# Geography

This section presents the requirements for programs in:

- M.A. Geography
- M.A. Geography with Collaborative Specialization in Accessibility
- M.A. Geography with Collaborative Specialization in African Studies
- M.A. Geography with Collaborative Specialization in Climate Change
- M.Sc. Geography with Collaborative Specialization in Climate Change
- M.A. Geography with Collaborative Specialization in Data Science
- M.A. Geography with Collaborative Specialization in Latin American and Caribbean Studies
- M.Sc. Geography
- M.Sc. Geography with Collaborative Specialization in Data Science
- Ph.D. Geography
- Ph.D. Geography with Collaborative Specialization in Political Economy

# **Program Requirements**

# M.A. Geography (5.0 credits)

#### Requirements:

| N  | equirements.     |                                                             |     |
|----|------------------|-------------------------------------------------------------|-----|
| 1. | 0.5 credit in:   |                                                             | 0.5 |
|    | GEOG 5000 [0.5]  | Approaches to Geographical Inquiry                          |     |
| 2. | 2.5 credits in:  |                                                             | 2.5 |
|    | GEOG 5909 [2.5]  | M.A. Thesis (which must be defended at an oral examination) |     |
| 3. | 0.5 credit in:   |                                                             | 0.5 |
|    | GEOG 5905 [0.5]  | Masters Research Workshop                                   |     |
| 4. | 1.0 credit from: |                                                             | 1.0 |

# **Comprehensive Examination**

Each doctoral candidate is required to write one comprehensive examination: GEOG 6906 or GEOG 6907, according to the chosen field of specialization

The comprehensive examination must be completed after course requirements for the Ph.D. have been completed. The examination will occur no later than the fourth term of registration in the Ph.D. program. Failure to complete the examination successfully will result in denial of permission to continue in the program.

#### **Thesis Proposal**

**Total Credits** 

Candidates normally register in the thesis on entry to the program and work actively to define their research topic during the first term of registration. The thesis proposal is normally presented after comprehensive requirements have been fulfilled. Candidates submit and defend the thesis proposal at an oral examination no later than the end of the 5th term of registration in the Ph.D. program. Continuous registration is required after initial registration in the thesis.

# Residence Requirements

All Ph.D. candidates must be registered full time in a minimum of six terms to satisfy the residence requirement.

#### Regulations

See the General Regulations section of this Calendar.

# **Admission Requirements**

The requirement for admission into the master's program is a B.A.(Honours) or B.Sc. (Honours) in Geography or a related discipline, with at least B+ standing.

In exceptional cases, pertinent work experience may be considered in support of an application to the Department. Students entering the program from other disciplines or with academic deficiencies may be required to take additional courses.

#### **Accelerated Pathway**

The accelerated pathway in the M.A. Geography program is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.A. or BSc. Honours degree in Geography, Geomatics, Environmental Studies or related discipline with demonstrated academic excellence and aptitude for research may qualify for this option.

Students in their third-year of study should consult with both their Undergraduate Program Coordinator and the Department of Geography & Environmental Studies Graduate Program Supervisor to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

# **Accelerated Pathway Requirements**

- 1. At least 0.5 credit in GEOG courses (5000 level) with a grade of B+ or higher excluding GEOG 5000, 5001 and 5905.
- 2. Minimum overall CGPA of A-.

2.0

Students may receive advanced standing with transfer of credit of up to 1.0 credit which can reduce their time to completion.

# Admission Requirements

The normal requirement for admission into the M.Sc. program in Geography is a B.Sc. (Honours) or B.A. (Honours) in Physical Geography or a related discipline, with at least B+ standing.

Students entering the program from other disciplines or with academic deficiencies may be required to take additional courses.

The intended research area must be eligible for NSERC support.

Applicants for admission must provide an outline of their proposed project, which must be suitable for the M.Sc. program.

#### Accelerated Pathway

The accelerated pathway in the M.Sc. Geography program is a flexible and individualized plan of graduate study. Students in their final year of a Carleton B.A. or BSc. Honours degree in Geography, Geomatics, Environmental Studies or related discipline with demonstrated academic excellence and aptitude for research may qualify for this option.

Students in their third-year of study should consult with both their Undergraduate Program Coordinator and the Department of Geography & Environmental Studies Graduate Program Supervisor to determine if the accelerated pathway is appropriate for them and to confirm their selection of courses for their final year of undergraduate studies.

#### **Accelerated Pathway Requirements**

- At least 0.5 credit in GEOG courses (5000 level) with a grade of B+ or higher excluding GEOG 5000, GEOG 5001 and GEOG 5905.
- 2. Minimal overall CGPA of A-.

Students may receive advanced standing with transfer of credit of up to 1.0 credit, which can reduce their time to completion.

#### Admission

The normal requirement for admission to the Ph.D. program is a master's degree (or the equivalent) in geography, with at least an A- average.

A student already registered in the M.A. or M.Sc. program who shows outstanding academic performance and research promise may be permitted to transfer to the Ph.D. program with a recommendation by the Departmental graduate committee.

