General Regulations

1. Administration of the Regulations

1.1 General Administration

The following regulations apply to all graduate degree and graduate diploma programs administered by the Faculty of Graduate and Postdoctoral Affairs.

1.2 Student Responsibility

1. It is the student's responsibility to remain informed of all rules, regulations and procedures required by their program and by the Faculty of Graduate and Postdoctoral Affairs. Ignorance of regulations will not be accepted as a justification for waiving such regulations and procedures.

Any exceptions to the rules, regulations and procedures must be approved in writing by the Dean of the Faculty of Graduate and Postdoctoral Affairs.

Students are responsible for establishing and maintaining contact with their departmental graduate supervisor/associate chair (graduate affairs) and, if appropriate, thesis/research supervisor.

2. To receive their degree or graduate diploma students must fulfil:
 - a. all the requirements of the department, school, or institute in which he or she is registered, including completion of an application for graduation;
 - b. all regulations of the Faculty of Graduate and Postdoctoral Affairs;
 - c. all University regulations;
 - d. all financial obligations to the University.

2. Admission Requirements and Eligibility

2.1 General Requirements

Graduates of recognized universities will be considered for admission to the Faculty of Graduate and Postdoctoral Affairs. The University's general policy on admission is outlined below, but all applicants should refer to the departmental websites for details concerning the specific or additional requirements of each department, institute, or school.

2.2 Eligibility

The eligibility of a candidate for admission into one of the graduate programs is based upon:

- the performance of the candidate and the assessment provided by his/her referees as a measure of the likelihood that the candidate can successfully complete the course of study and research defined by the Senate of the University for the given degree;
- the capacity of the graduate department, institute, or school to provide a program of study and research that would meet the expectations of the candidate as defined in his/her statement of academic interests and ambitions;
- the availability of a faculty member competent to supervise the candidate's academic program of study and research.

2.3 Qualifying-Year Program

Applicants who do not qualify for direct admission to the master's program may be admitted to a qualifying-year program.

Admission to the qualifying-year program does not imply automatic admission to the master's program. At the end of the qualifying-year program the student will be required to apply for entry into the master's program, at which time the department will determine the student's eligibility to enter the program. If successful, the student will be informed of this decision by the Dean of the Faculty of Graduate and Postdoctoral Affairs.

Applicants who require 3.0 credits or more of additional requirements to enter the master's program must complete a qualifying year.

Credits taken to fulfil the requirements of the qualifying-year program may not be used for credit for the master's degree. Courses taken extra to the program requirements of the qualifying year and which have been successfully completed may be considered for credit towards the master's degree.

2.4 Master's Program

For admission to the master's program, applicants must hold an honours bachelor's degree, or the equivalent, with, normally, B+ or better in the honours subject and B- or better overall. Applicants must also be recommended by the department in which they plan to undertake their studies.

2.5 Doctoral Program

For admission to the Ph.D. program, applicants must ordinarily hold a master's degree, or the equivalent, from a recognized university, normally with an average of B+ or better in courses (including thesis where applicable) and normally with no grade below B-.

2.6 Restriction on Degrees

Carleton University does not restrict the number of degrees (bachelor's, master's, Ph.D.) that may be taken in any one discipline at Carleton University, but some departments, institutes or schools may restrict the number to two.

2.7 Graduate Diploma Programs

For admission to the diploma programs, applicants are advised to consult with the individual departments, institutes or school offering the diploma.

3. Application for Admission

3.1 Accommodation Policy for Students with Disabilities

Carleton University has a Senate-approved policy on academic accommodation for students with disabilities. For more information, consult the Paul Menton Centre for Students with Disabilities at <http://www2.carleton.ca/pmc>.

3.2 Application Forms

Applications for admission to the Faculty of Graduate and Postdoctoral Affairs should be made through the online applications available at <https://gsapplications.carleton.ca>.

To cover administrative costs, a non-refundable application fee (CDN or US funds) is required with each application.

3.3 Deadlines

Normally, students are admitted to commence study in the fall term. However, some departments, institutes or schools may consider applicants to commence in the winter term or the spring/summer term.

For information on the specific deadlines for applications (with or without financial assistance), please visit the online application site by selecting the "Online Application Account" link from the Faculty of Graduate and Postdoctoral Affairs website at <https://gsapplications.carleton.ca>. In the online application site, application deadlines can be found on the left-hand navigation panel under "Program Deadlines."

Students applying to joint programs with the University of Ottawa should note that application procedures, especially deadlines, are different in the two institutions, and they should contact the individual institution for information.

3.4 Transcripts

Official transcripts of the applicant's entire university record must be sent to the Faculty of Graduate and Postdoctoral Affairs. All foreign documents, e.g., transcripts, must be translated into English and be notarized.

3.5 Letters of Reference

All applications must be supported by a minimum of two confidential letters of recommendation. The total number of referees required for your application depends on the program to which you are applying. A suitable referee is an individual who is fully knowledgeable and aware of your education and abilities. Referees should be academic in nature where possible. Professional referees will only be accepted in situations where the applicant's professional experience is most relevant. You will need to supply the names of your referees, and their email address, in the online application.

3.6 Proficiency in English

Proficiency in English is necessary to pursue graduate studies at Carleton University. All applicants whose first language is not English must satisfy this requirement in one of the following ways:

1. To present an official overall score of 70 on the Canadian Academic English Language (CAEL) Assessment with a minimum score of 60 in each band; or
2. To present an official Test of English as a Foreign Language (TOEFL) score of 580 on the paper-based test (PBT), or an overall score of 86 on the internet-based test (IBT) with a minimum score in each component of: writing-22; speaking-22; reading-20; and listening-20; or
3. To present an official overall International English Language Testing System (IELTS) score of 6.5, with a minimum of 6.0 in each band score; or
4. To present an official minimum score of 60 on the Pearson Test of English (Academic); or

5. To have completed ESLA 1900 or ESLA 1905 at Carleton University with a final grade of B- or higher; or
6. To present official certification (transcripts) to indicate that they have completed an undergraduate or graduate degree within the past three years in a university in Canada, the United States, the United Kingdom or any other country in which the primary language is English, and where the language of instruction in the relevant educational institution was exclusively English.

FGPA reserves the right to require further documentation or additional testing if they feel it necessary to demonstrate the required level of English language proficiency.

Note that some programs demand higher levels of competence in English, as specified in their Admissions Requirements in this Calendar.

Applicants whose first language is not English and who do not meet the requirements stated above may be offered admission to a graduate degree program with an English as a Second Language Requirement (ESLR) and/or will be required to take prescribed remedial course work as a condition of continuing in their program.

4. Admissions Procedure

4.1 General Procedure

All applicants for admission will be examined and evaluated by the department, institute, school or program in which the applicant wishes to study. All supporting documents (transcripts, letters of reference, etc.) must be received before any application can receive formal consideration.

Recommendations for admission will be forwarded to the Dean of the Faculty of Graduate and Postdoctoral Affairs for consideration. The official offer of admission comes from the Dean of the Faculty of Graduate and Postdoctoral Affairs. Any correspondence from departments, institutes, schools or programs with regard to acceptance is not official.

4.2 Admission Validity for New Students

The Statement of Standing on Admission is valid **only** for the term stipulated on the form. If the applicant fails to register for this term, his/her admission and registration eligibility will lapse automatically and he/she must re-apply for admission.

4.3 Revocation of Admission or Registration

Applications for admission or registration will be revoked if the University determines that the applicant has provided incomplete or misleading information.

5. Program Requirements

5.1 General Information

Program Descriptions and Details of Courses can be found in subsequent sections of this Calendar. Prospective applicants should note particularly the admission requirements, the fields in which advanced study and research may be undertaken, and the program requirements, in addition to the general regulations of the

Faculty of Graduate and Postdoctoral Affairs, which are detailed in this section.

5.2 Qualifying-Year Program

Students in the qualifying year will ordinarily register in 5.0 credits at the senior undergraduate level. Of these 5.0 credits, normally no more than 1.0 credit at the 2000-level and no more than 2.0 credits at the 5000-level may be taken. Credits taken to fulfill the requirements of the qualifying-year program may not be used for credit towards the master's degree.

5.3 Master's Program

The normal requirement for the master's degree is 5.0 credits (including the thesis where applicable).

In the case of a master's degree in the range of 5.0-9.0 credits, 1.0 credit may be selected from those offered at the senior undergraduate level, that is, at the 4000-level, with the approval of the program.

In the case of a 10.0 or more-credit master's degree, with program approval, 2.0 credits may be selected from those offered at the senior undergraduate level, that is, at the 4000-level.

5.4 Doctoral Program

Ordinarily, all courses taken for credit towards the Ph.D. degree must be at the 5000- or 6000-level.

The thesis will ordinarily carry a weight of about half of the total requirement of 10.0 credits.

5.5 Language Requirements

Some graduate programs require a reading knowledge of one or more languages other than English. Language requirements will be prescribed by programs according to their regulations and the needs of their students. Language requirements must be completed within the time limit allowed for the completion of the student's program.

6. Transfer of Credit

6.1 Transfer of Credit on Admission

Graduate courses completed at another institution or at Carleton University that have not been used to fulfill the requirements of another degree program may be accepted in partial fulfilment of Carleton's degree requirements. Credit for such work will be determined in each case by the Faculty of Graduate and Postdoctoral Affairs on the recommendation of the program concerned.

Master's candidates will be permitted to transfer the equivalent of up to 40 per cent of their coursework credit requirements on admission. In addition, if a master's candidate is granted transfer of credit for 40 per cent of their coursework credit requirements, his/her remaining credits at Carleton must be at the 5000 level.

Doctoral candidates may be given advanced standing for work completed at other universities, but must normally register for a minimum of one year of full-time studies thereafter at Carleton and fulfill the thesis and comprehensive examination requirements. Students admitted with transfer of credits in a Ph.D. program may be required to pass a qualifying examination upon entry.

A candidate who has completed credits as a special student will only be permitted to transfer such credits for degree credit in the Faculty of Graduate and Postdoctoral Affairs with the permission of the Dean.

Special students enrolled in a graduate level course are subject to the special student regulations outlined in the Undergraduate Calendar at <http://calendar.carleton.ca/undergrad/>.

Up to 1.0 credit of Carleton courses at the 5000 level or higher, completed by a student registered in the final year of study at a Carleton University undergraduate honours degree or equivalent may be considered for advanced standing in a Carleton University Master's degree, if the latter offers an Accelerated Pathway.

Students who are considered to participate in an Accelerated Pathway must obtain authorization from the academic unit offering this Master's program. All courses taken as part of the Accelerated Pathway must be at the 5000 level or higher. Details are specified in the corresponding "About the Program" section of the Calendar.

6.2 Transfer of Credit After Admission

A student admitted to and eligible to register in a graduate program is not permitted to register at Carleton University at the same time in any other graduate program or as an undergraduate or special student.

7. Registration and Course Selection

7.1 The Calendar Year

The Faculty of Graduate and Postdoctoral Affairs divides the calendar year into three terms; each term comprises about thirteen weeks of lectures or seminars. The first term of the academic year is designated as the fall term; the second term of the academic year is designated as the winter term; and the third term of the calendar year is designated as the spring/summer term. The precise dates of registration for the fall, winter, and spring/summer terms are specified in the Academic Schedule section of this Calendar.

7.2 Course/Program Approval

Initial course/program registration and any subsequent course changes must be approved by the program's graduate supervisor/associate chair (graduate affairs). This approval is also required for any undergraduate student who wishes to register in a graduate-level course.

Credit will be granted only for those courses and research activities for which the candidate is formally registered. An unregistered student is not entitled to attend lectures, tutorials, or seminars, and is not entitled to thesis supervision, examination privileges, or access to research facilities. Students will receive no credit for any work completed during a term in which they were not registered.

7.3 Student Records Information

Names

The University is committed to the integrity of its student records. Students are required to provide on their application for admission their complete legal name.

Any requests to change a name, by means of alteration, deletion, substitution, or addition, must be accompanied by appropriate supporting documentation. Upon making application for graduation, students may be asked to provide proof of their name.

Addresses

Incorrect address information will delay the receipt of awards and student information. Students must update the following address information at <https://central.carleton.ca>:

- permanent or mailing address (used for registration information)
- mailing address (used for all mail during the academic session)
- telephone number for permanent address and for mailing address

Disclosure of Information

Carleton University is required to disclose personal information such as Ontario Education Numbers, student characteristics and educational outcomes to the Ministry of Advanced Education and Skills Development under s. 15 of the Ministry of Training, Colleges and Universities Act, R.S.O. 1990, Chapter M. 19, as amended. The ministry collects this data for purposes such as planning, allocating and administering public funding to colleges, universities and other post-secondary educational and training institutions and to conduct research and analysis, including longitudinal studies, and statistical activities conducted by or on behalf of the ministry for purposes that relate to post-secondary education and training. Further information on how the Minister of Training, Colleges and Universities uses this personal information is available on the ministry's website.

Further information on the collection and use of student-level enrolment-related data can be obtained from the Ministry of Advanced Education and Skills Development website: <https://www.ontario.ca/page/ministry-advanced-education-and-skills-development>.

In accordance with the Freedom of Information and Protection of Privacy Act (FIPPA), all personal and academic information is considered confidential and will not be disclosed to a third party without the authorization of the person to whom the information pertains. In addition, the University will disclose at the time of collection of personal information the purpose for which that information will be used. For further information, please see <http://carleton.ca/privacy/fippa-at-carleton-university>.

Electronic Communication

The University provides each student with an email address and uses this as an official channel of communication with the student. A message sent to a student's university-provided email address constitutes an official communication to the student. Students are responsible for monitoring their University email address on a regular basis for as long as they are active in the academic affairs of the university. Requests from students regarding academic or administrative issues must be sent from the student's university-provided email address.

7.4 Course Selection

Students proceeding to a graduate degree or diploma must arrange their program according to the regulations of the Faculty of Graduate and Postdoctoral Affairs and their program.

The course and thesis requirements of each graduate program are organized or defined in units of credits: 1.0 credit is typically made up of three hours of lectures or seminars a week for two terms, or the equivalent; 0.5 credit is typically made up of three hours of lectures or seminars a week for one term, or the equivalent; 0.25 credit is typically made up of three hours of lectures or seminars a week for six weeks, or the equivalent.

7.5 Evaluation

To gain standing in a course, a student must meet the course requirements for attendance, term work, and examinations. Instructors will inform their classes by distributing written notices, before the last day for late registration, of the elements and their weighting that will contribute to the final grade, including (where applicable) attendance, class participation, essays, tests, laboratories, studio-workshops, other course-related work assignments, and final examinations.

7.6 Tutorial or Reading Courses

Tutorial or Reading Courses are arranged to allow students to take full advantage of all the resources of the University in areas or fields of a very highly specialized nature. Such arrangements are subject to the approval of the departmental graduate supervisor/associate chair (graduate affairs).

7.7 Audit Course

Graduate students must have approval from the course instructor and their program graduate supervisor/associate chair (graduate affairs) to audit a course.

- Full-time students are not charged an additional fee.
- Part-time students may only take 1.25 credits per term.

The student should discuss with the instructor the conditions and expectations under which as an auditing student they may be permitted to participate, including attendance and participation in class discussions and group work, and the submission of any material.

A request to change course registration from audit to credit status, or credit to audit, must be received by the Faculty of Graduate and Postdoctoral Affairs no later than the last day to add a course (of that duration) in the term. Students must satisfy all registration requirements to register in the course for academic credit. Students may not retroactively appeal to change the registration status from audit to credit, but may subsequently re-register in the course for credit. Graduate students are limited to a maximum of 1.0 course-weight audit registration per program.

7.8 Course Numbering System

Each course is designated by an eight-character alphanumeric code. The first four letters indicate the department, institute, school or committee under whose auspices the course is offered. The four numerical digits

identify the specific course. The credit value is indicated in square brackets following the course number.

7.9 Status

Full- or part-time status is established at the time of admission to a program. Graduate students admitted and registered as full-time students will be required to continue in and complete their program as full-time students, and will be assessed full-time fees for the duration of their program. Graduate students admitted and registered as part-time students will be required to continue and complete their program as part-time students, and will be assessed part-time fees for the duration of their program.

A part-time graduate student will not register in more than 1.25 credits per term, including audit courses.

Students who are unsure of their status should contact the office of the Faculty of Graduate and Postdoctoral Affairs for assistance at 613-520-2525.

7.10 Change of Status from Full- Time to Part-Time

Students who have valid reasons for changing status from full-time to part-time prior to registration for a term may apply for permission by:

- writing to the Dean of the Faculty of Graduate and Postdoctoral Affairs stating the reason(s) for seeking exemption from the full-time registration requirements stated in 7.9
- by completing a Change of Registration Status Form, accompanied by a statement from the departmental graduate supervisor/associate chair (graduate affairs) - and the thesis supervisor, if applicable - in support of their request.

It is understood that such a status change will be granted only in exceptional cases (e.g., for medical reasons.)

Exemptions are normally granted for a term.

7.11 Off-Campus Research

Graduate students may arrange to undertake full-time studies or research at another institution or in the field. Such activity may apply to only a part of the total program. The off-campus period may not normally exceed twelve months.

Requests for permission to undertake full-time off-campus study or research must be submitted to the Dean of the Faculty of Graduate and Postdoctoral Affairs with the approval of the department graduate supervisor/associate chair (graduate affairs). Such requests should include the following information:

- a detailed statement of the research proposal or program of studies, and the specific arrangements that are proposed for the supervision and direction of the work;
- an explanation of the reasons why the work cannot be satisfactorily undertaken while on campus at Carleton University;
- a description of the studies and/or research facilities that are available at the proposed off-campus location;
- a written statement from a responsible official (for example, the on-site supervisor or director) of the

external institution confirming that the proposed arrangements are satisfactory and that the candidate will be able to undertake research or studies;

- a time schedule for the proposed studies or research work;
- a statement of the candidate's expected sources of financial support.

Once the Faculty of Graduate and Postdoctoral Affairs grants approval, the student is expected to register prior to departure.

7.12 Cotutelle

Doctoral students may arrange to undertake a cotutelle in which they will complete the requirements of a Ph.D. program in both their home university and a partner university in another country.

Under such an arrangement, doctoral students conduct their dissertation research collaboratively, sequentially, and for roughly equal amounts of time in both universities. They are supervised in their dissertation research by a faculty member from each of the universities. The dissertation is then examined by a committee whose members are drawn from both institutions.

Students who undertake a cotutelle are not subject to general regulation 7.11.

Requests for permission to undertake a cotutelle must be made in accordance with Carleton University's Cotutelle Policy. More information can be found in the official Carleton University Cotutelle Policy.

7.13 Dual Master's Degree

Master's students may undertake a Dual Master's Degree pathway in which they would complete the requirements of a master's program in both their home university and a partner university.

Students who undertake a Dual Master's Degree pathway are not subject to general regulation 7.11.

Requests for permission to undertake a Dual Master's Degree pathway must be made in accordance with Carleton University's Dual Master's Degree Policy. More information can be found in the official Carleton University Dual Master's Degree Policy.

7.14 Inter-University Cooperation in Graduate Instruction

Under certain circumstances, it is permissible for a student admitted to a graduate degree program and registered at one university to follow an approved graduate-level credit course at another university. All interested students should consult the chair/director of their department, institute or school prior to registration in order to obtain further information on procedures and conditions of eligibility. In order for this procedure to be valid, students must be officially registered at their home institution.

7.15 University of Ottawa

Carleton University and the University of Ottawa have developed a number of joint programs at the graduate level. Where formal joint programs do not exist, a graduate student may be permitted to follow up to 2.0 credits at the

5000- or 6000-level at the University of Ottawa. Reciprocal arrangements exist among departments, institutes and schools at both universities. All interested students should consult their program graduate supervisor/associate chair (graduate affairs), prior to registration, in order to obtain further information on particular departmental conditions of eligibility and procedures. Students must be officially registered at their home institution.

8. Continuous Registration

8.1 Loss of Status

Any student who remains unregistered in his/her degree program for three continuous terms (twelve months) will lose his/her graduate status.

8.2 Continuous Registration in Thesis, Research Essay, or Independent Research Project

Any student (full-time or part-time), after initial registration in a thesis, research essay or independent research project, must maintain this registration in all successive terms (including the term in which the student is examined) until his/her thesis, research essay or independent research project is completed. Completion means submission of a final grade to the Faculty of Graduate and Postdoctoral Affairs after modifications/ revisions. Students should note that approval to register in the thesis, etc, is given on the understanding that the student will be in regular contact with his/her supervisor, and that thesis research will be actively pursued in each term of registration.

8.3 Deposit of Thesis

In the case of a thesis, registration must be maintained until the thesis is electronically deposited with the office of the Faculty of Graduate and Postdoctoral Affairs. Should thesis not be deposited with the office of the Faculty of Graduate and Postdoctoral Affairs by the last day for late registration in a given term, the student will be required to register for that term.

8.4 Reinstatement

Students whose files have been closed as a result of failure to observe continuous registration requirements or who have lost their status for non-registration for three continuous terms must apply for reinstatement within the term they lose their status if they wish to continue their studies. If reinstated, students must pay a reinstatement charge plus the equivalent of 1.0 credit tuition fees for each term in which they failed to register, as well as for the current term of registration.

8.5 Exemption from Registration

Students who have valid reasons for not registering for a term may apply for permission to remain unregistered by:

- Writing to the Dean of the Faculty of Graduate and Postdoctoral Affairs prior to the registration period stating the reasons for seeking exemption from registration;
- by completing an Exemption from Registration form accompanied by a statement from the program graduate supervisor/associate chair (graduate affairs) - and from their thesis supervisor, if applicable - confirming that they will not be on campus for the

term, will not use any University facilities (that is, library, laboratories, computer centre, etc.), or receive any supervision, including supervision through correspondence;

- While exempt from registration, students will not be registered with the Faculty of Graduate and Postdoctoral Affairs, neither will they be required to pay fees for this period. They will not be eligible to receive awards administered by Carleton University. In the case of external awards, the regulations of the particular granting agency will apply.

