Computer Science

This section presents the requirements for programs in:

- Computer Science B.C.S. Honours
- Computer Science Industrial Applications Internship Option B.C.S. Honours
- Computer Science Algorithms Stream B.C.S. Honours
- Computer Science Management and Business Systems Stream B.C.S. Honours
- Computer Science Software Engineering Stream B.C.S. Honours
- Computer Science Network Computing Stream B.C.S. Honours
- Computer Science Computer and Internet Security Stream B.C.S. Honours
- Computer Science Mobile Computing Stream B.C.S. Honours
- Computer Science Computer Game Development Stream B.C.S. Honours
- Computer Science B.C.S. Major
- Computer Science and Mathematics:
 Concentration in Computing Theory and Numerical Methods B. Math. Combined Honours
- Computer Science and Mathematics: Concentration in Statistics and Computing B. Math. Combined Honours
- Minor in Computer Science

Program Requirements

Course Categories

The following categories of courses are used in defining the program requirements in Computer Science.

Computer Science (COMP)

In addition to the courses with subject code COMP, the following courses offered by the Faculty of Engineering and Design are relevant to the B.C.S. program and the Combined Honours programs. These courses are counted as Computer Science credits in B.C.S., Minor in Computer Science and Combined Honours program requirements:

SYSC 3303 [0.5]	Real-Time Concurrent Systems
SYSC 4005 [0.5]	Discrete Simulation/Modeling
SYSC 4106 [0.5]	The Software Economy and Project Management
SYSC 4507 [0.5]	Computer Systems Architecture

Breadth Electives

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, the Sprott School of Business and the Faculty of Science except for courses in COMP, MATH, STAT and the Prohibited Courses category.

Natural Science Electives

This category is defined with the B.Math. programs. See the Mathematics Program section of this Calendar for details.

Prohibited Courses

The following courses cannot be used for credit in the B.C.S., the Computer Science Minor, or any Combined Computer Science program:

BUSI 2402 [0.5]	Business Applications Development
BUSI 3400 [0.5]	Data and Information Management
COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Calculus: with Applications to Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
ECON 1401/ Elementary Mathematics for MATH 1401 [0.5] Economics I	
ECON 1402/ MATH 1402 [0.5]	Elementary Mathematics for Economics II
and ITEC except for the BIT 1100, BIT 1101, B	, IMD, IRM, MPAD, NET, PLT ne following: BIT 1000, BIT 1001, IT 1200, BIT 1201, BIT 2000, BIT 2007, BIT 2100, BIT 2300.

Bachelor of Computer Science Honours Bachelor of Computer Science Honours Streams

B.C.S. Honours students may either register in the B.C.S. Honours degree below, or in one of the B.C.S. Honours streams that follow.

Computer Science B.C.S. Honours (20.0 credits)

A. Credits Included in the Major CGPA (9.0 credits)

1.	6.5 credits in:		6.5
	COMP 1405 [0.5]	Introduction to Computer Science I	
	COMP 1805 [0.5]	Discrete Structures I	
	COMP 1406 [0.5]	Introduction to Computer Science II	
	COMP 2401 [0.5]	Introduction to Systems Programming	
	COMP 2402 [0.5]	Abstract Data Types and Algorithms	
	COMP 2404 [0.5]	Introduction to Software Engineering	
	COMP 2406 [0.5]	Fundamentals of Web Applications	
	COMP 2804 [0.5]	Discrete Structures II	
	COMP 3000 [0.5]	Operating Systems	
	COMP 3004 [0.5]	Object-Oriented Software Engineering	
	COMP 3005 [0.5]	Database Management Systems	
	COMP 3007 [0.5]	Programming Paradigms	
	COMP 3804 [0.5]	Design and Analysis of Algorithms I	
2.	0.5 credit in COM	P at the 2000-level or above	0.5
3.	2.0 credits in:		2.0
	COMP 4905 and 1.	5 credits in COMP at the 4000 level,	
	COMP 4906 and 1.	0 credit in COMP at the 4000 level	

	Credits Not Includ edits)	ed in the Major CGPA (11.0	
4.	1.5 credits from:		1.5
		Elementary Calculus I Linear Algebra for Engineering or Science	
	& MATH at the 2000	0-level or above	
	or		
	MATH 1002 [1.0] & MATH 1104 [0.5]	Calculus and Introductory Analysis	
		Linear Algebra for Engineering or Science	
	or		
	MATH 1007 [0.5] & MATH 1102 [1.0]	•	
5.	0.5 credit in:		0.5
	STAT 2507 [0.5]	Introduction to Statistical Modeling I	
6.	5.0 credits in Brea	dth Electives	5.0
7.	4.0 credits in free	electives.	4.0
To	tal Credits		20.0

Computer Science Industrial Applications Internship Option B.C.S. Honours (20.0 credits)

Registration in the internship option is by permission of the School only.

