, neurological degenerative conditions, diabetes, stroke and microbial infections.

Prerequisite(s): BIOC 3101 and BIOC 3102, or permission of the Institute.

Lectures three hours a week.

BIOC 4200 [0.5 credit] Immunology

The organization and function of the immune system, including the anatomy of the immune system, the properties and behaviour of cells of the immune system, and the molecular and genetic bases of the immune response.

Also listed as BIOL 4200.

Prerequisite(s): BIOL 3201 or permission of the Institute. Lectures three hours a week.

BIOC 4201 [0.5 credit]

Advanced Cell Culture and Tissue Engineering

Theory and application of current techniques and developments in cell culture as applied to research questions in the field of stem cells and tissue engineering. Also listed as BIOL 4201.

Prerequisite(s): BIOL 3201 or permission of the Institute. Laboratory four hours per week, tutorial one hour a week.

BIOC 4202 [0.5 credit]

Mutagenesis and DNA Repair

A mechanistic study of mutagenesis and DNA repair. Topics include DNA structure perturbations, spontaneous and induced mutagenesis, the genetics and biochemistry of DNA repair and recombination, and the role of mutations in the development of genetic disease and cancer.

Also listed as BIOL 4202.

Prerequisite(s): BIOL 3104 and BIOL 2200/BIOC 2200, or permission of the Institute.

Lectures two hours a week and workshop two hours a week.

BIOC 4203 [0.5 credit]

Advanced Metabolism

Structure, biochemical derivation and function of secondary metabolites such as toxins and antibiotics. Examples from plant, fungal and animal systems. Prerequisite(s): BIOC 3101 and BIOC 3102, or permission of the Institute.

Lectures three hours a week.

BIOC 4204 [0.5 credit] Protein Biotechnology

An advanced lecture, discussion and seminar course covering the theory, development and current techniques of protein and enzyme engineering. Topics to be discussed may also include applications in biotechnology, nanotechnology and new frontiers in basic and applied research.

Precludes additional credit for BIOC 4002.

Prerequisite(s): BIOC 3101 and BIOC 3202 (may be taken concurrently), or permission of the Institute.

Lectures two hours a week, workshop two hours a week.

BIOC 4400 [0.5 credit]

Nuclear Dynamics and the Cell Cycle

Molecular cell biology of nuclear functions and the eukaryotic cell cycle. Topics may include chromosome architecture and dynamics; nucleocytoplasmic exchange; pre-mRNA processing; ribosome biogenesis; mitotic and meiotic nuclear disassembly and reassembly; regulation of cell proliferation and cell death.

Also listed as BIOL 4400.

Prerequisite(s): BIOL 3201, or BIOC 3102 or permission of the Institute.

Lectures one and a half hours per week, workshop one and a half hours per week.

BIOC 4708 [0.5 credit]

Principles of Toxicology

Basic theorems of toxicology with examples of current research problems. Toxic risk is defined as the product of intensive hazard and extensive exposure. Each factor is assessed in scientific and social contexts and illustrated with many types of experimental material. Prerequisite(s): (BIOC 3101 and BIOC 3102), or (CHEM 2204, CHEM 2303, FOOD 3001, and FOOD 3005), or permission of the Institute. Also offered at the graduate level, with different requirements, as BIOL 6402, CHEM 5708, for which additional credit is precluded. Lectures three hours a week.

BIOC 4901 [0.5 credit]

Selected Topics in Biochemistry

Selected topics of current interest in biochemistry are offered upon approval by the Director in consultation with members of the Institute.

BIOC 4906 [1.0 credit]

Interdisciplinary Research Project

Collaborative, interdisciplinary research project approved by the Director. Requires co-supervision, with at least one faculty member from the Institute of Biochemistry. Evaluation is based on a written thesis and poster presentation.

Precludes additional credit for BIOC 4907 and BIOC 4908. Prerequisite(s): (BIOC 3103 and BIOC 3104) and (BIOC 3101 and BIOC 3102) or equivalent, eligibility to continue in Honours Biochemistry or in Biochemistry and Biotechnology, permission of the Institute.

BIOC 4907 [1.0 credit]

Honours Essay and Research Proposal

An independent research study using library or computational resources. The candidate will prepare a critical review of a topic approved by a faculty adviser. Evaluation will be based on a written report and a poster presentation of the project.

Precludes additional credit for BIOC 4906 [1.0] and BIOC 4908 [1.0].

Prerequisite(s): fourth-year standing in an Honours Biochemistry program and permission of the Institute.

BIOC 4908 [1.0 credit] **Research Project**

Students carry out a research project approved by the Director, under the supervision of a faculty member of the Institute, in either the Biology or Chemistry departments. Evaluation is based on a written thesis and poster presentation.

Precludes additional credit for BIOC 4906 and BIOC 4907. Prerequisite(s): (BIOC 3103 and BIOC 3104) and (BIOC 3101 and BIOC 3102) or equivalent, and eligibility to continue in Honours Biochemistry or in Biochemistry and Biotechnology.