It is understood that such an exemption from registration will be granted only in exceptional cases (for example, medical reasons).

Exemptions are normally granted for one term.

When exemption from registration for a term or terms has been approved by the Dean of the Faculty of Graduate and Postdoctoral Affairs, this period will be exempt from the overall time limit for completion of the program.

An administrative fee per term for an exemption will be charged to the student's account.

8.6 Off-Campus Registration

Students who have been permitted to study off campus while registered full-time at Carleton must register using Carleton Central Web Registration at <http://carleton.ca/registrar/registration/>.

8.7 Course Changes

A course change is defined as the addition or deletion of one or more individual courses by a registered graduate student. This is the acceptable procedure for revising or correcting a graduate student's registration. Some course changes must be approved by the student's program graduate supervisor/associate chair (graduate affairs).

The deadline dates for course changes are stipulated in the academic schedule of this Calendar.

8.8 Withdrawal

Graduate students wishing to terminate their registration in a graduate program (that is, drop all courses) must notify their department in writing of their intent to withdraw.

Withdrawal Credit

When a student officially withdraws, a full refund will be issued if notification is received within the refund period. Students are encouraged to examine the financial and award implications of withdrawal. Refund deadline information is available at the Business Office and online at <http://carleton.ca/fees>.

Mid-Term Transfer of Program

There is no procedure at Carleton University for direct "mid-term" transfer from one graduate program to another. Similarly, there can be no direct transfer to or from undergraduate or special student status. Any candidate who elects to change programs after registration (before the last day of late registration) will be required to withdraw from the first program and then register in the second.

9. Examinations

9.1 General Remarks

Final examinations in courses will be held at the times indicated in the academic schedule. Graduate students must obtain grades that meet the standards outlined in Section 11, Academic Standing, and that satisfy the specific requirements of the program concerned.

9.2 Examination Regulations

Students writing tests and examinations should be aware of the rules governing examination conduct. These rules include those listed in the Academic Integrity section of this Calendar and information about policy and procedures for writing examinations distributed at the final examination.

For examinations scheduled during the official examination period, it may be necessary to schedule examinations during the day for classes held in the evening and vice versa, or on Saturday and Sunday.

All tests and examinations are subject to the following rules:

1. Tests or examinations given in class may not exceed the time allotted for the class.
2. The schedule for any term tests or examinations to be held outside class time must be communicated in the course outline. Students who are unable to write during this scheduled time must be accommodated before the last day of classes.
3. If there is a final examination in the summer term, it will be held during the official examination period;
4. If there is a final examination or an end-of-term examination in a multi-term course, this examination will be held in the official examination period;
5. No summative tests or final examinations may be held during the last two weeks of fall or winter terms, or during the last week of each half of the summer term;
6. Formative tests or examinations may be held during the last two weeks of classes of fall or winter terms, or during the last week of each half of the summer term, provided they do not total more than 15% of the final grade. The purpose of formative tests or examinations is to provide feedback to students on a component of the course content.
7. No tests or examinations may be held between the end of classes in a term and the beginning of formally scheduled examinations;
8. Normally, final take-home examinations in any term will be assigned on or before the last day of classes and are due on the last day of the official examination period. Final take-home examinations not set according to this normal practice must be formally scheduled by Scheduling and Examination Services and are subject to overload rules. In all cases the rules for take-home examinations must be well communicated to students by course instructors.
9. Students are not required to write with an exam conflict (defined as two examinations scheduled at the same time) nor in an exam overload, defined as (i) 3 or more examinations scheduled in 3 consecutive time slots, (ii) 4 or more examinations scheduled in 5 consecutive time slots, or (iii) 5 or more examinations scheduled in 7 consecutive time slots, where a time slot refers to the morning, afternoon, or evening time slot on an exam day.

9.3 Special/Deferred Final Examinations

In some situations, students are unable to complete term work because of illness or other circumstances beyond their control, which forces them to delay submission of the work.

1. Students who claim illness, injury or other extraordinary circumstances beyond their control as a reason for missed term work are held responsible for immediately informing the instructor concerned and for making alternate arrangements with the instructor and in all cases this must occur no later than three (3.0) working days after the term work was due. The alternate arrangement must be made before the last day of classes in the term as published in the academic schedule. Normally, any deferred term work will be completed by the last day of term. In all cases, formative evaluations providing feedback to the student should be replaced with formative evaluations. In the event the altered due date must extend beyond the last day of classes in the term, the instructor will assign a grade of zero for the work not submitted and submit the student's earned grade accordingly; the instructor may submit a change of grade at a later date. Term work cannot be deferred by the Registrar.
2. In cases where a student is not able to complete term work due to illness or injury for a significant period of time/or long term, the instructor and/or student may elect to consult with the Registrar's Office (undergraduate courses) Graduate Registrar (graduate courses) to determine appropriate action.
3. If a student is concerned the instructor did not respond to the request for academic accommodation or did not provide reasonable accommodation, the student should consult with the department/school/institute chair/director. If a mutually agreeable accommodation to complete course requirements prior to the course grade submission deadline cannot be achieved, the Associate Dean will become involved. If academic accommodation is not granted, and the student receives word **after** the academic withdrawal deadline, the student may submit a petition to the Registrar's Office (undergraduate courses)/Graduate Registrar (graduate courses) for a final grade of WDN (Withdrawn) in the course(s). If academic accommodation is not granted, and the student receives word **prior** to the academic withdrawal deadline, the student may elect to withdraw from the course(s).
4. Furthermore, if academic accommodation is granted, but the student is unable to complete the accommodation according to the terms set out by the instructor as a result of further illness, injury or extraordinary circumstances beyond their control, the student may submit a petition to the Registrar's Office

(undergraduate courses)/Graduate Registrar (graduate courses).

9.4 Master's Examinations

In addition to any examination which may be required in individual courses, or comprehensive examinations in required fields of specialisation, a master's candidate who is writing a thesis will be expected to undertake an oral defence of the thesis. When the degree is taken by course work, a comprehensive examination may be required. It is important to note that individual programs may have specific requirements.

9.5 Doctoral Examinations

Doctoral candidates may be asked to pass a qualifying examination at the beginning of their residency at Carleton University.

A comprehensive examination covering prescribed fields will normally be undertaken at least one year prior to the thesis defence. This examination (oral or written, or both) may include any material considered fundamental to a proper comprehension of the field of study.

After the thesis has been received and accepted for examination, a final oral examination on the subject of the thesis and related fields will be held.

The thesis examination must be conducted according to the principles and practices prescribed by the Faculty of Graduate and Postdoctoral Affairs at <http://www5.carleton.ca/fgpa/thesis-requirements/>.

9.6 Unsatisfactory Comprehensive Grades

If the comprehensive examination is graded Unsatisfactory, the program may permit the candidate to repeat the examination. If the comprehensive examination is graded Unsatisfactory for a second time, students must make an appeal to remain in their program through their program graduate supervisor/associate chair (graduate affairs) to the Faculty of Graduate and Postdoctoral Affairs.

10. Grading System

10.1 Letter Grades

Standing in a course is determined by the course instructor, subject to the approval of the faculty Dean. Standing in courses will be shown by alphabetical grades. The system of grades used, with corresponding grade points and the percentage conversion is below. Grade points indicated are for courses with 1.0 credit value. Where the course credit is greater or less than one credit, the grade points are adjusted proportionately.

Grade	Point Equivalence	Percentage Conversion
A+	12	90-100
A	11	85-89
A-	10	80-84
B+	9	77-79
B	8	73-76
B-	7	70-72
C+	6	67-69

C	5	63-66
C-	4	60-62
D+	3	57-59
D	2	53-56
D-	1	50-52
F	0	less than 50

In cases where the final examination is not written and was not explicitly a requirement to successfully complete the course, the cumulative grade earned on term work without the missing examination will be assigned.

If the grade conversion deviates from the percentage conversion presented above, the faculty member must notify the class in the course outline.

10.2 Other Grading Notations

Other grades and notations in current use by the university are as follows:

Notation	Description
AUD	AUD. No Academic Credit, no impact on CGPA. Audit indicates the course was taken for interest and not for academic credit.
CEX	Current International Exchange. An interim notation.
CLP	Current Letter of Permission. An interim notation.
CTN	Continuing. No academic credit and no impact on the CGPA. Assigned by the Registrar's Office to the first half of a course taught consecutively over two terms.
CUR	Current registration. An interim notation assigned by the Registrar's Office to indicate the student is currently registered in the course.
DEF	Deferred Final Examination and/or final course work. An interim notation administratively assigned by the Registrar's Office upon approval of a request to write a deferred final examination or defer submission of final course work. DEF must be replaced by a final grade within the prescribed time or be replaced with F.
F	Failure. The grade of F is assigned when the student has failed to meet the conditions of "satisfactory performance" defined in the Course Outline. F carries 0.0 grade points.

IP	In Progress – a notation (IP) assigned to a course by a faculty member when: At the undergraduate level, an undergraduate thesis or course has not been completed by the end of the period of registration. At the graduate level, a graduate thesis, research essay, independent research project or comprehensive examination has not been completed by the end of the period of registration. The IP notation may also be used at the graduate level when a research seminar has not been completed by the end of the period of registration provided the research seminar has been approved by Graduate Faculty Board as being eligible for the use of this notation. In the case of re-registration in any of the above courses, the IP notation will remain; a final grade will normally be assigned in the final period of registration. Where there is no re-registration in any of the above courses, the IP notation must be replaced with an appropriate notation or grade within the prescribed time period, or be replaced by a notation of WDN.
SAT	Satisfactory performance in an ungraded program requirement, option or course taken on Letter of Permission or International Exchange. SAT has no impact on the CGPA calculation.
UNS	Unsatisfactory performance in an ungraded program requirement, option or course taken on a Letter of Permission or International Exchange. UNS has no impact on the CGPA calculation.
WDN	Withdrawn. No academic credit, no impact on the CGPA. WDN is a permanent notation that appears on the official transcript for students who withdraw after the full fee adjustment date in each term (noted in the Academic Year section of the Calendar each term). Students may withdraw on or before the last day of classes.

10.3 Release of Grades

Students may access grades through the Carleton Central Student registration system at <http://carleton.ca/registrar/> registration as soon as the grades are available after the end of the fall and winter terms of the fall/winter session and after the end of the spring/summer session.

10.4 Transcripts

Students are advised that no official transcripts will be released by the University until all outstanding accounts have been paid.

11. Academic Standing

11.1 Qualifying-Year Program

Students should note that admission to the master's program from qualifying year is governed by the admission requirements in Section 2, Admission Requirements and Eligibility.

11.2 Master's Program

A grade of B- or better must normally be obtained in each course credited towards the master's degree. A candidate may, with the support of the departmental graduate supervisor/associate chair (graduate affairs)

and the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs, be allowed a grade of C+ in 1.0 credit. Some programs do not permit the C+ option and apply a B- minimum rule.

Full-Time Continuation

Full-time master's students who fail to achieve a weighted GPA of 7.0 after two terms of study, or to maintain it subsequently, will be required to withdraw from the program. In the event of special or extenuating circumstances, the student may apply through the program graduate supervisor/associate chair (graduate affairs) to the Dean of the Faculty of Graduate and Postdoctoral Affairs for permission to continue in the program.

Part-Time Continuation

Part-time master's students who fail to achieve or maintain a weighted GPA of 7.0 after completing 2.0 credits, or to maintain it subsequently, will be required to withdraw from the program. In the event of special or extenuating circumstances, the student may apply through the program graduate supervisor/associate chair (graduate affairs) to the Dean of the Faculty of Graduate and Postdoctoral Affairs for permission to continue in the program.

11.3 Doctoral Program

Doctoral students must obtain a grade of B- or better in each course credited towards the degree.

11.4 Departmental Evaluation

In addition to the above requirements, departments will undertake a periodic evaluation of a student's progress in his or her overall program to determine whether that progress is satisfactory. In the event that progress is deemed unsatisfactory, the program graduate supervisor may recommend to the Dean of the Faculty of Graduate and Postdoctoral Affairs that the student be required to withdraw.

11.5 Religious Accommodation

Carleton University accommodates students who, by reason of religious obligation, must miss an examination, test, assignment deadline, laboratory, or other compulsory event.

Accommodation will be worked out directly and on an individual basis between the student and the instructor(s) involved. Students should make a formal request to the instructor(s) in writing for alternative dates and/or means of satisfying requirements. Such requests should be made during the first two weeks of any given academic term, or as soon as possible after a need for accommodation is known to exist. Instructors will make reasonable accommodation in a way that shall avoid academic disadvantage to the student.

Students unable to reach a satisfactory arrangement with their instructor(s) should contact the Office of Equity Services at <http://www2.carleton.ca/equity/>.

Instructors who have questions or wish to verify the nature of the religious event or practice involved should also contact this office.

12. Thesis Requirements

Guidelines for the preparation of graduate theses [<http://carleton.ca/fgpa/thesis-requirements/>] and information on the procedures for examination of graduate theses are available on the Faculty of Graduate and Postdoctoral Affairs website.

12.1 General Remarks

The thesis is a major requirement of many master's and all doctoral programs and, in conjunction with the research for it, makes up at least one half of the time normally required for the program. The thesis must be expressed in a satisfactory literary form, consistent with the discipline concerned, and must display a scholarly approach to the subject and thorough knowledge of it. A critical review of previous work related to the subject should usually be provided.

Students will not be permitted to submit a thesis for which they have previously received a degree; however, with the permission of the Dean of the Faculty of Graduate and Postdoctoral Affairs, they may incorporate into the thesis material that was included in a previous thesis.

12.2 Master's Thesis

The master's thesis should exhibit a competence in the research process by applying an existing body of knowledge in the critical analysis of a new question or of a specific problem or issue in a new setting. On the basis of that conceptual understanding and methodological competence, it should demonstrate at least one of the following:

1. the development and support of a sustained argument in written form
2. originality in the application of knowledge

Oral Examinations

Students are required to undertake an oral examination of the thesis. Please refer to Thesis Specifications, Section 12.5, Master's, for submission deadlines. The master's thesis will be examined by a board consisting of at least four members, including the thesis supervisor, the chair of the department concerned, an examiner from a department other than that of the candidate, and one additional member from the department concerned. The chair of the department concerned will announce the constitution of the examination board. See Thesis Examination Policy at <http://carleton.ca/fgpa/thesis-requirements/>.

Thesis Weight

Thesis weight must be identified at the time of admission. A change in the thesis weight at a later date requires the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs.

12.3 Doctoral Thesis

The doctoral dissertation must report, in an organized and scholarly fashion, the results of original research. The thesis must be a contribution to knowledge, and must demonstrate the ability to conceptualize, design and implement research for the generation of new knowledge, applications, or understanding at the forefront

of the discipline, and to adjust the research design or methodology in the light of unforeseen problems.

Oral Examinations

The thesis must be defended successfully at an oral examination. Please refer to Thesis Specifications, Section 12.5, Doctoral, for submission deadlines. The doctoral thesis will be examined by a board consisting of at least five members, including the thesis supervisor, an examiner from a department other than that of the candidate, the members of the candidate's advisory committee, and an external examiner who is a recognized authority on the subject of the thesis. The Dean of the Faculty of Graduate and Postdoctoral Affairs, the Dean of the candidate's Faculty, and the chair/director of the candidate's department, institute or school are ex officio members of the board. The Dean of the Faculty of Graduate and Postdoctoral Affairs appoints an independent chair of the board, who is not from the candidate's department, institute or school.

The Dean of the Faculty of Graduate and Postdoctoral Affairs will announce the constitution of the examination board; both it and the thesis examination process are defined by the Thesis Examination Policy found at [<http://carleton.ca/fgpa/thesis-requirements/>].

Thesis Weight

Thesis weight must be identified at the time of admission. A change in the thesis weight at a later date requires the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs. The work of each Ph.D. candidate will be assisted by an advisory committee of faculty members who will aid the candidate in their preparation for the final comprehensive examination, and assist in the evaluation of the thesis and its oral examination.

12.4 Integrated Thesis Policy

Many disciplines, especially in engineering and the sciences, accept a thesis consisting of student work based on published papers, conference proceedings, or papers awaiting publication. Known as the 'integrated article,' 'manuscript,' 'sandwich,' or 'chapter' thesis, this type of thesis contrasts with the monograph thesis traditionally offered for examination. However, the same quality and ethical standards apply to each thesis type and the authority of the Thesis Examination Committee remains the same for both. Each individual academic unit decides the thesis format(s) suitable for its discipline.

A. Criteria for Integrated Article Thesis

The integrated article thesis is acceptable under the following conditions:

- The integrated thesis must consist of a coherent account of a unified research project. It is not a collection of loosely connected papers. The student will provide a document that locates a body of work within the context of existing theoretical and methodological debates in the literature, identifies the contributions of the thesis research to that literature and indicates potential directions for further research based upon knowledge gained through the thesis research.

- The thesis must be original and present the student's own work completed during the program of study for which the thesis is being submitted. The student should be the sole author or principal author of any included materials. The student must have played a major or sole role in setting up and conducting the research, obtaining data and analyzing results, as well as preparing and writing the documents submitted for examination. In the case where co-authored articles are included, the rules and procedures itemized in "Section D" below must be adhered to.
- The thesis must contain a statement from the thesis supervisor verifying the student's contribution to the originality of the material presented in the thesis and clarifying in what way the included materials became part of the thesis.

B. Integrated Article Thesis Format

Published articles which do not follow the traditional thesis formatting rules may be included as thesis chapters.

The body of an integrated article thesis should contain the following chapters:

- **Abstract**
The abstract includes a brief description of the subject matter and summarizes the main themes presented in the thesis.
- **Preface**
The preface must provide full bibliographical details for each article included in the thesis, as well as whether the article is reproduced in whole or in part. In the case of a partially reproduced article, the preface must include a description of the changes that have been made to the published version. Use of copyrighted material must be acknowledged in the preface and tables and figures must have "Reprinted with permission of..." in their captions. See below "Section C" on copyrighted material. Students must also indicate how others are to cite material from this thesis. In the case where the thesis includes co-authored material, see rules and procedures for co-authored material in "Section D", below.
- **Introductory Chapter /Literature Review**
The introductory chapter provides a comprehensive review of the literature that establishes the student's familiarity with relevant work in the field; sets out the objectives of the thesis; places the research into the larger context of the candidate's discipline; and provides an overall thematic cohesiveness of the chapters (research papers) to the reader.
- **Methods Chapter**
The methods chapter should include an overview of the methodological approach used in the thesis and the common methodological assumptions or techniques that link the data chapters into a cohesive entity. A crucial feature of the scientific method is repeatability. The thesis must thus contain detailed descriptions of the experimental procedures followed to obtain results, so as to ensure that readers may be able to test the validity of research outcomes. In cases where such detailed descriptions do not appear

in the integrated chapters, they must be included in the Methods Chapter. It is also acceptable to include this information in an Appendix, if the explanation is so protracted and tedious that it detracts from the readability of the main body of the text.

• Data (Research Paper) Chapters

Normally, 3 or 4 articles form the body of the thesis and are divided into separate chapters. This work must be smoothly integrated into the flow of the thesis to produce a unified and appropriately sequenced argument. To do so may require some additions, deletions or re- writing of the original material. In cases where a published article is directly reproduced as a chapter without reformatting, additional pages at the beginning and the end of the chapter should be added to ensure logical and coherent transition between chapters.

• Conclusion

The conclusion chapter summarizes and critiques the research topic as a whole, offers an analysis of the limitations existing in the study and suggests potential areas of future research based on the thesis findings.

• Bibliography and References and Citations

Bibliographic format should be appropriate to the discipline. Methods of handling and listing references in the text vary. Because the body of the thesis contains chapters representing a separate piece of published work, each chapter may contain its own bibliography. Depending upon the situation, the literature review and/or summary chapter may also contain bibliographies to reflect individual citations made in those sections. Tables and figures should be included in appropriate chapters and numbered consecutively using the chapter number e.g. Chapter 2 would be numbered Table 2-1, 2-2 and so on. This practice avoids the table number repetition that may occur if separate published article material is used.

• Appendices

Appendices are optional. Normally, appendices are included to provide information that detracts from the readability of the main body of the text or to present data or information used in the thesis but not directly obtained by the thesis author. For example, lengthy tables, detailed explanation of laboratory procedures, and computer programs may be included in the appendices.

Texts from Prior Theses

A prior graduate thesis or sections of a prior graduate thesis cannot be included as an article in the Ph.D. thesis. The goal is to present a coherent body of research rather than a collation of every piece of work that the student has produced. In the case where doctoral research is closely related to work already completed at the master's level, students will be requested to include a statement attesting to the fact that no text in the thesis has appeared in another thesis.

C. Copyrighted Materials and Permissions

Use of copyrighted material must be acknowledged in the Preface and tables and figures must have "reprinted with permission of..." in their captions.

If the student wishes the work to include text that has already been published as a journal article or book chapter, the student must obtain permission from the publisher and include it along with the thesis as a separate document. Note that Library and Archives Canada request that permissions be submitted separately with the thesis.

In a case where a thesis includes papers co-authored by the student and others, the thesis must state explicitly who contributed to such work and the nature and extent of that contribution. The candidate must obtain permission from the co-authors to use this work and provide a statement of permission along with the thesis as a separate document. Each co-author must include in the statement of permission the extent of her/his contribution to the article(s) included in the thesis. See Section D below.