Courses Delivered at the Premises of the Industrial Partner - 4.0 credits

Internship Courses -	4.0 credits	
COMP 1910 [0.5]	Internship	
COMP 1911 [0.5]	Internship	
COMP 2910 [0.5]	Internship	
COMP 2911 [0.5]	Internship	
COMP 3910 [0.5]	Internship	
COMP 3911 [0.5]	Internship	
COMP 4910 [0.5]	Internship	

Courses to be Delivered On-Campus - 11.0 credits

COMP 4911 [0.5] Internship

Core BCS Courses -	11.0 credits
COMP 1405 [0.5]	Introduction to Computer Science I
COMP 1406 [0.5]	Introduction to Computer Science II
COMP 2401 [0.5]	Introduction to Systems Programming
COMP 2402 [0.5]	Abstract Data Types and Algorithms
COMP 2404 [0.5]	Introduction to Software Engineering
COMP 2406 [0.5]	Fundamentals of Web Applications
COMP 3000 [0.5]	Operating Systems
COMP 3004 [0.5]	Object-Oriented Software Engineering
COMP 3005 [0.5]	Database Management Systems
COMP 3007 [0.5]	Programming Paradigms
COMP 1805 [0.5]	Discrete Structures I
COMP 2804 [0.5]	Discrete Structures II
COMP 2XXX [0.5] (or above
COMP 3804 [0.5]	Design and Analysis of Algorithms I
COMP 4XXX [0.5]	

	COMP 4XXX [0.5]	
	COMP 4XXX [0.5]	
	COMP 4905 [0.5]	Honours Project
	MATH 1007 [0.5]	Elementary Calculus I
	MATH 1107 [0.5]	Linear Algebra I
	MATH 2XXX [0.5] o	r above
	STAT 2507 [0.5]	Introduction to Statistical Modeling I
В	readth Electives - 5	.0 credits
	Elective 1 [0.5]	
	Elective 2 [0.5]	
	Elective 3 [0.5]	
	Elective 4 [0.5]	
	Elective 5 [0.5]	
	Elective 6 [0.5]	
	Elective 7 [0.5]	
	Elective 8 [0.5]	
	Elective 9 [0.5]	
	Elective 10 [0.5]

Total Credits						

Minor in Computer Science (4.0 credits)

Only students pursuing an undergraduate program (except Computer Science) requiring at least 20.0 credits to graduate and who have completed at least 4.0 credits toward their degree with a minimum Overall CGPA of 7.0 may be admitted to the Minor in Computer Science.

Students who are required to leave the Minor due to a low Minor CGPA may not return to the Minor at any subsequent date.

Requirements

	•					
1. 2.5 credits in:						
	COMP 1005 [0.5]	[5] Introduction to Computer Science I				
	COMP 1006 [0.5]	Introduction to Computer Science II				
	COMP 2401 [0.5] Introduction to Systems Programming					
	COMP 2402 [0.5] Abstract Data Types and Algorithms					
	COMP 2404 [0.5]	Introduction to Software Engineering				
2. 1.0 credit from:						
	COMP 1805 [0.5]	Discrete Structures I (and/or COMP at the 2000-level or above)				
3.	0.5 credit in COM	P at the 3000-level or above	0.5			
4. Course equivalencies and transfer credits can be used for at most 2.0 credits of the minor; the remaining 2.0 credits must be courses listed in the COMP section of this Calendar						
5. The remaining requirements of the major discipline(s) and degree must be satisfied.						
Total Credits						

Regulations

In addition to the program requirements described here, students must satisfy the University regulations

common to all undergraduate students (see the *Academic Regulations of the University* section of this Calendar).

Students should consult with the School when planning their program and selecting courses.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the coop option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

English Language Proficiency

Students admitted to Carleton based on CAEL, IELTS or TOEFL assessments and who are required to take an ESL course must take and pass the Oral Proficiency in Communicative Settings (OPECS) Test. The test must be taken before being permitted to register in COOP 1000. Admission to the co-op program can be confirmed with a minimum score of 4+.

Participation Requirements COOP 1000

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office

Students must maintain contact with the co-op office during their job search and while on a work term. All

email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a coop job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation

To obtain a Satisfactory grade for the co-op work term students must have:

- A satisfactory work term evaluation by the co-op employer;
- 2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op

program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000
- 2. Failure to pay all co-op related fees
- 3. Failure to actively participate in the job search process
- 4. Failure to attend all interviews for positions to which the student has applied
- Declining more than one job offer during the job search process
- 6. Continuing a job search after accepting a co-op position
- 7. Dismissal from a work term by the co-op employer
- Leaving a work term without approval by the Co-op manager
- 9. Receipt of an unsatisfactory work term evaluation
- 10. Submission of an unsatisfactory work term report

Standing and Appeals

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students

All International Students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office

Bachelor of Computer Science Honours and Major: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

- A major CGPA of 8.00 or higher and an overall CGPA of 8.00 or higher;
- Successfully completed 3.0 required credits in Computer Science, including one of COMP 2402 or COMP 2404;
- 3. Registered as a full-time student in the Bachelor of Computer Science program (2.0 credits).