Applicants whose academic preparation has deficiencies in certain areas may be admitted to the Ph.D. program with the requirement that they complete additional course work.

Admission to the Ph.D. program is granted on a full-time basis in September for the fall term.

# Geography (GEOG) Courses

#### **GEOG 5000 [0.5 credit]**

# **Approaches to Geographical Inquiry**

A review of the major philosophical perspectives shaping research and explanation by geographers. Particular attention is paid to interpretations of social structure and human action, the nature of the biophysical universe, and the interaction between human beings and their environments.

Includes: Experiential Learning Activity

# GEOG 5001 [0.5 credit] Modeling Environmental Systems

Methods and problems of research on the physical environment, with illustrative material taken from the atmospheric and surface earth sciences. Topics include: the identification and behaviour of environmental systems, temporal and spatial scale, experimental method under field conditions, and simulation and model development. Includes: Experiential Learning Activity

# **GEOG 5002 [0.5 credit]**

#### **Quantitative Analysis for Geographical Research**

Quantitative techniques and methods for research on the natural and cultural environment. Topics include sampling, experimental design, replication, variance, correlation, time series analysis, statistical uncertainty, simulation, calibration, validation.

Includes: Experiential Learning Activity

#### GEOG 5003 [0.5 credit]

# **Critical Approaches to Qualitative Inquiry**

Development of critical skills in qualitative research by considering the relationship between theory and method. Engaged scholarship and participatory, community-based, action research. Practical experience with select methods including: interviews, personal narratives, focus groups, participant observation, archival research, discourse analysis, and visual methodologies.

Includes: Experiential Learning Activity

#### **GEOG 5005 [0.5 credit]**

# **Global Environmental Change: Human Implications**

Global environmental change: its significance for societies, economies and international relations. Value systems underlying environmental discourse; political economy of the environment; sustainability and security. Environmental diplomacy and grassroots environmentalism. Regionalized impacts of pressures on natural environments; challenges of adaptation.

Includes: Experiential Learning Activity Also listed as INAF 5701.

# **GEOG 5006 [0.5 credit]**

# **Special Topics in Geography of the Environment**

Research seminar on a selected theme within geographical approaches to environmental analysis. Topics will vary from year to year. Consult departmental web site for current details.

Includes: Experiential Learning Activity

#### **GEOG 5103 [0.5 credit]**

#### **Hydrologic Principles and Methods**

Advanced physical hydrology with emphasis on atmospheric moisture, precipitation, evaporation, infiltration, soil water physics, snow hydrology and runoff generation. Analytical approaches and methods to solve practical hydrological problems.

Includes: Experiential Learning Activity

# GEOG 5104 [0.5 credit] Advanced Biogeography

Current methods and theories in paleoecology are examined: dendrochronology, paleolimnology and other techniques for examining past climates and environmental condition. Numerical approaches to climate change studies.

Includes: Experiential Learning Activity

# GEOG 5107 [0.5 credit]

# Field Study and Methodological Research

Field acquisition and analysis of geographic material; supervised field observations and methodology. (Individual or group basis, by special arrangement.).

Includes: Experiential Learning Activity

#### GEOG 5201 [0.5 credit]

# **Special Topics in the Geography of Development**

Research seminar within geographical approaches to development focusing on a selected theme or region. Topics vary from year to year. Consult departmental web site for current details.

Includes: Experiential Learning Activity

# **GEOG 5303 [0.5 credit]**

# Geocryology

Development of ground ice in permafrost regions of Canada; ice segregation and pore-water expulsion during ground freezing; analytical and numerical approaches to modeling permafrost conditions.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 4108 or permission of the

Department.

# **GEOG 5307 [0.5 credit]**

#### Soil Resources

Physical, mineralogical, chemical, and other properties of soils will be studied in agricultural, environmental, geomorphological and/or geotechnical contexts, as relevant to the students enrolled.

Includes: Experiential Learning Activity

# GEOG 5400 [0.5 credit] Territory and Territoriality

Contemporary geographical and international relations theorizing is challenging notions of boundaries and territories in the political organization of modernity. Using contemporary writings on geopolitics, security, sovereignty, self-determination and identity politics this course investigates territoriality as a political and intellectual strategy.

Includes: Experiential Learning Activity Also listed as INAF 5402.

# GEOG 5406 [0.5 credit]

#### **Special Topics in Cultural Geography**

Research seminar on a selected theme within cultural (including historical) geography. Topic varies from year to year. Consult departmental web site for current details. Includes: Experiential Learning Activity

# **GEOG 5500 [0.5 credit]**

# Special Topics in the Study of Cities and Urbanization

Research seminar on a selected theme within geographical approaches to the study of cities and urbanization. Topics will vary from year to year. Consult departmental website for current details. Includes: Experiential Learning Activity

#### **GEOG 5502 [0.5 credit]**

# Special Topics in Geography of Globalization

Research seminar on a selected theme within geographical aspects of globalization. Topic varies from year to year. Consult departmental web site for current details

Includes: Experiential Learning Activity

# GEOG 5600 [0.5 credit] Empire and Colonialism

Theoretical approaches to empire and colonialism: postcolonial, feminist, Indigenous, anti-racist, queer, decolonizing, and political-economic approaches. Consideration of a range of sites of imperial and colonial formation, including land, territory, nature, the body, sexuality, gender, and race, as well as forms of resistance, resurgence, and decolonization.