D. Rules and Procedures for Integrated Theses which Include Co-Authored Material

Co-authored publications are a common practice in many disciplines. The thesis, however, must represent the work of the student submitting it for credit. It is thus imperative that rules and procedures be followed to ensure that a student submitting an integrated thesis which includes co-authored article(s) be examined and evaluated on their own contribution to the collective publication(s).

Preface and additional documents

The preface must include a statement from the supervisor and the student indicating that the student was fully involved in setting up and conducting the research, obtaining data and analyzing results, as well as preparing and writing the material presented in the co-authored article(s) integrated in the thesis. There must also be a statement that clearly distinguishes the specific contributions of the student from those of all other collaborators or co-authors. The supervisor must include a statement which confirms the information provided by the student in the preface. Additionally, each co-author must confirm in a signed statement the extent of her/his contribution to the co-authored article(s) included in the thesis. These statements must be provided along with the thesis as separate documents. The objective of this requirement is to assure examiners that there has been full disclosure of collaborative activity. In providing these statements, all parties involved must take into consideration the rules and regulations of Carleton University's Academic Integrity policy.

Multiple use of the same co-authored article(s)

As a general rule, the same text from a co-authored published article should not be used in more than one thesis. In the case of students who have worked collaboratively on projects leading to a published article which comprises different sections of text with different single-author attribution, the relevant section(s) of the article may be included in different theses. In the case of a wholly collaborative article where individual contributions

cannot be determined, the same article may be used in more than one thesis, but to a maximum of three theses. In cases where the same article appears in more than one thesis, each thesis must include a statement from all students and all supervisors involved confirming that all students collaborated equally in the production of the article(s). These statements must be provided along with the thesis as separate documents.

Issues of copyright must be addressed by the student as outlined in the copyright section above. The candidate must obtain permission from the co-authors to use this work and include a statement of permission along with the thesis as a separate document. Each co-author must include in the statement of permission the extent of her/his contribution to the article(s) included in the thesis.

E. Integrated Article Thesis Examinations

Article publication or acceptance of publication does not supercede the authority or responsibility of the Thesis Examination Committee to evaluate the thesis during the examination process and to recommend or require changes.

Thesis examination rules/policies and procedures are not changed to accommodate the integrated article thesis.

The oral examination concentrates on testing the candidate's knowledge as much as on questioning the written document.

12.5 Deadlines

Master's Thesis

Master's students expecting to graduate at the Spring Convocation must submit their supervisor-approved thesis, in examinable form, to the department by March 1. Master's students expecting to graduate at the Fall Convocation must submit their thesis by August 1. Master's students expecting to graduate at the Winter Graduation must submit their thesis by December 1. If the department requires further approvals, these must be obtained prior to the submission deadline.

Doctoral Thesis

Ph.D. students expecting to graduate at the Spring Convocation must submit their supervisor-approved thesis, in examinable form, to the department by March 1. Ph.D. students expecting to graduate at the Fall Convocation must submit their thesis by August 1. Ph.D. students expecting to graduate at the Winter Graduation must submit their thesis by December 1. If the department requires further approvals, these must be obtained prior to the submission deadline.

12.6 Specifications

- Prior to the examination, the candidate must submit the examinable version of the thesis, which must comply with the departmental requirements governing the form of the thesis, including methods of bibliographical entry and the use of diagrams and tables.
- The examinable version of the thesis must be accompanied by a suitable abstract. The abstract of a

master's thesis should not exceed 150 words, while the abstract of a doctoral thesis may be up to 350 words in length.

- Regulations regarding style, pagination, certification, acceptance, abstracts, reproduction, electronic dissemination, and the constitution of the examining board will be prescribed by the Faculty of Graduate and Postdoctoral Affairs.

Master's Thesis

Students are expected to notify their supervisor and the chair of the department at least two weeks in advance of the date on which they intend to submit the completed thesis. The examinable thesis must be submitted to the department at least four weeks in advance of the intended date of examination. The thesis examination and defense will then be scheduled and the date will be announced at least two weeks in advance.

Doctoral Thesis

The candidate is expected to notify their supervisor and the chair of the department at least two weeks in advance of the date on which they intend to submit the completed thesis. The candidate is then expected to submit the examinable thesis to the department at least six weeks in advance of the intended date of examination. The thesis examination and defense will then be scheduled and the date will be announced by the Dean of the Faculty of Graduate and Postdoctoral Affairs at least four weeks in advance. The department, institute or school must forward the examinable thesis to the office of the Faculty of Graduate and Postdoctoral Affairs at least four weeks in advance of the actual date for the examination and defense.

12.7 Licence to the University and to Library and Archives Canada

In the interest of facilitating research by members of the Carleton community and by interested outsiders, and in consideration of their having been accepted as a graduate student at Carleton, the author of a thesis or dissertation submitted in partial fulfillment of the requirements for an advanced degree shall grant to the University a license to disseminate the thesis electronically, solely for the purpose of private study and research.

Students wishing to deposit their thesis with Library and Archives Canada and participate in electronic distribution of their research are advised to review the revised procedures available online <http://www.collectionscanada.gc.ca/thesescanada/>

It is understood that the author retains other publication rights, and that neither the thesis nor extensive extracts from it may be printed or otherwise reproduced without the author's written permission.

12.8 Withholding of Thesis Deposition

If, at the time of submitting their thesis, students elect to protect any rights to immediate commercial publication, or to obtain a patent which may arise from their research, or to keep their thesis out of circulation, they may apply in writing to the Dean of the Faculty of Graduate and

Postdoctoral Affairs requesting that the thesis be withheld from deposit in the library:

- for an additional period of three months, without reason;
- for each additional period of six months, with reason (total period of restriction not to exceed two years).

A request for extension of the restriction must be submitted one month prior to the termination of the approved s period. Justification for extension of the restriction is required.

12.9 Degree Completion

A registered candidate who completes their degree requirements by depositing the thesis prior to the last day for withdrawal in any term (as specified in the academic schedule) is required to request formal withdrawal for refund purposes if they anticipate any refund of fees.

This applies to thesis or research essay registration.

13. Time Limits for Program Completion

13.1 General Remarks

There are maximum time limits for the completion of programs. Students may also be subject to time constraints prescribed by individual programs to ensure orderly and timely progress through their programs.

13.2 Master's Program

Full-time

All master's students admitted as full-time students must normally complete their degree requirements within two calendar years after the date of initial registration, unless their program states otherwise and regardless of any subsequent change of status to part-time. Terms of non-registration are equated to full-time registration terms when calculating the overall time to program completion.

Part-time

All master's students admitted as part-time students must normally complete their degree requirements within six calendar years after the date of initial registration, unless their program states otherwise. Terms of non-registration are equated to part-time registration terms when calculating the overall time to program completion. A change of a student's status from part-time to full-time status will result in a pro-rated reduction in the required time to completion for each subsequent term of full-time study.

Failure to complete the program within the prescribed time lines or failure to maintain continuous registration will require reevaluation of the student's entire program and may result in termination.

13.3 Doctoral Program

Full-time

All Ph.D. students admitted as full-time students and admitted on the basis of a master's degree (that is, with a program of 10.0 credits or the equivalent) must complete the Ph.D. degree requirements within five calendar years after the date of initial Ph.D. registration, regardless of

any subsequent change of status to part-time. Terms of non-registration are equated to full-time registration terms when calculating the overall time to program completion.

Part-time

All Ph.D. students admitted as part-time students must complete the degree requirements within nine calendar years after the date of initial Ph.D. registration. Terms of non-registration are equated to part-time registration terms when calculating the overall time to program completion. A change of a student's status from part-time to full-time status will result in a pro-rated reduction in the required time to completion for each subsequent term of full-time study.

Failure to complete the program within the prescribed time lines or failure to maintain continuous registration will require reevaluation of the student's entire program and may result in termination.

13.4 Exemption from Time Limit

When exemption from registration for a term or terms has been approved by the Dean of the Faculty of Graduate and Postdoctoral Affairs, this period will be exempt from the overall time limit allowed for completion of the program.

For Exemption from Time Limit procedure/forms please visit <http://gradstudents.carleton.ca/forms-policies/>

13.5 Extension of Time Limit

Time limits are strictly enforced. An extension of a student's time to completion will be considered only when there is substantial evidence that the student has attempted to make regular and consistent progress toward completion of the degree requirements. A written request to extend the completion date must be submitted to the Dean of the Faculty of Graduate and Postdoctoral Affairs one term before the normal time period to complete the degree expires. The request must be supported by the student's thesis supervisor and the program graduate supervisor/associate chair (graduate affairs). The request must include a plan of remaining work including the anticipated time of completion of the degree requirements. Each subsequent request to extend a student's completion date requires greater justification. Third requests for extensions are rarely, if ever, granted. Being employed full time is not in itself considered sufficient grounds for granting an extension.

An administrative charge for each term of extension will be applied to the student's account.

14.0 Co-operative Education Policy

Co-operative Education is based on the principle that academic study combined with work periods is an effective method of professional preparation. Work periods at various points in the academic program allow students to acquire experience within their discipline. The Co-operative Education program is a complement to the graduate students' academic studies. Students that are

accepted into the co-op option must prepare a work-term report that meets the expectations of each individual discipline.

Application Requirements

Graduate students have their first opportunity to apply to the co-op program once they have begun the first term in their Master's level program. The application must be completed via the Co-op and Career Services website before the end of the first term after beginning one of the degree programs which offers the co-op option. Students may also delay their participation until later in their degree, provided that they have a suitable number of credits remaining to complete their degree. These applications are reviewed and decisions made on a case-by-case basis.

Participation Requirements

Co-op Agreement

All graduate students must adhere to the policies which outline the requirements for participation in the Co-op Agreement. The Agreement can be located in the Co-op Resources section of MyCareer.

Communication with the Co-op Office

Graduate students must maintain regular contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Graduation with the Co-op Designation

In order to graduate with the co-op designation, graduate students must satisfy all requirements of the degree program in addition to co-op program requirements (successful completion of two work terms). An optional third work term may be approved under exceptional circumstances and/or when a student has been offered an extension with their current employer. Under no circumstances will a student be permitted to do more than three work terms.

Employment

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Work Term Assessment and Evaluation

To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Graduate students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Voluntary Withdrawal from the Co-op Option

Graduate students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option

Graduate students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to pay all co-op related fees;
2. Failure to actively participate in the job search process;
3. Failure to attend all interviews for positions to which the student has applied;
4. Declining more than one job offer during the job search process;
5. Continuing a job search after accepting a co-op position;
6. Failure to be registered in the Co-op Work Term course;
7. Dismissal from a work term by the co-op employer;
8. Leaving a work term without approval by the Co-op Manager;
9. Receipt of an unsatisfactory work term evaluation;
10. Submission of an unsatisfactory work term report;

Standing and Appeals

The Co-op and Career Services office administers the regulations and procedures that are applicable to the all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

While at Work

Graduate students will be registered in a Co-op Work Term course while at work.

Graduate students must be registered as full-time before they begin their co-op job search.

The student is permitted to register in 0.5 credit in addition to the Co-op Work Term course while on a work term. This course must be taken outside of working hours. If the course is only offered during work hours the student may request that the co-op office make an exception. Students must obtain the approval of the employer prior to submission and must be willing to make up the hours of work missed. At this time the department/student may request an exemption from continuous registration in their thesis.

Graduate Students are not permitted to hold a Teaching Assistantship while on a co-op work term. Where eligible, Teaching Assistantships will be deferred to a later term.

If the student is in receipt of an internal scholarship, this award remains active if the student registers in an additional 0.5 credit course, and is deferred to a later term otherwise.

Please note that external awards/scholarships will be issued/deferred based on the external agency criteria.

Graduate students may be permitted to finish their degree on a co-op work term provided they only have 0.5 credits remaining. The student must complete a request to the co-op office for consideration of approval.

International Students

All Graduate International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to accept a work term position. Confirmation of a position will not be approved until a student can confirm they have received their permit and the expiry date. Students are advised to discuss the application process and requirements with the International Student Services Office.

Co-op Fees

Graduate students participating in the co-op option of their degree program are required to pay the co-op fees. For full details on how the co-op fees are assessed please review the Graduate Fees section of the Co-op and Career Services website: <http://www1.carleton.ca/co-op/fees/graduate-fees/>

15.0 Grade Review

Within one month of the release of grades or the announcement of examination by committee (comprehensive examination, research essay or thesis) results, a graduate student may request, through the Faculty of Graduate and Postdoctoral Affairs, that one or more of their grades or results be reviewed. The results

of examination by committee (including comprehensive, research essay or thesis examinations) will only be reviewed on procedural grounds. Grades for other courses will be reviewed through the submission of all or part of the written coursework to two re-readers. The identity of the student will remain confidential. The average grade of the re-readers will replace the original of the reviewed work. Parts of grades based on non-written work (e.g., participation) will not be reviewed. The administration fee must accompany the review request. The process for the conduct of reviews can be found at <http://gradstudents.carleton.ca/wp-content/uploads/Grade-Appeal-Procedures.pdf>

Note: The review process will not take place if the fee is not remitted. If the grade is raised, the administration fee is refundable.

16.0 Program Review

A graduate student has the right to request a review of decisions made concerning their status or any other ruling relating to their program. All such requests are to be made in writing to the Dean of the Faculty of Graduate and Postdoctoral Affairs.

17.0 Records Retention Policy

Since 2005 the University has implemented a records retention policy which provides for the destruction of student file folders and their contents after a period of five years has elapsed since the last registration. This policy applies to those students who are formally admitted and registered in degree programs. Further information on this policy can be obtained by contacting the Faculty of Graduate and Postdoctoral Affairs.

18. Use of Student Work in Program Assessment

All academic programs at Carleton University are reviewed cyclically under the mandate of the Ontario Universities Council on Quality Assurance. Several programs at Carleton University are also accredited by professional bodies and must undergo review for continuing accreditation.

Student records and student work such as portfolios, exams, assignments, and theses may be used in the review and evaluation of academic programs. Appropriate steps will be taken to ensure that information and material used in the evaluation of a program is kept confidential and that the processes comply with applicable privacy regulations. These reviews may involve bodies external to the University, for example, in complying with reviews required by the government or professional accreditation bodies.

19.0 Academic Integrity

The complete policy is available at: <http://carleton.ca/senate/wp-content/uploads/Academic-Integrity-Policy1.pdf>

20. Offenses of Conduct

20.1 Discrimination and Harassment

The University has in place policies and procedures to deal with allegations of discrimination and harassment,

including sexual harassment. These are outlined in detail in the Carleton University Human Rights Policies and Procedures, effective May 1, 2001 and which can be found on the Carleton Web site under Equity Services.

Unacceptable conduct is outlined in the policy and includes discrimination or harassment based on race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, political affiliation or belief, sex, sexual orientation, gender identity, age, marital status, family status, or disability/handicap within the meaning of the Ontario Human Rights Code. Unacceptable conduct also includes threatening, stalking and unwelcome communication either in person or through electronic or other means. For the three policy sections below, the definition of prohibited behaviour is described in the italicized section that follows.

From the *Sexual Harassment Prevention Policy*

1. Sexual harassment occurs when an individual engages in sexually harassing behaviour or inappropriate conduct of a sexual nature that is known, or ought reasonably be known, to be unwelcome, and that:
 - 6.1 Interferes with the academic or employment performance or participation in a University-related activity for the person harassed; and/or
 - 6.2 Is associated with an expressed or implied promise of employment-related or academic-related consequence for the person harassed (including

reward, reprisal or condition of study or employment); and/or

6.3 Provides a basis for academic or employment decisions affecting the person harassed; and/or

6.4 Creates an abusive, demeaning, or threatening study, work or living environment for the person harassed; and/or

2. Sexually harassing behaviour may be physical, verbal or psychological. It may be conveyed directly or by telephone, writing or electronic means. Examples of inappropriate sexual conduct include:

7.1 Unwelcome sexual solicitations, flirtations or advances; sexually suggestive comments, gestures, threats or verbal abuse;

8. A course of sexualized comment or conduct that interferes with the dignity or privacy of an individual or group.'

Enforcement of this policy is carried out according to the procedures established in the policy. The procedures include the provision of advice and information to complainants and respondents and allow for various methods of informal resolution, including mediation.

Students with concerns regarding discrimination, harassment, stalking, sexist or racist behaviour, or any other prohibited action as outlined in the Human Rights Policy, should call or meet with a member of Equity Services for advice and guidance on how to handle the situation. This service is confidential and does not compel the student to take any further action.

Formal complaints must be made in writing and directed to the Dean or Vice President responsible for the area where the complaint took place. Staff in Equity Services are available to assist with the preparation of a formal complaint. Complaints must be made within 12 months after the last alleged incident of discrimination or harassment unless exceptional circumstances apply in which case the University Secretary may grant an extension of up to an additional 12 months.

The procedure for formal complaints is outlined below:

1. An allegation shall be made in writing to the Dean of the Faculty in which the program to which the respondent has been admitted belongs or, in the circumstances where the respondent has not been admitted to a program, to the Dean of the Faculty where the majority of courses in which the respondent has registered are administered. An allegation

against a student in residence when made by another student in residence which involves the complainant's enjoyment of her/his accommodation shall be made to the Vice-President (Academic). The Dean, or the Vice-President (Academic), as the case may be, shall cause to have an investigation conducted and, upon receipt of the report of the investigation, shall either

- a. dismiss the allegation on the grounds of insufficient evidence or lack of jurisdiction by the University, or
 - b. accept that the allegation is founded and seek the agreement of the respondent to a remedy, or
 - c. refer the matter to the President. A Dean's dismissal of the allegation may be appealed, within ten working days, to the Vice-President (Academic) who may, in turn, either
 - i again dismiss the allegation, or
 - ii accept that the allegation is founded and propose a remedy to the respondent, or
 - iii refer the matter to the President. In the case of students in residence, where the original allegation has been made to the Vice-President (Academic) and is dismissed, appeal shall be directly to the President who may either
 1. again dismiss the allegation, or
 2. accept that the allegation is founded and propose a remedy to the respondent, or
 3. refer the matter to a tribunal appointed by the Senate.
2. In the instance where the matter has been referred to the President, the latter shall decide whether or not the University shall conduct a hearing before a tribunal appointed by the Senate.
- If the allegation is proven, the tribunal shall decide upon one of the following sanctions:
- The student may be:
- a. expelled;
 - b. suspended for a period of time from all studies at the University;
 - c. restricted in his/her use of University facilities; and/or given a reprimand.
- Should the President decide not to conduct a hearing before a tribunal, the allegation shall be deemed to have been dismissed, but the President shall give written reasons for such a decision, and these reasons shall be communicated to the parties involved.
3. In the instance where the complainant wants redress from the University without the involvement of the respondent, or where the respondent is unknown or is not a member of the University community, and/or where there is a claim that the University has failed or has been negligent in providing a safe, non-hostile environment, the allegation of an offence shall be made in writing to the President, who shall cause an investigation to be conducted. Upon receipt of the report of the investigation, the President may order any relief he/she deems fit, and shall give written reasons

for the decision; which reasons shall be communicated to the complainant.

Information about procedure governing tribunals is available from the Clerk of Senate.

21. Appeals and Petitions

21.1 Criteria and Procedures

Assuming that a graduate student has exhausted all avenues of appeal and petition with the Dean of the Faculty of Graduate and Postdoctoral Affairs (questions regarding the appeals process can be directed to the Office of the Dean at 613-520-2518), a graduate student may appeal the decision of the University to deny the award of degree or the required withdrawal of the student to the Senate upon certain specific grounds.

Such grounds are the allegation by the student that the student has been denied a degree or forced to withdraw because of some mistake, error, or improper conduct by the University, its officers, or employees.

A graduate student may petition the Senate to grant a degree or to stay a decision of required withdrawal on compassionate grounds.

Such appeals and petitions must be submitted in writing, within ninety days of receipt by the student of the decision which is to be appealed or petitioned, to the Clerk of Senate.

22. Graduation

22.1 Conferring of Degrees

On the recommendation of the Faculty of Graduate and Postdoctoral Affairs and with the approval of the Senate of the University, degrees are conferred by the Chancellor in the spring and fall of each year.

22.2 Application Deadlines

Candidates may have their degrees certified in February each year; they must apply by December 1. Students expecting to graduate at the Spring Convocation must apply for graduation in the Graduate and Postdoctoral Affairs office by April 1. Those expecting to graduate at the Fall Convocation must apply by September 1.

Regulations

See the General Regulations section of this Calendar.

Minimum Grade Requirement

A grade of B- or better is required in each credit counted toward the master's degree. With the recommendation of the department, and permission of the Dean of the Faculty of Graduate and Postdoctoral Affairs, a candidate may be allowed a grade of C+ in 1.0 credit or each of two 0.5-credits.

Transfer from One M.A. Option to Another M.A. Option

Students who choose to change from one program option to another (i.e., from/to the thesis, research essay, or course work option), are required to do so before registering for a third term after initial, full-time registration, or before registering for a fifth term after initial part-time registration.

Regulations

See the General Regulations section of this Calendar.

Candidates must obtain a grade of B- or higher in each course and Satisfactory on the Ph.D. thesis and its oral defence.

Admission

M.A. Anthropology

The requirement for admission into the master's program is a B.A. Honours (or the equivalent) with at least high honours standing in anthropology or a closely-related field. Where relevant, previous professional experience will be taken into account in determining an applicant's standing on admission.

Qualifying-Year Program

Applicants with general (three-year) bachelor's degrees may be admitted into a qualifying-year program designed to raise their standing to honours status. Students earning at least high honours standing in their qualifying-year courses will be considered for admission into the master's program. Refer to the General Regulations section of this Calendar for details of the regulations governing the qualifying year.