Bachelor of Computer Science Honours and Major students must successfully complete four (4) work terms to obtain the Co-op designation.

Co-op Work Term Course: COMP 3999 Work/Study Pattern:

Year 1		Year 2		Year 3		Year 4		Year 5	
Term	Pattern

Winter	S	Winter	S	Winter	S	Winter	W	Winter	S
Summer	**0	Summer	W	Summer	W	Summer	W		

Legend

S: Study

W: Work

O: Optional

Admissions Information

Admission Requirements are for the 2019-20 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

^{*} indicates recommended work study pattern

^{**} student finds own employer for this work-term.

Degree

- · B.C.S. (Major)
- · B.C.S. (Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent, including a minimum of six 4U or M courses. The six 4U or M courses must include one of Advanced Functions or Calculus and Vectors. For the BCS Honours Biomedical Computing Stream, the six courses must also include Ontario 4U in Chemistry or equivalent. Equivalent courses may be substituted between the old and new Ontario mathematics curriculum.

Advanced Standing

Applications for admission beyond first year will be assessed on their individual merits. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Computer Science program;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market (and thus the availability of co-op placement) may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Computer Science (COMP) Courses

Notes:

 Some of the following Computer Science courses are cross-listed from other parts of the Calendar. In every such case, only one course is actually offered and the two numbers are alternate identifiers for this single course. Students in the B.C.S. program should register in such a course under the Computer Science (COMP) number.

COMP 1001 [0.5 credit]

Introduction to Computational Thinking for Arts and Social Science Students

An introduction to computational thinking and its applications to the arts and social sciences. Students will gain computational thinking skills by exploring data representation, basic programming concepts, a selection of algorithms, and advanced usage of software packages for the arts and social sciences.

Precludes additional credit for COMP 1004 (no longer offered). This course cannot be taken for credit by students in Business, Engineering, Computer Science, Mathematics or Science.

Lectures three hours a week.

COMP 1005 [0.5 credit] Introduction to Computer Science I

A first course in programming, emphasizing problem solving and computational thinking. Topics include pseudocode, variables, conditionals, iteration, arrays, objects, functions, sorting, searching, and simulation. Includes: Experiential Learning Activity Precludes additional credit for COMP 1405, SYSC 1100 (no longer offered), ECOR 1606, SYSC 1005, CGSC 1005, BIT 1400.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 1006 [0.5 credit] Introduction to Computer Science II

A second course in programming emphasizing problem solving and computational thinking in an object-oriented language. Topics include abstraction, mutable data structures, methods, inheritance, polymorphism, recursion,

program efficiency, testing and debugging.

Includes: Experiential Learning Activity
Precludes additional credit for BUSI 2402, COMP 1406,
SYSC 1101 (no longer offered), SYSC 2004, BIT 2400.
Prerequisite(s): one of COMP 1005, COMP 1405,
SYSC 1005, ECOR 1606, BIT 1400, CGSC 1005.
Lectures three hours a week, tutorial one and a half hours a week.

COMP 1405 [0.5 credit]

Introduction to Computer Science I

A first course in programming for B.C.S. students emphasizing problem solving and computational thinking. Topics include pseudocode, variables, conditionals, iteration, arrays, objects, functions, sorting, searching, and simulation.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 1005, SYSC
1100 (no longer offered), ECOR 1606, SYSC 1005,
CGSC 1005, BIT 1400.

Prerequisite(s): restricted to students registered in the B.C.S. program, combined Honours in Computer Science and Mathematics, Honours Computer Mathematics, and Honours Computer Statistics.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 1406 [0.5 credit]

Introduction to Computer Science II

A second course in programming for BCS students, emphasizing problem solving and computational thinking in an object-oriented language. Topics include abstraction, mutable data structures, methods, inheritance, polymorphism, recursion, program efficiency, testing and debugging.

Precludes additional credit for COMP 1006, SYSC 1101 (no longer offered), SYSC 2004, BUSI 2402, BIT 2400. Prerequisite(s): one of COMP 1405, COMP 1005, ECOR 1606, SYSC 1005, BIT 1400, CGSC 1005. Restricted to students registered in the B.C.S. program, combined Honours in Computer Science and Mathematics, Honours Computer Mathematics, and Honours Computer Statistics.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 1501 [0.5 credit]

Introduction to Computer Game Design

Introduction to computer game programming interfaces. Topics may include: game balance and level design; storytelling and narrative; basic game architecture; sprite-based games and isometric games; representation of scenes; user interaction; architecture of game consoles; development tools for game consoles; interaction with game peripherals.

