Data Science (Collaborative Program)

This section presents the requirements for programs in:

- · M.Sc. Biology with Specialization in Data Science
- M.A.Sc. Biomedical Engineering with Specialization in Data Science
- M.Eng. Biomedical Engineering with Specialization
 in Data Science
- Master of Cognitive Science with Specialization in Data Science
- M.A. Communication with Specialization in Data Science
- M.C.S. Computer Science with Specialization in Data Science
- M.A. Economics with Specialization in Data Science
- M.A.Sc. Electrical and Computer Engineering with Specialization in Data Science
- M.Eng. Electrical and Computer Engineering with Specialization in Data Science
- M.Sc. Geography with Specialization in Data Science
- M.Sc. Health Sciences with Specialization in Data Science
- M.A. History with Specialization in Data Science
- Master of Information Technology: Digital Media
 with Specialization in Data Science
- M.A. Psychology with Specialization in Data Science

Program Requirements

Students enrolled in the Collaborative Program in Data Science must meet the requirements of their respective home units as well as those of the Collaborative Program. The requirements of the Collaborative Program do not, however, add to the number of credits students are required to accumulate by their home unit and the credit value of the degree remains the same. Consult the individual programs for detailed program requirements.

Regulations

See the General Regulations section of this Calendar, as well as regulations pertaining to the specific collaborative programs offering the data science specialization.

Admission

Students who are enrolled in a master's program in one of the participating units may apply to the Data Science governance committee for admission to the Collaborative Program. Admission to the program is determined by the governance committee and will normally take place before the end of October the year of admittance in one of the participating master's programs.

Admission requirements to the Collaborative Master's with Specialization in Data Science are:

- Registration in the master's program of one of the participating units
- Approval of a student's program of study by the Data Science governance committee and the student's home department. Students in a thesis program will be expected to choose a thesis topic that is directly related to Data Science. Students in an approved course work program will be required to take some elective courses in designated or approved courses with significant Data Science content.