Accelerated Pathway

The accelerated pathway in Anthropology is a flexible and individualized plan of graduate study for students in their final year of a Carleton B.A. Honours degree in Anthropology.

Students in their third or early#fourth year of study in the B.A. Honours degree in Anthropology should consult with the Graduate Co-ordinator to determine if the accelerated pathway is appropriate for them.

Accelerated Pathway Requirements

1. ANTH courses at the 5000#level or higher with a grade of A- or higher, excluding ANTH 5900.

2. Minimum GPA in Anthropology of A-

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion for the M.A. degree. The final decision on whether or not advanced standing will be granted will be made at the time of admission. Students should indicate the desire to be considered for advanced standing in their application for admission to the M.A.

Admission

Ph.D. Anthropology

The Ph.D. Anthropology normally will be undertaken on a full-time basis, however the department will consider admission on a part-time basis. Full-time students are expected to complete the program in four years, and part-time students are expected to complete the program in eight years.

The normal requirement for admission to the Ph.D. program is a master's degree (or equivalent) in anthropology, normally with a minimum average of A-, and with no grade below B.

A student already enrolled in the Carleton M.A. program in Anthropology who shows outstanding academic performance and research promise may be permitted to transfer to the Ph.D. program upon completion of the M.A. course work and upon the recommendation of the Anthropology graduate committee.

Applicants whose academic preparation has deficiencies in certain areas may be admitted to the Ph.D. program, but will normally be required to complete additional course work.

Applicants whose first language is not English must demonstrate a fluent knowledge of English. Please see sections 3.6 in the General Regulations section of this calendar.

The normal requirement for admission is a four-year bachelor's degree in engineering, science, computer science, or a related discipline, with an average of at least B+.

M.A.Sc. Biomedical Engineering Accelerated Pathway

The accelerated pathway in the M.A.Sc. Biomedical Engineering is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.Eng. degree with demonstrated academic excellence and aptitude for research may qualify for this option.

Students in their third-year of study in the B.Eng. degree should consult with both their Undergraduate Program Coordinator and the Associate Chair for Graduate Studies to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Admission

M.Eng. Biomedical Engineering

The normal requirement for admission is a four-year bachelor's degree in engineering, science, computer science, biomedical sciences, health sciences, or a related discipline, with an average of at least B+. Applicants should note that simply meeting the minimum standards for admission will not guarantee admission to the program as there are only a limited number of positions available each year.

Admission

Ph.D. Biomedical Engineering

The normal requirement for admission into the Ph.D. program is a master's degree with thesis in engineering, science, computer science, or a related discipline, with an average of at least B+.

Students registered full-time in the M.A.Sc. in Biomedical Engineering program at Carleton University, who shows outstanding academic performance and demonstrates significant promise for advanced research, may be permitted to transfer into the doctoral program, without completing the master's program, upon recommendation of the student's home academic unit.

Comprehensive Examinations

All Ph.D. candidates are required to successfully complete a comprehensive examination. The examination will cover material relating to the student's area of specialization, research methodology associated with that area, and seminal and important works in the management field. Questions for the examination will be set by the

student's comprehensive examination committee. The comprehensive examination will take place over a period of two to three weeks and will consist of a written and an oral part.

The comprehensive examinations must be completed successfully before the Ph.D. proposal defense is scheduled. Under normal circumstances, the written comprehensive and the oral defense must occur within eight terms of a full-time student's initial registration in the Ph.D. program. Part-time students should complete the comprehensives within sixteen terms of initial registration in the Ph.D. program. Students who do not fulfil this requirement will be asked to withdraw from the program.

Thesis

All Ph.D. candidates are required to complete successfully a thesis normally equivalent to a minimum of 5.0 credits on a topic approved by the School. Students with appropriate background will be reviewed for possible adjustment of thesis weight.

Regulations - M.Acct.

See the General Regulations section of this Calendar.

Guidelines for Completion

Students admitted as full-time students must normally complete their degree requirements within four terms after the date of initial registration.

Academic Standing

A grade of B- or better is normally required in each credit counted towards the degree. However, a candidate may, with the recommendation of the School and the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs, be allowed to count a grade of C+ in 0.75 credits.

Withdrawal from the program will be required if an M.Acc. student:

- Receives a grade of lower than B- in 1.25 credits or more, or
- Fails to achieve a weighted GPA of 7.0 after completing 2.0 credits of study, or to maintain it, or
- Receives a grade lower than C+ in the same course more than once.

Ph.D. Management

Admission into the Ph.D. Management program will be judged primarily on the applicant's ability to undertake research successfully and his/her prospects for completion of the program.

The normal requirement for admission to the doctoral program in management is a master's degree (or equivalent) in business or a related field with an A-average and a bachelor's degree. A number of years of work experience is desirable.

A student enrolled in a research-based master's program in business who has completed a minimum of 2.5 credits and who has shown outstanding academic performance and research promise may be admitted to the Ph.D. program without completing the master's program. Normal Ph.D. program requirements, as stated below, will apply. Each case will be considered on an individual basis for

advanced standing in the Ph.D. program. Advanced standing will be considered for a maximum of 1.5 credits.

Applicants who have completed a thesis-based master's program in business or a related area may have their program requirements adjusted at the time of admission, as set out below.

All Ph.D. candidates, regardless of their previous field of specialization, are expected to have or to acquire a basic knowledge of statistics and at least two of the following areas of management: accounting, finance, information systems, international business, management science, marketing, organizational behaviour, and productions/operations management. Students will be admitted to the program with a course of study designed where appropriate to supplement previous education, experience, and training.

Graduate Management Admission Test (GMAT) - the School requires that all applicants submit scores obtained in the Graduate Management Admission Test (GMAT) offered by the Graduate Management Admission Council (GMAC). Successful candidates will normally have a GMAT score of at least 600. Equivalent GRE scores (as defined by the Educational Testing Service) may be considered.

All applicants whose first language is not English must be tested for proficiency in the English language. See Section 3.6 of the General Regulations section of this Calendar for details.

Regulations - M.B.A.

See the General Regulations section of this Calendar.

Academic standing: a grade of B- or better is normally required in each credit counted towards the degree. However, a candidate may, with the recommendation of the School and the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs, be allowed to count a grade of C+ in 0.75 credits.

Withdrawal from the program will be required if an M.B.A. student:

- Receives a grade of lower than B- in 1.25 credits or more, or
- Fails to achieve a weighted GPA of 7.0 after completing 2.0 credits of study, or to maintain it, or
- Receives a grade lower than C+ in the same course more than once.

M.A.-M.B.A.: students following the M.A.-M.B.A. dual pathway are governed by the academic regulations for the M.B.A. (above) and the M.A. Economics. For academic regulations concerning the M.A., consult the Economics programs section of this Calendar.

Guidelines for Completion

Details on program timing are provided in the General Regulations section of this Calendar, under **Time Limits for Program**

Before students take concentration courses, they must have successfully completed the relevant core courses.

Elective credits may be selected from any of the other concentration courses for which students have the prerequisites, M.B.A. electives, or from relevant courses in other departments. Permission of the School is required for elective courses taken outside of Sprott and students are normally limited to no more than 1.5 credits outside of Sprott.

Students having less than two (2) years of professional employment experience must successfully complete BUSI 5999 [1.0] Internship in order to graduate. While enrolled in BUSI 5999, students are permitted to register in no more than the equivalent of 0.5 credit per term and this course(s) must be taken outside of normal working hours.

Regulations

See the General Regulations section of this Calendar.

Academic Standing

A grade of B- or higher is normally required in each credit counted towards the degree. However, a candidate may, with the recommendation of the School and the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs, be allowed to count a grade of C+ in 0.5 credit.

Withdrawal from the program will be required if an M.Sc. student:

- Receives a grade of lower than B- in 1.0 credit or more, or
- Fails to achieve a weighted GPA of 7.0 after completing 2.0 credits of study, or to maintain it, or
- Receives a grade lower than C+ in the same course more than once.

Regulations - PhD

See the General Regulations section of this Calendar.

Academic Standing: doctoral students must normally obtain a grade of B- or better in each credit, and Satisfactory on the comprehensive examinations, the Ph.D. thesis and its oral defence.

Admission

M. Accounting

Applicants are expected to hold an honours bachelor's degree or equivalent, with a minimum overall average of B-; demonstrated coverage of the CPA Competency Map at the 'Entry' level, and a minimum grade of C- in each of the prerequisite courses (courses that meet the Entry level requirements of the CPA Competency Map) with a minimum overall average of B+ in the prerequisite courses.

Students who hold a CPA, CMA designation and who have completed the Strategic Leadership Program, Case Examination and Board Report, may be exempted from the course ACCT 5133 Advanced Integration I, with the approval of the M.Acc. Director.

Proficiency in English is necessary to pursue graduate studies at Carleton University. See Section 3.6 of the General Regulations of this Calendar for English proficiency rules.

M.B.A. and M.B.A. Accelerated Stream

- Applicants are expected to hold an Honours bachelor's degree or equivalent, with a minimum overall average of B.
- The Sprott School requires that all applicants submit a GMAT (Graduate Management Admission Test) with a minimum score of 550 or an equivalent GRE (Graduate Record Exam) score. The GRE Comparison Table for Business Schools can be used to calculate equivalent GRE scores.
- Proficiency in English is necessary to pursue graduate studies at Carleton University. See Section 3.6 of the General Regulations of this Calendar for English proficiency rules.

M.B.A. Accelerated Stream

Applicants to the M.B.A. accelerated stream must meet the following additional criteria:

- Must have completed, in the past five years, a four-year bachelor's degree from a recognized Canadian university in Business, or Economics with a minor in Business, or equivalent, and
- Have a minimum overall average of B+.

Note: admission is judged primarily on the applicant's ability to successfully undertake advanced study in management based on his/her work experience and achievement, GMAT score and undergraduate grades. Possession of the minimum admission requirements does not, in itself, guarantee acceptance.

M.A.-M.B.A.

Applicants to the M.A.-M.B.A. dual degree pathway must qualify for admission for both the M.A. Economics and the M.B.A program. For admission information concerning the M.A., consult the Economics program section of this Calendar.

M.Sc. Management

Admission into the M.Sc. in Management program will be judged primarily on the applicant's potential to undertake research successfully and his/her prospects for completion of the program. Applicants will submit a research proposal statement on applying to the program.

The normal requirement for admission to the master's program in management is an Honours Bachelor of Commerce degree (or equivalent, e.g. 4-year Commerce, Bachelor of Business Administration or similar degrees) with at least a B+ average. Applicants who do not meet the normal requirements for admission may be required to complete additional courses, extra to the normal program requirements.

All applicants to the program are required to submit a GMAT (Graduate Management Admission Test) score with a minimum of 600 or an equivalent GRE (Graduate Record Exam) score. To calculate the equivalent GRE score, applicants can use the GRE Comparison Table for Business Schools.

Ph.D. Management

Admission into the Ph.D. Management program will be judged primarily on the applicant's ability to undertake research successfully and his/her prospects for completion of the program.

The normal requirement for admission to the doctoral program in management is a master's degree (or equivalent) in business or a related field with an A-average and a bachelor's degree. A number of years of work experience is desirable.

A student enrolled in a research-based master's program in business who has completed a minimum of 2.5 credits and who has shown outstanding academic performance and research promise may be admitted to the Ph.D. program without completing the master's program. Normal Ph.D. program requirements, as stated below, will apply. Each case will be considered on an individual basis for advanced standing in the Ph.D. program. Advanced standing will be considered for a maximum of 1.5 credits.

Applicants who have completed a thesis-based master's program in business or a related area may have their program requirements adjusted at the time of admission, as set out below.

All Ph.D. candidates, regardless of their previous field of specialization, are expected to have or to acquire a basic knowledge of statistics and at least two of the following areas of management: accounting, finance, information systems, international business, management science, marketing, organizational behaviour, and productions/operations management. Students will be admitted to the program with a course of study designed where appropriate to supplement previous education, experience, and training.

Graduate Management Admission Test (GMAT) - the School requires that all applicants submit scores obtained in the Graduate Management Admission Test (GMAT) offered by the Graduate Management Admission Council (GMAC). Successful candidates will normally have a GMAT score of at least 600. Equivalent GRE scores (as defined by the Educational Testing Service) may be considered.

Regulations

The minimum requirements for the master's program are outlined in the General Regulations section of this Calendar.

The School of Indigenous and Canadian Studies specifies that all candidates must select one of the following three program patterns:

- 4.0 credits of coursework
- 3.0 credits plus a 1.0 credit research essay
- 2.0 credits plus a 2.0 credit thesis

Students must declare their option as coursework, thesis, or research essay no later than the end of the second term

of registration for students enrolled full-time, and no later than the end of the fifth term of registration for students enrolled part-time. For students beginning their program in September the deadline is the following April 30, and for students starting in January the deadline is the following August 31.

Regulations

Consult the General Regulations section of this Calendar.

Doctoral candidates must successfully complete 10.0 credits. Candidates with deficiencies in certain areas may be admitted to the Ph.D. program, but normally will be required to complete additional work.

Academic Standing

All Ph.D. candidates must obtain at least B+ standing or better (GPA 9.0) in each course counted towards the degree. Comprehensive examinations (which will be graded on a Satisfactory, Unsatisfactory or Pass with Distinction basis) are exempted from this required standing.

Admission

Applicants to the M.A. Canadian Studies are required to hold a B.A. Honours (or the equivalent), with at least high honours standing.

Accelerated Pathway

The accelerated pathway in the M.A. in Canadian Studies is a flexible and individualized plan of graduate study for students in their final year of a Carleton M.A. in Canadian Studies.

Students in their third-year of study in the B.A. Honours Canadian Studies degree should consult with both the Undergraduate Supervisor and the Graduate Supervisor to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Accelerated Pathway Requirements

1. CDNS courses at the 5000-level with a grade of B+ or higher
2. Minimum overall CGPA of A-

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Qualifying Year

Applicants who do not qualify for direct admission to the master's program may, in exceptional cases, be admitted to a qualifying-year program. However, admission to the qualifying-year program does not imply automatic admission to the master's program. At the end of the qualifying-year program the student will be required to apply for entry into the master's program, at which time the School will determine the student's eligibility to enter the program.

Proficiency in English

Proficiency in English is necessary to pursue graduate studies at Carleton University. All applicants whose first

language is not English must satisfy this requirement by presenting a TOEFL score of 600 or higher.

Language Requirement

The School requires a reading knowledge of French. This is a program requirement and not an admission requirement. This requirement may be satisfied in the following ways:

- Successful completion of FINS 3105 or its equivalent (with a grade of B- or better).
- Successful completion of a French language examination.
- Alternatively, a student may fulfill this requirement with a demonstrated knowledge of an Aboriginal language.
- The School conducts the French language examinations in September and January. Students choosing the first option should note that examination results in these courses form part of their record, although they are additional to the course requirements for the degree.

Admission

Admission to the Ph.D. Canadian Studies requires a master's degree (or equivalent), with at least high honours standing in Canadian Studies or one of the disciplines represented in the School. Applicants should note, however, that meeting the admission requirement does not guarantee admission to the program.

The Ph.D. program in Canadian Studies normally will be undertaken on a full-time basis. In cases of exceptional merit, the School will accept a few candidates for the degree on a part-time basis.

Language Requirement

All doctoral students are required to pass the Ph.D. program's language test. The language test entails the translation into English of a French text (or a text in another approved language such as an Aboriginal language indigenous to Canada or another language if it is demonstrably relevant to their research interest).

The language test is two hours long, and students are permitted to use a dictionary. Grades for the language test are Pass or Fail.

Students who have taken a language test as a requirement for their M.A. cannot use it to meet the Ph.D. language requirement. In order to establish equal treatment of all students, all doctoral candidates will be required to pass the Ph.D. language test.

Comprehensive examination Part 1 examines the depth and breadth of knowledge in the student's own research area.

Comprehensive examination Part 2 will involve the submission of a research proposal that is both novel and of a sound scientific basis that may be loosely related to the thesis research of the student but not a topic that the student has investigated in any manner. The research proposal will be submitted to a committee for oral defense.

Failure to pass either part of the comprehensive examination will result in deregistration from the graduate program.

Program Requirements from M.Sc. Chemistry

- Only one seminar course will be required if a grade of at least A- has been obtained in Seminar I (CHEM 5801 [1.0] or equivalent). In addition, credit for up to 1.0 credit of graduate courses may be given to reduce the requirement for graduate course credit from two to one, if a grade of at least an A- has been obtained in each of the courses taken during M.Sc. Students must complete their comprehensive examination within two years or be withdrawn from the program.

Regulations

See the General Regulations section of this Calendar.

Residence Requirement

At least one year of full-time study is required for the M.Sc. program.

Guidelines for Completion of Master's Degree

Full-time students in the master's program will normally complete the degree requirements in two years. Part-time students will normally complete the degree requirements in four years.

Regulations

See the General Regulations section of this Calendar.

Thesis Advisory Committee

Within four months of initial registration in the Ph.D. program, a Thesis Advisory Committee (TAC) will be appointed for each student. The committee will consist of a minimum of three members, including the thesis supervisor and, where practicable, at least one member will be from the other campus of OCCI. Committee membership may include adjunct faculty members of the Faculty of Graduate and Postdoctoral Studies (FGPS) at the University of Ottawa or the Faculty of Graduate Studies and Research at Carleton.

Once a year, the student will prepare a formal Thesis Progress Report. The report is not to exceed one page and will outline the problem, methodology used, results achieved, and aims for future research. The TAC will evaluate the report and indicate whether the student has made satisfactory progress. A meeting to discuss the student's progress may be held at any time at the request of either the student or the committee.

Admission

Honours B.Sc. degree in Chemistry, with a B+ average in the last two years and a B average overall.

Applicants who do not meet this requirement, or whose undergraduate degree is in another, closely related field, may be accepted into the program, but may be assigned extra courses.

Qualifying Year

Applicants who do not qualify for direct admission to the Master's program may be admitted to a qualifying-year program (see 2.3 under General Regulations).

5.0 credits must be completed within two consecutive fall and winter terms, including a 1.0 credit Research Project and Seminar course (CHEM 4908 [1.0]), and 4.0 credits in 0.5- and 0.25-credit courses, as assigned by the Graduate Supervisor. An average grade of A- over these five credits, with a minimum grade of B in each course must be presented to be considered for admission to the M.Sc. program.

Orientation Examinations

Students coming from outside Canada or the United States must write orientation examinations at approximately the third-year university level. Each student will be informed of this requirement upon admission. The examinations will be given in the first week of the term in September and January. Students can choose from any three examination modules in: organic, physical, inorganic/analytical and biochemistry.

In examination areas where the student shows unsatisfactory performance or deficiency, the Graduate Supervisor will assign undergraduate-level remedial courses. To be eligible to continue in the graduate program, the student must achieve a minimum grade of A- in each remedial course.

Admission

The normal requirement for admission to the Ph.D. program is an M.Sc. degree in Chemistry. Direct entrance from a B.Sc. degree in Chemistry will be considered in exceptional cases.

Admission

The normal requirement for admission to a master's program is a bachelor's degree with at least high honours standing in civil engineering.

1. Graduates from engineering programs other than civil engineering, or Honours science programs with a mathematics content equivalent to the civil engineering program will have to take a minimum of four qualifying undergraduate civil engineering courses in their area of graduate specialty.
2. Graduates from other science programs will have to take all the core engineering undergraduate mathematics courses in addition to the requirements specified in (1) above.

The undergraduate courses required will be specified in the Certificate of Admission.

Undergraduate civil engineering courses will not be accepted towards a graduate degree. Graduate students may still be required to take undergraduate courses for credit to fulfil the admission requirements.

No more than one half of the program credit requirements or that stipulated in the regulations of the university in which the student is registered, whichever is less, can be transferred at admission.

Accelerated Pathway

The accelerated pathway in Civil Engineering is a flexible and individualized plan of graduate study. Students in the final year of Bachelor of Engineering in Civil, Environmental, or Architectural Conservation and Sustainability Engineering with demonstrated excellent aptitude for graduate studies and research may qualify for this option.

Students with a CGPA of 10.0 or higher, going into their final year of undergraduate study, and intending to apply to a Master's degree in Civil Engineering in the following academic year should consult with both the Undergraduate and Graduate Associate Chairs to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses.

Upon approval for the accelerated pathway, students will replace a maximum of 1.0 credit of their engineering electives with 5000 level CIVE or ENVE courses. Students will receive advanced standing for the approved 5000 level courses in which they receive a grade of A- or higher.

Admission

The normal requirement for admission into the Ph.D. program is a master's degree with thesis in civil engineering. Students who have been admitted to a master's program may be permitted to transfer into the Ph.D. program if they demonstrate:

1. outstanding academic performance by completing at least 2.5 credits of course work with a CGPA of A- or higher, and

2. significant promise for advanced research and the ability to defend their Ph.D. proposal in the first year of their Ph.D. program.

- Students are expected to present their research at the Cognitive Science Student Spring Conference during the first three years of their program.
- Course selection is with the approval of the Thesis Supervisor and the Graduate Supervisor of Cognitive Science.
- Any student planning a dissertation with an applied cognitive emphasis is required to work for at least one term at a facility approved by the student's research supervisor and the Director of the Cognitive Science Program. Such a facility may include any institution, governmental laboratory, corporation, hospital or educational centre conducting research in the area of the student's specialization. Students should complete this work while registered in either option:

Methodology Rotation

CGSC 6002 [0.5]	Methodology Rotation I
CGSC 6003 [0.5]	Methodology Rotation II

Ph.D. Thesis

CGSC 6909 [5.0]	Ph.D. Thesis
-----------------	--------------

Methodology Rotation

The methodology rotation consists of two parts. Students spend one term in each of two laboratories or other research venues using two different methods for studying cognition (behavioural, linguistic-theoretic, computational, conceptual, neuroscientific).

