

# Engineering Complementary Courses (ECMP)

---

## Engineering Complementary Courses (ECMP) Courses

### ECMP 5000 [0.5 credit]

#### Engineering Communications

Designed to advance the student's ability to communicate technical ideas and conclusions effectively to peers and stakeholders. The course is divided into three sections involving the principles and practice of written, verbal, and graphical communication modes.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

### ECMP 5001 [0.5 credit]

#### Project Management

Introduction to project management tools, techniques, templates, and methodologies. This course examines the eight knowledge areas of the Project Management Institute (PMI) which provide an integrated approach to managing engineering projects.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

### ECMP 5002 [0.5 credit]

#### Research Methods and Professional and Ethical Practice

The technical and professional duties / responsibilities of engineers; the ethics of the engineering profession; technical and professional organizations. Engineers role in society, including elements of equity, sustainable development, environmental stewardship, public and worker safety and health considerations. Introduction to methods of engineering research.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

### ECMP 5003 [0.5 credit]

#### Entrepreneurship

Introduction to the conceptual and practical considerations in developing new products. The theory and practice of project management, innovation and entrepreneurship, business planning, marketing, and mobilizing human and financial resources applied to the creation of new business activities and ventures will be discussed.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

### ECMP 5004 [0.5 credit]

#### Engineering Economics

The application of engineering economics, financial analysis and market assessment to engineering alternatives in the planning, development and ongoing management of industrial enterprises.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

### ECMP 5005 [0.5 credit]

#### Data Analytics

Introduction to data analytics, including visualization and knowledge discovery in massive datasets; unsupervised learning: clustering algorithms; dimension reduction; supervised learning: pattern recognition, smoothing techniques, classification. Computer software will be used.

Prerequisite(s): enrolment in the M.Eng. - Engineering Practice program.

### ECMP 5006 [0.5 credit]

#### Governance, Policy Development and Decision-making

Provide a foundational knowledge level of key governance structures and political institutions at the Canadian federal, provincial, and municipal levels, as well as Indigenous structures. Scholarship on policy development, strategic thinking and decision making is introduced, along with the role of information.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

### ECMP 5007 [0.5 credit]

#### Climate Change and Sustainability

The complex and multifaceted elements of climate change and sustainable living are introduced in terms of the humanities, sciences, engineering, business and public policy perspectives, as well as root causes and potential adaptive responses.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

### ECMP 5008 [0.5 credit]

#### Risk Analysis

The challenge of living and operating responsibly within a finite level of risk is a ubiquitous aspect of engineered systems. A framework for the identification and evaluation of risk is provided through examples, and discussions include means to manage ongoing risk.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.

**ECMP 5009 [0.0 credit]****Research Seminar**

A series of invited lectures to present the motivation, methodologies, results, and societal implications of ongoing engineering research projects occurring within the Faculty. Graded SAT/UNS.

Prerequisite(s): enrolment in the M.Eng.- Engineering Practice program.