Prerequisite(s): one of COMP 1405, COMP 1005, ECOR 1606, SYSC 1005.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 1601 [0.5 credit]

Introduction to Mobile Application Development

Introduction to developing mobile applications using the Mac OS X platform. Topics include: the Objective-C programming language; development tools; framework API's; and the Quartz graphic system. Extensive practical experience with development for Apple mobile devices such as the iPhone.

Includes: Experiential Learning Activity
Prerequisite(s): one of COMP 1405, COMP 1005,
SYSC 1005, ECOR 1606.
Lecture/lab four hours a week.

COMP 1805 [0.5 credit]

Discrete Structures I

Introduction to discrete mathematics and discrete structures. Topics include: propositional logic, predicate calculus, set theory, complexity of algorithms, mathematical reasoning and proof techniques, recurrences, induction, finite automata and graph theory. Material is illustrated through examples from computing. Includes: Experiential Learning Activity

Also listed as MATH 1805.

Precludes additional credit for MATH 1800.

Prerequisite(s): one Grade 12 university preparation mathematics course.

Lectures three hours a week, tutorial one hour a week.

COMP 1910 [0.5 credit]

Internship

The internship exposes students to industrial software development via placement in a local enterprise. This course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): Permission of the School and registration in internship option.

COMP 1911 [0.5 credit]

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the BCS.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 1910 and registration in internship option.

COMP 2401 [0.5 credit]

Introduction to Systems Programming

Introduction to system-level programming with fundamental OS concepts, procedures, primitive data types, user-defined types. Topics may include process management, memory management, process coordination and synchronization, inter-process communication, file systems, networking, pointers, heap and stack memory management, and system/library calls.

Precludes additional credit for COMP 1002 (no longer offered), COMP 1402 (no longer offered), COMP 2001 (no longer offered), SYSC 2006.

Prerequisite(s): one of COMP 1406, COMP 1006 or SYSC 2004, with a minimum grade of C-.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 2402 [0.5 credit]

Abstract Data Types and Algorithms

Introduction to the design and implementation of abstract data types and to complexity analysis of data structures. Topics include: stacks, queues, lists, trees and graphs. Special attention is given to abstraction, interface specification and hierarchical design using an object-oriented programming language.

Precludes additional credit for COMP 2002 (no longer offered), SYSC 2002 (no longer offered), SYSC 2100. Prerequisite(s): one of COMP 1406, COMP 1006, SYSC 2004, with a minimum grade of C-. Lectures three hours a week.

COMP 2404 [0.5 credit]

Introduction to Software Engineering

Introduction to object-oriented software development, with emphasis on design and implementation of medium-sized programs. Topics include abstraction, modularity, encapsulation, reusability, and design patterns. Includes: Experiential Learning Activity

Precludes additional credit for COMP 2004 (no longer offered), SYSC 3010, SYSC 3110.

Prerequisite(s): COMP 2401.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 2406 [0.5 credit]

Fundamentals of Web Applications

Introduction to Internet application development; emphasis on computer science fundamentals of technologies underlying web applications. Topics include: scripting and functional languages, language-based virtual machines, database query languages, remote procedure calls over the Internet, and performance and security concerns in modern distributed applications.

Includes: Experiential Learning Activity

Precludes additional credit for COMP 2005 (no longer offered), COMP 2006 (no longer offered), COMP 2405 (no longer offered).

Prerequisite(s): one of COMP 1006, COMP 1406, SYSC 2004, with a minimum grade of C-.

Lectures three hours a week and tutorial one and a half hours a week.

COMP 2501 [0.5 credit]

Computer Game Design and Development

Topics may include: user interaction in multiplayer games, representation of animated scenes, tools for game character development, special effects, sound programming, game AI, motion planning and control, collision detection and physics, digital rights management. Prerequisite(s): MATH 1104, COMP 1501, one of COMP 1406, COMP 1006 or SYSC 2004, and one of COMP 2401, or SYSC 2006.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 2601 [0.5 credit]

Mobile Applications

Development of applications for mobile environments taking advantage of gesture-based input and using location and presence services. Topics include introduction to low-level network services and mobile platforms, description of architectural patterns, principles of mobile development and interaction styles for network service usage.

Includes: Experiential Learning Activity Prerequisite(s): COMP 1601. Lecture/lab four hours a week.

COMP 2801 [0.5 credit] Introduction to Robotics

An introduction to the field of mobile robots and their applications from a computer science perspective. The course will discuss common robot programming architectures and strategies. Students will build various robot configurations and experiment with a variety of sensors using behavior-based programming. Includes: Experiential Learning Activity

Precludes additional credit for COMP 1807 (no longer

Prerequisite(s): one of COMP 1406, COMP 1006 or SYSC 2004 with a minimum grade of C-. Lab four hours a week.

COMP 2804 [0.5 credit] Discrete Structures II

A second course in discrete mathematics and discrete structures. Topics include: counting, sequences and sums, discrete probability, basic statistics, recurrence relations, randomized algorithms. Material is illustrated through examples from computing.

Prerequisite(s): COMP 1805 or MATH 1800, with a minimum grade of C-.

