2021-22 Undergraduate Calendar

Carleton University Calendar
Welcome to the online version of Carleton University's Graduate and Undergraduate Calendar. Every effort has been made to ensure the accuracy of this Calendar. From time to time, errata and post-publication updates approved by Senate after initial publication of the Calendar are posted. Notifications of additions and corrections will be posted at the Updates page. The Web edition of the Carleton University Undergraduate Calendar is the University's official statement. This Calendar is published several months in advance of the beginning of the academic year. The university reserves the right without liability or penalty, and without notice, to make changes in the services and programs that it offers, including alteration of the fee schedules, and cancellation of particular courses. Read full disclaimer here.
This schedule contains the dates prescribed by the University Senate for academic activities. Dates relating to fee payment, cancellation of course selections, late charges, and other fees or charges will be published in the Important Dates and Deadlines section of the Registration Website (carleton.ca/registration).

The academic year is divided into three terms:

- **Summer term**: May - August
- **Fall term**: September - December
- **Winter term**: January - April

Courses are offered in the following patterns:

- **Early summer**: May - June
- **Late summer**: July - August
- **Full summer**: May - August

- **Fall term**: September - December
- **Winter term**: January - April
- **Fall/winter**: September - April

Courses are offered during the day and in the evening.
### The Academic Year (Graduate and Undergraduate Studies)

10.2 Offenses of Conduct: Discrimination and Harassment
10.2.1 Carleton University's Human Rights Policy
10.2.2 Unacceptable Conduct
10.2.3 Enforcement
10.2.4 Formal Procedures

Student Responsibility
1.1 STUDENT RESPONSIBILITY
It is the student's responsibility to remain informed of all University rules and regulations as well as those pertaining to their program. Ignorance of the rules and regulations will not be accepted as grounds for waiving them.

Acceptance by the University of a registration does not exempt the student from any academic regulation or requirement.

The Senate of Carleton University may at any time require a student to withdraw from the University if his or her conduct, attendance, work, or progress is deemed unsatisfactory.

Further information:
• Carleton University disclaimer statement
• Academic Integrity Policy

1.2 The Comprehensive Regulations
1.2.1 The Senate of Carleton University may at any time require a student to withdraw from the University if the student's conduct, attendance, work or progress is deemed unsatisfactory.
1.2.2 Registration in courses does not exempt the student from any academic or University regulation.
Registration, Evaluation and Student Records

2.1 Registration

2.1.1 Permission to Register

To be eligible to register for an academic term, students must meet the following requirements:

1. Students new to Carleton must be formally admitted to a program OR Special student studies;
2. Returning students must be academically eligible to continue in their programs;
3. There must be no outstanding fees on the student account with the University;
4. The student must not have been suspended from the University for disciplinary reasons;
5. International students must be enrolled in or have received permission for exemption from the University Health Insurance Plan (UHIP).

Registration information for the fall and winter terms is emailed to newly admitted and returning students by May 1 (carleton.carleton.ca/registration). Information regarding summer term is available from the Registrar’s Office by February 1 (carleton.ca/summer).

2.1.2 Full- and Part-time Study

When responding to a legitimate request from an external agency that has not supplied its own definition, the following definitions are used:

1. A full-time undergraduate student is one who is registered in at least 1.5 credits per academic term.
2. A full course load is the normal maximum course load as defined by the student's program and is evaluated term by term.

2.1.3 Course Selection and Registration

Course selection must be completed according to the requirements of the faculty or school and major department(s) in which the student is registering. Students should seek the advice of their program advisor, academic unit, or the Academic Advising Centre.

Students planning to undertake professional training beyond their undergraduate studies should ensure that their undergraduate programs meet the requirements for admission to, or registration in, their intended postgraduate program.

Students are not permitted to register in course timetable conflicts.

All course selection and course change activity within the published deadlines (adds, drops, change of section) is completed using Carleton Central at central.carleton.ca. These activities are limited by deadlines set out in the Academic Year section of this Calendar. It is the student’s responsibility to understand and meet these deadlines.

2.1.4 Course Load

In most undergraduate programs, the normal course load is the equivalent of 2.5 credits in each of the fall and winter terms and the equivalent of 1.0 credit in each of the early and late periods of the summer term. In some programs, higher course loads may apply. Full-session courses are considered to have their credit weight evenly distributed over the terms. For example, a two-term 1.0 credit course is considered to contribute 0.5 credit to course load in each term.

A student is registered in a course overload if the student is registered in more credit equivalents per term than the normal load for their program. Students with an Overall CGPA of 7.00 who have completed a minimum of 4.0 credits at Carleton may choose to register in a course overload, to a maximum of 0.5 credit above the normal course load for their program in each of the fall and winter terms and in either the early or late period of the summer term. Students requiring permission for course overloads should contact the Registrar’s Office.

2.1.5 Payment of Fees

A student is responsible for all tuition and other fees resulting from registration in any and all courses. The student remains responsible for paying this debt whether or not the student attends or participates in the class or classes unless they withdraw within the published deadline set out in the Academic Year section of this calendar. Student Accounts may be viewed through Carleton Central and are the administrative responsibility of the Business Office.

For fee payment policies and deadlines, please visit the Student Accounts website.

2.1.6 Withdrawal

Students are responsible for formally withdrawing from a course or courses within the published deadlines. Ceasing to attend or participate in classes, or informing an instructor of intent to withdraw, does not constitute withdrawal. Withdrawal is completed by using Carleton Central at central.carleton.ca. The official date of withdrawal from the course(s) is the date on which the student successfully completes the necessary withdrawal action.

Students must withdraw from a course or courses on or before the appropriate last date for withdrawal as indicated in the Academic Year section of this Calendar. Withdrawal is not permitted after the published deadlines (noted in the Academic Year section of the Calendar each term). Students who withdraw after the full fee adjustment date in each term and by the academic withdrawal deadline will receive the grading notation of WDN on their transcript for the course(s) from which they withdraw. Please consult section 5.4 Grading System of this Calendar for more information.

Withdrawal activity may affect academic standing as prescribed by regulations governing the program, as well as status with the University (full-time or part-time). Consult the Registrar’s Office for information and guidance. A student who withdraws from a course retains no academic credit for any part of that course. Withdrawing from a course may have serious consequences for scholarships, OSAP and other student
financial support programs. Students are advised to consult the Awards Office for guidance.

Fee adjustments for students who are withdrawing from a course, or courses, will be calculated as of the date of successful completion of withdrawal via Carleton Central.

2.1.7 Deregistration
After due process, the University may deregister a student under the following circumstances:

1. if it is determined that the student does not meet all of the requirements for permission to register as set out in 2.1.1 above;
2. if it is determined that an applicant for admission has, in the process, provided false or incomplete information;
3. if the student does not have - or, when requested, present proof of - the course prerequisite(s);
4. if the student is registered in a course timetable conflict;
5. if it is determined that the student has not met the additional admission requirements, including satisfying the English language proficiency requirements of the University;
6. if it is determined that the student has not met the requirements of a conditional offer of admission;
7. if the student is not properly registered in the two terms of a full-session course.

2.1.8 Auditing Student
An auditing student is defined as a student who attends a course for interest and not for credit. Auditing students may typically only enrol in lecture or seminar courses. Formal registration is required but the student does not receive academic credit for the course. Permission to audit a course is required from the instructor and students may be required to satisfy all registration requirements. Permission will also be subject to capacity, and generally will not be provided until after courses commence. The student may attend classes but will not receive formal evaluation and/or grading on any submitted material. The student should discuss with the instructor the conditions and expectations under which an auditing student may be permitted to participate, including attendance and participation in class discussion and group work, and the submission of any material.

A request to change course registration from audit to credit status, or credit to audit, must be received by the Registrar’s Office no later than the last day to add a course (of that duration) in the term. Students must satisfy all registration requirements to register in the course for academic credit. Students may not retroactively appeal to change the registration status from audit to credit, but may subsequently re-register in the course for credit. Graduate students are limited to a maximum of 1.0 course-weight audit registration per program.

2.1.9 Credit for Closely-related Courses
The University recognizes three distinct close relationships between courses.

Courses *preclude* credit for each other if they contain sufficient content in common that credit may not be earned for more than one of the courses. Should two or more courses be taken that preclude each other, only the most recent attempt will be available for program credit; the remaining earlier attempt(s) will be forfeited. Courses that preclude each other are not necessarily considered equivalent and may or may not be interchangeable in fulfilling degree requirements.

Courses are *equivalent* if the appropriate academic unit(s) consider the content of the courses to be sufficiently similar that either course may be used to fulfill a program requirement. Courses designated as equivalent to each other cannot both count for credit: credit is retained only for the most recent attempt. Examples of equivalent courses arise frequently in advanced standing and when new curriculum is introduced.

Two courses are *cross-listed* if they are the same course listed under two different subject codes, usually by two different academic units.

In all cases, credit will be given for only one of the courses in any equivalent, precluded or cross-listed pair. Students planning to enrol in such courses are advised to consult with their academic advisor in advance of registration to ensure that the course number under which they will be enrolling is appropriate to their program. Changes to resolve incorrect course selection due to equivalence, preclusion or cross-listing may not be made after the last day for course changes in the term (see the Academic Year section of this Calendar).

2.1.10 Two-term Courses
Certain courses may be taught over two academic terms. Students are registered in the same section of the course, and any linked components, in both terms. Changes cannot be made after the last day for course changes. These courses will be clearly identified in the registration information. The most common example is a 1.0-credit course taught over the fall and winter terms.

In place of a grade, the first term course will be assigned the notation CTN. The second term course will be assigned the final grade for the entire course. Credit will be given only for the complete course taught over two consecutive terms in corresponding sections. No partial credit will be given for part of the course.

2.1.11 Challenge for Credit

*Challenge for credit* is a Carleton University policy that enables students to gain undergraduate academic credit for their own learning and experience through work and related professional experience. It is not intended to overlap in scope with transfer of credits or admission with advanced standing.

This policy gives the student the opportunity to be examined on, and receive credit for, a recognized Carleton course without meeting the normal requirements of registration, attendance, and instruction. Students wishing to challenge for credit should inquire at the Registrar’s Office and provide documentation to support the challenge. If the academic department is satisfied that the
student has adequate experience and learning related to the course in question, it sets an appropriate examination. If the student is successful in the examination, the course is credited to his or her academic record.

Not all courses offered at the university are open to challenge for credit. Students must register in the course with the status of challenge and fees apply. Students seeking more information should contact the Registrar’s Office.

Challenge for credit is available only to students formally admitted to and registered in a program leading to a degree, diploma or certificate. Special students are not eligible to apply for challenge for credit. Students may challenge for credit in a course only if they are in good standing academically. A student may not challenge for credit more than once in the same course. Students who challenge for credit are not permitted access to the course materials available to registered students.

A successful challenge for credit is denoted on the student’s record by the notation CH. An unsuccessful challenge attempt is denoted by UCH. These notations have no impact on the CGPA calculation. Credits obtained by challenge may not be used to satisfy the residency requirement for the student’s degree program or major discipline (see Section 2.2.2 or 3.4.1).

2.2 Credit Requirements and Limitations

2.2.1 Maximum Credits Below the 2000 Level

A student may count a maximum of 7.0 credits below the 2000 level toward fulfilment of graduation requirements.

Credits in excess of this limit will be set aside as Extra to the Degree (ETD), No Credit for the Degree (NCD) or Forfeit. This allows students to increase their CGPA by pushing out low grades below the 2000 level through replacement by higher grades at the same level.

2.2.2/3.4.1 Minimum Number of Residency Credits

To be eligible for graduation with a Carleton degree, certificate or diploma, each student must present a certain number of credits earned at Carleton University which have not been presented to fulfil any degree that has been previously awarded, including a degree or degrees at Carleton University. These are referred to as residency credits. Courses taken under the University of Ottawa Exchange Agreement do not count as residency credits.

All degree students must present a minimum of 5.0 residency credits at graduation, with the following exceptions:

The minimum number of residency credits for students in the Dual Degree, B.Eng., B.I.D, B.I.T. and B.A.S. Design program is half of the total number of credits required for the program. The residency requirement for B.A.S. students not in Design is the standard minimum of 5.0 residency credits at graduation.

To obtain a minor, a student must present at least 2.0 residency credits counting toward that minor.

To obtain an undergraduate certificate from Carleton University, students must present residency credits including a minimum of 4.0 credits taken at Carleton. The residency for certificates taken concurrently with a Carleton degree may be satisfied with credits used also to satisfy the degree residency requirement.

To obtain a post-baccalaureate diploma from Carleton University, students must present residency credits including a minimum of 3.0 credits taken at Carleton.

2.2.3/3.4.2 Advanced Credits

The credits presented at graduation that are credits completed at Carleton after admission, credits completed at Carleton within the last ten years for which advanced standing has been granted and credits completed as part of the University of Ottawa Exchange or another formal domestic or international Exchange, must include:

1. For Honours degrees, at least 3.0 credits in the major and at the 3000 level or above;
2. For Combined Honours degrees, at least 1.5 credits in each major and at the 3000 level or above;
3. For Major degrees, at least 3.0 credits in the major and at the 2000 level or above;
4. For 15.0 credit degrees, at least 3.0 credits at the 2000-level or above and, if applicable, in the major.

2.2.4 Transfer of Credit Prior to Admission

When a student is considered for admission, credit may be granted for individual courses successfully completed at other recognized post-secondary institutions, if:

1. the individual courses are relevant to a student’s proposed program; and,
2. the appropriate academic department recommends such action.

Each application is evaluated on its own merits.

2.2.5 Transfer of Credit Subsequent to Admission

Letter of Permission

Students who have been formally admitted to a degree, certificate or diploma program may apply to take courses at other recognized post-secondary institutions on Letters of Permission and have the credits transferred to their Carleton programs. The following conditions must be met:

1. the student must have successfully completed at least 3.0 credits or have met the required program residency requirements at Carleton University;
2. the student must present the minimum CGPA requirements for graduation in their credential;
3. the student must obtain formal approval from the Registrar’s Office prior to commencing each course.

Grades for successfully completed courses taken on Letters of Permission are transferred back to Carleton University as SAT (Satisfactory) and are not included in CGPA calculations. A course taken on Letter of Permission and failed is recorded with the grade UNS (Unsatisfactory). Failures are not included in CGPA calculations. A higher level of performance may be
required in a course that would have contributed to any programmatic CGPA had the grade been transferred.

**University of Ottawa Exchange Agreement**

Degree Students may register to take courses at the University of Ottawa to be credited to their Carleton University degree. The following regulations apply:

1. Students must be registered in a degree program and must be in **Good Standing**. In the case of first-year studies, a maximum of two half-credit courses may be taken at the University of Ottawa that year.
2. Only courses to be credited as part of the current degree requirements at Carleton may be taken under the terms of the exchange.
3. The cumulative total number of credits taken at Carleton and counting towards the degree must be greater than the total number of credits taken and/or proposed to be taken at the University of Ottawa.
4. Courses taken on the Exchange Agreement shall not count as courses taken at Carleton under residency requirements.
5. Grades for courses taken on the Exchange Agreement will be reported on the Carleton transcript and will be included in the calculation of the CGPAs.
6. Approval by Carleton University does not guarantee registration at the University of Ottawa.

Students withdrawing from University of Ottawa exchange agreement courses must notify the University of Ottawa by the appropriate deadlines, or a failing grade of F may be recorded.

**International Exchange Agreements**

Undergraduate students may be eligible to take advantage of other exchange agreements with universities throughout the world. Unless otherwise specified in a specific exchange agreement or Senate-approved program regulation, the minimum academic requirement is second-year standing or higher, and a minimum overall CGPA of 7.0. For details on these exchanges, students should consult the International Student Services Office at least one year in advance of the proposed exchange. Grades for successfully completed courses taken on International Exchange will not be transferred. Successfully completed courses will be recorded as SAT (Satisfactory) and unsuccessfully completed courses will be recorded as UNS (Unsatisfactory). A higher level of performance may be required in a course that would have contributed to any programmatic CGPA had the grade been transferred. Such a course with a passing grade below the minimum required will not count towards the degree.

**Dual Degree Agreement**

Undergraduate students who have been formally admitted to a degree may be eligible to complete concurrent degrees from Carleton University and a partner institution under the Dual Degree Policy and program-specific articulation agreement provided the following regulations are met:

1. the student must be registered in a degree program and must be in **Good Standing**;
2. only courses to be credited as part of the current degree requirements at Carleton may be taken under the terms of the agreement;
3. courses taken under this agreement shall count as courses taken at Carleton under residency and advanced residency requirements (see 2.2.2/3.4.1 Minimum Number of Residency Credits and 2.2.3/3.4.2 Advanced Credits for more information);
4. grades for courses taken under this agreement will be reported on the Carleton transcript and will be included in the calculation of the CGPAs;
5. for details on the application process, students should consult with the appropriate Academic Department and the Registrar’s Office.

**2.2.6 Credit for ESL Courses**

A student in a degree program may receive credit for previously completed English as a Second Language courses from the sequence ESLA 1300, ESLA 1500, ESLA 1900, ESLA 1905, with the following restrictions:

1. for students in degrees offered by the Faculty of Arts and Social Sciences or the Faculty of Public Affairs, up to 2.0 credits will be counted toward the degree;
2. for students in degrees offered by the Sprott School of Business, credit will be allowed only for ESLA 1900 (or ESLA 1905);
3. for students in degrees offered by the Faculty of Science, credit will be allowed only for ESLA 1900 (or ESLA 1905);
4. for students in the Bachelor of Engineering degree, no credits from this sequence will be counted toward the degree;
5. for students in the Bachelor of Industrial Design degree or the Bachelor of Architectural Studies degree, credit will be allowed only for ESLA 1900 (or ESLA 1905).

**2.3 Student Records**

**2.3.1 Electronic Communication**

The University provides each student with an email address and uses this as an official channel of communication with the student. A message sent to a student's University-provided email address constitutes an official communication with the student. Students are responsible for monitoring their University email address on a regular basis for as long as they are active in the academic affairs of the University. Requests from students regarding academic or administrative issues must be sent from the student's University-provided email address.

**2.3.2 Student Record Information: Names and Addresses**

**Names**

As the University is committed to the integrity of its student records, students are required to provide their complete, legal name on applications for admission or on personal data forms required for registration. Any requests to change a name, by means of alteration, deletion, substitution or addition, must be accompanied by appropriate supporting documentation. Upon making
programs at Carleton University are also accredited reviewed cyclically under the mandate of the Ontario Assessment.

2.3.5 Use of Student Work in Program

All academic programs at Carleton University are reviewed cyclically under the mandate of the Ontario Universities Council on Quality Assurance. Several programs at Carleton University are also accredited by professional bodies and must undergo review for continuing accreditation.

Student records and student work such as portfolios, exams, assignments, and theses may be used in the review and evaluation of academic programs. Appropriate steps will be taken to ensure that information and material used in the evaluation of a program is kept confidential and that the processes comply with applicable privacy regulations. These reviews may involve bodies external to the University, for example, in complying with reviews required by the government or professional accreditation bodies.

Academic Regulations for Degree Students

3.1 Program Regulations

3.1.1 Academic Nomenclature

For a list of common definitions and terms of the University, please consult the Glossary section of this Calendar.

3.1.2 Regulations Governing a Student's Program

Curriculum and regulations are subject to change as the University updates and improves its undergraduate programs. These changes may include alterations to course offerings, program requirements, and academic regulations. In establishing transition policies that determine how these changes will impact in-program students, the University is guided by the intent that students retain the same or improved overall opportunities to succeed.

The following policies are in effect:

3.1.2.1 When a degree student is admitted to the University, the regulations and program requirements for their credential are those in effect at the time of admission. If a student changes program elements in a calendar year subsequent to the term of admission, their program will be governed by the calendar requirements in effect when the change is approved. The general academic regulations governing the student, however, will continue to be those in effect at the time of admission to the University.

3.1.2.2 If, in subsequent years, the student is readmitted to the same or another program, the academic regulations of the University and the program requirements in effect at the time of readmission will govern the student.

3.1.2.3 As curricular or regulatory changes are introduced in subsequent years, in-program students may choose to complete their studies under the new academic regulations of the University and/or new program requirements. Students who wish to change their calendar year to that which is currently in effect should contact the Registrar's Office.

3.1.2.4 Notwithstanding 3.1.2.1, when circumstances prevent continued application of regulations, program requirements or courses of a previous Calendar, appropriate replacement policies guiding students in
adapting to the new situation will be developed and communicated to students.

3.1.2.5 The online version of the Calendar is the official version. Changes approved after the publication date will be posted on the Calendar website.

3.1.3 Absence from the University
Normally, a student is considered to be present at the University in a term in which they have remained registered in a course until after the last day for withdrawal with a full fee adjustment. A student who is not present at the University is considered to be absent from the University.

Degree students who have not been present at the University for more than nine consecutive terms must apply for readmission through Admission Services.

Students who have completed the requirements for the degree and program in which they are registered will be automatically considered for graduation after three consecutive terms of absence from the University.

3.1.4 Voluntary Withdrawal from a Program
Undergraduate students who wish to voluntarily withdraw from their program, without academic penalty, may do so by contacting the Registrar’s Office prior to the deadline to withdraw from courses (see Academic Year). The notation “Voluntary Withdrawal from Program” will appear on the official transcript.

3.1.5 Student Categories
Undergraduate students are grouped in four broad categories: Degree Students, Certificate Students, Special Students, and Non-credit Students.

Within the Degree Students category, a further subdivision is defined as Degree Students Admitted with Additional Requirements. This subdivision includes:

- students admitted with conditions;
- students readmitted with conditions;
- credit ESL students.

Students admitted with Additional Requirements who fail to meet these conditions may not continue at the University for a period of one year and must then apply for re-admission if they wish to return.

The category of Certificate Students includes all students registered in the certificate and diploma programs identified in section 7 Academic Regulations for Certificate Students of this Calendar. Those registered in other non-credit professional or development certificates offered by the University are not included. A student may be simultaneously both a Degree Student and a Certificate Student.

3.1.6 Types of Programs
The undergraduate programs of the University are divided into the following categories:

Honours Programs
Honours programs require a minimum of 20.0 credits, and demand a higher academic standard than non-honours programs.

Non-Honours Programs
Non-honours programs require 15.0 or 20.0 credits. Major programs require 20.0 credits.

Engineering and Design Programs
Accredited programs offered by the Faculty of Engineering and Design are in Engineering, in Industrial Design, and in Architecture. These programs require at least 20.0 credits and assume a credit load of at least 2.5 credits per term of study. Some programs within the Faculty of Engineering and Design have time limits for completion.

All of the above programs may include additional elements.

See also Section 2.1.4 Credit Load.

3.1.7 Program Structure

Program Elements
The courses that make up a program are separated into certain standard categories that give the program its structure, allow effective assessment of the student's progress and permit the inclusion of additional notations on the transcript and diploma.

Major
In most programs certain course credits are identified as constituting the Major. The Major specifies the required course credits in one or more defined disciplines, themes, or fields that are the principal focus of a student's program. The Academic Performance Evaluation described in Section 3.2 of this Calendar makes use of this distinction by calculating a Major average as well as an Overall average. A Combined Honours program may be structured with two Majors, one in each contributing discipline or, in some cases, as a single Major. A multidisciplinary program is structured as a single Major drawing together courses from several disciplines.

Note that the use of the term Major as a program element, above, is distinct from the degree program called Major (e.g. B.Sc.Major).

Core
Some programs specify a limited set of credits that constitute a Core. These are courses of special importance to the program and are subject to specific CGPA requirements.

Concentration or Specialization
A Concentration or Specialization is a defined set of courses which provides a student with specific expertise, knowledge and/or practice and so further distinguishes the program in a recognizable way. The credits in the concentration or specialization may or may not be part of the Major. The minimum number of credits for a concentration or specialization at the undergraduate level is 3.5 credits.
Stream
A Stream is a pattern of courses within the program that guides the student's studies and is distinctive from other patterns.

Additions to a Program

Option
An Option is an addition to a program, the pursuit of which does not affect eligibility for the degree without the Option. Registration in the Option does not change the degree requirements. An example is the Co-operative Education Option.

Other additions to a program that do interact with program requirements include: Mention : français (see the Academic Regulations for the Bachelor of Arts), concurrent certificates and concurrent diplomas.

Minor
A Minor is a defined set of courses in a discipline or field that either introduces or extends knowledge of that discipline or field. A Minor may have its own admission requirements. Minors are only available to students already registered as Carleton degree students. Each Minor requires at least 4.0 and at most 5.0 credits. In some circumstances, credits in excess of those required for the main degree may be required to complete the Minor.

3.1.8 University Year Standing
Students in degree programs are given a Year Standing according to the number of credits completed with passing grades and counting towards the degree. The categories are as follows:

First Year:
Fewer than 4.0 credits completed successfully and counting towards the degree.

Second Year:
4.0 through 8.5 credits completed successfully and counting towards the degree.

Third Year:
9.0 through 13.5 credits completed successfully and counting towards the degree.

Fourth Year:
14.0 or more credits completed successfully and counting towards the degree and in a program requiring more than 15.0 credits.

Programs in the Faculty of Engineering and Design identify specific courses that must be completed for a particular year status in that program, which does not necessarily conform to the above formula. Refer to the Engineering and Design section of this Calendar for details.

Year standing assessment occurs regularly and as final grades are received.

3.1.9 Undeclared Students
Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

3.1.10 Changes of Degree and Program

Application through Registrar's Office
Application is made through Carleton Central (Change of Program Element application) for change of program applications in the following cases:

- students who wish to change to a different program within the same degree;
- students who wish to add, drop or change a Concentration, Specialization or Minor;

Not all program combinations are possible. Please consult with specific units for the options available.

Application through Co-op and Career Services
Application is made through the Co-op Office for admission to and withdrawal from the Co-op Option.

Application through Admissions Services
The following situations require students to reapply for admission through Admissions Services:

- currently registered students who wish, or who are required, to change their degree;
- students who have been suspended or debarred and wish to return to their original program after the required absence from studies at Carleton University (see Section 3.2.3 of the Academic Regulations of the University);
- students who, after completing an undergraduate degree, wish to complete an additional undergraduate degree or certificate;
- students who have left the university and wish to return to a different degree;
- students who have attended another post-secondary institution (except on a letter of permission or exchange program), and wish to transfer obtained credits to their Carleton credential;
- Special Students who wish to be formally admitted to Carleton University (see Section 15 of the General Admissions Requirements and Procedures); and
- students who have been away from the university for nine or more consecutive terms.

3.1.11 Course Categories and Courses Set Aside

3.1.11.1 Course Categories
The requirements for some programs may include specific named categories of courses. These categories are defined either in the main regulations section of the calendar or within the program description. Students
should refer to the regulations and course categories for their program for details.

3.1.11.2 Courses Set Aside
Three categories of courses that do not contribute to the fulfilment of graduation requirements may appear on a student's degree audit report:

**Extra to the Degree (ETD)**
Passed credits that could have counted towards the degree but are in excess of the credits required for graduation are *Extra to Degree*. These credits may be considered for advanced standing in a subsequent degree. This category includes, for example, passed credits at the 1000 level in excess of the 7.0-credit limit.

**No Credit for Degree (NCD)**
Passed credits that are ineligible for credit in the student's program are *No Credit for Degree*. These credits may be considered for advanced standing in a subsequent degree. This category includes, for example, courses specifically prohibited from credit in a particular degree.

**Forfeit**
Courses that cannot be used for credit in this or any subsequent program. This category includes:
1. repeated courses;
2. courses considered equivalent to courses taken later in time;
3. courses precluded for credit by courses taken later in time;
4. courses placed in this category by committee decision.

3.1.12 Maximum Number of Program Elements
In addition to the student's Major(s), the maximum allowed combined number of Minors, Concentrations and Specializations for any student is two. Note that this restriction does not apply to the Co-op Option, Mention : Français or Streams.

3.1.13 Combined Honours Programs
In some cases, combined honours programs are defined with a single unified major which incorporates the credits from both disciplines. In other cases, requirements are established separately by each discipline and combined according to the registration of the student in a particular combined honours pattern (for example, B.A. Honours). In the latter case, when a particular course satisfies the requirements for both majors, the course will be used to fulfill the requirements for one major and a different course at the same level will be required to satisfy the other major.

3.1.14 Simultaneous and Subsequent Degrees
1. A student who has graduated with a Carleton University degree in a particular program will not be subsequently admitted to the same degree and program. Specifically, students who have graduated with a:
   a. B.A., B.A.S., B.Co.M.S., B.Sc., B. Econ., B. Cog. Sc. or B.Math. degree may apply subsequently for admission to the same degree if they apply for a different major or, if they graduated with a 15.0 credit degree or Major degree, they apply for an Honours degree with the same major.
   b. B.Eng. or B.I.T. degree may apply subsequently for admission to the same degree only if they apply for a significantly different program. A program with distinct streams constitutes a single program for this rule.
   d. B.J., B.Hum. may not apply to the B.J.Hum., and B.J.Hum. may not apply to B.J. or B.Hum.
2. A student who has graduated with a Carleton University degree that includes a minor will not be subsequently admitted to the same minor.
3. A student who has successfully completed a post-secondary credential will not be admitted to the B.A. or B.Sc. in Open Studies.
4. A student who has successfully completed a university degree in a given discipline will not be admitted to a minor in the same discipline in conjunction with subsequent degree studies.
5. A student will only be admitted to one degree and program at a time. The student's record will show only one active degree and program in any given term. Note that certain Certificates and Diplomas do allow concurrent degree studies.
6. A Carleton University degree student is not allowed simultaneously to be registered in degree studies at another post-secondary institution without the permission of Carleton University.

3.1.15 Restrictions on Credit for Certain Courses
Some courses may not be used for credit in certain programs. Restrictions may be listed in the course descriptions, the academic regulations for certain degree programs, and/or in this section.

1. Co-operative Education (Co-op) work term and report courses do not count for credit in any degree.
2. In addition, B.A. students in Economics and B.Econ. students will not receive credit for MATH courses below the 1000-level.
3. Students in the B.Mus. degree will not receive credit for MUSI 1106 or MUSI 1107.
4. Students in the B.Com. or the B.I.B. degree will not receive credit for BIT 2001, BIT 2002 or any 0000-level mathematics course.
5. Students in the B.Com. degree will not receive credit for BUSI 3602 or COMP 1001.
6. Students admitted with advanced standing to the B.Com., B.I.B., B.Hum., B.P.A.P.M., B.I.T., B.G.In.S. or B.Eng. degree will not receive credit on admission for courses with a grade below C- taken earlier.
7. For courses excluded from the B.Sc., see the Academic Regulations for the Bachelor of Science Degree section of this Calendar. For courses excluded from the
3.2 Academic Progression

3.2.1 Academic Performance Evaluation for Degree Students

The Academic Performance Evaluation as described in this section applies to Degree and Certificate Students. The corresponding process for Special Students is described in Section 6.6 of this Calendar.

The Academic Performance Evaluation is the annual assessment of a student's status in their degree. The first evaluation is made, at the end of the winter term, for all students who have completed at least 4.0 credits at Carleton University or on the University of Ottawa Exchange once all final grades are available. Subsequent evaluations occur at the end of the winter term following the completion of a minimum of 4.0 additional credits. A completed course is any course registration, including repeated courses, that results in a grade or notation other than WDN, IP, CTN, AUD or DNC. The basis of the evaluation is the student’s Overall CGPA, Major CGPA and, where appropriate, Core CGPA. For students in combined programs, Major CGPAs are calculated for each major where possible. The evaluation is made by comparing CGPAs to the minima required by the student's degree at the time of the evaluation. The possible outcomes of an Academic Performance Evaluation are: Good Standing, Academic Warning, Suspension, Continue in Alternate, Continue in General, Dismissed from Program, or Debarment.

The status Good Standing signifies that a Performance Evaluation has found that the student fully meets the academic standards prescribed for the student's program and is eligible to continue in that degree.

The status Academic Warning signifies that the student's performance with respect to the academic standards of the degree is deficient. The student may continue in the degree but must clear the Academic Warning by achieving a Good Standing assessment at the next Academic Performance Evaluation.

The status Suspension signifies that the student must leave their degree for at least one year. See also Section 3.2.3. Suspension occurs if at least one of the following conditions applies:

- the student has an Overall CGPA that is less than 1.00;
- while on Academic Warning, the student has failed to achieve a Good Standing assessment at the next Academic Performance Evaluation;
- the student was Admitted with Additional Requirements and has failed to satisfy those requirements.

The status Continue in General is applied at an academic performance evaluation (APE) if the student (i) is in an Honours B.A., B.C.S., B.Cog. Sc., B.Co.M.S., B.Econ., B.G.In.S., B.H.Sc., B.Sc., or B.Math. program, (ii) would be suspended at this APE due to a low CGPA, and (iii) meets or exceeds the minimum requirements for Good Standing in a general program. The student's program will be changed to the corresponding or other general program within the same degree and the student may apply to change this program within the degree, as long as they would be in Good Standing in the subsequent program.

The statuses Continue in Alternate (CA) and Dismissed from Program (DP) indicate that the student's performance has fallen below a minimum standard for the program and, in consequence, the student is removed from the program and is not readmissible to this program. These APE statuses are restricted to some professional and limited enrolment programs where there is high demand for the program and limited space in its required courses. The degrees and programs that use these statuses are: B.Eng., B.Hum., B.J., B.J.Sc., B.Com., B.I.B., B.I.T., B.P.A.P.M. The status CA or DP is assigned if any of the conditions for Suspension apply, in addition to any conditions set by the program. The status CA is assigned if, in addition, the student's Overall CGPA is at least 1.00. A student with status CA is eligible to continue at the university and may apply through Admissions Services for admission to another degree or to Special studies. The status DP is assigned if the Overall CGPA is less than 1.00. A student with status DP may apply for admission to Special studies only.

If a student satisfies the conditions for Suspended, Dismissed from Program or Ineligible to Return (no longer in use) at a performance evaluation in the student's current degree and the student has a previous decision of Suspended, Dismissed from Program or Ineligible to Return on the record in this or another degree or Special studies, then the student will be removed from the current degree with the standing Debarred. A Debarred student is not eligible for any studies at the university for at least three years. See Section 3.2.3 - Readmission after Suspension or Debarment.

3.2.2 Three Attempts of a Course (Engineering)

A student in the Bachelor of Engineering degree may attempt a course no more than three times. An attempt shall include courses in which the student has earned a final letter grade, SAT, or UNS.

If, after three attempts, the student has not achieved in any of the three attempts the minimum grade required to continue in the program, or, if on the third attempt of a course the student does not achieve a passing grade, the student must leave the degree with the status Continue in Alternate or Dismissed from Program.

3.2.3 Readmission after Suspension or Debarment

Suspension is from a particular degree, not from the University altogether. Upon receiving notice of Suspension from one degree, students may apply immediately as Special students (non-degree students), or seek
3.2.5 Assessment in Program Elements

In conjunction with the Academic Performance Evaluation, additional averages are calculated for program elements. A CGPA is calculated over the courses contributing to any Minor, Concentration, or Specialization. Students with a CGPA that is below the minimum required for a Concentration, Specialization or Minor may be removed from that program element.

3.2.6 Minimum CGPA Requirements

The standard CGPA requirements used in the Academic Performance Evaluation are presented in Table 1. The minimum required CGPA increases with the number of program credits (see Note 1) at the time of the Academic Performance Evaluation. Students with a CGPA close to the minimum at their first assessment will have to improve their academic grades significantly in order to maintain the Good Standing status through to graduation.

The Standard Minimum CGPA Requirements for Minors, Concentrations, and Specializations are presented in Table 2. These are not used in the Academic Performance Evaluation but may be used to determine whether a student can continue in a particular minor, concentration or specialization.

Graduation Overall: 5.00, Major 6.50

Note:

1. The Program Credits are the course credits earned by the courses the student has completed, with either a passing or a failing grade, that would contribute to the credits required for graduation in the student's program had they been passed. The program credits include credits obtained through transfer, advanced standing, letters of permission or exchange. The program credits do not include courses from which the student has withdrawn.

2. Certain Honours programs may have different minimum Overall or Major CGPA requirements from those indicated above.
There are two types of circumstances that might warrant a request for an exception to published rules, regulations or deadlines. One type of petition concerns personal circumstances such as illness, unanticipated occupational commitments, or other unanticipated serious events. The second type concerns whether a rule or regulation has been properly or fairly applied to a student's record.

A student seeking accommodation with respect to an academic regulation, rule or deadline submits a petition in writing to the Registrar's Office. Unless subject to an earlier deadline, petitions must be submitted by the following deadlines:

- for petitions arising from the fall term: January 30
- for petitions arising from the winter term: June 30
- for petitions arising from the summer session: September 30

Students can obtain from the Registrar's Office the required Academic Petition form, information about the procedures to be followed, and details regarding the documentation needed to support a petition. Students seeking reconsideration of an admission decision must submit an application in writing to the Admission Services Office.

### 3.3.2 Undergraduate Appeals

An appeal is the process by which a student may challenge, in writing, the decision on a petition. Students may initiate an appeal by submitting an Academic Appeal Form to the Registrar's Office. Such appeals must be submitted within 14 days of receiving the decision on the original petition. It is the student's responsibility to ensure that the appeal submission is complete and includes all relevant matters which the committee should consider in rendering its decision. The Senate Undergraduate Studies Committee makes the final decision on an appeal.

### 3.3.3 Procedural Review

Students may request a procedural review of decisions made by the Senate Undergraduate Studies Committee. The review is initiated by a communication, in writing, to the Clerk of Senate. Procedural review is restricted to confirmation by the Clerk that (i) proper procedures have been followed as set out in the appropriate approved policy, (ii) that issues of bias have been properly addressed, and (iii) that the decision reached is within the scope of the delegated authority and is consistent with previous practice. A procedural review will not change the decision of an appeal. However, the Clerk will decide whether proper procedures have been followed and establish if any further actions are required.

### 3.3.4 Informal Appeal of Grade

There may be a number of circumstances in which students will have questions regarding their grades. These questions may be about understanding the grading scheme; about the grade awarded for a specific piece of work, including work that has not been returned; or about the determination of the final grade. Wherever possible, both during the term and after, concerns about the grading of student work should be settled informally between the student and the instructor. As a result of this informal appeal process the original grade may be raised, lowered or left unchanged.

Students have the right to have questions regarding their grades addressed and to view all material, including material that has not been returned such as final examinations. In some cases, the original submitted work will remain in the possession of the University and the
viewing of this work may be supervised. In cases where a student has concerns regarding the determination of their final grade, the student will be provided with a list of their grades on all components of the course and a description of how their final grade was calculated.

Students should initiate this process within seven working days of the day on which the official grade in question was made available. The informal appeal process should address the concern within 15 working days of the day on which the grade was made available through Carleton Central.

3.3.5 Formal Appeal of Grade
A student may submit a formal appeal of grade when the informal appeal process has not addressed their concerns. The appeal must be submitted to the Registrar's Office with required supporting documentation, normally within 20 working days of the day on which the grade was made available to the student, or the informal appeal process was completed (if applicable). The resolution of an appeal of grade is the responsibility of the Dean of the Faculty offering the course. The appeal must be specific to one or more graded components of the course and/or the calculation of the final grade.

On receiving a formal appeal from the Registrar's Office, the Faculty Dean may decide not to proceed with the appeal if, in the opinion of the Dean, reasonable grounds have not been established as a basis for the appeal. Circumstances which may result in a decision not to proceed may include, for example, cases where the Dean determines that the informal process has adequately addressed the student's concerns or where the Dean determines that a reasonable expectation of error or bias in the original grade has not been established. If the Dean decides not to proceed with the appeal, the student will be informed of the reasons for the decision.

In proceeding with an appeal, the Dean may assign reassessment of the work to one or more qualified readers other than the instructor. In this case, the identity of the reader(s) will not be made known to the appellant and the identity of the appellant will not be made known to the reader(s). After due consultation, the Dean, as chief academic officer of the Faculty, will assign the grade. The decision of the Dean is final. As a result of this formal appeal process the original grade may be raised, lowered or left unchanged. The student will be given a concise explanation of the decision.

3.4 Graduation Requirements
2.2.2/3.4.1 Minimum Number of Residency Credits
To be eligible for graduation with a Carleton degree, certificate or diploma, each student must present a certain number of credits earned at Carleton University which have not been presented to fulfill any degree that has been previously awarded, including a degree or degrees at Carleton University. These are referred to as residency credits. Courses taken under the University of Ottawa Exchange Agreement do not count as residency credits.

All degree students must present a minimum of 5.0 residency credits at graduation, with the following exceptions:

- The minimum number of residency credits for students in the Dual Degree, B.Eng., B.I.D, B.I.T. and B.A.S. Design program is half of the total number of credits required for the program. The residency requirement for B.A.S. students not in Design is the standard minimum of 5.0 residency credits at graduation.

To obtain a minor, a student must present at least 2.0 residency credits counting toward that minor.

To obtain an undergraduate certificate from Carleton University, students must present residency credits including a minimum of 4.0 credits taken at Carleton. The residency for certificates taken concurrently with a Carleton degree may be satisfied with credits used also to satisfy the degree residency requirement.

To obtain a post-baccalaureate diploma from Carleton University, students must present residency credits including a minimum of 3.0 credits taken at Carleton.

2.2.3/3.4.2 Advanced Credits
The credits presented at graduation that are credits completed at Carleton after admission, credits completed at Carleton within the last ten years for which advanced standing has been granted and credits completed as part of the University of Ottawa Exchange or another formal domestic or international Exchange, must include:

1. For Honours degrees, at least 3.0 credits in the major and at the 3000 level or above;
2. For Combined Honours degrees, at least 1.5 credits in each major and at the 3000 level or above;
3. For Major degrees, at least 3.0 credits in the major and at the 2000 level or above;
4. For 15.0 credit degrees, at least 3.0 credits at the 2000-level or above and, if applicable, in the major.

3.4.3 Graduation Requirements
In order for students to receive their credential, they must fulfill:

1. all the requirements of the department(s), school(s) or institute(s) in which they are taking the program;
2. all Faculty regulations;
3. all University regulations;
4. all financial obligations to the University.

The student is responsible for meeting graduation requirements and is strongly encouraged to discuss their program requirements with the Undergraduate Adviser for their program. The degree audit report (available on Carleton Central) is a guide to be used in consultation with the Undergraduate Advisor to discuss the student's academic progress.

3.4.4 Application for Graduation
Students must apply online for graduation via Carleton Central. Online applications must be completed by the following deadlines:
• for Spring Graduation (June): April 1
• for Fall Graduation (November): September 1
• for Winter Graduation (February): December 1
Visit carleton.ca/registrar for further information regarding graduation.

3.4.5 Automatic Graduation from the University
Students who have completed the requirements for the degree and program in which they are registered will be automatically considered for graduation after three consecutive terms of absence from the University.

Note: some programs have higher requirements.

3.4.7 Recognition of High Academic Achievement
Graduating students in any undergraduate degree will have exceptional academic achievement recognized if the student:
1. Has completed at least 10.0 credits toward the degree at Carleton University, and:
2. For the designation High Distinction, has an Overall CGPA equal to or greater than to 10.40;
3. For the designation Distinction, has an Overall CGPA less than 10.40 and equal to or greater than 9.80.
These recognitions of exceptional merit will be recorded on the student's transcript and diploma.

3.4.8 Recognition of Study Abroad
Carleton University recognizes students who successfully complete a pattern of study at a non-Canadian university comprising a significant international experience with a notation on both the student's transcript and diploma.

To qualify for a notation, the pattern of study must be either an approved pattern of study under a recognized International Exchange program, or an alternate pattern of study approved by the Dean.

The notation with Study Term Abroad will be used when the equivalent of 2.0 to 3.5 credits of courses are successfully completed, normally within one term.

The notation with Study Year Abroad will be used when the equivalent of 4.0 or more credits of courses are successfully completed, normally within one year.

Examinations

4.1 Undergraduate Examination Regulations
Students writing tests and examinations should be aware of the rules governing examination conduct. These rules include those listed in the Academic Integrity section of this Calendar and information about policy and procedures for writing examinations distributed at the final examination.

For examinations scheduled during the official examination period, it may be necessary to schedule examinations during the day for classes held in the evening and vice versa, or on Saturday and Sunday.

All tests and examinations are subject to the following rules:
1. Tests or examinations given in class may not exceed the time allotted for the class;
2. The schedule for any term tests or examinations to be held outside class time must be communicated in the course outline. Students who are unable to write during this scheduled time must be accommodated before the last day of classes.
3. If there is a final examination in the summer term, it will be held during the official examination period;
4. If there is a final examination or an end-of-term examination in a multi-term course, this examination will be held in the official examination period;
5. No summative tests or final examinations may be held during the last two weeks of fall or winter terms, or during the last week of each half of the summer term. Please note that practical exams, where the material cannot be tested during formal examination period, are exempt from this rule provided (i) students are made aware of the practical exam requirement at the start of the term via the course outline, and (ii) the examination contributes to no more than 15% of the final grade. If provision (i) above is met but the examination comprises more than 15% of the final grade, Dean approval is required prior to informing students via the course outline.
6. Formative tests or examinations may be held during the last two weeks of classes of fall or winter terms, or during the last week of each half of the summer term, provided they do not total more than 15% of the final grade. The purpose of formative tests or examinations is to provide feedback to students on a component of the course content.
7. No tests or examinations may be held between the end of classes in a term and the beginning of formally scheduled examinations;

8. Normally, final take-home examinations in any term will be assigned on or before the last day of classes and are due on the last day of the official examination period. Final take-home examinations not set according to this normal practice must be formally scheduled by Scheduling and Examination Services and are subject to overload rules. In all cases the rules for take-home examinations must be well communicated to students by course instructors.

9. Students are not required to write with an exam conflict (defined as two examinations scheduled at the same time) nor in an exam overload, defined as (i) 3 or more examinations scheduled in 3 consecutive time slots, (ii) 4 or more examinations scheduled in 5 consecutive time slots, or (iii) 5 or more examinations scheduled in 7 consecutive time slots, where a time slot refers to the morning, afternoon, or evening time slot on an exam day.

4.2 Examination Rules of Conduct
From the Carleton University Academic Integrity Policy, https://carleton.ca/senate/wp-content/uploads/Academic-Integrity-Policy1.pdf:

The University is committed to ensuring fairness and consistency in the completion of examinations. As part of this commitment, students are required to follow proper examinations procedures. A student who commits a violation of this Policy on an examination, test, or take-home examination, or obtains or produces an answer or unfair advantage, are subject to sanction under this Policy. This includes but is not limited to:

1. bringing to the examination/test room any unauthorized material;
2. writing an examination or part of it, by consulting any person or materials outside the confines of the examination room without permission to do so;
3. intentionally leaving answer papers exposed to view;
4. attempting to read other students’ examination papers;
5. speaking to another student (even if the subject matter is irrelevant to the test);
6. disrupting or delaying a test or examination;
7. failing to comply with the instruction of a University official administering an examination.

Further to the University’s Academic Integrity Policy statement, a violation of the policy may also occur by breaching one of the Policy and Procedures for Writing Examinations.

Please visit the University’s Human Rights Policy and Offenses of Conduct sections of this Calendar for more information.

4.3 Deferred Final Examinations
4.3.1 Deferred Final Examinations
Students who are unable to write a final examination because of a serious illness/emergency or other circumstances beyond their control may apply for accommodation. Normally, the accommodation for a missed final examination will be granting the student the opportunity to write a deferred examination. In specific cases when it is not possible to offer a deferred examination, and with the approval of the Dean, an alternate accommodation may be made.

The application for a deferral must:

1. be made in writing to the Registrar's Office no later than three working days after the original final examination or the due date of the take-home examination; and,
2. be fully supported by appropriate documentation and, in cases of illness, by a medical certificate dated no later than one working day after the examination, or by appropriate documents in other cases. Medical documents must specify the date of the onset of the illness, the (expected) date of recovery, and the extent to which the student was/is incapacitated during the time of the examination. The University’s preferred medical form can be found at the Registrar's Office here.

4.3.2 Missed Deferred Examinations
Students will not be given a deferral of a deferred examination.

Students granted a deferred final examination who are then unable to write the deferred final examination will receive the earned grade in the course (which may be an F).

Students granted a deferred final examination who are then unable to write the deferred final examination due to properly documented personal or medical conditions may appeal to receive one of the notations Aegrotat (AEG) or Withdrawn (WDN) for the course as assigned by the appropriate appeal committee. (Students may not petition for one of these alternate notations if they attended the deferred examination but did not complete it for personal or medical reasons unless the circumstances satisfy the requirements for Early Departure from Final Examinations in section 4.3.3 below.) NOTE: If a student would be unable to pass the course as specified in the course outline, regardless of the result of a final examination, a grade of F may still result. If a student is passing the term work and is able to pass the course as specified in the course outline, based on the results of a final examination, then a withdrawn (WDN) may be granted.

Aegrotat standing may be considered for applicants for deferred finals but will be granted only if a substantial proportion of the term work has been completed and is of high quality. AEG denotes a pass standing.

Students who have obtained approval for a deferred examination in a Carleton University Online (CUOL) course will have access to course materials after the end of the academic term of the original course.

Deferred final examinations are scheduled in the time period approved by Senate. Please refer to the Academic Schedule for deferred examination dates.
4.3.3 Early Departure from Final Examinations

Students are expected to assess their medical situation/ability to write an examination prior to entering the examination room. Students who do not write a final examination because of illness or other circumstances beyond their control may apply to write a deferred examination. Section 4.3.1 of this calendar outlines the regulations governing deferral of final examinations.

Students are expected to complete a final examination once begun. If the student experiences a significant deterioration of health while the examination is in progress, it may be possible to submit a petition to apply to write a deferred examination.

A significant deterioration during an exam is a situation whereby the student requires immediate and/or emergency medical attention. In such circumstances, a student will be required to seek appropriate documentation to confirm that the medical situation caused significant, acute symptoms during the examination that completely prohibited the student from completing the exam, describing the specific impacts on the student’s ability to continue the exam.

A student must then petition to the Registrar’s Office within three (3) business days of the examination with appropriate supporting documentation.

Minor illnesses and ongoing chronic illnesses under medical management will normally not be considered valid grounds for granting a deferred final examination.

4.4 Deferred Term Work

In some situations, students are unable to complete term work due to illness or other circumstances beyond their control, which forces them to delay submission of the work.

1. Students who claim illness, injury or other extraordinary circumstances beyond their control as a reason for missed term work are held responsible for immediately informing the instructor concerned and for making alternate arrangements with the instructor and in all cases this must occur no later than three (3) working days after the term work was due. The alternate arrangement must be made before the last day of classes in the term as published in the academic schedule. Normally, any deferred term work will be completed by the last day of term. In all cases, formative evaluations providing feedback to the student should be replaced with formative evaluations. In the event the altered due date must extend beyond the last day of classes in the term, the instructor will assign a grade of zero for the work not submitted and submit the student’s earned grade accordingly; the instructor may submit a change of grade at a later date. Term work cannot be deferred by the Registrar.

2. In cases where a student is not able to complete term work due to illness or injury for a significant period of time/or long term, the instructor and/or student may elect to consult with the Registrar's Office (undergraduate courses) or Graduate Registrar (graduate courses) to determine appropriate action.

3. If a student is concerned the instructor did not respond to the request for academic accommodation or did not provide reasonable accommodation, the student should consult with the department/school/institute chair/director. If a mutually agreeable accommodation to complete course requirements prior to the course grade submission deadline cannot be achieved, the Associate Dean will become involved. If academic accommodation is not granted, and the student receives word after the academic withdrawal deadline, the student may submit a petition to the Registrar's Office (undergraduate courses)/Graduate Registrar (graduate courses) for a final grade of WDN (Withdrawn) in the course(s). If academic accommodation is not granted, and the student receives word prior to the academic withdrawal deadline, the student may elect to withdraw from the course(s).

4. Furthermore, if academic accommodation is granted, but the student is unable to complete the accommodation according to the terms set out by the instructor as a result of further illness, injury or extraordinary circumstances beyond their control, the student may submit a petition to the Registrar's Office (undergraduate courses)/Graduate Registrar (graduate courses). Please note, however, that the course instructor will be required to submit an earned final grade and further consideration will only be reviewed according to established precedents and deadlines. (More information: Undergraduate | Graduate).

Grading

5.1 Credit

To obtain credit in a course, students must satisfy the course requirements as published in the course outline.

5.2 The Course Outline

The instructor is required to provide a formal statement to students called the Course Outline. The course outline must be made available to all Carleton students registered in that course, on or before the required date found in the schedule for The Academic Year, normally one week prior to the start of a term.

The course outline must specify:

1. Complete calendar description.
2. Proposed list of topics to be covered.
3. Mandatory Required Materials to be acquired.
4. All the elements that will contribute to the cumulative grade earned and the overall approximate grade breakdown for the course. The elements and grade breakdown may initially be approximate, but are normally confirmed no later than the last day of registration for the term. If faculty deviate from section 5.4 on the grading system, the grading system that will be used must be clearly indicated. If additional requirements beyond the cumulative grade earned must be satisfied in order to pass the course, this should be clearly identified in the course outline.
5. Due dates for major course elements should be indicated. The dates may be tentative initially, but are normally confirmed no later than the last day of registration for the term. If changes to due dates are required students should be given at least two weeks notice. Final scheduled exam dates are excluded from the information provided, and will be presented at a later date in the term.

6. TA information, as available.

7. Any required time commitments occurring outside of the formally scheduled lectures, tutorials, labs and discussion groups. Changes may be required but students should be given at least two weeks notice. These time commitments are specific to course requirements and do not imply study time or group work, for example.

8. The outline must also include/reference all University policies governing academic accommodation.

5.3 Early Feedback Guideline
Providing feedback to students on academic work, completed or in progress, is an integral part of teaching and learning in that it allows students to measure their understanding of material, the success of their learning strategies, and their progress on learning objectives. While the nature and frequency of such feedback will vary with the course and level, Carleton University is committed to providing students with appropriate and timely feedback on their work. Accordingly, wherever possible, and especially in first- and second-year courses, instructors are urged to include academic work that is assigned, evaluated and returned prior to the 25th teaching day of each term. More generally, all instructors are urged to include academic work that is assigned, evaluated and returned prior to the 40th teaching day of each term.

The spirit of this guideline should be followed during the summer term. In particular, all instructors are urged to include academic work that is assigned, evaluated, and returned at least two days prior to the last day to withdraw from the course in the Early, Late, or Full Summer term.

Course outlines should provide an indication of approximately when the first graded piece of work will be returned to students. In cases where a course does not lend itself to early feedback, this should be clearly noted on the course outline.

5.4 Grading System
Standing in a course is determined by the course instructor, subject to the approval of the faculty Dean. Standing in courses will be shown by alphabetical grades. The system of grades used, with corresponding grade points and the percentage conversion, is listed below.

Grade points are adjusted proportionately. The grade points are adjusted proportionately.

<table>
<thead>
<tr>
<th>Grade Point Equivalence</th>
<th>Percentage Conversion</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>12</td>
</tr>
<tr>

<tr>
<td>F</td>
<td>0</td>
<td>less than 50</td>
</tr>
</tbody>
</table>

In cases where the final examination is not written and was not explicitly a requirement to successfully complete the course, the cumulative grade earned on term work without the missing examination will be assigned.

If the grade conversion deviates from the percentage conversion presented above, the faculty member must notify the class in the course outline.

Other grades and notations in current use by the University are as follows:

<table>
<thead>
<tr>
<th>Notation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AEG</td>
<td>Aegrotat. Pass standing is granted under special circumstances by an academic appeal committee, in response to an application from or on behalf of a student, on the basis of course work when no further assessment is considered feasible. AEG has no impact on the CGPA calculation.</td>
</tr>
<tr>
<td>AUD</td>
<td>AUD. No Academic Credit, no impact on CGPA. Audit indicates the course was taken for interest and not for academic credit.</td>
</tr>
<tr>
<td>CH</td>
<td>Credit granted under challenge for credit policy. CH has no impact on the CGPA calculation.</td>
</tr>
<tr>
<td>CTN</td>
<td>Continuing. No academic credit and no impact on the CGPA. Assigned by the Registrar’s Office to indicate the student is currently registered in the course.</td>
</tr>
<tr>
<td>CUO</td>
<td>Current University of Ottawa Exchange. An interim notation.</td>
</tr>
<tr>
<td>CUR</td>
<td>Current registration. An interim notation assigned by the Registrar’s Office to indicate the student is currently registered in the course.</td>
</tr>
<tr>
<td>DEF</td>
<td>Deferred Final Examination and/or final course work. An interim notation administratively assigned by the Registrar’s Office upon approval of a request to write a deferred final examination or defer submission of final course work. DEF must be replaced by a final grade within the prescribed time or be replaced with F.</td>
</tr>
<tr>
<td>F</td>
<td>Failure. The grade of F is assigned when the student has failed to meet the conditions of “satisfactory performance” defined in the Course Outline. F carries 0.0 grade points.</td>
</tr>
<tr>
<td>Notation</td>
<td>Description</td>
</tr>
<tr>
<td>----------</td>
<td>-------------</td>
</tr>
<tr>
<td>ABS</td>
<td>Absent from a required final examination. ABS is assigned only when the student is absent from the required final examination and has achieved satisfactory performance during the term as specified in the course outline. ABS is equivalent to an F and it carries 0.0 grade points.</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress – a notation (IP) assigned to a course by a faculty member when: At the undergraduate level, an undergraduate thesis or course has not been completed by the end of the period of registration. At the graduate level, a graduate thesis, research essay, independent research project or comprehensive examination has not been completed by the end of the period of registration. The IP notation may also be used at the graduate level when a research seminar has not been completed by the end of the period of registration provided the research seminar has been approved by Graduate Faculty Board as being eligible for the use of this notation. In the case of re-registration in any of the above courses, the IP notation will remain; a final grade will normally be assigned in the final period of registration. Where there is no re-registration in any of the above courses, the IP notation must be replaced with an appropriate notation or grade within the prescribed time period, or be replaced by a notation of WDN.</td>
</tr>
<tr>
<td>SAT</td>
<td>Satisfactory performance in an ungraded program requirement, option or course taken on Letter of Permission or International Exchange. SAT has no impact on the CGPA calculation.</td>
</tr>
<tr>
<td>UCH</td>
<td>Unsuccessful attempt for CH. UCH has no impact on the CGPA calculation.</td>
</tr>
<tr>
<td>UNS</td>
<td>Unsatisfactory performance in an ungraded program requirement, option or course taken on a Letter of Permission or International Exchange. UNS has no impact on the CGPA calculation.</td>
</tr>
<tr>
<td>WDN</td>
<td>Withdrawn. No academic credit, no impact on the CGPA. WDN is a permanent notation that appears on the official transcript for students who withdraw after the full fee adjustment date in each term (noted in the Academic Year section of the Calendar each term). Students may withdraw on or before the last day of classes.</td>
</tr>
<tr>
<td>GNA</td>
<td>Grade not available. An interim notation administratively assigned by the Faculty when a grade is not available, and must be replaced with a final grade.</td>
</tr>
<tr>
<td>DNC</td>
<td>Did not complete the course. No academic credit or impact on the CGPA calculation. In credit courses, the notation DNC is assigned by the appropriate appeal committee in the case of a student, who, having achieved satisfactory performance during the term, and has been granted a deferred final examination in the course then is unable to write the deferred examination due to continued and documented personal or medical reasons. In the case of audited courses, DNC is assigned by the instructor when the student has registered to audit the course and has not satisfied the requirements for successful audit.</td>
</tr>
<tr>
<td>EXC</td>
<td>Satisfactory performance on International Exchange, EXC has no impact on the CGPA calculation.</td>
</tr>
<tr>
<td>FND</td>
<td>Failure with no deferred final examination allowed. The grade FND is assigned only when the student has failed the course on the basis of inadequate term work as specified in the Course Outline. FND carries 0.0 grade points.</td>
</tr>
<tr>
<td>FNS</td>
<td>Failure without access to a supplemental examination because of incomplete term work or unacceptably low standing. No academic credit.</td>
</tr>
<tr>
<td>FWS</td>
<td>Failure with access to supplemental examinations.</td>
</tr>
<tr>
<td>INC</td>
<td>Incomplete may be assigned to a Graduate course in which the student has been approved to submit an assignment after the final deadline date. Incomplete must be replaced with a letter grade within forty days of the end of classes. If the Incomplete is not changed to a letter grade within forty days of the end of classes, the Incomplete will be changed to a grade of F, which will remain as a permanent entry on the student's record. In exceptional cases students may petition the Dean of the Faculty of Graduate and Postdoctoral Affairs to have the Incomplete remain on the student record. For circumstances that go beyond the forty-day period (i.e. medical), students may apply for a deferral (refer to Special/Deferred Final Examinations, Section 9.3).</td>
</tr>
<tr>
<td>LOP</td>
<td>Satisfactory performance on Letter of Permission, LOP has no impact on the CGPA calculation.</td>
</tr>
<tr>
<td>P</td>
<td>Pass.</td>
</tr>
<tr>
<td>PWD</td>
<td>Pass With Distinction.</td>
</tr>
</tbody>
</table>

5.4.1 A course is considered to be completed when the course registration results in a notation or grade other than WDN, IP, CTN, CUR or AUD, CEX, CLP, DEF, GNA, CUO.  
5.4.2 A course is considered to be successfully completed if the course is completed with a passing grade, SAT, CH, or AEG.  