The purpose of the methodology rotation is to give students sufficient background in two different approaches to cognition to allow the student to use work from these approaches in his or her own research.

Assignments will be as specified by each rotation supervisor. Each rotation will be graded separately by the rotation supervisor, Passed with Distinction (PWD)/Satisfactory(S)/Unsatisfactory (U). In the event of a grade of U the student may repeat a rotation only once.

Prospectus, Prospectus Defence, Thesis and Defence

When a student is ready to begin work on a thesis, the Graduate Supervisor approves a thesis committee which includes the thesis supervisor or co-supervisors, plus at least two additional members. The committee should include members from at least two different approaches to cognition. The Director of the Institute of Cognitive Science is an ex officio member of the committee. Preparation of the thesis has two stages. First the student prepares a prospectus, which is examined at a prospectus defence on the subject matter of the thesis. Then the student prepares the thesis, which is defended at a public oral examination.

Prospectus

The prospectus must describe the proposed research and review the relevant literature in the field of the research. The prospectus must be sufficiently detailed to allow the examining committee to judge the likelihood of a successful thesis ensuing from it. Preparation of the prospectus will follow the practices common in the Thesis Supervisor's area of research. The committee may add further requirements.

Prospectus Defence

The prospectus is examined orally by a board consisting of the members of the thesis committee. The committee may add further examiners. The examination is a comprehensive examination of the thesis subject matter, to ensure that the student has a sound understanding of the context of his or her proposed research, and of appropriate methods, ethical considerations, and so on. The examining board will also consider the research that the student is proposing, which must be of sufficiently high quality and described in sufficient detail to allow the committee to judge whether, if completed successfully, it would be likely that the student would be awarded the degree. Should a student's prospectus be unacceptable, or the student fails the prospectus defence, the student may resubmit the prospectus and be reexamined once.

Thesis

The completed thesis is examined orally by an examining board consisting at minimum of the thesis committee, an examiner at arm's length to the project from within Carleton University (the internal examiner) and an examiner from another university who is at arm's length to the student and the committee and who is a recognized expert in the area of the thesis (the external examiner). All university regulations apply.

Residence Requirement

All Ph.D. candidates must be registered full-time in a minimum of six terms to satisfy the residence requirement.

Language Requirement

A second language is required when relevant to the student's program of research. Whether a second language is required and the level of proficiency expected

is determined at the time of admission, based on the student's description of his or her proposed area of thesis research.

Milestones (to be completed by the end of the specified year)

First year: Completion of CGSC 6801* and CGSC 5100, and elective coursework. Spring Conference presentation.

Second year: Completion of remaining program coursework and the methodology rotations (CGSC 6002) and (CGSC 6003). Begin work on Prospectus. Spring Conference presentation.

Third year: Prospectus defence. Continue to work on thesis CGSC 6909 Ph.D. Thesis. Spring Conference Presentation.

4th Year: Thesis completion (CGSC 6909 Ph.D. Thesis) and defence.

*Please note CGSC 6801 is offered in alternate years. Course to be completed in second year if it is not offered in the first year of program.

Comprehensive Examinations

In addition to their course requirements, doctoral candidates are required to write two comprehensive examinations each worth 1.0 credit. The first comprehensive examination (COMS 6900) is closely related to the course materials in the doctoral seminar (COMS 6000) and is conducted by the instructors of COMS 6000 in May following completion of the seminar. To be eligible for the first comprehensive, candidates must have a GPA of 9.0 or higher on their previous course work, including COMS 6000. Students who fail the first comprehensive may be asked to withdraw from the program.

The second comprehensive examination (COMS 6901) is normally completed during the second year of the program and tests the student's in-depth knowledge of one field of study. It is conducted by the student's supervisor and advisory committee and involves examination of an approved project related to the chosen field. Before taking the second comprehensive examination, students must have completed all of their course work with a GPA of 9.0 or higher and have satisfactorily completed COMS 6900. The second comprehensive is expected to be completed no later than two years or six terms after initial full-time registration, or four years or 12 terms after initial part-time registration. Students who do not fulfill this requirement within the prescribed time period may be asked to withdraw from the program.

Thesis Requirement

A thesis proposal is presented after the comprehensive requirement has been satisfied, and defended at an oral presentation. The thesis, normally equivalent to 5.0 credits, must be successfully defended at an oral examination.

Regulations

See the General Regulations section of this Calendar.

A standing of B- or better must be obtained in each credit counted towards the master's degree.

Regulations

See the General Regulations section of this Calendar.

A standing of B- or better must be obtained in each course counted towards the Ph.D. degree.

Admission

The minimum requirement for admission to the master's program is a B.A.(Honours) degree or the equivalent, with high honours standing in communication or a related discipline. Related disciplines may include sociology, political science, film studies, and Canadian studies.

Applicants without a background in communication studies may be required to take certain designated courses from the undergraduate Communication program in addition to their regular program.

Possession of the minimum entrance standing is not in itself, however, assurance of admission into the program.

Applicants who lack an Honours degree but who have a 3-year degree with honours standing (a minimum B standing overall) may be considered for admission to a qualifying-year program. Students who complete the qualifying year with high honours standing may be considered for admission to the master's program in the following year. Refer to the General Regulations section of this Calendar for regulations governing the qualifying year.

Admission

The normal requirement for admission into the doctoral program is a master's degree (or the equivalent) in communication or a cognate field such as journalism studies, with an overall average of B+ or better.

Applicants who have deficiencies in certain areas may be admitted to the Ph.D. Program, but will normally be required to complete additional course work.

Guidelines for Completion of Doctoral Degree

The following completion times are estimates based on full-time study.

- During the first term, the student and his or her faculty adviser should select graduate courses related to their area(s) of research and interests. Approval from the Graduate Supervisor of the Institute is only required for courses not listed as valid OCICS courses.
- Subject to the approval of the Graduate Supervisor, Ph.D. students may take courses in other relevant disciplines. At least half of the course credits of a Ph.D. student must be valid OCICS courses.
- An advisory committee comprised of three to five faculty members must be established before the student registers in the comprehensive examination. The committee is responsible for the comprehensive examination, the thesis proposal, and for guiding the student's research. The advisory committee must include at least one representative from EECS at the University of Ottawa. The advisory committee must be approved by the director or associate director of the Institute.
- All course requirements must be completed within the first six (6) terms.
- Within the first eight (8) terms, the student must submit a written thesis proposal and defend it in an oral examination (see COMP 6908).
- The expected completion time for the Ph.D. program is approximately twelve terms depending on the type of thesis and the area of research.
- Before the completion of the program, the student is expected to present at least two seminars in the Ottawa-Carleton Institute for Computer Science seminar series.

Admission

M.C.S., M.C.S. Bioinformatics and M.C.S. Data Science

See the General Regulations section of this Calendar for detailed admission requirements. Applicants should have an honours bachelor's degree in computer science or the equivalent. By equivalent is meant an honours degree in a program that includes at least twelve computer science half-credits, two of which must be at the 4000-level, and

eight half-credits in mathematics, one of which must be at the 3000- or 4000-level.

Applicants who have a general (3-year) bachelor's degree, or who otherwise lack the required undergraduate preparation, may be admitted to a qualifying-year program. Refer to the General Regulations section of this Calendar for regulations governing the qualifying year.

Accelerated Pathway

The accelerated pathway in the M.C.S. Computer Science is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.C.S.(Hons.) degree with demonstrated academic excellence and aptitude for research may qualify for this option.

Students in their third-year of study in the B.C.S.(Hons.) degree should consult with both their Undergraduate Program Coordinator and the Director for Graduate Studies to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Accelerated Pathway Requirements

1. At least one OCICS courses at the 5000-level with a grade of B+ or higher.
2. Minimum overall and Major CGPA of A-.

Students may receive advanced standing of up to 1.0 credit which can reduce their time to completion.

Admission

See the General Regulations section of this Calendar for detailed admission requirements. Admission to the Ph.D. in Computer Science requires a Masters in Computer Science with thesis, or equivalent including demonstrated significant research ability.

In exceptional cases, students who are currently in the M.C.S. program and who have completed all course requirements with a grade of no less than A in each course may be permitted to transfer into the Ph.D. program.

Co-operative Option

A co-operative option is also available to full-time students in the Masters of Computer Science. Co-operative education is based on the principle that academic studies combined with work experience are desirable for effective professional preparation.

In addition to all other requirements for the degree, students admitted to the co-operative option must satisfactorily complete two work terms placements with a suitable employer in order to graduate with a co-op designation on their transcripts and diplomas. It is desirable that the work placements be related to the student's research. Placements are subject to the approval of the Supervisor of Graduate Studies and of the student's research supervisor. These work terms are four months in duration and students will conduct job searches through the university's co-op office. During a work term, students will register in COMP 5913. While on a work term, students in this option are limited to taking one additional 0.5-credit course, or registering in their thesis.

Students in the co-op option normally apply for admission to the co-operative option during their first academic term. This option requires an initial study period of two academic terms, typically followed by two work terms and a final academic period to complete the remaining requirements of the degree. The student must submit a work term report upon the completion of each work placement, and receive a grade of Satisfactory in order to meet the requirements for the successful completion of that work term's requirement.

Regulations

See the General Regulations section of this Calendar.

The Type 2 diploma is for graduate students in other programs who seek to strengthen or broaden their conceptual and technical skills in curatorial studies. The Type 3 diploma is for individuals who are not currently registered in a Carleton graduate program. Both diplomas have the same requirements and are comprised of 3.0 credits, and are designed to be completed in one year (twelve months). Students may take the program on either a part time or full-time basis.

Cognate Courses: All cognate courses will be determined in collaboration between the student, the Assistant Director of Curatorial Studies, and the Graduate Supervisor of the cognate department. Regulations

See the General Regulations section of this Calendar.

All candidates are required to obtain a grade of B- or higher in each course in the program.

Admission

The minimum requirement for admission to the Diploma in Curatorial Studies is an honours bachelor's degree (or equivalent) in a related discipline, with an average of B+ or higher. Students pursuing a Type 2 diploma must also fulfil the admission requirements of their home departments.

Students wishing to obtain admission will be required to submit an application along with a statement of intent, reference letters, and a writing sample or curatorial portfolio.

Regulations

See the General Regulations section of this Calendar.

Industrial Design does not permit the C+ option as stipulated in Section 11.2 of the General Regulations.

Admission

The University's general requirements for admission are outlined in Section 2.1 of the General Regulations in the Graduate Calendar.

Applicants must have successfully completed a bachelor's degree in a design discipline, or the equivalent, with B- or higher overall.

Applicants with a design-related background, but not a degree in design, will be required to demonstrate significant links between their academic background and professional experience in the design development process.

In addition to these academic credentials, applicants must submit the following materials to the School of Industrial Design:

- Application Form
- Statement of Intent (One page)

The quality of the statement of intent is critical to the likelihood of an applicant's admission. The writing should

be succinct and as carefully considered as the content of the statement, which should address at least the four following areas:

- What is the area of intended research with specific reference to the program courses and the expertise of the faculty members
- How the applicant's academic background and professional experience relates to the program with reference to any previous research, scholarship, or project experience with interdisciplinary or collaborative teams
- How the intended research program will align with the objectives of the program relating to: design research, interdisciplinary design development, strategic design planning, knowledge creation and dissemination
- An explanation of the specific reasons for choosing the School of Industrial Design at Carleton University

Portfolio

The portfolio should provide the best examples of creative intellectual activity and recent professional work that indicates the applicant is sufficiently prepared to pursue studies in the program. These activities may be represented by proposals, reports, and/or analysis documents. Emphasis should be placed on evidence of understanding the communication of design ideas in visual form.

The presentation of the portfolio should be professional and facilitate the review process of the content, and should be submitted in prescribed format.

Two Letters of Recommendation

Applicants must provide two (2) confidential letters of reference appended to prescribed recommendation forms.

Language Proficiency

Proficiency in English is necessary to pursue graduate studies at Carleton University. All applicants are required to meet the requirements set out in Section 3.6 of the General Regulations of this Calendar.

Qualifying Year Program

Candidates with admission deficiencies would be required to successfully complete additional prescribed courses to qualify for admission. Applicants without a degree in design may be required to register for up to 2.0 credits of courses selected from the undergraduate Bachelor of Industrial Design program, in consultation with the Graduate Program Coordinator.

All courses must be approved by the Graduate Program Coordinator of the School in consultation with the Faculty of Graduate Studies and Research. (See General Regulations Section 2.3, "Completion of the Qualifying Year", for more details.) Completion of the Qualifying Year is not a guarantee of admission to the Master of Design. Re-application to the M.Des. program is required.

Accelerated Pathway

The accelerated pathway in Industrial Design is a flexible and individualized plan of graduate study for students in the final year of the Bachelor of Industrial Design.

Students in their third-year of study in the Bachelor of Industrial Design should consult with both the Director and the Graduate Program Coordinator to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses.

Accelerated Pathway Requirements

1. A maximum of 1.0 credits with 5000-level courses.
2. Minimal overall CGPA of B+

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Internship Placement

An Internship option is available to full-time students in the M.A. program who are eligible to work in Canada. Registration in the Internship option requires departmental permission and is limited by availability of placements. Application for an internship placement will normally be considered after the student has successfully completed 2.0 credits, including ECON 5020 and ECON 5027.

Internship placements will locate students for at least one term in the public service, the private sector, or non-governmental organizations. Students will integrate theoretical and applied economic analysis in their work experience. During their work term, students are required

to register in ECON 5902 (Internship Placement), which is additional to the program requirements described above. While taking ECON 5902, students are considered to be part-time, and may register for at most 1.0 credit in total.

If the student is in receipt of a teaching assistantship, a research assistantship, or some other type of scholarship, the value of the award will be deferred to a later term. External awards will be issued or deferred in accordance with the relevant criteria of the associated agency.

Comprehensive Examinations

Theory: Each student will register in ECON 6900 and ECON 6902 in order to write the comprehensive examinations in microeconomic theory and macroeconomic theory. Both of these examinations must be successfully completed within twelve months of beginning full-time study. Students who fail to meet this requirement will normally be withdrawn from the Ph.D. program.

Primary Field: Each student will register in ECON 6905 in order to write a comprehensive examination in his or her chosen primary field. This examination must be successfully completed within twenty-four months of beginning full-time study. Students who fail to meet this requirement will normally be withdrawn from the Ph.D. program.

Although not compulsory, a candidate may be required by an examining committee to sit an oral examination.

Seminar Attendance

Students who have completed the comprehensive examinations in microeconomic and macroeconomic theory will be required to attend a minimum of eight departmental seminars in economics during each academic year until they have submitted their thesis to the Faculty of Graduate and Postdoctoral Affairs.

Thesis Requirements

Doctoral students will write and defend a Ph.D. thesis. In preparing the thesis, the student is required to give two thesis workshops. In the first (ECON 6907), a research proposal for the thesis will be presented for evaluation by at least three faculty members. In the second (ECON 6908), a substantial portion of the research for the thesis will have been completed and will be presented and evaluated by at least three faculty members.

Guidelines for Completion of Ph.D. Degree

Full-time Ph.D. students are expected to complete their requirements within four calendar years. Students who undertake the program by a combination of full-time and part-time study must complete their degree requirements within an elapsed period of eight calendar years, as set out in the General Regulations section of this Calendar.

Regulations

See the General Regulations section of this Calendar.

A grade of B- or higher must be received in each required core course in the M.A. program: ECON 5020, ECON 5021, ECON 5027, and ECON 5029. With respect to all other courses, a student may, with the recommendation of the Department and the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs, be allowed a grade of C+ in up to a maximum of 1.0 credit.

Students following the M.A.-M.B.A. dual pathway are governed by the academic regulations for the M.A. (above) and the M.B.A. For academic regulations concerning the M.B.A. visit the Business programs section of this Calendar.

Guidelines for Completion of Master's Degree

All approved elective courses will normally be taken at the 5000 level.

Full-time master's students are expected to complete their 4.0-credit requirements within two terms. Part-time students will take a minimum of five terms but must complete within an elapsed period of six calendar years, as set out in Section 13 of the General Regulations of this Calendar.

Regulations

See the General Regulations section of this Calendar.

Doctoral students must normally obtain a grade of B- or higher in each credit counted towards the degree.

Admission

The normal requirement for admission to the master's program is a B.A. (Honours) (or the equivalent) in Economics, with an average grade of B+ or higher.

Applicants to the M.A.-M.B.A. dual degree pathway must qualify for admission for both the M.A. Economics and the M.B.A. program. For admission information concerning the M.B.A., visit the Business section of this Calendar.

Applicants are expected to have had adequate preparation in microeconomic and macroeconomic theory, econometrics, and mathematics. This could be

satisfied, for example, by having completed undergraduate courses in advanced microeconomic theory, advanced macroeconomic theory, econometric theory and methods, mathematical analysis in economics, and statistical analysis in economics. Students with deficiencies in their preparation may have their program requirements extended accordingly.

Post-Baccalaureate Diploma: Applicants who lack the required undergraduate preparation may be admitted to the Post-Baccalaureate Diploma program in Economics designed to raise their standing to honours status. Refer to the Undergraduate Calendar for details about this program as well as the regulations governing it.

The Department may require certain applicants to write the Graduate Record Examination Aptitude Test and the Advanced Test in Economics offered by the Educational Testing Service.

Applicants whose first language is not English must certify adequate proficiency in English in one of the following ways:

- by presenting a CAEL overall band score of 70 or higher; or
- by presenting a TOEFL iBT total score of 100 or higher with a score of 24 or higher on each of the four (Listening, Reading, Writing, and Speaking) sections; or
- by presenting an IELTS overall band score of 7.0 or higher with a score of 6.5 or higher on each of the four (Listening, Reading, Writing, and Speaking) parts; or
- by having completed ESLA 1900 [1.0] or ESLA 1905 [1.0] at Carleton University with a final grade of B- or higher.

Admission

The normal requirement for admission into the Ph.D. program is a master's degree (or the equivalent) from a recognized university with high honours standing. The Department may require certain applicants to write the Graduate Record Examination Aptitude Test and the Advanced Test in Economics offered by the Educational Testing Service.

In cases of exceptional merit, Ph.D. candidates may be accepted on a part-time basis.

Transfer from Master's to Ph.D. Program

A student who achieves outstanding academic performance and demonstrates high promise for advanced research during the master's program may, with the permission of the Department, transfer into the Ph.D. program without completing the M.A. program if they have completed ECON 5020 (ECO 6120), ECON 5021 (ECO 6122), and ECON 5027 (ECO 5185) with an average grade of A or higher. Such students must take a total of at least eleven regular courses (M.A. and Ph.D. levels combined) and do not receive an M.A. degree. However, students who make the transfer and do not complete the Ph.D. can receive an M.A. by fulfilling all the requirements of the M.A. program.

Admission

The normal requirement for admission to a master's program is a bachelor's degree in electrical engineering or a related discipline with a CGPA of B+.

Accelerated Pathway

The accelerated pathway in the M.A.Sc. and M.Eng. Electrical and Computer Engineering program is a flexible and individualized plan of graduate study for students in their final year of a Carleton B.Eng degree. Students with demonstrated academic excellence and aptitude for research may qualify for this option.

Students in their third-year of study in the B.Eng. degree should consult with both the Undergraduate Chair and the Graduate Chair to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Accelerated Pathway Requirements

1. At least 0.5 credit in ELEC or SYSC courses, or other approved courses, at the 5000-level with a grade of B+ or higher.
2. Minimum overall CGPA of A-.

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Admission

The normal requirement for admission into the Ph.D. program is a master's degree with thesis in electrical engineering or a related discipline.

ENGL 6002, ENGL 6003 and ENGL 6004 are required courses. Optional English courses will be selected from a list approved annually by the department. Students may take up to 1.0 credit of approved courses offered in other departments. Students may also choose directed reading courses with the core faculty of the program.

Comprehensive Examination and Research Project

Students are required to complete one comprehensive examination and one doctoral research essay. Each has a 1.0 credit value. The comprehensive examination (ENGL 6900) will focus on relevant theoretical and methodological issues and will take the form of a written and oral examination set and marked by members of core faculty. This will normally take place at the beginning of the second year of full-time doctoral study. The doctoral research project (ENGL 6901) will focus on the general historical period or conceptual issues of the candidate's research and will comprise a written research project of publishable length followed by an oral examination. This will normally be completed before the end of the second year of full-time studies.

Language Requirements

PhD candidates must demonstrate reading ability in a language other than English, normally by successfully completing a reading course or doing a two-hour translation exam. This requirement should be completed prior to the submission of the dissertation proposal. The second language should enhance the primary area of research. Students who have already passed a language requirement at the MA level, and the MA transcript documents the fulfilment of this requirement, do not need to satisfy Carleton's PhD language requirement.

Thesis

All students are required to submit a thesis proposal before proceeding to the writing of the thesis. The proposal must be approved by the graduate supervisor and the thesis committee. This will normally take place early in the third year of doctoral study. All students are required to complete a thesis (4.5 credits) in partial fulfilment of the requirements of the degree offered by the program. The thesis must be defended at an oral examination.

Regulations

See the General Regulations section of this Calendar.

A standing of B- or better must be obtained in each credit counted towards the master's degree.

Each program is designed to be completed within the three-term academic year. Each program is of equal status.

Guidelines for Completion of Master's Degree

Full-time master's candidates are expected to complete all requirements in twelve months or three terms of registered full-time study. Part-time master's candidates are expected to complete their degree requirements within an elapsed period of three calendar years after the date of initial registration.

Regulations

See the General Regulations section of this Calendar.

Academic Standing

Doctoral students must normally obtain a grade of B- or better in each course counted toward the fulfilment of the degree requirements.