Lectures three hours a week.

COMP 2910 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 1911 and registration in internship option.

COMP 2911 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the BCS.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 2910 and registration in internship option.

COMP 3000 [0.5 credit] Operating Systems

Operating system implementation course stressing fundamental issues in design and how they relate to modern computer architectures. Assignments involve the modification and extension of a multitasking operating system.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3001 (no longer offered), SYSC 4001.

Prerequisite(s): one of COMP 2402, SYSC 2100, and one of COMP 2401, SYSC 2006.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 3002 [0.5 credit] Compiler Construction

The structure, organization and design of the phases of a compiler are considered: lexical translators, syntactical translators, scope handlers, type checkers, code generators and optimizers. Components of a compiler will be implemented.

Prerequisite(s): one of COMP 2402, SYSC 2100. Lectures three hours a week.

COMP 3004 [0.5 credit]

Object-Oriented Software Engineering

Theory and development software systems. Computer ethics. Possible topics include: software development processes, requirement specification, class and scenario modeling, state modeling, UML, design patterns, traceability. Students are to complete a team project using a CASE tool.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3020, SYSC 3100
(no longer offered), SYSC 3120, SYSC 4120, SYSC 4800
(no longer offered).

Prerequisite(s): COMP 2401, COMP 2406 and one of COMP 2404, SYSC 3010, or SYSC 3110.

Lectures three hours a week.

COMP 3005 [0.5 credit] Database Management Systems

Introduces students to concepts of database management systems, database design and file structures. Topics include: entity-relationship modeling and object oriented database design, data models (relational, network and object oriented), the relational algebra, SQL, normalization theory, physical data organization, object oriented databases and OQL.

Precludes additional credit for BUSI 3400. Prerequisite(s): COMP 1805 or MATH 1800 with a minimum grade of C-, plus: COMP 2402 or (SYSC 2004 and SYSC 2100).

Lectures three hours a week.

COMP 3007 [0.5 credit] Programming Paradigms

An introduction to alternative programming paradigms such as functional, constraint-based, concurrent, and logic programming.

Precludes additional credit for SYSC 3101.

Prerequisite(s): COMP 2402, or both of SYSC 2004 and SYSC 2100.

Lectures three hours a week.

COMP 3008 [0.5 credit] Human-Computer Interaction

Fundamentals of the underlying theories, design principles, development and evaluation practices of human-computer interaction (HCI). Topics may include: theories of interaction, user interface frameworks, desktop, web, mobile, and immersive applications, usability inspection and testing methods, and qualitative and quantitative approaches to HCI research.

Prerequisite(s): one of COMP 2404, SYSC 3010, SYSC 3110 and COMP 2406.

Lectures three hours a week.

COMP 3009 [0.5 credit] Computer Graphics

An overview of computer graphics covering rendering, modeling, and animation. Topics include geometric primitives and modeling; image formation algorithms such as ray tracing and the Z-buffer; lighting, shading, and texture; and introduction to physics-based animation and character animation.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 2401, COMP 2402, MATH 1007, and MATH 1104.

Lectures/lab four hours a week.

COMP 3203 [0.5 credit] Principles of Computer Networks

This is an introductory course to the field of Network Computing. Topics include: Protocol Architectures and Internetworking, Types of Networks, Communication Protocols, End-System and Network Traffic Management, Structure of Routing and Congestion Control. Precludes additional credit for SYSC 4602. Prerequisite(s): one of COMP 2402, SYSC 2100, and one of COMP 2401, SYSC 2006. Lectures three hours a week.

COMP 3301 [0.5 credit] Technical Writing for Computer Science

Technical communication for computer science majors, concentrating on writing scientific papers and technical reports. Principles of clarity and precision in writing and communication. Practical exercises and readings from recent technical publications will be used.

Prerequisite(s): COMP 2402 and COMP 2404. Lectures three hours a week.

COMP 3308 [0.5 credit]

Bioinformatics

This practical interdisciplinary course will provide a broad overview of bioinformatics in which computer science and mathematics are applied to solve problems in molecular biology. Topics include gene prediction, sequence alignment, phylogeny, molecular interactions, macromolecular structure prediction and biological databases.

Includes: Experiential Learning Activity Also listed as BIOC 3008 and BIOL 3008.

Prerequisite(s): BIOC 2200 or BIOL 2200, or permission of the Biochemistry Institute.

Lecture two hours a week, computer workshop three hours a week.

COMP 3400 [0.5 credit]

Computational Logic and Automated Reasoning

Applications of formal logic in computer science. Symbolic logics such as classical predicate calculus are used to represent domain knowledge, to model computational problems and to solve them by means of automated reasoners. Applications include artificial intelligence, software engineering, data management and hardware verification.

Prerequisite(s): COMP 2804. Lectures three hours a week.