5.5 Change of Grade  
Final grades are posted after grades are approved. Once posted, final grades may only be changed through informal
or formal appeals of grade processes (see Sections 3.3.4 and 3.3.5 of the Undergraduate Calendar).

Any instructor-initiated changes beyond the formal and informal appeal process must be completed by the instructor and approved by the faculty dean, or designate within 6 months of the last day of the exam period.

Any changes beyond this 6 month period must be initiated after consultation with the faculty dean or designate.

Unless an appeal has been initiated prior to the awarding of a degree, grades that have been used towards the awarding of a degree are not eligible for a change of grade.

**Academic Regulations for Special Students**

6.1 Special Students

Special students may be admitted to a degree program if their academic achievement at Carleton University indicates a reasonable probability of future academic success. Previous post-secondary studies at other institutions will also be taken into consideration at the time the application for admission is evaluated. Students with previous, unsuccessful post-secondary studies should contact the Admissions Services before attempting to qualify for admission on the basis of studies as a Special student.

6.2 Application

Applications to study as a Special student are submitted online to the Registrar’s Office at [https://carleton.ca/registrar/special-students/](https://carleton.ca/registrar/special-students/). Applications must include transcripts from the most recent study (high school, post-secondary), as well as the application fee. Documentation provided must satisfy the English language requirements of the University (see 6.3 below).

6.3 Proficiency in English

Special students must satisfy the University English language proficiency requirement listed in the Admissions Regulations section.

6.4 Course Selection

Special students are eligible to register in most courses provided they meet prerequisites. Space in certain courses may be limited and some courses are restricted to degree students. Restrictions and prerequisites are listed in the Class Schedule and the Calendar course description.

Special students planning on applying for admission to a program in the future are advised to note the specific Faculty requirements for course selection and the admission requirements for Special students as listed in this Calendar.

6.5 Course Load

Special students may enrol in a maximum of 1.0 credit in each of the summer, fall and winter terms.

Students who enrol as Special after suspension from a degree or certificate program do not qualify for course overload.

Special students who have completed at least 1.0 credit taken at Carleton University and have a CGPA of at least 7.00 may petition to the Registrar’s Office to register in a maximum of 1.5 credits in each of the summer, fall and winter terms. Permission from the Registrar’s Office is required.

Special students may enrol in 2.5 credits in each of the fall and winter terms and in 2.0 credits in the summer term if the student holds an undergraduate degree from a recognized post-secondary institution and presents official documentation to confirm their degree.

Students studying with an official approved Letter of Permission from a recognized post-secondary institution will be permitted to enrol in the course load indicated on their Letter of Permission.

6.6 Academic Performance Evaluation

Academic Performance Evaluation for Special students is carried out at the same time as for degree students. Special students receive their first Academic Performance Evaluation when the student has completed 2.0 credits since the most recent admission to Special studies when final grades are available. Subsequent evaluations occur when the student has completed an additional 2.0 or more credits. The result of an Academic Performance Evaluation is that the student is in Good Standing, on Academic Warning or is Suspended.

A Special student is considered to be in Good Standing at an Academic Performance Evaluation if their CGPA is at least 3.00.

A Special student is considered to be on Academic Warning at an Academic Performance Evaluation if their CGPA is less than 3.00 and at least 1.00 and they were in Good Standing before the evaluation.

Special students are Suspended if:

1. they are on Academic Warning at the time of a subsequent Academic Performance Evaluation and do not achieve Good Standing at that Academic Performance Evaluation; or,
2. their CGPA is less than 1.00 at the time of any Academic Performance Evaluation.

A Suspended Special student may not return to Special studies for one year.

6.7 Special Students Enrolling in Graduate-Level Courses

Anyone wishing to enrol in a graduate-level course as a Special student must obtain permission from the appropriate department. Requests are submitted through the registration system as a Course Override Request. Anyone considering pursuing a graduate degree is urged to contact the Faculty of Graduate and Postdoctoral Affairs prior to registration as a Special student.
Academic Regulations for Certificate Students

7.1 Academic Regulations and Requirements for Undergraduate Certificates
In addition to the requirements presented here, students must satisfy the university regulations (see the Academic Regulations of the University section of this Calendar).

Definition
An undergraduate certificate is defined as a structured set of at least 4.0 undergraduate credits in a particular discipline or area of study that introduces the student to - or extends their knowledge of - that discipline or area of study. An undergraduate certificate is a stand-alone credential that may be taken concurrently with a bachelor's program or independently. It is normally constituted by a structured set of sequential year-level courses.

Program Requirements
- A minimum of 4.0 credits
- Minimum grade requirements may apply
- Consult the individual program entries for details

Academic Regulations for Students with Disabilities

8.1 Academic Regulations for Students with Disabilities
Carleton University is strongly committed to providing access and accommodation for all individuals with identified and duly assessed disabilities. The University has a Senate-approved policy on academic accommodation that forms part of its Human Rights Policy. This policy should be consulted for further information and is available at: carleton.ca/equity. The policy promotes efforts to accommodate students with disabilities so that they will have the opportunity to meet learning objectives and be fairly evaluated in their performance. In no case, however, does academic accommodation negotiate away, lower, or remove the academic standards and learning objectives of any course or program, rule, regulation, or policy at the University.

The Paul Menton Centre for Students with Disabilities is the designated unit at the University for assisting the Carleton community in integrating persons with disabilities into all aspects of Carleton's academic and community life. The Paul Menton Centre provides assessment of academic accommodation, advises students on strategies to open a dialogue with instructors and acts as consultant, facilitator, coordinator and advocate in this area for all members of the University community.

The Paul Menton Centre provides individualized support services, based on appropriate and current documentation, to persons who are deaf or hard of hearing, with learning disabilities, attention deficit disorder (ADD), visual impairments, head injuries, physical disabilities including mobility impairments, or who have psychiatric, other medical or non-visible disabilities.

Students are responsible for applying for special services by making an appointment with the appropriate coordinator at the Paul Menton Centre. All requests will be considered on the basis of individual need. Students are advised to come to the Centre early in the term to discuss service requests.

Examination accommodations for all tests and examinations (in-class, CUOL, or formally scheduled) must be arranged by specific deadline dates. Please consult the Paul Menton Centre for a list of deadlines. Note that it may not be possible to fulfill accommodation requests received after the specified deadlines.

Academic Regulations for Students with Religious Obligations

9.1 Academic Regulations for Students with Religious Obligations
Carleton University accommodates students who, due to religious obligation, must miss an examination, test, assignment deadline, laboratory, or other compulsory event. The University has a Senate-approved policy on religious accommodation that forms part of its Human Rights Policy, available at: carleton.ca/equity.

Accommodation will be worked out directly and on an individual basis between the student and the instructor(s) involved. Students should make a formal written request to the instructor(s) for alternative dates and/or means of satisfying requirements. Such requests should be made during the first two weeks of any given academic term*, or as soon as possible after a need for accommodation is known to exist, but in no case later than the penultimate week of classes in that term. Instructors will make reasonable accommodation in a way that shall avoid academic disadvantage to the student.

Students unable to reach a satisfactory arrangement with their instructor(s) should contact the Director of Equity Services. Instructors who have questions or wish to verify the nature of the religious event or practice involved should also contact this officer.

*When a student's presence is required prior to the date on which classes begin (e.g. for field trips or orientation activities), any student who cannot meet this expectation of attendance for reasons of religious accommodation should notify the Registrar's Office in advance.

Academic Integrity and Offenses of Conduct

10.1 Academic Integrity Policy

10.1 Academic Integrity Policy
The University has adopted a policy to deal with allegations of academic misconduct. This policy is expressed in the document Carleton University Academic Integrity Policy, effective July 1, 2006 and last updated on June 26, 2015. The policy describes in detail its scope of application, principles, definitions, rights and responsibilities, academic integrity standards, procedures,
sanctions, transcript notations, appeal process, and records implications.

The complete policy is available at: https://carleton.ca/secretariat/wp-content/uploads/Academic-Integrity-Policy-2021.pdf

10.2 Offenses of Conduct: Discrimination and Harassment

10.2.1 Carleton University's Human Rights Policy

The University has in place policies and procedures to deal with allegations of discrimination and harassment, including sexual harassment. These are outlined in detail in the Carleton University Human Rights Policies and Procedures, effective May 1, 2001.

10.2.2 Unacceptable Conduct

Unacceptable conduct is outlined in the policy and includes discrimination or harassment based on race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, political affiliation or belief, sex, sexual orientation, gender identity, age, marital status, family status, or disability/handicap within the meaning of the Ontario Human Rights Code. Unacceptable conduct also includes threatening, stalking and unwelcome communication either in person or through electronic or other means. For the three policy sections below, the definition of prohibited behaviour is described in the italicized section that follows.

From the Anti-Racism and Ethnocultural Relations Policy

1. The University prohibits discrimination and harassment, including conduct on the basis of race, ancestry, place of origin, colour, ethnic origin and citizenship that:"

From the Gender Equality Policy

1. The University prohibits discrimination and harassment, including conduct on the basis of sex, gender or gender identity that:"

From the Sexual Orientation Equality Policy

1. The University prohibits discrimination and harassment, including conduct on the basis of sexual orientation or perceived sexual orientation that:
   5.1 Is abusive, demeaning or threatening including behaviour such as name calling; derogatory remarks, gestures and physical attacks; or display of derogatory or belittling pictures and graffiti; or
   5.2 Biases administrative and appointment decisions, employment and workplace practices, tenure, promotion, appointment, leave and salary determinations; or
   5.3 Biases academic decisions such as admissions, grading, the application of Regulations and scheduling of academic activities; or
   5.4 Misuses power, authority or influence; or
   5.5 Discriminates in the provision of goods and services, or access to premises, accommodation and other facilities."
Students with concerns regarding discrimination, harassment, stalking, sexist or racist behaviour, or any other prohibited action as outlined in the Human Rights Policy, should call or meet with a member of Equity Services for advice and guidance on how to handle the situation. This service is confidential and does not compel the student to take any further action.

Formal complaints must be made in writing and directed to the Dean or Vice President responsible for the area where the complaint took place. Staff in Equity Services are available to assist with the preparation of a formal complaint. Complaints must be made within 12 months after the last alleged incident of discrimination or harassment unless exceptional circumstances apply in which case the University Secretary may grant an extension of up to an additional 12 months.

10.2.4 Formal Procedures

The procedure for formal complaints is outlined below:

1. An allegation shall be made in writing to the Dean of the Faculty in which the program to which the respondent has been admitted belongs or, in the circumstances where the respondent has not been admitted to a program, to the Dean of the Faculty where the majority of courses in which the respondent has registered are administered. An allegation against a student in residence when made by another student in residence which involves the complainant's enjoyment of their accommodation shall be made to the Vice-President (Academic). The Dean, or the Vice-President (Academic), as the case may be, shall cause to have an investigation conducted and, upon receipt of the report of the investigation, shall either 1) dismiss the allegation on the grounds of insufficient evidence or lack of jurisdiction by the university, or 2) accept that the allegation is founded and seek the agreement of the respondent to a remedy, or 3) refer the matter to the President. A Dean's dismissal of the allegation may be appealed, within ten working days, to the Vice-President (Academic) who may, in turn, either 1) again dismiss the allegation, or 2) accept that the allegation is founded and propose a remedy to the respondent, or 3) refer the matter to the President. In the case of students in residence, where the original allegation has been made to the Vice-President (Academic) and is dismissed, appeal shall be directly to the President who may either 1) again dismiss the allegation, or 2) accept that the allegation is founded and propose a remedy to the respondent, or 3) refer the matter to a tribunal appointed by the Senate.

2. In the instance where the matter has been referred to the President, the latter shall decide whether the University shall conduct a hearing before a tribunal appointed by the Senate. If the allegation is proven, the tribunal shall decide upon one of the following sanctions. The student may be:
   a. expelled;
   b. suspended for a period of time from all studies at the University;
   c. restricted in their use of University facilities; and/or
   d. given a reprimand.

Should the President decide not to conduct a hearing before a tribunal, the allegation shall be deemed to have been dismissed, but the President shall give written reasons for such a decision, and these reasons shall be communicated to the parties involved.

1. In the instance where the complainant wants redress from the University without the involvement of the respondent, or where the respondent is unknown or is not a member of the University community, and/or where there is a claim that the University has failed or has been negligent in providing a safe, non-hostile environment, the allegation of an offence shall be made in writing to the President, who shall cause an investigation to be conducted. Upon receipt of the report of the investigation, the President may order any relief they deem fit, and shall give written reasons for the decision; which reasons shall be communicated to the complainant.

Information about procedure governing tribunals is available from the Clerk of Senate: senate@carleton.ca.

General Admissions Requirements and Procedures

1. General Admission Requirements

Persons wishing to follow programs of study leading to a degree or diploma or certificate must be formally admitted to the University.

Persons wishing to register in credit courses without having been formally admitted to the University may do so as Special students. See Special Studies (Non-Degree) below, for more information.

An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca/requirements for further details.

Applicants should note that meeting the minimum requirements of a program does not guarantee admission to the University. Applications from students whose grades do not meet the requirements in a given year or program will be considered individually. Students in this category may be asked to provide additional information to assist the University in determining where there are special circumstances that would permit their admission to Carleton.

This publication contains admission requirements for the 2021-22 academic year only. Students wishing to apply for 2022-23 should contact Admissions Services for information on requirements and procedures.
Individuals who are in any doubt about their eligibility for admission are encouraged to inquire at Admissions Services.

2. Accessibility for Students with Disabilities
Carleton University is committed to making reasonable accommodation to individuals with disabilities, and actively encourages application from students with disabilities. This commitment includes gaining an understanding of the circumstances of an individual's disabilities and adjusting services to all academically qualified individuals to compete on an equitable basis.

Students are encouraged to contact the Paul Menton Centre for Students with Disabilities for further information to enable them to assess the extent to which specialized services will be available.

Academic accessibility is intrinsically linked to physical accessibility. Carleton is committed to continually monitoring and upgrading physical accessibility to whatever extent is possible.

A Senate standing committee monitors the needs and problems of students with disabilities in conjunction with their academic problems and makes recommendations for improvements.

3. Multiple Undergraduate Programs
Students who already possess an undergraduate degree, certificate, or diploma from another university or from Carleton University may apply for admission to a second undergraduate program. To be eligible for graduation, there are a minimum number of Carleton credits that must be successfully completed. Please see Section 2.2.2 Minimum Number of Residency Credits and Section 2.2.3 Advanced Credits in the Academic Regulations of the University.

4. English as a Second Language Requirements (ESLR)
The language of instruction at Carleton University is English. In their own interest, students whose first language is not English must demonstrate that they can cope with the language demands of an English language university, and they can do so by following one of two options:

Option 1
In order to be eligible for admission to an undergraduate degree program or as a Special student at Carleton University without any English as a Second Language Requirement, all international applicants as well as Canadian citizens and residents whose first language is not English or French are required:

1. to present official transcripts to indicate that they have studied for the last three years (full-time non-ESL) in a high school, college or university in Canada, the United States, the United Kingdom or any other country in which the primary language is English and where the language of instruction in the relevant educational institution was exclusively English, or
2. to present an official minimum 70 band score (with no band below 60) on the Canadian Academic English Language (CAEL) Assessment, or
3. to present an official minimum score of 86 overall on the Internet-based (iBT) Test of English as a Foreign Language (TOEFL) with a minimum score in each component of: writing - 22, speaking - 22, reading - 20, listening - 20; or 237 on the computer-based Test of English as a Foreign Language (TOEFL); or 580 on the paper-based Test of English as a Foreign Language (TOEFL), or
4. to present an official minimum score of 6.5 overall on the International English Language Testing System (IELTS) Academic Version, with a minimum score of 6.0 on each band, or
5. to present an official minimum overall score of 60 (with a minimum of 60 on each band), on the Pearson Test of English (Academic), or
6. to have completed ESLA 1900 or ESLA 1905 with a final grade of B- or higher.

Applicants whose first language is French must present transcripts to indicate that they have taken four years of anglais (English) in a Canadian secondary school in order to be admitted without an English as a Second Language Requirement.

Option 2
Applicants whose first language is not English who do not meet the requirements stated in Option 1 may be offered admission to an undergraduate degree program or as a Special student, with an English as a Second Language Requirement (ESLR). These applicants are required to:

1. present an official overall score between 40 and 69 (with a minimum score in each band of 30 and a minimum average of 40 over writing, reading, and listening) on the Canadian Academic English Language (CAEL) Assessment, or
2. present an official overall score between 61 and 85 (with a minimum score in each component of 15) on the Internet-based (iBT) Test of English as a Foreign Language (TOEFL); or between 173 and 236 on the computer-based TOEFL; or between 500 and 579 on the paper-based TOEFL, or
3. present an official overall score between 5.0 and 6.4 (with a minimum score in each band of 4.5 and a minimum average of 5.0 over writing, reading, and listening) on the International English Language Testing System (IELTS).

Applicants with language scores within the above ranges may be permitted to begin their studies by registering in credit ESLA courses(s) and a limited number of credit courses until their ESLR is completed.

Students must be registered in and attending the required credit ESLA course(s) to be permitted to register in any other courses. Students who have not registered appropriately will be deregistered from all credit courses. This includes those students registered in credit courses without the required ESLA course registration and those
Special students may normally enrol in a maximum of 1.0 credit load. Students who wish to take advantage of the Concurrent Studies program will register as Special students. Students who do not achieve the minimum final grade required to advance to the next level of an ESLA course after three attempts will not be permitted to register in any credit courses for one calendar year. Such students must take a SLALS-approved English language proficiency test before returning to their studies and must register according to their new placement.

Students considering a break in study of three terms or longer should contact SLALS to discuss their ESLR standing. After a break in studies, students may be required to re-take a SLALS-approved English language proficiency test before returning to their studies and register according to their new placement. To satisfy the ESLR, students must earn a grade of B- or higher in either Advanced English as a Second Language for Academic Purposes (ESLA 1900) or in Advanced English as a Second Language for Engineering Students (ESLA 1905). Students are able to satisfy this requirement at any time during the year by achieving the minimum result required on one of Carleton University’s approved English as a Second Language assessments. Refer to Option 1 for details on acceptable English language tests.

For further information regarding the English as a Second Language Requirement and admission, contact Admissions Services. For information on English as a Second Language credit courses and placement, contact the School of Linguistics and Language Studies (SLALS).

5. Dates of Entry
Students may be admitted to register in January, May and July as well as in September. (See the Academic Year section of this Calendar.)

6. Concurrent Studies
The Concurrent Studies program enables secondary school students to begin university-level study while completing any outstanding requirements for their high school diploma. The availability of the Concurrent Studies program will be of particular interest to those students in semested schools who are not taking a full load of high school credits in their final year of study. Students in non-semested high schools may also wish to take advantage of this opportunity in their final year if they are not taking a full credit load.

Students who wish to take advantage of the Concurrent Studies program will register as Special students. Special students may normally enrol in a maximum of 1.0 credit in each of the fall term, winter term and summer session. With admission to a degree program, program requirements for a degree will be reduced by the number of credits successfully completed as part of the Concurrent Studies program that are appropriate to the degree. Other universities normally grant credit on admission for courses taken at Carleton as a Special student.

7. High School Applicants
Ontario
The minimum admission requirements to be considered are:
1. the completion of the OSSD; and
2. six 4U/M courses, including specific program prerequisites.

The overall admission average and mix of 4U/M courses required is dependent upon the degree or program for which the student is applying. Detailed admission requirements for each undergraduate degree program can be found in the “Summary of Admission Requirements” following this section.

Holding the minimum admission requirements only establishes eligibility for consideration to Carleton University programs. Admission averages and required marks will vary from year to year and will be determined by the availability of places and by the number of applicants. The overall admission average may be higher than the stated minimum requirements.

Students who feel that their high school grade average does not reflect their potential are encouraged to apply to the Enriched Support Program. For more information, see the Enriched Support Program information following the Admissions section of this Calendar.

Quebec
Students from the Province of Quebec may apply for admission into first year either upon completion of the Grade 12 program or after completing work towards the Collegial diploma. (See the information on Quebec CEGEPs in this section.)

Other Canadian Provinces
Applicants to degree programs at Carleton must normally be admissible to a university in their own province.

The United States
1. Applicants who have completed Grade 12 in the United States or in a U.S. overseas school will be considered for admission to first year. The Grade 12 program must include at least four academic units, and a minimum of 16 academic units must have been completed in Grades 9 to 12.
2. An average of B- or higher is required for admission. For Honours programs and some limited enrolment programs, a higher average may be required.
3. Applicants are encouraged to submit SAT or ACT scores to supplement their application for admission to the University.

Advanced Placement (AP)
Applicants who have completed AP exams with a minimum grade of 4 will be granted appropriate advanced standing credit, subject to the discretion of the appropriate Faculty, to a maximum of 3.0 credits.

International Baccalaureate (IB)
Students applying on the basis of having completed the IB diploma must possess a minimum score of 28 points. Applicants should have completed the diploma with six subjects: three higher level (HL) and three subsidiary level (SL). Students should also include the specific subject requirements for the program for which they are applying among their higher level and subsidiary level subjects. Usually we expect prerequisite courses to be at the higher level. Students with a minimum score of 28 may be given transfer credit for higher level courses with grades of 5 or higher, to a maximum of 3.0 credits.

Other High School Systems
Applicants who have completed high school diploma requirements in other than Canadian or American high school systems will be considered for admission at the appropriate level of entry. Individuals from foreign systems of education will be considered for admission to first year only if they are able to present sufficient evidence that their secondary school background is appropriate to this level of entry with respect to academic content and level of achievement.

Generally speaking, such applicants must meet requirements for admission to a university in their own country.

8. Special Requirements for Overseas Students

Translation of Documents
The University must be in receipt of all official documents by May 1. Applicants from non-English speaking countries must arrange to submit certified English translations of their academic documents.

9. Transfers from Post-Secondary Institutions: General Information

An applicant who is attending or has attended institutions of post-secondary education must present:

1. Official certified transcripts of academic records mailed directly to this University by the registrars of the institutions attended, and
2. Applicants who have taken only one year of study past the secondary school level may be required to submit an official transcript of high school marks mailed directly to Carleton University by the high school concerned.

Credit may be received for courses taken at other recognized institutions if:

1. Courses are relevant to a student’s proposed program, and
2. The appropriate department recommends that such courses be credited to a student’s program. Each application will be evaluated on its own merits.

Please note that performance indicators other than letter or numeric grades are not acceptable for transfer credit (i.e. PSD [passed], CR [credit], EXP [ exempt], EXM [exam], etc.).

To be eligible for graduation, students transferring from other post-secondary institutions must complete a minimum number of Carleton credits. Please see Section 2.2.2 Minimum Number of Residency Credits and Section 2.2.3 Advanced Credits in the Academic Regulations of the University.

10. Transfers from Post-Secondary Institutions: Universities

Students applying from other recognized universities may be admitted if they are eligible to continue at the institution from which they wish to transfer and if they meet the requirements.

Carleton University subscribes to the following General Policy on the Transfer of Course Credits, as adopted by the Council of Ontario Universities:

Acceptance of transfer credits among Ontario universities shall be based on the recognition that, while learning experiences may differ in a variety of ways, their substance may be essentially equivalent in terms of their content and rigour. Insofar as possible, acceptance of transfer should allow for the maximum recognition of previous learning experience in university-level courses.

Subject to degree, grade and program requirements, any course offered for credit by one university shall be accepted for credit by another Ontario university when there is an essential equivalency in course content.

Please contact Carleton’s Admissions Services for information about transferring specific courses.

Students who apply for admission to an undergraduate degree program who already possess an undergraduate degree from either Carleton or another university, are required to complete a minimum number of Carleton credits. (See Sections 2.2.2 and 2.2.3 of the Academic Regulations of the University.)

11. Transfers from Post-Secondary Institutions: Ontario Colleges

Students from Ontario Colleges who have successfully completed a minimum of two terms in a two- or three-year diploma program or a four-year Applied Degree program and who present a minimum 3.0 grade point average (B standing in the Carleton University grading system) will be considered for admission to a degree program.

12. Transfers from Post-Secondary Institutions: Quebec CEGEPs

Admission Requirements

1. A CEGEP applicant who has completed successfully 12 “General” or pre-university courses will be considered for admission to first year, without advanced standing. The overall average required is dependent upon the degree or program for which the student is applying.

2. CEGEP applicants who have successfully completed more than 12 “General” or pre-university courses will be considered for admission with advanced standing.
based on the number of courses in excess of 12 and not to exceed the equivalent in credits of the first year of the program to which they are admitted. The overall average required and the advanced standing credits are dependent upon the degree or program for which the student is applying.

All applicants should note that failures in their CEGEP studies can adversely affect their admissibility.

**Subject Requirements**
Although specific subject requirements have been kept to a minimum, the following are considered necessary prerequisites for the degree program indicated:

**Bachelor of Architectural Studies**
English or *anglais*, mathematics, physics Note: a portfolio is required.

**Bachelor of Arts**
English or *anglais*

**Bachelor of Arts (Biology)**
English or *anglais*, and chemistry

**Bachelor of Cognitive Science**
English or *anglais*

**Bachelor of Commerce**
English or *anglais*, and mathematics

**Bachelor of Communication and Media Studies**
English or *anglais*

**Bachelor of Computer Science**
Mathematics

**Bachelor of Economics**
English or *anglais*, mathematics

**Bachelor of Engineering**
Mathematics, physics, chemistry

**Bachelor of Global and International Studies**
English or *anglais*

**Bachelor of Health Sciences**
Mathematics, two experimental sciences

**Bachelor of Humanities**
None specified. Note: a portfolio may be required.

**Bachelor of Humanities (Combined Honours with Biology)**
Chemistry or biology

**Bachelor of Industrial Design**
Mathematics, physics
Note: a portfolio is required and attending an information session at the School is recommended.

**Bachelor of Information Technology**
- Network Technology: mathematics
- Information Resource Management: english, mathematics
- Interactive Multimedia and Design: mathematics. A portfolio is also required.
- Photonics and Laser Technology: mathematics

**Bachelor of International Business**

**English or *anglais*, mathematics**

**Bachelor of Journalism**
English or *anglais*

**Bachelor of Journalism and Humanities**
English or *anglais*

**Bachelor of Mathematics**
Mathematics

**Bachelor of Media Production and Design**
English or *anglais*, mathematics

**Bachelor of Music**
None specified. Note: an audition is required.

**Bachelor of Public Affairs and Policy Management**
None specified.

**Bachelor of Science**
Mathematics, two experimental sciences

**13. Provisional Admission**
Some transfer applicants (those who have attended a Canadian university, an Ontario College, or a Quebec CEGEP, and have demonstrated better than average academic achievement) will automatically be considered for provisional admission. The provisional approval will be given prior to the completion of the student's current year, and will provide a detailed statement of the credits to be granted upon transfer. Admission will be confirmed upon presentation of a final transcript that indicates the successful completion of all courses with suitable standing.

**14. Mature Applicants**
Mature Applicants are persons who satisfy all of the following requirements:

1. are Canadian citizens or permanent residents of Canada, and
2. do not meet the normal admission requirements as published in this Calendar, and
3. have been away from full-time studies for a minimum of two calendar years, and
4. have not attended a university or college as full-time students.

Applicants who meet the definition of Mature Applicant will be considered for admission to programs in the Faculty of Arts and Social Sciences or in the Faculty of Public Affairs, or to a degree program in Engineering, Architecture, Computer Science, Humanities, Industrial Design, Mathematics, Science, Information Technology, or Social Work. Mature Applicants are not usually considered for admission to programs in Business, Journalism, Music, or Public Affairs and Policy Management. If, however, at the end of their first year in another degree program, they meet the requirements for one of the above-mentioned programs, they can apply to transfer to that program.
These applicants are required to submit biographical information and a transcript of their most recent studies.

Mature Applicants may be admitted to the first year of an undergraduate degree program if they have:

1. secondary school graduation in an academic program (the overall average required is dependent upon the degree or program for which the student is applying), or
2. completed, as a Special student at Carleton University, one appropriate full credit (or two half-credits) with C- or higher standing in the first attempt (or in both of the first two half-credit course attempts), or
3. other academic or work experience which, in the opinion of the admissions committee, indicates a likelihood of success at university.

Note: Persons applying for admission as Mature Applicants without the prerequisites will not normally be considered until the prerequisite subjects have been successfully completed. The prerequisite subjects (4U or equivalents) are found under Prerequisite Subjects (Section 18). All applications are reviewed on an individual basis.

Admission to the Faculty of Arts and Social Sciences, or to the Faculty of Public Affairs
Mature Applicants will normally be admitted to the first year of a B.A. or B.Co.M.S. or B.G.In.S. or B.MPD or B.Econ degree program in the Faculties of Arts and Social Sciences or Public Affairs and Management, or the first year of the undergraduate degree program in Humanities or Social Work.

Admission to the Schools of Architecture, Computer Science, and Industrial Design
Mature Applicants can be considered for admission to the first year in the Schools of Architecture, Computer Science, or Industrial Design. The required prerequisite subjects (4U or equivalents) for Architectural Studies, Computer Science, and for Industrial Design are found under Prerequisite Subjects at the end of this section.

Persons applying for admission to these undergraduate degree programs without the prerequisites will not normally be considered until the prerequisite subjects have been successfully completed. All applications are reviewed on an individual basis.

Admission to the Faculty of Engineering
Mature Applicants can be considered for admission to first year of a degree program in the Faculty of Engineering. The required prerequisite subjects (4U or equivalent) for Engineering are found under Prerequisite Subjects at the end of this section. A grade of 60 percent or higher is required in each prerequisite subject.

Persons applying for admission to this undergraduate degree program without the necessary prerequisites will not normally be considered until the prerequisite subjects have been successfully completed. All applications are reviewed on an individual basis.

Admission to the Faculty of Science
Mature Applicants can be considered for admission to the first year of a program in the Faculty of Science. The required prerequisite subjects (4U or equivalent) for Science are found under Prerequisite Subjects at the end of this section.

Persons applying for admission to this undergraduate degree program without the necessary prerequisites will not normally be considered until the prerequisite subjects have been successfully completed. All applications are reviewed on an individual basis.

Mature Applicants are not usually considered for admission to Honours programs in Science. If, however, at the end of the first year of a 15.0 credit program, they meet the requirements for one of the Honours programs, they can apply to transfer to that program.

Admission to the Bachelor of Information Technology
Mature Applicants can be considered for admission to first year of the Bachelor of Information Technology. The required prerequisite subjects (4U or equivalent) for BIT are found under Prerequisite Subjects at the end of this section.

Special Students Wishing to Apply as Mature Applicants
Special students who meet all of the criteria for Mature Applicants can be considered for admission as Mature Applicants if:

1. they have completed, as a Special student, at Carleton University, one appropriate full credit (or two half-credits) with C- or higher standing in the first attempt (or in both of the first two half-credit attempts), or
2. they are eligible to continue as Special students at Carleton University, and
3. they have completed any additional degree program prerequisite subjects that may be required for a particular program.

Mature Applicants who, as Special students at Carleton University, have not obtained a grade of C- or higher in one full credit (or two half-credits), in the first attempt (or in both of the first two half-credit attempts), can attempt to qualify for subsequent admission through additional courses as a Special student at the University.

Individuals seeking admission under the Mature Applicant status who need further information should inquire at Admissions Services.

15. Special Studies (Non-Degree)
Special students may be admitted to a degree program if their academic achievement at Carleton University indicates a reasonable probability of future academic success. Previous post-secondary studies at other institutions will also be taken into consideration at the time the application for admission is evaluated. Students with previous, unsuccessful post-secondary studies should contact Admissions Services before attempting to qualify for admission on the basis of studies as a Special student.

In the Faculty of Arts and Social Sciences, Faculty of Public Affairs, and Faculty of Science, a Special student can normally be considered for admission to a General
degree program after completing 4.0 credits (or the equivalent), and if the student would be in Good Standing if admitted. Students seeking admission are usually not considered for admission until the necessary prerequisites have been successfully completed in addition to the 4.0 approved credits (or the equivalent). The prerequisite subjects (4U/4M courses or equivalents) are found at the end of this section under Prerequisite Subjects.

If fewer than 4.0 credits have been completed, a Special student will be considered for admission after completion of:

- 2.0 credits (or the equivalent) with a CGPA of 8.00 or higher, or
- 2.5 credits (or the equivalent) with a CGPA of 7.00 or higher, or
- 3.0 credits (or the equivalent) with a CGPA of 6.00 or higher, or
- 3.5 credits (or the equivalent) with a CGPA of 5.00 or higher

Special students wishing to apply for admission to the Faculty of Engineering, or the Schools of Architecture, Business, Computer Science, Industrial Design, Information Technology, Journalism, or Social Work, are urged to consult with Admissions Services.

16. Prerequisite Subjects
Certain degree programs require grade 4U courses (prerequisite subjects) or the equivalent as follows: (See Summary of Admission Requirements following this section for specific minimum averages and required marks.)

B. Science (15.0 credit/Major)
- Advanced functions and two of: calculus and vectors, biology, chemistry, earth and space science, physics

17. Previous Carleton Degree Students
All former students who have been formally admitted to a degree or diploma or certificate program at the undergraduate level and who are seeking readmission either to that program or to another program are governed by differing regulations, depending upon the faculty or school that offers the program.
Please refer to the relevant program section of this Calendar or, if there is no specific entry dealing with readmission in that section, consult the Registrar's Office to determine whether or not it is necessary to submit a new application for admission. Please note that previous Carleton students applying to limited enrolment programs must apply by the published deadlines.

18. Documents

Documents submitted in support of an application for admission become the property of the University. Carleton University retains electronic students files for all students admitted for the 2014 summer term and beyond. Original documents that have been digitized for inclusion in the student's file are destroyed in compliance with the University's privacy policies. In some cases, original documents may be returned to the applicant. Contact Admissions Services for more information.

The University may nullify an admission and revoke a registration if it finds that an applicant for admission or registration has, in the process, provided false or incomplete information.

Applicants who are unable to submit documents of previous academic studies as a result of natural disaster, armed conflict, or the securing of refugee status are subject to the following policy:

- Applicants who are unable to submit supporting documents will not be admitted. They will be encouraged to register as Special students and qualify for admission by taking courses at the University.
- Applicants who can submit official transcripts but cannot submit course descriptions will be admitted to first year if:
  - their academic record meets the standards required by the program for which they are applying, and
  - their high school studies include prerequisite subjects for admission to first year.
- Applications from candidates who can provide course descriptions based on their recollection of the courses which they have taken will be treated according to the same procedures as those which apply to applicants who cannot submit course descriptions (see 2. above).

Bachelor of Architectural Studies

B.A.S. (All) 

The following additions and amendments apply to all B.A.S. programs:

1. Students are assessed at each Academic Performance Evaluation using the Core minimum as described below.
2. Good Standing requires a minimum grade of C- in each B.A.S. Core course.
3. The B.A.S. Core Courses consist of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

4. B.A.S. students continue either in Good Standing or on Academic Warning.
5. Students whose academic performance evaluation results in Suspension must leave the B.A.S. degree. Application for readmission to all B.A.S. programs may be made after one year.

Bachelor of Arts

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).
First-Year Seminars
B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

Breadth Requirement
Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication
American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

Breadth Area 2: Humanities

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Subject codes: AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOL, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECOH, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, ISYS, ITEC, MAAN, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students
Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

Change of Program Within the B.A. Degree
Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations
Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any...
specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

**Mention : Français**

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:

1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfill the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

### Bachelor of Cognitive Science

#### Academic Regulations and Requirements for the Bachelor of Cognitive Science Degree

The regulations presented below apply to all Bachelor of Cognitive Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

#### First-Year Seminars

B.Cog.Sc. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM (one 1.0-credit FYSM or two 0.5-credit FYSM’s) and can only register in a FYSM while they have first-year standing in their B.Cog.Sc. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

### Change of Program Within the B.Cog.Sc. Degree

Students may transfer to a program within the B.Cog.Sc. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.Cog.Sc. Degree at the Registrar’s Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

#### Minors, Concentrations and Specializations

Students may apply to the Registrar’s Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

**Mention : Français**

Students registered in the B.Cog.Sc. may earn the notation Mention: Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below.

Students in the B.Cog.Sc. Honours program must present:

1. 1.0 credit in the French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level taken in French. These credits may come from any of Philosophy, Psychology, Computer Science, Linguistics, Neuroscience, or Cognitive Science, without restriction.

Students in the B.Cog.Sc. program must present:

1. 1.0 credit in the French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level taken in French. This credit may come from any of Philosophy, Psychology, Computer Science, Linguistics, Neuroscience, or Cognitive Science, without restriction.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the
University section of this Calendar for information regarding study on Exchange or Letter of Permission.

**Commerce**

**Degree**
- Bachelor of Commerce (B.Com.) (Honours)
- Bachelor of Commerce (B.Com.)

**Admission Requirements**

**First Year**

**Bachelor of Commerce (B.Com.) (Honours)**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include English, Advanced Functions, and Calculus and Vectors. Applicants who do not present with Calculus and Vectors must successfully complete MATH 0009 at Carleton in the Fall semester of first year in order to be eligible to continue.

For applicants whose first language is not English, the requirement of 4U English can also be met under the conditions outlined in the English Language Requirements of the Admissions Requirements and Procedures section of this Calendar.

**Bachelor of Commerce (B.Com.)**
No direct entry; access is restricted.

**Advanced Standing**

**Bachelor of Commerce (B.Com.) (Honours)**
Applications for admission to the second or subsequent years will be assessed on their merits. Students must present a major CGPA of 6.50 (C+/B-) or higher, and an overall CGPA of 8.00 (B) or higher. Advanced standing will be granted only for those courses that are determined to be appropriate. Students will not receive credit for courses graded below C-.

Current Carleton students may also be assessed for admission to second and subsequent years if they present BUSI 1001 and BUSI 1002 with an average of 8.0 or higher (with no individual grade below C+) and a major CGPA of 6.50 (C+/B-) or higher.

Applications by B.I.B. (Honours) students for admission to the second or subsequent years of B.Com. (Honours) will be assessed on their merits. Students must present a major CGPA and an overall CGPA consistent with the Academic Performance Evaluation requirements for B.Com. (Honours) students. Advanced standing will be granted for those courses determined to be appropriate.

**Bachelor of Commerce (B.Com.)**
No direct entry. Access is restricted to students in the Bachelor of Commerce (Honours) and Bachelor of International Business (Honours). (See Regulations for Business.)

**Co-op Option**

**Direct Admission to the First Year of the Co-op Option**
Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Commerce (Honours) program;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Communication and Media Studies**

**Degrees**
- Bachelor of Communication and Media Studies (Honours)
- Bachelor of Communication and Media Studies

**Admission Requirements**

**First Year**

**B. Co.M.S. (Honours)**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section English Language Requirements in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

**B. Co.M.S.**
Access to the B.Co.M.S. degree is limited to B.Co.M.S. (Honours) students who apply to transfer.

**Advanced Standing**

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

**Co-op Option**

**Direct Admission to the First Year of the Co-op Option**
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Communication and Media Studies (Honours);
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

## Computer Science

### Degree
- B.C.S. (Major)
- B.C.S. (Honours)

### Admission Requirements

#### First Year
The Ontario Secondary School Diploma (OSSD) or equivalent, including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and Calculus and Vectors.

#### Advanced Standing
Applications for admission beyond first year will be assessed on their individual merits. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected. Students will not receive credit for courses graded below C-.

#### Co-op Option

### Direct Admission to the First Year of the Co-op Option
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Computer Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

## Economics

### Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

### Degree
- Bachelor of Economics (B.Econ.) (Honours)

### Admission Requirements

#### First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*) as well as 4U Advanced Functions or MATH 0005. In addition, 4U Calculus and Vectors or MATH 0107 is strongly recommended. Equivalent courses may be substituted between the old and new Ontario mathematics curriculum. For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

#### Advanced Standing
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

#### Co-op Option

### Direct Admission to the First Year of the Co-op Option
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in a Bachelor of Economics Honours program;
3. be eligible to work in Canada (for off-campus work placements).
Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Bachelor of Engineering Degree

Regulations
The regulations presented in this section apply to all Bachelor of Engineering programs.

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar), with the following additions and amendments:

Academic Performance Evaluation for Engineering
1. In Engineering programs, all credits are included in the Major CGPA, making it identical to the Overall CGPA.
2. Students who are not assigned the status Good Standing or Academic Warning will be required to leave the degree with either the status Continue in Alternate (CA) or the status Dismissed from Program (DP).

Graduation
Students in Engineering programs are covered by the common University regulations regarding graduation, with the following additions and amendments:
1. Students entering an Engineering program with Advanced Standing will receive transfer credit for at most ten of the credits required for their program.
2. To be eligible for graduation, the most recent grade in every course used to meet the requirements of the Bachelor of Engineering degree must be a passing grade.

Course Load
Regulations regarding Course Load and Overload can be found in the Academic Regulations of the University section of this Calendar. The normal course load in Engineering is defined as the number of credits required in the student's program for the current year status of the students. Since the programs in Engineering require more than 20.0 credits in total, the normal course load is more than 5.0 credits in some years of the program. Registration in more than this number of credits constitutes an overload.

Co-operative Education Programs
All Engineering programs are available with or without participation in the Co-operative Education option.

Year Status Prerequisites
Year Status in Engineering is used in some course prerequisites to limit access to only those students who have sufficient preparation. In particular, students will not have access to second, third or fourth year engineering, science or mathematics courses until they have achieved second year status. Similarly, to take some specific engineering, science and mathematics courses in third or fourth year, that year status must be achieved. For additional information on prerequisites, see the individual course descriptions.

2nd year: Students may not continue into 2000-level (or higher) engineering courses unless all the following requirements are met:
1. Successful completion of all ECOR 1040 series of courses with a minimum grade of C-,
2. Successful completion of all ECOR 1050 series of courses,
3. Successful completion of MATH 1004, MATH 1104, CHEM 1001 (or CHEM 1001 and CHEM 1002), and PHYS 1004 (or PHYS 1001 and PHYS 1002),
4. Successful completion of all English as a Second Language Requirements, and any additional requirements as determined in the admission process.

3rd year: Students may not take courses with third-year status in Engineering as a prerequisite until successful completion of 4.0 credits from the second-year requirements of their current program.

4th year: Students may not take courses with fourth-year status in Engineering as a prerequisite until successful completion of all second-year requirements and successful completion of 3.5 credits from the third-year requirements of their current program.

Time Limit
The Bachelor of Engineering degree must be completed within eight calendar years of initial registration. Students who do not complete their program requirements within this limit will be given the status Continue in Alternate.

Academic Appeals
The Engineering Committee on Admission and Studies handles all academic appeals.

Global and International Studies

B.G.In.S. Regulations
The regulations presented in this section apply to all Bachelor of Global and International Studies programs.

In addition to the program requirements and requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars
B.G.In.S degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit of
The Bachelor of Humanities and Biology option must include 4U Chemistry or 4U Biology.

Note:
The overall admission cut-off average and/or prerequisite average may be considerably higher than the stated minimum requirements for admission. Applicants with lower averages may be asked to submit a portfolio in support of their application. For detailed information about the portfolio and whether you are required to submit one, please consult with the Bachelor of Humanities website. The portfolio should be submitted to the College of the Humanities, Carleton University.

Advanced Standing
Applications for admission with advanced standing to the program leading to the Bachelor of Humanities will be evaluated individually. On admission, students will not receive credit for courses graded below C-. The College also maintains a number of places in second and third year for students who wish to transfer from Carleton or elsewhere. Applications will be assessed on their merits but normally an overall CGPA of 8.0 (B) or higher is required. On admission, students will not receive credit for courses graded below C-.

Bachelor of Industrial Design

Regulations
The regulations presented in this section apply to all students in the Bachelor of Industrial Design program.

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

Year Status and General Prerequisites
In the Bachelor of Industrial Design degree program, year status is defined as follows:

1st year: Admission to the program.
2nd year: Successful completion of IDES 1001, IDES 1301 and must not be deficient in any more than one of the other first year courses.
3rd year: Successful completion of IDES 2302 and all first and second year course requirements.
4th year: Successful completion of IDES 3302 and all third year course requirements.

Bachelor of Information Technology

Regulations
The regulations presented in this section apply to all students in the Bachelor of Information Technology program.

In addition to the program requirements, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).
Joint Status
A student registered in the BIT degree has student status at both Algonquin College and Carleton University. At Algonquin College the student is considered to be a post-secondary student; at Carleton University, the student is considered to be a degree student. Students registered in the BIT degree have access to all student services on the Carleton University campus and selected services on the Algonquin College campus.

Academic Regulations
The academic regulations governing the B.I.T. are the academic regulations of Carleton University. These regulations are defined in full in the Academic Regulations of the University section of this Calendar and apply to B.I.T. students on both campuses. Within the context of these regulations, B.I.T. is considered to be a non-honours degree with a defined Major CGPA and requires 20.0 credits. Courses with the designations BIT, NET or IMD are not normally transferable to Engineering, Computer Science or other programs at Carleton University.

Students should note that there are significant differences between the academic regulations of Carleton University and Algonquin College; it is the regulations of Carleton University that apply in all cases as related both to course registrations and program rules.

At Carleton University, the chief examination officer of the BIT is the Dean of Engineering and Design. At Algonquin College, grades are approved by the Dean of the respective School.

Graduation
In order to graduate with the Bachelor of Information Technology Degree and the Advanced Diploma of Technology or Advanced Diploma of Applied Arts, the student must:

1. satisfy all requirements for the program of study;
2. be recommended for graduation by Bachelor of Information Technology Academic Council;
3. be approved for graduation by the Senate of Carleton University;
4. be approved for graduation by the Registrar of Algonquin College.

Discipline
The regulations, procedures and sanctions that apply to student discipline on either campus, both concerning Instructional Offences and Offences of Conduct are those of Carleton University and are described in the Carleton University Undergraduate Calendar. However, while students are on Algonquin’s campus, they are expected to follow Algonquin’s Directives regarding Student Misconduct and Use of Electronic Devices.

International Business

Degree
• Bachelor of International Business (B.I.B.) (Honours)

Admission Requirements
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include English, Advanced Functions, and Calculus and Vectors. Applicants who do not present with Calculus and Vectors must successfully complete MATH 0009 at Carleton in the Fall semester of first year in order to be eligible to continue.

For applicants whose first language is not English, the requirement of 4U English can also be met under the conditions outlined in “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

Advanced Standing
Applications for admission to second and subsequent years will be assessed on their merits, subject to available spaces. Advanced standing will be granted only for those courses that are determined to be appropriate. Students must present an Overall CGPA of 8.0 (equivalent to B average) or better. Students will not receive credit for courses with grades below C-.

Applications by B.Com. students for admission to the second or subsequent years of B.I.B. will be assessed on their merits. Students must present a major CGPA and an overall CGPA consistent with the Academic Performance Evaluation requirements for B.I.B. students. Advanced standing will be granted for those courses determined to be appropriate.

The design of the B.I.B. program is premised on a full year of study abroad (at third year) after the preparations leading to it are successfully completed at Carleton. Students who are admitted with advanced standing may need to delay the third-year abroad requirements until first and second year curricula are completed and consequently delay graduation.

Some transferred credits (normally electives) may have to be forfeited in order to meet the Third-year Study Abroad Requirement of minimum 4.0 credits completed during year abroad.

Journalism

Degree
• B.J. (Honours)

Admission Requirements
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include English. The Bachelor of Journalism with a Concentration in Health Sciences must also include 4U Chemistry or 4U Biology.

Note: Students who already hold an undergraduate degree in another field are not eligible to apply for the B.J. (Honours) program. These students should consult the information on the Master of Journalism or the Master of
Arts in Communication in the Faculty of Graduate Studies and Research Calendar.

Advanced Standing
The School also maintains a number of places in second year for students who wish to transfer from Carleton or elsewhere. Normally, offers are made to students with an overall CGPA of 10.00 (A-) or higher.

Journalism and Humanities

Degree
- Bachelor of Journalism and Humanities (B.J.Hum.) (Honours)

First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include 4U English.

Note: students who already hold an undergraduate degree are not eligible to apply for the B.J.Hum. (Honours).

Advanced Standing
The B.J.Hum. (Honours) maintains a number of places in second year for students who wish to transfer from Carleton or elsewhere. Transfers into higher years will not be considered.

Normally, offers are made to students with an overall CGPA of 10.00 (A-) or higher.

Mathematics and Statistics

Degree
- Bachelor of Mathematics (B. Math.) (Honours)
- Bachelor of Mathematics (B.Math.)

Admission Requirements
B.Math Honours Program
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include two prerequisite courses (Advanced Functions and Calculus and Vectors).

The overall admission cut-off average and/or the prerequisite course average may be considerably higher than the stated minimum requirements for admission to the combined B.Math/M.Sc in Mathematics or Statistics.

Advanced Standing
Applications for admission beyond first year will be assessed on their individual merits. Applicants must normally be in Good Standing (see Undergraduate Calendar Section 3.0 - Academic Regulations for Degree Students) for their year level. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option
Direct Admission to the First Year of the Co-op Option
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Mathematics Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market (and thus the availability of co-op placement) may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Media Production and Design

Degree
- Bachelor of Media Production and Design (B.M.P.D. Honours)

Admission Requirements
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include English and one of Advanced Functions or Calculus and Vectors or Mathematics of Data Management. Advanced Functions is recommended.

Co-op Option
Direct Admission to the First Year of the Co-op Option
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;

2. be registered as a full-time student in the Bachelor of Media Production and Design program;

3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market (and thus the availability of co-op placement) may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Music

Degree

• B.Mus. (Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.

Although it is not an admission requirement, a 4U course in English is recommended.

Note: An audition is required.

Advanced Standing

Students transferring into the Bachelor of Music with first, second, or third year standing must have achieved a major CGPA of 6.00 (C+) or higher and an overall CGPA of 5.00 (C) or higher. Students beginning the final 5.0 credits towards the Bachelor of Music degree must have achieved a major CGPA of 6.50 (C+/B-) or higher and an overall CGPA of 5.00 (C) or higher.

Public Affairs and Policy Management

Degree

• B.P.A.P.M.

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.

Advanced Standing

Applications for admission with advanced standing to the program will be evaluated individually by the Program Management Committee. Advanced standing will be granted only for those courses deemed to be appropriate to the program. On admission, students will not receive credit for courses graded below C-.

Continuation to second year will be guaranteed only to those students who have an overall CGPA of 7.00 or higher and a grade of B- or higher in PAPM 1001.

Co-op Option

Direct Admission to the first year of the Co-op Option

Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;

2. be registered as a full-time student in the B.P.A.P.M. program;

3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Bachelor of Science Degree

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

1. 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in science continuation courses in each of the two majors

2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for fewer than 10.0 credits.

2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (but may include NSCI
1000) if, on transfer, the student received credit for 10.0 or more credits.

Declared and Undeclared Students

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.Sc. degree without being registered in a program. These students are referred to as Undeclared students. The recommended course pattern for Undeclared students is provided in the Undeclared entry of the Programs section of this Calendar. Undeclared students normally must apply to enter a program before beginning their second year of study. The Science Student Success Centre (SSSC) provides Undeclared students guidance to the appropriate support services in making this decision.

Change of Program within the B.Sc. Degree

Students may transfer to a program within the B.Sc. degree if upon entry to the new program they would be in good academic standing.

Other applications for change of program will be considered on their merits; students may be accepted in the new program in Good Standing or on Academic Warning.

Applications to declare or change their program within the B.Sc. Degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may add a minor, concentration or specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a minor, concentration or specialization requires that the student be in Good Standing and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of experimental science chosen from two different departments or institutes from the list below:

### Course Categories for B.Sc. Programs

#### Science Geography Courses
- **GEOG 1010 [0.5]** Global Environmental Systems
- **GEOG 2006 [0.5]** Introduction to Quantitative Research
- **GEOG 2013 [0.5]** Weather and Water
- **GEOG 3003 [0.5]** Quantitative Geography
- **GEOG 3010 [0.5]** Field Methods in Physical Geography
- **GEOG 3102 [0.5]** Geomorphology
- **GEOG 3103 [0.5]** Watershed Hydrology
- **GEOG 3104 [0.5]** Principles of Biogeography
- **GEOG 3105 [0.5]** Climate and Atmospheric Change
- **GEOG 3106 [0.5]** Aquatic Science and Management
- **GEOG 4000 [0.5]** Soil Properties
- **GEOG 4005 [0.5]** Field Studies
- **GEOG 4013 [0.5]** Directed Studies in Geography
- **GEOG 4017 [0.5]** Global Biogeochemical Cycles
- **GEOG 4101 [0.5]** Two Million Years of Environmental Change
- **GEOG 4102 [0.5]** Water Resources Engineering
- **GEOG 4103 [0.5]** Microclimatology
- **GEOG 4108 [0.5]** Permafrost

#### Science Psychology Courses
- **PSYC 2001 [0.5]** Introduction to Research Methods in Psychology
- **PSYC 2002 [0.5]** Introduction to Statistics in Psychology
- **PSYC 2700 [0.5]** Introduction to Cognitive Psychology
- **PSYC 3000 [1.0]** Design and Analysis in Psychological Research
- **PSYC 3506 [0.5]** Cognitive Development
- **PSYC 3700 [1.0]** Cognition (Honours Seminar)
- **PSYC 3702 [0.5]** Perception
- **PSYC 2307 [0.5]** Human Neuropsychology I
- **PSYC 3307 [0.5]** Human Neuropsychology II

#### Science Continuation Courses
A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student’s major discipline, and is chosen from the following:

- **BIOC (Biochemistry)**
- **BIOL (Biology)** Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives
- **CHEM (Chemistry)** except CHEM 1003, CHEM 1004 and CHEM 1007
- **COMP (Computer Science)** except COMP 1001
- **ERTH (Earth Sciences)** except EERTH 2415, except EERTH 2415, except EERTH 2415, except EERTH 2415.
- **HLTH (Health Sciences)** except HLTH 1010, HLTH 2415, and HLTH 2415.
- **ISAP (Interdisciplinary Science Practice)**
- **MATH (Mathematics)**
- **NEUR (Neuroscience)**
- **PHYS (Physics)** except PHYS 1010, PHYS 1902, PHYS 1905, PHYS 2903
- **STAT (Statistics)**
- **TSES (Technology, Society, Environment)** Biology students may use these courses only as free electives.

#### Advanced Science Faculty Electives
Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from:

- **ENS (Environmental Science)**
- **FOOD (Food Science and Nutrition)**
- **GEOM (Geomatics)**
- **HLTH (Health Sciences)**
- **ISAP (Interdisciplinary Science Practice)**
- **MATH (Mathematics)**
- **NEUR (Neuroscience)**
- **PHYS (Physics)** except PHYS 1901, PHYS 1902, PHYS 1905, PHYS 2903
- **STAT (Statistics)**
- **TSES (Technology, Society, Environment)** Biology students may use these courses only as free electives.

#### Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)

---

UNOFFICIAL 2021-22 Undergraduate Calendar  53
All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). NSCI 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives
Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

Social Work

Degree
• B.S.W. (Honours)

Admission Requirements
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.

Although it is not an admission requirement, a 4U course in English is strongly recommended. Preference will be given to applicants with human service work experience, which may be met by employment and/or volunteer experience. Applicants will be requested to complete a personal information document that will assist in the evaluation of their suitability for the program.

Advanced Standing
Students who meet the Faculty Honours continuation standards will be considered for transfer into the second year of the B.S.W. program when spaces are available. Students who have completed an undergraduate degree are normally admitted into the program with Third-year standing.

Community College Applicants
Articulation agreements between the School of Social Work at Carleton University and several community colleges have been negotiated to facilitate the application of their graduates in their human or social service worker programs to Carleton's Bachelor of Social Work. Agreements have been established with Algonquin College, Sir Sandford Fleming College and St. Lawrence College (Cornwall and Kingston). Contact the School for more details.

Certificate in Carillon Studies

Admission Requirements
To be eligible for admission to the Certificate in Carillon Studies, applicants must have:

• Successful audition (a minimum piano proficiency level equivalent to Royal Conservatory of Music Grade 9 is expected);
• Grade II Theory Rudiments, Royal Conservatory of Music (or equivalent);
• Approval of the relevant SSAC/Music Associate Performance Instructor (normally the Dominion Carillonneur);
• Approval of the Music Program.

Certificate in Multidisciplinary Studies in Mental Health and Well-Being

Admission Requirements
To be eligible for admission to the Certificate in Multidisciplinary Studies in Mental Health and Well-Being, applicants must:

• have successfully completed any undergraduate degree, or;
• meet the admission requirements for the Bachelor of Arts, or;
• be currently enrolled and in Good Standing in any degree offered at Carleton

Note: Students who are currently enrolled in, or have graduated from, a degree in Psychology with the Stream in Mental Health and Well-Being are not eligible for this program. Students who hold a degree in Psychology may be required to take additional credits to fulfill the
Certified residency requirement; see Section 2.2.2 of the Academic Regulations of the University, Minimum Number of Residency Credits.

Certificate in Nunavut Public Service Studies

Certificate
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais) with a grade of 60 percent or higher. For applicants whose first language is not English, the requirement of 4U English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar. Special consideration will be extended to other applicants under Mature Applicant regulations (see Mature and Special Admissions, in the Admissions Regulations and Procedures section of this Calendar).

Candidates may be admitted with advanced standing, but must take at least 3.0 credits for the Certificate from Carleton University.

Certificate in Professional Writing (C.P.W.)

Admission Requirements
To be eligible for admission to the Certificate in Professional Writing, applicants must present:

• Second-year standing in any Honours degree, excluding the English BA Honours Concentration in Creative Writing or the English BA Honours Concentration in Drama Studies;
• A Major CGPA of 7.5 or higher;
• A statement of purpose and a sample of their academic or professional writing, and;
• Permission of the Professional Writing Program.

Certificate in Science and Policy

Admission Requirements
To be eligible for admission to the Certificate in Science and Policy, applicants must have:

• Successfully completed a college diploma or equivalent with a minimum average grade of B, or;
• Current enrolment in an Honours degree or Bachelor of Engineering degree, with completion of a minimum of 4.0 credits, and a minimum CGPA of 7.0.

Placement in the Science or non-Science pathway will be assessed at the time of admission.

Certificate in the Teaching of English as a Second Language (CTESL)

Admission Requirements (C.T.E.S.L.)
To be eligible for admission to the 5.0 credit CTESL program students must have already obtained a degree and have extensive experience in teaching, or are registered in an Honours degree at Carleton University with an overall CGPA of 7.00 (B-) or higher. Students registered in the concurrent CTESL program who fail to complete their degree cannot receive the CTESL.

Post-Baccalaureate Diploma

Admission

• Students must normally have an undergraduate degree in the discipline or in a related discipline with an overall GPA of 8.0 or higher,
• OR admission by permission of a department, school, or institute.

Students may be required to present completed university-level courses with minimum grade requirements.

Access to Courses
Upon admission to a post-baccalaureate diploma, students may register for all diploma/discipline-specific courses without presenting prerequisite courses that are not components of the diploma. Note that for specific diplomas the permissions in courses outside of the discipline must be arranged in advance.