Admission Requirements

The normal admission requirement for the master's program is a B.A. (Honours) (or the equivalent) in English language and literature, with at least a high Honours standing (normally B+ or better).

Possession of the normal entrance standing is not in itself, however, an assurance of admission into the program.

Qualifying-Year Program

Applicants who hold a general (3-year) B.A. degree with at least a high Honours standing (normally B+), with a major in English language and literature or a related discipline, may be admitted to the qualifying-year program. Normally, these students will be required to complete 4.0 or 5.0 credits in English, as determined by the department, and to maintain a high Honours standing (normally B+) before being considered for admission into the master's program. For more information regarding the qualifying year, see the General Regulations section of this Calendar.

Accelerated Pathway

The accelerated pathway in the Department of English Language and Literature is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.A. Honours in English with demonstrated academic excellence and an aptitude for research may be invited to apply for this option.

Accelerated Pathway Requirements

Students accepted into the Accelerated Pathway will be allowed to enroll in up to two 5000-level graduate seminars during their final year of study. These courses will count towards the requirements for up to 1.0 credits of 4000-level courses in their BA Honours degree. Students who obtain satisfactory standing as determined by the graduate committee in these 5000-level courses may receive advance standing with transfer credit of up to 1.0 credit, which can reduce their time to completion if they are subsequently accepted into a Carleton University Master's degree in English.

A special committee is responsible for inviting students to apply for entrance to this pathway. A minimal overall CGPA of 11.0 is normally required for consideration; invited students should submit two reference letters from English Department faculty members and a writing sample to both Undergraduate Supervisor and Graduate Supervisor of the English Department. If accepted into the accelerated pathway, students must consult with both the Undergraduate and Graduate Supervisors to determine which graduate seminars they will take.

Admission Requirements

Applicants will normally hold a master's degree in English (or equivalent) with at least an A- average (10 G.P.A.)

Applicants judged to be deficient in preparation may be asked to complete course work in addition to the Ph.D. program requirements.

Environmental Engineering

This section presents the requirements for programs in:

- **M.A.Sc. Environmental Engineering**
- **M.Eng. Environmental Engineering**
- **Ph.D. Environmental Engineering**

Program Requirements

M.A.Sc. Environmental Engineering (5.0 credits)

Study at the master's level can be pursued through a thesis leading to a M.A.Sc., a project option leading to a M.Eng., or a coursework option leading to a M. Eng. The requirements for coursework are specified in terms of credits. At Carleton University, 1.0 credit typically comprises three hours of lectures or seminars a week for two terms, or the equivalent. At the University of Ottawa, 1.0 course credit is one hour of instruction per week for one term. Thus 1.0 credit in Carleton University notation is equivalent to 6 course credits in the University of Ottawa notation. The requirements are:

Requirements - Thesis option:

1. 2.5 credits in courses, with at least 0.5 credit from each of at least three of the areas of study listed below	2.5
2. Participation in the graduate seminar series:	0.0
ENVE 5800 [0.0] Master's Seminar (participation in the graduate seminar series)	
3. 2.5 credits in:	2.5
ENVE 5909 [2.5] Master's Thesis (including successful oral defence)	
Total Credits	5.0

M.Eng. Environmental Engineering (5.0 credits)

Requirements - Project option (5.0 credits)

1. 4.0 credits in courses	4.0
2. 1.0 credit in:	1.0
ENVE 5900 [1.0] Environmental Engineering Project	
3. Participation in the graduate student seminar series:	0.0
ENVE 5800 [0.0] Master's Seminar	
Total Credits	5.0

Requirements - Coursework option (5.0 credits)

1. Completion of a minimum of 5.0 credits by course	5.0
Total Credits	5.0

Breadth Requirement

In keeping with the objective of ensuring a breadth of knowledge for graduates of the program, students in the master's program are expected to take at least one graduate level course from each of at least three of the following areas of study:

- Air Pollution
- Water Resources Management, Groundwater Management and Contaminant Transport
- Management of Solid, Hazardous, and Radioactive Waste, and Pollution Prevention
- Water and Wastewater Treatment
- Environmental Impact Assessment

This requirement serves the objectives of educating graduate professionals who are not only specialized in one area but who are sufficiently familiar with problems and different approaches in the other areas to enable them to interact readily at a technical level with colleagues working in those areas. In addition to the courses associated with the individual areas, students will be encouraged to select courses from fundamental areas such as chemistry, numerical modeling, and applied statistics.

Master's candidates transferring from another university must take at least half their courses at the Institute.

Ph.D. Environmental Engineering (10.0 credits)

The requirements for the Ph.D. program (from a Master's degree) are the successful completion of 10.0 credits, of which 8.5 credits must be obtained from successful oral defence of a research thesis.

Ph.D. Environmental Engineering (10.0 credits)

1. 1.5 credits in courses	1.5
2. 0.0 credits in:	0.0
ENVE 7800 [0.5] Ph.D. Seminar	
3. Successful completion of the comprehensive examination, which consists of a presentation of a Ph.D. research proposal followed by an oral examination to assess any academic deficiencies in the student's background related to the proposed research project and to assess the originality and feasibility of the proposed research project. The comprehensive examination should be completed within the first 16 months (or the equivalent of four full-time terms) of the student's program	
4. 8.5 credits in:	8.5
ENVE 6909 [8.5] Ph.D. Thesis (Including successful oral defence)	
Total Credits	10.0

Whereas the breadth requirement is desirable at the Master's level for the professional advancement of our graduates, it is not sought at the Ph.D. level where specialized expertise is the defining characteristic.

Ph.D. candidates transferring from another university must take at least half their courses at the Institute.

Graduate Courses

Course selection is subject to the approval of the adviser or the Advisory committee. Students may choose courses offered at either university from among those listed below.

The courses listed below are grouped by area of study. Master's students must complete at least one course in three of the five areas. The program's Associate Chair (graduate affairs), in consultation with the Institute's Director or Associate Director, will decide when a course offered outside the Institute, will decide when a course offered under a Special Topics or Directed Studies heading can be considered to meet the requirements of a given area. Course descriptions may be found in the departmental sections of the calendars concerned. Course codes in parentheses are for University of Ottawa (CHG and CVG), and those that begin with the prefix "ENVE" or "CIVE" are offered at Carleton. Only a selection of courses is given in a particular academic year.

Full course descriptions for courses offered at Carleton can be found in the relevant courses section of this calendar.

In all programs, at least one half of the course work must be taken from the Institute.

Regulations

See the General Regulations section of this Calendar.

Admission

The requirement for admission to the master's program in Environmental Engineering is a four-year bachelor's degree in Environmental Engineering, other related engineering disciplines (Civil, Chemical, Mechanical, etc.), or Environmental Science disciplines.

All students entering the program are required to have courses in mathematics, probability and statistics equivalent to courses required in undergraduate engineering programs. Students admitted without full equivalency in these areas are expected to take appropriate undergraduate courses early in their studies. These courses will be additional to the normal degree requirements.

For applicants to the M.A.Sc. program without a bachelor's degree in environmental, civil or chemical engineering, up to 3 undergraduate courses may be required in addition to the graduate program requirements. These may include a course in fluid mechanics, a course in environmental engineering fundamentals and a senior level undergraduate course in environmental engineering

to be identified jointly by the supervisor, Associate Chair for Graduate Studies, and Director or Associate Director for OCIENE in the department.

For applicants to the MEng program without a bachelor's degree in environmental, civil or chemical engineering, up to 3 undergraduate courses may be specified in addition to the graduate program requirements at admission by the Director or Associate Director for OCIENE in the department. These will include a course in fluid mechanics, and course in chemical/biochemical kinetics and reactors if required.

Accelerated Pathway

The accelerated pathway in Environmental Engineering is a flexible and individualized plan of graduate study. Students in the final year of Bachelor of Engineering in Civil, Environmental, or Architectural Conservation and Sustainability Engineering with demonstrated excellent aptitude for graduate studies and research may qualify for this option.

Students with a CGPA of 10.0 or higher, going into their final year of undergraduate study, and intending to apply to a Master's degree in Environmental Engineering in the following academic year should consult with both the Undergraduate and Graduate Associate Chairs to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses.

Upon approval for the accelerated pathway, students will replace a maximum of 1.0 credit of their engineering electives with 5000 level ENVE courses. Students will receive advanced standing for the approved 5000 level courses in which they receive a grade of A- or higher.

Admission

The normal requirement for admission into the Ph.D. Program in Environmental Engineering is completion of either a Master's degree in Environmental Engineering, or a Master's degree in an engineering discipline with an environmental specialization.

- Students wishing to enter the program who do not have either of these backgrounds will be evaluated on a case-by-case basis. Additional course requirements may be specified in some cases.
- Students who have been admitted to a master's program may be admitted into the Ph.D. program, without completing their master's program, if they demonstrate: (1) outstanding academic performance by completing at least 2.5 credits of course work that fulfil the breadth requirements as specified in the Master's degree requirements with a CGPA of A- or higher, and (2) significant promise for advanced research and the ability to defend their Ph.D. proposal in the first year of their Ph.D. program.

Guidelines for Completion of Master's Degree

Students in the 5.0-credit program with sufficient proficiency in Russian, German or another approved language are expected to complete the degree within three to four terms of study. Students participating in international exchanges will normally require longer to complete degree requirements.

Concentrations

While one of the program's goals is to provide students with an integrative approach to the entire region, the concentration assures that each student's individual program will retain a particular focus. Europe and Eurasia have become increasingly integrated in terms of theoretical and methodological approaches. However, the two sub-regions covered by the program have distinct histories and legacies along with differing intellectual traditions. Selection of a concentration assures that each student's program will have an adequate level of intellectual coherence. Students studying the post-communist countries of Central and Eastern Europe that are EU member states or candidates for membership may select either concentration, depending on the thematic focus of the student's work.

The Institute offers two concentrations that draw systematically from the program's range of courses and expertise. Students are required to pursue one of these concentrations:

- Russian, Eurasian and Transition Studies
- European and European Union (EU) Studies

Russian, Eurasian and Transition Studies

This concentration involves an interdisciplinary focus on the communist legacy and challenges facing countries in transition, with a geographic scope covering eastern and southeastern Europe, Russia, Ukraine, Belarus, the Caucasus and post-Soviet Central Asia.

Regulations

See the General Regulations section of this Calendar.

Master's candidates must obtain a grade of B- or higher on each credit counted towards the degree.

Admission

The normal requirement for admission to the master's program is an honours degree (or equivalent), with at least a B+ average.

For admission to the program, applicants should normally meet the following requirements:

- A four-year degree (or equivalent) in a humanities or social science discipline, with demonstrated coursework in the European/Russian/Eurasian area, ideally covering multiple disciplines (not solely language courses); and
- A reading knowledge of an appropriate major European/Eurasian language other than English (normally equivalent to two academic years of instruction, or one year with an intensive summer program). Applicants may be admitted with no proficiency or inadequate proficiency in an appropriate language; in this case they must be prepared to undertake additional language training during the course of the MA program in addition to fulfilling the normal M.A. requirements.

Practical experience in the area of study will also be taken into consideration.

Applicants who do not have the required interdisciplinary background in the European/Russian/Eurasian area are encouraged to apply to the program, but additional coursework beyond the 5.0 credits may be required.

Accelerated Pathway

The accelerated pathway in the Institute for European, Russian and Eurasian Studies is a flexible and individualized plan of graduate study for students in their final year of a Carleton undergraduate degree.

Students in their third-year of study in a Carleton undergraduate degree should consult with both the Undergraduate Advisor in their program of study and the Graduate Advisor in EURUS to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Accelerated pathway requirements

1. At least 1.0 credit in EURUS courses (5000 level or higher).
2. Minimal overall CGPA of at least A-.

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Qualifying Year

Applicants who have a general (three-year) bachelor's degree in one of the disciplines represented in the program, or who lack sufficient area studies or language training, may be admitted to a qualifying-year program designed to raise their status to that of honours graduates in European, Russian and Eurasian Studies. Students are expected to achieve a B+ average or better in the

qualifying-year program in order to qualify for admission to the Master's year.

Co-operative Education Program in European, Russian and Eurasian Studies

The co-op education program provides students in European, Russian and Eurasian Studies the opportunity to combine work terms with academic study. The practical experiences obtained in the workplace will reflect and extend knowledge and skills learned in the classroom, and will help to develop career interests and marketable expertise. All students in the M.A. Program in European, Russian and Eurasian Studies have the opportunity to enroll in the co-op education program.

Admission Requirements

Students interested in admission into the co-op education option must apply by the end of the first semester of academic study.

To be eligible for admission to the co-op option, students must:

1. be registered in the M.A. in European, Russian and Eurasian Studies;
2. have successfully completed, by the start-date of the first work term, the required first-year core classes
3. EURR 5001 Interdisciplinary Seminar in European, Russian and Eurasian Studies and EURR 5010 Research Design and Methodology in European, Russian and Eurasian Studies
4. be registered full-time in each academic term prior to work term.
5. be eligible to work in Canada (for off-campus work terms).

In addition, students whose first language is not English who are admitted to Carleton based on CAEL, IELTS or TOEFL assessments must also meet the following requirement: either a score of 6.0 on the CAEL Spoken English Test for Co-op students, or a score of 22 on the TOEFL test for spoken English, or a score of 6.5 on the IELTS test for spoken English.

Meeting the preceding requirements only establishes eligibility for admission to the co-op option - the prevailing job market may limit enrollment in it. Students should also note that hiring priority is given to Canadian citizens for co-op positions under the auspices of the Public Service Commission. Work terms for European, Russian and Eurasian Studies co-op students exist in a variety of public and private sector fields. Every effort will be made to ensure that there are appropriate work opportunities available, but there are no assurances that a co-op position will be found. Students with a high CGPA, enthusiasm, and potential, however, will have a competitive edge in securing co-op employment. Students will be assisted by the Carleton University Co-op Office to find work term positions.

Registration

Students who are accepted into the Co-op Education Option in European, Russian and Eurasian Studies must

be registered in EURR 5913 [0.0] Co-operative Work Term in each work term.

Note: This course does not carry academic course credit, but is noted on academic transcripts. Students are permitted to enroll in one 0.5 credit course during each work term.

Graduation

Students must successfully complete two work terms, in addition to the M.A. in European, Russian and Eurasian Studies requirements, to successfully graduate and receive a co-op designation on their final transcript and diploma.

Appeals

The Co-op Office administers the regulations and procedures applicable to the co-op option, and will report any situation of a student failing to report to a placement or being required to withdraw from the co-op option for any reason to the Director of the Institute of European, Russian and Eurasian Studies for a final decision. Any decision may be appealed through the normal channels of the University.

Comprehensive Examination

Each doctoral candidate is required to write one comprehensive examination: GEOG 6906 or GEOG 6907, according to the chosen field of specialization

The comprehensive examination must be completed after course requirements for the Ph.D. have been completed. The examination will occur no later than the fourth term of registration in the Ph.D. program. Failure to complete the examination successfully will result in denial of permission to continue in the program.

Thesis Proposal

Candidates normally register in the thesis on entry to the program and work actively to define their research topic during the first term of registration. The thesis proposal is normally presented after comprehensive requirements have been fulfilled. Candidates submit and defend the thesis proposal at an oral examination no later than the end of the 5th term of registration in the Ph.D. program. Continuous registration is required after initial registration in the thesis.

Residence Requirements

All Ph.D. candidates must be registered full time in a minimum of six terms to satisfy the residence requirement.

Regulations

See the General Regulations section of this Calendar.

Admission Requirements

The requirement for admission into the master's program is a B.A.(Honours) or B.Sc. (Honours) in Geography or a related discipline, with at least B+ standing.

In exceptional cases, pertinent work experience may be considered in support of an application to the Department. Students entering the program from other disciplines

or with academic deficiencies may be required to take additional courses.

Accelerated Pathway

The accelerated pathway in the M.A. Geography program is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.A. or BSc. Honours degree in Geography, Geomatics, Environmental Studies or related discipline with demonstrated academic excellence and aptitude for research may qualify for this option.

Students in their third-year of study should consult with both their Undergraduate Program Coordinator and the Department of Geography & Environmental Studies Graduate Program Supervisor to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Accelerated Pathway Requirements

1. At least 0.5 credit in GEOG courses (5000 level) with a grade of B+ or higher excluding GEOG 5000, 5001 and 5905.
2. Minimum overall CGPA of A-.

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Admission Requirements

The normal requirement for admission into the M.Sc. program in Geography is a B.Sc. (Honours) or B.A. (Honours) in Physical Geography or a related discipline, with at least B+ standing.

Students entering the program from other disciplines or with academic deficiencies may be required to take additional courses.

The intended research area must be eligible for NSERC support.

Applicants for admission must provide an outline of their proposed project, which must be suitable for the M.Sc. program.

In consultation with the Graduate Advisor and potential project supervisor, students must carefully decide whether they wish to do a group or individual project. Whilst every effort will be made to accommodate this choice, there may not be a sufficient number of individual projects to go around, or some projects may be better suited for one type (group/individual) or the other. Fields

NPSIA's M.A. program is organized around six fields. Each field has a designated economics course (or courses) and a set of designated field courses. Each student is admitted into a field and receives priority in the required economics course and in any three of the non-shared designated field courses. Students who complete the required economics course or courses and three designated field courses may receive a field concentration designation on their academic transcript and diploma. Students who choose not to complete the requirements of any given field may still graduate with a general M.A. in International Affairs without a field concentration designation. Courses marked with an asterisk (*) are shared courses with limited enrolment; students in the field may claim such courses towards their field concentration but do not have priority for the limited space in those courses.

Students who already have a graduate or senior undergraduate economics course that is deemed to be the equivalent of the required economics course for their field must take another economics course from the School. Students with economics courses similar to those offered by the school must see the M.A. Program Supervisor to determine which economics course they should be taking.

The fields are:

advanced standing without transfer of credits for those courses and will replace them with alternative economics courses from NPSIA or another department (fourth year and up), selected with the approval of the associate director on the basis of their relevance to the chosen program of study.

Language Requirement

Doctoral students must successfully complete an examination in a second language administered by the School of Linguistics and Language Studies, or meet the equivalent standard as determined by the School of Linguistics and Language Studies. Students are expected to complete this requirement or demonstrate significant progress by the end of their second year.

Completion Timeline

Ph.D. students must be registered full time for the duration of their program. Students are expected to complete the required 5.0 credits of coursework and the field examination by the end of their second year. Students will not be allowed to register in INAF 6909 until their research prospectus has been successfully defended. Students who have not successfully completed these requirements on time will be subject to a review to determine continuation in the program.

Students registered in INAF 6909 are expected to demonstrate evidence of research progress annually, and will be required to present their work at the NPSIA Research Seminar Series or show equivalent research activity.

Comprehensive Examination

Successful completion of the doctoral field comprehensive examination permits the student to continue to the next year in the program. A student whose performance on the doctoral field comprehensive examination is not deemed satisfactory by the examining board will be required to repeat the examination in a subsequent term.

Regulations

See the General Regulations section of this Calendar.

A grade of B- or better must be obtained in each credit counted towards the master's degree. The School does not permit exceptions to this rule.

Students will be required to withdraw from the program if their grade point average falls below 7.0 (B-), or if they receive a grade of less than B- in any two courses that are eligible to be counted toward the Master's degree.

Part-time program requirements

In some cases, an applicant with relevant full-time employment experience may be admitted to a part-time M.A. program. While the program requirements are the same as those for full-time students, part-time students may take up to six calendar years from the date of initial registration to complete the program.

Part-time students must register for a minimum of one term in three, and must successfully complete INAF 5011, INAF 5012, and INAF 5016 within their first 2.5 program credits. In addition, the economics course requirement must be included in the first 2.5 credits completed.

Students enrolled in the full-time master's program may transfer to the part-time program only under exceptional circumstances as approved by the faculty of Graduate and Postdoctoral Studies.

Regulations

See the General Regulations section of this Calendar.

To complete the doctoral program, students must obtain a grade of B- or higher in each course credit, and Satisfactory in the comprehensive examination, the research prospectus defence, and the Ph.D. dissertation and its oral defence.

M.A. International Affairs/J.D.

A student will complete both the M.A. and the JD programs over four calendar years.

Students will be expected to fulfil the normal requirements of both the M.A. and JD programs.

Students must complete INAF 5509 in their second year of the program.

In addition, students in the combined program will be required to complete courses in international law to be specified by the Faculty of Law.

Of the 5.0 credits completed for the M.A. degree, up to 1.5 credits may be applied to the Juris Doctor degree.

In undertaking the M.A./J.D. research essay, students will be expected to integrate both components of the joint program into their work.

The normal sequence of courses for the two degrees is as follows:

First Year

Normal JD first year (required course work to include a 0.5-credit course in international law)

Second Year

Normal M.A. first year (as described in full-time M.A. program requirements) including completion of INAF 5509. Students who choose the coursework option must complete 4.0 credits by the end of their second year. Students who choose the research essay or thesis should consult the NPSIA M.A. program administrator for registration information.

Third and Fourth Year

Students are normally registered in at least 0.5 credit of an INAF course in each of the third and fourth years of their MA/JD program. Students who choose the research essay or thesis option are also required to register in INAF 5906 or INAF 5919. M.A./JD research essays and theses will have one supervisor from NPSIA and one supervisor from the Law School.

Internship Option

The Internship option is available to all first year, full-time students in the M.A. and the M.A.-JD programs. Registration in the Internship Program option requires departmental permission, and is limited by the availability of placements. Application for an internship placement will normally be considered after the student has successfully completed 1.5 credits, including INAF 5013 and INAF 5014.