COMP 3501 [0.5 credit]

Foundations of Game Programming and Computer Graphics

Mathematical concepts of 3D engines. Topics may include: illumination and visibility determination; quaternions; homogeneous coordinates; transforms; ray tracing; bump mapping; portal systems; polygonal techniques; shadows; and linear and rotational physics.

Prerequisite(s): one of COMP 2402, SYSC 2100, and one of COMP 2404, SYSC 3010, SYSC 3110, and COMP 2501.

Lectures three hours a week.

COMP 3801 [0.5 credit]

Algorithms for Modern Data Sets

Algorithm design techniques for modern data sets arising in, for example, data mining, web analytics, epidemic spreads, search engines and social networks. Topics may include streaming, memory hierarchy aware, game theoretic, parallel, distributed, cloud-based, and probabilistic algorithms.

Prerequisite(s): COMP 2804 with a minimum grade of B+. Lecture three hours a week.

COMP 3803 [0.5 credit]

Introduction to Theory of Computation

Theoretical aspects of computer science. Topics include: formal languages and automata theory, computability theory.

Precludes additional credit for COMP 2805 (no longer offered).

Prerequisite(s): COMP 2804. Lectures three hours a week.

COMP 3804 [0.5 credit]

Design and Analysis of Algorithms I

An introduction to the design and analysis of algorithms. Topics include: divide-and-conquer, dynamic programming, linear programming, greedy algorithms, graph algorithms, NP-completeness.

Also listed as MATH 3804.

Prerequisite(s): one of COMP 2402 or SYSC 2100, and either COMP 2804 or both of MATH 2007 and MATH 2108 or equivalents.

Lectures three hours a week.

COMP 3805 [0.5 credit]

Discrete Structures and Applications (Honours)

Enumeration: inclusion and exclusion, recurrence relations, generating functions and applications. Graph theory: connectivity, planarity, Hamilton paths and Euler trails. Error-correcting codes. Designs and finite geometries. Symmetry and counting.

Also listed as MATH 3855.

Precludes additional credit for MATH 3805 (no longer offered) and MATH 3825.

Prerequisite(s): MATH 2100 or a grade of B or higher in MATH 2108 or MATH 3101.

Lectures three hours a week and one hour tutorial.

COMP 3807 [0.5 credit] Mathematical Software

Incorporation of basic numerical methods into efficient, reliable software. The course includes examination of existing software systems, e.g. linear systems, non-linear systems, optimization, or differential equations.

Includes: Experiential Learning Activity

Also listed as MATH 3807. Prerequisite(s): COMP 3806.

COMP 3910 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 2911 and registration in internship option.

COMP 3911 [0.5 credit]

Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 3910 and registration in internship option.

COMP 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

COMP 4000 [0.5 credit] Distributed Operating Systems

An advanced course emphasizing the principles of distributed operating systems including networking protocols, distributed file systems, remote IPC mechanisms, graphical user interfaces, load balancing, and process migration. Case studies include current "standards" as well as novel systems under development. Includes: Experiential Learning Activity Prerequisite(s): one of COMP 3203 or SYSC 4602, and one of COMP 3000 or SYSC 4001.

Lectures three hours a week.

COMP 4001 [0.5 credit] Distributed Computing

Overview of distributed computing. Topics include: computational models, communication complexity, design and analysis of distributed algorithms and protocols, fault-tolerant protocols, synchronous computations. Applications may include: communication in data networks, control in distributed system (e.g., election, distributed mutual exclusion), manipulation of distributed data (e.g., ranking).

Prerequisite(s): COMP 1805 with a minimum grade of C-, COMP 2401 and COMP 2406.

Lectures three hours a week.

COMP 4002 [0.5 credit] Real-Time 3D Game Engines

The design and implementation of game engines for real-time 3D games including topics such as camera control, environmental effects, articulated models, terrain, vegetation, collision detection, particles, emitters, triggers, portals, waypoints, mirrors, and shadows.

Prerequisite(s): one of COMP 2404, SYSC 3010, SYSC 3110.

Lectures three hours a week.

COMP 4003 [0.5 credit] Transaction Processing Systems

Concepts and architectures of transaction processing systems and on-line transaction processing, with emphasis on data integration systems. Transaction properties and models, embedded-SQL, active rules, consistency maintenance, serializability, concurrency control, recovery, data integration systems and federated databases, introduction to transactions in web services and workflow systems.

Prerequisite(s): COMP 3005 and one of COMP 2404, SYSC 3010. SYSC 3110.

Lectures three hours a week.

COMP 4004 [0.5 credit] Software Quality Assurance

Introduction to the theory and practice of Software Quality Assurance. Topics include: functional requirements analysis, system requirement analysis, verification and validation, traceability, white box testing, integration testing, object-oriented testing, tools, and management issues.

Precludes additional credit for SYSC 4101. Prerequisite(s): COMP 3004. Lectures three hours a week.