A co-operative education option is not available in conjunction with a post-baccalaureate diploma.

Post-Baccalaureate Diploma in Accounting

Diploma

• Post-Baccalaureate Diploma in Accounting

Normally, students are required to have completed an undergraduate degree with a minimum B- average or higher, and have completed BUSI 1004 and BUSI 1005 (or equivalent) with a grade of C or higher.

Post-Baccalaureate Diploma in Cognitive Science

Diploma

• Post-Baccalaureate Diploma in Cognitive Science

Admission to this program requires the permission of the Department of Cognitive Science. Normally, students are required to have completed an undergraduate degree with a minimum B average or higher to be admitted. Applications will be reviewed on a case-by-case basis.

Post-Baccalaureate Diploma in Economics

Diploma

• Post-Baccalaureate Diploma in Economics
To be eligible for admission to the Post-Baccalaureate Diploma in Economics students must normally have:

1. an undergraduate degree with a GPA of 9.0 or higher, preferably with honours,
2. successfully completed university-level introductory (micro- and macro-) economics, calculus, and linear algebra with a grade of C+ or higher in each, and
3. permission of the Department of Economics.

Students may be granted advanced standing to a maximum of 1.0 credit. Advanced standing does not negate the 3.0 credit residency requirement.

Note: students who already hold an honours undergraduate degree in economics are encouraged to apply for admission to graduate programs in economics through the Graduate Admissions web site at graduate.carleton.ca.

Post-Baccalaureate Diploma in Professional Writing

Diploma
• Post-Baccalaureate Diploma in Professional Writing

To be eligible for admission to the Post-Baccalaureate Diploma in Professional Writing students must normally present an honours undergraduate degree with a GPA of 8.0 or higher.

Co-operative Education

Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy

Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton’s co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student’s responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:
1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

**Voluntary Withdrawal from the Co-op Option**

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

**International Students**

All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit.

Students are advised to discuss the application process and requirements with the International Student Services Office.

**Co-op Admission and Continuation Requirements by Program**

**B.A. Honours Anthropology**

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Registered in the B.A. Honours Anthropology Program;
2. Have a minimum overall CGPA of 7.0 and major CGPA of 8.0 in the first two years of academic study;
3. Successfully completed, by the start-date of the first work term, the required first-year courses, second-year courses, and any two of ANTH 3005, ANTH 3007 or ANTH 3008.

Students in B.A. Honours Anthropology must successfully complete three (3) work terms to obtain the Co-op designation.

B.Sc. Honours Geophysics
• Maintain full-time status in each study term (2.0 credits);
• Be eligible to work in Canada (for off-campus work)
• Have successfully completed COOP 1000 [0.0]

In addition to the following:
1. Registered in the Bachelor of Arts Honours or Bachelor of Science Honours in Geophysics;
2. Obtained and maintained an overall minimum CGPA of 9.5 and a major CGPA of 9.5;
3. Have obtained third-year standing;
4. Successfully completed, by the start-date of the first work term:
   a. the required second-year methods courses in their program (GEOG 2005/ENST 2005, GEOG 2006/ENST 2006)
   b. the required field course in their program (ENST 3900/GEOG 3000/GEOG 3010/GEOG 3030)
5. Be registered as a full-time student.
B.A. and B.Sc. Honours Geophysics students must successfully complete three (3) work terms to obtain the co-op designation.

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to:

Students in any of these programs (excluding Biostatistics) must satisfy the following:
1. Completion of 5.0 or more credits (at least 2.0 in Mathematics/Statistics) at Carleton in any Honours program (excluding Biostatistics), or the Combined B.Math./M.Sc. ("Fast Track") programs, offered by the School of Mathematics and Statistics
2. A major CGPA of 8.00 or higher and an overall CGPA of 6.50 or higher

Students in the B.Math. (Combined Honours) Biostatistics program must satisfy the following:
1. Full-time student in the B.Math. Biostatistics program;
2. An overall CGPA of 8.00 or higher;
3. Successfully completed all required first year courses before beginning the first work term
4. Students must be eligible for third-year standing when they return for a study term after their first work term.

Students in these programs must successfully complete four (4) work terms to obtain the co-op designation.

UNOFFICIAL 2021-22 Undergraduate Calendar 67
### Bachelor of Media Production and Design

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed MPAD 2002 before beginning the first work term.

In addition to the following:

1. Registered as a full-time student in the Bachelor of Media Production and Design program;
2. Successfully completed MPAD 2002 before beginning the first work term.
3. Obtained and maintained an overall CGPA of 9.00 or higher.

Bachelor of Media Production and Design students must successfully complete three (3) work terms to obtain the Co-op designation.

**Work Term Course:** MPAD 3999

### Enriched Support Program/Indigenous Enriched Support Program

**Centre for Initiatives in Education**

**Faculty of Arts and Social Sciences**

1516 Dunton Tower

Telephone: 613-520-2804

Fax: 613-520-2515

carleton.ca/esp
carleton.ca/iesp

### General Information

The Enriched Support Program (ESP) is operated by the Centre for Initiatives in Education (CIE). The ESP is a program for students whose academic potential has not been realized in high school and who do not meet university admission requirements. The program gives these students the opportunity to demonstrate their abilities within the context of university-level courses.

ESP students attend three credits with regularly admitted students and are graded according to the same standards. ESP students also enrol in mandatory, content-related workshops designed to provide the academic support these students need to make the transition to university-level work. An Indigenous Enriched Support Program (IESP) within the ESP offers personalized support to Indigenous students.

All currently registered and prospective ESP students (see Student Classification, below) should contact the CIE for application and registration information.

### Admission to the ESP

Students wishing to apply for admission to the ESP should contact the CIE directly. For details and an application form, visit: carleton.ca/esp

ESP Student Classification: ESP students fall under the Special Student designation at Carleton University. Special students are those who have not been admitted to a degree program but who are taking degree-credit courses to qualify for admission.

### Bachelor of Public Affairs and Policy Management

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Registered as a full-time student in the B.P.A.P.M. program;
2. Obtained an overall CGPA of 9.00 or higher calculated on at least 5.0 credits.

Students in the Bachelor of Public Affairs and Policy Management must successfully complete three (3) work terms to obtain the co-op designation.

**Work Term Course:** PAPM 3999

ESP Students
Under the Special Student designation, ESP students enrol in the same courses and meet the same course requirements as students in degree programs. ESP students choose their credits from a specific selection of ESP supported courses.

Registrarial services for ESP students are provided by the Centre for Initiatives in Education and the Registrar’s Office. ESP students are also encouraged to consult the appropriate Faculty regulations for information about degree programs they intend to apply for upon successful completion of the ESP.

Proficiency in English
Since the instructional language of the University is English, applicants to the ESP must be able to understand and be understood in English, both written and oral. See section 4, English as a Second Language Requirements (ESLR), in the General Admissions Requirements and Procedures for the statement of policy governing English language requirements for non-native speakers.

Course Load
Normally, ESP students may enrol in a maximum of 3.0 credits per academic session (fall/winter) and no more than the equivalent of 1.5 credits (e.g. three half-credit courses) in any one term. Course selection is limited to ESP-designated courses, many of which emphasize reading and writing skills. For two of these courses, students also attend regular weekly small-group workshops, where they are given extra support and guidance in dealing with the course material. The workshops are designed to develop the skills and strategies necessary for university-level critical thinking, analysis, reading and writing.

ESP-Supported Courses
ESP students wishing to be admitted eventually to a degree program are advised to note the specific Faculty requirements for course selection and the admission requirements as they are listed in this Calendar. Individuals seeking admission who need further information should inquire at Admissions Services or the ESP Student Advisory Office.

Course Change and Course Withdrawal
Students must contact an ESP Advisor for assistance with course changes and withdrawals.

Deferred Final Examinations
Please consult the Academic Regulations of the University section of this Calendar.

Financial Assistance
ESP students interested in obtaining financial assistance are advised to contact the Student Awards Office at 613-520-3600.

Admission to a Degree Program upon Completion of ESP
ESP students are subject to the same admission requirements as Special Students. These requirements are outlined in the following section of this Calendar:

General Admission Requirements and Procedures, 17. Special Studies (Non-Degree).

Glossary

Admission to a Degree Program upon Completion of ESP
ESP students are subject to the same admission requirements as Special Students. These requirements are outlined in the following section of this Calendar:

General Admission Requirements and Procedures, 17. Special Studies (Non-Degree).
Collaborative Specialization

At the graduate level the term “collaborative specialization” refers to an Option added to a degree program that provides an experience in a discipline or intellectual area in addition to that provided in the student's home program and meets the requirements identified by the Quality Council's corresponding definition.

Concentration

A program Element recorded on the transcript and diploma constituted by at least 3.5 credits of required courses at the undergraduate level and 1.5 credits of required courses at the Master's level that concentrates on a particular area of study within the program and provides the student with specific expertise, knowledge and/or practice. At the Doctoral level, a concentration is constituted by at least three curricular academic requirements, excluding the dissertation, residency and language requirements, that form a distinctive area of study related to the concentration.

Co-operative Education

An undergraduate or graduate Option comprising work periods combined with academic study to acquire work-related experience; the co-op option is intended to complement the student's academic study.

Core

A course or group of courses that are a subset of the courses that constitute a major in an undergraduate program. These are courses of special importance to undergraduate programs and are subject to specific CGPA requirements.

Cotutelle

An Option in any Ph.D. program. Doctoral students undertake to complete the requirements of a Ph.D. program in both their home university and a partner university in another country.

Course

A course is a unit of teaching that may count as credit towards a Credential. Courses typically last one academic term and focus on one subject area with a prescribed sequence of units of study (lectures, seminars, tutorials, workshops, laboratories, assignments, essays, tests, examinations and so on). Courses are delivered by one or more instructors and have a fixed roster of students. Courses have unique eight-character alphanumeric course codes, titles and descriptions. The credit value is indicated in square brackets following the course number.

Course Numbering

The first number in a course designation (e.g. 0000, 1000, 2000, 3000, 4000) indicates the knowledge level of a course and not the year of registration or year standing one requires to enroll in it. One can enroll in any course provided one meets the prerequisites. Prerequisites come in many forms and combinations such as but not limited to year standing, completion of other courses, registration in a specific program, permission of the Department, and specific CGPA requirements. 0000-level courses are those that may be required to satisfy prerequisites. 1000-level courses are typically introductory or foundation level courses. 2000-level and 3000-level courses are typically intermediate to upper-intermediate level courses. 4000-level courses are typically advanced level courses. 5000 and 6000-level are graduate level courses.

Course Outline

Instructors are required to provide students in each course a written Course Outline (distributed in class or electronically), on or before the first teaching day for undergraduate courses, and before the last date for late registration for graduate courses. The course outline must specify all the elements that will contribute to the final grade, as well as the overall grade breakdown for the course.

Courses Set Aside

Courses that do not contribute to the fulfilment of graduation requirements within the student’s program:

1. Extra to the Degree (ETD): Passed credits that are in excess of the required credits;
2. No Credit for Degree (NCD): Passed credits that are ineligible for credit in the student’s program;
3. Forfeit: Repeated courses, course equivalencies, preclusions, and courses placed in this category by an academic standing committee or an appeal committee.

Credential

An academic qualification awarded by the University Senate upon successful completion of an academic program. All credentials are either degrees (bachelors, masters, or doctoral), diplomas, or certificates.

Credit

The academic value of a course (for example, 0.0, 0.5, 1.0, et cetera).

Credits Not in the Major

Credits Not in the Major are credits that must be taken in programs that require Credits Not in the Major from disciplines and intellectual areas other than those which constitute the discipline, disciplines or intellectual area of the major in such programs. Credits Not in the Major constitute one form of restricted electives.
Diploma Degree Academic Performance Evaluation, and graduate and undergraduate graduation requirements and distinctions. The CGPA may be used in assessments for scholarships, medals and other milestones. The CGPA is the average of grade points earned on all courses required for and counting towards graduation from the student’s current program (overall CGPA), or the average of grade points earned on a subset of such courses (for example, those constituting the Major or a Minor) at the time the CGPA is calculated.

Diploma Degree A Credential at the Bachelor, Master or Doctoral level awarded by the University Senate upon the successful completion of a prescribed set and sequence of program requirements at a specified standard of performance.

Diploma Post-baccalaureate Diploma: a stand-alone undergraduate credential for candidates already possessing a bachelor’s degree intended to: (a) qualify candidates for consideration for entry into a Master’s program; (b) bring a candidate who already possesses a bachelor’s degree up to a level of a bachelor’s degree of 20.0 credits or more in another discipline; (c) provide a candidate who already possesses a twenty-credit bachelor’s degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas; or, (d) provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

Post-baccalaureate diplomas are normally constituted by at least three and a maximum of five credits of advanced undergraduate courses.

Graduate Diploma:
Type 1: Awarded when a candidate admitted to a master’s program leaves the program after completing a certain proportion of the requirements. Students are not admitted directly to a Type 1 Diploma.

Type 2: Offered concurrently with a master’s or doctoral degree, the admission to which requires that the candidate be already admitted to the master’s or doctoral degree program. A Type 2 Diploma represents an additional, usually interdisciplinary, qualification of 2 to 3 credits.

Type 3: A stand-alone, direct-entry program of 2 to 3 credits, generally developed by a unit already offering a related master’s (and sometimes doctoral) degree, and designed to meet the needs of a particular clientele or market.

Dual Degree A Dual Degree program is a joint partnership at the undergraduate or Master’s level where a co-enrolment agreement exists between Carleton and another post-secondary institution. Students simultaneously complete a program at both institutions, receiving two diplomas. Students must meet the admission criteria and must fulfill all the program requirements of both institutions within the normal time to completion.

Element Elements are: (i) Undergraduate: majors, minors, concentrations, and specializations; there are a maximum number of elements that may be taken in conjunction with a program at the undergraduate level; (ii) Graduate: concentrations. Elements are recorded on the transcript and the diploma.

Equivalency Courses that are of equal credit value and which are considered to be similar enough that they always preclude one another and may serve interchangeably for the other in terms of prerequisites, co-requisites, and program requirements. These will be identified in the calendar as ‘Also Listed As’, and are commonly referred to as ‘cross-listed courses’.

Experiential Learning is the application of theory Learning and academic content to real-world experiences within the classroom, the community, or the workplace. It may be undertaken independently or in teams. It advances learning outcomes and encourages reflection and application of skills and knowledge in contexts that prepare students for the workplace and civil society.

Field A Field occurs only at the graduate level, and is defined as an identifiable area of research activity undertaken by a group of faculty of sufficient number.

Flex Term refers to the timing of delivery of ‘asynchronous’ on-line courses that are currently restricted to special students and in which they may register at any time. Special students may engage with the material of these courses at their own pace. The delivery of ‘asynchronous’ on-line courses does not therefore conform to the usual beginning and end of Carleton University terms.

Formative assessments are those assessments done during the course that act to provide feedback and guidance to the student in addition to assessing the student's performance.

Free electives are any approved credit course normally at the 1000-level or higher – including courses from the discipline, disciplines or intellectual areas that identify the major of the degree program in question – that may be taken to make up the number of credits required for the degree program in question.
Honours
An undergraduate Bachelor's program requiring a minimum of 20.0 credits that may demand a higher academic standard than a non-honours program. Pathways to completion may be constituted by a thesis, research essay, capstone project, or other significant project.

Internship
An internship is constituted through a course or sequence of courses that provides students with work experience directly related to the subject matter of their degree program. There are two types of undergraduate internships:
1. Program Internship: an Option constituted by a structured sequence of at least 4.0 credits of courses of different levels in an honours bachelors program taken in a work environment off-campus. A program internship provides students with extensive professional work experience directly related to the subject matter of their program.
2. Course Internship: an individual course within a degree program taken in a work environment either on- or off-campus that provides students with professional work experience directly related to the subject matter of their program.

Learning
Learning outcomes are discipline-specific statements that describe the observable skills or abilities associated with the essential knowledge, behaviours, and/or values all students are expected to acquire by the end of a course or program of study.

Letter of Permission
A formal document issued by the University Registrar approving a student to register in a course at another institution in lieu of a Carleton course in the student's academic program. The Letter of Permission must be issued before the student takes the course for credit in a Carleton program at another institution.

Major
A program Element recorded on the transcript and diploma. The major is constituted by the required course credits in one or more defined disciplines or intellectual areas that define the principle focus of a student's undergraduate program and constitute the basis for the calculation of the Major CGPA.

Minor
A program Element at the undergraduate level recorded on the transcript and diploma. A minor is a structured set of credits that form a distinct subset of a program or intellectual area. Each Minor requires at least 4.0 and at most 5.0 credits. Access to minors may be restricted. A minor introduces a student to, or extends their knowledge of, a discipline or intellectual area.

Option
An optional addition to or component of a program with requirements distinct from those of an Element: (i) Undergraduate: co-operative education, study abroad, Mention Francais, program internship; (ii) Graduate: co-operative education, Cotutelle (in Ph.D. programs), Dual Master's Degree (in master's programs), collaborative specialization. Options may be taken in addition to elements and are recorded on the transcript and the diploma.

Pathway
A pathway through a program is a route to completion such as: stream, thesis, research essay, research project, or course only. Pathways may be chosen in addition to Elements and Options, and are not recorded on the diploma but are recorded on the transcript.

Practical Assessments
Practical assessments are those assessments, such as exams or term work, of a student's work where the tasks and conditions are similar to what they would experience in a work environment and are designed to complement their academic skills and competencies.

Prerequisite
A required course or courses that must be completed successfully before registering in the course that requires the prerequisite.

Preclusion
Courses that contain sufficient content in common that credit may not be earned for more than one of the courses. Courses that preclude one another are not necessarily considered equivalent and may or may not be interchangeable to fulfill program or specific element requirements.
Program

A specified combination of academic requirements in a discipline or intellectual area of study which leads to a credential (for example, B.A. in Philosophy, Ph.D. in History, M.Sc. in Chemistry, Graduate Diploma in Public Policy and Program Evaluation, Certificate in the Teaching of English as a Second Language).

There are five types of programs at the undergraduate level:

1. Single-Discipline Program: A Single-Discipline program is a program of at least 15.0 credits in which the courses that constitute the program’s major are drawn overwhelmingly from one discipline or intellectual area.

2. Thematic Program: A Thematic program is an interdisciplinary program of at least 15.0 credits that concentrates on a particular interdisciplinary intellectual area or theme, and draws on courses within its major from at least three disciplines or intellectual areas.

3. Single-Discipline Honours Program: A Single-Discipline Honours program is a program of at least 20.0 credits in which the courses that constitute the program’s major are drawn overwhelmingly from one discipline or intellectual area. Pathways to completion constituted by a thesis, research essay or significant project may demand a higher academic standard than a course-based pathway.

4. Combined Honours Program: A Combined Honours program is a program of at least 20.0 credits in which a student fulfils the requirements for combined honours majors in two such majors from two different programs. Pathways to completion constituted by a thesis, research essay or significant project may demand a higher academic standard than a course-based pathway.

5. Thematic Honours Program: A Thematic Honours program is an interdisciplinary program of at least 20.0 credits that concentrates on a particular interdisciplinary intellectual area or theme, and draws on courses within its major from at least three disciplines or intellectual areas. Pathways to completion constituted by a thesis, research essay or significant project may demand a higher academic standard than a course-based pathway.

Restricted

Elective

Restrictedelectives are courses required to fulfil elective requirements in an undergraduate program that are not free electives. The courses that may fulfil restricted elective requirements in any program are in other words prescribed by the program.

Students should refer to individual program descriptions to determine the courses that may fulfil restricted elective requirements for a program.

Specialization

At the graduate level only collaborative specializations exist. See definition for ‘collaborative specialization’.

At the undergraduate level, the term ‘specialization’ is reserved for specific areas of concentration in programs in which the courses constituting the program’s specializations are delivered overwhelmingly by academic units other than the academic unit administering the program.

Special Students not admitted to a program or a degree Studentsleading to a Credential.

Status

Full-time status for tuition fee purposes:

1. Undergraduate students are full-time when registered in a 60% course load per term as defined by the student’s academic program: for example, registered in at least 1.5 credits per term in a 2.5 credit normal term course load. Undergraduate students should consult the website of the Academic Advising Centre to determine their eligibility for various Provincial and University services according to the number of credits taken each term.

2. Graduate students are normally admitted and must stay continuously registered as full-time. Students may apply to the Dean of Graduate and Postdoctoral Affairs for exemption from full-time status in exceptional circumstances (for example, medical circumstances); exemptions are normally granted for one term.

Part-time status for tuition fee purposes:

1. Undergraduate students are part-time when registered in less than a 60% course load per term as defined by the student’s academic program (for example, registered in less than 1.5 credits per term).

2. Graduate students may be admitted as part-time students and will be required to continue and complete their program as part-time; a part-time student is not eligible to register in more than 1.25 credits per term, including audit courses.
Stream
A Pathway within an undergraduate program normally constituted by at least 1.5 credits of courses that facilitate concentration on a particular area of study within the program. Streams are not recorded on the diploma but are recorded on the transcript.

Summative Assessment
Summative assessments are those assessments of a student's work carried out at the end of a course or the end of specific components of a course whose sole purpose is to constitute a judgement on a student's performance in the course or a specific component of the course.

Transfer Credit
Academic credit granted for individual courses successfully completed at another institution, either upon admission (admitted with advanced standing from secondary school, or transfer from college or university) or while registered with a Letter of Permission or on exchange.

Transcript
The official record of a student's academic registration and accomplishments at Carleton University.

Undeclared Students
Undergraduate students admitted to a degree who have not chosen a program ('declared a major') within that degree; normally, students are required to choose a program ('declare a major') before reaching second-year standing.

Withdrawal
A formal process for discontinuing studies in a course or a program.

Undergraduate students who wish to drop all courses and terminate their registration in the academic program must follow the procedure available through the Registrar's Office. Students who have been away from the University for nine or more consecutive terms will be withdrawn and must re-apply for admission.

Graduate students who wish to drop all courses and terminate their registration in the academic program must notify their department in writing of their intention to withdraw. Students who do not register for three consecutive terms or do not register continuously in their thesis, research essay, or independent research project will be withdrawn and must re-apply for admission.

B.A. Combined Honours (20.0 credits)

A. Credits included in the African Studies Major CGPA (7.0 credits)

1. 1.0 credit from: Foundations
   - AFRI 1001 [0.5] Introduction to African Studies I
   & AFRI 1002 [0.5] Introduction to African Studies II
   or FYSM 1901 [1.0] Selected Topics in African Studies

2. 1.0 credit from: African Regions
   - AFRI 2002 [0.5] The Horn of Africa
   - AFRI 2003 [0.5] The Great Lakes Region of Africa
   - AFRI 2004 [0.5] North Africa
   - AFRI 2005 [0.5] West Africa
   - AFRI 2006 [0.5] Southern Africa

3. 1.0 credit from: Intermediate African Studies
   - AFRI 3001 [0.5] Globalization and Popular Culture in Africa
   - AFRI 3002 [0.5] Regions in Africa: Cultures, Society, Politics
   - AFRI 3003 [0.5] African Social and Political Thought
   - AFRI 3004 [0.5] The African City
   - AFRI 3005 [0.5] African Migrations and Diasporas
   - AFRI 3100 [0.5] African Studies Abroad: Selected Topics

4. 0.5 credit from: History
   - HIST 2706 [0.5] Ancient and Pre-Colonial Africa
   - HIST 2707 [0.5] Modern Africa
   - HIST 3717 [0.5] Gender and Sexuality in Africa
   - HIST 3906 [0.5] Topics in World History (African topic)

5. 0.5 credit from: Politics
   - PSCI 3100 [0.5] Politics of Development in Africa
   - PSCI 3101 [0.5] Politics of War in Africa
   - PSCI 4203 [0.5] Southern Africa After Apartheid
   - PSCI 4207 [0.5] Globalization, Adjustment and Democracy in Africa
   - PSCI 4802 [0.5] International Politics of Africa

6. 0.5 credit from: Anthropology
   - ANTH 2620 [0.5] Ethnography of Sub-Saharan Africa
   - ANTH 2660 [0.5] Ethnography of North Africa
   - ANTH 4620 [0.5] Advanced Studies in Anthropology

Note: only one of AFRI 3100 or AFRI 3900 can be used towards this requirement.
7. 0.5 credit from: Literature and Culture 0.5
   AFRI 3609/FLRS 3501 [0.5] Cinema
   ENGL 2926 [0.5] African Literatures I
   ENGL 2927 [0.5] African Literatures II
   FREN 4212 [0.5] Littératures francophones
   MUSI 4105 [0.5] Issues and Processes in African Music

8. 0.5 credit from: Context for African Studies 0.5
   AFRI 3100 [0.5] African Studies Abroad: Selected Topics
   AFRI 3900 [0.5] Placement
   AFRI 4900 [0.5] Tutorial in African Studies
   ANTH 2020/SOCI 2 Race and Ethnicity
   ANTH 2850 [0.5] Development and Underdevelopment
   ANTH 3020/SOCI 3 Studies in Race and Ethnicity
   ANTH 3025 [0.5] Anthropology and Human Rights
   ANTH 3800 [0.5] Studies in Applied and Participatory Anthropology
   ANTH 4020/SOCI 4 Advanced Studies in Race and Ethnicity
   CHST 3303 [0.5] Children’s Rights
   ECON 3508 [0.5] Introduction to Economic Development
   ECON 3509 [0.5] Development Planning and Project Evaluation
   ECON 3510 [0.5] African Economic Development
   ECON 4507 [0.5] The Economics of Development
   ECON 4508 [0.5] International Aspects of Economic Development
   ENGL 2957 [0.5] Literatures of the Americas II
   ENGL 3940 [0.5] Studies in Diaspora Lit.
   ENGL 4802 [0.5] Race, Ethnicity and Canadian Lit.
   ENGL 4975 [0.5] Issues in Postcolonial Theory
   GEOG 2200 [0.5] Global Connections
   GEOG 3209 [0.5] Sustainability and Environment in the South
   HIST 2312 [0.5] History of the Indian Ocean World
   HIST 2710 [0.5] Introduction to Caribbean History
   HIST 3111 [0.5] History of Humanitarian Aid
   HIST 3406 [0.5] African-American Women
   HIST 3710 [0.5] Themes in Caribbean History
   HUMR 3001 [0.5] Special Topics in Human Rights
   HUMR 3301 [0.5] Racialization, Racism and Human Rights
   HUMR 3303 [0.5] Children’s Rights
   HUMR 3401 [0.5] Histories of Persecution and Genocide
   LAWS 3602 [0.5] International Human Rights
   LAWS 4603 [0.5] Transitional Justice
   MUSI 2005 [0.5] Introduction to Jazz History
   MUSI 2008 [0.5] Music of the World’s Peoples
   MUSI 3106 [0.5] Popular Musics of the World
   MUSI 4005 [0.5] Issues in Jazz Studies
   PSCI 2102 [0.5] Comparative Politics of the Global South
   PSCI 3302 [0.5] Comparative Political Thought
   PSCI 3502 [0.5] Gender and Politics: Global South
   PSCI 3805 [0.5] Politics of Race
   PSCI 4104 [0.5] Development in the Global South - Theory and Practice
   PSCI 4105 [0.5] Selected Problems in Development in the Global South
   PSCI 4409 [0.5] Issues in Development Management
   PSCI 4505 [0.5] Transitions to Democracy
   RELI 2230 [0.5] Global Christianity
   SOWK 3206 [0.5] Community Development and Social Change in an International Context
   SOWK 3207 [0.5] Human Rights Practice in Civil Society
   TSES 4011 [0.5] Technology and Society: Development

Minor in African Studies (4.0 credits)

Requirements:
Open to all undergraduate students not in African Studies or in the B.G.In.S. Specialization or Stream in Africa and Globalization.

1. 1.0 credit in: Foundations
   AFRI 1001 [0.5] Introduction to African Studies I
   & AFRI 1002 [0.5] Introduction to African Studies II

2. 0.5 credit from: African Regions
   AFRI 2002 [0.5] The Horn of Africa
   AFRI 2003 [0.5] The Great Lakes Region of Africa
   AFRI 2004 [0.5] North Africa
   AFRI 2005 [0.5] West Africa
   AFRI 2006 [0.5] Southern Africa

3. 0.5 credit from: Intermediate African Studies
   AFRI 3001 [0.5] Globalization and Popular Culture in Africa
   AFRI 3002 [0.5] Regions in Africa: Cultures, Society, Politics
   AFRI 3003 [0.5] African Social and Political Thought
   AFRI 3004 [0.5] The African City
   AFRI 3005 [0.5] African Migrations and Diasporas

4. 0.5 credit from: History
   HIST 2706 [0.5] Ancient and Pre-Colonial Africa
   HIST 2707 [0.5] Modern Africa
   HIST 3717 [0.5] Gender and Sexuality in Africa
   HIST 3906 [0.5] Topics in World History (African Topic)

5. 0.5 credit from: Politics
   PSCI 3100 [0.5] Politics of Development in Africa
   PSCI 3101 [0.5] Politics of War in Africa

6. 0.5 credit from: Anthropology
   ANTH 2620 [0.5] Ethnography of Sub-Saharan Africa
   ANTH 2660 [0.5] Ethnography of North Africa

7. 0.5 credit from: Literature, Culture and Diaspora Studies
   AFRI 3609/FILM 361/African Cinema
   ENGL 2926 [0.5] African Literatures I
   ENGL 2927 [0.5] African Literatures II
   MUSI 2005 [0.5] Introduction to Jazz History

8. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits

B.A. Regulations
The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars
B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

Breadth Requirement
Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication
American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM,
Change of Program Within the B.A. Degree

Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

Mention : Français

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:
1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:
1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention : François requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Breadth Area 2: Humanities

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Subject codes: AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.
Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees
- Bachelor of Arts (B.A.)(Honours)
- Bachelor of Arts (B.A.)

First Year
*For B.A. and B.A. (Honours)*
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Advanced Standing

B.A. and B.A. (Honours) Program
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

African Studies (AFRI) Courses

AFRI 1001 [0.5 credit]
Introduction to African Studies I
Introduction to African studies, including history, geography, literature, and the arts.
Lecture three hours per week, or two-hour lecture and one hour discussion group per week.

AFRI 1002 [0.5 credit]
Introduction to African Studies II
Introduction to contemporary political, economic, and social dimensions of Africa.
Lecture three hours per week.

AFRI 2002 [0.5 credit]
The Horn of Africa
The economic, social and political challenges facing the Horn of Africa, placing them in historical and global context. These countries may be discussed: Djibouti, Eritrea, Ethiopia, Somalia, Sudan, South Sudan.
Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.
Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 2003 [0.5 credit]
The Great Lakes Region of Africa
The economic, social and political challenges facing the Great Lake Regions of Africa, including the 1994 Rwanda genocide and its aftermath. These countries may be discussed: Burundi, Democratic Republic of Congo, Kenya, Rwanda, Tanzania, Uganda.
Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.
Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 2004 [0.5 credit]
North Africa
The economic, social and political challenges facing Egypt and the Maghreb countries of North Africa, including the “Arab Spring”. These countries may be discussed: Algeria, Egypt, Libya, Morocco, Mauritania, Tunisia, Western Sahara.
Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.
Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 2005 [0.5 credit]
West Africa
The economic, social and political challenges facing countries of West Africa, including domestic issues and regional relations. These countries may be discussed: Benin, Burkina Faso, Cape Verde, Cote d’Ivoire, Gambia, Ghana, Guinea, Guinea Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone, Togo.
Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.
Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.
AFRI 2006 [0.5 credit]
Southern Africa
The economic, social and political challenges facing the countries of southern Africa, including the legacies of apartheid. These countries may be discussed: Angola, Botswana, Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, Seychelles, South Africa, Swaziland, Tanzania, Zambia, Zimbabwe.
Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.
Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 3001 [0.5 credit]
Globalization and Popular Culture in Africa
This course examines new popular life-worlds in Africa. Though potentially "elusive" to conceptualize, this course shows how these forms of popular culture are related to the role of youth culture and social media in an age of globalization and democratization.
Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.
Lecture three hours a week.

AFRI 3002 [0.5 credit]
Regions in Africa: Cultures, Society, Politics
Using dominant linguistic borderlines that have shaped much of the African experience in the last century, this course will look at themes cutting across culture, geography, society and politics in francophone, anglophone, lusophone and arabophone Africa.
Prerequisites (AFRI 2001 no longer offered).
Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.
Lecture three hours a week.

AFRI 3003 [0.5 credit]
African Social and Political Thought
The African communitarian tradition. Contemporary African social and political thought, situated in their broad historical contexts.
Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.
Lecture three hours a week.

AFRI 3004 [0.5 credit]
The African City
Historical emergence and contemporary issues of the African city.
Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.
Lecture three hours a week.

AFRI 3005 [0.5 credit]
African Migrations and Diasporas
Movements of African peoples, from the slave trade era to the present. African diaspora communities around the world and their relationship with Africa.
Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.
Lecture three hours a week.

AFRI 3007 [0.5 credit]
Special Topic in African Studies
A special topic related to African Studies, through one or more disciplinary lenses. Course content will vary from year to year.
Prerequisite(s): a 2000-level AFRI course or third-year standing and 1.0 credit in AFRI.
Lectures three hours a week.

AFRI 3100 [0.5 credit]
African Studies Abroad: Selected Topics
Based at one of Carleton’s partner universities in Africa, course will include lectures, seminars, guest speakers, field visits and group research projects to examine a topic in African studies, as selected by the instructor. Topic and location may change annually.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing and approval by the Director of the Institute of African Studies.

AFRI 3200 [0.5 credit]
Thematic Topic
A special topic that takes a thematic approach to African Studies. Course content will vary from year to year.
Prerequisite(s): a 2000-level AFRI course or third-year standing and 1.0 credit in AFRI.
Lectures three hours a week.

AFRI 3609 [0.5 credit]
African Cinema
Major moments, debates, figures and movements in African cinema around such categories as the colonial, the anti-colonial, the postcolonial, the national, the continental, the diasporic, the global, race, Afro-futurism, and world cinema, interrogating in the process the very category of “African cinema.”
Also listed as FILM 3609.
Prerequisite(s): 1.0 credit in FILM and third year standing or permission of instructor.
Lecture and screening three hours a week, lecture one hour a week.

AFRI 3900 [0.5 credit]
Placement
Placement for one term with an African focus.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the Institute of African Studies.

AFRI 3916 [0.5 credit]
Spoken Word Poetry Workshop
This intermediate-level workshop-based course explores traditions of spoken words poetry while requiring students to create and perform their own spoken word poems.
Includes: Experiential Learning Activity
Also listed as ENGL 3916.
Prerequisite(s): third-year standing or a 2000-level writing workshop and permission of the instructor.
Workshops three hours a week.
AFRI 4000 [0.5 credit]  
Advanced Topics in African Studies  
Seminar examining a specialized topic in African studies. The topic will vary from year to year.  
Prerequisite(s): fourth-year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.  
Seminar three hours per week.

AFRI 4003 [0.5 credit]  
History of 'The African Child'  
Students will analyze the history of the figure of 'the African child' using a range of visual, sources from colonial officials, anthropologists, historians, advertisers, charity and development workers, and African children themselves.  
Includes: Experiential Learning Activity  
Also listed as CHST 4003.  
Precludes additional credit for CHST 4001 if taken in 2014-15.  
Prerequisite(s): fourth-year standing.  
Seminar three hours a week.

AFRI 4050 [0.5 credit]  
Selected Topics in African Studies  
Selected topics in African studies not ordinarily treated in the regular course program. The choice of topic varies from year to year. Students should check with the institute regarding the topic offered.  
Prerequisite(s): fourth-year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.  
Also offered at the graduate level, with different requirements, as AFRI 5050, for which additional credit is precluded.  
Seminar three hours per week.

AFRI 4060 [0.5 credit]  
African Feminisms  
African feminisms as theoretical interventions and as political practice, and as diverse forms. Gender as a marker of power: status, hierarchy, social capability, and as a system of distribution of resources, responsibilities and solidarities.  
Prerequisite(s): fourth-year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies.  
Also offered at the graduate level, with different requirements, as AFRI 5060, for which additional credit is precluded.  
Seminar three hours per week.

AFRI 4900 [0.5 credit]  
Tutorial in African Studies  
A tutorial on selected topics in which seminars are not available.  
Prerequisite(s): Permission of the Institute of African Studies and agreement of an instructor.

American Sign Language (Minor)  
This section presents the requirements for programs in:  
- Minor in American Sign Language

Minor in American Sign Language (4.0 credits)  
Open to all undergraduate degree students.  
Requirements:  
1. 3.0 credits in ASLA  
2. 1.0 credit in ASLA at the 3000-level or higher  
3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language  
4. The remaining requirements of the major discipline(s) and degree must be satisfied.  
Total Credits 4.0

Placement for Language Students  
Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering. Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency. Students should note that they cannot go backward in a sequence of levels in language courses.  

Regulations  
In addition to the requirements listed here, students must satisfy:  
1. the University regulations including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

American Sign Language (ASLA) Courses  
Placement for Language Students  
Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering. Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency. Students should note that they cannot go backward in a sequence of levels in language courses.
ASLA 1010 [0.5 credit]
First-Year American Sign Language I
For students with little or no knowledge of the language or culture of deaf people. Basic communicative competence in American Sign Language. Anthropological, sociolinguistic, and sociocultural aspects of deaf culture. Compulsory attendance. Precludes additional credit for ASLA 1110. Four hours a week.

ASLA 1020 [0.5 credit]
First-Year American Sign Language II
Continuation of first-year American Sign Language. Basic communicative competence plus anthropological, sociolinguistic, and sociocultural aspects of deaf culture. Compulsory attendance. Precludes additional credit for ASLA 1110. Prerequisite(s): grade of C or higher in ASLA 1010, or permission of the School. Four hours a week.

ASLA 1110 [1.0 credit]
Intensive First-Year American Sign Language
For students with little or no knowledge of the language or culture of deaf people. Basic communicative competence in American Sign Language. Anthropological, sociolinguistic, and sociocultural aspects of deaf culture. Compulsory attendance. Precludes additional credit for ASLA 1110. Prerequisite(s): grade of C or higher in ASLA 1010 or ASLA 1020. Eight hours a week (one term).

ASLA 2010 [0.5 credit]
Second-Year American Sign Language I
Study of American Sign Language beyond the elementary level. Study of targeted lexical and grammatical features, as well as specific conversational skills. Further exploration of the culture of deaf people. Compulsory attendance. Precludes additional credit for ASLA 2110. Prerequisite(s): grade of C or higher in ASLA 1020, ASLA 1110, or permission of the School. Four hours a week.

ASLA 2020 [0.5 credit]
Second-Year American Sign Language II
Continuation of second-year American Sign Language. Study of targeted lexical and grammatical features, as well as specific conversational skills. Further exploration of the culture of deaf people. Compulsory attendance. Precludes additional credit for ASLA 2110. Prerequisite(s): grade of C or higher in ASLA 2010, or permission of the School. Four hours a week.

ASLA 2110 [1.0 credit]
Intensive Second-Year American Sign Language
Further study of American Sign Language to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Precludes additional credit for ASLA 2010 and ASLA 2020. Prerequisite(s): grade of C or higher in ASLA 1020 or ASLA 1110, or permission of the School. Eight hours a week (one term).

ASLA 3010 [0.5 credit]
Third-Year American Sign Language I
Receptive and expressive mastery of grammar and lexicon of American Sign Language. Advanced conversation skills across different registers. Advanced insight into the culture of the deaf community. Compulsory attendance. Prerequisite(s): grade of C or higher in ASLA 2010, ASLA 2110, or permission of the School. Three hours a week.

ASLA 3020 [0.5 credit]
Third-Year Advanced American Sign Language II
Continuation of third-year American Sign Language. Receptive and expressive mastery of grammar and lexicon of American Sign Language. Advanced conversation skills across different registers. Advanced insight into the culture of the deaf community. Compulsory attendance. Prerequisite(s): grade of C or higher in ASLA 3010, or permission of the School. Three hours a week.

ASLA 4010 [0.5 credit]
Fourth-Year American Sign Language I
Focus on the development of receptive and productive skills above what is expected in everyday conversation. Skills in specific contexts such as social services, health, business and government. Compulsory attendance. Prerequisite(s): grade of C or higher in ASLA 3020, or permission of the School. Three hours a week.

ASLA 4020 [0.5 credit]
Fourth-Year American Sign Language II
Continuation of fourth-year American Sign Language. Focus on the development of receptive and productive skills above what is expected in everyday conversation. Skills in specific contexts such as social services, health, business and government. Compulsory attendance. Prerequisite(s): grade of C or higher in ASLA 4010, or permission of the School. Three hours a week.
ASLA 4900 [1.0 credit]
Independent Study
Research in a topic in American Sign Language or deaf culture under the supervision of a member of the School.
Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the Minor in American Sign Language, grade of C or higher in ASLA 4020 or equivalent, or permission of the School.

ASLA 4901 [0.5 credit]
Independent Study
Research in a topic in American Sign Language or deaf culture under the supervision of a member of the School.
Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the Minor in American Sign Language, grade of C or higher in ASLA 4020 or equivalent, or permission of the School.

Anthropology
This section presents the requirements for programs in:
• Anthropology B.A. Honours
• Anthropology B.A. Combined Honours
• Anthropology B.A.
• Specialization in Globalization, Culture and Power B.G.In.S. Honours
• Stream in Globalization, Culture and Power B.G.In.S.
• Minor in Anthropology
• Minor in Community Engagement

Program Requirements
Bachelor of Arts
Anthropology
B.A. Honours (20.0 credits)
A. Credits Included in the Major CGPA (9.0 credits):
1. 0.5 credit from:
   ANTH 1001 [0.5] Introduction to Socio-Cultural Anthropology
   or ANTH 1002 [0.5] Introduction to Issues in Anthropology
2. 2.0 credits in:
   ANTH 2001 [1.0] Foundations in Socio-Cultural Anthropology
   ANTH 4900 [1.0] Honours Research Paper in Anthropology (with a minimum 9.0 GPA or permission of instructor, or 1.0 credit in ANTH courses at the ANTH 3000-level or above).
3. 1.0 credit from: ANTH 2600 series
4. 1.5 credits in:
   ANTH 3005 [0.5] Ethnographic Research Methods
   ANTH 3007 [0.5] History of Anthropological Theory
   ANTH 3008 [0.5] Contemporary Theories in Anthropology
5. 1.5 credits in ANTH at the 1000 level and above
6. 1.0 credit in ANTH and/or SOCI at the 2000 or above
7. 1.5 credits in ANTH and/or SOCI at the 4000 or 5000 Level

B. Credits Not Included in the Major CGPA (11.0 credits):
7. 0.5 credit in:
   SOCI 1001 [0.5] Introduction to Sociology I
8. 8.0 credits not in SOCI or ANTH
9. 2.5 credits in free electives
Total Credits 20.0

B.A. Combined Honours (20.0 credits)
A. Credits Included in the Anthropology Major CGPA (7.0 credits):
1. 0.5 credit from:
   ANTH 1001 [0.5] Introduction to Socio-Cultural Anthropology
   or ANTH 1002 [0.5] Introduction to Issues in Anthropology
2. 1.0 credit in:
   ANTH 2001 [1.0] Foundations in Socio-Cultural Anthropology
3. 1.0 credit from ANTH 2600 series
4. 1.5 credits in:
   ANTH 3005 [0.5] Ethnographic Research Methods
   ANTH 3007 [0.5] History of Anthropological Theory
   ANTH 3008 [0.5] Contemporary Theories in Anthropology
5. 0.5 credit in ANTH at the 1000-level and above
6. 0.5 credit in ANTH and/or SOCI at the 2000 or above
7. 1.0 credit in ANTH and/or SOCI at the 4000 or 5000 level
8. 1.0 credit in:
   ANTH 4900 [1.0] Honours Research Paper in Anthropology (with a minimum 9.0 GPA or permission of instructor, or 1.0 credit in ANTH courses at the ANTH 3000-level or above.)
   or
   1.0 credit in ANTH at the 1000-level or higher if an Honours Essay is completed in the other discipline
9. The requirements for the other discipline must be satisfied
10. Sufficient credits in free electives to make 20.0 credits for the degree
11. Students are required to complete an Honours Essay. In those cases where the second discipline does not require an Honours Essay, alternative arrangements may be considered by the Co-ordinator of Honours (Anthropology)
Total Credits 20.0

B.A. (15.0 credits)
A. Credits Included in the Major CGPA (6.0 credits)
1. 0.5 credit from:
   ANTH 1001 [0.5] Introduction to Socio-Cultural Anthropology
   ANTH 1002 [0.5] Introduction to Issues in Anthropology
2. 1.0 credit in:
   ANTH 4900 [1.0] Honours Research Paper in Anthropology (with a minimum 9.0 GPA or permission of instructor, or 1.0 credit in ANTH courses at the ANTH 3000-level or above.)
   or
   1.0 credit in ANTH at the 1000-level or higher if an Honours Essay is completed in the other discipline
9. The requirements for the other discipline must be satisfied
10. Sufficient credits in free electives to make 20.0 credits for the degree
11. Students are required to complete an Honours Essay. In those cases where the second discipline does not require an Honours Essay, alternative arrangements may be considered by the Co-ordinator of Honours (Anthropology)
Total Credits 20.0

86 The Academic Year (Graduate and Undergraduate Studies)
### Stream in Globalization, Culture and Power

#### B.G.In.S. (15.0 credits)

**A. Credits Included in the Major CGPA (8.0 credits):**

1. **4.0 credits in:** Core Courses
   - ANTH 1000 [0.5] Global History
   - GINS 1010 [0.5] International Law and Politics
   - GINS 1020 [0.5] Ethnography, Globalization and Culture
   - GINS 2000 [0.5] Ethics and Globalization
   - GINS 2010 [0.5] Globalization and International Economic Issues
   - GINS 2020 [0.5] Global Literatures
   - GINS 3010 [0.5] Global and International Theory
   - GINS 3020 [0.5] Places, Boundaries, Movements and Global Environmental Change

2. **4.0 credits from:** the Stream
   - **Foundations**
     - ANTH 1001 [0.5] Introduction to Socio-Cultural Anthropology
     - ANTH 1002 [0.5] Introduction to Issues in Anthropology
     - ANTH 2001 [1.0] Foundations in Socio-Cultural Anthropology
     - ANTH 3005 [0.5] Ethnographic Research Methods
   - **Culture and Globalization**
     - ANTH 2850 [0.5] Development and Underdevelopment
     - ANTH 3010 [0.5] Language, Culture, and Globalization
     - ANTH 3027 [0.5] Studies in Globalization and Human Rights
     - ANTH 3040 [0.5] The Global Middle Class
     - ANTH 3045 [0.5] Children and Childhood in a Globalized World

#### B. Credits Not Included in the Major CGPA (8.0 credits)

1. **4.0 credits in:** Free Electives
2. **8.0 credits in:** Core Honours Seminars
3. **7.0 credits in:** Free Electives

#### C. Additional Requirements

- The Language requirement must be met.
- The International Experience requirement must be met.
- The Language requirement must be met.

### Minor

#### Minor in Anthropology

Open to all undergraduate degree students in programs other than Anthropology or the B.G.In.S. Specialization or Stream in Globalization, Culture and Power. Students in any Sociology major should select courses carefully if they wish to use courses from the major in their minor Anthropology. Such students should always consult the department.
Requirements
1.  0.5 credit from: 0.5
   ANTH 1001 [0.5] Introduction to Socio-Cultural Anthropology
   or ANTH 1002 [0.5] Introduction to Issues in Anthropology
2.  1.0 credit in: 1.0
   ANTH 2001 [1.0] Foundations in Socio-Cultural Anthropology
3.  2.5 credits in ANTH at the 2000-level or above 2.5
4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Minor in Community Engagement (4.0 credits)
This minor is open to all undergraduate degree students in any program. Students in any Sociology or Anthropology major should select courses carefully if they wish to use courses from the major in their minor. Such students should always consult the department.

Requirements:
1.  0.5 credit from: 0.5
   ANTH 2180 [0.5] Foundations in Community Engagement
SOCI 2180 [0.5] Foundations in Community Engagement
2.  0.5 credit from: 0.5
   ANTH 4171 [0.5] Community Engagement Capstone
SOCI 4171 [0.5] Community Engagement Capstone
3.  1.0 credit from: 1.0
   Engaging the Community courses:
AFRI 3900 [0.5] Placement
ANTH 4000 [0.5] Field Placement in Anthropology
ANTH 4100 [0.5] Ethnographic Field Course
ARTH 3701 [0.5] Art and Architecture on Site
ARTH 4701 [0.5] Art and Architecture on Site
CDNS 1101 [0.5] Ottawa: Exploring National Institutions
CDNS 4800 [1.0] Internship Practicum
CRCJ 3901 [1.0] Practicum in Criminology I
CRCJ 3902 [1.0] Practicum in Criminology II
DIGH 4005 [0.5] Digital Humanities Practicum
ENST 4450 [0.5] Community-Engaged Research
GEOG 3030 [0.5] Regional Field Excursion
GEOG 4000 [0.5] Field Studies
GEOG 4450 [0.5] Community-Engaged Research
GINS 3100 [0.5] Global and International Group Project
GINS 3200 [0.5] Experiential Learning Abroad
GINS 3900 [0.5] International Placement
GINS 3901 [1.0] International Placement
GINS 3930 [0.5] Carleton International Placement
GINS 3931 [1.0] Carleton International Placement
HIST 3807 [0.5] Practicum in History
HIST 3815 [0.5] Group Practicum
HLTH 4909 [1.0] Capstone Course – Field Placement and Research Project
HUMR 4905 [0.5] Practicum Placement in Human Rights I
INDG 4001 [0.5] Indigeneity in the City

4.  2.0 credits from: 2.0
   Critically Understanding Communities courses:
AFRI 3100 [0.5] African Studies Abroad: Selected Topics
ALDS 3205 [0.5] English as a Global Language
ANTH 2020 [0.5] Race and Ethnicity
ANTH 2080 [0.5] Humans/Animals: the More-than-Human in Social Research
ANTH 2680 [0.5] Anthropology of "Mainstream" North America
ANTH 3005 [0.5] Language, Culture, and Globalization

UNOFFICIAL 2021-22 Undergraduate Calendar 89
Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

Breadth Area 2: Humanities

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Subject codes: AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREET, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies,
Students in a B.A. Honours program must present:
1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfill the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy
Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements
COOP 1000

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course).
Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton’s co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option
Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option
Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to
accompanied by their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

**B.A. Honours Anthropology: Co-op Admission and Continuation Requirements**

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Registered in the B.A. Honours Anthropology Program;
2. Have a minimum overall CGPA of 7.0 and major CGPA of 8.0 in the first two years of academic study;
3. Successfully completed, by the start-date of the first work term, the required first-year courses, second-year courses, and any two of ANTH 3005, ANTH 3007 or ANTH 3008.

Students in B.A. Honours Anthropology must successfully complete three (3) work terms to obtain the Co-op designation.

**Co-op Work Term Course:** ANTH 3999

**Admissions Information**

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. The minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

**Admission Requirements**

**Degrees**

- Bachelor of Arts (B.A.)(Honours)
- Bachelor of Arts (B.A.)

**First Year**

*For B.A. and B.A. (Honours)*

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

**Advanced Standing**

**B.A. and B.A. (Honours) Program**

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

**Direct Admission to the First Year of the Co-op Option**

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European, Russian, and Eurasian Studies, French, Geography, Geography with a Concentration in Physical Geography, Geomatics, History, Law (Business Law), Law (Law, Policy and Government), Political Science, Psychology, Sociology.

Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.
Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Anthropology (ANTH) Courses**

**ANTH 1001 [0.5 credit]**
*Introduction to Socio-Cultural Anthropology*
What does it mean to be human? Anthropologists have approached this question by using the ethnographic method to understand the diverse ways people create shared worlds of meaning. In this course students will learn how culture shapes experience, and how ethnography describes this process.
Includes: Experiential Learning Activity
Precludes additional credit for ANTH 1000 (no longer offered), HUMS 1005.
Lectures/discussions three hours a week.

**ANTH 1002 [0.5 credit]**
*Introduction to Issues in Anthropology*
This course introduces students to anthropology through in-depth consideration of selected issues facing contemporary cultures and societies. Selected issue(s) will reflect the expertise of the instructor and could include current debates related to race, gender, development, politics, economics, religion, technology, health and the environment.
Includes: Experiential Learning Activity
Precludes additional credit for ANTH 1000 (no longer offered).
Lectures/discussions three hours a week.

**ANTH 2001 [1.0 credit]**
*Foundations in Socio-Cultural Anthropology*
Exploration of basic anthropological concepts and analytical strategies through case studies. Emphasis on socio-cultural diversity as documented by ethnographic research with attention to the role of culture in articulating gender, kinship, economic and political relations.
Includes: Experiential Learning Activity
Prerequisite(s): ANTH 1001 or ANTH 1002.
Lectures and discussions three hours a week.

**ANTH 2020 [0.5 credit]**
*Race and Ethnicity*
Introduction to some of the recent theoretical literature and research on the issues of race, racism and ethnicity. Concepts, controversies and definitions dealing with race and ethnicity from the Canadian context and internationally.
Also listed as SOCI 2020.
Lectures and workshop three hours a week.

**ANTH 2040 [0.5 credit]**
*Anthropology and Gender*
The study of gender in anthropology, including its theoretical, cross-cultural and ethnographic aspects. Emphasis on gender as a sociocultural process that is at once discursive and embodied, and that varies in distinct cultural, socio-historical, geopolitical, and economic contexts.
Includes: Experiential Learning Activity
Precludes additional credit for ANTH 2408 (no longer offered).
Lectures and workshop three hours a week.

**ANTH 2060 [0.5 credit]**
*Girlhood in Contemporary Contexts: Anthropological and Sociological Perspectives*
Drawing on anthropological and sociological approaches, students will explore girls’ lives in diverse cultural, political, economic, and social contexts. Topics may include: movement and migration, education, media, imaging and humanitarianism, consumerism, agency and activism, health, and violence.
Also listed as SOCI 2060.
Prerequisite(s): second-year standing or permission of the instructor.
Two hour lecture plus one hour tutorial per week.

**ANTH 2070 [0.5 credit]**
*Psychological Anthropology*
Exploration of the relative and the universal in relations between the psychological self and the cultural environment. Topics may include anthropology of psychiatric institutions and practices, the cultural relativity of emotions, the self in everyday life and ritual.
Lecture/discussion groups three hours a week.

**ANTH 2080 [0.5 credit]**
*Humans/Animals: the More-than-Human in Social Research*
Examination of relationships between humans and animals in the sociological and broader social studies canon, including: multispecies ethnography, the role of the ‘more than human’ in Indigenous legal orders, posthumanist and STS theory, relationships between humans and animals and other non-human entities in the Anthropocene.
Also listed as SOCI 2080.
Lecture/discussion groups three hours per week.
ANTH 2180 [0.5 credit]
Foundations in Community Engagement
Study of theoretical debates and practical applications relating to community engagement with a focus on Canadian examples. Exploration of the contested and complex meanings of community engagement in and between diverse communities, public institutions, non-profit sector and private enterprise with an emphasis on social justice.
Includes: Experiential Learning Activity
Also listed as SOCI 2180.
Prerequisite(s): Second year standing or permission of instructor.
Lecture, discussion and project work three hours a week.

ANTH 2500 [0.5 credit]
Culture and Symbols
The representation and construction of culture through symbols. Topics may include material culture, rituals, archetypes, myths and mythmaking.
Includes: Experiential Learning Activity
Precludes additional credit for ANTH 3304 (no longer offered).
Lectures and workshop three hours a week.

ANTH 2510 [0.5 credit]
Theories of Human Nature
Critical, cross-cultural exploration of theories of human nature. Begins with a survey of western anthropological models of human consciousness and examines scientific, philosophical and religious perspectives with reference to ethnographic research on myth, religion and science produced by western and non-western cultures.
Lectures and discussion three hours a week.

ANTH 2550 [0.5 credit]
Religion and Society
Cross-cultural survey of religious institutions, focusing on theories and methodologies in the study of religion. Topics may include myth, totemism, cults, ritual, belief systems, altered states of consciousness, new religious and/or new age movements and the relationship of religion with other social institutions and processes.
Includes: Experiential Learning Activity
Also listed as RELI 2736.
Lectures and workshop three hours a week.

ANTH 2610 [0.5 credit]
Examination of a range of issues related to particular indigenous communities and regions of North America. Topics include political, socio-economic, and cultural transformations, Aboriginal title and rights, collaborative research, and other topics relevant to indigenous communities and indigenous - non-indigenous relations.
Precludes additional credit for ANTH 3610 (no longer offered).
Lecture/discussion groups three hours a week.

ANTH 2620 [0.5 credit]
Ethnography of Sub-Saharan Africa
Examination of selected areas of contemporary Sub-Saharan Africa through current anthropological research. Topics may include war and displacement, religion, politics, international development, history, popular culture, colonialism, witchcraft, health and kinship.
Precludes additional credit for ANTH 3620 (no longer offered).
Lecture/discussion groups three hours a week.

ANTH 2630 [0.5 credit]
Studies in Asian Societies: Current Issues in Anthropological Research
Examination of contemporary Asia through anthropological research. Topics may include cultural practices, religion, health issues, economics, politics, history, colonialism and social change. Emphasis will vary by sub-region from year to year, e.g., focusing on South, East or Southeast Asia.
Lectures and discussion three hours a week.

ANTH 2635 [0.5 credit]
Tradition and Modernity in the Pacific
Relationships between contemporary Pacific societies and the rest of the world. Topics may include colonialism and its aftermaths, cultural revival, mining, Christianity, alternative modernities, diasporas, and indigenous media.
Lecture/discussion groups three hours a week.

ANTH 2640 [0.5 credit]
Andean Ethnography
Ethnographic survey of the Andes. The formation of “indigenous” communities and their relation to urban centres and nation-states. Topics may include state formation, social movements, agrarian reform, political economy of food, class, ethnicity and racism, rural-urban migration, community.
Lectures and discussion three hours a week.

ANTH 2645 [0.5 credit]
The Postcolonial Middle East
How do people live in the Middle East? What political, historical and religious forces shape their everyday life? This class draws on essays, ethnographies, and movies to challenge the narratives of chronic violence, excessive religiosity, and prehistoric misogyny that haunt our understanding of this region.
Lecture and discussion three hours a week.

ANTH 2650 [0.5 credit]
Ethnography of Mesoamerica
Ethnographic survey of Mexico and Guatemala focusing on a variety of rural and urban communities throughout the area with emphasis on indigenous groups. Topics may include nationalism, ethnicity, social organization, gender, cosmology and material culture.
Lectures and discussion three hours a week.
ANTH 2660 [0.5 credit]  
Ethnography of North Africa  
Introduction to societies and cultures of North Africa. Topics may include: history and socio-cultural role of Islam, the relations between Arabs and Berbers, ethnography of religious institutions, ritual practices, everyday life, gender, colonialism and post-colonialism, problems of state and religion. Lectures and discussion three hours a week.

ANTH 2670 [0.5 credit]  
Ethnography of Brazil  
Examination of selected areas of contemporary Brazil through current anthropological research. Topics may include: processes of nation-formation, colonialism, gender and sexuality, race and racism, health, everyday life, urban ethnography, popular culture, social movements, and institutions such as religion, the family and the state. Lectures and discussion three hours a week.

ANTH 2680 [0.5 credit]  
Anthropology of "Mainstream" North America  
Examination of contemporary North American society. Topics may include social class, success myths, schooling, immigration, cities, the self, television, romance, youth sub cultures; how what is seen as "mainstream" is determined. Lectures/discussion groups three hours a week.

ANTH 2690 [0.5 credit]  
Ethnography of a Selected Area  
Ethnography of a selected area. Area to be announced. Lectures and discussion three hours a week.

ANTH 2815 [0.5 credit]  
Selected Topics in Anthropology  
Selected topics in anthropology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered. Lecture/discussion groups three hours a week.

ANTH 2825 [0.5 credit]  
Selected Topics in Anthropology  
Selected topics in anthropology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered. Lectures/discussion groups three hours a week.