Includes: Experiential Learning Activity

#### GEOG 5701 [0.5 credit]

# **Topics in Northern Human Geography**

Political, social, economic, cultural, and environmental geographies of the Canadian North and/or circumpolar North. Topics may include climate change, resource development, politics and governance, knowledge and expertise, geopolitics, sovereignty, colonialism, Indigenous knowledge, Indigenous self-determination, conservation and wildlife, environmental politics.

Includes: Experiential Learning Activity

# GEOG 5803 [0.5 credit] Seminar in Geomatics

Current research issues in geomatics, including remote sensing, geographic information systems, geographic positioning, and cartography. Topics will focus on combined interests of enrolled students and departmental faculty.

Includes: Experiential Learning Activity
Prerequisite(s): prior experience with GIS, GPS, remote
sensing or cartography and permission of the department.

# GEOG 5804 [0.5 credit] Geographic Information Systems

GIS for students with no previous experience. Includes data formats and structures, input/output and analysis capabilities, and GIS applications.

Includes: Experiential Learning Activity

# GEOG 5900 [0.5 credit] Graduate Tutorial

Tutorial, directed reading or research, offered on an individual basis, to meet specific program needs; may be taken in one of the areas of specialization of the Department.

Includes: Experiential Learning Activity

# **GEOG 5905 [0.5 credit]**

# **Masters Research Workshop**

A workshop which focuses on the challenges of research design in the various sub-fields of geography. The workshop will culminate with the development and defence of a thesis research proposal.

Includes: Experiential Learning Activity

#### **GEOG 5906 [3.0 credits]**

# M.Sc. Thesis

Thesis supervision will be given in Physical Geography, as listed in the introductory section of this department's program description.

Includes: Experiential Learning Activity

#### **GEOG 5909 [2.5 credits]**

#### M.A. Thesis

Thesis supervision will be given in all areas of specialization of the Department, as listed in the introductory section of this department's program description.

Includes: Experiential Learning Activity

#### **GEOG 6000 [0.5 credit]**

# Doctoral Core Seminar: Geography, Society and the Environment

Examination of the production and use of geographical knowledge, including underlying philosophies, key theoretical concepts, and methodological approaches. Discussion and integrative approaches to understanding the geographies of environmental and social change. Provides an opportunity for students to locate their research interests within broader intellectual contexts. Includes: Experiential Learning Activity

# **GEOG 6001 [0.5 credit]**

# **Doctoral Core Seminar: Research and Professional Practice**

Geographical research situated within broader disciplinary and institutional context. Exploration of various aspects of professional practice (academic and non-academic careers, pedagogical style, etc.). Research impact, knowledge mobilization, engaged scholarship. Early thesis proposal development.

Includes: Experiential Learning Activity

#### **GEOG 6003 [0.5 credit]**

# Field Seminar: Geography of Societal Change

Analysis of current geographical and related research into the three themes of global political economy: restructuring and the environment; geographies of socio-cultural evaluation; and feminist geographies.

Includes: Experiential Learning Activity

#### **GEOG 6004 [0.5 credit]**

# Field Seminar: Geography of Societal Change

Analysis of current geographical and related research into the three themes of global political economy: restructuring and the environment; geographies of socio-cultural evaluation; and feminist geographies.

Includes: Experiential Learning Activity

# **GEOG 6006 [0.5 credit]**

# Field Seminar: Geography of Environmental Change

Analysis of geographical and related research into the appraisal and societal management of environmental resources, and environmental processes and anthropogenic impacts.

Includes: Experiential Learning Activity

# **GEOG 6007 [0.5 credit]**

#### Field Seminar: Geography of Environmental Change

Analysis of geographical and related research into the appraisal and societal management of environmental resources, and environmental processes and anthropogenic impacts.

Includes: Experiential Learning Activity

#### GEOG 6906 [0.0 credit]

# Comprehensive Examination: The Geography of Societal Change

This examination focuses on research challenges in theory and methodology in the themes of global political economy: restructuring and the environment; geographies of socio-cultural evaluation; feminist geographies. A specific theme will be identified for each candidate. Includes: Experiential Learning Activity

# GEOG 6907 [0.0 credit]

# Comprehensive Examination: The Geography of Environmental Change

This examination focuses on research challenges in theory and methodology associated with the appraisal and societal management of environmental resources, and environmental processes and anthropogenic impacts. A specific theme will be identified for each candidate. Includes: Experiential Learning Activity

# GEOG 6909 [0.0 credit] Ph.D. Thesis

Includes: Experiential Learning Activity