COMP 4009 [0.5 credit]

Programming for Clusters and Multi-Core Processors

Introduction to parallel architectures, programming languages and algorithms for processor clusters and multicore processors. Distributed memory architectures, cluster computing, message passing parallel programming, multicore processors, shared memory parallel programming, use of thread libraries, parallel performance analysis. Prerequisite(s): COMP 2804, and one of COMP 2402, SYSC 2100, and one of COMP 2404, SYSC 3010, SYSC 3110.

Lectures three hours a week.

COMP 4102 [0.5 credit] Computer Vision

The basic ideas and techniques of computer vision. The central theme is reconstructing 3D models from 2D images. Topics include: image formation, image feature extraction, camera models, camera calibration, structure from motion, stereo, recognition, augmented reality, image searching.

Prerequisite(s): one of MATH 1104 or MATH 1107, and one of COMP 2404, SYSC 3010, SYSC 3110. Lectures three hours a week.

COMP 4104 [0.5 credit]

Principles and Practice of Distributed Programming

Advanced course on distributed programming in Java. Introduces students to standard design patterns for implementing components that solve common distributed programming challenges in Java. Topics covered include: threads, message passing, coordination, distributed object technology, web-based services, and collaborative applications.

Prerequisite(s): COMP 3004 and COMP 2406. Lectures three hours a week.

COMP 4106 [0.5 credit] Artificial Intelligence

Several areas in knowledge-based systems are covered, including recent approaches to machine learning and data mining, inference methods, knowledge-based and fuzzy systems, heuristic search, and natural language processing.

Prerequisite(s): COMP 2804, one of COMP 2404, SYSC 3010, SYSC 3110 and one of COMP 2402, SYSC 2100.

Lectures three hours a week.

COMP 4107 [0.5 credit]

Neural Networks

Theory and application of neural networks to problems in machine learning. Topics include: biological models, perceptron and other neuron types, feed forward and recurrent architectures, learning algorithms and applications in pattern recognition and sequence prediction.

Prerequisite(s): COMP 2404, COMP 2804, and one of MATH 1104 or MATH 1107.

Lectures three hours a week.

COMP 4108 [0.5 credit] Computer Systems Security

Introduction to information security in computer and communications systems, including network, operating systems, web and software security; Passwords, authentication applications, privacy, data integrity, anonymity, secure email, IP security, security infrastructures, firewalls, viruses, intrusion detection, network attacks.

Prerequisite(s): one of COMP 3203 or SYSC 4602, and one of COMP 3000, SYSC 3001, SYSC 4001. Lectures three hours a week, tutorials one and a half hours a week.

COMP 4109 [0.5 credit] Applied Cryptography

Practical aspects of cryptography. Pseudo random number generation, symmetric cryptography (stream and block ciphers), modes of operation, hash functions, message and entity authentication protocols, zero knowledge, pitfalls deploying public-key encryption and digital signatures, key distribution, secret-sharing. Prerequisite(s): one of COMP 2402, SYSC 2100; a MATH course at the 2000-level or above; and COMP 2804. Lectures three hours a week.

COMP 4111 [0.5 credit]

Data Management for Business Intelligence

Application of computational techniques to support business activities, such as decision making, business understanding, data analysis, business process automation, learning from data, producing and using datacentric business models, ontology-based data access and integration, data quality assessment and cleaning and use of contextual data.

Prerequisite(s): COMP 3005.

Also offered at the graduate level, with different requirements, as COMP 5111, for which additional credit is precluded.

Lectures three hours a week.

COMP 4202 [0.5 credit]

Computational Aspects of Geographic Information Systems

Through recent advances in navigation systems, mobile devices, and new software such as Mapquest and Google Earth, GIS is becoming increasingly important and exciting from a CS perspective. This course lays the algorithmic foundations to understand, use and further this technology. Prerequisite(s): COMP 3804 or equivalent. Also offered at the graduate level, with different requirements, as COMP 5204, for which additional credit

is precluded.
Lecture three hours a week.

COMP 4203 [0.5 credit]

Wireless Networks and Security

An introduction to wireless networks covering both networking issues and security aspects of modern wireless environments. Fundamentals of mobile LANs, ad hoc, sensor networks, secure routing, searching, clustering, multicasting, localization, mobile IP/TCP, confidentiality, key establishment, authentication, broadcasting, RFIDs, and roque attacks.

Prerequisite(s): COMP 3203 or SYSC 4602. Lectures three hours a week.

COMP 4206 [0.5 credit] Evolving Information Networks

Convergence of social and technological networks. Interplay between information content, entities creating it and technologies supporting it. Structure and analysis of such networks, models abstracting their properties, techniques link analysis, search, mechanism design, power laws, cascading, clustering and connections with work in social sciences.

Prerequisite(s): one of COMP 1805, MATH 1805, and one of COMP 2401, SYSC 2006, and COMP 2406. Lecture three hours a week.

COMP 4308 [0.5 credit] Computational Systems Biology

Modeling and simulation of metabolic and regulatory networks towards understanding complex and highly dynamic cellular systems. Biotechnological applications include metabolic engineering, synthetic biology, and drug discovery.