ANTH 2850 [0.5 credit]  
Development and Underdevelopment  
International development and its socio-cultural practices with consequences at local, national and international levels. Topics may include modernization, dependency, globalization, and development as discourse, political ecology, gender, indigenous knowledge, social movements, and non-governmental organizations. Includes: Experiential Learning Activity. Lectures and workshop three hours a week.

ANTH 2915 [0.5 credit]  
Course-Related Tutorials in Anthropology  
Consult the Department for information.

ANTH 2925 [0.5 credit]  
Course-Related Tutorials in Anthropology  
Consult the department for information.

ANTH 3005 [0.5 credit]  
Ethnographic Research Methods  
Broad overview of methods through lectures, discussion, and hands-on activities. Research design, ethics, participant-observation, interviewing and other methods, data analysis and ethnographic writing. Prepares students to apply methodological knowledge in careers and projects undertaken for the fourth-year honours research paper and/or ethnographic field course. Includes: Experiential Learning Activity. Precludes additional credit for ANTH 2003. Prerequisite(s): ANTH 2001 [1.0]. Lectures three hours a week.

ANTH 3007 [0.5 credit]  
History of Anthropological Theory  
Analysis of the development of anthropological thought since the end of the eighteenth to the mid-twentieth century. The development of various theoretical approaches within their historical, social, intellectual and biographical contexts. The implications of these issues may be explored through ethnographies. Precludes additional credit for ANTH 2005 and ANTH 3100. Prerequisite(s): ANTH 2001 [1.0]. Lectures three hours a week.

ANTH 3008 [0.5 credit]  
Contemporary Theories in Anthropology  
Contemporary trends in anthropological analyses. Discussion of anthropological theory in its contemporary, interdisciplinary context. Precludes additional credit for ANTH 3006 (no longer offered), ANTH 3100. Prerequisite(s): ANTH 2001. Lecture/discussion groups three hours per week.

ANTH 3010 [0.5 credit]  
Language, Culture, and Globalization  
Theoretical and methodological contributions of anthropology to the study of communicative practices in a variety of social and cultural contexts. Language practices, ideologies, and globalization as they intersect with culture, power, race, ethnicity, indigeneity, gender, nationhood and political economy. Prerequisite(s): second-year standing or permission of the instructor. Lecture three hours per week.
ANTH 3020 [0.5 credit]
Studies in Race and Ethnicity
Race, racism and ethnicity in Canada and internationally. Critical perspectives on race and ethnicity as they intersect with other social relations. Racism, Eurocentrism, Orientalism, nationalism, colonialism, international migration, citizenship, and diasporic cultures. Also listed as SOCI 3020.
Prerequisite(s): second-year standing or permission of the instructor.
Lectures three hours a week.

ANTH 3025 [0.5 credit]
Anthropology and Human Rights
Examines the concepts of "cultural relativism" and "universalism." What are human rights? Who has them? How do notions of "human rights" evolve? What about other, non-Western concepts of "individual," "collectivity," "rights" and "responsibilities"? What about human rights violations and abuses?.
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3027 [0.5 credit]
Studies in Globalization and Human Rights
Examination of the various dimensions and meanings of globalization and its relationship with human rights. Main emphasis will be on the implications of the emerging global economy for economic, social, political and cultural rights.
Also listed as SOCI 3027, PSCI 3802.
Prerequisite(s): 0.5 credit 2000-level ANTH, or SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or HUMR 1001 [1.0].
Lectures three hours a week.

ANTH 3035 [0.5 credit]
Science, Culture and Society: Social Studies of Science
Principal theories and methods used by Science and Technology Studies scholars to examine the social construction of scientific knowledge. Topics may include the demarcation of science from non-science, the relationship between experts and laypersons, and the study of scientific controversies.
Also listed as SOCI 3035.
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3037 [0.5 credit]
Studies in Information Systems and Social Power
Knowledge/power relations in historical and comparative perspective, with attention to information devices, techniques, and practices.
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3040 [0.5 credit]
The Global Middle Class
The growing numbers of people who could be considered "middle class" are central to both "cultural" and "economic" globalization. This course examines what it means to be middle class theoretically, historically, and cross-culturally. Prerequisite(s): second-year standing or permission of the instructor.
Lecture/discussion groups three hours a week.

ANTH 3045 [0.5 credit]
Children and Childhood in a Globalized World
A socio-historical and cross-cultural exploration of constructions, deconstructions, and the experience of childhood in Canada and internationally. Compulsory schooling, child labour, protection and regulation in law, the commodification and equalization of childhood, children's social movements, and the emergence of children's rights discourses. Also listed as SOCI 3045.
Prerequisite(s): 0.5 credit ANTH, or SOCI 1001 and SOCI 1002, or SOCI 1003 and third-year standing.
Lecture three hours a week.

ANTH 3215 [0.5 credit]
Selected Topics in Anthropology
Topics not ordinarily treated in the regular course program. The choice of topics varies from year to year. Check with the Department regarding the topic offered.
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3225 [0.5 credit]
Selected Topics in Anthropology
Topics not ordinarily treated in the regular course program. The choice of topics varies from year to year. Check with the Department regarding the topic offered.
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3310 [0.5 credit]
Studies in Medical Anthropology
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.
ANTH 3355 [0.5 credit]
Anthropology and the Environment
Environmental concerns affect everyone, unevenly. How does anthropology illuminate the cultural, social, political and ecological differentiation resulting from and constituting environmental processes? The range of responses considered may address issues of resource access and exploitation, as well as transnational transformations in the concept of nature.
Prerequisite(s): second-year standing or permission of the instructor.
Lectures three hours a week.

ANTH 3360 [0.5 credit]
Jokes, Humor, Laughter
Anthropological inquiries into the phenomenon of humor. Psychoanalytic, semiotic and phenomenological perspectives are applied to ethnographic materials from a variety of cultural contexts.
Lecture/discussion groups three hours per week.

ANTH 3510 [0.5 credit]
Ritual
Cross-cultural study of ritual, religious and secular, its role in various social processes and relation to other activities. Exploration of variability of ritual and the range of theories that have been developed to account for what ritual does, including intellectualist, functionalist and performative.
Prerequisite(s): second-year standing or permission of the instructor.
Lectures and discussion three hours a week.

ANTH 3550 [0.5 credit]
Studies in Visual Anthropology
Examination of the anthropological experience as reflected in film/video and still photography. A number of problems are considered, including selectivity, bias, the effect of the observer’s presence, and problems in reconstructing past events in film. Issues of media-literacy will be examined.
Precludes additional credit for ANTH 3107 (no longer offered).
Prerequisite(s): second-year standing or permission of the instructor.
Lectures three hours a week.

ANTH 3570 [0.5 credit]
Studies in Art, Culture and Society
Thematic investigation of genres, forms and styles of art, culture and society. Topics may include current debates on social structure and artistic creativity; ideology, cultural memory and politics, patronage and art; cross-cultural representations, taste, social mobility and art; modernism and the avant-garde. Also listed as SOCI 3570.
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3580 [0.5 credit]
Anthropology of Material Culture and Museums
How diverse societies are materialized in a wide range of cultural materials from clothing, housing and memorials to more ephemeral materializations such as food, gardens, dance, ritual props and music-making. Emphasis on museum practices and the cultural politics of display.
Prerequisite(s): second-year standing or permission of the instructor.
Lectures and discussion three hours a week.

ANTH 3600 [0.5 credit]
Studies in Anthropology and Indigenous Peoples
Problems in the interpretation and analysis of various forms of encounters between indigenous peoples and colonizing powers will be examined. Topics may include patterns and practices of contact, cultural syncretism, conquest, domination, relations of ruling, cultural hegemony, resistance and non-compliance.
Includes: Experiential Learning Activity
Precludes additional credit for ANTH 3109 (no longer offered).
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3800 [0.5 credit]
Studies in Applied and Participatory Anthropology
History, significant approaches, and key topics of applied anthropology and participatory research. Participatory and non-participatory anthropological research on social problems within activities of intervention, which may include policy processes, development projects, evaluation exercises, impact assessments, and advocacy work.
Includes: Experiential Learning Activity
Prerequisite(s): second-year standing or permission of the instructor.
Lecture three hours a week.

ANTH 3915 [0.5 credit]
Course-Related Tutorials in Anthropology
Consult the Department for information.

ANTH 3925 [0.5 credit]
Course-Related Tutorials in Anthropology
Consult the Department for information.

ANTH 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity
ANTH 4000 [0.5 credit]
Field Placement in Anthropology
This course is intended to provide students with practical experience through a field placement equivalent to one day a week. Students are responsible to secure their field placement in a relevant organization with the approval of a Faculty member acting as Field placement coordinator.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours Anthropology standing and permission of the Department.

ANTH 4005 [0.5 credit]
Health and Globalization
An anthropological examination of the health impacts of global processes, relationships, and movements. May include topics such as economic development and disease, migration and health, medical tourism, transnational reproduction, and the global circulation of bodies, organs, medical technologies, drugs, and pathogens.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4006 [0.5 credit]
Decolonizing Methodologies in the 21st Century: Practicing Engaged Anthropology
Examination of the breadth of critical literature on ‘decolonizing methodologies’ within and adjacent to anthropology in the 20th and 21st centuries. The course will equip students with an in-depth understanding of critiques of the discipline’s methods and ethics while practicing an engaged anthropology.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours per week.

ANTH 4007 [0.5 credit]
Advanced Studies in Anthropological Theory and Methods
The course examines debates in theory and methodology currently facing the discipline through a survey of leading-edge issues and approaches.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4020 [0.5 credit]
Advanced Studies in Race and Ethnicity
An advanced seminar that explores selected topics in race and ethnicity in an international context. Specific topics will vary according to instructors’ research interests.
Also listed as SOCI 4020.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4036 [0.5 credit]
Science and Technology Studies: Selected Topics
Science and Technology Studies (STS) by focusing on a relevant topic. Topics may vary from year to year. Students should check with the Department regarding the topic offered.
Precludes additional credit for SOCI 4401 (no longer offered).
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4040 [0.5 credit]
Community Engagement Capstone
Students in the capstone will reflect on their engagement experiences and advance their critical understanding of community through a series of in-class activities and readings. Students will produce a public-facing artifact (e.g., blog, podcast, video) related to their experiences, potentially in collaboration with community partners.
Includes: Experiential Learning Activity
Also listed as SOCI 4171.
Prerequisite(s): ANTH 2180 and fourth year standing or permission of instructor.
Lecture, discussion and project work three hours per week.
ANTH 4200 [0.5 credit]
War, Security and Citizenship
Critical theoretical and multidisciplinary examination of violent conflict, security and citizenship. How wars produce a variety of abject and new subjects, create and reproduce citizenship hierarchies, and expand and contract citizenship entitlements. Also listed as SOCI 4200.
Prerequisite(s): fourth year standing.
Seminar three hours a week.

ANTH 4215 [0.5 credit]
Selected Topics in Anthropology
Topics not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the department regarding the topic offered.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4225 [0.5 credit]
Selected Topics in Anthropology
Topics not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the department regarding the topic offered.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4355 [0.5 credit]
Anthropology of Natural Resources
Anthropology of natural resources. Topics may include economies, ecologies, cultural and social dynamics of fishing, forestry, lands, mining, oil, wildlife, at varying analytical scales, including a critical examination of the term "natural resource" itself.
Prerequisite(s): third-year standing or permission of the instructor.
Also offered at the graduate level, with different requirements, as ANTH 5355, for which additional credit is precluded.
Lectures and discussions three hours a week.

ANTH 4500 [0.5 credit]
Advanced Studies in Culture and Symbols
Contemporary debates in theory and methods regarding analysis of the symbolic processes.
Precludes additional credit for ANTH 4705 (no longer offered).
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4550 [0.5 credit]
Advanced Studies in Visual Anthropology
Exploration of media representations of the cultural other through student projects based on contemporary anthropological analysis of cross-cultural multimedia: video, photography, mapping and the Internet. The role of media in the dissemination of anthropological research and as the subject of anthropological analysis.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4560 [0.5 credit]
Economic Anthropology
Anthropology’s holistic, comparative and critical contribution to the study of livelihood. How practices and understandings of production, circulation, consumption, and property vary cross-culturally. Relevant theoretical debates including those among formalist (neo-classical), substantivist, Marxist, and interpretive approaches over the applicability of capitalist thinking.
Prerequisite(s): third-year standing or permission of the instructor.
Also offered at the graduate level, with different requirements, as ANTH 5560, for which additional credit is precluded.
Seminar three hours a week.

ANTH 4570 [0.5 credit]
Political Anthropology
Can anthropology help us understand politics? Can ethnographic encounters help us approach political theory and political action differently? This seminar will focus on concepts (power, authority, equality) and practices (resistance, subjection, solidarity) through which anthropologists invite us to rethink the way we live together.
Prerequisite(s): third-year standing or permission of the instructor.
Also offered at the graduate level, with different requirements, as ANTH 5570, for which additional credit is precluded.
Seminar three hours a week.

ANTH 4590 [1.0 credit]
Capstone Seminar in Globalization, Culture, and Power
This course is dedicated to developing individual student research projects. Through seminar discussions, these student projects will benefit from an introduction to research design and methodologies, analysis and interpretation, as well as issues surrounding ethics, representation, and knowledge production.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the BGINS Globalization, Culture and Power program with a minimum 9.0 GPA or permission of the instructor.
Seminar three hours a week.
ANTH 4610 [0.5 credit]
Advanced Studies in Indigenous Peoples
This research-based seminar focuses on specific conceptual and methodological issues pertaining to contemporary anthropological research involving Indigenous peoples and communities. Topical focus may vary from year to year.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4620 [0.5 credit]
Advanced Studies in Contemporary Sub-Saharan Africa: Current Issues in Anthropological Research
Research-based seminar that explores the issues and debates related to anthropological research in contemporary sub-Saharan Africa with emphasis on theoretical, methodological, analytical, ethical, practical and applied problems in anthropological research in that area.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4730 [0.5 credit]
Colonialism and Post-Colonialism
Comparative ethnographic and historical approaches to colonialism including topics such as the formation of colonial regimes, colonial governmentality, servile labour systems, missionization, anti-colonial resistance, cultural hybridization and post-colonial memory. Exploration of debates over the relation between colonialism and the production of social scientific knowledge.
Also listed as SOCI 4730.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4750 [0.5 credit]
Advanced Studies in Globalization and Citizenship
Selected topics on the confluence of processes of globalization, development and citizenship. Examination of debates about the meaning and impact of globalization on patterns of inequality and citizenship both internationally and within Canada, and about strategies for progressive development.
Also listed as SOCI 4750.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4780 [0.5 credit]
Anthropology of Personhood
Exploration of anthropological approaches to personhood and diversity in constructions of the self in various socio-cultural and historical contexts.
Prerequisite(s): third-year standing or permission of the instructor.
Seminar three hours a week.

ANTH 4900 [1.0 credit]
Honours Research Paper in Anthropology
This course offers Honours students the opportunity to write an original research paper in their final year of study. Supported by the HRP supervisor, students develop their projects through seminar discussion addressing issues of research design, ethics, methodology, anthropological analysis, interpretation, and representation.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing.

ANTH 4915 [0.5 credit]
Tutorial in Anthropology
Consult the Department for information.

ANTH 4925 [0.5 credit]
Tutorial in Anthropology
Consult the Department for information.

Applied Linguistics and Discourse Studies
This section presents the requirements for programs in:
- Linguistics and Discourse Studies B.A. Combined Honours
- Applied Linguistics and Discourse Studies B.A. Honours
- Applied Linguistics and Discourse Studies B.A. Combined Honours
- Applied Linguistics and Discourse Studies B.A.
- Minor in Applied Linguistics and Discourse Studies
- Minor in Professional Writing
- Certificate in the Teaching of English as a Second Language (CTESL)
- Certificate in Professional Writing
- Post-Baccalaureate Diploma in Professional Writing
- Specialization in Teaching English in Global Contexts B.G.In.S. Honours
- Stream in Teaching English in Global Contexts B.G.In.S.

Linguistics and Discourse Studies B.A. Combined Honours (20.0 credits)
Honours Linguistics and Honours Applied Linguistics and Discourse Studies are combined into the Linguistics and Discourse Studies B.A. Combined Honours.

A. Credits Included in the Major CGPA (12.0 credits)

1. 1.5 credits in:

B. Additional Requirements (8.0 credits)

- 2.5 credits in ALDS which may include:
  - ALDS at the 4000-level
  - ALDS at the 3000 level or above
- 1.0 credit in LING, excluding LING at the 4000 level
- 1.0 credit in ALDS
- 1.0 credit in ALDS
- 1.0 credit in:
  - ALDS 3201 [0.5] Cross-Cultural Communication
  - ALDS 3202 [0.5] Sociolinguistics
  - ALDS 3401 [0.5] Research and Theory in Academic Writing
  - ALDS 3402 [0.5] Research and Theory in Workplace Writing
  - ALDS 3405 [0.5] Second Language Writing
  - LING 3603 [0.5] Child Language
  - ALDS 3604 [0.5] Communication Disorders II
  - ALDS 3701 [0.5] Corpus Linguistics
  - ALDS 3705 [0.5] Adult Literacy
  - ALDS 3706 [0.5] Discourse Analysis
  - ALDS 3903 [0.5] Special Topic in Applied Linguistics and Discourse Studies
- 2.0 credits in Applied Linguistics and Discourse Studies at the 4000-level
- 2.5 credits in Applied Linguistics and Discourse Studies, which may include:
  - FYSM 1204 [1.0] Language and Identity
  - FYSM 1205 [1.0] Language and Power

B. Credits Not Included in the Major CGPA (11.0 credits)

- 5.0 credits not in ALDS or LING | 5.0 |

Total Credits: 20.0

Applied Linguistics and Discourse Studies B.A. Combined Honours (20.0 credits)

A. Credits Included in the Major CGPA (6.0 credits)

- 1.0 credit in:
  - LING 1001 [0.5] Introduction to Linguistics I
  - ALDS 1001 [0.5] Language Matters: Introduction to ALDS

B. Additional Requirements (14.0 credits)

- 6.0 credits in free electives (maximum 2.5 in ALDS)
- The requirements for the other discipline must be met
- 2.0 credits in ALDS which may include:
  - FYSM 1204 [1.0] Language and Identity
  - FYSM 1205 [1.0] Language and Power

Total Credits: 20.0

Applied Linguistics and Discourse Studies B.A. (15.0 credits)

A. Credits Included in the Major CGPA (6.0 credits)

- 1.0 credit in:
  - LING 1001 [0.5] Introduction to Linguistics I
  - ALDS 1001 [0.5] Language Matters: Introduction to ALDS

B. Additional Requirements (14.0 credits)

- 6.0 credits in free electives (maximum 2.5 in ALDS)
- The requirements for the other discipline must be met
- 2.0 credits in ALDS which may include:
  - FYSM 1204 [1.0] Language and Identity
  - FYSM 1205 [1.0] Language and Power

Total Credits: 20.0
Minor in Applied Linguistics and Discourse Studies (4.0 credits)
Open to all undergraduate degree students in programs other than Applied Linguistics and Discourse Studies.

Requirements
1. 1.0 credit in:
   - ALDS 1001 [0.5] Language Matters: Introduction to ALDS
   - LING 1001 [0.5] Introduction to Linguistics I
2. 1.0 credit in:
   - ALDS 2201 [0.5] Analysis of Oral Language Use
   - ALDS 2202 [0.5] Analysis of Written Language Use
3. 1.0 credit from:
   - ALDS 2203 [0.5] Linguistic Theory and Second-Language Learning
   - ALDS 2604 [0.5] Communication Disorders I
   - ALDS 2704 [0.5] Bilingualism
   - ALDS 2705 [0.5] Language and Power
   - FYSM 1204 [1.0] Language and Identity
   - FYSM 1205 [1.0] Language and Power
   - LING 2007 [0.5] Phonetics
   - LING 3603 [0.5] Child Language
4. 1.0 credit in ALDS at the 3000-level or higher.
5. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Certificate in Professional Writing (5.0 credits)
Students may declare only one of the Professional Writing Certificate or the Professional Writing Minor. To be taken concurrently with an Honours degree, provided the Major CGPA in the Honours program is at least 7.5. Open to all undergraduate students not in the English BA Honours Concentration in Creative Writing or the English BA Honours Concentration in Drama Studies.

Requirements
1. 1.0 credit in:
   - ENGL 1008 [0.5] English Grammar: Fundamentals
   - ALDS 2202 [0.5] Analysis of Written Language Use
2. 1.0 credit in:
   - ALDS 3402/ENGL 3805 Research and Theory in Workplace Writing
   - ALDS 3414/ENGL 3805 Transition to Professional Writing and Editing
3. 2.0 credits in:
   - ENGL 4135 [0.5] Studies in Publishing
   - ALDS 4404/ENGL 4407 Writing and Knowledge-Making in the Professions
   - ALDS 4414/ENGL 4407 Professional Writing I
   - ALDS 4415/ENGL 4407 Professional Writing II

4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 5.0

Certificate in the Teaching of English as a Second Language (CTESL) (5.0 credits)
May be taken following successful completion of any undergraduate degree or concurrently with an Honours degree, provided the Major CGPA in the Honours program is at least 7.0.

Graduation
A candidate for the CTESL must obtain a grade of C or higher in all courses taken at Carleton University under the CTESL program.

Requirements
1. 1.0 credit in:
   - LING 1001 [0.5] Introduction to Linguistics I
   - ALDS 1001 [0.5] Language Matters: Introduction to ALDS
2. 1.0 credit in:
   - ALDS 4206 [1.0] Practicum in Teaching ESL
   - ALDS 4305 [0.5] Teaching English Language: Methodology I
   - ALDS 4306 [0.5] Teaching English as a Second Language: Methodology II
   - ALDS 4602 [0.5] Second Language Acquisition
   - ALDS 4801 [0.5] Major Structures of English
3. 1.0 credit in ALDS, or in LING from the courses below, or any other course approved by the Supervisor of CTESL:
   - LING 2005 [0.5] Linguistic Analysis
   - LING 2007 [0.5] Phonetics
   - LING 3601 [0.5] Language Processing and the Brain
   - LING 3603 [0.5] Child Language

Total Credits 5.0

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

Breadth Area 2: Humanities

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada.

The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:

1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

**Regulations**

**Post-Baccalaureate Diploma**

In addition to the requirements presented here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

**Definition**

A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:

- qualify a candidate for consideration for entry into a master's program, or
- bring a candidate who already possesses a bachelor's degree up to a level of a bachelor's degree of 20.0 credits or more in another discipline, or
- provide a candidate who already possesses a twenty-credit bachelor's degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas, or
- provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

**Program Requirements**

- A post-baccalaureate diploma is normally constituted of a minimum of 3.0 credits to a maximum of 5.0 credits of advanced undergraduate courses.
- A minimum of 3.0 residency credits counting toward the post-baccalaureate diploma.
English as a Second Language Requirement
In addition to the program requirements, completion of English as a Second Language (ESLA) courses may be required from the following sequence: ESLA 1300, ESLA 1500, ESLA 1900, ESLA 1905. No credits from this sequence will be counted toward the post-baccalaureate diploma.

Continuation
All post-baccalaureate diploma students are expected to complete their diploma requirements within two calendar years after the date of initial registration. After this period student may be withdrawn.

Graduation
• A candidate for a post-baccalaureate diploma must have an overall CGPA of at least 6.5 to graduate.
• A candidate for a post-baccalaureate diploma must obtain a grade of C- or higher in each course taken in fulfillment of the program requirements.
• Students should consult with the Department, School or Institute when planning their diploma and selecting courses.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees
• Bachelor of Arts (B.A.)(Honours)
• Bachelor of Arts (B.A.)

First Year
For B.A. and B.A. (Honours)
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Advanced Standing

B.A. and B.A. (Honours) Program
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements (C.T.E.S.L.)
To be eligible for admission to the 5.0 credit CTESL program students must have already obtained a degree and have extensive experience in teaching, or are registered in an Honours degree at Carleton University with an overall CGPA of 7.00 (B-) or higher. Students registered in the concurrent CTESL program who fail to complete their degree cannot receive the CTESL.

Admission Requirements
To be eligible for admission to the Certificate in Professional Writing, applicants must present:
• Second-year standing in any Honours degree, excluding the English BA Honours Concentration in Creative Writing or the English BA Honours Concentration in Drama Studies;
• A Major CGPA of 7.5 or higher;
• A statement of purpose and a sample of their academic or professional writing, and;
• Permission of the Professional Writing Program.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Diploma
• Post-Baccalaureate Diploma in Professional Writing
To be eligible for admission to the Post-Baccalaureate Diploma in Professional Writing students must normally present an honours undergraduate degree with a GPA of 8.0 or higher.

Applied Linguistics and Discourse Studies (ALDS) Courses
**ALDS 1001 [0.5 credit]**
**Language Matters: Introduction to ALDS**
Core topics in applied linguistics and discourse studies. First and second language acquisition; sign language; language teaching and assessment; language in society; language, identity and power; discourse analysis; written language and literacy.
Lectures three hours a week.

**ALDS 2201 [0.5 credit]**
**Analysis of Oral Language Use**
Introduction to the analysis of oral language in use; distinctions between spoken and written language; theoretical and methodological approaches such as speech act theory, ethnography of communication, conversation analysis, and discourse analysis; classroom interaction; interaction in first- and second-language acquisition; analysis of spoken language corpora.
Includes: Experiential Learning Activity
Prerequisite(s): ALDS 1001 or permission of the instructor.
Lectures three hours a week.

**ALDS 2202 [0.5 credit]**
**Analysis of Written Language Use**
Introduction to the analysis of written language in use, including theoretical and methodological approaches such as rhetorical genre studies (including academic and workplace writing); adult literacy studies; text-structure analysis; discourse analysis (including critical discourse analysis); analysis of textual corpora.
Includes: Experiential Learning Activity
Prerequisite(s): ALDS 1001 or FYSM 1004 or ENGL 1000 or COMS 1000 or COMS 1001 or permission of the instructor.
Lectures three hours a week.

**ALDS 2203 [0.5 credit]**
**Linguistic Theory and Second-Language Learning**
Critical study of linguistic theory and description applied to second-language learning; a brief consideration of similarities and differences in first- and second-language development, bilingualism and types of linguistic error and their significance.
Includes: Experiential Learning Activity
Prerequisite(s): second-year standing.
Lectures three hours a week.

**ALDS 2604 [0.5 credit]**
**Communication Disorders I**
A survey course highlighting congenital, developmental and acquired disorders of speech, language, fluency, hearing and voice; prevalence, current research, assessment and intervention approaches for each disorder will be presented.
Also listed as LING 2604.
Prerequisite(s): second-year standing, or permission of the instructor.
Lectures three hours a week.

**ALDS 2704 [0.5 credit]**
**Bilingualism**
The linguistic nature of bilingualism. The structure of bilingual societies and the relation between societal and individual bilingualism. The role of bilingualism in language education.
Includes: Experiential Learning Activity
Prerequisite(s): second-year standing.
Lectures three hours a week.

**ALDS 2705 [0.5 credit]**
**Language and Power**
How social conditions engender different linguistic choices. Attention to linguistic resources for expressing ideological beliefs and for maintaining and reinforcing power structures in institutional and social sites.
Includes: Experiential Learning Activity
Precludes additional credit for FYSM 1205.
Prerequisite(s): second-year standing.
Lectures three hours a week.
ALDS 3201 [0.5 credit]
Cross-Cultural Communication
Introduction to cross-cultural communication in social, academic and professional settings. Application of theoretical perspectives to case study analysis; pedagogical/training topics as relevant to students’ disciplines; collaborative work with other language and cultural groups as feasible.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing, and one of LING 1001 or ALDS 1001, or permission of the School.
Lectures three hours a week.

ALDS 3202 [0.5 credit]
Sociolinguistics
The place of language within society; bilingual and multilingual communities; language, social mobility and social stratification; sociolinguistic factors in language change.
Also listed as LING 3702.
Precludes additional credit for ALDS 2701 (no longer offered).
Prerequisite(s): ALDS 1001 and third-year standing.
Lectures three hours a week.

ALDS 3205 [0.5 credit]
English as a Global Language
The origins, development and globalization of the English language. Establishment of Standard English; spread of English in the Inner circle and in expanding circles; world Englishes; linguistic features of English varieties. English as a global language; learning and teaching English as an international language.
Includes: Experiential Learning Activity
Prerequisite(s): ALDS 1001 and LING 1001.
Seminars three hours a week.

ALDS 3301 [0.5 credit]
Introduction to Deaf Studies
A critical introduction to Deaf community and culture as they relate to a social model of disability, to ethnicity, and to issues of diversity and inclusion. Discourse analysis of research and policy in education for Deaf students from early childhood and beyond.
Includes: Experiential Learning Activity
Also listed as DBST 3301.
Precludes additional credit for ALDS 3903A if taken in Winter term 2016 or Winter term 2018, and ALDS 4906A, if taken in Fall term 2016.
Prerequisite(s): third-year standing in Linguistics or Applied Linguistics and Discourse Studies or enrolment in the Minor in Disability Studies.
Seminars three hours a week.

ALDS 3401 [0.5 credit]
Research and Theory in Academic Writing
Study of contemporary research and theory (1970s to present) on academic writing in elementary, secondary and post-secondary school, with emphasis on writing in university. Consideration of what academic writing entails, how writing fosters learning, and how instruction can help students develop their writing abilities.
Includes: Experiential Learning Activity
Also listed as ENGL 3908.
Prerequisite(s): third-year standing or permission of the instructor.
Lectures three hours a week.

ALDS 3402 [0.5 credit]
Research and Theory in Workplace Writing
Study of contemporary research and theory (1980s to present) in writing in workplace settings. Consideration of how writing is used in accomplishing work, how novices learn to write effectively, and what the implications are for pedagogy.
Includes: Experiential Learning Activity
Also listed as ENGL 3909.
Prerequisite(s): third-year standing or permission of the instructor.
Lectures three hours a week.

ALDS 3405 [0.5 credit]
Second Language Writing
Theory and practice of second language (L2) writing: how people learn to write in a second language, and how L2 writing courses for specific groups of learners can be designed.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor.
Lectures three hours a week.

ALDS 3604 [0.5 credit]
Communication Disorders II
In-depth evaluation of current psycholinguistic models of processes underlying communication disorders and the biomedical support for such models. Emphasis on contrasting developmental disorders with acquired disorders. Additional exploration of other modalities (sign language, reading).
Also listed as LING 3604.
Precludes additional credit for LING 3009 Section "A", if taken Winter 2013.
Prerequisite(s): ALDS 2604 or LING 2604.
Lectures three hours a week.
ALDS 3701 [0.5 credit]
Corpus Linguistics
Computer-assisted analysis of electronic collections of naturally occurring language. Applications in such areas as language variation, grammar, lexicology, phraseology, translation, and learner language. Includes: Experiential Learning Activity
Also listed as LING 3701.
Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor.
Lectures three hours a week.

ALDS 3705 [0.5 credit]
Adult Literacy
The extent and social contexts of restricted literacy in Canadian society; approaches to and debates surrounding the teaching and learning of adult literacy.
Prerequisite(s): third-year standing or permission of the instructor.
Lectures three hours a week.

ALDS 3706 [0.5 credit]
Discourse Analysis
Principles of and studies in discourse analysis, including both conversational and textual/documentary analysis. The major focus is on language use in structuring social relationships.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor.
Lectures three hours a week.

ALDS 3900 [1.0 credit]
Independent Study
Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Applied Linguistics and Discourse Studies.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the instructor.

ALDS 3901 [0.5 credit]
Independent Study
Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Applied Linguistics and Discourse Studies.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the instructor.

ALDS 3903 [0.5 credit]
Special Topic in Applied Linguistics and Discourse Studies
Selected topics in Applied Linguistics and Discourse Studies not ordinarily treated in the regular course program.
Lectures three hours per week.

ALDS 4201 [0.5 credit]
Language Testing
The principles of test construction as applied to testing language proficiency, achievement and aptitude. Structural, notional, discrete point and integrative tests. Diagnostic assessment of language development, language disorders, and literacy. Students are expected to create, analyze and evaluate language tests.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor.
Lectures three hours a week.

ALDS 4203 [0.5 credit]
Methods and Practice in Language Pedagogy
Integrates theory and description of language learning and teaching with practical work in one of the languages offered by the School. Requires observation in a language classroom, along with practical work facilitating in-class or language lab activities, or developing teaching materials.
Includes: Experiential Learning Activity
Precludes additional credit for ALDS 3803 (no longer offered).
Prerequisite(s): permission of the language instructor for the language class in which practical work will be conducted; proficiency in the language in question, as determined by either completion of the prerequisites for 4010 of that language, or assessment by the language instructor; or permission of the School.
Seminars and in-class practicum.

ALDS 4206 [1.0 credit]
Practicum in Teaching ESL
Investigates the processes of classroom learning with observation and some teaching experience in ESL classes. Normally taken concurrently with ALDS 4305 and ALDS 4306.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the concurrent CTESL program, or enrolment in the post-graduate CTESL program.

ALDS 4207 [0.5 credit]
ESL Literacy
The nature of everyday literacy and literacy skills. Analyzing the structure of everyday literacy texts and demands. Issues in literacy for second-language learners.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor.
Lectures three hours a week.
ALDS 4208 [0.5 credit]  
Languages for Specific Purposes  
An introduction to Languages for Specific Purposes - language instruction tailored to specific groups of learners, e.g., English for Science, for Business, for the Workplace, for Academic Purposes. Research and teaching methodology. Emphasis on EAP/ESP research and instruction at Carleton.  
Includes: Experiential Learning Activity  
Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor.  
Also offered at the graduate level, with different requirements, as ALDS 5208, for which additional credit is precluded.  
Lectures three hours a week.

ALDS 4209 [0.5 credit]  
Teaching English as a Foreign Language: Methodology for Global Contexts  
An introduction to the principles of teaching language in a foreign-language context; review of teaching approaches; practical examination, development and evaluation of instructional materials.  
Includes: Experiential Learning Activity  
Prerequisite(s): ALDS 4305 and fourth-year standing in the concurrent CTESL program, enrolment in the post-graduate CTESL program, the BGInS Specialization in Teaching English in Global Contexts, or permission of the instructor.  
Lectures three hours a week.

ALDS 4305 [0.5 credit]  
Teaching English Language: Methodology I  
Classification of classroom teaching methods and materials; adaptation of teaching materials for particular situations; creation of teaching materials; teaching techniques and strategies.  
Includes: Experiential Learning Activity  
Precludes additional credit for ALDS 4205.  
Prerequisite(s): fourth-year standing in the concurrent CTESL program, enrolment in the post-graduate CTESL program, or the BGInS Specialization in Teaching English in Global Contexts, or permission of the instructor.  
Seminars four hours a week.

ALDS 4306 [0.5 credit]  
Teaching English as a Second Language: Methodology II  
Classification of classroom teaching methods and materials used in an international context; adaptation of teaching materials for particular situations; creation of teaching materials for global English language education; teaching techniques and strategies.  
Includes: Experiential Learning Activity  
Precludes additional credit for ALDS 4205.  
Prerequisite(s): ALDS 4305 and fourth-year standing in the concurrent CTESL program, enrolment in the post-graduate CTESL program, or permission of the instructor.  
Seminars four hours a week.

ALDS 4308 [0.5 credit]  
English for Specific Purposes  
An introduction to English for Specific Purposes – English language instruction tailored to specific groups of learners (e.g., English for Academic Purposes, and English for a range of specific occupational and professional purposes). This course explores effective practices in course and materials design.  
Prerequisite(s): third-year standing in the BGInS Honours Specialization in Teaching English in Global Contexts, or enrolment in the CTESL program, or permission of the instructor.  
Seminars three hours a week.

ALDS 4403 [0.5 credit]  
Writing and Knowledge-Making in the Disciplines  
The role of writing in constructing knowledge in academic disciplines, as viewed from contemporary socio-cultural perspectives. Consideration of how the goals, values, and assumptions of different disciplines shape their writing in distinctive ways and what implications this holds for pedagogy.  
Includes: Experiential Learning Activity  
Also listed as ENGL 4909.  
Prerequisite(s): third-year standing.  
Lectures three hours a week.

ALDS 4404 [0.5 credit]  
Writing and Knowledge-Making in the Professions  
The role of writing in constructing knowledge in the professions, as viewed from contemporary socio-cultural perspectives. How the goals, values, and assumptions of different professions shape their writing in distinctive ways and the implications for theory, research, and practice.  
Includes: Experiential Learning Activity  
Also listed as ENGL 4004.  
Prerequisite(s): third-year standing or permission of the instructor.  
Seminars three hours a week.

ALDS 4405 [0.5 credit]  
Teaching Writing in School and the Workplace  
Introduction to approaches for teaching writing in elementary and secondary school, in university, and in the workplace, with a focus on socio-cultural theories of language and learning. Discussion of applications of these approaches to classroom and workplace teaching.  
Includes: Experiential Learning Activity  
Also listed as ENGL 4515.  
Prerequisite(s): third-year standing, or permission of the instructor.  
Lectures three hours a week.
ALDS 4414 [0.5 credit]
Professional Writing I
The role of writing in government and NGOs.
Consideration of various genres, practices and styles of
government and NGO writing, including, grant proposals,
administrative reports, press releases, briefing notes,
recommendation reports.
Includes: Experiential Learning Activity
Also listed as ENGL 4414.
Prerequisite(s): third-year standing or permission of the
instructor.
Seminars three hours a week. May include a work
placement.

ALDS 4415 [0.5 credit]
Professional Writing II
The role of writing in science-related fields and in the
health professions. Consideration of various genres,
practices and styles of scientific and health-related writing,
including, research reports, grant proposals, case reports,
popularizations of science, press releases.
Includes: Experiential Learning Activity
Also listed as ENGL 4415.
Prerequisite(s): third-year standing or permission of the
instructor.
Seminars three hours a week. May include a work
placement.

ALDS 4602 [0.5 credit]
Second Language Acquisition
Current issues in second language acquisition; factors
influencing success in acquiring a second or additional
language, discourse and culture. Emphasis on theoretical
concepts, empirical research, and practical implications for
language teaching.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Applied Linguistics
and Discourse Studies, or in Linguistics, or enrolment in
the CTESL program, or permission of the instructor.
Lectures three hours a week.

ALDS 4606 [0.5 credit]
Statistics for Language Research
Application of statistical procedures to analysis of
language data and to problems of measurement
in experimental linguistics, applied linguistics,
psycholinguistics, and related fields.
Includes: Experiential Learning Activity
Also listed as LING 4606.
Precludes additional credit for ALDS 4906/LING 4009
Section "B" if taken Winter 2015 or Winter 2016.
Prerequisite(s): third-year standing in Linguistics or
Applied Linguistics and Discourse Studies or Cognitive
Science, or permission of the instructor.
Also offered at the graduate level, with different
requirements, as ALDS 5604 and LING 5606, for which
additional credit is precluded.
Seminars three hours a week.

ALDS 4709 [0.5 credit]
Systemic-Functional Linguistics
Functions of language in the exchange of meanings
between people in a wide variety of communicative
situations. Semantic and syntactic resources at risk in
these different contexts. Interactions between language
and the social context.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Applied Linguistics
and Discourse Studies, or Linguistics, or Journalism, or
Communication Studies, or permission of the instructor.
Also offered at the graduate level, with different
requirements, as ALDS 5102, for which additional credit is
precluded.
Lectures three hours a week.

ALDS 4801 [0.5 credit]
Major Structures of English
This course is intended to familiarize students with the
structure of the English language, highlighting important
contrasts between English and other languages as well as
grammatical difficulties for ESL learners.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Applied Linguistics
and Discourse Studies, or in Linguistics, or enrolment in
the CTESL program, or permission of the instructor.
Lectures three hours a week.

ALDS 4900 [1.0 credit]
Independent Study
Permits fourth-year Honours students to pursue their
interests in a selected area of applied linguistics and
discourse studies.
Prerequisite(s): permission of the instructor.

ALDS 4901 [0.5 credit]
Independent Study
Permits fourth-year Honours students to pursue their
interests in a selected area of applied linguistics and
discourse studies.
Prerequisite(s): permission of the instructor.

ALDS 4906 [0.5 credit]
Special Topic in Applied Linguistics and Discourse
Studies
Selected topics in applied linguistics and discourse
studies. Contents of this course vary from year to year.
Lectures three hours a week.
ALDS 4908 [1.0 credit]  
Honours Project in Applied Linguistics and Discourse Studies  
Individually designed intensive practicum or research experience. May involve (a) practicum or work study placement in writing or literacy studies, language syllabus design or test development; (b) intensive research activity in an area of Applied Linguistics and Discourse Studies. All projects include substantial written work. Includes: Experiential Learning Activity  
Prerequisite(s): fourth-year standing in Applied Linguistics and Discourse Studies, a CGPA of 9.00 or better, or permission of the School.  
Tutorial hours arranged.

Archaeology (Minor)  
This section presents the requirements for programs in:  
• Minor In Archaeology  

Minor In Archaeology (4.0 credits)  
This minor is available to all undergraduate degree students.  
Requirements:  
1. 1.0 credit in:  
   - ARCY 1008 [0.5] Introduction to Archaeology I  
   - ARCY 1009 [0.5] Introduction to Archaeology II  
   Or  
   - CLCV 1008 [0.5] Introduction to Archaeology I  
   - CLCV 1009 [0.5] Introduction to Archaeology II  
2. 1.0 credit in ARCY or approved electives at the 2000 level  
3. 1.0 credit in ARCY or approved electives at the 3000 level  
4. 1.0 credit in ARCY or approved electives at any level  
5. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0  

Approved Archaeology Electives  
Other courses may be substituted for those specified below, when material on archaeology is central to the course. Such substitutions must be individually approved by the Greek and Roman Studies Program Coordinator.

Note: "R" designates that the course is repeatable.

Anthropology  
ANTH 1001 [0.5] Introduction to Socio-Cultural Anthropology  
ANTH 3580 [0.5] Anthropology of Material Culture and Museums  

Art History  
ARTH 1100 [0.5] Art and Society: Prehistory to the Renaissance  
ARTH 1101 [0.5] Art and Society: Renaissance to the Present  
ARTH 1200 [0.5] History and Theory of Architecture: Prehistory to 1500  
ARTH 1201 [0.5] History and Theory of Architecture: 1500 to Present  
ARTH 2102 [0.5] Greek Art and Archaeology  
ARTH 2105 [0.5] Roman Art and Archaeology  
ARTH 2202 [0.5] Medieval Architecture and Art  
ARTH 2310 [0.5] Architecture of the Early Modern World [1400-1750]  
ARTH 2510 [0.5] Architecture of the 18th and 19th Centuries  
ARTH 3102 [0.5] Studies in Greek Art  
ARTH 3105 [0.5] Studies in Roman Art  

Biology  
BIOL 2001 [0.5] Animals: Form and Function  
BIOL 2005 [0.5] Human Biology  

Chemistry  
CHEM 1007 [0.5] Chemistry of Art and Artifacts  

Digital Humanities  
DIGH 2035 [0.5] Technology, Culture and Society  

Greek and Roman Studies  
CLCV 2303/ARTH 2Greek Art and Archaeology  
CLCV 2304/ARTH 2Greek Art and Archaeology  
CLCV 2305/TSES 2Ancient Science and Technology  
CLCV 3301 [0.5] Field Work I: Greek and Roman World (R)  
CLCV 3306/ARTH 3Studies in Greek Art (R)  
CLCV 3307/ARTH 3Studies in Greek Art (R)  
CLCV 3400 [0.5] Greek and Roman Studies Abroad (R)  
CLCV 4000 [0.5] Field Work II: Greek and Roman World (R)  

Earth Sciences  
ERTH 2312 [0.5] Paleontology  
ERTH 2401 [0.5] Dinosaurs  
ERTH 2415 [0.5] Natural Disasters  
ERTH 3111 [0.5] Vertebrate Evolution: Mammals, Reptiles, and Birds  
ERTH 3112 [0.5] Vertebrate Evolution: Fish and Amphibians  
ERTH 3113 [0.5] Geology of Human Origins  

Geography  
GEOG 1010 [0.5] Global Environmental Systems  
GEOG 2014 [0.5] The Earth's Surface  
GEOG 3102 [0.5] Geomorphology  
GEOG 3108 [0.5] Soil Properties  

Geomatics  
GEOM 1004 [0.5] Maps, Satellites and the Geospatial Revolution  
GEOM 2007 [0.5] Points, Lines and Polygons  
GEOM 3002 [0.5] Introduction to Remote Sensing  

Religion  
RELI 3732 [0.5] Studies in Greek Art  
RELI 3733 [0.5] Studies in Roman Art  

Sociology  
SOCI 2035 [0.5] Technology, Culture and Society  

Technology, Society, Environment Studies  
TSES 2305/CLCV 2Ancient Science and Technology  

Regulations  
In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students, including the process of
Academic Performance Evaluation. See the Academic Regulations of the University section of this Calendar.

Archaeology (ARCY) Courses

**ARCY 1008 [0.5 credit]**
Introduction to Archaeology I
Introduction to the history, theory and practice of field archaeology. Excavations from all time periods and global regions will be discussed. Focus will be placed on excavation methods and technology, including dating, that enhance understanding of sites both on land and underwater.
Also listed as CLCV 1008.
Precludes additional credit for CLCV 2300 (no longer offered).
Lecture three hours a week

**ARCY 1009 [0.5 credit]**
Introduction to Archaeology II
Continues the examination of various aspects of field archaeology begun in ARCY 1008 (also CLCV 1008). This course places greater focus on recent approaches to the interpretation of remains. These include environmental, cognitive and bioarchaeological approaches.
Also listed as CLCV 1009.
Precludes additional credit for CLCV 2300 (no longer offered).
Lecture three hours a week.

**ARCY 3000 [0.5 credit]**
Archaeological Field Work I
Students will participate for a minimum of three weeks on an archaeological field project (ie. excavation or survey). They will learn archaeological documentation and the analysis, recording, and processing of finds. The field project may be anywhere in the world and any time period.
Includes: Experiential Learning Activity
Prerequisite(s): ARCY 1008 and ARCY 1009 or CLCV 1008 and CLCV 1009 or CLCV 2300 (no longer offered) and permission of the unit. Permission of the unit is required to repeat this course.
Field work

**ARCY 3301 [0.5 credit]**
Field Work I: Greek and Roman World
Students will participate for a minimum of three weeks on an archaeological field project (ie. excavation or survey) relevant to the Greek and Roman world. They will learn archaeological documentation and the analysis, recording, and processing of finds.
Includes: Experiential Learning Activity
Also listed as CLCV 3301.
Prerequisite(s): ARCY 1008 and ARCY 1009 or CLCV 1008 and CLCV 1009 or CLCV 2300 (no longer offered) and permission of the unit. Permission of the unit is required to repeat this course.
Field work

**ARCY 4000 [0.5 credit]**
Field Work II: Greek and Roman World
Students participate for a minimum of three weeks in a position of responsibility (for example, as a trench supervisor or lab assistant) on an archaeological field project relevant to the Greek and Roman world.
Includes: Experiential Learning Activity
Also listed as CLCV 4000.
Prerequisite(s): 0.5 credit in fieldwork at third year level and permission of the unit. Permission of the unit is required to repeat this course.
Field work

**ARCY 4100 [0.5 credit]**
Archaeological Field Work II
Students participate for a minimum of three weeks in a position of responsibility on an archaeological field project (eg. trench supervisor or lab assistant). The field project may be anywhere in the world and any time period.
Includes: Experiential Learning Activity
Prerequisite(s): 0.5 credit in fieldwork at third year level and permission of the unit. Permission of the unit is required to repeat this course.
Field work

Architectural Studies

This section presents the requirements for programs in:

- Design B.A.S.
- Urbanism B.A.S. Honours
- Conservation and Sustainability B.A.S. Honours

The Azrieli School of Architecture and Urbanism cooperates with the School for Studies in Art and Culture in offering the History and Theory of Architecture B.A. and B.A. Honours programs (see the Art History program section of this Calendar for details).

**Total Credits:** 20.0

### Regulations (B.Architectural Studies)

In addition to the specific program requirements, students must satisfy the academic regulations of the university, and the faculty regulations for the degree, below. Students should consult the School when planning their program and selecting courses.

### Residency Requirement

**B.A.S. Hons.**
- Conservation and Sustainability
- Urbanism

To be eligible to graduate, students in these programs must present a minimum of 5.0 residency credits in their degree program.

**B.A.S. Hons.**
- Design

To be eligible to graduate, students in this program must present a minimum of half the total number of credits required in their program as residency credits.

For more information, consult section 2.2.2/3.4.1 Minimum Number of Residency Credits (Residency and Advanced Credits) in the Academic Regulations of the University section of this Calendar.

### Retention of Work

Keeping a good portfolio is a most important part of architectural education. A portfolio represents a record of the student's progress and design experience over the years, and is an indispensable requirement for any future job application. A portfolio is started in first year and continues to expand until graduation. The School, therefore, requires that each student produce reductions (normally 8 1/2 x 11 inch reproductions, colour or black and white, slides, and/or digital format CD) of his or her work at the end of each term. One copy of the work should be put in the student's portfolio and the other turned in to the instructor for retention in the School's archives. (This facilitates retrospective exhibitions of work, accreditation, publications and any future references for pedagogic purposes.) Original work is the property of the students, but the School retains the right to keep work of merit for up to two years after the date of submission. The School will make every effort to preserve the work in good condition, and will give authorship credit and take care of its proper use.

### Academic Performance Evaluation

**Bachelor of Architectural Studies**

**B.A.S. Conservation and Sustainability, B.A.S. Urbanism**

These programs follow the academic performance evaluation regulations governing Honours programs as described within sections 3.2.1 to 3.2.6 of the Academic Regulations of the University.
All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

**Undergraduate Co-operative Education Policy**

**Admission Requirements**

Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

**Participation Requirements**

**COOP 1000**

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

**Communication with the Co-op Office**

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

**Employment**

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The
summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

**Registering in Co-op Courses**
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

**Work Term Assessment and Evaluation**
To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

**Voluntary Withdrawal from the Co-op Option**
Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**
Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

**International Students**
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

**Bachelor of Architectural Studies: Co-op Admission and Continuation Requirements**
• Maintain full-time status in each study term (2.0 credits);
• Be eligible to work in Canada (for off-campus work)
• Have successfully completed COOP 1000 [0.0]

In addition to the following:
1. Registered as a full-time student in the B.A.S. program;
2. Obtained and maintained an overall CGPA of 9.00 or higher.
Students in the Bachelor of Architectural Studies must successfully complete three (3) work terms to obtain the co-op designation.

**Work Term Report Course:** ARCN 3999 [0.0]

**Admissions Information**

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

**Degree**
- Bachelor of Architectural Studies (B.A.S.)

**Admission Requirements**

**First Year**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include English, Physics and Advanced Functions. Calculus and Vectors is strongly recommended.

Note: a portfolio is required.

**Advanced Standing**

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate. Students will not receive credit for courses graded below C-.

**Co-op Option**

Direct Admission to the First Year of the Co-op Option

Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the B.A.S. program;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Architecture - Studio (ARCS) Courses**

**ARCS 1005 [0.5 credit]**

**Drawing**
Free-hand drawing as a way of observing and understanding the world. Various media and techniques introduced through a wide range of studio and outdoor exercises. (Core Course).
Includes: Experiential Learning Activity
Prerequisite(s): registration in the B.A.S. program.
Six hours a week.

**ARCS 1105 [1.0 credit]**

**Studio 1**

Students from all BAS majors are introduced to the fundamentals of designing for the built environment using the conventions of varied modes of analog representation and physical making. (Core Course).
Includes: Experiential Learning Activity
Prerequisite(s): registration in the B.A.S. program.
Studio eight hours per week.

**ARCS 2105 [1.5 credit]**

**Studio 2**

Supported by the core curriculum, focuses on small-scale building in a local context. Using analog methods, projects introduce the integration of basic structure and building systems while furthering fundamental concepts such as space, inhabitation, and materiality. (Core Course).
Includes: Experiential Learning Activity
Prerequisite(s): ARCS 1005 and ARCS 1105.
Twelve hours studio, plus one hour lecture per week.

**ARCS 2106 [1.5 credit]**

**Studio 3**

With a focus on small to medium scale building projects, projects consider analog and digital methods to advance consideration of site, program, and the materials as the means for shaping the built environment. (Core Course).
Includes: Experiential Learning Activity
Prerequisite(s): ARCS 1005 and ARCS 1105.
Twelve hours studio, plus one hour lecture per week.
ARCS 2302 [1.0 credit]  
Conservation Studio 1  
Conservation methodologies will be tested and studied through design exercises and historical research on existing architectures, cities and landscapes. The emphasis on the understanding and the relation with the setting will be essential. 
Includes: Experiential Learning Activity  
Prerequisite(s): ARCC 3502, ARCS 1005, ARCS 1105 and second-year standing in B.A.S. major Conservation and Sustainability or permission of the School.  
Eight hours studio per week.

ARCS 2303 [1.0 credit]  
Urbanism Studio 1: Fundamentals of Urbanism  
Through readings, discussions and projects, students will examine a number of the forces that produce the built environment and explore a variety of approaches to documenting, representing, analyzing, organizing and controlling the growth, shape, density, and mix of uses associated with cities.  
Includes: Experiential Learning Activity  
Precludes additional credit for ARCU 2303 (no longer offered), ARCU 3501 (no longer offered).  
Prerequisite(s): ARCS 1005 and ARCS 1105, or permission of instructor.  
Eight hours studio, plus one hour lecture per week.

ARCS 3105 [1.5 credit]  
Studio 4  
Supported by the core curriculum, focuses on a medium-scale building within a regional context. May include a small design-build. Projects further analog and digital methods. May introduce concepts like adaptive re-use while furthering the understanding of structure and building systems in a complex building. (Core Course).  
Includes: Experiential Learning Activity  
Prerequisite(s): ARCS 2105 and ARCS 2106.  
Twelve hours studio, plus one hour lecture per week.

ARCS 3107 [1.0 credit]  
Studio 5  
The Directed Studies Abroad (DSA) studio considers large-scale, mixed-use buildings in an international context. Design projects advance analog and digital methods to explore broader cultural and social conditions within a complex site often in conjunction with a site visit abroad. (Core Course).  
Includes: Experiential Learning Activity  
Precludes additional credit for ARCS 3106 (no longer offered).  
Prerequisite(s): ARCS 2105 and ARCS 2106.  
Eight hours studio, plus one hour lecture per week.

ARCS 3301 [1.0 credit]  
Conservation Studio 2  
Historical building projects exploring architecture as a form of cultural expression. Consideration of site, program and materials. Introduction of conservation, sustainability and adaptive re-use principles, development standards, architectural codes, using case studies in Ottawa and elsewhere. Physical, digital drawings and models to explore designs. (Core).  
Includes: Experiential Learning Activity  
Precludes additional credit for ARCC 3301 (no longer offered).  
Prerequisite(s): ARCC 3502, ARCS 2302 and third-year standing in B.A.S. Conservation and Sustainability major or permission of the School.  
Studio eight hours per week.

ARCS 3302 [1.0 credit]  
Conservation Studio 3  
The role of architecture in culture, stressing site and program with respect to their historic, social and ecological implications. Synthesis of issues, methods and techniques of the conservation and sustainability curriculum. (Core Course).  
Includes: Experiential Learning Activity  
Precludes additional credit for ARCC 3302 (no longer offered).  
Prerequisite(s): ARCS 3301 and third-year standing in B.A.S. Conservation and Sustainability major or permission of the School.  
Studio eight hours per week.

ARCS 3303 [1.0 credit]  
Urbanism Studio 2: Urbanism in the Core  
Intensification, revitalization, gentrification, brownfield redevelopment, sustainability, development standards, form-based codes, and the larger impact of migration on urban density. Through design, students explore the ramifications of practices, policies, pressures, processes and cultural preferences on the evolving form and function of the urban core.  
Includes: Experiential Learning Activity  
Precludes additional credit for ARCU 3303 (no longer offered).  
Prerequisite(s): ARCN 2105 and ARCS 2302, and third-year standing in B.A.S. Urbanism major or permission of the School.  
Eight hours studio, plus one hour lecture per week.
ARCS 3304 [1.0 credit]
Urbanism Studio 3: Urbanism on the Periphery
Urbanization, sprawl, growth models, land consumption, containment strategies (smart growth, greenbelts, growth boundaries), edge cities, the Just City, Ecological Urbanism, and informal suburbanization in developed and developing countries. Through design, students explore the impact of practices, pressures, processes and cultural preferences on the expanding city.
Includes: Experiential Learning Activity
Precludes additional credit for ARCU 3304 (no longer offered).
Prerequisite(s): ARCN 2105, ARCS 2303 and third-year standing in B.A.S. Urbanism major or permission of the School.
Eight hours studio, plus one hour lecture per week.

ARCS 4105 [1.5 credit]
Comprehensive Studio
Focussing on multi-unit housing, students from BAS majors collaborate to develop strategies for redevelopment of large urban sites. Engages urban design, site planning, programming, adaptive reuse, and community consultation. Students produce detailed designs for buildings, emphasizing building systems and envelope design. (Core Course).
Includes: Experiential Learning Activity
Prerequisite(s): ARCS 3105 and ARCS 3107, or ARCS 3303 and ARCS 3304.
Twelve hours studio, plus one hour lecture per week.

ARCS 4107 [1.0 credit]
Option Studio
Offers a range of topics for exploration. Students use analog and digital methods and techniques to culminate the undergraduate studio sequence while offering focused research-led investigation into key social, political, spatial issues. (Core Course).
Includes: Experiential Learning Activity
Precludes additional credit for ARCS 4106 (no longer offered).
Prerequisite(s): ARCS 3105 and ARCS 3107.
Eight hours studio, plus one hour lecture per week.

ARCS 4301 [1.5 credit]
Conservation Studio 4
Issues of program and site as the culturally defining aspects of sustainable architectural practice within complex urban and social situations, using difficult sites, historically significant buildings and/or locations and hybrid programs. projects brought to a high degree of formal and graphic resolution. (Core Course).
Includes: Experiential Learning Activity
Precludes additional credit for ARCC 4301 (no longer offered).
Prerequisite(s): ARCS 3302 and fourth-year standing in B.A.S. Conservation and Sustainability major or permission of the School.
Twelve hours studio and one hour of lecture per week.

ARCS 4302 [1.0 credit]
Conservation Studio 5
Conservation decision-making process and contemporary conservation concepts in the development of a design for the adaptive reuse, in Ottawa and elsewhere.
Consideration of sustainability aspects, site, program, and materials.
Includes: Experiential Learning Activity
Precludes additional credit for ARCC 4302 (no longer offered).
Prerequisite(s): ARCS 4301 and fourth-year standing in B.A.S. Conservation and Sustainability major or permission of the School.
Studio eight hours per week.

ARCS 4303 [1.5 credit]
Urbanism Studio 4: Housing
Housing as it affects urban form. The design of multi-unit housing in a variety of forms and for a range of demographic groups. After thorough research of applicable codes and bylaws, students engage the design of housing at the site, building and detail level.
Includes: Experiential Learning Activity
Precludes additional credit for ARCU 4303 (no longer offered).
Prerequisite(s): ARCS 3303 and ARCS 3304 and fourth-year standing in B.A.S. Urbanism major or permission of the School.
Studio twelve hours per week and one hour lecture.

ARCS 4304 [1.0 credit]
Urbanism Studio 5: Global Perspectives
Urbanization as a global phenomenon. Study of various forms of urbanization and de-urbanization in relation to economic, political and cultural forces. Through design, students explore the (trans)formation of settlements and communities outside of the North American context.
Includes: Experiential Learning Activity
Precludes additional credit for ARCU 4304 (no longer offered).
Prerequisite(s): ARCS 3303 and ARCS 3304 and fourth-year standing in B.A.S. Urbanism major or permission of the School.
Eight hours studio, plus one hour lecture per week.

Architecture - Technical (ARCC) Courses

ARCC 1202 [0.5 credit]
History of Structures
A survey of the history, theory, and science of structures pertaining to buildings and civic works. Structural systems, construction techniques, materials and details, and the cultural factors involved in the synthesis of traditional structural design.
Includes: Experiential Learning Activity
Prerequisite(s): registration in B.A.S.
Lectures three hours a week, laboratory is block scheduled.
ARCC 2001 [0.5 credit]
Structures in Architecture
Survey of structural planning, including a historical survey of structural systems, details and the study of the factors involved in the synthesis of a suitable structural scheme. The course is intended as a survey of the science and the structural properties of materials. (Elective Course). Includes: Experiential Learning Activity
Precludes additional credit for ARCC 1103.
Lectures three hours a week, laboratory is block scheduled.