Internship placements will locate students for one term in the public service, the private sector, or non-governmental organizations. During their work term, students are required to register in INAF 5914, which is additional to the program requirements described above. Registration in the Internship Program is restricted to full-time students.

Co-op Option

Details about co-op eligibility are provided on the School's website.

The 0.0 credit co-op is in addition to the 5.0 credits required for the M.A., and a minimum of two co-op terms must be successfully completed before the student is eligible to receive a co-op designation on their academic transcript. Students register in the co-op course INAF 5913 and are restricted from taking more than 0.5 credit at the same time.

Work terms are four months in duration, and typically students are employed at the junior officer level in government departments or other organizations. Information and procedures can be obtained from the Carleton University Co-op Office.

Admission

The minimum requirement for admission into the master's program is a B.A. (Honours) degree in a discipline related to international affairs.

Under current practice, at least a high honours standing (B+ minimum) is normally required to be considered for admission to the program.

Applicants may submit Graduate Record Examination (GRE) aptitude test scores; in some circumstances, students may be required to submit GRE scores.

The Faculty of Graduate and Postdoctoral Affairs requires applicants whose native tongue is not English to be tested for proficiency in English. NPSIA applicants must submit a CAEL Assessment™ score of a minimum of 70 or a TOEFL score of 250 computer-based or 600 regular 100 iBT (minimum score of 25 in each of reading, writing, speaking and listening).

Students admitted to the NPSIA M.A. program must have successfully completed a 1.0 credit (or the equivalent) course in introductory economics (introductory microeconomics and introductory macroeconomics for economics majors) before starting the program.

Students who have not completed one credit of introductory economics at the time of their application will have their admission into the program made conditional upon its successful completion prior to registration. In some cases where the student is deemed by the admissions committee to have an insufficient background in international affairs they may be required to complete up to two additional courses as part of their M.A. program. Students who are uncertain about whether they meet the background requirements are encouraged to contact the School of International Affairs.

Accelerated Pathway

The accelerated pathway to the Master of Arts degree at the Norman Paterson School of International Affairs (NPSIA) is a flexible and individualized plan of graduate study for students in their final year of a Carleton undergraduate degree in a related discipline such as the B.P.A.P.M. degree.

Students in the third year of study of their undergraduate program who are interested in the accelerated pathway should consult with the Associate Director (M.A. program) at NPSIA to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses and Honours project/thesis supervisor for their final year of undergraduate studies.

To be eligible to participate in the accelerated pathway, students must have a minimum overall CGPA of A- in undergraduate courses.

Admission

Admission into the Ph.D. program will be judged primarily on the applicant's ability to undertake research successfully and his/her prospects for completion of the program. Admission to the Ph.D. program is governed

by the requirements stated in the General Regulations section of this Calendar.

The normal requirement for admission to the doctoral program in International Affairs is a Master's degree in a social science with at least an A- average.

Relevant work experience is also considered. Students who lack sufficient background at the graduate level in international affairs will be required to take supplementary courses extra to the degree prior to admission.

Students with no formal training in economics must complete a 1.0 credit (or equivalent) course in introductory economics (introductory microeconomics and introductory macroeconomics for economics majors) plus at least 1.0 credit (or the equivalent) at the advanced undergraduate (typically third or fourth year) or intermediate theory level to be considered for admission.

Students with no formal training in International Law must complete an International Law course (0.5 credit) at the School, or in a Law department or faculty, before the end of the second year of their program. The course must be a minimum of a 3rd year, undergraduate level course, and if taken at the School, will be extra to the degree.

All applicants whose first language is not English will be required to obtain an overall score of 70 or over on the Canadian Academic English Language Assessment with a minimum score of 70 for the writing section or a TOEFL score of 250 computer-based, 100 iBT (minimum score of 25) in each of reading, writing, speaking and listening.

Transfer from the Master's to the Ph.D. Program

Students in the full-time M.A. program who demonstrate outstanding academic performance and research potential may, with permission of the Ph.D. Associate Director, be admitted to the Ph.D. program after two terms of registration.

Students considering this option will be advised, when selecting courses for their M.A. program, to choose those courses at the master's level which are open to doctoral students and which may assist them in the doctoral comprehensive examinations.

Admission

M. Journalism

The School of Journalism and Communication provides two points of entry into the Master of Journalism program – Year One or Year Two.

Most applicants will be admitted to Year One of the two-year M.Journalism program; however, some may qualify for admission to Year Two. A committee chaired by the Supervisor of Graduate Studies will determine the admissibility of each applicant.

For admission to Year One of the M.Journalism program, applicants must hold an honour's bachelor's degree or the equivalent, with, normally, B+ or better in the honours subject and B- or higher overall.

A limited number of spaces will be made available for direct admission to Year Two of the M. Journalism program. Students must normally possess one of the following qualifications to be considered for this admission option:

- a B.Journalism (Honours) or the equivalent;
- a degree in another discipline from a recognized university plus at least five years of professional experience in journalism;
- substantial professional journalism experience of a high standard.

Note: Students with prior journalistic experience or credentials who are admitted directly into Year Two will normally pursue the Journalism Studies completion option, or a path of coursework selected in consultation with the Supervisor of Graduate Studies, which will include a thesis or master's research project, as appropriate.

Admission will be selective. Admission will not be guaranteed to all who meet the published minimum requirements, as there are many more qualified applicants each year than there are available spaces.

Proficiency in English is necessary to pursue graduate studies at Carleton University. Journalism demands higher levels of competence in English than specified in the general regulations of the graduate calendar.

All applicants whose first language is not English must satisfy this requirement by meeting one of the following criteria:

1. An official overall score of 70 on the Canadian Academic English Language (CAEL) Assessment; or
2. An official Test of English as a Foreign Language (TOEFL) score of 600 on the paper-based test (PBT), or an overall score of 100 on the Internet-based test (IBT) with a minimum score in each component of: writing 25; speaking 25; reading 25; and listening 25; or
3. An official overall international English Language Testing System (IELTS) score of 7.0 with a minimum of 7.0 in each band score; or
4. Official certification (transcripts) to indicate that they have completed an undergraduate or graduate degree within the past three years in a university in Canada, the United States, the United Kingdom or any other country in which the primary language is English, and where the language of instruction in the relevant education institution was exclusively English.

The Faculty of Graduate Studies and Postdoctoral Affairs reserves the right to require further documentation or additional testing if it deems it is necessary to demonstrate the required level of English language proficiency.

Comprehensive Examination and Thesis Proposal

As indicated above, each doctoral candidate must successfully write and pass a field comprehensive examination (LAWS 6095 [1.0]). The examination will focus on the relevant theoretical and methodological issues related to the candidate's field of study:

1. Crime, Law and Security
2. Human Rights, Citizenship and Global Justice
3. Law, Regulation and Governance

The examination can take a variety of forms including, for example, a major paper, a take-home examination, or a course design, each of which may be required to be defended at an oral examination. The exact format of the comprehensive examination is at the discretion of the student's supervisory committee in consultation with the student. This committee will also form the examining board of the comprehensive examination. Evaluation is on the basis of Pass/Fail. LAWS 6095 [1.0] will normally be completed no later than the end of the fall of the second year of registration in the program. Failure to complete the

examination successfully will result in denial of permission to continue in the program.

Also as indicated above, each doctoral candidate must successfully complete and defend a thesis proposal (LAWS 6096 [1.0]). The proposal must be written after the completion of the other course requirements, and normally should be completed by the end of the second year of doctoral study. The proposal is defended at an oral examination conducted by the supervisory committee. Evaluation is on the basis: Pass/Fail. The proposal must be successfully defended before the candidate can register in the Ph.D. Thesis (LAWS 6909 [5.5]).

Thesis

The Ph.D. thesis must be successfully defended at an oral examination.

Period of Study

This program is designed to be completed in four years of full-time study. Students admitted to part-time study will normally complete all requirements within eight years of registration.

Selection of Courses in Related Disciplines

In addition to the graduate courses offered by the Department of Law, students in the Ph.D. program are permitted to take up to 1.0 credit of courses in a related discipline, in consultation with the Graduate Supervisor.

Students should be aware that the number of spaces in graduate courses offered by other departments may be limited, and that registration may be conditional upon obtaining the prior approval of the department concerned. It is the student's responsibility to ensure that permission is obtained from the appropriate department prior to registering in any of the department's courses.

For an up-to-date listing of offerings and course descriptions in other departments, please consult the graduate calendar and the class schedule at <https://central.carleton.ca>.

Regulations

See the General Regulations section of this Calendar.

Guidelines for Completion of Master's Degree

Full-time students are expected to complete the required two courses LAWS 5000 and LAWS 5001 and either an additional 2.0 credits (for those following the thesis program), or an additional 3.0 credits (for those following the research essay program) by the end of the second term of registration. The thesis or research essay should normally be submitted by the end of the fourth term of study.

Part-time students are expected to complete the required two courses LAWS 5000 and LAWS 5001 and either an additional 2.0 credits (for those following the thesis program) or an additional 3.0 credits (for those following the research essay program) by the end of their third year of study. The thesis or research essay should normally be submitted by the end of the fifth year of study.

Regulations

See the General Regulations section of this Calendar.

Doctoral students must normally obtain a grade of B- or better in each course counted toward the fulfillment of the requirements of the degree.

Admission - M.A.

The requirement for admission into the M.A. program in Legal Studies is an Honours bachelor's degree or the equivalent, with at least high honours standing.

Applicants will be considered for admission on the basis of their academic background and standing. Where relevant, previous professional experience may be taken into account.

The Supervisor of Graduate Studies may, in some circumstances, recommend that applicants with exceptional promise who have less than BA (Honours) status be admitted into a qualifying-year program designed to raise their standing to honours status.

Applicants without a background in law may be required to complete one or more designated courses from the department's undergraduate program before taking courses towards the master's degree.

Application deadlines can be found at: <https://gsapplications.carleton.ca>

Admission - Ph.D.

Applicants will normally hold a master's degree (or equivalent) with at least an A- average. Given the interdisciplinary nature of the department and the graduate program, applications are accepted from a wide variety of backgrounds, including, but not limited to, legal studies, political science, history, criminology, sociology, women's studies and philosophy. In cases of uncertainty, potential applicants are encouraged to contact the Graduate Supervisor as to the suitability of their background. Depending on their academic background, applicants may be asked to complete course work in addition to the Ph.D. program requirements.

Comprehensive Examinations

All Ph.D. candidates are required to successfully complete a comprehensive examination. The examination will cover material relating to the student's area of specialization, research methodology associated with that area, and seminal and important works in the management field. Questions for the examination will be set by the student's comprehensive examination committee. The comprehensive examination will take place over a period of two to three weeks and will consist of a written and an oral part.

The comprehensive examinations must be completed successfully before the Ph.D. proposal defense is scheduled. Under normal circumstances, the written comprehensive and the oral defense must occur within eight terms of a full-time student's initial registration in the Ph.D. program. Part-time students should complete the comprehensives within sixteen terms of initial registration in the Ph.D. program. Students who do not fulfil this requirement will be asked to withdraw from the program.

Thesis

All Ph.D. candidates are required to complete successfully a thesis normally equivalent to a minimum of 5.0 credits on a topic approved by the School. Students with appropriate background will be reviewed for possible adjustment of thesis weight.

Regulations

See the General Regulations section of this Calendar.

Academic Standing

A grade of B- or higher is normally required in each credit counted towards the degree. However, a candidate may, with the recommendation of the School and the approval of the Dean of the Faculty of Graduate and Postdoctoral Affairs, be allowed to count a grade of C+ in 0.5 credit.

Withdrawal from the program will be required if an M.Sc. student:

- Receives a grade of lower than B- in 1.0 credit or more, or

- Fails to achieve a weighted GPA of 7.0 after completing 2.0 credits of study, or to maintain it, or
- Receives a grade lower than C+ in the same course more than once.

M.Sc. Management

Admission into the M.Sc. in Management program will be judged primarily on the applicant's potential to undertake research successfully and his/her prospects for completion of the program. Applicants will submit a research proposal statement on applying to the program.

The normal requirement for admission to the master's program in management is an Honours Bachelor of Commerce degree (or equivalent, e.g. 4-year Commerce, Bachelor of Business Administration or similar degrees) with at least a B+ average. Applicants who do not meet the normal requirements for admission may be required to complete additional courses, extra to the normal program requirements.

All applicants to the program are required to submit a GMAT (Graduate Management Admission Test) score with a minimum of 600 or an equivalent GRE (Graduate Record Exam) score. To calculate the equivalent GRE score, applicants can use the GRE Comparison Table for Business Schools.

Transfer from the Master's to the Ph.D. Program

Students enrolled full-time in the M.Sc. in Management program at Carleton University may be permitted to transfer into the Ph.D. program without completing the master's program, provided they meet the following conditions:

- Completion of 2.5 credits of master's courses with a minimum average of A
- Have demonstrated exceptional research potential
- Make a formal application for admission to the Ph.D. program no later than the third term of initial registration in the M.Sc. program
- Have permission of the Director of Graduate Research Programs.

Regulations - PhD

See the General Regulations section of this Calendar.

Academic Standing: doctoral students must normally obtain a grade of B- or better in each credit, and Satisfactory on the comprehensive examinations, the Ph.D. thesis and its oral defence.

Ph.D. Management

Admission into the Ph.D. Management program will be judged primarily on the applicant's ability to undertake research successfully and his/her prospects for completion of the program.

The normal requirement for admission to the doctoral program in management is a master's degree (or equivalent) in business or a related field with an A-average and a bachelor's degree. A number of years of work experience is desirable.

A student enrolled in a research-based master's program in business who has completed a minimum of 2.5 credits and who has shown outstanding academic performance and research promise may be admitted to the Ph.D. program without completing the master's program. Normal Ph.D. program requirements, as stated below, will apply. Each case will be considered on an individual basis for advanced standing in the Ph.D. program. Advanced standing will be considered for a maximum of 1.5 credits.

Applicants who have completed a thesis-based master's program in business or a related area may have their program requirements adjusted at the time of admission, as set out below.

All Ph.D. candidates, regardless of their previous field of specialization, are expected to have or to acquire a basic knowledge of statistics and at least two of the following areas of management: accounting, finance, information systems, international business, management science, marketing, organizational behaviour, and productions/operations management. Students will be admitted to the program with a course of study designed where appropriate to supplement previous education, experience, and training.

Graduate Management Admission Test (GMAT) - the School requires that all applicants submit scores obtained in the Graduate Management Admission Test (GMAT) offered by the Graduate Management Admission Council (GMAC). Successful candidates will normally have a GMAT score of at least 600. Equivalent GRE scores (as defined by the Educational Testing Service) may be considered.

All applicants whose first language is not English must be tested for proficiency in the English language. See Section 3.6 of the General Regulations section of this Calendar for details.

Transfer from the Master's to the Ph.D. Program

Students enrolled full-time in the M.Sc. in Management program at Carleton University may be permitted to transfer into the Ph.D. program without completing the master's program, provided they meet the following conditions:

- Completion of 2.5 credits of master's courses with a minimum average of A
- Have demonstrated exceptional research potential
- Make a formal application for admission to the Ph.D. program no later than the third term of initial registration in the M.Sc. program
- Have permission of the Director of Graduate Research Programs.

Deadlines

Thesis Proposal: full-time students normally will submit their thesis (or research essay) topic to the thesis proposal board no later than April 30 of the first year of registration for students enrolled full-time, and no later than the middle of the fifth term of registration for students enrolled part-time.

There are no performance requirements for admission to this degree program.

Applicants without a B.Mus. or B.A. Honours degree in Music, or a related discipline, but who have a three-year degree with a minimum average of B+, may be admitted to a qualifying year program. Students who complete the qualifying year requirements with a minimum average of B+ will be considered for admission to the Master's program.

The accelerated pathway in the M.A. in Music and Culture is a flexible and individualized plan of graduate study.

Students in their final year of a Carleton Bachelor of Music or Bachelor of Arts (Honours, Music Major or Minor) with demonstrated excellent aptitude for research may qualify for this option.

Students in their third-year of study in the B.Mus. or B.A. Honours should consult with both the Undergraduate Supervisor and the Graduate Supervisor of the Music program to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Accelerated Pathway Requirements

1. Elective MUSI courses at the 5000-level with a grade of B+ or higher.
2. Minimum overall CGPA of A-

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Admission

Master of Philanthropy and Nonprofit Leadership

The School of Public Policy and Administration provides two points of entry into the Master of Philanthropy and Nonprofit Leadership: a standard admission and a

professional entry that recognizes significant leadership experience.

Most applicants are considered for the standard admission into the 6.5 credit Master program. They must have an undergraduate or post-graduate degree (or equivalent) with an average of B+ or higher. The level of academic performance and potential as revealed through the degree is more important than the discipline. Students can enter the program from a variety of backgrounds, including the social sciences, humanities, and sciences.

The School also considers mid-career applicants for standard admission who do not satisfy this academic requirement, but who have demonstrated professional excellence over at least five years. Such applicants may use their high achievement in several designated university courses as evidence of their academic potential. These university courses are determined on an individual basis in consultation with the PNL Supervisor. Contact the School for details.

Applicants who have at least seven years of work experience in the philanthropic and nonprofit field over which they have exhibited significant leadership and increasing levels of responsibility are considered for entry into the limited number of spaces in the 5.0 credit professional Master program. In addition to such work experience, they must have an undergraduate degree or post-graduate degree (or equivalent) with an average of B+ or higher.

Students who seek admission to either the 6.5 or 5.0 credit Master program following satisfactory completion of the Diploma of Philanthropy and Nonprofit Leadership may, with permission of the PNL Supervisor, apply 2.0 of the Diploma credits toward the Masters.

All applicants whose first language is not English must demonstrate English proficiency in accordance with Section 3.6 of the General Regulations of this Calendar.

Students who have completed courses equivalent to the PANL courses or taken approved graduate courses on the recommendation of the PNL Graduate Supervisor, and obtained a grade of at least B+, may receive advanced standing with transfer of credit for up to 1.0 credit. This will be determined on an individual basis by consultation with the PNL Supervisor and the Faculty of Graduate and Postdoctoral Affairs, pursuant to Section 6.1 of the General Regulations of this Calendar.

Graduate Diploma in Philanthropy and Nonprofit Leadership

Applicants must have a bachelor's degree (or equivalent). Normally, an average of B+ or higher is required for admission.

All applicants whose first language is not English must demonstrate English proficiency in accordance with Section 3.6 of the Graduate Calendar.

Note: students in the Diploma programs are not eligible to receive university funding.

Guidelines for Completion of Master's Degree

Full-time students enrolled in the 5.0-credit M.A. program are expected to complete PHIL 5850, PHIL 5900 and 2.0 further credits by the end of the second term of study.

The thesis or research essay approval form should be submitted by the end of the fourth week of the third term of study. All full-time students are expected to submit the thesis or research essay by the end of the fourth term of study.

Part-time students enrolled in the 5.0 credit M.A. program are expected to complete PHIL 5850, PHIL 5900 and 2.0 further credits by the end of the third year of study.

The thesis or research essay approval form should be submitted by the end of the second month of the fourth year of study. All part-time students are expected to submit the thesis or research essay by the end of the fifth year of study.

Admission

The minimum requirement for admission to the master's program is a B.A. Honours degree (or the equivalent) in Philosophy, with at least B+ standing (or the equivalent).

Students who have not successfully completed an introductory logic course in philosophy (equivalent to Carleton's PHIL 2001) at the time of their application will be required to complete PHIL 2001 (or an equivalent) successfully prior to registration or as part of their first year of study. If required, completion of a logic course is extra to the degree requirements.

Qualifying-year and M.A. applicants from an institution other than Carleton University must submit two papers.

Qualifying Year

Applicants who do not hold an Honours degree (or the equivalent) will be required to register in a qualifying-year program before proceeding to the master's program. Regulations governing the qualifying year are outlined in the General Regulations section of this Calendar.

Students enrolled in the physics in modern technology stream are required to complete a work term rather than a research thesis. Students in this stream who wish to pursue a research degree should consult with the graduate supervisor. Although every effort is made to find a work term position for every student enrolled in the physics in modern technology stream, no guarantee of employment can be made. To minimize the likelihood of a work term position not being found, enrollment will be limited to reflect the availability of work term placements. In the event that a work term placement cannot be found, students may fulfill the M.Sc. requirements with 4.0 credits of course work.

Guidelines for Completion of Master's Degree

With the exception of those students in the physics in modern technology stream, full-time master's candidates are expected to complete all requirements in six terms of registered full-time study. Part-time master's candidates are expected to complete their degree requirements within an elapsed period of three to four calendar years after the date of initial registration.

Students in the physics in modern technology stream are normally expected to complete all their requirements in three successive terms of registered full-time study.

Ph.D. Physics (10.0 credits)

Requirements:

1. 2.0 credits course work at the graduate level	2.0
2. Comprehensive examination designed to demonstrate overall ability in physics and in the candidate's research area, normally within the first year of study. This takes the form of a written examination followed, if necessary, by an oral examination	
3. Participation in the seminar series of the Ottawa-Carleton Institute for Physics	
4. 8.0 credits in:	8.0
PHYS 6909 [8.0] Ph.D. Thesis (which will be defended at an oral examination. The examining board for all theses will include members of the Ottawa-Carleton Institute for Physics from both Departments of Physics. The external examiner of the thesis will be external to both Departments of Physics.)	
Total Credits	10.0

Notes

- Students in experimental or theoretical particle physics who lack any of the relevant courses recommended for the M.Sc. program must complete them (or the equivalents) by the end of their Ph.D. program. In addition they should complete PHYS 6601 and PHYS 6602
- Students in medical physics must have completed, either within this degree (as part of the minimum 2.0 course credits) or in prior graduate studies:

PHYS 5203 [0.5]	Medical Radiation Physics (or equivalent)
PHYS 5204 [0.5]	Physics of Medical Imaging (or equivalent)
PHYS 5206 [0.5]	Medical Radiotherapy Physics (or equivalent)
PHYS 5207 [0.5]	Radiobiology (or equivalent)
PHYS 5209 [0.5]	Medical Physics Practical Measurements (or equivalent)
PHYS 5210 [0.0]	Anatomy and Physiology for Medical Physicists (or equivalent)

 - 0.5 credit appropriate physics course from an area of physics outside medical physics
 - In addition it is also strongly recommended to have completed 0.5 credit in a computational physics course, such as PHYS 5002, within the minimum 2.0 credits of this degree or in prior graduate studies.

