Data Science (Collaborative Program)

This section presents the requirements for programs in:

- · M.Sc. Biology with Specialization in Data Science
- M.A.Sc. Biomedical Engineering with Specialization in Data Science
- M.Eng. Biomedical Engineering with Specialization in Data Science
- Master of Cognitive Science with Specialization in Data Science
- M.A. Communication with Specialization in Data Science
- M.C.S. Computer Science with Specialization in Data Science
- · M.A. Economics with Specialization in Data Science
- M.A.Sc. Electrical and Computer Engineering with Specialization in Data Science
- M.Eng. Electrical and Computer Engineering with Specialization in Data Science
- M.A. Geography with Specialization in Data Science
- M.Sc. Geography with Specialization in Data Science
- M.Sc. Health Sciences with Specialization in Data Science
- M.A. History with Specialization in Data Science
- M.A. International Affairs with Specialization in Data Science
- Master of Information Technology: Digital Media with Specialization in Data Science
- M.Sc. Physics Medical Physics Stream with Specialization in Data Science
- M.Sc. Physics Particle Physics Stream with Specialization in Data Science
- · M.A. Psychology with Specialization in Data Science
- Master of Public Policy and Administration with Specialization in Data Science

Program Requirements

Students enrolled in the Collaborative Program in Data Science must meet the requirements of their respective home units as well as those of the Collaborative Program. The requirements of the Collaborative Program do not, however, add to the number of credits students are required to accumulate by their home unit and the credit value of the degree remains the same. Consult the individual programs for detailed program requirements.

M.Sc. Biology

with Specialization in Data Science (5.0 credits)

Requirements:

Notes:

- The course must include at least one major assignment with a significant data science component. The selected course must be approved by the School and Institute for Data Science. An accepted data science specialization course from outside the School can be used for this requirement with approval.
- 2. All students must complete the 0.5 credit economics course for their designated field, or an approved alternate economics course. For students in the IEP field both INAF 5308 and INAF 5309, or approved equivalent, must be completed.
- 3. For elective courses, 1.5 credits of the total required 5.0 credits may be selected from courses offered in other departments, with a maximum of 1.0 credit from a single department and a maximum of 1.0 credit

selected from fourth year undergraduate courses. Any course not identified as an INAF 5000-level course must be approved by the M.A. Program Supervisor.

4. Students must successfully complete an examination in second language proficiency administered by Carleton University's School of Linguistics and Language Studies, or meet the equivalent standard as determined by the School of Linguistics and Language Studies. Details of the language requirement are provided on the School website.

Admission

Students who are enrolled in a master's program in one of the participating units may apply to the Data Science governance committee for admission to the Collaborative Program. Admission to the program is determined by the governance committee and will normally take place before the end of October the year of admittance in one of the participating master's programs.

Admission requirements to the Collaborative Master's with Specialization in Data Science are:

- Registration in the master's program of one of the participating units
- · Approval of a student's program of study by the Data Science governance committee and the student's home department. Students in a thesis program will be expected to choose a thesis topic that is directly related to Data Science. Students in an approved course work program will be required to take some elective courses in designated or approved courses with significant Data Science content.