ARCC 2202 [0.5 credit]
Architectural Technology 1
General introduction to materials and methods of construction with focus on wood and timber frame construction. Site conditions, foundations, structure and envelope design in terms of their response to local climate: sun (light and heat) wind, moisture. (Core course). Prerequisite(s): permission of the School.
Lectures three hours a week.

ARCC 2203 [0.5 credit]
Architectural Technology 3
Wood frame, post and beam, steel and concrete systems and construction techniques. Structural systems and building envelope principles and practise are explored in conjunction with mechanical and electrical systems in smaller buildings. Emphasis on precedent, tradition and methodology of architectural detailing for construction. Includes: Experiential Learning Activity
Prerequisite(s): ARCC 2202 and third-year standing for B.A.S. students and third-year standing for students in B.Eng. Architectural Conservation and Sustainability.
Lectures three hours a week.

ARCC 3004 [0.5 credit]
Workshop: Energy and Form
Relationship between environmental factors, energy and architectural form. Ways in which buildings and building elements can be planned and designed to take advantage of natural cycles in order to minimize the need for supportive energy inputs. (Workshop). Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCC 3202 [0.5 credit]
Architectural Technology 4
Medium scale steel, concrete, and wood frame buildings as case studies to explore approaches to building science principles, building envelope design, advanced construction methods and materials, acoustics and sound control, and fire protection. Focus on sustainable design strategies and environment impact. (Core course). Prerequisite(s): ARCC 2203 and third-year standing for B.A.S. students or ARCC 2203 and third-year standing for students in B.Eng. Architectural Conservation.
Lectures three hours a week.

ARCC 3305 [0.5 credit]
Materials Application
Application of building materials, including the forming of building parts and the design of joints for performance and assembly. Practical constructions using new technology are emphasized. (Workshop). Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCC 3502 [0.5 credit]
Introduction to Architectural Conservation
Introduces conservation concepts to understand the values associated with existing buildings and landscapes. Through the analysis of sites and case studies, students will discuss the potentials and limitations of architectural conservation, as well as, testing its possibilities for sustainable retrofitting practices. Includes: Experiential Learning Activity
Precludes additional credit for ARCC 3501 (no longer offered).
Lectures three hours per week

ARCC 3902 [0.5 credit]
Architectural Technology
A specific aspect of architecture in the area of architectural technology. Offerings vary from year to year. (Workshop). Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, workshop or field work six hours a week.

ARCC 4100 [0.5 credit]
Lighting for Architecture
A study of daylighting and/or lighting design techniques, with a focus on project-based learning. (Workshop). Includes: Experiential Learning Activity
Prerequisite(s): ARCC 2203 or permission of the School.
Lecture, seminar, workshop or field work six hours a week.

ARCC 4102 [0.5 credit]
Acoustics in Architecture
Sound in enclosures, including interior design of auditoria and special applications. Sound reproduction and reinforcement systems. Acoustic privacy and protection, sound control in buildings, materials for noise control, community noise, industrial noise. Acoustic measurements and instrumentation. (Elective Course).
Includes: Experiential Learning Activity
Prerequisites: ARCC 3002.
Lectures two hours, laboratory two hours a week.

ARCC 4103 [0.5 credit]
Energy and Form
Energy as a criterion in decision-making for architectural design. Conventional energy resources and state-of-the-art alternative energy resource systems with respect to building shape, size, materials, openings, orientation, siting, and use. (Elective Course).
Precludes additional credit for ARCC 3003.
Lectures three hours a week.
ARCC 4200 [0.5 credit]
Structural Morphology
Interdisciplinary study of structural and developmental morphology focusing on dynamic generative design processes, integrative systems, spatial modulations and fundamental generative principles of spatial form and structure as it relates to architecture. (Workshop).
Includes: Experiential Learning Activity
Lectures, seminar, workshop or field work six hours a week.

ARCC 4202 [0.5 credit]
Wood Engineering
Also listed as CIVE 4202.
Prerequisite(s): CIVE 2200, CIVE 2700.
Lectures three hours a week, problem analysis three hours alternate weeks.

ARCC 4207 [0.5 credit]
Advanced Building Assessment
In-depth study of the conventions, methods, and tools used in the assessment of buildings and their sites including traditional field survey, photogrammetry, laser scanning technologies, and hybrid representations.
Includes: Experiential Learning Activity
Precludes additional credit for ARCC 4900 (no longer offered).
Prerequisite(s): enrolment in the BAS Conservation and Sustainability program and fourth-year standing.
Laboratories, lectures, field trips, six hours a week.

ARCC 4300 [0.5 credit]
Building Materials
Contemporary and traditional construction techniques and materiality are discussed within the framework of current practices, with emphasis on the analysis of material properties, structure and sustained performance, as well as their contribution to the adaptive reuse of existing and/or historical building. (Elective Course).
Includes: Experiential Learning Activity
Precludes additional credit for ARCC 3300.
Laboratories, lectures, field trips four hours a week.

ARCC 4400 [0.5 credit]
Design for Construction
Design in relation to materials and building construction including the effects of building codes, zoning bylaws, approvals, processes and legislation, the organization of the building industry, and cost estimating control. (Elective Course).
Includes: Experiential Learning Activity
Prerequisite(s): ARCC 3300 or permission of the School.
Lectures, seminars, field work three hours a week.

ARCC 4500 [0.5 credit]
Design Economics
Precludes additional credit for ARCC 3500.
Prerequisite(s): fourth-year standing in the B.A.S. program or permission of the School.
Three hours a week.

ARCC 4801 [0.5 credit]
Architectural Technology
A specific aspect of architecture in the area of architectural technology. Topics vary from year to year. (Elective Course).
Prerequisite(s): permission of the School.

ARCC 4808 [0.5 credit]
Independent Study
( Elective Course).

ARCC 4909 [1.0 credit]
Honours Project
Students propose a topic of study in Conservation & Sustainability for approval and produce a substantial research project, supervised by BAS faculty. (Core Course).
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in BAS Conservation and Sustainability.

Architecture - Techniques (ARCN) Courses

ARCN 1005 [0.5 credit]
Introduction to Drawing: Seeing Through the Hand
Fundamental concepts of line and line weight, light and shadow, perspective, contrast and composition. Exercises will include some mixed media and will introduce students to drawing as a way of translating ideas into images.
Includes: Experiential Learning Activity
One hour lecture and two hours drawing/discussion.

ARCN 2105 [0.5 credit]
Digital Practice and Theory
Computer modeling as a medium of architectural analysis, documentation, and presentation. Principles and techniques of 2D drawing and 3D modeling. Extensive practical work using appropriate applications. (Core Course).
Includes: Experiential Learning Activity
Prerequisite(s): second-year B.A.S. standing or permission of the School.
Lectures three hours a week.
ARCN 2106 [0.5 credit]
Introduction to Multimedia
Analogue and digital systems and graphic processes used in the making of images. Fundamentals of still photography and videography combined with current computer technologies in the application of visual communication techniques.
Includes: Experiential Learning Activity
Precludes additional credit for IDES 2106.
Lectures three hours a week, laboratory three hours a week.

ARCN 3003 [0.5 credit]
Theatre Production
Design and fabrication of theatre productions, one of which is staged on campus. Visiting directors, designers, technical consultants and others. Visits to theatres and production facilities. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCN 3206 [0.5 credit]
Computer Applications
Application of existing software and programming techniques to various architectural problems. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCN 3302 [0.5 credit]
The Anatomy of Architecture
The architectural anatomy of selected contemporary buildings. Use of graphic techniques of analysis to develop an understanding of their basic compositional principles and language. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCN 3303 [0.5 credit]
Architecture as Painting
Analysis of architecture for its elemental, formal and narrative properties. These relationships through the medium of painting. Architecture as analogy to painting. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCN 3400 [0.5 credit]
Visual Design
Development of the capacity to visualize and communicate in several graphic media. Development of sensitivity to form, structure, space, texture and colour. May involve historical investigation. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCN 3401 [0.5 credit]
Photography
Traditional and alternative techniques for image making and manipulation. Basic image formation techniques, advanced darkroom manipulations, past-darkroom imaging, and digital imaging within a theoretical overview of current photographic processes and techniques. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCN 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

ARCN 4100 [0.5 credit]
Historic Site Recording and Assessment
Methods of heritage building documentation including hand recording, photography, rectified photography, total station, gps, photogrammetry, and laser scanning. Non-destructive testing techniques; environmental assessment tools for determining air quality and energy efficiency. Multidisciplinary teams for all project work.
Includes: Experiential Learning Activity
Also listed as CIVE 3207.
Precludes additional credit for ARCN 3100 (no longer offered).
Prerequisite(s): second-year standing in B.A.S. Conservation and Sustainability.
Lectures three hours a week, lab or field work two hours a week.

ARCN 4102 [0.5 credit]
Problems in Computing
Various types of non-numeric data, their representation within primary and secondary storage, and the manipulation of various representations. Comparative evaluation of languages for non-numeric problems. (Elective Course).
Includes: Experiential Learning Activity
Precludes additional credit for ARCN 3102.
Prerequisite(s): permission of the School.
Lectures two hours a week, laboratory two hours a week.

ARCN 4103 [0.5 credit]
Digital Fabrication and Theory
The changing relationship of architectural design and digital technology with a focus on 1:1 constructions using emerging computational software and fabrication techniques. (Workshop/ Elective Course).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lectures two hours a week, laboratory two hours a week.
ARCN 4200 [0.5 credit]
Building Pathology and Rehabilitation
Deterioration mechanisms for concrete, timber, steel and masonry structures. Identification of design deficiencies; criteria for selection and design of rehabilitation systems. Design techniques to reduce deterioration in new construction and historical structures.
Includes: Experiential Learning Activity
Also listed as CIVE 4601.
Prerequisite(s): ARCN 4100 and third-year standing in B.A.S. Conservation and Sustainability.
Lectures three hours a week, lab/field work two hours a week.

ARCH 4808 [0.5 credit]
Independent Study
(Elective Course).
Includes: Experiential Learning Activity

Architecture - Theory/History (ARCH) Courses
ARCH 1000 [0.5 credit]
Introduction to Architecture
Architecture in the matrix of human conditions: linkages among architecture, fine arts, humanities, social sciences, physical sciences, mathematics and philosophy. Architectural ideas will be introduced through a discussion of cities, buildings and landscapes. (Core Course).
Lectures three hours a week.

ARCH 1005 [0.5 credit]
Contemporary Society
The relationship of architecture, architectural thought and the architectural profession to the societies in which they exist (and which they must serve). Topics are selected to emphasize key issues. (Elective Course).
Lectures and seminars, three hours a week.

ARCH 2006 [0.5 credit]
Theory and History of Design
The theoretical and historical background of industrial design and design; disciplinary foundations and interdisciplinary connections; methodological aspects and economic and social contexts; contemporary scenarios in design; technological innovation and manufacturing processes. (Elective course).
Also listed as IDES 1000.
Lectures three hours a week.

ARCH 2101 [0.5 credit]
Industrial Design Analysis
Principles of comparative product design analysis covering marketing and sales, manufacturing techniques and materials, ambiance and qualities of the object/context relationship, and design analysis from the perspective of the designer, the end-user and the environment. (Elective course).
Includes: Experiential Learning Activity
Also listed as IDES 1001.
Prerequisite(s): ARCH 2006 or IDES 1000.
Lectures three hours a week.

ARCH 2300 [0.5 credit]
Introduction to Modern Architecture
Architectural and urban ideals of modernism with emphasis upon the development of the avant-garde in the early twentieth century. The phenomenon of modern architecture within the broader framework of the development of western thought. (Core Course).
Precludes additional credit for ARCH 3009.
Prerequisite(s): B.A.S. students require ARTH 1100 or ARTH 1200 and ARTH 1101 or ARTH 1201.
Lectures three hours a week.

ARCH 3208 [0.5 credit]
Urban Space Architecture
Design explorations that are directed towards the search for aesthetic form and meaning in urban space, with particular application to the Canadian context. Project-oriented. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCH 3902 [0.5 credit]
Theory of Architecture
Workshop focuses on one specific aspect of architecture in the area of theory and history. Workshop offerings change from year to year. (Workshop).
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCH 4002 [0.5 credit]
Canadian Architecture
Canadian architecture from the seventeenth century to the present day, covering both stylistic and technological developments. Building styles, methods, and materials in the context of social and economic conditions and construction techniques. (Theory/History Elective).
Includes: Experiential Learning Activity
Also listed as ARTH 3002.
Precludes additional credit for ARCH 3002.
Prerequisite(s): ARCH 2300 or permission of the School.
Lectures, seminars three hours a week.

ARCH 4004 [0.5 credit]
Architectural Theory
An exploration of architectural intentions in the early period of Western history, with special emphasis on Renaissance treatises and ideas. Architectural intentions in relation to shifting world-views as a basis of historical interpretation. (Theory/History Elective).
Precludes additional credit for ARCH 3007.
Lectures three hours a week.

ARCH 4006 [0.5 credit]
Origins of Modernism
Exploration of architectural theories with special emphasis on the European context from the seventeenth century to the late nineteenth century. (Theory/History Elective).
Precludes additional credit for ARCH 3008.
Prerequisite(s): ARCH 2300 or permission of the School.
Lectures three hours a week.
ARCH 4008 [0.5 credit]  
Foundations of Modernism  
Major critical perspectives as applied to architecture as a fine art. The debate between classicism and romanticism with consideration of its cultural roots. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4009 [0.5 credit]  
Theory of the Avant-Garde  
Exploration of architectural theories with special emphasis on the development of the avant-garde in the early twentieth century, looking at the avant-garde within the larger framework of modernism. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4105 [0.5 credit]  
Theories of Landscape Design  
Introduction to landscape architecture as the organization of outdoor space. Historical, cultural, economic and political factors as a basis for interpreting spatial organization in urban and rural areas of human settlement. Emphasis on the period from the fifteenth to the nineteenth century. (Theory/History Elective).  
Prerequisite(s): second-year standing or above.  
Lectures three hours a week.

ARCH 4200 [0.5 credit]  
Architectural Conservation Philosophy and Ethics  
Analysis of philosophical theories and related approaches to the material transformation of buildings. Micro-histories in architectural conservation theory and practice; overview of historical and contemporary concepts in architectural conservation. Preservation, restoration, rehabilitation, reconstruction, adaptive re-use, conservation anamnesis, diagnosis.  
Prerequisites additional credit for ARCH 3100 (no longer offered).  
Prerequisite(s): third-year standing B.A.S. or third-year status in B.Eng. (Architectural Conservation and Sustainability).  
Lectures three hours a week.

ARCH 4201 [0.5 credit]  
History of Modern Housing  
Study of housing as a function of social organization, demographics, market demand and public policy. Topics include the evolution of housing form, the role of the state, and the participation of architects in the housing marketplace in the 19th and 20th century. (Theory/History Elective).  
Prerequisite(s): third-year standing in the B.A.S. program or permission of the School.  
Lectures three hours a week.

ARCH 4204 [0.5 credit]  
The Design Professions  
Architecture and design professions in relation to traditional professions and to occupations in art and design. Professions in the development of culture and society; education, career and work; knowledge in the design professions; and the nature of design practice. (Elective Course).  
Also listed as SOCI 4204.  
Prerequisite(s): third-year standing in the B.A.S. program; fourth-year standing in Sociology; fourth-year standing in the B.A. Honours Architecture/Art History program; or permission of the School.  
Seminar three hours a week.

ARCH 4205 [0.5 credit]  
User-Building Synopsis  
Includes: Experiential Learning Activity  
Prerequisite(s): permission of the School.  
Lecture, seminar, lab or field work six hours a week.

ARCH 4206 [0.5 credit]  
Recycling Architecture in Canada and Abroad  
Concepts of mediating old and new architecture at the scale of the city through to the detail of the construction joint. Issues in sustainability and cultural identity illuminated by recycled architecture and adaptive reuse are explored through readings, drawings and case studies. (Theory/History Elective).  
Prerequisite(s): third-year standing in the B.A.S. program or by permission of the instructor; fourth-year standing in the B.Eng. Architectural Conservation and Sustainability program.  
Lectures three hours a week.

ARCH 4300 [0.5 credit]  
Neo-Classical Architecture  
18th - and 19th- century architecture and urban form in Western Europe. Emphasis on the cultural and philosophical framework of rising modernity to illuminate architectural production and theory as well as the development of urban form. (Theory/History Elective).  
Prerequisites additional credit for ARCH 1201 and ARCH 2200.  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4301 [0.5 credit]  
Post-War Architecture  
Theoretical, ideological and artistic debates that have influenced the development of world architecture since 1950. (Theory/History Elective).  
Also listed as ARTH 4604.  
Prerequisite(s): ARCH 2300 or ARTH 3609 or permission of the instructor.  
Lecture or seminar three hours per week.
ARCH 4302 [0.5 credit]  
Pre-Columbian Architecture  
Monumental temples of the ancient Mesoamericans are compared with other world traditions at similar levels of cultural development. Selected examples considered in terms of morphology, technology, iconography, social/political context, world view and general architectural theory. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4303 [0.5 credit]  
Greek Architecture  
Architecture of Greek antiquity and its relationship to its philosophical, artistic, and mythical contexts. The development of the idea of the city; the presence of architecture within its symbolic landscape. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4304 [0.5 credit]  
The Architecture of Rome  
Rome in its classical to late-antique periods. Its founding mythologies and landscape. In-depth analysis of Rome, with special attention to its public buildings. Early Christian architecture within the Roman context. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4305 [0.5 credit]  
Medieval Architecture  
Gothic architecture and its relation to its philosophic and artistic predecessors. Special attention to the coexistence of the monastic tradition, late Romanesque building, and new experiments in gothic during this period, marked by intellectual and political ferment. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4306 [0.5 credit]  
Renaissance Theory  
The rise of architectural theory within the context of the Italian Renaissance. Canonic texts explored and compared in the context of the architectural developments of the period. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4307 [0.5 credit]  
Muslim Architecture  
Historical and theoretical discussions about the architecture of Muslim cultures. Selected sites and monuments from eighth to eighteenth century, covering the vast geography from North Africa to Southeast Asia. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4308 [0.5 credit]  
Asian Architecture  
Anthropological history of the architecture of the Near and Far East. The architecture and urban form of Ancient Egypt, Anatolia, Sumer and Persia; ancient China and India. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4309 [0.5 credit]  
Mesoamerican Architecture  
Selected works of Mesoamerican architecture in terms of iconography, morphology, technology, function, historical development, and concept. Mesoamerican architectural features compared with other world traditions. Emphasis on design. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4400 [0.5 credit]  
Theory  
A survey of the architectural and urban history of a specific culture. These discussions address the present reality of a country, region or city being visited by the fourth year of the program. (Elective Course).  
Prerequisite(s): clear standing to fourth year and permission of the School.  
Lectures three hours a week.

ARCH 4502 [0.5 credit]  
Research and Criticism  
Preparation for the independent research and design work. Work related to the nature of research and criticism in architecture, with emphasis on current issues. (Theory/History Elective).  
Includes: Experiential Learning Activity  
Lectures and seminars three hours a week.

ARCH 4505 [0.5 credit]  
Seminar in Theory and History  
History and theory of architecture. Topics will vary from year to year. Limited enrolment. (Elective Course).  
Prerequisite(s): fourth-year standing in the B.A.S. or B.A. (Honours) Architecture/Art History programs, or permission of the School.  
Lectures three hours a week.

ARCH 4801 [0.5 credit]  
Special Topics  
An aspect of architecture in the area of theory and history. Topics vary from year to year. (Theory/History Elective).  
Prerequisite(s): ARCH 2300 or permission of the School.  
Lectures three hours a week.

ARCH 4808 [0.5 credit]  
Independent Study  
( Elective Course).
ARCH 4900 [0.5 credit]
Directed Reading
Supervised readings and research projects. Guidelines must be obtained from BAS Academic Advisors prior to registration. (Core course).
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.A.S (Philosophy and Criticism).

ARCH 4909 [1.0 credit]
Honours Project
Students propose a topic of study in Philosophy and Criticism for approval and produce a substantial research project, supervised by BAS faculty. (Core course).
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.A.S (Philosophy and Criticism).

Architecture - Urban (ARCU) Courses

ARCU 2100 [0.5 credit]
Special Topics in Urbanism
Seminar in selected topics related to Urbanism at an introductory level.
Lecture and discussion three hours per week.

ARCU 3100 [0.5 credit]
The Morphology of the City
Primary structural, spatial and formal organization and elements that characterize the morphology of cities; historical and contemporary significance for architecture and urban design. (Core).
Prerequisite(s): First-year standing in the B.A.S. Urbanism major, second or third-year standing in other B.A.S. majors, or permission of the School.
Lecture two hours a week and tutorial one hour a week.

ARCU 3203 [0.5 credit]
Landscape Architecture
Practical significance of landscape elements as they relate to built-form by integrating structure and site. (Workshop).
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCU 3405 [0.5 credit]
Urban Design
Project-based workshop investigating current design attitudes and solutions affecting the physical morphology of cities. Formally sophisticated urban design projects. Various procedures and basic urban design ideas.
(Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCU 3409 [0.5 credit]
City Organization and Planning Processes
Interdisciplinary investigation, analysis and synthesis of the institutions, processes, environments and demography of Canadian cities. Guest lecturers. (Workshop).
Includes: Experiential Learning Activity
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCU 3902 [0.5 credit]
Urban Studies
A specific aspect of architecture in the area of urban studies. Topics vary from year to year. (Workshop).
Includes: Experiential Learning Activity
Precludes additional credit for ARCU 4103.
Prerequisite(s): permission of the School.
Lecture, seminar, lab or field work six hours a week.

ARCU 4103 [0.5 credit]
Cities
Course addresses cities such as Istanbul, Mexico City, Venice, Paris, Ottawa, Mumbai, and New Orleans. Topics presented by the instructor and guests include environmental resilience and climate change; social justice and informal settlement; smart cities and data privacy; and urban design, memory, and imagination.
Precludes additional credit for ARCU 3902.
Prerequisite(s): Second-year standing or permission of the Instructor.
Lecture two hours per week and tutorial one hour per week.

ARCU 4300 [0.5 credit]
History of Theories of Urbanism
Theories of urbanism throughout history; emphasis on schools of post-WWII academic thought. The impact of Marxist theory, location and systems theory; the expanding array of models, tools and techniques that have contributed to various theorizations of urbanism.
Prerequisite(s): ARCU 3100.

ARCU 4400 [0.5 credit]
City Organization and Planning
Structure, form and functioning of cities. Infra-structure, facilities and networks, ecosystems, demographic and social organization, government, quality of life, goals and perceptions, urban management, development, regulation and codes, design, planning and policy-making. (Elective Course).
Precludes additional credit for ARCU 3400.
Three hours a week.

ARCU 4500 [0.5 credit]
Human Shelter
Background factors pertaining to housing in both industrial and developing countries; traditional and contemporary housing approaches; social housing; and people's right to adequate housing. Guest lecturers. (Elective Course).
Precludes additional credit for ARCU 3500.
Three hours a week.
ARCU 4600 [0.5 credit]
Post-WWII Urbanism
Urban renewal in the post-war period in response to housing shortages, suburbanization, transportation infrastructure and other factors. Gentrification and the emerging form of the post-industrial city, including new urbanism and sustainable communities. Case studies from Canada, Europe and the U.S. (Theory/History Elective). Prerequisite(s): ARCU 3100 and third or fourth-year standing in the B.A.S. Urbanism program or permission of the School.
Lectures three hours a week.

ARCU 4700 [0.5 credit]
Urban Utopias
Urban utopias throughout history, with emphasis on the 20th century. Garden Cities, anti-urbanism and radical decentralization, the city in the region, Italian Rationalist cities, Le Corbusier and CIAM, post-WWII New Towns (England, Scandinavia and the US), Sustainable Urbanism. Prerequisite(s): third or fourth-year standing in B.A.S. Urbanism program or permission of the School.
Lectures three hours a week.

ARCU 4801 [0.5 credit]
Topics in Urbanism
Advanced seminar in selected topics related to urbanism. Topics may include histories and theories related to urban systems, design, and planning. (Core course). Prerequisite(s): third-year standing in B.A.S. (Urbanism) or permission of the Instructor.
Seminar three hours per week.

ARCU 4808 [0.5 credit]
Independent Study
( Elective Course).
Includes: Experiential Learning Activity

ARCU 4901 [0.5 credit]
Topics in Applied Urbanism
Advanced investigation into issues related to urbanism and urban form. Topics will vary from year to year. Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.A.S. (Urbanism) or permission of Instructor.
Lecture three hours per week.

Art History
This section presents the requirements for programs in:

- Minor in History and Theory of Architecture
- Post-Baccalaureate Diploma in History and Theory of Architecture

Program Requirements
Art History
B.A. Honours (20.0 credits)

A. Credits Included in the Major CGPA (10.0 credits)

1. 3.0 credits in:
   ARTH 1100 [0.5] Art and Society: Prehistory to the Renaissance
   ARTH 1101 [0.5] Art and Society: Renaissance to the Present
   ARTH 1201 [0.5] History and Theory of Architecture: 1500 to Present
   ARTH 2009 [0.5] Art Live: Art History Workshop
   ARTH 3100 [0.5] History and Methods of Art and Architectural History
   ARTH 3108 [0.5] History and Methods of Art History

2. 1.0 credit from:
   ARTH 2102 [0.5] Greek Art and Archaeology
   ARTH 2105 [0.5] Roman Art and Archaeology
   ARTH 2107 [0.5] Islamic Architecture and Art
   ARTH 2202 [0.5] Medieval Architecture and Art
   ARTH 2300 [0.5] Italian Renaissance Art

3. 1.0 credit from:
   ARTH 2502 [0.5] Art of the 19th Century
   ARTH 2600 [0.5] Modern European Art 1900-1945
   ARTH 2601 [0.5] History and Theory of Photography

4. 0.5 credit from:
   ARTH 2002 [0.5] Canadian Historical Art
   ARTH 2003 [0.5] Canadian Twentieth-Century and Contemporary Art

5. 0.5 credit from:
   ARTH 2005 [0.5] Arts of the First Peoples: The Woodlands, the Plains and the Subarctic
   ARTH 2006 [0.5] Arts of the First Peoples: The Southwest, the West Coast and the Arctic
   ARTH 2007 [0.5] Asian Art
   ARTH 2008 [0.5] Inuit Art
   ARTH 2106 [0.5] Chinese Art and Visual Culture

6. 1.0 credit in ARTH at the 3000 level
7. 2.0 credits in ARTH at the 4000 level
8. 1.0 credit in ARTH at the 2000 level or higher

B. Credits Not Included in the Major CGPA (10.0 credits)

9. 8.0 credits in electives not in ARTH
10. 2.0 credits in free electives

Total Credits 20.0

Note:
- Art History majors may take up to 1.0 credit in studio art courses from an accredited university as an elective. Courses taken at another institution must be approved in a letter of permission from the Carleton University Registrar.
• No more than 1.0 credit may be taken as ARTH 4900 Directed Readings and Research or ARTH 4909 [1.0] Honours Research Essay.

Art History
B.A. Combined Honours (20.0 credits)
A. Credits Included in the Major CGPA (6.5 credits)
1. 2.5 credits in: 2.5
   ARTH 1100 [0.5] Art and Society: Prehistory to the Renaissance
   ARTH 1101 [0.5] Art and Society: Prehistory to the Present
   ARTH 2009 [0.5] Art Live: Art History Workshop
   ARTH 3100 [0.5] History and Methods of Art and Architectural History
   ARTH 3108 [0.5] History and Methods of Art History
2. 0.5 credit from: 0.5
   ARTH 2102 [0.5] Greek Art and Archaeology
   ARTH 2105 [0.5] Roman Art and Archaeology
   ARTH 2107 [0.5] Islamic Architecture and Art
   ARTH 2202 [0.5] Medieval Architecture and Art
   ARTH 2300 [0.5] Italian Renaissance Art
3. 0.5 credit from: 0.5
   ARTH 2502 [0.5] Art of the 19th Century
   ARTH 2600 [0.5] Modern European Art 1900-1945
   ARTH 2601 [0.5] History and Theory of Photography
4. 0.5 credit from: 0.5
   ARTH 2002 [0.5] Canadian Historical Art
   ARTH 2003 [0.5] Canadian Twentieth-Century and Contemporary Art
5. 0.5 credit from: 0.5
   ARTH 2005 [0.5] Arts of the First Peoples: The Woodlands, the Plains and the Subarctic
   ARTH 2006 [0.5] Arts of the First Peoples: The Southwest, the West Coast and the Arctic
   ARTH 2007 [0.5] Asian Art
   ARTH 2008 [0.5] Inuit Art
   ARTH 2106 [0.5] Chinese Art and Visual Culture
6. 0.5 credit in ARTH at the 3000 level or above 0.5
7. 1.5 credits in ARTH at the 4000 level collectively 1.5
   a. 0.5 credit in ARTH (excluding ARTH 4900, ARTH 4909)
   b. 1.0 credit in ARTH at the 4000 level
B. Additional Requirements (13.5 credits) 13.5
8. The requirements of the other discipline must be satisfied
9. Sufficient free electives to make 20.0 credits in total for the program.

Total Credits 20.0

Note:
• Art History majors may take up to 1.0 credit in studio art courses from an accredited university as an elective. Courses taken at another institution must be approved in a letter of permission from the Carleton University Registrar.

...
**Post-Baccalaureate Diploma in Art History (4.0 credits)**

Admission to this program requires the permission of the Art History undergraduate supervisor, 0.5 credit may be taken outside the department. With the approval of the Art History undergraduate supervisor, 0.5 credit may be taken outside the department. Admission to this program requires the permission of the program. Normally, students would be required to have completed an undergraduate degree with a minimum B average or higher to be admitted. Applications will be reviewed on a case-by-case basis.

#### Notes for programs in History and Theory of Architecture:

- No more than 1.5 credits may be taken as directed readings and/or the Honours Research essay.
- Architecture courses which are workshops or studio-based may not be taken for credit in these programs.
- Architecture courses taken to fulfill the requirements of these programs are not transferable to other programs in the Faculty of Arts and Social Sciences.

#### Minor in History and Theory of Architecture (4.0 credits)

Open to all undergraduate degree students not in History and Theory of Architecture programs.

**Requirements**

1. 1.0 credit in:

**Post-Baccalaureate Diploma in History and Theory of Architecture (4.0 credits)**

Admission to this program requires the permission of the History and Theory of Architecture program. Normally, students would be required to have completed an undergraduate degree with a minimum B average or higher to be admitted. Applications will be reviewed on a case-by-case basis.

**Requirements:**

1. **1.0 credit in:**
   - ARTH 3100 [0.5] History and Methods of Art and Architectural History
   - ARTH 3107 [0.5] History and Methods of Architectural History

2. **2.0 credit in ARTH at the 2000-level or above** (excluding ARTH 2710)
3. **1.0 credit in ARTH at the 4000-level**

**Total Credits:** 4.0

With the approval of the History and Theory of Architecture undergraduate supervisor, 0.5 credit may be taken outside the department.

**B.A. Regulations**

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

**First-Year Seminars**

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

**Breadth Requirement**

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement:

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

**Breadth Area 1: Culture and Communication**

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

**Subject codes:** ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ENSL, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

**Breadth Area 2: Humanities**

**Subject codes:** AFRI, ALDS, ARCY, CANC, CLS, CLOC, CRST, DBST, DIST, EACH, EURL, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

**Breadth Area 3: Science, Engineering, and Design**

**Subject codes:** AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOL, BIT, CHEM, CIVE, CMP, COMP, ECOR, ELEC, ENSC, ENSVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, ISYS, ITMEC, MAEE, MATH, MEC, NET, NEUR, NSCI, OSS, PHYS, PLT, SREEE, STAT, SYSC, TSES

**Breadth Area 4: Social Sciences**

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public
Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GOPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

Change of Program Within the B.A. Degree

Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

Mention : Français

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:
1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:
1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Regulations

Post-Baccalaureate Diploma

In addition to the requirements presented here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

Definition

A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:

- qualify a candidate for consideration for entry into a master's program, or
- bring a candidate who already possesses a bachelor's degree up to a level of a bachelor's degree of 20.0 credits or more in another discipline, or
- provide a candidate who already possesses a twenty-credit bachelor's degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas, or
- provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

Program Requirements

- A post-baccalaureate diploma is normally constituted of a minimum of 3.0 credits to a maximum of 5.0 credits of advanced undergraduate courses.
- A minimum of 3.0 residency credits counting toward the post-baccalaureate diploma.

English as a Second Language Requirement

In addition to the program requirements, completion of English as a Second Language (ESLA) courses may be required from the following sequence: ESLA 1300, ESLA 1500, ESLA 1900, ESLA 1905. No credits from this sequence will be counted toward the post-baccalaureate diploma.

Continuation

All post-baccalaureate diploma students are expected to complete their diploma requirements within two calendar years after the date of initial registration. After this period student may be withdrawn.
Graduation

• A candidate for a post-baccalaureate diploma must have an overall CGPA of at least 6.5 to graduate.
• A candidate for a post-baccalaureate diploma must obtain a grade of C- or higher in each course taken in fulfillment of the program requirements.
• Students should consult with the Department, School or Institute when planning their diploma and selecting courses.

Admissions Information

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

• Bachelor of Arts (B.A.)(Honours)
• Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Advanced Standing

B.A. and B.A. (Honours) Program
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Art and Architectural History (ARTH) Courses

ARTH 1100 [0.5 credit]
Art and Society: Prehistory to the Renaissance
A survey of art, architecture and artifacts from prehistory to the Renaissance. Ways of understanding visual culture through this span of history.
Precludes additional credit for ARTH 1000.
Lectures two hours a week, tutorial one hour a week.

ARTH 1101 [0.5 credit]
Art and Society: Renaissance to the Present
A survey of art, architecture and related visual forms in their expanding contexts from the Renaissance to the present. Ways of understanding visual culture through this span of history.
Precludes additional credit for ARTH 1000.
Lectures two hours a week, tutorial one hour a week.

ARTH 1105 [0.5 credit]
Art as Visual Communication
A variety of visual material is organized topically to examine the elements of art (line, shape, value, colour, texture, space), the principles of pictorial organization, the materials and techniques of art, and recurrent tendencies in artistic styles and outlooks.
Lectures three hours a week.

ARTH 1200 [0.5 credit]
History and Theory of Architecture: Prehistory to 1500
An introduction to the history of architecture from prehistory to ca. 1500, considering technological, formal, intellectual and social developments that informed the built environment through a range of building types.
Lectures two hours a week, tutorial one hour a week.

ARTH 1201 [0.5 credit]
History and Theory of Architecture: 1500 to Present
An introduction to the history of architecture from ca. 1500 to the present, considering technological, formal, intellectual, and social developments that informed the built environment through a range of building types. Precludes additional credit for ARTH 2608 (no longer offered).
Lectures two hours a week, tutorial one hour a week.
ARTH 2002 [0.5 credit]
Canadian Historical Art
A survey of historical Canadian art, from the period of European settlement to the early twentieth century, examining craft and fine art, amateur and professional artists, art institutions, gender, nationalism, regionalism and ethnicity. Students will be exposed to works in the National Capital region.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2003 [0.5 credit]
Canadian Twentieth-Century and Contemporary Art
A survey of twentieth-century and contemporary Canadian art in a variety of media within social, political and cultural contexts. Regionalism, multiculturalism, nationalism, gender, race and identity will be considered in relation to local and national collections in Ottawa.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2005 [0.5 credit]
Arts of the First Peoples: The Woodlands, the Plains and the Subarctic
Introduction to the visual arts of Indigenous peoples of the eastern and central regions of North America. A post-colonial perspective will be used to consider selected examples of creative production from time immemorial to the present.
Prerequisite(s): second-year standing or permission of the discipline.
Lectures three hours a week.

ARTH 2006 [0.5 credit]
Arts of the First Peoples: The Southwest, the West Coast and the Arctic
Introduction to the visual arts of Indigenous peoples of the western and northern regions of North America. A post-colonial perspective will be used to consider selected examples of visual materials from time immemorial to the present.
Prerequisite(s): second-year standing or permission of the discipline.
Lectures three hours a week.

ARTH 2007 [0.5 credit]
Asian Art
Surveys Asian art from second-century China to post-war Japan. Representational strategies of court artists and artists from the capital are compared with artists on the periphery. Articulation of power in tombs, palaces and war propaganda is examined, as is the individual and the eccentric.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2008 [0.5 credit]
Inuit Art
Survey of visual art produced by Canadian Inuit from the circumpolar area.
Precludes additional credit for ARTH 3104.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2009 [0.5 credit]
Art Live: Art History Workshop
Examination of techniques, materials and institutions of art history; lectures and workshops on art historical research and writing, the materials of art, professional skills; site visits to art institutions.
Includes: Experiential Learning Activity
Prerequisite(s): ARTH 1100 and ARTH 1101, or permission of the discipline. Restricted to students enrolled in the Art History B.A. or B.A. Honours.
Lecture three hours a week.

ARTH 2102 [0.5 credit]
Greek Art and Archaeology
The art, architecture and archaeology of ancient Greece. Vase painting, sculpture, architecture, town planning and analogous arts are studied.
Also listed as CLCV 2303.
Precludes additional credit for CLCV 2302 (no longer offered), ARTH 2100 (no longer offered).
Prerequisite(s): second-year standing or permission of the Department.
Lecture three hours a week.

ARTH 2105 [0.5 credit]
Roman Art and Archaeology
The art, architecture and archaeology of the ancient Romans. Vase painting, sculpture, architecture, town planning and analogous arts are studied.
Also listed as CLCV 2304.
Precludes additional credit for CLCV 2302 (no longer offered), ARTH 2100 (no longer offered).
Prerequisite(s): second-year standing or permission of the Department.
Lecture three hours a week.

ARTH 2106 [0.5 credit]
Chinese Art and Visual Culture
A survey of Chinese art from the pre-modern era to reinventions of traditions in modern and contemporary art. Artworks in various media (ink painting, calligraphy, Buddhist sculpture, ceramics, lacquer and garden architecture) will be studied in their historical, cultural and socio-political contexts.
Prerequisite(s): second-year standing or permission of the Department.
Lecture three hours a week.
ARTH 2107 [0.5 credit]
Islamic Architecture and Art
Survey of artistic movements in Islamic art and architecture in the Mediterranean, the Near East, and Central and South Asia, from the seventh century to ca. 1450. Commonalities and differences between major dynastic visual cultures will be explored.
Prerequisite(s): second-year standing or permission of the Discipline.
Lecture three hours a week.

ARTH 2108 [0.5 credit]
Art Worlds
Survey of an area of global art history. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.
Prerequisite(s): second-year standing or permission of the Department.
Lecture three hours a week.

ARTH 2202 [0.5 credit]
Medieval Architecture and Art
A survey of architecture and art in Europe from ca. 313-1500 C.E. Sacred, secular, and domestic works will be discussed with reference to cultural meaning, social function, structure, and form.
Precludes additional credit for ARTH 2200 and ARTH 2201.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2300 [0.5 credit]
Italian Renaissance Art
An examination of major works of art and architecture, issues and themes in the Italian Renaissance; emphasis on the fifteenth and sixteenth centuries, with a look at roots in the fourteenth.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2310 [0.5 credit]
Architecture of the Early Modern World [1400-1750]
An examination of architecture from the late medieval period to the 18th century with particular attention paid to architecture and design cultures within the European and Islamic worlds and their cross-cultural interactions.
Precludes additional credit for ARTH 3305 (no longer offered).
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2404 [0.5 credit]
Art of the 17th and 18th Centuries
Tracing developments in 17th- and 18th-century painting, graphic art, sculpture, and architecture. Introduction to artists, art works, and issues central to the relationship between art and society.
Precludes additional credit for ARTH 2403 (no longer offered), ARTH 2405 (no longer offered) and ARTH 2406 (no longer offered).
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2502 [0.5 credit]
Art of the 19th Century
Tracing developments in 19th-century painting, graphic art, sculpture, and architecture. Introduction to artists, art works, and issues central to the relationship between art and modernity.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2510 [0.5 credit]
Architecture of the 18th and 19th Centuries
A survey of key monuments, theories, forms and technological developments of eighteenth- and nineteenth-century architecture.
Precludes additional credit for ARTH 3809 Section "B" taken in 2014.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2600 [0.5 credit]
Modern European Art 1900-1945
Major artistic movements in Europe from about 1900 to 1945.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2601 [0.5 credit]
History and Theory of Photography
Issues, themes, movements in photography and individual photographers from the origins of the medium to the present.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTH 2610 [0.5 credit]
Twentieth-Century Architecture
Developments in architectural form and culture through the course of the twentieth century, with emphasis on the formation and subsequent critique of the Modern Movement.
Precludes additional credit for ARTH 3609 and ARCH 3009.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.
ARTh 2710 [0.5 credit]
Experiencing Architecture
Development of critical thinking, writing, and looking skills in connection to architecture, through a combination of site visits, workshops and classroom exercises.
Includes: Experiential Learning Activity
Prerequisite(s): ARTH 1200 and ARTH 1201 or permission of the discipline. Restricted to students in the History and Theory of Architecture B.A. or B.A. Honours program.
Lecture three hours a week.

ARTh 2807 [0.5 credit]
Philosophy of Art
Philosophical approaches to the study of art. Topics such as: the nature of art and artistic value; representation and symbolism in art; art and artifice; art and the emotions; art, culture and ideology; post-structuralism and art; theories of creativity; relationship between artworks and audiences.
Also listed as PHIL 2807.
Lectures three hours a week.

ARTh 3000 [0.5 credit]
Themes in Canadian Art
Selected aspects of Canadian art in a variety of media. Students will be exposed to works in the National Capital region.
Prerequisite(s): ARTH 2002 or ARTH 2003 or (for a photography topic) ARTH 2601 and second-year standing or higher, or permission of the Discipline.
Lectures three hours a week.

ARTh 3002 [0.5 credit]
Canadian Architecture
Canadian architecture from the seventeenth century to the present day, covering both stylistic and technological developments. Building styles, methods, and materials in the context of social and economic conditions and construction techniques.
Includes: Experiential Learning Activity
Also listed as ARCH 4002.
Prerequisite(s): ARTH 1100 and ARTH 1101, or ARTH 1200 and ARTH 1201, or ARCH 1002 and ARCH 1201, and second-year standing or higher, or permission of the Discipline.
Lectures and/or seminars three hours a week.

ARTh 3003 [0.5 credit]
Architecture and Representation
Examination of the intersections between architecture, representations, and cultures.
Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing, or permission of the Discipline.
Lectures and/or seminars three hours a week.

ARTh 3005 [0.5 credit]
American Architecture
The cultural history of the United States as expressed through its architectural heritage. Selected buildings and complexes from the earliest settlements through the early twentieth century are examined.
Prerequisite(s): ARTH 1201 and second-year standing or higher, or permission of the Discipline.
Lectures three hours a week.

ARTh 3007 [0.5 credit]
Modern Asian Art
Modern and contemporary art in East Asia, beginning in Japan with the 1868 Meiji revolution and the 1911 revolution in China.
Prerequisite(s): second-year standing or higher, or permission of the Discipline.

ARTh 3008 [0.5 credit]
Contemporary Chinese Art and Art History
Modern and contemporary art in China and beyond from the reform period in 1979 until today. Artworks will be examined in terms of their (art-)historical, discursive, socio-political, infrastructural and transcultural conditions of production and reception.
Prerequisite(s): second-year standing or permission of the Discipline.
Lectures three hours a week.

ARTh 3100 [0.5 credit]
History and Methods of Art and Architectural History
The study of the history of art and architectural history and the methodologies and research tools employed.
Precludes additional credit for ARTH 3106 (no longer offered).
Prerequisite(s): third-year or higher standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTh 3102 [0.5 credit]
Studies in Greek Art
A study of period or theme in the art and archaeology of Ancient Greece. Topics may vary from year to year. This course is repeatable for credit when the topic changes.
Also listed as CLCV 3306, RELI 3732.
Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat.
Lecture three hours a week.

ARTh 3105 [0.5 credit]
Studies in Roman Art
A study of a period or theme in the art and archaeology of the ancient Romans. Topics may vary from year to year.
Also listed as CLCV 3307, RELI 3733.
Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat.
Lecture three hours a week.
ARTH 3107 [0.5 credit]
History and Methods of Architectural History
The study of the methodologies and research approaches employed by architectural historians.
Prerequisite(s): ARTH 3100 and third-year standing or higher in History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 3108 [0.5 credit]
History and Methods of Art History
The study of current methodologies and research tools employed by art historians.
Precludes additional credit for ARTH 3106 (no longer offered).
Prerequisite(s): ARTH 3100 and third-year standing or higher in Art History, or permission of the Discipline.
Seminar three hours a week.

ARTH 3400 [0.5 credit]
History of Printmaking
Exploration of printmaking techniques from the 16th century to the present focusing on the work of famous and lesser-known printmakers. Topics may include: printmaking genres (from fine art prints to caricature), originality versus reproduction, book illustration, the art market, posters and propaganda.
Includes: Experiential Learning Activity
Prerequisite(s): second-year standing or higher, or permission of the Discipline.
Lectures and/or seminars three hours a week.

ARTH 3507 [0.5 credit]
The Artist in Context
An examination of one artist's or group of artists' life and work. Relevant artistic, intellectual, social, political and theoretical contexts are considered.
Prerequisite(s): ARTH 1101 or ARTH 2502 and second-year standing or higher, or permission of the Discipline.
Lectures three hours a week.

ARTH 3600 [0.5 credit]
Art Since 1945
Contemporary art in the global context from 1945 to the present, including Abstract Expressionism, Pop Art, Postmodernism, object art, performance art and installations.
Prerequisite(s): second-year standing or higher, or permission of the Discipline.
Lecture three hours a week.

ARTH 3701 [0.5 credit]
Art and Architecture on Site
The study of art and/or architecture on site outside the National Capital Region, in Canada or internationally. May include a combination of study in Ottawa and on site. Locations vary. Students are expected to bear all travel and other costs arising from site visits.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the Discipline. Applicants will normally have third-year standing with a minimum of 1.0 credit in Art History or History and Theory of Architecture and a GPA of 8.0 or above.
Hours to be arranged. Locations will vary.

ARTH 3705 [0.5 credit]
Selected Museum Exhibition
This seminar complements a major exhibition held at a specific museum. Students enrolled in this course are expected to bear all travel and other costs arising from required visits to the museum.
Includes: Experiential Learning Activity
Prerequisite(s): second-year standing or higher or permission of the Discipline.
Seminar and/or lectures three hours a week.

ARTH 3710 [0.5 credit]
Architecture and Empire
The impact of imperial power and aspiration on the built environment, from the Ancient world to the present day, taking 'empire' in its broadest political, social and economic sense.
Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.
Seminar and/or lectures three hours a week.

ARTH 3809 [0.5 credit]
A Closer Look at Art and Visual Culture
Selected aspects of art history and visual culture from ancient times to the present.
Prerequisite(s): third-year standing or permission of the Discipline.
Lectures and/or seminars three hours a week.

ARTH 3810 [0.5 credit]
A Closer Look at the Designed Environment
Selected aspects of the history of the designed environment, from ancient times to the present.
Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.
Lectures and/or seminars three hours a week.
ARTH 3900 [0.5 credit]
Practicum in Art and Architectural History
Practical experience gained by working on specific projects under the supervision of the staff of a museum, cultural institution, public- or private-sector organization associated with art, architecture, design, or heritage. A maximum of 1.0 credit in practicum courses may be used to fulfill program requirements.
Includes: Experiential Learning Activity
Prerequisite(s): B.A. or B.A. (Honours) in Art History or History and Theory of Architecture with third-year standing or higher and a CGPA of 9.00 or better in ARTH courses, and permission of the Discipline.

ARTH 4000 [0.5 credit]
Topics in Canadian Art
Selected topics in Canadian art. Students will be exposed to works in the collections of the National Capital region.
Prerequisite(s): one of ARTH 2002, ARTH 2003, ARTH 3000 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminars three hours a week.

ARTH 4003 [0.5 credit]
Topics in Contemporary Chinese Art
Critical examination of contemporary Chinese art. Topics include socially engaged art, historiographies of Chinese contemporary art, re-inventions of traditions, gender and politics of the body, exhibition histories and infrastructures of contemporary art in China.
Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4005 [0.5 credit]
Topics in Contemporary Indigenous Art
This course will use critical theory to examine aspects of contemporary visual art created by the Inuit and First Peoples in North America.
Prerequisite(s): ARTH 2005 or ARTH 2006 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4007 [0.5 credit]
Topics in Asian Art
A selected topic in East Asian Art, which may include 19th century Ukiyo-e woodblock prints, The Gutai Group, performance art in China and Japan, and contemporary Chinese art.
Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4008 [0.5 credit]
Transnational Theory
Critical examination of transnational theories of cultural analysis, including Orientalism, Post-Colonial theory, translation theory and theories of cultural hybridity.
Precludes additional credit for ARTH 3103.
Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4107 [0.5 credit]
Topics in Islamic Architecture and Art
Selected aspects of Islamic Architecture and Art.
Prerequisite(s): ARTH 2107 or ARTH 2310 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4202 [0.5 credit]
Topics in Medieval Architecture and Art
Selected aspects of Medieval or Medievalist Architecture and Art.
Prerequisite(s): ARTH 2202 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4305 [0.5 credit]
Topics in Renaissance Art
Selected aspects of Renaissance art and society.
Prerequisite(s): ARTH 2300 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4402 [0.5 credit]
Topics in Art of the 18th and 19th Centuries
Selected aspects of 18th-century and/or 19th-century art. Precludes additional credit for ARTH 4406 (no longer offered), ARTH 4505 (no longer offered).
Prerequisite(s): ARTH 2404 or ARTH 2405 or ARTH 2406 or ARTH 2502 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.

ARTH 4600 [0.5 credit]
Art, Architecture, and Gender
Art and/or architectural creation, reception and/or historiography through the lens of gender identities.
Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.
Seminar three hours a week.
ARTH 4602 [0.5 credit]  
Issues in the Theory and History of Photography  
Relates the themes of selected theoretical texts on  
photography to specific examples of photographic  
practice.  
Prerequisite(s): ARTH 2601 and fourth-year standing  
in Art History or History and Theory of Architecture, or  
permission of the Discipline.  
Seminar three hours a week.

ARTH 4610 [0.5 credit]  
Topics in Modern Architecture or Design  
Selected topics in architecture and design of the Modern  
era.  
Prerequisite(s): ARTH 2610 and fourth-year standing  
in Art History or History and Theory of Architecture, or  
permission of the Discipline.  
Seminar three hours a week.

ARTH 4701 [0.5 credit]  
Art and Architecture on Site  
Intensive study of art and/or architecture on site outside  
the National Capital region, in Canada or internationally.  
May include a combination of study in Ottawa and on site.  
Students are expected to bear all travel and other costs  
arising from site visits.  
Includes: Experiential Learning Activity  
Prerequisite(s): Permission of the Discipline. Applicants  
will normally have fourth-year standing in Art History  
or History and Theory of Architecture and a CGPA of 8.0  
or above.  
Hours to be arranged. Locations vary.

ARTH 4705 [0.5 credit]  
Seminar: Selected Museum Exhibition  
Studies a major exhibition held at a specific museum.  
Students enrolled in this course are expected to bear all  
travel and other costs arising from required visits to the  
museum.  
Includes: Experiential Learning Activity  
Prerequisite(s): fourth-year Honours standing in Art History  
or History and Theory of Architecture and permission of  
the Discipline.  
Lectures and/or seminar three hours a week.

ARTH 4800 [0.5 credit]  
Topics in Architectural History  
Selected aspects of architectural history from ancient  
times to the present.  
Prerequisite(s): fourth-year standing in Art History or  
History and Theory of Architecture, or permission of the  
Discipline.  
Seminar three hours a week.

ARTH 4809 [0.5 credit]  
Topics in Art History and Criticism  
Selected aspects of art history and/or criticism from  
ancient times to the present.  
Prerequisite(s): fourth-year standing in Art History or  
History and Theory of Architecture, or permission of the  
Discipline.  
Seminar three hours a week.

ARTH 4900 [0.5 credit]  
Directed Readings and Research  
Supervised readings and research projects. Guidelines  
must be obtained from the Undergraduate Supervisor  
prior to registration. A written project outline, approved  
by the supervising Art History or History and Theory of  
Architecture faculty member, must be submitted by the last  
day for course changes.  
Prerequisite(s): fourth-year Honours standing in Art History  
or History and Theory of Architecture and permission of  
the Discipline.

ARTH 4909 [1.0 credit]  
Honours Research Essay  
An essay of approximately 10,000 words, resulting from  
independent research, supervised by Art History or History  
and Theory of Architecture faculty.  
Prerequisite(s): fourth-year Honours standing in Art History  
or History and Theory of Architecture with a minimum  
CGPA of 9.00 and permission of the Discipline.

Biochemistry  
This section presents the requirements for programs in:  
• Biochemistry B.Sc. Honours  
• Biochemistry and Biotechnology B.Sc. Honours  
• Computational Biochemistry B.Sc. Honours  
• Biochemistry B.Sc. Major  
Requirements for the program Biochemistry and  
Biotechnology are presented in the Biotechnology  
program section of this Calendar.  

Program Requirements  
Course Categories for Biochemistry  
The program descriptions below make use of the following  
course categories that are defined in the Regulations for  
the B.Sc.  
• Approved Courses Outside the Faculties of Science  
  and Engineering and Design  
• Free Electives  

Biochemistry  
B.Sc. Honours (20.0 credits)  
A. Credits included in the Major CGPA (13.5 credits)  
1. 2.0 credits in:  
   BIOL 1103 [0.5] Foundations of Biology I  
   BIOL 1104 [0.5] Foundations of Biology II  
   BIOL 2104 [0.5] Introductory Genetics  
   BIOL 3104 [0.5] Molecular Genetics  
2. 0.5 credit from:  
   BIOL 2001 [0.5] Animals: Form and Function  
   BIOL 2002 [0.5] Plants: Form and Function  
3. 0.5 credit from:  
   BIOL 3205 [0.5] Plant Biochemistry and Physiology  
   BIOL 3305 [0.5] Human and Comparative  
   Physiology  
   BIOL 3307 [0.5] Advanced Human Anatomy and  
   Physiology
4. 1.0 credit from:  
BIOL 3102 [0.5] Mycology  
BIOL 3201 [0.5] Cell Biology  
BIOL 3202 [0.5] Principles of Developmental Biology  
BIOL 3205 [0.5] Plant Biochemistry and Physiology  
BIOL 3301 [0.5] Biotechnology II  
BIOL 3303 [0.5] Experimental Microbiology  
BIOL 3305 [0.5] Human and Comparative Physiology  
BIOL 3306 [0.5] Human Anatomy and Physiology  
BIOL 3307 [0.5] Advanced Human Anatomy and Physiology  
BIOL 3501 [0.5] Biomechanics  
BIOL 4008 [0.5] Molecular Plant Development  
BIOL 4103 [0.5] Population Genetics  
BIOL 4106 [0.5] Advances in Molecular Biology  
BIOL 4109 [0.5] Laboratory Techniques in Molecular Genetics  
BIOL 4200 [0.5] Immunology  
BIOL 4201 [0.5] Advanced Cell Culture and Tissue Engineering  
BIOL 4202 [0.5] Mutagenesis and DNA Repair  
BIOL 4206 [0.5] Human Genetics  
BIOL 4207 [0.5] Advanced Embryology & Developmental Biology  
BIOL 4209 [0.5] Advanced Plant Physiology  
BIOL 4300 [0.5] Applied Microbiology  
BIOL 4301 [0.5] Current Topics in Biotechnology  
BIOL 4306 [0.5] Animal Neurophysiology  
BIOL 4309 [0.5] Studies in Human Performance  
BIOL 4317 [0.5] Neuroethology: The Neural Basis of Animal Behaviour  
BIOL 4318 [0.5] Adaptations to Extreme Environments  
BIOL 4319 [0.5] Studies in Exercise Physiology  

5. 4.0 credits in:  
CHEM 1001 [0.5] General Chemistry I  
& CHEM 1002 [0.5] General Chemistry II  
CHEM 2103 [0.5] Physical Chemistry I  
or BIOL 2300 [0.5] Physical Biochemistry  
CHEM 2203 [0.5] Organic Chemistry I  
CHEM 2204 [0.5] Organic Chemistry II  
CHEM 2303 [0.5] Analytical Chemistry II  
CHEM 2501 [0.5] Introduction to Inorganic and Bioinorganic Chemistry  
CHEM 3201 [0.5] Advanced Organic Chemistry I  

6. 0.5 credit from:  
CHEM 3202 [0.5] Advanced Organic Chemistry II  
CHEM 3205 [0.5] Experimental Organic Chemistry  

7. 3.5 credits in:  
BIOL 2200 [0.5] Cellular Biochemistry  
BIOL 3101 [0.5] General Biochemistry I  
BIOL 3102 [0.5] General Biochemistry II  
BIOL 3103 [0.5] Practical Biochemistry I  
BIOL 3104 [0.5] Practical Biochemistry II  
BIOL 3202 [0.5] Biophysical Techniques and Applications  

8. 0.5 credit from:  
BIOL 3008 [0.5] Bioinformatics  
BIOL 3203 [0.5] Biochemical Pharmacology  
BIOL 4004 [0.5] Industrial Biochemistry  
BIOL 4005 [0.5] Biochemical Regulation  
BIOL 4007 [0.5] Membrane Biochemistry  
BIOL 4008 [0.5] Computational Systems Biology  
BIOL 4009 [0.5] Biochemistry of Disease  
BIOL 4200 [0.5] Immunology  
BIOL 4201 [0.5] Advanced Cell Culture and Tissue Engineering  
BIOL 4202 [0.5] Mutagenesis and DNA Repair  
BIOL 4203 [0.5] Advanced Metabolism  
BIOL 4204 [0.5] Protein Biotechnology  
BIOL 4708 [0.5] Principles of Toxicology  

9. 1.0 credit from:  
BIOL 4906 [1.0] Interdisciplinary Research Project  
BIOL 4907 [1.0] Honours Essay and Research Proposal  
BIOL 4908 [1.0] Research Project  

B. Credits Not Included in the Major CGPA (6.5 credits)  
10. 1.0 credit from:  
PHYS 1007 [0.5] Elementary University Physics I  
& PHYS 1008 [0.5] Elementary University Physics II  
or  
PHYS 1003 [0.5] Introductory Mechanics and Thermodynamics  
& PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion  

11. 1.5 credits in:  
MATH 1007 [0.5] Elementary Calculus I  
MATH 1107 [0.5] Linear Algebra I  
STAT 2507 [0.5] Introduction to Statistical Modeling I  

12. 2.0 credits in Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)  

13. 1.5 credits from:  
BIOL courses listed in but not used to fulfill Item 8 above, one of:  
BIOL 2400 [0.5] Independent Research I  
BIOL 3400 [0.5] Independent Research II  
BIOL 4901 [0.5] Selected Topics in Biochemistry  
BIOL 4008 [0.5] Computational Systems Biology  
BIOL courses listed in but not used to fulfill Item 4 above  
BIOL 2001 [0.5] Animals: Form and Function  
BIOL 2002 [0.5] Plants: Form and Function  
BIOL 2301 [0.5] Biotechnology I  
BIOL 2303 [0.5] Microbiology  

CHEM courses listed in but not used to fulfill Item 6 above:  
CHEM 3100 [0.5] Physical Chemistry II  
CHEM 3101 [0.5] Quantum Chemistry  
CHEM 3102 [0.5] Methods of Computational Chemistry  
CHEM 3106 [0.5] Computational Chemistry Methods Laboratory

**Biochemistry and Biotechnology B.Sc. Honours (20.0 credits)**

**A. Credits Included in the Major CGPA (15.0 credits)**

1. **4.0 credits in:**
   - BIOL 1103 [0.5] Foundations of Biology I
   - BIOL 1104 [0.5] Foundations of Biology II
   - BIOL 2104 [0.5] Introductory Genetics
   - BIOL 2301 [0.5] Biotechnology I
   - BIOL 2303 [0.5] Microbiology
   - BIOL 3104 [0.5] Molecular Genetics
   - BIOL 3301 [0.5] Biotechnology II
   - BIOL 4301 [0.5] Current Topics in Biotechnology

2. **0.5 credit from:**
   - BIOL 2001 [0.5] Animals: Form and Function
   - BIOL 2002 [0.5] Plants: Form and Function

3. **0.5 credit from:**
   - BIOL 3201 [0.5] Cell Biology
   - BIOL 3205 [0.5] Plant Biochemistry and Physiology
   - BIOL 3303 [0.5] Experimental Microbiology
   - BIOL 3305 [0.5] Human and Comparative Physiology
   - BIOL 4109 [0.5] Laboratory Techniques in Molecular Genetics

4. **0.5 credit from:**
   - BIOL 3201 [0.5] Cell Biology
   - BIOL 3303 [0.5] Experimental Microbiology
   - BIOL 4106 [0.5] Advances in Molecular Biology
   - BIOL 4109 [0.5] Laboratory Techniques in Molecular Genetics
   - BIOL 4201 [0.5] Advanced Cell Culture and Tissue Engineering
   - BIOL 4300 [0.5] Applied Microbiology
   - BIOL 4303 [0.5] Advances in Microbiology

**Total Credits:** 14.0

---

**B. Credits Included in the Major CGPA (3.0 credits)**

5. **3.0 credits in:**
   - BIOL 2200 [0.5] Cellular Biochemistry
   - BIOL 3101 [0.5] General Biochemistry I
   - BIOL 3102 [0.5] General Biochemistry II
   - BIOL 3103 [0.5] Practical Biochemistry I
   - BIOL 3104 [0.5] Practical Biochemistry II
   - BIOL 3202 [0.5] Biophysical Techniques and Applications

6. **1.0 credit from:**
   - BIOL 4907 [1.0] Honours Essay and Research Proposal
   - BIOL 4908 [1.0] Research Project

7. **1.0 credit from:**
   - BIOL 3008 [0.5] Bioinformatics
   - or BIOL 3203 [0.5] Biochemical Pharmacology
   - BIOL 4004 [0.5] Industrial Biochemistry
   - BIOL 4005 [0.5] Biochemical Regulation
   - BIOL 4007 [0.5] Membrane Biochemistry
   - BIOL 4008 [0.5] Computational Systems Biology
   - BIOL 4009 [0.5] Biochemistry of Disease
   - BIOL 4200 [0.5] Immunology
   - BIOL 4201 [0.5] Advanced Cell Culture and Tissue Engineering
   - BIOL 4202 [0.5] Mutagenesis and DNA Repair
   - BIOL 4203 [0.5] Advanced Metabolism
   - BIOL 4204 [0.5] Protein Biotechnology
   - BIOL 4708 [0.5] Principles of Toxicology

8. **4.0 credits in:**
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - CHEM 2103 [0.5] Physical Chemistry I
   - or BIOL 2300 [0.5] Physical Biochemistry
   - CHEM 2203 [0.5] Organic Chemistry I
   - CHEM 2204 [0.5] Organic Chemistry II
   - CHEM 2303 [0.5] Analytical Chemistry II
   - CHEM 2501 [0.5] Introduction to Inorganic and Bioinorganic Chemistry
   - CHEM 3201 [0.5] Advanced Organic Chemistry I

9. **0.5 credit from:**
   - BIOL courses listed in, but not used to fulfill, Item 7 above
   - BIOL 2400 [0.5] Independent Research I
   - BIOL 3400 [0.5] Independent Research II
   - BIOL 4001 [0.5] Methods in Biochemistry
   - BIOL 4901 [0.5] Selected Topics in Biochemistry
   - BIOL courses listed in, but not used to fulfill, Item 3 or 4
   - BIOL 2001 [0.5] Animals: Form and Function
   - BIOL 2002 [0.5] Plants: Form and Function
   - BIOL 3102 [0.5] Mycology
   - BIOL 3202 [0.5] Principles of Developmental Biology
   - BIOL 3306 [0.5] Human Anatomy and Physiology
   - BIOL 3307 [0.5] Advanced Human Anatomy and Physiology
   - BIOL 3501 [0.5] Biomechanics
   - BIOL 4104 [0.5] Evolutionary Genetics
   - BIOL 4206 [0.5] Human Genetics
Computational Biochemistry

B.Sc. Honours (20.0 credits)

A. Credits Included in the Major (13.5 credits)

1. 2.0 credits in:
   - BIOL 1103 [0.5] Foundations of Biology I
   - BIOL 1104 [0.5] Foundations of Biology II
   - BIOL 2104 [0.5] Introductory Genetics
   - BIOL 3104 [0.5] Molecular Genetics

2. 3.0 credits in:
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - CHEM 2103 [0.5] Physical Chemistry I
   - CHEM 3104 [0.5] Physical Biochemistry
   - CHEM 2203 [0.5] Organic Chemistry I
   - CHEM 2303 [0.5] Analytical Chemistry II
   - CHEM 2501 [0.5] Introduction to Inorganic and Bioinorganic Chemistry

3. 0.5 credit in:
   - CHEM 2204 [0.5] Organic Chemistry II

4. 4.0 credits in:
   - BIOC 2200 [0.5] Cellular Biochemistry

B. Credits Not Included in the Major (6.5 credits)

7. 1.0 credit in:
   - BIOC 4906 [1.0] Interdisciplinary Research Project
   - or BIOC 4908 [1.0] Research Project

8. 1.0 credit from:
   - PHYS 1007 [0.5] Elementary University Physics I
   - PHYS 1008 [0.5] Elementary University Physics II
   - PHYS 1003 [0.5] Introductory Mechanics and Thermodynamics
   - PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion

9. 2.0 credits in:
   - MATH 1007 [0.5] Elementary Calculus I
   - MATH 1107 [0.5] Linear Algebra I
   - STAT 2507 [0.5] Introduction to Statistical Modeling I

10. 2.0 credits in Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)

11. 1.0 credit in:
    - COMP 2402 [0.5] Abstract Data Types and Algorithms
    - or COMP at the 2000-level or above

12. 0.5 credit in free electives.

