Comprehensive examination Part 1 examines the depth and breadth of knowledge in the student's own research area and is normally completed in the third term of registration.

Comprehensive examination Part 2 involves the submission of a research proposal that is both novel and of a sound scientific basis that may be loosely related to the thesis research of the student but not a topic that the student has investigated in any manner. The research proposal will be submitted to a committee for oral defense and is normally completed in the ninth term of registration.

Failure to pass either part of the comprehensive examination will result in deregistration from the graduate program.

Students are required to participate in Thesis Advisory Committee (TAC) meetings in terms 2, 5, 8, and 11. If students are unable to defend their dissertation by term 12, further TAC meetings with a plan for completion must occur in term 14 and, if required term 17. All program requirements must be completed within 18 terms (6 years).