Includes: Experiential Learning Activity

Also listed as BIOC 4008.

Prerequisite(s): BIOC 3101 or permission of the Biochemistry Institute.

Lecture one and a half hours per week, workshop one and a half hours per week.

COMP 4501 [0.5 credit]

Advanced Facilities for Real-Time Games

A practical course on advanced facilities of game engines. Such facilities include notions such as physics engines, shadow mapping, lighting with thousands of lights, relief mapping, ambient occlusion, water flow, deferred rendering, occlusion culling, water effects, mirrors, and screen space reflection.

Prerequisite(s): COMP 3501. Lectures three hours a week.

COMP 4601 [0.5 credit]

Intelligent Web-based Information Systems

Introduction to the principles and practice of creation, delivery and analysis of multimedia content in web-based systems. Topics include analysis of webs of documents. social network analysis, recommender systems and problems of trust, reputation and influence in e-commerce systems.

Includes: Experiential Learning Activity Prerequisite(s): COMP 2601 or COMP 2406, and one of COMP 2404. SYSC 3010. or SYSC 3110. Lecture/lab four hours a week.

Introduction to virtual communities, overlay networks and

COMP 4602 [0.5 credit]

Social Networking

social networking. Topics include architectural principles for heterogeneous social networking platforms, trust and reputation as social concepts, agent-based computing, and extraction of trends and patterns from information exchanged between community members. Includes: Experiential Learning Activity Precludes additional credit for COMP 3601. Prerequisite(s): COMP 2601, or one of COMP 2404, SYSC 3010, SYSC 3110, and COMP 2406.

COMP 4803 [0.5 credit] Computable Functions

Lectures/labs four hours per week.

Recursive functions and computability, algorithms, Church's thesis, Turing machines, computational logic, NP-completeness.

Also listed as MATH 4803.

Prerequisite(s): MATH 2100 or COMP 3805 or permission of the School.

COMP 4804 [0.5 credit]

Design and Analysis of Algorithms II

A second course on the design and analysis of algorithms. Topics include: advanced recurrence relations, algebraic complexity, advanced graph algorithms, amortized analysis, algorithms for NP-complete problems, randomized algorithms.

Prerequisite(s): COMP 3804 or permission of the School. Lectures three hours a week.

COMP 4805 [0.5 credit]

Theory of Automata

Finite automata and regular expressions, properties of regular sets, context-free grammars, pushdown automata, deterministic context-free languages. Turing machines, the Chomsky hierarchy. Undecidability, intractable problems. Also listed as MATH 4805.

Precludes additional credit for MATH 5605.

Prerequisite(s): COMP 3805 or MATH 3106 or MATH 3158 (or MATH 3100) or permission of the School.

Lectures three hours a week.

COMP 4806 [0.5 credit] Numerical Linear Algebra

Study of matrix inversion techniques; techniques of finding eigenvalues and eigenvectors, solution of systems of linear equations; direct and indirect methods, their comparison and error analysis; applications in optimization and other areas.

Also listed as MATH 4806.

Prerequisite(s): MATH 1102 or MATH 2107; and MATH 2000 and COMP 3806, or permission of the School. Lectures three hours a week.

COMP 4900 [0.5 credit]

Advanced Topics in Computer Science

Selected topics in Computer Science offered by members of the School of Computer Science.

Prerequisite(s): permission of the School of Computer Science.

Lectures three hours a week and up to three hours of tutorials a week.

COMP 4901 [0.5 credit] **Directed Studies**

Independent study under the supervision of a member of the School of Computer Science, open only to students in the B.C.S. program. Students are required to obtain their supervisor's written approval prior to registration and are limited to two such courses in their program.

Prerequisite(s): permission of the School of Computer Science.

COMP 4905 [0.5 credit]

Honours Project

Under the supervision of a faculty member, Honours students complete a major Computer Science project in fourth year. Permission to register is granted once an approved project proposal is submitted to the Department. See deadlines and details on the School web site.

Includes: Experiential Learning Activity

Precludes additional credit for COMP 4906.

Prerequisite(s): registration in the B.C.S. Honours program or one of the Combined Computer Science Honours programs and permission of the School of Computer Science.

COMP 4906 [1.0 credit]

Honours Thesis

An independent research project under the direct supervision of a faculty advisor. Permission to register is granted once an approved project proposal is submitted to the School of Computer Science. Evaluation is based on a written thesis and a poster presentation. Includes: Experiential Learning Activity Precludes additional credit for COMP 4905. Prerequisite(s): fourth-year standing in a B.C.S. Honours program with a minimum CGPA of 9.0 in the major and permission of the School of Computer Science.

COMP 4910 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 3911 and registration in internship option.

COMP 4911 [0.5 credit]

Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S. Includes: Experiential Learning Activity Prerequisite(s): COMP 4910 and registration in internship

option.