Total Credits 20.0

Biochemistry

B.Sc. Major (20.0 credits)

A. Credits included in the Major CGPA (12.0 credits)

1. 2.0 credits in:
   - BIOL 1103 [0.5] Foundations of Biology I
   - BIOL 1104 [0.5] Foundations of Biology II
   - BIOL 2104 [0.5] Introductory Genetics
   - BIOL 3104 [0.5] Molecular Genetics

2. 0.5 credit in:
   - BIOL 3101 [0.5] General Biochemistry I
   - BIOL 3102 [0.5] General Biochemistry II
   - BIOL 3103 [0.5] Practical Biochemistry I
   - BIOL 3104 [0.5] Practical Biochemistry II
   - BIOC 3202 [0.5] Biophysical Techniques and Applications
   - BIOC 3008 [0.5] Bioinformatics
   - BIOC 4008 [0.5] Computational Systems Biology

3. 1.5 credits in:
   - COMP 1005 [0.5] Introduction to Computer Science I
   - COMP 1006 [0.5] Introduction to Computer Science II
   - COMP 2401 [0.5] Introduction to Systems Programming

4. 1.5 credits from:
   - MATH 1805 [0.5] Discrete Structures I
   - MATH 2107 [0.5] Linear Algebra II
   - STAT 2509 [0.5] Introduction to Statistical Modeling II

5. 2.0 credits in:
   - BIOCHEM [0.5] Advanced Biochemistry
   - BIOCHEM [0.5] Advanced Biochemistry II
   - BIOCHEM [0.5] Advanced Biochemistry III
   - BIOCHEM [0.5] Advanced Biochemistry IV

6. 1.0 credit from:
   - PHYS 1007 [0.5] Elementary University Physics I
   - PHYS 1008 [0.5] Elementary University Physics II
   - PHYS 1003 [0.5] Introductory Mechanics and Thermodynamics
   - PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion

UNOFFICIAL 2021-22 Undergraduate Calendar 147
Students. The recommended course pattern for students is provided in the Undeclared entry of the Programs section of this Calendar. Undeclared students normally must apply to enter a program before beginning their second year of study. The Science Student Success Centre (SSSC) provides Undeclared students guidance to the appropriate support services in making this decision.

**Change of Program within the B.Sc. Degree**

Students may transfer to a program within the B.Sc. degree if upon entry to the new program they would be in good academic standing.

Other applications for change of program will be considered on their merits; students may be accepted in the new program in Good Standing or on Academic Warning.

Applications to declare or change their program within the B.Sc. Degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

**Minors, Concentrations and Specializations**

Students may add a minor, concentration or specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a minor, concentration or specialization requires that the student be in Good Standing and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.

**Experimental Science Requirement**

Students in a B.Sc. degree program must present at graduation at least two full credits of experimental science chosen from two different departments or institutes from the list below:

**B.Sc. Regulations**

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

**Breadth Requirement for the B.Sc.**

Students in a Bachelor of Science program must present the following credits at graduation:

1. 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in science continuation courses in each of the two majors
2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for fewer than 10.0 credits.
2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for 10.0 or more credits.

**Declared and Undeclared Students**

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.Sc. degree without being registered in a program. These students are referred to as Undeclared students. The recommended course pattern for

- GEOG 4101 [0.5] Two Million Years of Environmental Change
- GEOG 4103 [0.5] Water Resources Engineering
- GEOG 4104 [0.5] Microclimatology
- GEOG 4108 [0.5] Permafrost

#### Science Psychology Courses
- PSYC 2001 [0.5] Introduction to Research Methods in Psychology
- PSYC 2002 [0.5] Introduction to Statistics in Psychology
- PSYC 2700 [0.5] Introduction to Cognitive Psychology
- PSYC 3000 [1.0] Design and Analysis in Psychological Research
- PSYC 3506 [0.5] Cognitive Development
- PSYC 3700 [1.0] Cognition (Honours Seminar)
- PSYC 3702 [0.5] Perception
- PSYC 3207 [0.5] Human Neuropsychology I
- PSYC 3307 [0.5] Human Neuropsychology II

#### Science Continuation Courses
A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:
- BIOC (Biochemistry)
- BIOL (Biology)
- CHEM (Chemistry)
- COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.
- ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.
- Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.
- ENSC (Environmental Science)
- FOOD (Food Science and Nutrition)
- GEOM (Geomatics)
- HLTH (Health Sciences)
- ISAP (Interdisciplinary Science Practice)
- MATH (Mathematics)
- NEUR (Neuroscience)
- PHYS (Physics), except PHYS 2903
- Science Geography Courses (see list above)
- Science Psychology Courses (see list above)
- STAT (Statistics)
Free Electives and Engineering and Design (may include Approved Courses Outside the Faculties of Science Electives list above. The 2000-4000 level chosen from: Science Faculty Electives are courses at the 1000-4000 level chosen from:

- BIOL (Biochemistry)
- BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives
- CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007
- COMP (Computer Science) except COMP 1001
- ERTH (Earth Sciences) except ERTH 1010, ERTH 1011 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.
- Engineering
- ENSC 2001
- FOOD (Food Science and Nutrition)
- GEOM (Geomatics)
- HLTH (Health Science)
- ISAP (Interdisciplinary Science Practice)
- MATH (Mathematics)
- NEUR (Neuroscience)
- PHYS (Physics) except PHYS 1901, PHYS 1902, PHYS 1905, PHYS 2903
- Science Geography (see list above)
- Science Psychology (see list above)
- STAT (Statistics)
- TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives
Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)
All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above), NSCI 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives
Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy

Admission Requirements
Students can apply to co-op in one of two ways: directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for
Students must have:

To obtain a Satisfactory grade for the co-op work term

Work Term Assessment and Evaluation

Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation

To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.
Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

B.Sc. Biochemistry, Computational Biochemistry: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Completion of 5.0 or more credits at Carleton University;
2. Registered as a full-time student in the Bachelor of Science Honours degree program;
3. Obtained and maintained a major CGPA of 8.0 or higher and an overall CGPA of 6.50 or higher

B.Sc. Honours Biochemistry and Computational Biochemistry students must successfully complete three (3) work terms to obtain the co-op designation.

Work Term Course: BIOC 3999

Admissions Information

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- B.Sc. (Honours)
- B.Sc. (Major)
- B.Sc.

Admission Requirements

B. Sc. Honours Program

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions and two of Biology, Chemistry, Earth and Space Sciences or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For the Combined Honours program in Chemistry and Computer Science, 4U Chemistry and Calculus and Vectors are strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

For entry to an Honours program after the completion of 5.0 included credits, a student must have a major CGPA of 5.50 or higher, an overall CGPA of 4.50 or higher and the recommendation of the Honours department or committee. A student beginning the final 10.0 credits towards an Honours degree must present a major CGPA
of 6.00 or higher, an overall CGPA of 5.00 or higher and the recommendation of the Honours department or committee. A student beginning the final 5.0 credits towards an Honours degree must present a major CGPA of 6.50 or higher and an overall CGPA of 5.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

B.Sc. Major Program

B.Sc. Program

First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended. Equivalent courses may be substituted between the old and new Ontario mathematics curriculum.

Advanced Standing
For entry to a B.Sc. or B.Sc. Major program after the completion of 5.0 included credits, a student must have a major and core CGPA of 3.50 or higher and an overall CGPA of 3.50 or higher. A student beginning the final 5.0 credits towards a B.Sc. or B.Sc. Major degree must present a major and core CGPA of 4.00 or higher and an overall CGPA of 4.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

Co-op Option

Direct Admission to the First Year of the Co-op Option
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Biochemistry (BIOC) Courses

BIOC 2200 [0.5 credit]
Cellular Biochemistry
Cellular functions and their interrelationships. Introduction to thermodynamics, membrane structure and function, transport mechanisms, basic metabolic pathways, energy production and utilization, communications between cells. It is strongly recommended that Biology Majors and Honours students take this course in their second year of study.
Includes: Experiential Learning Activity
Also listed as BIOL 2200.
Precludes additional credit for BIOL 2201.
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), (CHEM 1006 or CHEM 1002) or permission of the Institute. It is strongly recommended that students in Biochemistry programs take this course in their second year of study.
Lectures three hours a week, laboratory or tutorial four hours a week.

BIOC 2300 [0.5 credit]
Physical Biochemistry
Energy of biological systems, molecular interactions, diffusion principles, introduction to protein folding, structure and thermodynamics, ligand binding and nucleic acid structures; experimental design and data management.
Precludes additional credit for CHEM 2103.
Prerequisite(s): BIOC 2200 (can be taken concurrently with BIOC 2300) and MATH 1007 and MATH 1107, and (PHYS 1007 and PHYS 1107) or (PHYS 1103 and PHYS 1104).
Lectures three hours a week, tutorials three hours a week.

BIOC 2400 [0.5 credit]
Independent Research I
Students carry out a laboratory research project under the supervision of a faculty member from the Institute of Biochemistry. A research report must be submitted by the last day of classes for evaluation by the Director and Faculty supervisor.
Includes: Experiential Learning Activity
Prerequisite(s): restricted to Honours students of second-year standing in a Biochemistry program with a GPA of 10.0 or higher in first year, and approval of the Director and a Faculty supervisor.
Laboratory research for at least three hours a week over two terms.
BIOC 3008 [0.5 credit]
Bioinformatics
A practical exploration in the application of information technology to biochemistry and molecular biology. Insight into biological knowledge discovery via molecular structure and function prediction, comparative genomics and biological information management.
Includes: Experiential Learning Activity
Also listed as BIOL 3008 and COMP 3308.
Prerequisite(s): BIOC 2200 or BIOL 2200; or permission of the Institute.
Lecture two hours a week, computer workshop three hours a week.

BIOC 3101 [0.5 credit]
General Biochemistry I
Chemistry, structure and function of proteins, lipids, carbohydrates and nucleic acids. Monomers, linkages and types of biochemical polymers that are formed. Mechanism of action of enzymes, regulatory control mechanisms of proteins and integration of biochemical pathways.
Precludes additional credit for CHEM 3401.
Prerequisite(s): (BIOC 2200 or BIOL 2200), and (CHEM 2203 and CHEM 2204) or (CHEM 2207 and CHEM 2208) or permission of the Institute.
Lectures three hours a week.

BIOC 3102 [0.5 credit]
General Biochemistry II
Prerequisite(s): BIOC 3101 and BIOL 2104.
Lectures three hours a week.

BIOC 3103 [0.5 credit]
Practical Biochemistry I
Introduction to experimental biochemistry and the theory and concepts dealt with in BIOC 3101, and BIOC 3202.
Includes: Experiential Learning Activity
Precludes additional credit for BIOC 3006 (no longer offered).
Prerequisite(s): (BIOC 2200 or BIOL 2200) and CHEM 2203 or permission of the Institute. CHEM 2204 and (BIOC 2300 or CHEM 2103) are also recommended.
It is highly recommended that BIOC 3101 and BIOC 3202 be taken concurrently.
Laboratory four hours a week, tutorial one hour per week.

BIOC 3104 [0.5 credit]
Practical Biochemistry II
Introduction to experimental biochemistry and the theory and concepts dealt with in BIOC 3101, BIOC 3102, and BIOC 3202.
Includes: Experiential Learning Activity
Precludes additional credit for BIOC 3006 (no longer offered).
Prerequisite(s): BIOC 3103. It is highly recommended that BIOC 3102 be taken concurrently.
Laboratory four hours a week, tutorial one hour a week.

BIOC 3202 [0.5 credit]
Biophysical Techniques and Applications
Theory and applications of current biochemical/biophysical instrumentation and techniques including biophysical spectroscopy, molecular structure determination, calorimetry, and mass spectrometry.
Precludes additional credit for BIOC 4002.
Prerequisite(s): BIOC 2200 or permission of the Institute.
Lectures three hours a week.

BIOC 3203 [0.5 credit]
Biochemical Pharmacology
Biochemical principles of pharmacology, including receptor mechanisms, signal transduction, pharmacokinetics, and pharmacodynamics. Genome-wide association studies, pharmacogenomics, and personalized medicine will also be included.
Prerequisite(s): BIOC 2200 or BIOL 2200, or permission of the Institute.
Lectures three hours a week.

BIOC 3400 [0.5 credit]
Independent Research II
Students carry out a laboratory research project under the supervision of faculty member from the Institute of Biochemistry. A research report must be submitted by the last day of classes for evaluation by the Director and Faculty supervisor.
Includes: Experiential Learning Activity
Prerequisite(s): restricted to Honours students of third-year standing in a Biochemistry program with a GPA of 10.0 or higher in second year, and approval of the Director and Faculty supervisor.
Laboratory research for at least three hours a week over two terms.

BIOC 3999 [0.0 credit]
Co-operative Work Term
Practical experience for students enrolled in the co-operative option. Students must receive a satisfactory evaluation from their work term employer; and present a written report describing their work term project. Graded Sat or Uns.
Includes: Experiential Learning Activity
Prerequisite(s): registration in the Biochemistry co-operative option and permission of the Institute.
BIOC 4001 [0.5 credit]  
Methods in Biochemistry  
Principles and applications of modern biochemical methodology, including ultracentrifugation, electrophoresis, ELISA, EMSA, experimental planning, ligand binding kinetics, fluorescence spectroscopy, affinity purification, and in vitro translation.  
Includes: Experiential Learning Activity  
Prerequisite(s): BIOC 3103 and BIOC 3104 or permission of the Institute.  
Lectures and discussion two hours, laboratory four hours a week.

BIOC 4004 [0.5 credit]  
Industrial Biochemistry  
The application of biochemistry to the production of biological compounds useful in nutrition, medicine, and the food and chemical industries. General strategies for efficient production of these compounds by controlling the activities of living cells or enzymes.  
Prerequisite(s): BIOC 3101 and BIOC 3102 (BIOC 3102 may be taken concurrently), or permission of the Institute.  
Lecture three hours a week.

BIOC 4005 [0.5 credit]  
Biochemical Regulation  
Regulation at the transcriptional, translational and metabolic level; regulation of cell and subcellular organelle function and other timely topics may be included.  
Prerequisite(s): BIOC 3101 and BIOC 3102.  
Lectures three hours a week.

BIOC 4007 [0.5 credit]  
Membrane Biochemistry  
Biochemical and biophysical aspects of biomembrane structure and function. Topics may include: membrane lipids and proteins, lipid polymorphism, model membranes, liposomes, membrane biogenesis, the membrane cytoskeleton, membrane trafficking, membrane fusion, exocytosis and signal transduction across membranes.  
Prerequisite(s): BIOL 2200 or BIOC 2200, or BIOC 3101 (which may be taken concurrently with BIOC 4007), or permission of the Institute.  
Lectures two hours a week and workshop two hours a week.

BIOC 4008 [0.5 credit]  
Computational Systems Biology  
Modeling and simulation of metabolic and regulatory networks towards understanding complex and highly dynamic cellular systems. Biotechnological applications include metabolic engineering, synthetic biology, and drug discovery.  
Includes: Experiential Learning Activity  
Also listed as COMP 4308.  
Prerequisite(s): BIOC 3101 or permission of the Institute.  
Lecture one and a half hours per week, workshop one and a half hours per week.

BIOC 4009 [0.5 credit]  
Biochemistry of Disease  
The biochemical basis of disease including genetic and metabolic disorders such as cancer, neurological degenerative conditions, diabetes, stroke and microbial infections.  
Prerequisite(s): BIOC 3101 and BIOC 3102, or permission of the Institute.  
Lectures three hours a week.

BIOC 4200 [0.5 credit]  
Immunology  
The organization and function of the immune system, including the anatomy of the immune system, the properties and behaviour of cells of the immune system, and the molecular and genetic bases of the immune response.  
Also listed as BIOL 4200.  
Prerequisite(s): BIOL 3201 or permission of the Institute.  
Lectures three hours a week.

BIOC 4201 [0.5 credit]  
Advanced Cell Culture and Tissue Engineering  
Theory and application of current techniques and developments in cell culture as applied to research questions in the field of stem cells and tissue engineering.  
Includes: Experiential Learning Activity  
Also listed as BIOL 4201.  
Prerequisite(s): BIOL 3201 or permission of the Institute.  
Laboratory four hours per week, tutorial one hour a week.

BIOC 4202 [0.5 credit]  
Mutagenesis and DNA Repair  
A mechanistic study of mutagenesis and DNA repair. Topics include DNA structure perturbations, spontaneous and induced mutagenesis, the genetics and biochemistry of DNA repair and recombination, and the role of mutations in the development of genetic disease and cancer.  
Also listed as BIOL 4202.  
Prerequisite(s): BIOL 3104 and BIOL 2200/BIOC 2200, or permission of the Institute.  
Lectures and tutorial three hours a week.

BIOC 4203 [0.5 credit]  
Advanced Metabolism  
Structure, biochemical derivation and function of secondary metabolites such as toxins and antibiotics. Examples from plant, fungal and animal systems.  
Prerequisite(s): BIOC 3101 and BIOC 3102, or permission of the Institute.  
Lectures three hours a week.
BIOC 4204 [0.5 credit]
Protein Biotechnology
An advanced lecture, discussion and seminar course covering the theory, development and current techniques of protein and enzyme engineering. Topics to be discussed may also include applications in biotechnology, nanotechnology and new frontiers in basic and applied research. Precludes additional credit for BIOC 4002. Prerequisite(s): BIOC 3101 and BIOC 3202 (may be taken concurrently), or permission of the Institute. Lectures two hours a week, workshop two hours a week.

BIOC 4708 [0.5 credit]
Principles of Toxicology
Basic theorems of toxicology with examples of current research problems. Toxic risk is defined as the product of intensive hazard and extensive exposure. Each factor is assessed in scientific and social contexts and illustrated with many types of experimental material. Prerequisite(s): BIOC 3101 and fourth-year standing or permission of the Institute. Also offered at the graduate level, with different requirements, as BIOL 6402, CHEM 5708, for which additional credit is precluded. Lectures three hours a week.

BIOC 4901 [0.5 credit]
Selected Topics in Biochemistry
Selected topics of current interest in biochemistry are offered upon approval by the Director in consultation with members of the Institute.

BIOC 4906 [1.0 credit]
Interdisciplinary Research Project
Collaborative, interdisciplinary research project approved by the Director. Requires co-supervision, with at least one faculty member from the Institute of Biochemistry. Evaluation is based on a written thesis and poster presentation. Includes: Experiential Learning Activity Precludes additional credit for BIOC 4907 and BIOC 4908. Prerequisite(s): (BIOC 3103 and BIOC 3104) and (BIOC 3101 and BIOC 3102) or equivalent, eligibility to continue in Honours Biochemistry or in Biochemistry and Biotechnology, permission of the Institute.

BIOC 4907 [1.0 credit]
Honours Essay and Research Proposal
An independent research study using library or computational resources. The candidate will prepare a critical review of a topic approved by a faculty adviser. Evaluation will be based on a written report and a poster presentation of the project. Includes: Experiential Learning Activity Precludes additional credit for BIOC 4906 [1.0] and BIOC 4908 [1.0]. Prerequisite(s): fourth-year standing in an Honours Biochemistry program and permission of the Institute.

BIOC 4908 [1.0 credit]
Research Project
Students carry out a research project approved by the Director, under the supervision of a faculty member of the Institute, in either the Biology or Chemistry departments. Evaluation is based on a written thesis and poster presentation. Includes: Experiential Learning Activity Precludes additional credit for BIOC 4906 and BIOC 4907. Prerequisite(s): (BIOC 3103 and BIOC 3104) and (BIOC 3101 and BIOC 3102) or equivalent, and eligibility to continue in Honours Biochemistry or in Biochemistry and Biotechnology.

Biology
This section presents the requirements for programs in:
- Bioinformatics B.Sc. Honours
- Biology B.Sc. Honours
- Biology with Concentration in Biodiversity, Natural History, and Conservation Science B.Sc. Honours
- Biology with Concentration in Ecology, Evolution and Behaviour B.Sc. Honours
- Biology with Concentration in Health Science B.Sc. Honours
- Biology with Concentration in Molecular and Cellular Biology B.Sc. Honours
- Biology with Concentration in Physiology B.Sc. Honours
- Biology B.Sc. Major
- Biology B.Sc.
- Biology and Biotechnology B.Sc. Honours
- Biology and Earth Sciences B.Sc. Combined Honours
- Biology and Physics B.Sc. Combined Honours
- Neuroscience and Biology B.Sc. Combined Honours
- Biology B.A. Honours
- Biology B.A.
- Biology B.A. Combined Honours
- Minor in Biology

Program Requirements
Course Categories for Biology Programs
The program descriptions below make use of the following course categories that are defined in the Bachelor of Science Regulations in this Calendar.
- Science Faculty Electives
- Advanced Science Faculty Electives
- Science Continuation
- Science Geography
- Science Psychology
- Approved Courses Outside the Faculties of Science and Engineering and Design
- Free Electives
- Restricted Courses: Students in the Biology B.Sc., Biology B.Sc. Major, and Biology B.Sc. Honours programs (except students in the Biology B.A. Biology
B.Sc. Honours (20.0 credits)

**Bioinformatics**

**B.Sc. Honours (20.0 credits)**

A. Credits included in the Major CGPA (12.5 credits)

### A. Credits Included in the Major CGPA (11.5 credits)

1. **2.0 credits in:**
   - BIOL 1103 [0.5] Foundations of Biology I
   - BIOL 1104 [0.5] Foundations of Biology II
   - BIOL 1105 [0.5] Biological Methods, Analysis and Interpretation

2. **2.0 credits in:**
   - BIOL 2001 [0.5] Animals: Form and Function
   - BIOL 2002 [0.5] Plants: Form and Function
   - BIOL 2104 [0.5] Introductory Genetics
   - BIOL 2200 [0.5] Cellular Biochemistry

3. **1.5 credits in:**
   - BIOL 3205 [0.5] Plant Biochemistry and Physiology
   - BIOL 3305 [0.5] Human and Comparative Physiology
   - BIOL 3307 [0.5] Advanced Human Anatomy and Physiology

4. **1.0 credit in:**
   - BIOL 4305 [0.5] General Biochemistry I
   - BIOL 4306 [0.5] General Biochemistry II

5. **2.0 credits from:**
   - BIOL 3111 [0.5] Vertebrate Evolution: Mammals, Reptiles, and Birds
   - BIOL 3112 [0.5] Vertebrate Evolution: Fish and Amphibians
   - BIOL 3201 [0.5] Cell Biology
   - BIOL 3202 [0.5] Principles of Developmental Biology
   - BIOL 3501 [0.5] Biomechanics
   - BIOL 3802 [0.5] Animal Behaviour
   - BIOL 4008 [0.5] Molecular Plant Development
   - BIOL 4201 [0.5] Advanced Cell Culture and Tissue Engineering
   - BIOL 4203 [0.5] Advanced Metabolism
   - BIOL 4209 [0.5] Advanced Animal Physiology
   - BIOL 4306 [0.5] Animal Neurophysiology
   - BIOL 4309 [0.5] Studies in Human Performance
   - BIOL 4317 [0.5] Neuroethology: The Neural Basis of Animal Behaviour
   - BIOL 4318 [0.5] Adaptations to Extreme Environments
   - BIOL 4319 [0.5] Studies in Exercise Physiology

6. **1.5 credit in BIOL at the 2000-level or higher**

7. **0.5 credit in BIOL or BIOL at the 3000-level or higher**

8. **0.5 credit from:**
   - BIOL 3901 [0.5] Research Proposal

### Total Credits

- **Biology with Concentration in Physiology B.Sc. Honours (20.0 credits)**
  - **A. Credits Included in the Major CGPA (11.5 credits)**
  - **B. Credits Not Included in the Major CGPA (8.5 credits)**
  - **Total Credits: 20.0**
B.Sc. Major (20.0 credits)

A. Credits included in the Major CGPA (9.5 credits)
1. 1.5 credit in:
   - BIOL 1103 [0.5] Foundations of Biology I
   - BIOL 1104 [0.5] Foundations of Biology II
   - BIOL 1105 [0.5] Biological Methods, Analysis and Interpretation
2. 2.5 credits from:
   - BIOL 2001 [0.5] Animals: Form and Function
   - BIOL 2002 [0.5] Plants: Form and Function
   - BIOL 2104 [0.5] Introductory Genetics
   - BIOL 2107 [0.5] Fundamentals of Genetics
   - BIOL 2200 [0.5] Cellular Biochemistry
   - BIOL 2201 [0.5] Cell Biology and Biochemistry
   - BIOL 2303 [0.5] Microbiology
   - BIOL 2600 [0.5] Ecology
3. 0.5 credit from:
   - BIOL 3205 [0.5] Plant Biochemistry and Physiology
   - BIOL 3306 [0.5] Human Anatomy and Physiology
4. 3.0 credits in BIOL at the 3000-level or higher
5. 2.0 credits in Advanced Science Faculty electives
6. 1.0 credit from:
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II

B. Credits not included in the Major CGPA (8.5 credits)
7. 0.5 credit in:
   - MATH 1007 [0.5] Elementary Calculus I
8. 1.0 credit from:
   - MATH 1107 [0.5] Linear Algebra I
   - COMP 1005 [0.5] Introduction to Computer Science I
   - COMP 1006 [0.5] Introduction to Computer Science II
   - PHYS 1007 [0.5] Elementary University Physics I
   - PHYS 1008 [0.5] Elementary University Physics II
   - PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion
   - STAT 2507 [0.5] Introduction to Statistical Modeling I
9. 1.0 credit in Science Faculty Electives
10. 2.0 credits in Advanced Science Faculty Electives
11. 2.0 credits in Science Continuation courses (not in BIOL)
12. 2.0 credits in Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)
13. 1.0 credit in free electives

Total Credits 20.0

Biology

B.Sc. (15.0 credits)

Note: some advanced Biology courses with laboratory components will not be available to students enrolling in the B.Sc. program.

A. Credits included in the Major CGPA (6.5 credits)
1. 1.5 credit in:
   - BIOL 1103 [0.5] Foundations of Biology I
   - BIOL 1104 [0.5] Foundations of Biology II
   - BIOL 1105 [0.5] Biological Methods, Analysis and Interpretation
2. 2.0 credits from:
   - BIOL 2001 [0.5] Animals: Form and Function
   - BIOL 2002 [0.5] Plants: Form and Function
   - BIOL 2107 [0.5] Fundamentals of Genetics
   - BIOL 2201 [0.5] Cell Biology and Biochemistry
   - BIOL 2303 [0.5] Microbiology
   - BIOL 2600 [0.5] Ecology
3. 0.5 credit in:
   - BIOL 3306 [0.5] Human Anatomy and Physiology
4. 2.5 credits from BIOL at the 2000-level and 3000-level or higher
5. 1.0 credit from:
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - CHEM 1005 [0.5] General Chemistry III
   - CHEM 1006 [0.5] General Chemistry III
   - CHEM 1007 [0.5] Elementary Chemistry I
   - CHEM 1008 [0.5] Elementary Chemistry II
   - CHEM 1009 [0.5] Elementary Chemistry II (See Note 2, below)
6. 0.5 credit in:
   - MATH 1007 [0.5] Elementary Calculus I
7. 1.0 credit from:
   - COMP 1005 [0.5] Introduction to Computer Science I

Total Credits 15.0
COMP 1006 [0.5] Introduction to Computer Science II

B.Sc. Combined Honours (20.0 credits)

Neuroscience and Biology

1. 3.0 credits in:
- NEUR 1202 [0.5] Neuroscience of Mental Health and Psychiatric Disease
- NEUR 1203 [0.5] Neuroscience of Mental Health and Neurological Disease
- NEUR 2001 [0.5] Introduction to Research Methods in Neuroscience
- NEUR 2002 [0.5] Introduction to Statistics in Neuroscience
- NEUR 2201 [0.5] Cellular and Molecular Neuroscience
- NEUR 2202 [0.5] Neurodevelopment and Plasticity
- NEUR 3001 [0.5] Data Analysis in Neuroscience I
- NEUR 3002 [0.5] Data Analysis in Neuroscience II
- NEUR 3204 [0.5] Neuropharmacology
- NEUR 3206 [0.5] Sensory and Motor Neuroscience
- NEUR 3207 [0.5] Systems Neuroscience

2. 3.0 credits in:
- BIOL 1103 [0.5] Foundations of Biology I
- BIOL 1104 [0.5] Foundations of Biology II
- BIOL 2001 [0.5] Animals: Form and Function
- BIOL 2104 [0.5] Introductory Genetics
- BIOL 2200 [0.5] Cellular Biochemistry

3. 1.5 credits in BIOL or BIOC at the 3000 level or above

4. 1.0 credit from:
- NEUR 3301 [0.5] Genetics of Mental Health
- NEUR 3303 [0.5] The Neuroscience of Consciousness
- NEUR 3304 [0.5] Hormones and Behaviour
- NEUR 3401 [0.5] Environmental Toxins and Mental Health
- NEUR 3402 [0.5] Impact of Lifestyle and Social Interactions on Mental Health
- NEUR 3403 [0.5] Stress and Mental Health
- NEUR 3501 [0.5] Neurodegeneration and Aging
- NEUR 3502 [0.5] Neurodevelopmental Determinants of Mental Health
- NEUR 4301 [0.5] Neurobiology of Energy Homeostasis
- NEUR 4302 [0.5] Sex and the Brain
- NEUR 4303 [0.5] Indigenous Health & Mental Health
- NEUR 4305 [0.5] Immune-Brain Interactions
- NEUR 4306 [0.5] The Neural Basis of Addiction
- NEUR 4600 [0.5] Advanced Lab in Neuroanatomy

5. 2.0 credits from:
- BIOL 4007 [0.5] Membrane Biochemistry
- BIOL 2600 [0.5] Ecology
- BIOL 2301 [0.5] Biotechnology I
- BIOL 2303 [0.5] Microbiology
- BIOL 3307 [0.5] Advanced Human Anatomy and Physiology
- BIOL 3605 [0.5] Field Course I
- BIOL 3609 [0.5] Evolutionary Concepts
- BIOL 3802 [0.5] Animal Behaviour
- BIOL 3804 [0.5] Social Evolution
- BIOL 4306 [0.5] Animal Neurophysiology
- BIOL 4317 [0.5] Neuroethology: The Neural Basis of Animal Behaviour
- BIOL 4802 [0.5] Advanced Animal Behaviour
- CHEM 2204 [0.5] Organic Chemistry II

6. 0.5 credit from:
- NEUR 4200 [0.5] Seminar on Current Advances in Neuroscience
- NEUR 4202 [0.5] Seminar on Current Research in Neuroscience and Psychiatric Disease
- NEUR 4203 [0.5] Seminar on Current Research in Neuroscience and Clinical Neurology

7. 1.0 credit in neurophysiology, animal behaviour, neuropsychology or a related topic from:
- NEUR 4905 [1.0] Honours Workshop
- NEUR 4907 [1.0] Honours Essay and Research Proposal
- NEUR 4908 [1.0] Honours Research Thesis
- BIOL 4905 [1.0] Honours Workshop
- BIOL 4907 [1.0] Honours Essay and Research Proposal
- BIOL 4908 [1.0] Honours Research Thesis

B. Credits not included in the Major CGPA (5.5 credits)
8. 1.0 credit in:  
MATH 1007 [0.5] Elementary Calculus I  
MATH 1107 [0.5] Linear Algebra I  

9. 1.5 credits in:  
CHEM 1001 [0.5] General Chemistry I  
& CHEM 1002 [0.5] General Chemistry II  
CHEM 2203 [0.5] Organic Chemistry I  

10. 1.0 credit in:  
PHYS 1007 [0.5] Elementary University Physics I  
& PHYS 1008 [0.5] Elementary University Physics II  

11. 2.0 credits in approved courses outside of the faculties of Science and Engineering and Design (may include NSCI 1000)  

Total Credits 20.0

Biology

B.A. Honours (20.0 credits)

A. Credits included in the Major CGPA (8.0 credits)

1. 1.5 credit in:  
Biol 1103 [0.5] Foundations of Biology I  
Biol 1104 [0.5] Foundations of Biology II  
Biol 1105 [0.5] Biological Methods, Analysis and Interpretation  

2. 2.5 credits from:  
Biol 2001 [0.5] Animals: Form and Function  
Biol 2002 [0.5] Plants: Form and Function  
Biol 2104 [0.5] Introductory Genetics  
or Biol 2107 [0.5] Fundamentals of Genetics  
Biol 2200 [0.5] Cellular Biochemistry  
or Biol 2201 [0.5] Cell Biology and Biochemistry  
Biol 2303 [0.5] Microbiology  
Biol 2600 [0.5] Ecology  

3. 2.5 credits in BIOL  

4. 1.0 credit in Biol at the 3000-level or higher  

5. 1.0 credits in BIOL  

6. 1.0 credit from:  
Biol 4905 [1.0] Honours Workshop  
or Biol 4907 [1.0] Honours Essay and Research Proposal  
or Biol 4908 [1.0] Honours Research Thesis  

B. Credits not included in the Major CGPA (9.0 credits)

1. 1.5 credit:  

2. 2.0 credits from:  

3. 1.5 credits in BIOL at the 3000-level or higher  

4. 1.0 credit from:  

5. 1.0 credit in Science Faculty Electives, not in BIOL  

6. 4.0 credits in approved courses outside of the faculties of Science and Engineering and Design (may include NSCI 1000)  

7. 1.0 credit at the 2000-level or higher  

8. 2.0 credits in free electives.  

Total Credits 15.0

Biology

B.A. Combined Honours (20.0 credits)

A. Credits included in the Biology Major CGPA (7.0 credits)

1. 1.5 credit in:  
Biol 1103 [0.5] Foundations of Biology I  
Biol 1104 [0.5] Foundations of Biology II  
Biol 1105 [0.5] Biological Methods, Analysis and Interpretation  

2. 2.5 credits from:  

3. 1.0 credit in Science Faculty Electives at the 2000-level or higher, not in BIOL  

4. 1.0 credit in Science Faculty Electives not in BIOL  

5. 2.0 credits in approved courses at the 2000 level outside of the faculties of Science and Engineering and Design  

Note: some advanced Biology courses with laboratory components will not be available to students enrolling in the B.A. program.
Undergraduate Co-operative Education Policy

Admission Requirements

Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton’s co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student’s responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term.

Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.
Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option
Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option
Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student’s failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

B.Sc. Honours Biology, Bioinformatics: Co-op Admission and Continuation Requirements

• Maintain full-time status in each study term (2.0 credits);
• Be eligible to work in Canada (for off-campus work)
• Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Completion of 5.0 or more credits at Carleton University;
2. Registered as a full-time student in the Bachelor of Science Honours degree program;
3. Obtained and maintained a major CGPA of 8.0 or higher and an overall CGPA of 6.50 or higher

B.Sc. Honours Biology and Bioinformatics students must successfully complete three (3) work terms to obtain the Co-op designation.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

1. 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in science continuation courses in each of the two majors
2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for fewer than 10.0 credits.
2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for 10.0 or more credits.

Declared and Undeclared Students

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.Sc. degree without being registered in a program. These students are referred to as Undeclared students. The recommended course pattern for Undeclared students is provided in the Undeclared entry of the Programs section of this Calendar. Undeclared students normally must apply to enter a program before beginning their second year of study. The Science Student Success Centre (SSSC) provides Undeclared students guidance to the appropriate support services in making this decision.

Change of Program within the B.Sc. Degree

Students may transfer to a program within the B.Sc. degree if upon entry to the new program they would be in good academic standing.

Other applications for change of program will be considered on their merits; students may be accepted in the new program in Good Standing or on Academic Warning.

Applications to declare or change their program within the B.Sc. Degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may add a minor, concentration or specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a minor, concentration or specialization requires that the student be in Good Standing and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of experimental science chosen from two different departments or institutes from the list below:

PSYC 3307 [0.5] Human Neuropsychology II  
Science Continuation Courses  
A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:  
BIOC (Biochemistry)  
BIOL (Biology)  
CHEM (Chemistry)  
COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.  
ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.  
Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.  
ENSC (Environmental Science)  
FOOD (Food Science and Nutrition)  
GEOM (Geomatics)  
HLTH (Health Sciences)  
ISAP (Interdisciplinary Science Practice)  
MATH (Mathematics)  
NEUR (Neuroscience)  
PHYS (Physics), except PHYS 2903  
Science Geography Courses (see list above)  
Science Psychology Courses (see list above)  
STAT (Statistics)  

170  The Academic Year (Graduate and Undergraduate Studies)
### Science Faculty Electives
Science Faculty Electives are courses at the 1000-4000 level chosen from:

- **BIOC** (Biochemistry)
- **BIOL** (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives
- CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007
- **COMP** (Computer Science) except COMP 1001
- ERTH (Earth Sciences) except ERTH 1010, ERTH 1011 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.
- **Engineering**
  - ENSC 2001
- **FOOD** (Food Science and Nutrition)
- **GEOM** (Geomatics)
- **HLTH** (Health Science)
- **ISAP** (Interdisciplinary Science Practice)
- **MATH** (Mathematics)
- **NEUR** (Neuroscience)
- PHYS (Physics) except PHYS 1901, PHYS 1902, PHYS 1905, PHYS 2903
- Science Geography (see list above)
- Science Psychology (see list above)
- **STAT** (Statistics)
- **TSES** (Technology, Society, Environment) Biology students may use these courses only as free electives.

### Advanced Science Faculty Electives
Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

### Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)
All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above), NSCI 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

### Free Electives
Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

### Courses Allowable Only as Free Electives in any B.Sc. Program

### B.A. Regulations
The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

#### First-Year Seminars
B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

#### Breadth Requirement
Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration or Specialization may be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.
Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

**Breadth Area 1: Culture and Communication**

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

**Subject codes:** ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

**Breadth Area 2: Humanities**

**Subject codes:** AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

**Breadth Area 3: Science, Engineering, and Design**

**Subject codes:** AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IREM, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

**Breadth Area 4: Social Sciences**

**Subject codes:** ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSIC, PSYC, SOCI, SOWK

**Declared and Undeclared Students**

Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

**Change of Program Within the B.A. Degree**

Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

**Minors, Concentrations and Specializations**

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

**Mention : Français**

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:

1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:
1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention: Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Degrees
- B.Sc. (Honours)
- B.Sc. (Major)
- B.Sc.

Admission Requirements
B. Sc. Honours Program
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.
For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions and two of Biology, Chemistry, Earth and Space Science or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements
For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For the Combined Honours program in Chemistry and Computer Science, 4U Chemistry and Calculus and Vectors are strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing
For entry to an Honours program after the completion of 5.0 included credits, a student must have a major CGPA of 5.50 or higher, an overall CGPA of 4.50 or higher and the recommendation of the Honours department or committee. A student beginning the final 10.0 credits towards an Honours degree must present a major CGPA of 5.00 or higher, an overall CGPA of 5.00 or higher and the recommendation of the Honours department or committee. A student beginning the final 5.0 credits towards an Honours degree must present a major CGPA of 6.50 or higher and an overall CGPA of 5.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

B.Sc. Major Program
B.Sc. Program
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.
The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics. 4U Physics is strongly recommended.

Equivalent courses may be substituted between the old and new Ontario mathematics curriculum.

Advanced Standing
For entry to a B.Sc. or B.Sc. Major program after the completion of 5.0 included credits, a student must have a major and core CGPA of 3.50 or higher and an overall CGPA of 3.50 or higher. A student beginning the final 5.0 credits towards a B.Sc. or B.Sc. Major degree must present a major and core CGPA of 4.00 or higher and an overall CGPA of 4.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

Co-op Option
Direct Admission to the First Year of the Co-op Option
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are
described in the Co-operative Education Regulations section of this Calendar.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.)(Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions and Calculus and Vectors are recommended.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Direct Admission to the First Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European, Russian, and Eurasian Studies, French, Geography, Geography with a Concentration in Physical Geography, Geomatics, History, Law (Business Law), Law (Law, Policy and Government), Political Science, Psychology, Sociology.

Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Biology (BIOL) Courses

BIOL 1010 [0.5 credit]

Biotechnology and Society

A course for students interested in the science behind recent advances in biotechnology. The different ways in which biotechnology is being applied in agriculture, health care, and the environment will be examined. Precludes additional credit if taken concurrently with, or after BIOL 2200 or BIOC 2200 or BIOL 2201. Students in Biology and Biochemistry programs may only take this course as a free elective. Lectures three hours a week.

BIOL 1103 [0.5 credit]

Foundations of Biology I

A research-oriented course focusing on the scientific process of biological exploration at the cellular level. Topics include cell organization, metabolism, genetics, and reproduction.

Includes: Experiential Learning Activity

Precludes additional credit for BIOL 1003 (no longer offered).

Prerequisite(s): Ontario 4U/M in Biology (or equivalent), or Ontario 4U/M in Chemistry (or equivalent).

Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 1104 [0.5 credit]

Foundations of Biology II

A research-oriented course focusing on the scientific process of biological exploration at the macro scale. Topics include evolution, diversity of life, and ecological relationships.

Includes: Experiential Learning Activity

Precludes additional credit for BIOL 1004 (no longer offered).

Prerequisite(s): Ontario 4U/M in Biology (or equivalent) or BIOL 1103.

Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 1105 [0.5 credit]

Biological Methods, Analysis and Interpretation

Formulation of biological research questions, development of hypotheses and predictions, design of experiments, collection and analysis of data, interpretation and presentation of results.

Lectures three hours a week.
BIOL 1902 [0.5 credit]
Natural History
A course designed primarily for students in non-biology programs to investigate the natural history of plants and animals, and the communities in which they occur. Particular attention is paid to the Ottawa region, but appropriate examples from other locales are also included. Lectures three hours a week.

BIOL 2001 [0.5 credit]
Animals: Form and Function
An introduction to the diverse structures of animals (both invertebrates and vertebrates) in relationship to their functions, discussed within an evolutionary framework. Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104) or permission of the Department.
Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 2002 [0.5 credit]
Plants: Form and Function
An introduction to the structure and development of higher plants (at cellular, morphological and organism levels) discussed in relation to their function. Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104) or permission of the Department.
Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 2005 [0.5 credit]
Human Biology
A course for non-specialists interested in how the human body works. Topics will include biological molecules, cells, genetics, and various organ systems. Examples will be used to connect concepts taught in the course with general knowledge of human health and disease.
Prerequisite(s): BIOL 1003 or BIOL 1103 and (CHEM 1001 and CHEM 1002) or (CHEM 1005 and CHEM 1006) or permission of the Department. Students in Biology and Biochemistry programs may only take this course as a free elective.
Lectures three hours a week.

BIOL 2104 [0.5 credit]
Introductory Genetics
Lecture/laboratory course on the mechanisms of inheritance and the nature of gene structure, composition and function, introducing both classical Mendelian genetics and modern molecular genetics. It is strongly recommended that this course be taken by Biology majors in their second year of study.
Includes: Experiential Learning Activity
Precludes additional credit for BIOL 2106 (no longer offered) and BIOL 2107. Credit for BIOL 2106 will only be given if taken before BIOL 2104.
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104) or permission of the Department.
Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 2107 [0.5 credit]
Fundamentals of Genetics
Mechanisms of inheritance and the nature of gene structure, composition and function, introducing both classical Mendelian genetics and modern molecular genetics.
Precludes additional credit for BIOL 2104 and BIOL 2106 (no longer offered).
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104) or permission of the Department.
Lectures three hours a week.

BIOL 2200 [0.5 credit]
Cellular Biochemistry
Cellular functions and their interrelationships. Introduction to thermodynamics, membrane structure and function, transport mechanisms, basic metabolic pathways, energy production and utilization, communications between cells. It is strongly recommended that Biology Majors and Honours students take this course in their second year of study.
Includes: Experiential Learning Activity
Also listed as BIOC 2200.
Precludes additional credit for BIOL 2201.
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), (CHEM 1001 and CHEM 1002) or (CHEM 1005 and CHEM 1006), or permission of the Department.
Lectures three hours a week, laboratory or tutorial four hours a week.

BIOL 2201 [0.5 credit]
Cell Biology and Biochemistry
A study of the molecular, metabolic and structural organization of cells in relation to function. This course is recommended for students not taking upper year Biology laboratory courses for which BIOL/BIOC laboratories are prerequisites.
Precludes additional credit for BIOL 2200, BIOC 2200.
Prerequisite(s): (BIOL 1003 or BIOL 1103) and (CHEM 1002 or CHEM 1006), or permission of the Department.
Lectures three hours a week.

BIOL 2301 [0.5 credit]
Biotechnology I
An introductory course on the science, technology, entrepreneurial skills and business considerations related to biotechnology. The course will survey broadly across the disciplines of Biology, including applications in agriculture, health, environment and industry.
Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104) or permission of the department.
Lectures and workshops three hours a week.
BIOL 2303 [0.5 credit]
Microbiology
The biology of the bacteria, Archaea, Viruses and Protozoans, from the fundamentals of cell chemistry, molecular biology, structure and function, to their involvement in ecological and industrial processes and human disease.
Also listed as ENVE 2002.
Prerequisite(s): BIOL 1003 or BIOL 1103.
Lectures three hours a week.

BIOL 2303 [0.5 credit]
Microbiology
The biology of the bacteria, Archaea, Viruses and Protozoans, from the fundamentals of cell chemistry, molecular biology, structure and function, to their involvement in ecological and industrial processes and human disease.
Also listed as ENVE 2002.
Prerequisite(s): BIOL 1003 or BIOL 1103.
Lectures three hours a week.

BIOL 2600 [0.5 credit]
Ecology
The scientific study of interactions of living organisms and their environment, and how these affect the distribution and abundance of life. Topics include energy transformation and flow, nutrient cycling, population and community dynamics, human impacts on ecosystems, conservation issues. Laboratory includes field and computer exercises.
Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), or permission of the Department.
Lectures three hours a week, laboratory or tutorial four hours a week.

BIOL 2903 [0.5 credit]
Natural History and Ecology of Ontario
Introduction to the remarkable diversity and ecological relationships of Ontario's flora and fauna, which are explored in a habitat context.
Precludes additional credit for BIOL 1903 (no longer offered).
Prerequisite(s): BIOL 1004 or BIOL 1104 or BIOL 1902.
Lectures three hours a week.

BIOL 3004 [0.5 credit]
Insect Diversity
Introductory course dealing with the taxonomic diversity, anatomy, behavior and physiology of insects, as well as their impacts on ecosystems, agriculture and animal and human health.
Includes: Experiential Learning Activity
Precludes additional credit for BIOL 4601.
Prerequisite(s): BIOL 2001.
Lectures three hours a week.

BIOL 3008 [0.5 credit]
Bioinformatics
A practical exploration in the application of information technology to biochemistry and molecular biology. Insight into biological knowledge discovery via molecular structure and function prediction, comparative genomics and biological information management.
Includes: Experiential Learning Activity
Also listed as BIOC 3008, COMP 3308.
Prerequisite(s): BIOC 2200 or BIOL 2200, or permission of the Department.
Lectures two hours a week, computer workshop three hours a week.

BIOL 3102 [0.5 credit]
Mycology
This introductory course will cover the morphology, physiology, life cycles, evolution, ecology and biotechnology of the fungi.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2104 or BIOL 2107.
Lectures three hours a week.

BIOL 3104 [0.5 credit]
Molecular Genetics
A lecture course dealing with modern advances in molecular genetics.
Prerequisite(s): BIOL 2104 or BIOL 2107 or permission of the Department.
Lectures three hours a week.

BIOL 3111 [0.5 credit]
Vertebrate Evolution: Mammals, Reptiles, and Birds
Evolution of mammals, reptiles and birds. Emphasis on surveying amniote diversity, and the origin of key amniote transformations, as evidenced by the fossil record.
Includes: Experiential Learning Activity
Also listed as ERTH 3111.
Prerequisite(s): BIOL 2001 or ERTH 1009, or permission of the department.
Lectures two hours a week and a laboratory three hours a week.

BIOL 3112 [0.5 credit]
Vertebrate Evolution: Fish and Amphibians
Evolution of fish and amphibians. Emphasis on surveying fish and amphibian diversity, and the origin of key transformations of these groups, as evidenced by the fossil record.
Includes: Experiential Learning Activity
Also listed as ERTH 3112.
Prerequisite(s): BIOL 2001 or ERTH 1009, or permission of the department.
Lectures two hours a week and a laboratory three hours a week.

BIOL 3201 [0.5 credit]
Cell Biology
A lecture and laboratory course on the structure, composition, and function of eukaryotic cells.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2104 and BIOL 2200/BIOC 2200, or permission of the Department.
Lectures three hours a week, laboratory four hours a week.
BIOL 3202 [0.5 credit]
Principles of Developmental Biology
Introduction to the underlying principles and mechanisms governing development in multicellular animals and plants. Differentiation, growth, morphogenesis, and patterning will be examined at the organizational, cellular, and molecular levels to provide a balanced view of developmental phenomena in key model organisms.
Prerequisite(s): BIOL 2104 or BIOL 2107 and one of BIOL 2001 or BIOL 2002, or permission of the Department.
Lectures three hours a week.

BIOL 3205 [0.5 credit]
Plant Biochemistry and Physiology
A lecture and laboratory course consisting of selected topics in metabolism and physiology of plants, including photosynthesis, nutrient uptake and transport, intermediary and secondary metabolism, germination, growth and development.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2002 and BIOL 2200/BIOC 2200, or permission of the Department.
Lectures three hours a week, laboratory four hours a week.

BIOL 3301 [0.5 credit]
Biotechnology II
An interdisciplinary course on interactions between science, invention and innovation in biotechnology. Case studies related to regional biotechnology opportunities; social and ethical issues impacting biotechnology.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2301, BIOL 2104, and BIOL 2200/BIOC 2200 or permission of the department.
Lectures and laboratory/workshops three hours a week.

BIOL 3303 [0.5 credit]
Experimental Microbiology
Intensive training in laboratory techniques in microbiology, using bacteria and other microorganisms to demonstrate processes of cell growth, metabolism, gene expression, rapid evolution, gene transfer, microbial community dynamics and interactions with other organisms.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2104, BIOL 2200/BIOC 2200 and BIOL 2303, or permission of the Department.
Lecture/tutorial one and a half hours a week, laboratory four hours a week.

BIOL 3305 [0.5 credit]
Human and Comparative Physiology
The properties of physiological systems and components of humans and other animals with an emphasis on physical and chemical bases.
Includes: Experiential Learning Activity
Precludes additional credit for BIOL 3306.
Prerequisite(s): BIOL 2200/BIOC 2200 and BIOL 2001. A credit in PHYS at the 1000-level is strongly recommended.
Lectures three hours a week, laboratory four hours a week.

BIOL 3306 [0.5 credit]
Human Anatomy and Physiology
The anatomy and physiology of the neuromuscular, cardiovascular, respiratory, and excretory systems of humans with comparison to other animals.
Includes: Experiential Learning Activity
Precludes additional credit for BIOL 3305.
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), and (CHEM 1001 and CHEM 1002) or (CHEM 1005 and CHEM 1006), and third year standing.
Lectures three hours per week.

BIOL 3307 [0.5 credit]
Advanced Human Anatomy and Physiology
The anatomy and physiology of the endocrine, skeletal, digestive, immunological, and reproductive systems, with additional emphasis on the embryological origins of the major physiological systems.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 3305 or BIOL 3306.
Lectures three hours per week, workshop or laboratory four hours per week.

BIOL 3501 [0.5 credit]
Biomechanics
Properties of muscles, tendons, bones, joints and the co-ordinated use of these structures. Human and other animal locomotion and fitness, bird flight, especially the soaring of the vulture and the albatross, and animal migration are covered in detail.
Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104).
Lectures three hours a week, workshop two hours a week.

BIOL 3601 [0.5 credit]
Ecosystems and Environmental Change
Exploration of the unique contribution of the ecosystem approach to ecology, and of early key literature in ecosystem ecology through to current work on global environmental change.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2600.
Lectures three hours a week, laboratory four hours a week in six sessions.

BIOL 3602 [0.5 credit]
Conservation Biology
The science of biology as applied to the problem of maintaining species diversity. Topics include: history of conservation biology, valuation of species, indices of biodiversity, extinction, conservation genetics, conservation planning in parks and reserves, landscape ecology and case studies of conservation problems.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2600 or permission of the Department.
Lectures three hours a week and laboratory/workshop three hours a week.
BIOL 3604 [0.5 credit]
Statistics for Biologists
Introduction to the analysis of biological data. Students analyze real biological data sets in weekly laboratory sessions. Methods introduced include simple linear, polynomial, and multiple regression analysis, analysis of variance, nonparametric tests, tests of independence and logistic regression analysis.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 1105 or STAT 2507.
Lectures one and one-half hours and laboratory two and one-half hours a week.

BIOL 3605 [0.5 credit]
Field Course I
An intensive study of living organisms under natural conditions. Credit is based on two weeks of full-time fieldwork with attendant assignments. Transportation and room and board costs are borne by the student. Ontario Universities Program in Field Biology; see offered modules for specific prerequisites.
Includes: Experiential Learning Activity
Also listed as NEUR 3203, for animal behaviour modules only.
Prerequisite(s): at least one course in BIOL beyond the 1000-level and written permission of the Department. Students may take both BIOL 3605 and BIOL 3606 for credit, but neither may be used to repeat a particular module.
All day, approximately six days a week.

BIOL 3606 [0.5 credit]
Field Course II
An intensive study of living organisms under natural conditions. Credit is based on two weeks of full-time fieldwork with attendant assignments. Transportation and room and board costs are borne by the student. Ontario Universities Program in Field Biology; see offered modules for specific prerequisites.
Includes: Experiential Learning Activity
Prerequisite(s): at least one course in BIOL beyond the 1000-level and written permission of the Department. Students may take both BIOL 3605 and BIOL 3606 for credit, but neither may be used to repeat a particular module.
All day, approximately six days a week.

BIOL 3608 [0.5 credit]
Principles of Biogeography
Contemporary and past controls on distribution of plants and animals at global, regional and local scales; significance of these distributions.
Includes: Experiential Learning Activity
Also listed as GEOG 3104.
Prerequisite(s): BIOL 2600 or GEOG 1010 or permission of the Department.
Lectures, laboratory, and fieldwork five hours a week.