- Irrespective of courses taken previously at another institution, students may be required to complete one or more of PHYS 5204, PHYS 5206, or PHYS 5207 as preparation for their thesis research.

Guidelines for Completion of Doctoral Degree

Full-time Ph.D. candidates admitted on the basis of an M.Sc. are expected to complete all requirements within an elapsed period of four to five years after the date of initial registration. Part-time Ph.D. candidates are expected to complete all requirements within an elapsed period of six years after the date of initial registration.

Residence Requirements

For the Ph.D. degree (from B.Sc.): at least three years of full-time study (or equivalent).

For the Ph.D. degree (from M.Sc.): at least two years of full-time study (or equivalent).

Admission Requirements

Admission Requirements

An Honours B.Sc. in Physics or a closely related field at a standard acceptable to the two universities is normally required for admission to the M.Sc. program.

The admissions committee may require students to take an orientation examination during the first weeks of residence. The results of this examination may indicate the need for a student to register in undergraduate courses to fill gaps in his/her knowledge.

It is strongly recommended that all students have had at least one course in computing.

Candidates admitted to the M.Sc. program with more than the minimum course requirements may be permitted to credit towards the degree a maximum of 1.0 credit at the senior undergraduate level. This maximum does not apply to qualifying-year students.

Accelerated Pathway

The accelerated pathway in the Department of Physics is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.Sc. Honours degree in Physics with demonstrated excellent aptitude for research may qualify for this option.

Students in their third-year of study in the B.Sc. Honours degree in Physics should consult with both the Undergraduate Advisor and the Graduate Advisor to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses and Honours project supervisor for their final year of undergraduate studies.

Particle physics accelerated pathway: students must complete PHYS 5002 Computational Physics and PHYS 5602 Physics of Elementary Particles with a grade of B+ or higher in each.

Medical physics accelerated pathway: students must complete PHYS 5002 Computational Physics and PHYS 5313 Physical Applications of Fourier Analysis with a grade of B+ or higher in each.

Students may receive advanced standing with transfer of credit of up to 1.0 credit which will reduce their time to completion.

Admission

An M.Sc. in Physics or a closely related field is normally required for admission into the Ph.D. program.

Students who have been admitted to the M.Sc. program may be permitted to transfer into the Ph.D. program if they demonstrate academic abilities for advanced research in their field.

In exceptional cases, an outstanding student who has completed the honours B.Sc. will be considered.

Notes

- Course components:** The four required courses PADM 6010, PADM 6011, PADM 6012, and PADM 6013 will normally be taken in the first year of full-time study. The research methods course and specialization courses must be chosen by the student after consultation with, and approval by, the student's thesis supervisor and the Ph.D. Program Supervisor. Graduate courses offered by the School or by other university departments may be approved. When necessary, students must arrange formal permission from the relevant department for admission to courses.
- Comprehensive Examination:** Students will write a Comprehensive Examination, normally in the summer term of the first year, after they have successfully completed each of the four required courses PADM 6010, PADM 6011, PADM 6012, and PADM 6013 with a grade of B- or higher, and with an overall GPA of 9.0 (B+) or higher. The examination will focus on the material presented in the required courses. At the discretion of the examining board, a candidate whose performance is not satisfactory may be asked to take a second written examination.
- Doctoral Research Seminar:** Full-time students will normally register in PADM 6201 over two terms in their second year of study. As part of the seminar, a research project will be prepared under the direction of the thesis supervisor and be preliminary to and supportive of the Ph.D. Thesis. Possible formats – to be approved by the supervisor – include a comprehensive and critical literature survey, or a self-contained study applying the principles of research design and research methods to an area of inquiry related to the specialization courses.
- Thesis:** Following the successful completion of the Comprehensive Examination, students will prepare a formal thesis proposal under a thesis advisory committee. The thesis supervisor will normally be a faculty member from the School of Public Policy and Administration. The proposal will normally be submitted by the end of the summer term of the second year of full-time registration and defended early in the fall term of the third year. The thesis must demonstrate

an advanced ability to integrate multiple disciplines into the analysis of public policy. The thesis must be defended at an oral examination.

- Language Requirement:** Students will be required to demonstrate a reading knowledge of French. Another language may be substituted for French, if it is relevant to the thesis.

Regulations

See the General Regulations section of this Calendar.

All master's candidates must maintain B standing or better (GPA of 8.0). A candidate may, with the recommendation of the Institute and the approval of the Dean of the Faculty

of Graduate Studies and Research, be allowed a grade of C+ in 0.5 credit.

Academic Regulations

See the General Regulations section of this Calendar.

Admission

The normal requirement for admission to the master's program is B.A. Honours, with at least high honours standing, in one of the disciplines represented in the Institute. Prospective applicants without such qualifications may be considered for admission if they have both a strong academic record and relevant work experience.

Admission

Students who are enrolled in a doctoral program in one of the participating units may apply to the Institute of Political Economy for admission to the Collaborative Specialization. Admission to the specialization is determined by the Specialization Committee and will normally take place before the end of the first year of registration in one of the participating doctoral programs. Admission requirements to the Collaborative Ph.D. with a Specialization in Political Economy are:

- Registration in the Ph.D. program of one of the participating units;
- Registration in, or successful completion of, at least one course or comprehensive field with political economy content. This will normally be a course offered by the student's home unit but could also be selected from appropriate courses in other units. See Selection of Courses for a list of acceptable courses;
- Selection of a thesis topic with political economy content. The Specialization Committee will determine, in consultation with the supervisor, if the political economy content of the thesis meets the requirements of the Collaborative Specialization.

Total Credits	5.0

The accelerated pathway to the Master of Political Management (MPM) degree is a flexible and individualized plan of graduate study. Students may qualify if they have demonstrated academic excellence and are in their final year of a relevant Carleton undergraduate degree, such as the BPAPM degree or a BA degree in political science, communication and media studies, or other discipline related to political management.

Students in their third-year of study in the undergraduate program should consult with both their academic supervisor and the political management program supervisor to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate study.

To be eligible to participate in the accelerated pathway, students must have a minimum overall CGPA of A- in undergraduate courses and must complete POLM 3000, PSCI 3410 or COMS 3100.

Students may receive advanced standing with transfer of credit of up to 1.0 credit in POLM courses at the 5000 level, with grade of B+ or higher, which can reduce their time to completion.

Please note that:

1. POLM courses eligible for advanced standing cannot include the core requirements of the program.
2. Participation in the accelerated pathway does not guarantee entry into the MPM program. To be considered for admission to the MPM program, students must submit a formal application for consideration by the program's admissions committee.

Regulations

See the General Regulations section of this Calendar.

A standing of B- or higher must be obtained in each course or component counted towards the degree.

Admission

Applicants must:

- hold an honours baccalaureate or equivalent with at least high honours standing; and
- demonstrate a commitment to and aptitude for political management through prior involvement in party or campus politics, grassroots organization, political advocacy, or similar experience.

Although there is no formal second language requirement for the degree, individuals preparing for political professions in Canada should have or develop a facility in French.

Applicants whose first language is not English, or who have not completed a previous degree at an English-language university must demonstrate fluency in English via any one of the criteria outlined in the general regulations of the Graduate calendar.

Defences

In the case of the student choosing a thesis, the thesis will be evaluated by three people: the student's thesis supervisor from the Department, a second reader from the Department, and an internal third reader who is generally from another Carleton Department but may sometimes come from outside the University. A thesis must be defended orally before the three evaluators. No letter grade is assigned, but notations of Pass with Distinction, Satisfactory, and Unsatisfactory are assigned.

In the case of the student choosing a research essay, that essay will be evaluated by two of the Department's faculty members including the supervisor and a second reader, and a letter grade will be assigned. An oral defence of the essay is not required but may be requested by the supervisor or second reader.

Co-op Option

A co-op option is available to full-time students in the M.A. program. Students are eligible to apply for co-op after passing or receiving advanced standing for five half credits (2.5 credits), and completing one academic term of full-time studies in the Political Science program. Students

admitted to this option must satisfactorily complete two work terms in order to graduate with a co-op designation on their transcripts. These work terms are four months in duration and locate students in government departments or other organizations in order to work at a junior officer level. The coordination of the work terms is done by the University's Co-op office. While on a work term, the Co-op Office will register students in PSCI 5913.

Washington Center Internship Program

The Washington Center Internship Program is open to full time master's students who have completed at least two terms of study at Carleton. Admission is open to students with at least a 9.5 GPA in Political Science graduate courses. Successful completion of the program satisfies the requirements for one term of full-time study (1.5 credits). Students spend one term (fall, winter or summer) in Washington, D.C. They serve four days a week as an intern in Washington, D.C. and also take two seminar courses offered by faculty of The Washington Center. The normal 1.5 credit course load for participants in the program is: PSCI 5904 Washington Center Internship, PSCI 5906 Washington Center Seminar II, PSCI 5906 Washington Center Seminar II. Full information on the program and application forms can be obtained from the Department of Political Science.

Course Selection

Within the scope of the regulations, 4000-level undergraduate courses may be taken by M.A. students.

Students are also encouraged to look for graduate courses at Carleton in the Departments of Economics, Geography, History, Law, Philosophy, and Sociology and Anthropology; the Schools of Business, Journalism and Communication, Public Administration, and the Norman Paterson School of International Affairs; and in the Institutes of European and Russian Studies, and Political Economy. Students may also look for courses in the Graduate School of Public Policy and International Affairs and the School of Political Science at the University of Ottawa.

All courses selected will be subject to the approval of the Department, on grounds of appropriateness to the program of study and the avoidance of excessive overlap between courses.

Ph.D. Political Science (10.0 credits)

The Faculty of Graduate and Postdoctoral Affairs requires applicants whose native language is not English to be tested for proficiency in English. Applicants to the Political Science graduate program must meet the General Regulations requirements.

It is anticipated that candidates will enter having taken some political theory at the undergraduate level. Those who have not will be required to take PSCI 2301 and PSCI 2302, 1.0 credit over and above the normal M.A. program requirements.

Honours graduates in fields other than political science will be considered on the basis of their academic background and standing, and will be judged on a case-by-case basis. Those with only minor deficiencies may be required to take certain specified courses, while others whose degrees are less closely related to political science may be required

to register in the qualifying year, at the discretion of the Department. Graduates of three-year programs in political science will be required either to complete the fourth year of an honours degree and reapply, or register in the qualifying year, depending on work completed to date and academic standing. The qualifying year is intended only for those students (with at least an 8.0 grade point average) whose universities do not offer an Honours degree or for graduates in other fields who did not major in political science. The qualifying year program is not intended to be a method for improving a student's undergraduate record. Admission to the qualifying-year program does not imply automatic admission to the master's program.

Accelerated Pathway

The accelerated pathway in the Department of Political Science is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.A. Honours degree in Political Science with demonstrated academic excellence and aptitude for research may qualify for this option.

Students in their third year of study in the B.A. Honours degree in Political Science should consult with both the Undergraduate Supervisor and the Graduate Supervisor to determine if the accelerated pathway is appropriate for them and to discuss the selection of courses for their final year of undergraduate studies.

Accelerated Pathway Requirements

1. At least 0.5 credit in PSCI courses at the 5000#level with a grade of B+ or higher.
2. Minimum overall CGPA of 10.5.

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

Admission

The Ph.D. program in political science normally will be undertaken on a full-time basis. However, in cases of exceptional merit, the Department may accept a few candidates for the degree on a part-time basis.

The normal requirement for admission to the Ph.D. program is a master's degree (or its equivalent) in political science with high honours standing or better.

It is anticipated that Ph.D. candidates will enter having taken some political theory at the undergraduate level, regardless of their desired field of specialization. Those who have not will be required to take PSCI 2301 [0.5] and PSCI 2302 [0.5] in addition to the normal Ph.D. requirements.

The Faculty of Graduate Studies and Postdoctoral Affairs requires applicants whose native language is not English to be tested for proficiency in English. Applicants to the Political Science graduate program must meet the General Regulations requirements.

Upon entry to the program, each Ph.D. candidate will be assigned a faculty member to advise them on their studies. Students' programs, including the choice of supervisor and the thesis committee, must be approved by the Department. The thesis supervisor will normally be

chosen from among faculty members in the Department of Political Science. Upon approval of the thesis supervisor and the Department, committee members may be chosen from elsewhere within the University.

Guidelines for Completion of Master's Degree

Full-time students enrolled in the 4.5-credit M.A. program are expected to complete RELI 5801 and RELI 5802 in the first term of study and RELI 5780 in the second term of study.

RELI 5908 should be submitted by end of the Summer Study Semester. All elective coursework should be completed by the end of the second term of study.

Full-time students are required to file with the Graduate Studies Coordinator a detailed proposal of their Research Essay by the end of the second term of study. Part-time students must submit a detailed proposal of their Research Essay by the end of the term in which they are registered for RELI 5780.

The program is designed to be completed in a three term academic year.

Part-time students enrolled in the 4.5 credit M.A. program are expected to complete the required core courses (RELI 5801, RELI 5802 and RELI 5780) by the end of the third year of study. The Research Essay and all course work must be complete by the end of the sixth year of study.

Students without a prior Method and Theory course in Religious Studies are required to complete RELI 4740.

Possession of the minimum entrance standing is not in itself, however, an assurance of admission into the program.

Qualifying Year

Applicants who do not qualify for direct admission to the master's program may be admitted to a qualifying-year program designed to raise their status to that of honours graduates in Religious Studies. Applicants who lack an honours degree but have a three-year degree with honours standing (at least B overall) will normally be admitted to a qualifying-year program. Please refer to the section 2.3 of the General Regulations. Students are expected to achieve a B+ average or better in the qualifying-year program in order to qualify for admission to the Master's year.

Qualifying-year students should consult the Undergraduate Calendar and the departmental website for a listing of 4000-level courses.

Change of Status

Students contemplating changing their full-time or part-time status should consult the General Regulations section of this Calendar.

Admission

The School of Social Work provides two points of entry into the Master of Social Work program.

Applications are accepted to the Foundation Year (first year of a two year MSW program) from candidates who

hold an Honours bachelor's degree, or the equivalent, with at least high honours standing (normally B+ or higher in the final two years/10 full credits of university courses; B- or higher overall) in a discipline other than social work.

Applications are accepted to the Advanced Year (one year MSW program) from candidates who hold an accredited Bachelor of Social Work degree with honours standing (normally B+ or higher in the final two years/10 full credits of university courses; B- or higher overall).

Applications are accepted from candidates who are in the process of completing their final year of study, and who have maintained B+ or higher.

Work experience in social work or a related field is considered as one of several selection criteria for application to both Foundation Year and Advanced Year.

Applicants must have completed (or be in the process of completing) 0.5 credit in research methods or 0.5 credit in statistics with a minimum B grade or higher in either course.

The School of Social Work will not grant advanced standing for course work completed prior to entry into the MSW program.

Students accepted into Foundation Year will be expected to complete 6.0 credits of course work in year I and 5.0 credits of course work in year II.

Admission

There are three principal criteria for admission.

- Completion of an MSW at an accredited program in Social Work (Canadian Association for Social Work Education or equivalent), or a similarly accredited BSW and a closely related graduate degree. An average of A- or better at the Masters level is normally required.
- Demonstrated ability to conduct independent research and to complete the program. Applications must contain one academic or professional paper completed by the applicant at the graduate level or its equivalent.
- A minimum of two years full-time post graduate work experience, or five years post-baccalaureate work experience in the social services and/or social policy field.

Note: The School may require a candidate to complete an additional course (such as research methods or theory) to qualify for admission. Such a candidate may be provisionally admitted into the program and permitted to take the additional course concurrently with the regular PhD courses.

Co-operative Education Program in Sociology

The Co-operative Education program in Sociology provides Master of Arts (M.A.) students enrolled in the Concentration in Quantitative Methodology stream the opportunity to combine work placements with academic study.

Co-operative Education Admission Requirements

Students interested in admission into the Co-operative Education program in Sociology must apply by the end of the first semester of academic study.

To be eligible for admission to the Co-operative Education program in Sociology, students must:

- be registered in the Sociology M.A. Concentration in Quantitative Methodology stream;
- have successfully completed, by the start-date of the first work term, the required first-year core research methods courses (SOCI 5809 and at least 1.0 credit selected from: SOCI 5102, SOCI 5104, SOCI 5105 SOCI 5201, SOCI 5605;
- be registered full-time in each academic term prior to work term;
- be eligible to work in Canada (for off-campus work placements).

Students admitted to the Co-operative Education program must successfully complete two work placement term, each work term lasting four months, to receive a Co-operative Education designation on their academic transcript. Students register in the 0.0 credit Co-operative Education course SOCI 5913 and are permitted to enrol in one additional 0.5 credit course during each work term.

More information on Co-operative Education regulations can be found in Section 14.0 of the general regulations section of this Calendar.

Admission

The requirement for admission into the master's program is a B.A. Honours or equivalent with at least high honours standing in sociology or a closely-related field. Where relevant, previous professional experience will be taken

into account in determining an applicant's standing on admission.

Applicants with general (three-year) bachelor's degrees may be admitted into a qualifying-year program designed to raise their standing to honours status. Students earning at least high honours standing in their qualifying-year courses will be considered for admission into the master's program. Refer to the General Regulations section of this Calendar for details of the regulations governing the qualifying year.

Accelerated Pathway

The accelerated pathway in the Department of Sociology is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.A. Honours degree in Sociology, or equivalent, may qualify for this pathway.

Students in their third-year of study in the Carleton B.A. Honours degree in Sociology, or related discipline, should consult with both the Undergraduate Advisor and Graduate Advisor to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

Accelerated Pathway Requirements

- Any two 0.5 credit 5000-level courses with a grade of B+ or higher
- Minimal overall CGPA of B+

Students may receive advanced standing with transfer of up to 1.0 credit which can reduce their time to completion of the M.A.

Admission

The minimum requirement for admission into the Ph.D. program is a master's degree (or the equivalent) in sociology, normally with a minimum average of B+ in courses (including the thesis where applicable), and with no grade below B

Applicants who have deficiencies in certain areas may be admitted to the Ph.D. program, but will normally be required to complete additional course work.

Students will be required to withdraw from the program if their weighted grade point average falls below 7.0 (B-) after completing 2.0 credits, or if they receive a grade of less than B- in any two courses they have registered in.

Admission

Applicants must have a bachelor's degree (or equivalent), with an average of B+ or higher. The level of academic performance and potential demonstrated within the degree is more important than the discipline; students may enter the program from a wide variety of academic backgrounds in the social sciences, humanities, sciences and engineering. Mid-career applicants who do not have a bachelor's degree, but who have demonstrated professional excellence over a number of years of work in the public sector will also be considered.

All applicants must have completed 1.0 credit in university-level micro- and macroeconomic theory (ECON 1000 [1.0] or the equivalent)

0.5 credit in PSCI at the 2000-level or higher, dealing with institutions and processes by which governments legitimize and exercise power, ideally in a Canadian setting (PSCI 2003 or equivalent).

A working knowledge of algebra is also expected.

In some cases, applicants may be admitted to the program despite not having completed one of these prerequisite courses in economics or political science, on the condition that the course be completed with a grade of B- or higher in the first year of the program. It is strongly recommended that students complete the prerequisites before starting the program, to ensure that their progress through the core courses is unimpeded.

Students whose first language is not English or who have not completed a previous degree at an English speaking university must demonstrate an adequate command of English by attaining, at least, a TOEFL score of 237 CBT (computer-based test) or 580 (written); or 86 IBT overall with a minimum score in each component of: writing: 22; speaking: 22; reading: 20; and listening: 20, or a CAEL score of 70, or an IELTS score of 7.0.

Admission

Applicants must have a bachelor's degree (or equivalent) in a discipline relevant to engineering disciplinary foundations.

Normally, an average of B+ or higher is required for admission.

Progress through the program

The first year of study is essentially the same for all full-time students entering the program regardless of whether their intention is to pursue the Thesis, Research Essay or Course work option (the schedule for program completion for part-time students is in consultation with the unit). All full-time students will be expected to complete the core feminist theory and methodologies courses in the first year (typically WGST 5906 will be offered in the fall term and WGST 5907 in the winter); WGST 5905 [1.0] ; and, a further 1.0 credit chosen from among those electives on offer that year.

At the end of the winter term of the first year of study, and in consultation with the Graduate Supervisor, full-time students will be required to declare their intention to pursue the Thesis, Research Essay, or Course work option. The deadline for this decision will normally be in writing on or before April 1st.

Thesis option

In the fall of the second year of study, all full-time students will be expected to submit a research proposal that has been approved by their Thesis supervisor. The deadline for submitting the proposal is September 15.

Research Essay option

In the fall of the second year of study, all full-time students will be expected to submit a research proposal that has been approved by their Research Essay supervisor. The deadline for submitting the proposal is September 15. Students pursuing the Research Essay option will also be required to complete two additional half-course electives. Typically, these courses will be completed in the fall term of the second year.

Course work option

Students pursuing the course work option will be required to complete four additional half-course electives. Typically, these courses will be completed over the fall and winter terms of the second year.