BIOL 3609 [0.5 credit]
Evolutionary Concepts
Evolution is the change in population properties across generations. Genetic variation, mutation, selection, drift, gene flow, genome evolution, speciation, development, biodiversity, fossils, and macro-evolution.
Prerequisite(s): BIOL 2104 or BIOL 2107 or permission of the instructor.
Lectures three hours a week.

BIOL 3611 [0.5 credit]
Evolutionary Ecology
The term “adaptation” is meaningful only with respect to an ecological context. Ecological contexts lead to evolutionary outcomes such as diverse mating systems, ageing, sexual reproduction, sexual dimorphism, geographic variation, phenotypic plasticity, and diverse life histories.
Includes: Experiential Learning Activity
Precludes additional credit for BIOL 4608.
Prerequisite(s): BIOL 2600.
Lectures three hours a week; one field trip.

BIOL 3612 [0.5 credit]
Computational Methods in Ecology and Evolution
Introduction to the development and use of computer programs to address biological problems. Topics include the development of programs to analyse ecological data, models of population dynamics, deterministic chaos, cellular automata, simulations of foraging behaviour and evolutionary computation.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2600 or permission of the Department.
Lectures two hours per week, workshop three hours per week.

BIOL 3801 [0.5 credit]
Plants and Herbivores
Exploration of the chemical, physiological, ecological and evolutionary interactions that underlie the relationship between plants and their insect herbivores.
Prerequisite(s): BIOL 2001 and BIOL 2002.
Lectures/seminars three hours a week.

BIOL 3802 [0.5 credit]
Animal Behaviour
Advanced study of animal behaviour including the environmental, genetic, and neural influences on behaviour. Topics such as predator-prey interactions, mating behaviour, migration, parental care and social interactions are interpreted in an evolutionary context.
Prerequisite(s): BIOL 2001 or BIOL 2600 or permission of the Department.
Lectures and workshop/tutorials three hours a week.
**BIOL 3804 [0.5 credit]**
**Social Evolution**
Diversity in social behaviour from evolutionary and ecological perspectives. Topics include ecological determinants of social living, social networks, social foraging, inclusive fitness, kin selection, altruism, cooperation, and mating systems and strategies.
Prerequisite(s): BIOL 2001 and BIOL 2600, or permission of the Department.
Lectures three hours a week.

**BIOL 3901 [0.5 credit]**
**Research Proposal**
The development of a competitive research proposal in consultation with an advisor.
Includes: Experiential Learning Activity
Prerequisite(s): third year standing in an Honours Biology program and permission of the Department.

**BIOL 3902 [0.5 credit]**
**Topics in Biology I**
Specific topics of current interest. Topics may vary from year to year.
Prerequisite(s): third-year standing in a Biology program or permission of the Department.
Lecture, seminars, or workshops three hours per week.

**BIOL 3999 [0.0 credit]**
**Co-operative Work Term Report**
Practical experience for students enrolled in the Co-operative Option. Students must receive satisfactory evaluations from their work term employer. Written reports describing the work term project will be required. Graded Sat or Uns.
Includes: Experiential Learning Activity
Prerequisite(s): registration in the Biology Co-operative Option and permission of the Department.

**BIOL 4008 [0.5 credit]**
**Molecular Plant Development**
Recent advances in plant development including molecular, biochemical, genomics, and proteomics studies.
Prerequisite(s): BIOL 2002 or permission of the Department.
Lectures three hours a week.

**BIOL 4102 [0.5 credit]**
**Molecular Ecology**
The interface of molecular biology, ecology and population biology. Topics include experimental design and a survey and critique of molecular genetic methods to study ecology.
Prerequisite(s): BIOL 2104 or BIOL 2107 and BIOL 2600; BIOL 3104 or one of BIOL 3601, BIOL 3602 (may be taken concurrently), or permission of the Department.
Lectures three hours a week.

**BIOL 4103 [0.5 credit]**
**Population Genetics**
Evolution of gene frequencies, including selection, mutation, genetic drift, inbreeding, gene flow, and population structure.
Prerequisite(s): BIOL 2104 or BIOL 2107 or permission of the Department. A course in statistics is highly recommended.
Lectures and seminars three hours a week.

**BIOL 4104 [0.5 credit]**
**Evolutionary Genetics**
An overview of the molecular evidence of evolution, speciation as well as the phylogenetic analysis of biological sequence data and biometrical traits.
Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 2001 or BIOL 2002) and (BIOL 2104 or BIOL 2107) or permission of the Department. A course in statistics is recommended.
Lectures and computer lab three hours a week.

**BIOL 4106 [0.5 credit]**
**Advances in Molecular Biology**
Review of the application of high throughput approaches to research in molecular and cellular biology and biochemistry with an emphasis on gene function and human disease progression.
Prerequisite(s): BIOL 2303 and (BIOL 3104 or BIOL 3201). Lectures and seminars three hours a week.

**BIOL 4109 [0.5 credit]**
**Laboratory Techniques in Molecular Genetics**
This laboratory course provides practical familiarity with commonly used techniques in molecular genetics. The laboratory is suitable for students with a developing interest in problems of molecular and cellular biology and biochemistry.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2200/BIOC 2200 and BIOL 2303 and BIOL 3104 or permission of the Department.
Lecture/laboratory six hours a week in two sessions.

**BIOL 4200 [0.5 credit]**
**Immunology**
The organization and function of the immune system, including the anatomy of the immune system, the properties and behaviour of cells of the immune system, and the molecular and genetic bases of the immune response.
Also listed as BIOC 4200.
Prerequisite(s): BIOL 3201 or permission of the Department.
Lectures three hours a week.
BIOL 4201 [0.5 credit]  
Advanced Cell Culture and Tissue Engineering  
Theory and application of current techniques and developments in cell culture as applied to research questions in the field of stem cells and tissue engineering. Includes: Experiential Learning Activity  
Also listed as BIOC 4201.  
Prerequisite(s): BIOL 3201 or permission of the Department.  
Laboratory four hours per week, tutorial one hour a week. Labs require regular participation outside of the scheduled lab time to maintain cell cultures and set up or complete experiments.

BIOL 4202 [0.5 credit]  
Mutagenesis and DNA Repair  
A mechanistic study of mutagenesis and DNA repair. Topics include DNA structure perturbations, spontaneous and induced mutagenesis, the genetics and biochemistry of DNA repair and recombination, and the role of mutations in the development of genetic disease and cancer.  
Also listed as BIOC 4202.  
Prerequisite(s): BIOL 3104 and BIOL 2200/BIOC 2200 or permission of the Department.  
Lectures and tutorial three hours a week.

BIOL 4203 [0.5 credit]  
Evolution of Sex  
The evolution of sex, including meiosis, syngamy, sex determination, sex chromosomes, and gender from organismal, genetic, and developmental perspectives; the origin, maintenance, function, and ubiquity of sex.  
Prerequisite(s): BIOL 2104 or BIOL 2107.  
Lectures three hours a week.

BIOL 4206 [0.5 credit]  
Human Genetics  
A survey of human genetic variation and mutation in a molecular genetics context. Topics may include molecular basis of diseases, chromosomal abnormalities, genomic imprinting, cancer genetics, genomics, gene mapping and gene therapy.  
Prerequisite(s): BIOL 3104 or permission of the Department.  
Lectures three hours a week.

BIOL 4207 [0.5 credit]  
Advanced Embryology & Developmental Biology  
A laboratory-based exploration of techniques and recent developments in the use of model embryological systems as applied to questions of development and human health. Includes: Experiential Learning Activity  
Prerequisite(s): BIOL 3201 or BIOL 3202 or permission of the Department.  
Laboratory four hours per week, tutorial one hour a week. Labs require regular participation outside of the scheduled lab time to set up or complete experiments.

BIOL 4209 [0.5 credit]  
Advanced Plant Physiology  
An advanced course dealing with recent developments in selected topics of plant physiology.  
Prerequisite(s): BIOL 3205 and CHEM 2203, CHEM 2204 or permission of the Department.  
Lectures/discussion three hours a week.

BIOL 4300 [0.5 credit]  
Applied Microbiology  
Studies of the application of microorganisms. Topics may include: microbial communities, and agricultural, pharmaceutical, industrial and health sciences.  
Prerequisite(s): (BIOL 2200/BIOC 2200 or BIOL 2201), BIOL 2303 and (BIOL 3104 or BIOL 3303) or permission of the Department.  
Lectures and tutorial three hours a week.

BIOL 4301 [0.5 credit]  
Current Topics in Biotechnology  
Explorations of developing biotechnologies in areas such as microbial products, protein engineering, plant genetic engineering, environmental remediation, pharmaceuticals production and medical diagnostics and therapy.  
Prerequisite(s): BIOL 3301 or permission of the department.  
Lectures and tutorials three hours a week.

BIOL 4303 [0.5 credit]  
Advances in Microbiology  
Exploration of current microbiology including the molecular biology of infectious agents, use of model micro-organisms to study human cells and diseases, and functional genomics and proteomics. Special attention will be paid to the field’s “big questions”. Students will critically examine a number of research proposals.  
Prerequisite(s): BIOL 2303 and (BIOL 3104 or BIOL 3303 or BIOC 3102) or permission of the Department.  
Lectures three hours per week.

BIOL 4304 [0.5 credit]  
Forensic Biology  
An introduction to forensics that covers topics in molecular biology, biochemistry, genetics, population genetics and statistics as they relate to forensic biology. The course will describe the techniques used to identify body fluids and generate DNA profiles as well as the interpretation of forensic results.  
Prerequisite(s): (BIOL 2104 or BIOL 2107) and (BIOL 2200/BIOC 2200 or BIOL 2201) or permission of the Department.  
Lectures three hours a week.
BIOL 4306 [0.5 credit]
Animal Neurophysiology
A course dealing with recent advances made in particular areas of animal neurophysiology. Includes: Experiential Learning Activity
Precludes additional credit for BIOL 4305.
Prerequisite(s): BIOL 3305 or BIOL 3306, or permission of the Department.
Lectures two hours a week, workshops or laboratory four hours a week.

BIOL 4309 [0.5 credit]
Studies in Human Performance
Biomechanical underpinnings of human performance including the quantitative analysis of human motion in normal activities and in athletic performance. Students will learn modern motion capture methods. This course will require students to design and execute an independent project. Includes: Experiential Learning Activity
Prerequisite(s): BIOL 3307 and fourth-year standing, or permission of the department.
Lecture three hours per week, workshop/labs three hours per week.

BIOL 4300 [0.5 credit]
The Biology of Birds
Introduction to ornithology, the study of birds; the evolution of birds, migration, geographic variation, adaptations for flight, feeding, reproduction; extinction and preservation. Prerequisite(s): BIOL 2001 or permission of the department.
Lectures three hours per week.

BIOL 4501 [0.5 credit]
The Taxonomy of Birds
The taxonomy of birds and species identification are learned through the use of study skins in the lab. Field excursions allow first-hand study of various species. Participants must acquire a pair of binoculars and one of the recommended field guides. Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2001 or permission of the department.
Laboratory/field excursions four hours per week.

BIOL 4317 [0.5 credit]
Neuroethology: The Neural Basis of Animal Behaviour
Proximate mechanisms underlying animal behaviour. Focus on evolution of nervous systems in response to environmental selection pressures. Topics include: genetic and hormonal influences on behaviour (e.g. maternal care); unique sensory worlds (e.g. magnetic); various levels of neural integration, from simple reflexes to complex social behaviour.
Prerequisite(s): BIOL 3305 or BIOL 3306, or permission of the Department.
Lectures three hours a week.

BIOL 4318 [0.5 credit]
Adaptations to Extreme Environments
Lectures, discussions and student presentations will be used to examine adaptations of animals to extreme environments (e.g. desert) or lifestyles (e.g. diving), at the physiological, biochemical and molecular levels. Emphasis on becoming familiar with the current primary literature.
Prerequisite(s): BIOL 3305, or permission of the Department.
Lectures/workshops three hours a week.

BIOL 4319 [0.5 credit]
Studies in Exercise Physiology
Physiological mechanisms underlying human athletic performance. Exercise physiology and cardio-respiratory activity, metabolic regulation and musculoskeletal function. Practical experience will be gained in the workshop/laboratory based experimental sessions. Includes: Experiential Learning Activity
Prerequisite(s): BIOL 3307 and fourth-year standing, or permission of the department.
Lectures two hours per week, workshop/labs three hours per week.

BIOL 4502 [0.5 credit]
Herpetology
Herpetology is the study of amphibians and reptiles. The behaviours, physiological ecology, conservation and identification of amphibians and reptiles will be examined through lectures, seminars and hands-on activities. Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2001.
Lectures or seminars three hours per week.

BIOL 4503 [0.5 credit]
Fish Ecology, Conservation and Management
Introduction to the diversity and environmental biology of the world's fishes. Applied issues in fisheries management, conservation, and aquaculture. Workshops expose students to techniques in fisheries science through hands-on demonstrations and field excursions. Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2600 or permission of the Department.
Lectures/seminars two hours a week, plus labs/workshops two hours a week.

BIOL 4504 [0.5 credit]
Ecology of Freshwater Invertebrates
Overview of the diversity and ecology of freshwater invertebrates. Aquatic invertebrates from local bodies of water will be sampled and identified in the lab. Experiments on the ecology and behaviour of model species of freshwater invertebrates will also be conducted in the lab. Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2001 and BIOL 2600.
Seminars and lab four hours a week.
BIOL 4505 [0.5 credit]
Coral Reefs
Examining the diversity of life on coral reefs and their interactions across ecological scales, from the biochemistry of zooxanthellae symbiosis to landscape scale trophodynamics, reticulate evolution, and reef fisheries. Emphasis is on synthesis writing drawn from the current primary literature.
Prerequisite(s): BIOL 2600. 
Lectures/seminars three hours a week

BIOL 4506 [0.5 credit]
Cactus Biology
Covers the cactus family over its entire range, including most of the western hemisphere, with discussion on their anatomy, physiology, ecology, evolution, and classification. Topics include how cacti are both typical flowering plants in some regards, and atypical in others.
Prerequisite(s): BIOL 2002. 
Lectures/seminars three hours a week

BIOL 4507 [0.5 credit]
Ecological Parasitology
Key concepts in the ecological study of parasites and pathogens, underpinned by evolutionary thinking and relevant to fundamental and applied questions of co-evolution, disease ecology, epidemiology, emerging infectious diseases, environmental parasitology, evolutionary transitions, host species range, immunity, resistance, tolerance, transmission mode, and virulence.
Prerequisite(s): BIOL 2600 and one of the following: BIOL 3601, BIOL 3604, BIOL 3609, BIOL 3611, BIOL 3612, BIOL 3801, BIOL 3802, BIOL 3804. 
Lectures or seminars 3 hours per week.

BIOL 4602 [0.5 credit]
Evolutionary Applications across Disciplines: From Medicine to Conservation
Evolutionary principles contributing to advancements across fields including medicine, agriculture, conservation, climate change, and engineering. Topics include evolution of virulence, causes of variation in human health, evolution of resistance to pesticides, interventions for recovery of species at risk, and biomimetic modeling in engineering and architecture.
Prerequisite(s): BIOL 1104 and third-year standing. 
Lectures/workshops three hours per week.

BIOL 4603 [0.5 credit]
Insect Evolution and Biology
Major questions on the origin, evolution and adaptation of structures and physiology of terrestrial arthropods, especially insects.
Includes: Experiential Learning Activity
Prerequisite(s): BIOL 3004, or permission of the Department.
Lectures two hours a week, laboratory four hours a week.

BIOL 4604 [0.5 credit]
Landscape Ecology
Landscape ecology is the study of how landscape structure affects the abundance and distribution of organisms. The focus of this course is on research methods and results in landscape ecology. Applications in forestry, agriculture, and species conservation.
Prerequisite(s): BIOL 2600 or equivalent, BIOL 3601 or BIOL 3602 or BIOL 3608 or equivalent, and fourth-year standing in Biology, Geography, or Environmental Sciences. 
Lecture three hours a week.

BIOL 4802 [0.5 credit]
Advanced Animal Behaviour
Contemporary issues in behavioural ecology. Topics may include the relevance of behavioural ecology to conservation biology, to new insights into human social behaviour, and will be selected through consultation between professor and students.
Prerequisite(s): BIOL 3802 or BIOL 3804, or permission of the Department. 
Lectures or workshops three hours a week.

BIOL 4810 [0.5 credit]
Education Research in Biology
An introduction to the science of teaching and learning in biology. Students will be introduced to the foundational concepts in, and tools of, Discipline-Based Education Research (DBER) and will conduct their own DBER research project.
Includes: Experiential Learning Activity
Prerequisite(s): 4th year standing, or permission of the department This course can only be used by science students as a free elective. 
Also offered at the graduate level, with different requirements, as BIOL 5810, for which additional credit is precluded. 
Seminar three hours per week, classroom-based research one hour per week.

BIOL 4901 [0.5 credit]
Directed Special Studies
Independent or group study, open to third- and fourth-year students to explore a particular topic, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work.
Prerequisite(s): permission of the Department. Students normally may not offer more than 1.0 credit of Directed Special Studies in their program.

BIOL 4902 [0.5 credit]
Topics in Biology II
Specific topics of current interest. Topics may vary from year to year.
Prerequisite(s): fourth-year standing in a Biology program or permission of the Department. 
Lecture, seminars, or workshops three hours per week.
### BIOL 4905 [1.0 credit]
#### Honours Workshop
Within the context of an active learning environment, students participate in a variety of activities which may include literature reviews and critiques, media releases and response papers, oral presentations, and posters. Projects are focused on an area of biological research of interest to the student. Includes: Experiential Learning Activity
Precludes additional credit for BIOL 4907 and BIOL 4908.
Prerequisite(s): fourth-year standing in an Honours biology program and permission of the Department.
Workshops three hours per week.

### BIOL 4907 [1.0 credit]
#### Honours Essay and Research Proposal
An independent critical review and research proposal, using library resources, under the direct supervision of a faculty advisor. Evaluation is based on a written report and a poster presentation.
Includes: Experiential Learning Activity
Precludes additional credit for BIOL 4905 and BIOL 4908.
Prerequisite(s): fourth-year standing in an Honours Biology program and permission of the Department.

### BIOL 4908 [1.0 credit]
#### Honours Research Thesis
An independent research project undertaken in the field and/or the laboratory, under the direct supervision of a faculty adviser. Evaluation is based on a written thesis and a poster presentation.
Includes: Experiential Learning Activity
Precludes additional credit for BIOL 4905 and BIOL 4907.
Prerequisite(s): fourth-year standing in an Honours biology program with a minimum CGPA of 8.0 in the major or permission of the Department.

### Biotechnology
This section presents the requirements for programs in:
- Biochemistry and Biotechnology B.Sc. Honours
- Biology and Biotechnology B.Sc. Honours

### Program Requirements
#### Biochemistry and Biotechnology
B.Sc. Honours (20.0 credits)

**Total Credits** 20.0
Students in a Bachelor of Science program must present 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include NSCI 1000) if, on transfer, the student received credit for fewer than 10.0 credits.

2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for 10.0 or more credits.

### Declared and Undeclared Students

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.Sc. degree without being registered in a program. These students are referred to as Undeclared students. The recommended course pattern for Undeclared students is provided in the Undeclared entry of the Programs section of this Calendar. Undeclared students normally must apply to enter a program before beginning their second year of study. The Science Student Success Centre (SSSC) provides Undeclared students guidance to the appropriate support services in making this decision.

### Change of Program within the B.Sc. Degree

Students may transfer to a program within the B.Sc. degree if upon entry to the new program they would be in good academic standing.

Other applications for change of program will be considered on their merits; students may be accepted in the new program in Good Standing or on Academic Warning.

Applications to declare or change their program within the B.Sc. Degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

### Minors, Concentrations and Specializations

Students may add a minor, concentration or specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a minor, concentration or specialization requires that the student be in Good Standing and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.
Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of experimental science chosen from two different departments or institutes from the list below:

### Approved Experimental Science Courses

#### Biochemistry
- BIOC 2200 [0.5] Cellular Biochemistry
- BIOC 4001 [0.5] Methods in Biochemistry
- BIOC 4201 [0.5] Advanced Cell Culture and Tissue Engineering

#### Biology
- BIOL 1103 [0.5] Foundations of Biology I
- BIOL 1104 [0.5] Foundations of Biology II
- BIOL 2001 [0.5] Animals: Form and Function
- BIOL 2002 [0.5] Plants: Form and Function
- BIOL 2104 [0.5] Introductory Genetics
- BIOL 2200 [0.5] Cellular Biochemistry
- BIOL 2600 [0.5] Ecology

#### Chemistry
- CHEM 1001 [0.5] General Chemistry I
- CHEM 1002 [0.5] General Chemistry II
- CHEM 1005 [0.5] Elementary Chemistry I
- CHEM 1006 [0.5] Elementary Chemistry II
- CHEM 2103 [0.5] Physical Chemistry I
- CHEM 2203 [0.5] Organic Chemistry I
- CHEM 2204 [0.5] Organic Chemistry II
- CHEM 2302 [0.5] Analytical Chemistry I
- CHEM 2303 [0.5] Analytical Chemistry II
- CHEM 2800 [0.5] Foundations for Environmental Chemistry

#### Earth Sciences
- ERTH 1006 [0.5] Exploring Planet Earth
- ERTH 1009 [0.5] The Earth System Through Time
- ERTH 2102 [0.5] Mineralogy to Petrology
- ERTH 2404 [0.5] Engineering Geoscience
- ERTH 2802 [0.5] Field Geology I
- ERTH 3111 [0.5] Vertebrate Evolution: Mammals, Reptiles, and Birds
- ERTH 3112 [0.5] Vertebrate Evolution: Fish and Amphibians
- ERTH 3204 [0.5] Mineral Deposits
- ERTH 3205 [0.5] Physical Hydrogeology
- ERTH 3806 [0.5] Structural Geology

#### Food Sciences
- FOOD 3001 [0.5] Food Chemistry
- FOOD 3002 [0.5] Food Analysis
- FOOD 3005 [0.5] Food Microbiology

#### Geography
- GEOG 1010 [0.5] Global Environmental Systems
- GEOG 3108 [0.5] Soil Properties

#### Neuroscience
- NEUR 3206 [0.5] Sensory and Motor Neuroscience
- NEUR 3207 [0.5] Systems Neuroscience
- NEUR 4600 [0.5] Advanced Lab in Neuroanatomy

#### Physics
- PHYS 1001 [0.5] Foundations of Physics I
- PHYS 1002 [0.5] Foundations of Physics II
- PHYS 1003 [0.5] Introductory Mechanics and Thermodynamics
- PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion
- PHYS 1007 [0.5] Elementary University Physics I
- PHYS 1008 [0.5] Elementary University Physics II
- PHYS 2202 [0.5] Wave Motion and Optics
- PHYS 2604 [0.5] Modern Physics I
- PHYS 3007 [0.5] Third Year Physics Laboratory: Selected Experiments and Seminars
- PHYS 3606 [0.5] Modern Physics II
- PHYS 3608 [0.5] Modern Applied Physics

### Course Categories for B.Sc. Programs

#### Science Geography Courses
- GEOG 1010 [0.5] Global Environmental Systems
- GEOG 2006 [0.5] Introduction to Quantitative Research
- GEOG 2013 [0.5] Weather and Water
- GEOG 2014 [0.5] The Earth’s Surface
- GEOG 3003 [0.5] Quantitative Geography
- GEOG 3010 [0.5] Field Methods in Physical Geography
- GEOG 3102 [0.5] Geomorphology
- GEOG 3103 [0.5] Watershed Hydrology
- GEOG 3104 [0.5] Principles of Biogeography
- GEOG 3105 [0.5] Climate and Atmospheric Change
- GEOG 3106 [0.5] Aquatic Science and Management
- GEOG 3108 [0.5] Soil Properties
- GEOG 4000 [0.5] Field Studies
- GEOG 4005 [0.5] Directed Studies in Geography
- GEOG 4013 [0.5] Cold Region Hydrology
- GEOG 4017 [0.5] Global Biogeochemical Cycles
- GEOG 4101 [0.5] Two Million Years of Environmental Change
- GEOG 4103 [0.5] Water Resources Engineering
- GEOG 4104 [0.5] Microclimatology
- GEOG 4108 [0.5] Permafrost

#### Science Psychology Courses
- PSYC 2001 [0.5] Introduction to Research Methods in Psychology
- PSYC 2002 [0.5] Introduction to Statistics in Psychology
- PSYC 2700 [0.5] Introduction to Cognitive Psychology
- PSYC 3000 [1.0] Design and Analysis in Psychological Research
- PSYC 3506 [0.5] Cognitive Development
- PSYC 3700 [1.0] Cognition (Honours Seminar)
- PSYC 3702 [0.5] Perception
- PSYC 2307 [0.5] Human Neuropsychology I
- PSYC 3307 [0.5] Human Neuropsychology II
Science Continuation Courses
A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

- BIOC (Biochemistry)
- BIOL (Biology)
- CHEM (Chemistry)
- COMP (Computer Science) A maximum of two half-credits at the 2000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.
- ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

- ENSC (Environmental Science)
- FOOD (Food Science and Nutrition)
- GEOM (Geomatics)
- HLTH (Health Sciences)
- ISAP (Interdisciplinary Science Practice)
- MATH (Mathematics)
- NEUR (Neuroscience)
- PHYS (Physics), except

Advanced Science Faculty Electives
Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)
All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). NSCI 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives
Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

- BIOC 1000 [0.5] Education Research in Biology
- CHEM 1003 [0.5] The Chemistry of Food, Health and Drugs
- CHEM 1004 [0.5] Drugs and the Human Body
- CHEM 1007 [0.5] Chemistry of Art and Artifacts
- ERTH 1010 [0.5] Our Dynamic Planet Earth
- ERTH 1011 [0.5] Evolution of the Earth
- ERTH 2415 [0.5] Natural Disasters
- ISCI 1001 [0.5] Introduction to the Environment
- ISCI 2000 [0.5] Natural Laws
- ISCI 2002 [0.5] Human Impacts on the Environment
- MATH 0107 [0.5] Algebra and Geometry
- PHYS 1901 [0.5] Planetary Astronomy
- PHYS 1902 [0.5] From our Star to the Cosmos
- PHYS 1905 [0.5] Physics Behind Everyday Life
- PHYS 2903 [0.5] Physics Towards the Future

Prohibited Courses
The following courses are not acceptable for credit in any B.Sc. program:

- COMP 1001 [0.5] Introduction to Computational Thinking for Arts and Social Science Students
- MATH 0005 [0.5] Precalculus: Functions and Graphs
- MATH 0006 [0.5] Precalculus: Trigonometric Functions and Complex Numbers
- MATH 1009 [0.5] Mathematics for Business
- MATH 1119 [0.5] Linear Algebra: with Applications to Business
- MATH 1401 [0.5] Elementary Mathematics for Economics I
Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy

Admission Requirements

Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton’s co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job.

It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts. While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation

To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.
Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

**International Students**

All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

**B.Sc. Honours Biotechnology: Co-op Admission and Continuation Requirements**

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

**Co-operative Education - Bachelor of Science**

The following programs in the Bachelor of Science Honours offer a co-operative education option:

- Applied Physics, Biochemistry (including computational), Bioinformatics, Biology (including computational), Biotechnology, Chemistry (including computational), Earth Sciences, Environmental Science, Food Science and Nutrition, Geomatics, Neuroscience, Neuroscience and Mental Health, Physical Geography and Physics.

Students in all streams of the Bachelor of Science must successfully complete three (3) work terms to obtain the co-op designation.

**Co-op Admission and Continuation Requirements for Students in the Bachelor of Science**

For admission to and continuation in the co-op option, all students must:

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000

**Program-Specific Admission and Continuation Requirements:**

**Applied Physics, Biochemistry (including computational), Bioinformatics, Biology (including computational), Biotechnology, Chemistry (including computational), Earth Sciences, Environmental Science, Neuroscience, Neuroscience and Mental Health and Physics:**

1. Completion of 5.0 or more credits at Carleton University;
2. Registered as a full-time student in the Bachelor of Science Honours degree program;
3. Obtained and maintained a major CGPA of 8.0 or higher and an overall CGPA of 6.50 or higher

**Food Science and Nutrition**

1. Registered as a full-time student in the Bachelor of Science Honours in Food Science and Nutrition;
2. Obtained and maintained a major CGPA of 9.0 or higher and an overall CGPA of 7.5 or higher in the first three years of academic study
3. Have obtained third-year standing;
4. Successfully completed, by the start-date of the first work term, at least 2.0 credits from the following list of courses: FOOD 3001, FOOD 3002, FOOD 3003, FOOD 3004, and FOOD 3005

**Geomatics and Physical Geography:**

1. Registered in the Bachelor of Science (Honours) Programs in Physical Geography or Geomatics;
2. Obtained and maintained an overall minimum CGPA of 9.5 and a major CGPA of 9.5;
3. Have obtained third-year standing;
4. Successfully completed, by the start-date of the first work term:
   a. the required second-year methods courses in their program (GEOG/ENST 2005, GEOG/ENST 2006)
   b. the required field course in their program (ENST 3900/GEOG 3000/GEOG 3010/GEOG 3030)
5. Be registered as a full-time student.

Admissions Information

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- B.Sc. (Honours)
- B.Sc. (Major)
- B.Sc.

Admission Requirements

B. Sc. Honours Program

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions and two of Biology, Chemistry, Earth and Space Sciences or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For the Combined Honours program in Chemistry and Computer Science, 4U Chemistry and Calculus and Vectors are strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.
For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

**Advanced Standing**

For entry to an Honours program after the completion of 5.0 included credits, a student must have a major CGPA of 5.50 or higher, an overall CGPA of 4.50 or higher and the recommendation of the Honours department or committee. A student beginning the final 10.0 credits towards an Honours degree must present a major CGPA of 6.00 or higher, an overall CGPA of 5.00 or higher and the recommendation of the Honours department or committee. A student beginning the final 5.0 credits towards an Honours degree must present a major CGPA of 6.50 or higher and an overall CGPA of 5.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

**B.Sc. Major Program**

**B.Sc. Program**

**First Year**

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics. 4U Physics is strongly recommended. Equivalent courses may be substituted between the old and new Ontario mathematics curriculum.

**Advanced Standing**

For entry to a B.Sc. or B.Sc. Major program after the completion of 5.0 included credits, a student must have a major and core CGPA of 3.50 or higher and an overall CGPA of 3.50 or higher. A student beginning the final 5.0 credits towards a B.Sc. or B.Sc. Major degree must present a major and core CGPA of 4.00 or higher and an overall CGPA of 4.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

**Co-op Option**

**Direct Admission to the First Year of the Co-op Option**

Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Business**

This section presents the requirements for programs in:

- Bachelor of Commerce Honours
- Concentration in Accounting
- Concentration in Entrepreneurship
- Concentration in Finance
- Concentration in Information Systems
- Concentration in International Business
- Concentration in Management
- Concentration in Marketing
- Concentration in Supply Chain Management
- Bachelor of Commerce
- Bachelor of International Business Honours
- Concentration in International Marketing and Trade
- Concentration in International Strategy and Human Resources Management
- Concentration in Global Financial Management and Systems
- Minor in Arts Management
- Minor in Business
- Minor in Business (Entrepreneurship)
- Minor in Human Resources and Management for B.A. Honours Psychology
- Post-Baccalaureate Diploma in Accounting

**Program Requirements**

**Bachelor of Commerce Honours (20.0 credits)**

**A. Credits Included in the Major CGPA (12.0 credits):**

1. **1.5 credits in:**
   - BUSI 1004 [0.5] Financial Accounting for Business Students
   - BUSI 1005 [0.5] Managerial Accounting for Business Students
   - BUSI 1800 [0.5] Introduction to Business

2. **1.0 credit in:**
   - ECON 1001 [0.5] Introduction to Microeconomics
   - ECON 1002 [0.5] Introduction to Macroeconomics

3. **0.5 credit in:**
   - MATH 1009 [0.5] Mathematics for Business

4. **1.0 credit in:**
   - PSYC 1002 [0.5] Introduction to Psychology II
   - SOCI 1005 [0.5] Sociology for Bachelor of Commerce Students

5. **4.0 credits in:**
   - BUSI 2101 [0.5] Organizational Behaviour
   - BUSI 2208 [0.5] Introduction to Marketing
   - BUSI 2301 [0.5] Introduction to Supply and Operations Management
Concentrations in the B.Com. Program

Concentrations described below are open to students registered in the B.Com. program. Students enrolled in a concentration must satisfy the requirements for Bachelor of Commerce (above) while gaining credit for the requirements of the Concentration through appropriate choice of courses. Students in the Concentration in International Business take Business BUSI 4709 Strategic Management for International Business in place of BUSI 4609 Strategic Management and BUSI 4705 Ethics and Cross-cultural Interaction in place of BUSI 4601 Business Ethics in the B.Com. requirements.

Declaration of Concentration(s)

Normally, students are expected to have declared their concentration(s), if any, before commencing the sixth credit into the program. Only under special circumstances would a student be allowed to enroll in a concentration after the completion of the thirteenth credit.

Declaration of Double Concentrations

To be eligible to declare a second concentration, a student must have completed at least 6.0 credits with a minimum overall CGPA of 8.0.

Concentration in Accounting (4.0 credits)

1. 2.5 credits in:
   - BUSI 2001 [0.5] Intermediate Accounting I
   - BUSI 2002 [0.5] Intermediate Accounting II
   - BUSI 3001 [0.5] Accounting for Business Combinations
   - BUSI 3005 [0.5] Taxation I
   - BUSI 3008 [0.5] Intermediate Management Accounting and Control

2. 1.5 credits from:
   - BUSI 2505 [0.5] Business Finance II
   - BUSI 3007 [0.5] Auditing I
   - BUSI 3040 [0.5] Data Analytics and Information Systems for Accounting
   - BUSI 4005 [0.5] Taxation II
   - BUSI 4008 [0.5] Advanced Management Accounting and Control

Total Credits: 4.0

Concentration in Entrepreneurship (3.5 credits)

1. 2.0 credits in:
   - BUSI 3600 [0.5] Entrepreneurial Strategies
   - BUSI 3810 [0.5] Business Development
   - BUSI 3820 [0.5] Practicum in Business Design
   - BUSI 4810 [0.5] Practicum in Business Creation
   - or an approved elective for Entrepreneurship programs

2. 1.5 credits from a list of approved courses including the following:
   - BUSI 3117 [0.5] Developing Creative Thinking
   - BUSI 3611 [0.5] Managing the Family Enterprise
   - BUSI 4105 [0.5] Managing Change
   - BUSI 4117 [1.0] Creative Thinking
   - BUSI 4607 [0.5] Management of Technology and Innovation
   - BUSI 4708 [0.5] International Expansion and Operations
   - BUSI 4710 [0.5] International New Ventures

Total Credits: 3.5

Concentration in Finance (4.5 credits)

1. 3.0 credits in:
   - BUSI 2505 [0.5] Business Finance II
   - BUSI 3500 [0.5] Applied Corporate Finance
Concentration in Information Systems (4.0 credits)

1. 2.5 credits in:
   - BUSI 3400 [0.5] Data and Information Management
   - BUSI 3402 [0.5] Systems Analysis and Design
   - BUSI 4400 [0.5] IS Strategy, Management and Acquisition
2. 1.5 credits from:
   - BUSI 2402 [0.5] Business Applications Development
   - BUSI 3308 [0.5] Simulation Modeling and Analytics
   - BUSI 3401 [0.5] Applications Development for Online Environments
   - BUSI 4406 [0.5] Business Analytics
   - BUSI 4408 [0.5] Social Analytics
   - BUSI 4607 [0.5] Management of Technology and Innovation

Total Credits 4.0

Concentration in International Business (4.0 credits)

1. 2.0 credits in:
   - BUSI 3703 [0.5] International and Comparative Management
   - BUSI 3704 [0.5] The Environment of International Business
   - BUSI 4205 [0.5] International Marketing Strategy
   - BUSI 4717 [0.5] Managing Globalization in Emerging Economies
2. 1.0 credit from:
   - BUSI 3301 [0.5] Supply Chain Management Strategies

Total Credits 4.0
Concentration in Marketing (4.5 credits)

1. 2.0 credits in: 2.0
   - BUSI 3205 [0.5] Marketing Communications
   - BUSI 3207 [0.5] Marketing Research
   - BUSI 3209 [0.5] Consumer Behaviour
   - BUSI 4208 [0.5] Marketing Management

2. 2.5 credits from: 2.5
   - BUSI 3204 [0.5] Digital Marketing
   - BUSI 3208 [0.5] Business-to-Business Marketing
   - BUSI 4201 [0.5] Marketing Metrics
   - BUSI 4203 [0.5] Marketing in Not-for-Profit Organizations
   - BUSI 4205 [0.5] International Marketing Strategy
   - BUSI 4209 [0.5] Consumer Culture Theory
   - BUSI 4229 [0.5] Marketing in the Arts and Culture Sectors
   - BUSI 4331 [0.5] Artificial Intelligence and E-Supply Chain Technologies
   - BUSI 4408 [0.5] Social Analytics

Total Credits 4.5

Concentration in Supply Chain Management (4.5 credits)

1. 2.5 credits in: 2.5
   - BUSI 3301 [0.5] Supply Chain Management Strategies
   - BUSI 3305 [0.5] Logistics and Transportation
   - BUSI 4302 [0.5] Management of Quality
   - BUSI 4304 [0.5] Procurement and Contracting
   - BUSI 4331 [0.5] Artificial Intelligence and E-Supply Chain Technologies

2. 2.0 credits from: 2.0
   - BUSI 3208 [0.5] Business-to-Business Marketing
   - BUSI 3308 [0.5] Simulation Modeling and Analytics
   - BUSI 3400 [0.5] Data and Information Management
   - BUSI 3402 [0.5] Systems Analysis and Design
   - BUSI 3706 [0.5] International Business Negotiations
   - BUSI 4400 [0.5] IS Strategy, Management and Acquisition
   - BUSI 4406 [0.5] Business Analytics
   - BUSI 4408 [0.5] Social Analytics
   - BUSI 4708 [0.5] International Expansion and Operations
   - ECON 3600 [0.5] Introduction to International Economics
   - LAWS 3208 [0.5] International Trade Regulation

Total Credits 4.5

Note: In Item 2 above, for further emphasis within this concentration, students may cluster courses in the following manners:

2a. E-Supply Chain Management:
   - BUSI 3208 [0.5] Business-to-Business Marketing
   - BUSI 3400 [0.5] Data and Information Management

2b. Supply Chain Management - Business Analytics:
   - BUSI 3308 [0.5] Simulation Modeling and Analytics
   - BUSI 3400 [0.5] Data and Information Management
   - BUSI 4406 [0.5] Business Analytics
   - BUSI 4408 [0.5] Social Analytics
   - BUSI 4301 [0.5] Decision Models and Analytics
   - STAT 3503 [0.5] Regression Analysis
   - STAT 3507 [0.5] Sampling Methodology

2c. Global Supply Chain Management:
   - BUSI 3208 [0.5] Business-to-Business Marketing
   - BUSI 3706 [0.5] International Business Negotiations
   - BUSI 4301 [0.5] Decision Models and Analytics
   - BUSI 4708 [0.5] International Expansion and Operations
   - ECON 3600 [0.5] Introduction to International Economics
   - LAWS 3208 [0.5] International Trade Regulation

Bachelor of Commerce (20.0 credits)

Enrolment in the Bachelor of Commerce program is restricted. Please consult with an academic advisor for more information.

A. Credits Included in the Major CGPA (11.0 credits):

1. 1.5 credits in: 1.5
   - BUSI 1004 [0.5] Financial Accounting for Business Students
   - BUSI 1005 [0.5] Managerial Accounting for Business Students
   - BUSI 1800 [0.5] Introduction to Business

2. 1.0 credits in: 1.0
   - ECON 1001 [0.5] Introduction to Microeconomics
   - ECON 1002 [0.5] Introduction to Macroeconomics

3. 0.5 credit in: 0.5
   - MATH 1009 [0.5] Mathematics for Business

4. 1.0 credits in: 1.0
   - PSYC 1002 [0.5] Introduction to Psychology II
   - SOCI 1005 [0.5] Sociology for Bachelor of Commerce Students

5. 4.0 credits in: 4.0
   - BUSI 2101 [0.5] Organizational Behaviour
   - BUSI 2208 [0.5] Introduction to Marketing
   - BUSI 2301 [0.5] Introduction to Supply and Operations Management
   - BUSI 2400 [0.5] Foundations of Information Systems
   - BUSI 2504 [0.5] Business Finance I
   - BUSI 2601 [0.5] Business Law
   - BUSI 2701 [0.5] Fundamentals of International Business
   - BUSI 2800 [0.5] Entrepreneurship

6. 0.5 credits in: 0.5
   - STAT 2606 [0.5] Business Statistics
Sprott School of Business Supervisor of Undergraduate Programs to verify if the preferred language option may have become available after the publication of this calendar.

All first year Bachelor of International Business students will be assessed for ability in their selected language by the relevant language unit and placed in the appropriate courses as authorized by the language unit, unless a student fully tests out of a language (see note 5 below). Students with some ability in their selected language may be allowed to pursue studies in that language on the understanding that they will effect a significant improvement in their ability.

The Year Abroad

The Year Abroad Requirement of the B.I.B. program is met by the successful completion of a minimum of 4.0 approved credits during the year of study abroad (this includes BUSI 3700 Cross-cultural Communication), with a minimum of 1.0 credit taught in the chosen language for the program. The B.I.B. student will study at one of Carleton’s approved Exchange partner institutions, as a full-time student on Exchange for one academic year. Students could alternatively complete the Year Abroad Requirement of the B.I.B program by two other means;

1) the successful completion of a minimum of 2.0 approved credits during the year of study abroad (this includes BUSI 3700 Cross-cultural Communication), with a minimum of 0.5 credits taught in the chosen language for the program, along with a minimum 12 week pre-approved internship (BUSI 3701 Practicum in International Business I) in that country.

OR

2) the successful completion of a minimum 24 week pre-approved internship (this includes BUSI 3700 Cross-cultural Communication and BUSI 3702 Practicum in International Business II) in a country where that language is spoken.

Students who fully test out of one of the B.I.B. required languages will be eligible to spend their third year abroad in a country where one of Carleton’s approved Exchange partner institutions exists. A student's country of origin is not an eligible country for their third year abroad unless approved by the School of Business.

In order to be eligible to study abroad in third year, students must be in Good Standing at the time of application and are required to have successfully completed a minimum of 9.0 credits:

The number of courses available in English in foreign schools may vary. Carleton credits commensurate to courses taken abroad will be determined by the Registrar's Office and awarded towards the student's degree.

Students are responsible for all traveling, living and incidental costs for fulfilling third-year requirements abroad. Tuition fees and compulsory miscellaneous fees will be paid to Carleton University according to Carleton University's fee structure. The student may be liable for

Bachelor of International Business (Honours)

Program Requirements

The Bachelor of International Business (B.I.B.) program is characterized by the requirement that students spend third year in studies abroad.

Students in the B.I.B. program are required to specialize in one of the following languages: French, German, Japanese, Mandarin, or Spanish.

Language Training Component

Students may select French, German, Japanese, Mandarin, or Spanish as their specialization language for study.

Applicants to the program interested in languages other than those listed above should contact the Eric
compulsory miscellaneous fees assessed by the foreign institution, including possible fees for language courses.

A limited number of bursaries are available to offset costs. For details on how to apply for a bursary, contact the Awards Office.

**Total Credits** | 20.0

**Notes:**

1. For Item 4 above, BUSI 4705 and BUSI 4709 must be taken at the Sprott School of Business.

2. For Item 5 above:
   a) Students without a Concentration must choose 2.5 credits from the list in Item 5.
   b) Students in Concentration in International Marketing and Trade must choose among BUSI 3706, BUSI 4707, BUSI 4710 and BUSI 4717 from the list in Item 5.
   c) Students in Concentration in International Strategy and Human Resources Management must choose among BUSI 3704, BUSI 3706, BUSI 4710 and BUSI 4717 from the list in Item 5.
   d) Students in Concentration in Global Financial Management and Systems must choose among BUSI 3704, BUSI 4707, BUSI 4710 and BUSI 4717 from the list in Item 5.

3. For Items 6, 7, and 8 above, students without a Concentration must satisfy these requirements:
   a) 1.0 credit from all courses listed in Item 1 of all Concentrations
   b) 1.0 credit from all courses listed in Item 2 of all Concentrations
   c) 1.0 credit from all courses listed in Item 3 of all Concentrations

4. The following courses cannot be used as free electives toward the B.I.B. degree: ESLA 1300, ESLA 1500, any course at the 0000-level including MATH 0007 (no longer offered), MATH 0107, and MATH 0009.

5. For Item 9 above, students who successfully test out of 4.0 credits in a language will choose an additional bundle of 4.0 elective credits approved by Sprott. Students who test out will not receive an APE on their CORE CGPA.

6. For Item 10 above, students may use BUSI 3701 and BUSI 3702 towards their free electives if they successfully complete an internship while abroad.

**Concentrations in the B.I.B. Program**

Concentrations described below are open to students registered in the B.I.B. program. Students enrolled in a concentration must satisfy the requirements for Bachelor of International Business (above) while gaining credit for the requirements of the Concentration through appropriate choice of courses. The order in which the courses listed for the Concentrations are taken should be planned in advance. Students are therefore strongly advised to consider their concentration choices by the end of their first year.

Courses taken at a foreign university during the year abroad must correspond to those below or, if different, be subject to evaluation and approval by the Eric Sprott School of Business.
### Concentration in International Marketing and Trade (4.0 credits)

1. **2.0 credits in:**
   - BUSI 3705 [0.5] International Buyer Behaviour
   - BUSI 4205 [0.5] International Marketing Strategy
   - BUSI 4708 [0.5] International Expansion and Operations
   - ECON 3601 [0.5] Introduction to International Trade

2. **1.0 credit from:**
   - BUSI 3204 [0.5] Digital Marketing
   - BUSI 3205 [0.5] Marketing Communications
   - BUSI 3207 [0.5] Marketing Research
   - BUSI 3208 [0.5] Business-to-Business Marketing
   - BUSI 3209 [0.5] Consumer Behaviour
   - BUSI 4203 [0.5] Marketing In Not-for-Profit Organizations
   - BUSI 4208 [0.5] Marketing Management
   - BUSI 4209 [0.5] Consumer Culture Theory
   - BUSI 4229 [0.5] Marketing in the Arts and Culture Sectors

   0.5 credit of approved 3000-level or higher non-international course(s) in Marketing taken during the year abroad at one of Carleton’s approved exchange partner institutions

3. **1.0 credit from:**
   - ECON 3602 [0.5] International Monetary Problems
   - ECON 3807 [0.5] European Economic Integration
   - ECON 3808 [0.5] The Economics of Transition
   - ECON 3870 [0.5] Comparative Economic Systems
   - ECON 4508 [0.5] International Aspects of Economic Development
   - ECON 4601 [0.5] International Trade Theory and Policy
   - ECON 4602 [0.5] International Monetary Theory and Policy
   - GEOG 2200 [0.5] Global Connections
   - GEOG 2300 [0.5] Space, Place and Culture
   - GEOG 3404 [0.5] Geographies of Economic Development
   - LAWS 3207 [0.5] International Transactions
   - LAWS 3208 [0.5] International Trade Regulation
   - PSCI 2601 [0.5] International Relations: Global Politics
   - PSCI 2602 [0.5] International Relations: Global Political Economy
   - PSCI 3600 [0.5] International Institutions
   - PSCI 3601 [0.5] Introduction to International Trade

   1.0 credit of 2000-level or higher international non-business course(s) taken during the year abroad at one of Carleton’s approved exchange partner institutions

### Total Credits 4.0

### Concentration in Global Financial Management and Systems (4.0 credits)

1. **2.0 credits in:**
   - BUSI 4504 [0.5] International Finance
   - BUSI 4505 [0.5] Global Financial Markets and Institutions
   - BUSI 4515 [0.5] Micro Finance
   - ECON 3602 [0.5] International Monetary Problems

2. **0.5 credit in:**
   - BUSI 3512 [0.5] Derivatives

3. **0.5 credit from:**
   - 0.5 credit of approved 3000-level or higher course(s) in Global Financial Management taken during the year abroad at one of Carleton’s approved exchange partner institutions
   - BUSI 3500 [0.5] Applied Corporate Finance

### Total Credits 4.0
Management.

Students are required to present a Minor CGPA of 6.50 or higher at graduation in order to be awarded a Minor in Arts Management. Students who are required to leave the Minor due to a low Minor CGPA may not return to the Minor at any subsequent date.

The following requirements must be satisfied:

1. **3.5 credits in:**
   - BUSI 1003 [0.5] Survey of Accounting
   - BUSI 2121 [0.5] Introduction to Organizational Behaviour
   - BUSI 2204 [0.5] Basic Marketing
   - BUSI 2503 [0.5] Introduction to Finance
   - BUSI 2800 [0.5] Entrepreneurship

2. **0.5 credit from:**
   - BUSI 3500 [0.5] Advanced Corporate Finance
   - BUSI 4502 [0.5] Portfolio Management
   - BUSI 4510 [0.5] Mergers and Acquisitions
   - BUSI 4511 [0.5] Fixed Income Analysis

3. **0.5 credit from:**
   - ECON 3360 [0.5] Introduction to Labour Economics
   - ECON 3601 [0.5] Introduction to International Trade
   - ECON 3807 [0.5] European Economic Integration
   - ECON 3808 [0.5] The Economics of Transition
   - ECON 3870 [0.5] Comparative Economic Systems
   - ECON 4508 [0.5] International Aspects of Economic Development
   - ECON 4601 [0.5] International Trade Theory and Policy
   - ECON 4602 [0.5] International Monetary Theory and Policy
   - PSCI 2601 [0.5] International Relations: Global Politics
   - PSCI 2602 [0.5] International Relations: Global Political Economy
   - PSCI 3600 [0.5] International Institutions
   - PSCI 3703 [0.5] Governing in the Global Economy
   - PSCI 4603 [0.5] Analysis of International Political Economy
   - PSCI 4604 [0.5] Selected Problems in International Political Economy
   - PSCI 4805 [0.5] Political Economy of Global Money and Finance

4. **1.0 credit from:**
   - BUSI 3502 [0.5] Investments
   - BUSI 3601 [0.5] Management Accounting
   - BUSI 4129 [0.5] Managing the Arts
   - BUSI 4229 [0.5] Marketing in the Arts and Culture Sectors

5. **2.0 credits in:**
   - BUSI 1402 [0.5] Introduction to Business Information and Communication Technologies
   - BUSI 2301 [0.5] Introduction to Supply and Operations Management
   - BUSI 2400 [0.5] Foundations of Information Systems
   - BUSI 3102 [0.5] Introduction to Human Resources Management
   - BUSI 3104 [0.5] Managing Individual Performance
   - BUSI 3105 [0.5] Managing and Motivating Teams
   - BUSI 3106 [0.5] Managing Conflict and Negotiation
   - BUSI 3117 [0.5] Developing Creative Thinking
   - BUSI 3204 [0.5] Digital Marketing
   - BUSI 3205 [0.5] Marketing Communications
   - BUSI 3810 [0.5] Business Development
   - BUSI 3820 [0.5] Practicum in Business Design
   - BUSI 4205 [0.5] International Marketing Strategy
   - BUSI 4112 [0.5] Organizational Leadership
   - ARTH 3705 [0.5] Selected Museum Exhibition
   - ARTH 4705 [0.5] Seminar: Selected Museum Exhibition
   - FILM 2101 [0.5] The Film Industry
   - MUSI 3403 [0.5] Music Industries

Total Credits: **4.5**

**Minor in Business (4.0 credits)**

Only students pursuing undergraduate programs (except B.Com. and B.I.B.) requiring at least 20.0 credits to graduate and who have completed at least 4.0 credits toward their degrees with a minimum overall CGPA of 7.00 may be admitted to Minor in Business. Students who are required to leave the Minor due to a low Minor CGPA may not return to the Minor at any subsequent date.

Students are required to present a Minor CGPA of 6.50 or higher at graduation in order to be awarded a Minor in Business.

Requirements:

1. **1.0 credit from:**
   - BUSI 1003 [0.5] Survey of Accounting
   - BUSI 1001 [0.5] Principles of Financial Accounting

2. **2.0 credits in:**
   - BUSI 2121 [0.5] Introduction to Organizational Behaviour
   - BUSI 2204 [0.5] Basic Marketing
### Minor in Business for Bachelor of Engineering (4.0 credits)

Only students pursuing undergraduate Bachelor of Engineering programs who have completed at least 4.0 credits toward their degrees with a minimum overall CGPA of 5.00 may be admitted to Minor in Business for Bachelor of Engineering.

Students who are required to leave the Minor due to a low Minor CGPA may not return to the Minor at any subsequent date.

Students are required to present a Minor CGPA of 6.50 or higher at graduation in order to be awarded a Minor in Business for Bachelor of Engineering.

#### Requirements:

1. **2.5 credits in:**
   - BUSI 1003 [0.5] Survey of Accounting
   - BUSI 2121 [0.5] Introduction to Organizational Behaviour
   - BUSI 2204 [0.5] Basic Marketing
   - BUSI 2301 [0.5] Introduction to Supply and Operations Management
   - BUSI 2503 [0.5] Introduction to Finance

2. **1.5 credits from:**
   - BUSI 2400 [0.5] Foundations of Information Systems
   - BUSI 2703 [0.5] Introduction to International Business
   - BUSI 2800 [0.5] Entrepreneurship
   - BUSI 3103 [0.5] Introduction to Organization Theory
   - BUSI 3309 [0.5] Project Management
   - BUSI 4105 [0.5] Managing Change

3. The remaining requirements of the major discipline(s) must be satisfied.

### Total Credits

4.0

### Minor in Human Resources and Management for B.A. Honours Psychology (5.0 credits)

Only students pursuing Bachelor of Arts Honours with a Major in Psychology who have completed at least 4.0 credits toward their degrees with a minimum overall CGPA of 7.00 may be admitted to Minor in Human Resources and Management. Students must successfully complete PSYC 2801 prior to entry in to the Minor, with a minimum grade of B+. PSYC 3801 must be successfully completed prior to taking any of the 4000-level BUSI courses listed in the Minor. Enrolment is limited.

Students who are required to leave the Minor due to a low Minor CGPA may not return to the Minor at any subsequent date.

Students are required to present a Minor CGPA of 6.50 or higher at graduation in order to be awarded a Minor in Human Resources and Management for B.A. Honours Psychology.

#### Requirements:

1. **1.0 credit in:**
   - PSYC 2801 [0.5] Organizational Psychology I
   - PSYC 3801 [0.5] Organizational Psychology II

2. **1.0 credits in:**
   - BUSI 3102 [0.5] Introduction to Human Resources Management
   - BUSI 3103 [0.5] Introduction to Organization Theory

3. **2.0 credits from:**
   - BUSI 3104 [0.5] Managing Individual Performance
   - BUSI 3105 [0.5] Managing and Motivating Teams
   - BUSI 3106 [0.5] Managing Conflict and Negotiation
   - BUSI 4104 [0.5] Strategic Human Resources Management
   - BUSI 4105 [0.5] Managing Change
   - BUSI 4112 [0.5] Organizational Leadership

4. **0.5 credit in:**
   - BUSI 2204 [0.5] Basic Marketing

5. **0.5 credit from:**
   - BUSI 2800 [0.5] Entrepreneurship
   - BUSI 3209 [0.5] Consumer Behaviour

### Total Credits

5.0
Post-Baccalaureate Diploma in Accounting (4.5 credits)

Normally, students are required to have completed an undergraduate degree with a minimum B-average or higher, and have completed BUSI 1004 and BUSI 1005 (or equivalent) with a grade of C or higher.

Requirements:

1. 4.5 credits in:
   - BUSI 2001 [0.5] Intermediate Accounting I
   - BUSI 2002 [0.5] Intermediate Accounting II
   - BUSI 2005 [0.5] Income Tax Fundamentals
   - BUSI 2503 [0.5] Introduction to Finance
   - BUSI 3001 [0.5] Accounting for Business Combinations
   - BUSI 3007 [0.5] Auditing I
   - BUSI 3008 [0.5] Intermediate Management Accounting and Control
   - BUSI 3629 [0.5] Corporate Governance and Strategy
   - BUSI 4008 [0.5] Advanced Management Accounting and Control

Total Credits 4.5

Regulations

In addition to the program requirements described here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

Students should consult with the School when planning their program and selecting courses.

Academic Performance Evaluation

Students in B.Com. and B.I.B. are Honours students. Students in programs of the Eric Sprott School of Business who are not in Good Standing (GS) at any Academic Performance Evaluation will be assigned either Academic Warning (AW) or Continue in Alternate (CA). Students assigned CA will be required to leave the program. Students assigned AW must achieve GS at their next Academic Performance Evaluation or they will be required to withdraw from the program with either the standing Continue in Alternate (CA) or Dismissed from the Program (DP).

Graduation

Bachelor of Commerce

- A B.Com. (Honours) student who meets all of the Overall CGPA requirement of 5.0, the Major CGPA graduation requirement of 6.5, and the Concentration CGPA graduation requirement of 6.5 will graduate with B.Com Honours with a concentration notation
- A B.Com. (Honours) student who meets both the Overall CGPA requirement of 5.0 and the Major CGPA graduation requirement of 6.5, but not the Concentration CGPA graduation requirement of 6.5 will graduate with B.Com Honours without a concentration notation
- A B.Com. (Honours) student who meets the Overall CGPA graduation requirement of 5.0 and a Major CGPA of 5.0, regardless of the Concentration CGPA will graduate with B.Com with neither a concentration nor an Honours notation

Bachelor of International Business

- A BIB student who meets all of the Overall CGPA requirement of 5.0, the Major CGPA requirement of 6.5, the Core CGPA requirements of 6.5, and the Concentration CGPA requirement of 6.5 will graduate with BIB Honours with a concentration notation
- A BIB student who meets the Overall CGPA requirement of 5.0, the Major CGPA requirement of 6.5 and Core CGPA requirement of 6.5, but not the Concentration CGPA requirement of 6.5 will graduate with BIB Honours without a concentration notation
- A BIB student who meets the Overall CGPA requirement of 5.0 but not the Major CGPA requirement of 6.5 or the Core CGPA requirement of 6.5 will be transferred in to the B.Com with neither a concentration nor an Honours notation and will then follow the appropriate graduation path as laid out in the B.Com requirements

Academic Performance Evaluation for Bachelor of Commerce

Students in B.Com. are Honours students.

Students may not continue into 3000-level or higher BUSI courses unless the following two minimum requirements are met:

1. Successful completion of BUSI 1800
2. Successful completion of BUSI 2800

B.Com. students are in Good Standing (GS) if they meet the minimum requirement schedule provided in Regulation 3.2.7.

A B.Com. student not in Good Standing (GS) due to a deficiency of 1.0 grade point or less in either the Overall or Major CGPA requirements is on Academic Warning (AW). A B.Com. student is required to leave the program with the status Continue in Alternate (CA) or the status Dismissed from Program (DP) if:

1. they are not in Good Standing due to a deficiency of more than 1.0 grade point in their Overall and/or Major CGPA requirements at any Academic Performance Evaluation, or
2. the student was on Academic Warning and does not achieve Good Standing at the next Academic Performance Evaluation.

Academic Performance Evaluation for Bachelor of International Business

Students in B.I.B. are Honours students.

B.I.B. Students are in Good Standing (GS) if they meet the minimum requirement schedule provided below. The B.I.B. defines a Language Core consisting of the required 4.0 credits in the language of specialization.

Good Standing in BIB requires:

At the first APE:
• Overall CGPA at least 4.50
• Major CGPA at least 6.00
• Language Core CGPA at least 6.00

At all subsequent APES and at graduation:
• Overall CGPA at least 5.00
• Major CGPA at least 6.50
• Language Core CGPA at least 6.50

A B.I.B. student who is not in Good Standing (GS) due to a deficiency of 1.0 grade point or less in any of the Overall, Major, or Language Core CGPA requirements, is on Academic Warning.

A B.I.B. student is required to leave the program with either the status Continue in Alternate (CA) or the status Dismissed from Program (DP) if:
• They are not in Good Standing (GS) due to a deficiency of more than one grade point in either the Overall, Major, or Language Core CGPA requirements at any Academic Performance Evaluation, or
• The student is on Academic Warning and does not achieve Good Standing at the next Academic Performance Evaluation.

Regulations

Post-Baccalaureate Diploma
In addition to the requirements presented here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

Definition
A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:
• qualify a candidate for consideration for entry into a master’s program, or
• bring a candidate who already possesses a bachelor’s degree up to a level of a bachelor’s degree of 20.0 credits or more in another discipline, or
• provide a candidate who already possesses a twenty-credit bachelor’s degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas, or
• provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

Program Requirements
• A post-baccalaureate diploma is normally constituted of a minimum of 3.0 credits to a maximum of 5.0 credits of advanced undergraduate courses.
• A minimum of 3.0 residency credits counting toward the post-baccalaureate diploma.

English as a Second Language Requirement
In addition to the program requirements, completion of English as a Second Language (ESLA) courses may be required from the following sequence: ESLA 1300, ESLA 1500, ESLA 1900, ESLA 1905. No credits from this sequence will be counted toward the post-baccalaureate diploma.

Continuation
All post-baccalaureate diploma students are expected to complete their diploma requirements within two calendar years after the date of initial registration. After this period student may be withdrawn.

Graduation
• A candidate for a post-baccalaureate diploma must have an overall CGPA of at least 6.5 to graduate.
• A candidate for a post-baccalaureate diploma must obtain a grade of C- or higher in each course taken in fulfillment of the program requirements.
• Students should consult with the Department, School or Institute when planning their diploma and selecting courses.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy

Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.
Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option
Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option
Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database.
Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

**Bachelor of Commerce Honours: Co-op Admission and Continuation Requirements**

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Have a major CGPA of 8.00 or higher and an overall CGPA of 6.50 or higher;
2. Successfully completed 6.0 credits in the major and have at least 6.0 credits remaining for completion of the B.Com. program prior to their first work term;
3. Registered as a full-time student in the Bachelor of Commerce program.

To obtain the co-op designation students must successfully complete three (3) work terms.

**Admissions Information**

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as **recommended** are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

**Degree**

- Bachelor of Commerce (B.Com.) (Honours)
- Bachelor of Commerce (B.Com.)

**Admission Requirements**

**First Year**

**Bachelor of Commerce (B.Com.) (Honours)**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include English, Advanced Functions, and Calculus and Vectors. Applicants who do not present with Calculus and Vectors must successfully complete MATH 0009 at Carleton in the Fall semester of first year in order to be eligible to continue.

For applicants whose first language is not English, the requirement of 4U English can also be met under the conditions outlined in the English Language Requirements of the Admissions Requirements and Procedures section of this Calendar.

**Bachelor of Commerce (B.Com.)**

No direct entry, access is restricted.

**Advanced Standing**

**Bachelor of Commerce (B.Com.) (Honours)**

Applications for admission to the second or subsequent years will be assessed on their merits. Students must present a major CGPA of 6.50 (C+/B-) or higher, and an overall CGPA of 8.00 (B) or higher. Advanced standing will be granted only for those courses that are determined to be appropriate. Students will not receive credit for courses graded below C-.

Current Carleton students may also be assessed for admission to second and subsequent years if they present BUSI 1001 and BUSI 1002 with an average of 8.0 or higher (with no individual grade below C+) and a major CGPA of 6.50 (C+/B-) or higher.
Applications by B.I.B. (Honours) students for admission to the second or subsequent years of B.Com. (Honours) will be assessed on their merits. Students must present a major CGPA and an overall CGPA consistent with the Academic Performance Evaluation requirements for B.Com. (Honours) students. Advanced standing will be granted for those courses determined to be appropriate.

**Bachelor of Commerce (B.Com.)**
No direct entry. Access is restricted to students in the Bachelor of Commerce (Honours) and Bachelor of International Business (Honours). (See Regulations for Business.)

**Co-op Option**
Direct Admission to the First Year of the Co-op Option
Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Commerce (Honours) program;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Admissions Information**
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

**Degree**
- Bachelor of International Business (B.I.B.) (Honours)

**Admission Requirements**

**First Year**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include English, Advanced Functions, and Calculus and Vectors. Applicants who do not present with Calculus and Vectors must successfully complete MATH 0009 at Carleton in the Fall semester of first year in order to be eligible to continue.

For applicants whose first language is not English, the requirement of 4U English can also be met under the conditions outlined in “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

**Advanced Standing**
Applications for admission to second and subsequent years will be assessed on their merits, subject to available spaces. Advanced standing will be granted only for those courses that are determined to be appropriate. Students must present an Overall CGPA of 8.0 (equivalent to B average) or better. Students will not receive credit for courses with grades below C-.

Applications by B.Com. students for admission to the second or subsequent years of B.I.B. will be assessed on their merits. Students must present a major CGPA and an overall CGPA consistent with the Academic Performance Evaluation requirements for B.I.B. students. Advanced standing will be granted for those courses determined to be appropriate.

The design of the B.I.B. program is premised on a full year of study abroad (at third year) after the preparations leading to it are successfully completed at Carleton. Students who are admitted with advanced standing may need to delay the third-year abroad requirements until first and second year curricula are completed and consequently delay graduation.

Some transferred credits (normally electives) may have to be forfeited in order to meet the Third-year Study Abroad Requirement of minimum 4.0 credits completed during year abroad.

**Admissions Information**
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by
program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Diploma
- Post-Baccalaureate Diploma in Accounting

Normally, students are required to have completed an undergraduate degree with a minimum B- average or higher, and have completed BUSI 1004 and BUSI 1005 (or equivalent) with a grade of C or higher.

Business (BUSI) Courses

Notes:
1. Some Business courses are open to students in select programs only. Please refer to the current BUSI Course Priority List found at: sprott.carleton.ca/registration
2. B.Com. and B.I.B. students should use Business (BUSI) prefix for registering in courses that are cross-listed.
3. Not all courses listed are offered in a given year; consult the class schedule at central.carleton.ca for a list of current course offerings.

BUSI 1001 [0.5 credit]
Principles of Financial Accounting
Discussion of the concepts of asset valuation and income measurement underlying the preparations and interpretation of financial statements.
Precludes additional credit for BUSI 1003 and BUSI 1004.
Prerequisite(s): second-year standing, or permission of the Sprott School of Business.
Lecture three hours a week.

BUSI 1002 [0.5 credit]
Management Accounting
An introduction to the use of accounting data for the purposes of planning and control of operations.
Precludes additional credit for BUSI 1003 and BUSI 1005.
Prerequisite(s): second-year standing and BUSI 1001, or permission of the Sprott School of Business.
Lecture three hours a week.

BUSI 1003 [0.5 credit]
Survey of Accounting
Introduction to accounting information, the basic accounting cycle, and consideration of selected financial statement topics. Analysis of cost behavior and the uses and limitations of accounting information in planning, controlling and decision-making processes.
Precludes additional credit for BUSI 1001, BUSI 1002, BUSI 1004 and BUSI 1005. No credit for students in B.Com., B.I.B or B.Econ. (Honours Economics, Concentration in Financial Economics).
Lecture three hours a week.

BUSI 1004 [0.5 credit]
Financial Accounting for Business Students
Introduction to accounting for business organizations. The student will be introduced to the accounting process and the preparation and analysis of the balance sheet, income statement, and cash flow statement.
Precludes additional credit for BUSI 1001 and BUSI 1003.
Prerequisite(s): BUSI 1701 or BUSI 1800. Restricted to B.Com. and B.I.B. students.
Lectures three hours a week.

BUSI 1005 [0.5 credit]
Managerial Accounting for Business Students
Introduction to the development and use of accounting information within a business organization for effective management including: planning, directing, motivating, and controlling activities and behaviours.
Precludes additional credit for BUSI 1002 and BUSI 1003.
Prerequisite(s): BUSI 1004. Restricted to B.Com. and B.I.B. students.
Lectures three hours a week.

BUSI 1402 [0.5 credit]
Introduction to Business Information and Communication Technologies
Introduction to ICT in organizations. Topics may include spreadsheets, databases, statistical software, website design and implementation, collaboration software including wikis, blogs and social networking, GPS, m-Commerce.
Lectures three hours a week.

BUSI 1701 [0.5 credit]
Introduction to International Business
Introduction to the principles and practices of international business. Topics include the impact of culture and the political, economic, and legal systems on global strategy, international institutions, theories of cross-border trade, and the characteristics and effects of regional trade blocs.
Precludes additional credit for BUSI 2701, BUSI 2703.
Prerequisite(s): restricted to B.I.B. students.
Lectures three hours and tutorial one hour a week.

BUSI 1800 [0.5 credit]
Introduction to Business
Introduction to contemporary businesses in a complex economy, their role in the society, their history. The various functions that come together to define a business will be examined. All forms of business communications emphasized.
Prerequisite(s): restricted to B.Com. students with first-year or second-year standing.
Lectures three hours and tutorial one hour a week.
BUSI 1801 [0.5 credit]
Foundations of Business
Introduction to contemporary businesses in a complex economy and their role in the society. An overview of the various functions that come together to define a business will be examined. Precludes additional credit for BUSI 1800. No credit in B.Com. or B.I.B programs. Lectures three hours a week.

BUSI 1995 [0.0 credit]
Employability Passport I
An introduction to the knowledge and tools required for a career in Business. Includes: Experiential Learning Activity Prerequisite(s): Restricted to students registered in B.Com. or B.I.B. Participation in employability events and initiatives throughout the year.

BUSI 2001 [0.5 credit]
Intermediate Accounting I
An examination of accounting and reporting issues related primarily to asset valuation and revenue recognition. Prerequisite(s): BUSI 1001 and BUSI 1002, or BUSI 1004 and BUSI 1005 with a grade of C or higher in each. Lecture three hours a week.

BUSI 2002 [0.5 credit]
Intermediate Accounting II
An examination of accounting and reporting issues related primarily to liabilities and equities. Precludes additional credit for BUSI 2506. Prerequisite(s): BUSI 2001, and BUSI 2504 or BUSI 2503 with a grade of C or higher in each. Lecture three hours a week.

BUSI 2005 [0.5 credit]
Income Tax Fundamentals
A foundation course that aims to introduce the fundamental concepts of income tax laws and regulations as significant elements in the planning and decision making process of taxpayers and managers. Problems, issues and planning associated with the Income Tax Act are discussed. Precludes additional credit for BUSI 3005 and BUSI 4005. Prerequisite(s): BUSI 1001 or BUSI 1004 with a grade of C- or higher. Lecture three hours a week.

BUSI 2101 [0.5 credit]
Organizational Behaviour
Models of individual and small group behaviour in organizations. Topics include motivation, communication, job design, leadership and group dynamics to provide systematic explanations of employee and managerial behaviour in organizations. Precludes additional credit for BUSI 2121, BUSI 2702, BUSI 3602. Prerequisite(s): second-year standing. Restricted to B.Com. students. Lectures three hours, and tutorial one and a half hours a week.

BUSI 2121 [0.5 credit]
Introduction to Organizational Behaviour
Individual and small group behaviors in organizations and management of the same. Precludes additional credit for BUSI 2101, BUSI 2702, BUSI 3602. Prerequisite(s): second-year standing. Lecture three hours a week.

BUSI 2204 [0.5 credit]
Basic Marketing
Basic problems and practices in marketing. Marketing planning tools and strategies of firms. Precludes additional credit for BIT 2002 and BUSI 2208. Lecture three hours a week.

BUSI 2208 [0.5 credit]
Introduction to Marketing
Overview of the marketing function within the firm. Introduction to key marketing concepts and principles; business environment analysis, strategic decision making (segmentation, targeting, positioning), marketing mix planning (product, price, place promotion). Analysis of marketing problems using cases and major project. Includes: Experiential Learning Activity Precludes additional credit for BUSI 2204. Prerequisite(s): BUSI 1004, ECON 1001 and ECON 1002 (or ECON 1000) and one of BUSI 1701, PSYC 1002, SOCI 1005. Restricted to B.Com. or B.I.B. students. Lecture three hours a week.

BUSI 2301 [0.5 credit]
Introduction to Supply and Operations Management
Concepts, models, and managerial issues in planning, designing, operating and controlling systems across supply chains for the provision of goods and services. Emphasis on basic ideas and tools. Precludes additional credit for BUSI 3300 (no longer offered). Prerequisite(s): second-year standing. Restricted to selected Sprott programs. Lecture three hours a week.
BUSI 2400 [0.5 credit]
Foundations of Information Systems
This course helps students understand the critical role of information systems in organizations and their impact on social and ethical issues. Covers fundamental tools and skills for the development and management of information systems and business analytics in organizations. Lecture three hours a week.

BUSI 2402 [0.5 credit]
Business Applications Development
Introduction to programming. Fundamentals of structured and object-oriented programming using an OO programming language. Treatment of objects, abstraction and inheritance, event-driven programming, iteration, sequence and selection. Consideration of algorithms for searching, sorting, string processing and numerical analysis. Emphasis on the development of business applications. Precludes additional credit for COMP 1006 and COMP 1406. Prerequisite(s): second-year standing. Lecture three hours and tutorial one hour a week.

BUSI 2503 [0.5 credit]
Introduction to Finance
Basic issues and practices in finance. Survey of business firms' financing, investment, and payout decisions. Emphasis on understanding the principals, resources and trade-offs in the financial area of a business. Precludes additional credit for BUSI 2504 and ECON 3050. No credit for students in B.Com., BIB or B.Econ. (Honours Economics, Concentration in Financial Economics). Prerequisite(s): second-year standing. Lecture three hours a week.

BUSI 2504 [0.5 credit]
Business Finance I
Business firms' financing, capital investment, and dividend policy decisions, cost of capital and short-term asset management problems. Precludes additional credit for BUSI 2503, ECON 3050. Prerequisite(s): BUSI 1005, and ECON 1001 and ECON 1002 (or ECON 1000) or ECOR 3800. Restricted to selected Sprott programs. Lecture three hours and tutorial one hour a week.

BUSI 2505 [0.5 credit]
Business Finance II
Capital investment and financing decisions in the context of risk and return tradeoffs. Primary and derivative securities, and their role in risk management. Mergers, corporate restructuring, the theory of principal-agent relationships, and financial planning, forecasting, and control. Prerequisite(s): BUSI 1002 or BUSI 1005, BUSI 2504 with a grade of C or higher in each; ECON 1001 and ECON 1002 (or ECON 1000) and MATH 1009 with a grade of C- or higher in each. Lecture three hours a week.

BUSI 2506 [0.5 credit]
Financial Statement Analysis
Analysis and interpretation of an entity's financial statements and annual report from a user perspective. Ratio analysis is used to analyze firm performance and make forecasts of future performance. Precludes additional credit for BUSI 2002. Prerequisite(s): BUSI 2504 with a grade of C or higher. Lectures three hours a week.

BUSI 2601 [0.5 credit]
Business Law
The legal system and legal ordering as they affect those engaged in business activities. Emphasis on the law of tort, law of contract, agency and bailment, business associations (partnerships/proprietorships/corporations) and real estate. Lecture three hours a week.

BUSI 2701 [0.5 credit]
Fundamentals of International Business
Introduction to the context and operation of international business. Topics include international trade theory, trade agreements and blocs, international finance, global marketing, international human resource management and global strategy. Precludes additional credit for BUSI 1701, BUSI 2703. Prerequisite(s): BUSI 1800. Lecture three hours a week.

BUSI 2702 [0.5 credit]
Introduction to International Management
Applies principles of organizational behavior and organizational theory to the operations of international businesses. Includes discussion of appropriate strategies and structures. Introduces concepts of cross-cultural communication. Precludes additional credit for BUSI 2101, BUSI 2121, BUSI 3602. Prerequisite(s): second-year standing in B.I.B. and BUSI 1701. Lectures three hours a week.

BUSI 2703 [0.5 credit]
Introduction to International Business
Introduction to contemporary businesses in a complex economy, their role in society and their history. Examination of the various functions that come together to define a business with an emphasis on all forms of business communications. Precludes additional credit for BUSI 1701, BUSI 2701. Prerequisite(s): second-year standing. No credit for students in B.Com. or BIB. Lectures three hours per week.
BUSI 2800 [0.5 credit]  
**Entrepreneurship**  
Overview of the basics of entrepreneurship, with emphasis on idea generation and identification, team building, business models, initial strategies and feasibility. A number of organization types will be studied.  
Prerequisite(s): BUSI 1800 or BUSI 1801 and second-year standing.  
Lecture three hours a week.

BUSI 2995 [0.0 credit]  
**Employability Passport II**  
An intermediate course in the knowledge and tools required for a career in Business.  
Includes: Experiential Learning Activity  
Prerequisite(s): BUSI 1995.  
Participation in employability events and initiatives throughout the year.

BUSI 3001 [0.5 credit]  
**Accounting for Business Combinations**  
Accounting problems associated with business combinations, with attention to the preparation of consolidated financial statements. Discussion may extend to financial reporting and diversified companies, reorganizations, etc. Selection of topics may vary from year to year.  
Prerequisite(s): BUSI 2002 with a grade of C- or higher.  
Lecture three hours a week.

BUSI 3005 [0.5 credit]  
**Taxation I**  
Federal income tax laws and regulations and their impact on an individual's financial and business decisions. Problems, issues and planning associated with the Income Tax Act and concerned with the computation of taxable income and taxes payable by an individual are discussed.  
Precludes additional credit for BUSI 2005.  
Prerequisite(s): BUSI 2001 with a grade of C- or higher.  
Lecture three hours a week.

BUSI 3007 [0.5 credit]  
**Auditing I**  
Auditing theory, methodology and application.  
Precludes additional credit for BUSI 4007 (no longer offered).  
Prerequisite(s): BUSI 2001.  
Lecture three hours a week.

BUSI 3008 [0.5 credit]  
**Intermediate Management Accounting and Control**  
The use of accounting information for cost control and performance evaluation. Emphasis is on cost accumulation systems, performance evaluation, control models and analytical tools.  
Prerequisite(s): BUSI 1002 or BUSI 1005 with a grade of C- or higher in each.  
Lecture three hours a week.

BUSI 3040 [0.5 credit]  
**Data Analytics and Information Systems for Accounting**  
Data analysis in accounting, working with and making sense of big data using various data analysis tools. Specific topics include: data collection, cleaning, analyzing, visualization, and decision making in different areas of accounting.  
Includes: Experiential Learning Activity  
Prerequisite(s): BUSI 2400 and BUSI 3007 with a grade of C- or higher in each.  
Lecture three hours a week.

BUSI 3102 [0.5 credit]  
**Introduction to Human Resources Management**  
Human Resource Management function in large formal organizations. Topics include human resources planning, recruitment, selection, performance evaluation, career development and training, compensation and benefits and the role of the professional personnel manager.  
Prerequisite(s): second-year standing and one of BUSI 2101, BUSI 2121, BUSI 2702, BUSI 3602, or PSYC 2801.  
Lectures three hours a week.

BUSI 3103 [0.5 credit]  
**Introduction to Organization Theory**  
Macro-organization theory. Structuring of organizations in a complex global economy. Effects of the external environment, technology, culture and organizational goals on the structure, processes and effectiveness of the organization.  
Prerequisite(s): second-year standing and one of BUSI 2101, BUSI 2121, BUSI 2702, or PSYC 2801.  
Lectures three hours a week.

BUSI 3104 [0.5 credit]  
**Managing Individual Performance**  
Managing the performance of self and others. Topics include self awareness, motivation, leadership, communication, diversity, and creativity. Extensive use is made of self-assessments and experiential learning.  
Prerequisite(s): BUSI 2101, BUSI 2121, BUSI 2702, or PSYC 2801 with a grade of C or higher.  
Lecture three hours a week.

BUSI 3105 [0.5 credit]  
**Managing and Motivating Teams**  
Principles of working in and managing teams. Topics include self-awareness, team formation, team development, team dynamics, team leadership and team motivation.  
Prerequisite(s): BUSI 2101, BUSI 2121, BUSI 2702, or PSYC 2801 with a grade of C or higher.  
Lecture three hours a week.
BUSI 3106 [0.5 credit]
Managing Conflict and Negotiation
Analysis of the sources and forms of conflict and effective approaches to managing conflict. Exploration of the effectiveness of various strategies of negotiations.
Prerequisite(s): BUSI 2101, BUSI 2121, BUSI 2702, or PSYC 2801 with a grade of C- or higher.
Lecture three hours a week.

BUSI 3117 [0.5 credit]
Developing Creative Thinking
Increases student skills in areas beyond technical expertise, with a focus on the importance of fluidity, risk taking, and idea generation. Emphasis on creativity as a process, with exposure to various techniques and concepts including Design Thinking at multiple levels (individual, group, organization).
Prerequisite(s): third-year standing and one of BUSI 2101 or BUSI 2702 with a grade of C- or higher; or permission of the Sprott School of Business.
Lecture three hours a week.

BUSI 3119 [0.5 credit]
Business and Environmental Sustainability
Examining concepts of environmental sustainability within the business context. Exploring the complex interdependency between organizations, society and the natural environment.
Prerequisite(s): third year standing.
Lecture three hours a week.

BUSI 3204 [0.5 credit]
Digital Marketing
Introduction and assessment of key new marketing tools and approaches, including internet marketing, relationship marketing, direct marketing; effective adoption and implementation of these tools and approaches across industries and organizations.
Prerequisite(s): BUSI 2204 or BUSI 2208 with a grade of C- or higher.
Lecture three hours a week.

BUSI 3205 [0.5 credit]
Marketing Communications
Promotion as communication process and marketing tool. Integrating advertising, direct/digital marketing, interactive media, sales promotion, public relations, personal selling through strategic planning (research, budgeting, organizing, creative and media strategy), execution, and campaign evaluation. Regulatory, ethical, social issues considerations.
Prerequisite(s): BUSI 2208 or BUSI 2204 with a grade of C- or higher.
Lecture three hours a week.

BUSI 3207 [0.5 credit]
Marketing Research
Concepts essential for understanding and conducting applied marketing research. Methods for collecting, analyzing, and interpreting data relevant to marketing decision-making. Experience in research techniques through case studies, exercises and project.
Includes: Experiential Learning Activity
Precludes additional credit for BUSI 3100.
Prerequisite(s): BUSI 2204 or BUSI 2208 with a grade of C or higher; STAT 2607 with a grade of C- or higher.
Lecture three hours a week.

BUSI 3208 [0.5 credit]
Business-to-Business Marketing
Theories and practice of marketing in business-to-business markets with emphasis on high technology businesses, including strategic marketing management, buyer behaviour and competitive analysis, sales management, new product management, and international issues.
Prerequisite(s): BUSI 2204 or BUSI 2208 with a grade of C- or higher.
Lecture three hours a week.

BUSI 3209 [0.5 credit]
Consumer Behaviour
Introduction to the application of psychological theories and methodologies to consumer behaviour. How consumer behaviour is shaped by internal influences. Topics include perception, learning, memory, motivation, affect, personality, the self, attitudes and decision-making.
Precludes additional credit for BUSI 4206 (no longer offered).
Prerequisite(s): third-year standing, and BUSI 2204 or BUSI 2208 with a grade of C or higher.
Lecture three hours a week.

BUSI 3301 [0.5 credit]
Supply Chain Management Strategies
Introduction to strategies in managing supply chain. Topics include strategies for planning and coordinating all activities involved in procurement, conversion, and channel management in the global environment.
Precludes additional credit for BUSI 4303 (no longer offered).
Prerequisite(s): second-year standing; BUSI 2301 with a grade of C or higher and STAT 2606 with a grade of C- or higher.
Lecture three hours a week.
**BUSI 3305 [0.5 credit]**
**Logistics and Transportation**
Overview of logistics and transportation concepts, their roles in creating supply chain value; warehousing and facilities management, packaging and material handling, network design, transportation fundamentals, managing logistics internationally, global transportation providers and intermediaries, performance metrics, trends in logistics and transportation.
Prerequisite(s): third-year standing; BUSI 2301 with a grade of C or higher, and STAT 2606 with a grade of C- or higher.
Lecture three hours a week.

**BUSI 3308 [0.5 credit]**
**Simulation Modeling and Analytics**
Concepts of computer simulation for predictive and prescriptive analytics through case studies, worked examples and hands-on projects. Emphasizes static simulations with spreadsheets, discrete-event, and agent-based simulations with specialized software. Input modeling, model design, experimental design, analysis of outputs.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing; BUSI 2301 with a grade of C or higher and STAT 2606 with a grade of C- or higher.
Lecture two hours and tutorial two hours a week.

**BUSI 3309 [0.5 credit]**
**Project Management**
Identification, selection, initiation, and organization of projects; risk assessment; project scheduling, performance monitoring and control, and termination. Emphasizes on foundations, principles and supporting techniques. Precludes additional credit for BUSI 4308.
Prerequisite(s): third-year standing, BUSI 2301 and STAT 2606.
Lecture three hours a week.

**BUSI 3400 [0.5 credit]**
**Data and Information Management**
Prerequisite(s): BUSI 2400 with a grade of C or higher.
Lecture three hours and tutorial one hour a week.

**BUSI 3401 [0.5 credit]**
**Applications Development for Online Environments**
Analysis, design and implementation of electronic business systems. Topics include advanced object-oriented programming, advanced SQL programming, XML, using ASP.NET, MTS and SQL Server. Precludes additional credit for BUSI 4401 (no longer offered).
Prerequisite(s): BUSI 2402 and BUSI 3400, or COMP 3005 (with a grade of C- or higher in each).
Lecture three hours a week.

**BUSI 3402 [0.5 credit]**
**Systems Analysis and Design**
Methods of analysis of computer-based information systems. The systems development life cycle, planning, analysis, design, implementation and maintenance. Structured and object-oriented methods will be used. Use of a CASE tool.
Precludes additional credit for SYSC 3100, BUSI 3403, (no longer offered) and BUSI 3404 (no longer offered).
Prerequisite(s): one of BUSI 2400, or COMP 2404, or SYSC 2004 (with a grade of C or higher).
Lecture three hours and tutorials one hour a week.

**BUSI 3405 [0.5 credit]**
**Enterprise Architecture**
Exploration of the significance of cross-functional business processes in the context of e-business transformation. Includes process analysis and modeling techniques. Also considers the application of enterprise resource planning systems, workflow technologies, intranets, and extranets to facilitate process flows inside and outside the organization.
Prerequisite(s): BUSI 2400 and BUSI 3103 with a grade of C- or higher.
Lecture three hours a week.

**BUSI 3500 [0.5 credit]**
**Applied Corporate Finance**
An examination of the major issues in corporate finance and applied financial management. Topics include: introduction to portfolio theory, the capital asset pricing model, cost of capital, capital structure and dividend policy, lease financing, capital budgeting under uncertainty, mergers and consolidations.
Prerequisite(s): BUSI 2505 with a grade of C+ or higher, STAT 2606 and ECON 2009 with a grade of C- or higher in each.
Lecture three hours a week.

**BUSI 3502 [0.5 credit]**
**Investments**
Prerequisite(s): BUSI 2505 with a grade of C+ or higher, STAT 2606 and ECON 2009 with a grade of C- or higher in each.
Lecture three hours a week.
BUSI 3512 [0.5 credit]  
**Derivatives**  
Derivative instruments and their use for speculation and hedging. Analysis of different markets where instruments trade, and their characteristics. Pricing models highlighted to determine how individuals and corporations can better manage risk; exotics and newer innovations.  
Precludes additional credit for BUSI 4512 (no longer offered).  
Prerequisite(s): BUSI 2505 with a grade of C+ or higher, STAT 2606 and ECON 2009 with a grade of C- or higher in each.  
Lecture three hours a week.

BUSI 3600 [0.5 credit]  
**Entrepreneurial Strategies**  
Within the changing environment, an examination of entrepreneurial strategies related to different functional areas for new ventures and small businesses.  
Prerequisite(s): BUSI 2800 with a grade of C- or higher.  
Lecture three hours a week.

BUSI 3602 [0.5 credit]  
**Designing Organizational Systems: An Overview**  
Key models and theories of organizational strategy, structure, processes, effectiveness, and individual and group behavior in organizations. Organizational structure, goals, and effectiveness; leadership, motivation and job design.  
Precludes additional credit for BUSI 2101, BUSI 2702, BUSI 2121. No credit for students in B.Com. or B.I.B. programs.  
Prerequisite(s): third-year standing in the B.P.A.P.M. program.  
Lecture three hours a week.

BUSI 3611 [0.5 credit]  
**Managing the Family Enterprise**  
How family businesses are different, what makes them different and how to effectively manage these differences. Challenges arising from the tension between family and business pressures from governance, management and succession planning perspectives.  
Prerequisite(s): BUSI 1005 or BUSI 1002, and BUSI 2101 or BUSI 2121 or BUSI 2702, and third year standing.  
Lecture three hours a week.

BUSI 3629 [0.5 credit]  
**Corporate Governance and Strategy**  
The role of governance in organizations. Mission and vision statements, values and objectives. Shaping, implementation and evaluation of corporate strategy. Management of risk and environmental analysis.  
Precludes additional credit for BUSI 4609, BUSI 4709. No credit in B.Com. or B.I.B. programs.  
Prerequisite(s): Enrolment in the Post-Baccalaureate Diploma in Accounting, or BUSI 1001 and BUSI 1002, or equivalents.  
Lecture three hours a week.

BUSI 3700 [0.5 credit]  
**Cross-cultural Communication**  
Principles of communication across cultural boundaries are applied to both interpersonal and commercial interactions. Critical incidents and commentary are analyzed. Students submit periodic reports, evaluated by the instructor at Carleton.  
Prerequisite(s): restricted to B.I.B. students who are participating in an academic exchange.  
Online course.

BUSI 3701 [0.5 credit]  
**Practicum in International Business I**  
Students will engage in an approved international experience, abroad or within Canada, that fosters the development of a global mindset. This experience will allow students to integrate and apply the material learned in previous International Business courses.  
Includes: Experiential Learning Activity  
Precludes additional credit for BUSI 4719 and GINS 3930.  
Prerequisite(s): Third-year standing in BIB and permission of the Sprott School of Business.  
Experiential Learning Activity

BUSI 3702 [0.5 credit]  
**Practicum in International Business II**  
Students will engage in an approved international experience, abroad or within Canada, that fosters the development of a global mindset. This experience will allow students to integrate and apply the material learned in previous International Business courses.  
Includes: Experiential Learning Activity  
Precludes additional credit for BUSI 4719 and GINS 3931.  
Prerequisite(s): third-year standing in BIB and permission of the Sprott School of Business.  
Experiential learning activity

BUSI 3703 [0.5 credit]  
**International and Comparative Management**  
The management of large organizations spanning national boundaries, including domestic firms with international markets, and multinational corporations. Difficulties of maintaining communication and control in international operations in disparate cultural settings.  
Prerequisite(s): second-year standing and BUSI 2101 or BUSI 2702 with a grade of C or higher.  
Lecture three hours a week.

BUSI 3704 [0.5 credit]  
**The Environment of International Business**  
Theories linking environmental factors and business strategy as a basis for study of some major factors and institutions shaping international business strategy. International trade patterns, regionalization, shifts in international finance, research and development and transnational data flows.  
Prerequisite(s): third-year standing, and BUSI 2101 or BUSI 2702 with a grade of C or higher; and ECON 1001 and ECON 1002 (or ECON 1000) with a grade of C- or higher in each.  
Lecture three hours a week.
BUSI 3705 [0.5 credit]
International Buyer Behaviour
Behaviour of end-consumers, business and government buyers, and investors in the international context. National, cross-national, and subnational segments and behaviour differences. Adaptation vs. standardisation strategies in the context of socio-psychological, legal, technological, international procurement rules, and other constraints and opportunities.
Prerequisite(s): third-year standing, BUSI 2204 or BUSI 2208, and BUSI 2702 or BUSI 3703.
Lecture three hours a week.

BUSI 3706 [0.5 credit]
International Business Negotiations
Introduction to theory and practice of negotiation in the international business context. Analysis of techniques of conflict resolution and improving ways to reach agreements.
Prerequisite(s): second-year standing and BUSI 2701 or BUSI 2702 with a grade of C- or higher in each.
Lecture three hours a week.

BUSI 3800 [0.5 credit]
Business Case Analysis
Analysis, solution and presentation of complex business issues through cases.
Includes: Experiential Learning Activity
Prerequisite(s): minimum 7.0 Major CGPA in B.Com. or B.I.B. and permission of the Sprott School of Business.
Lecture three hours and tutorial one hour a week.

BUSI 3810 [0.5 credit]
Business Development
Business development, growth and expansion through financing activities and new customer acquisition.
Prerequisite(s): BUSI 2800 with a grade of C- or higher.
Lecture three hours a week.

BUSI 3820 [0.5 credit]
Practicum in Business Design
Students will apply entrepreneurial concepts and engage in designing an entrepreneurial project. Students will prepare in groups a business plan, including in-depth analysis and recommendations.
Includes: Experiential Learning Activity
Prerequisite(s): BUSI 2800 with a grade of C- or higher, and third-year standing.
Lecture three hours a week.

BUSI 3995 [0.0 credit]
Employability Passport III
An advanced course in the knowledge and tools required for a career in Business.
Includes: Experiential Learning Activity
Prerequisite(s): BUSI 2995.
Participation in employability events and initiatives throughout the year.

BUSI 3999 [0.0 credit]
Co-operative Work Term
This course covers the deliverables associated with the co-op work term such as the site visit, work term report submission and employer evaluation.
Includes: Experiential Learning Activity
Prerequisite(s): This course is for students on a university approved co-op work term.

BUSI 4005 [0.5 credit]
Taxation II
An intensive review of federal income tax laws and regulations as significant elements in the planning and decision making process of taxable Canadian corporations. Emphasis on the tax planning function of corporate management and the associated accounting and reporting aspects.
Precludes additional credit for BUSI 2005.
Prerequisite(s): BUSI 3005 with a grade of C- or higher.
Lecture three hours a week.

BUSI 4008 [0.5 credit]
Advanced Management Accounting and Control
Builds on concepts covered in management and cost accounting courses. Integrates relevant issues from other functional areas: strategic uses of cost management, budgeting, and performance evaluation systems in managerial planning and control.
Prerequisite(s): BUSI 3008 with a grade of C- or higher.
Lecture three hours a week.

BUSI 4104 [0.5 credit]
Strategic Human Resources Management
Systems, strategies and practices used to effectively leverage human capital in organizations. How to think strategically about managing human assets, and what must be done to successfully implement these systems, strategies and practices.
Prerequisite(s): BUSI 3102 and BUSI 3103 (with a grade of C- or higher in each).
Lecture three hours per week.

BUSI 4105 [0.5 credit]
Managing Change
An overview of current thinking about change management. Topics covered include understanding the forces for and barriers to change, diagnosing the environment around change and implementing change.
Prerequisite(s): third-year standing and BUSI 2101 or BUSI 2702 or BUSI 3602 or PSYC 2801 with a grade of C- or higher.
Lectures three hours a week.
BUSI 4108 [0.5 credit]
Organizational Learning
Contemporary training and development challenges facing individuals, organizations, and communities and the role of information technology in enhancing individual and collective skills development, capabilities, core competencies, intellectual capital and competitiveness. Prerequisite(s): BUSI 3103 or BUSI 3602 with a grade of C- or higher. Lecture three hours a week.

BUSI 4111 [1.0 credit]
Training and Development
Emphasizes contingency approach to training and development; relevant to organizations of all sizes and resource capacities. Effective training and development is conceptualized as a process that integrates extensive front and back-end planning, implementation, and evaluation activities. Prerequisite(s): third-year standing and BUSI 2101 (or BUSI 2121 or BUSI 2702) with a grade of B- or higher and permission of the Sprott School of Business. Lecture three hours and tutorial one hour per week.

BUSI 4112 [0.5 credit]
Organizational Leadership
Critical examination of theories of leadership and trends in contemporary research; discussion of practical methods for building leadership capacity. Includes: Experiential Learning Activity Prerequisite(s): third-year standing and BUSI 2101 or BUSI 2702 or BUSI 3602 or PSYC 2801 with a grade of C- or higher. Lecture and field work as needed.

BUSI 4117 [1.0 credit]
Creative Thinking
Increases student skills in areas beyond technical expertise, with a focus on the importance of fluidity, risk taking, and idea generation. Emphasis on creativity as a process, with exposure to various techniques and concepts including Design Thinking at multiple levels (individual, group, organization). Includes: Experiential Learning Activity Prerequisite(s): third-year standing and one of BUSI 2101 or BUSI 2702 with a grade of C- or higher and permission of the Sprott School of Business. Lecture three hours a week.

BUSI 4129 [0.5 credit]
Managing the Arts
Challenges of managing arts organizations with emphasis on the changing environment of arts consumption and funding. Tensions arising from blending artistic and aesthetic dimensions with functional considerations when judging organizational and personal issues form a continuing theme. Prerequisite(s): third year standing. Also offered at the graduate level, with different requirements, as MGMT 5129, for which additional credit is precluded. Lecture three hours a week.

BUSI 4201 [0.5 credit]
Marketing Metrics
An overview of essential marketing metrics used for enhancing marketing decisions. The course consists of seven core modules: share metrics, margins and profits, pricing, product and portfolio management, sales force management, promotion profitability, and customer profitability. Prerequisite(s): BUSI 1005 and BUSI 2208. Lecture three hours a week.

BUSI 4203 [0.5 credit]
Marketing In Not-for-Profit Organizations
Theories and practices of marketing in not-for-profit organizations including government. Similarities and differences between marketing in not-for-profit and for-profit organizations, and the key issues faced by marketers in developing marketing strategies in not-for-profit organizations. Prerequisite(s): third-year standing and BUSI 2204 or BUSI 2208 with a grade of C or higher. Lecture three hours a week.

BUSI 4205 [0.5 credit]
International Marketing Strategy
The marketing function in international markets from a strategic and managerial perspective. Environments of foreign markets in relation to marketing research, international branding and positioning, and product, price, distribution, and communication strategies. International expansion methods and foreign market evaluation and selection. Prerequisite(s): third-year standing and BUSI 2204 or BUSI 2208 with a grade of C- or higher. Lecture three hours a week.

BUSI 4208 [0.5 credit]
Marketing Management
In depth analysis and applications of the managerial aspects of marketing. Marketing strategy development and implementation theory and practice. Prerequisite(s): third year standing, BUSI 2208 and one of BUSI 3205 or BUSI 3207 with a grade of C or higher in each. Lecture three hours a week.
BUSI 4209 [0.5 credit]
**Consumer Culture Theory**
Consumer behaviour from a macro and interpretive approach, as a social and cultural phenomenon; the relationships between consumers, the marketplace and cultural meaning.
Precludes additional credit for BUSI 4206 (no longer offered).
Prerequisite(s): third year standing and BUSI 3209 with a grade of C or higher.
Lecture three hours a week.

BUSI 4229 [0.5 credit]
**Marketing in the Arts and Culture Sectors**
Advanced study of marketing within the arts and culture sectors. Facilitates sophisticated understanding of the knowledge and skills required for marketing managers to respond to changing market environments in order to bring arts and culture offerings to their target audiences.
Prerequisite(s): third year standing and BUSI 2204 or BUSI 2208 with a grade of C or higher.
Also offered at the graduate level, with different requirements, as MKTG 5229, for which additional credit is precluded.
Lecture three hours a week.

BUSI 4301 [0.5 credit]
**Decision Models and Analytics**
Management science models and methods in business analytics for decision-making with less risk and better outcomes. Emphasizes on practical applications. Data integration; model formulation, implementation, and solutions, and managerial insights. Applications development and deployment.
Includes: Experiential Learning Activity
Precludes additional credit for BUSI 2300, ECON 4005.
Prerequisite(s): third-year standing and BUSI 2301 with a grade of C or higher.
Lecture three hours and lab one hour per week.

BUSI 4302 [0.5 credit]
**Management of Quality**
Quality concepts and methods surrounding the definition, mapping, implementation, improvement of business processes in organizations and global supply chains.
Prerequisite(s): third-year standing, BUSI 2301 with a grade of C or higher and STAT 2606 with a grade of C- or higher.
Lecture three hours a week.

BUSI 4304 [0.5 credit]
**Procurement and Contracting**
Core supply chain procurement processes in the private and public sectors involved in the acquisition of goods and services, including sourcing, purchasing, contracting, supplier collaboration and relationship development and management. Emphasis on concepts, principles, practices, and techniques.
Prerequisite(s): third-year standing; BUSI 2301 with a C grade or higher.
Lecture three hours a week.

BUSI 4231 [0.5 credit]
**Artificial Intelligence and E-Supply Chain Technologies**
Acquire hands-on skills to design and develop innovative business models and Artificial Intelligence (AI) systems on top of big real-world data aiming to create value and solve problems that would enhance the performance of e-supply chains along its multiple dimensions.
Precludes additional credit for BUSI 4431 (no longer offered).
Prerequisite(s): third year standing and BUSI 2301 and BUSI 2402 with a grade of C or higher in each.
Lecture three hours a week and lab one hour a week.

BUSI 4400 [0.5 credit]
**IS Strategy, Management and Acquisition**
Comprehensive treatment of current trends and management issues associated with information systems within organizations of local, national and international scope. Issues and techniques of information systems planning, administration, resource management and new technology adoption. Case studies are used.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing, BUSI 2400 and BUSI 3103 (or BUSI 3602) with a grade of C- or higher in each.
Lecture three hours a week.

BUSI 4404 [0.5 credit]
**IT Infrastructure**
Challenges and issues managers face in assembling the infrastructure for IT service delivery. IT Service levels, data communications, networks (LAN, MAN, WAN, wireless), internetworking, SOA, web services, SaaS, server and storage virtualization, network security, business continuity and disaster recovery.
Prerequisite(s): third-year standing and BUSI 2400 with a grade of C- or higher.
Lecture three hours a week.

BUSI 4406 [0.5 credit]
**Business Analytics**
Prerequisite(s): third-year standing and BUSI 2400 with a grade of C or higher.
Lecture three hours a week.

BUSI 4408 [0.5 credit]
**Social Analytics**
Covers the process, tool and techniques necessary to acquire, clean and analyze text that has been generated on social platforms. Social network analysis, sentiment analysis, topic extraction, co-occurrence analysis.
Prerequisite(s): BUSI 2400, BUSI 2208, STAT 2607, 3rd year standing. Restricted to students enrolled in B.Com, BIB, and the B.Econ Economic Data Science Concentration.
Lecture three hours a week.
BUSI 4500 [0.5 credit]  
**Advanced Corporate Finance**  
An in-depth examination of some of the major theoretical issues in corporate finance. This course requires analyses and presentations of both articles from the finance literature and case studies.  
Includes: Experiential Learning Activity  
Prerequisite(s): fourth-year standing; and BUSI 3500, BUSI 3502, BUSI 3512 with a grade of C- or higher in each and STAT 2607 with a grade of C- or higher.  
Lecture three hours a week.

BUSI 4502 [0.5 credit]  
**Portfolio Management**  
Analysis of investment requirements for individuals and institutional investors: liquidity, risk and return; portfolio design, construction, management and control; performance measurement; capital market theory.  
Prerequisite(s): fourth-year standing; and BUSI 3500, BUSI 3502 and BUSI 3512 with a grade of C- or higher in each and STAT 2607 with a grade of C- or higher.  
Lecture three hours a week.

BUSI 4505 [0.5 credit]  
**Global Financial Markets and Institutions**  
Comprehensive view of the world’s financial markets and institutions. The primary focus will be on the purpose and practice of financial institutions, and the specifics of the financial instruments available to the firm and investor.  
Prerequisite(s): BUSI 2505 with a grade of C+ or higher, STAT 2606 and ECON 2009 with a grade of C- or higher in each.  
Lecture three hours a week.

BUSI 4510 [0.5 credit]  
**Mergers and Acquisitions**  
The theory and practice of mergers and acquisitions; the best ways to analyze, design and implement mergers and acquisitions transactions. A highly practical planning-based approach to managing the acquisition process will be employed.  
Prerequisite(s): BUSI 3500 and BUSI 3502 with a grade of C- or higher in each, and STAT 2607 with a grade of C- or higher.  
Lecture three hours per week.

BUSI 4511 [0.5 credit]  
**Fixed Income Analysis**  
Valuation of fixed income securities and interest rate derivatives including bonds, mortgage- and asset-based securities. Analytic tools used in bond portfolio and interest rate risk management including yield curve construction, duration and convexity, and term structure models.  
Prerequisite(s): BUSI 3502, BUSI 3512 with a grade of C- or higher in each, and STAT 2607 with a grade of C- or higher.  
Lecture three hours a week.

BUSI 4601 [0.5 credit]  
**Business Ethics**  
Use of ethical reasoning to analyze business decisions. The ethical content of these decisions. The role of ethics in business situations. Practice in ethical reasoning. Major ethical systems.  
Prerequisite(s): BUSI 2505.  
Lecture three hours a week.
BUSI 4607 [0.5 credit]
Management of Technology and Innovation
Integration of technology and strategy; design of technological strategy; development of new business around new technology; and management of corporate research and development, including pre-competitive consortia.
Prerequisite(s): third-year standing, and BUSI 2204 or BUSI 2208, and BUSI 3103 with a grade of C- or higher in each.
Lecture three hours a week.

BUSI 4608 [0.5 credit]
Canadian Business History
The place of business in Canadian society, economics and politics. The internal dynamics of Canadian business (organization, strategy, the rise of the manager), and its external implications (competition, foreign investment, business-government relations).
Also listed as HIST 3205.
Prerequisite(s): fourth-year standing in B.Com. or B.I.B.
Lectures three hours a week.

BUSI 4609 [0.5 credit]
Strategic Management
Analysis and evaluation of the organization’s corporate and business strategies; integration and synthesis of knowledge acquired in the program by application of acquired functional skills to strategic decision making.
Precludes additional credit for BUSI 3629, BUSI 4709.
Prerequisite(s): fourth-year standing in all B.Com. and successful completion of all 2000- and 3000-level courses in the Major requirement. Note that B.Com. concentration in International Business students require BUSI 4709.
Lectures three hours a week.

BUSI 4704 [0.5 credit]
The Business Environment in Europe
The economic, political, legal, and cultural environment for doing business in the European Union and other regions in Europe. Patterns of foreign trade and investment, market characteristics, science and technology, regulation and European integration, and business culture.
Also listed as EURR 4704.
Precludes additional credit for EURR 4006 (no longer offered), BUSI 4604 (no longer offered).
Prerequisite(s): third-year standing.
Seminar three hours a week.

BUSI 4705 [0.5 credit]
Ethics and Cross-cultural Interaction
Perceptions and behaviors that characterize interactions among individuals from various cultural backgrounds, with emphasis on ethical issues that may arise when business crosses cultural boundaries. Various systems, both organizational and individual, for dealing with contrasting expectations are discussed.
Precludes additional credit for BUSI 4601.
Prerequisite(s): fourth-year standing in B. Com. (International Business Concentration) or B.I.B., and BUSI 2702 or BUSI 3703.
Lecture three hours a week.

BUSI 4706 [0.5 credit]
International Human Resource Management
Theoretical and process issues in the recruitment, selection, training, evaluation and repatriation of personnel in multi-country organizations. Issues are examined from the perspective of organizations, expatriates and local employees of multinational firms.
Prerequisite(s): third-year standing, BUSI 3102, and one of BUSI 2702 or BUSI 3703.
Lecture three hours a week.

BUSI 4707 [0.5 credit]
Regionalism and Globalization
Trends in globalization versus supra- and sub-national regionalism. Role of international institutions (e.g. OECD, WTO). Strategy adaptation and integration within and across trade blocs (e.g. NAFTA, EU, Mercosur, ASEAN). Strategies for sub-national markets with similarities across different countries.
Prerequisite(s): third-year standing in B.Com., B.I.B., or Minor in Business, and BUSI 2701 or BUSI 2702.
Lectures three hours a week.

BUSI 4708 [0.5 credit]
International Expansion and Operations
Internationalization process. Methods of international expansion including exporting, greenfield investment, acquisition, joint venture, and licensing. Theories of international market selection, investment location, and market service.
Prerequisite(s): fourth-year standing, and BUSI 2702 or BUSI 3703.
Lecture three hours a week.

BUSI 4709 [0.5 credit]
Strategic Management for International Business
Development and implementation of strategies within and across international markets. Emphasis on developing strategic perspectives that incorporate the environment, the state of the industry, and the capabilities of the firm. Integrates skills, concepts and theories learned in functional areas.
Precludes additional credit for BUSI 3629, BUSI 4609.
Prerequisite(s): fourth-year standing in B.Com. (International Business Concentration) or B.I.B., and successful completion of all 2000- and 3000-level courses in the Major requirement.
Lectures three hours a week, tutorial one hour a week.

BUSI 4710 [0.5 credit]
International New Ventures
Challenges facing entrepreneurs in the creation and growth of competitive knowledge-based new international ventures or ‘born globals’. Identification of opportunities abroad, strategies and logistics, sourcing, international deal making and business models.
Prerequisite(s): BUSI 2702 or BUSI 3703, and third-year standing.
Lecture three hours a week.
BUSI 4717 [0.5 credit]
Managing Globalization in Emerging Economies
Critical examination of the managerial and institutional issues of globalization from the perspectives of emerging economies. Indigenous and international institutions' role in the evolution of a competitive and inclusive global economy and society. Discerning lessons of experience for newly globalizing societies.
Precludes additional credit for BUSI 4902 (no longer offered).
Prerequisite(s): fourth year standing in B.Com, BIB, or Minor in Business, ECON 1001 and ECON 1002 (or ECON 1000).
Lectures three hours a week.

BUSI 4719 [0.5 credit]
Practicum in International Business
Students will engage in an approved international experience, abroad or within Canada (can include SSCG), that fosters the development of a global mindset. This experience will allow students to integrate and apply the material learned in previous International Business courses.
Includes: Experiential Learning Activity
Precludes additional credit for BUSI 3701, BUSI 3702.
Prerequisite(s): third-year standing in B.Com. International Business concentration and permission of the Sprott School of Business.

BUSI 4800 [0.5 credit]
Sprott Student Consulting II
An experiential work environment in which students interact with real clients as a consultant. Various types of projects are possible depending on the company and their goals/needs. Companies may be internal (i.e. Carleton, Sprott), or external (i.e. not for profit, for profit, start-ups, entrepreneurs).
Includes: Experiential Learning Activity
Prerequisite(s): Permission of the Sprott School of Business.
Also offered at the graduate level, with different requirements, as BUSI 5997, for which additional credit is precluded.
Significant industry/project/service consultancy exposure.

BUSI 4810 [0.5 credit]
Practicum in Business Creation
Students apply concepts and engage in groups to implement the design of an entrepreneurship project per their business plan developed in BUSI 3820. The projects provide opportunities for experiential learning.
Includes: Experiential Learning Activity
Prerequisite(s): BUSI 3820.
Lectures three hours per week.

BUSI 4901 [0.5 credit]
Topics in Business I
A selected topics course may be offered. Topics may vary. Consult the School’s website for available topics and prerequisite information. Eligibility for this course to serve as an option for specific concentrations is to be established by the School.
Prerequisite(s): Vary based on section. Please refer to sprott.carleton.ca/registration for section specific prerequisites.
Lecture three hours a week.

BUSI 4902 [0.5 credit]
Topics in Business II
A selected topics course may be offered. Topics may vary. Consult the School’s website for available topics and prerequisite information. Eligibility for this course to serve as an option for specific concentrations is to be established by the School.
Prerequisite(s): Vary based on section. Please refer to sprott.carleton.ca/registration for section specific prerequisites.
Lecture three hours a week.

BUSI 4904 [1.0 credit]
Directed Studies I
Reading course on select topics. Students interested in pursuing this course need to contact a faculty member to discuss a proposed directed study.
Prerequisite(s): fourth-year standing in B.Com. or B.I.B. and permission of the School of Business.

BUSI 4905 [0.5 credit]
Directed Studies II
Reading course on select topics. Students interested in pursuing this course need to contact a faculty member to discuss a proposed directed study.
Prerequisite(s): fourth-year standing in B.Com. or B.I.B. and permission of the School of Business.

BUSI 4906 [1.0 credit]
Research Project for Business
Provides students with opportunity to conduct research in their area of interest and present the research in an undergraduate thesis format. Conducted under the supervision of a faculty advisor from Sprott, with the specific deliverable determined by Supervisor and student, and approved by Sprott School.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.Com. or B.I.B. and permission of the School of Business.

BUSI 4995 [0.0 credit]
Employability Passport IV
An advanced course in the knowledge and tools required for a career in Business.
Includes: Experiential Learning Activity
Prerequisite(s): BUSI 3995.
Participation in employability events and initiatives throughout the year.
Canadian Studies

This section presents the requirements for programs in:

- Canadian Studies B.A. Honours
- Canadian Studies B.A. Combined Honours
- Indigenous Studies B.A. Combined Honours
- Canadian Studies B.A.
- Minor in Canadian Studies
- Minor in Indigenous Studies
- Minor in Heritage and Conservation
- Minor in Quebec Studies
- Mention Français: Canadian Studies Honours
- Mention Français: Canadian Studies Combined Honours
- Mention Français: Canadian Studies Honours

Program Requirements

Canadian Studies

B.A. Honours (20.0 credits)

A. Credits Included in the Major CGPA (9.0 credits)

1. 1.0 credit from:

- CDNS 1000 [0.5] Introduction to Canadian Studies
- CDNS 1001 [0.5] Studying Canada
- CDNS 1002 [0.5] Themes in the Study of Canada
- CDNS 1101 [0.5] Ottawa: Exploring National Institutions
- CDNS 1102 [0.5] Introduction to Canada and the World
- FYSM 1409 [1.0] Social Change in Canada
- FYSM 1600 [1.0] Contemporary Controversies in Canadian Society
- or other 1000-level or FYSM courses approved by the School of Indigenous and Canadian Studies
- INDG 1010 [0.5] Introduction to Indigenous Peoplehood Studies
- INDG 1011 [0.5] Introduction to Indigenous-Settler Encounters

2. 1.5 credits in:

- CDNS 2000 [0.5] Debating Canada
- CDNS 3000 [0.5] Producing Knowledge
- CDNS 4000 [0.5] Capstone Seminar in Advanced Research in Canadian Studies

3. 0.5 credit from:

- CDNS 2210 [0.5] Introduction to the Study of Canadian Culture
- CDNS 2300 [0.5] Critical Nationalism
- CDNS 2400 [0.5] Heritage Conservation in Canada
- CDNS 2510 [0.5] Introduction to Québec Society (English version)
- CDNS 2511 [0.5] Introduction à la société et à la culture québécoises (version française)
- CDNS 2600 [0.5] Branding Canada
- INDG 2011 [0.5] Contemporary Indigenous Studies
- INDG 2012 [0.5] Anishinaabeg Studies
- INDG 2013 [0.5] Haudenosaunee Studies

4. 0.5 credit from:

- CDNS 3400 [0.5] Feminists and Feminism in Canada
- CDNS 3550 [0.5] Interfaces between English and French Canadian Cultures
- CDNS 3600 [0.5] Cultural Politics and Identities in Canada
- CDNS 3610 [0.5] The Canadian Political Economy Tradition
- CDNS 3620 [0.5] Canada-US Relations
- CDNS 3700 [0.5] Cultural Traditions in Canada
- CDNS 3901 [0.5] Selected Topics in Canadian Studies
- INDG 3901 [0.5] Selected Topics in Indigenous Studies
- INDG 3001 [0.5] Indigenous Governance
- INDG 3011 [0.5] Indigenous Rights, Resistance, and Resurgence
- INDG 3015 [0.5] Indigenous Ecological Ways of Knowing and the Academy

5. 0.5 credit from:

- CDNS 4010 [0.5] Language, Culture, and Power in Canada
- CDNS 4200 [0.5] Canadian Popular Culture
- CDNS 4300 [0.5] Contested Spaces and Communities
- CDNS 4400 [0.5] Cultural Landscape and Cultural Identity in Canada
- CDNS 4500 [0.5] Canada and the World
- CDNS 4510 [0.5] Québec Studies
- INDG 4001 [0.5] Indigeneity in the City
- INDG 4011 [0.5] Indigenous Representations

6. 1.0 credit at the 4000-level, from the list of Approved Canadian Studies or Indigenous Studies Electives below

7. 4.0 credits from the list of Approved Canadian Studies or Indigenous Studies Electives below

B. Credits Not Included in the Major CGPA (11.0 credits)

8. 8.0 credits not in Canadian Studies or Indigenous Studies

9. 3.0 credits in free electives

C. Additional Requirements

10. The School of Indigenous and Canadian Studies language requirement must be met.

Total Credits

20.0

Canadian Studies

B.A. Combined Honours (20.0 credits)

A. Credits Included in the Major CGPA (7.0 credits)

1. 1.0 credit from:

- CDNS 1000 [1.0] Introduction to Canadian Studies
- CDNS 1001 [0.5] Studying Canada
- CDNS 1002 [0.5] Themes in the Study of Canada
- CDNS 1101 [0.5] Ottawa: Exploring National Institutions
- CDNS 1102 [0.5] Introduction to Canada and the World
- FYSM 1409 [1.0] Social Change in Canada
### Indigenous Studies

**B.A. Combined Honours (20.0 Credits)**

**A. Credits Included in the Indigenous Studies Major (7.0 credits)**

1. **1.0 credit in:**
   - INDG 1010 [0.5] Introduction to Indigenous Peoplehood Studies
   - INDG 1011 [0.5] Introduction to Indigenous-Settler Encounters

2. **1.5 credits from:**
   - INDG 2011 [0.5] Contemporary Indigenous Studies
   - INDG 2015 [0.5] Indigenous Ecological Ways of Knowing
   - INDG 2020 [0.5] Decolonizing Gender, Sex, and Sexuality

3. **1.0 credit from:**
   - INDG 3001 [0.5] Indigenous Governance
   - INDG 3015 [0.5] Indigenous Ecological Ways of Knowing and the Academy

4. **1.0 credit in:**
   - INDG 4001 [0.5] Indigeneity in the City
   - INDG 4011 [0.5] Indigenous Representations

5. **1.5 credits from:**
   - CDNS 2000 [0.5] Debating Canada
   - CDNS 3000 [0.5] Producing Knowledge
   - CDNS 4000 [0.5] Capstone Seminar in Advanced Research in Canadian Studies

6. **1.0 credit at the 4000-level, from the list of Approved Canadian Studies or Indigenous Studies Electives below**

7. **1.5 credits from the list of Approved Canadian Studies or Indigenous Studies Electives below**

8. The requirements for Combined Honours in the other discipline must be satisfied

9. Sufficient free electives to achieve a total of 20.0 credits for the program

10. The School of Indigenous and Canadian Studies language requirement must be met.

### Canadian Studies

**B.A. (15.0 credits)**

**A. Credits Included in the Major CGPA (7.0 credits)**

1. **1.0 credit from:**
   - CDNS 1000 [1.0] Introduction to Canadian Studies
   - CDNS 1001 [0.5] Studying Canada
   - CDNS 1002 [0.5] Themes in the Study of Canada
   - CDNS 1101 [0.5] Ottawa: Exploring National Institutions
   - CDNS 1102 [0.5] Introduction to Canada and the World
   - FYSM 1409 [1.0] Social Change in Canada

2. **1.0 credit in:**
   - CDNS 1010 [0.5] Indigenous Rights, Resistance, and Resurgence
   - CDNS 1011 [0.5] Indigenous Governance
   - CDNS 1015 [0.5] Indigenous Ecological Ways of Knowing and the Academy

3. **1.0 credit from:**
   - CDNS 2000 [0.5] Debating Canada
   - CDNS 3000 [0.5] Producing Knowledge
   - CDNS 4000 [0.5] Capstone Seminar in Advanced Research in Canadian Studies

4. **1.5 credits from:**
   - CDNS 2011 [0.5] Contemporary Indigenous Studies
   - CDNS 2015 [0.5] Indigenous Ecological Ways of Knowing
   - CDNS 2020 [0.5] Decolonizing Gender, Sex, and Sexuality

5. **1.5 credits from:**
   - CDNS 3001 [0.5] Indigenous Governance
   - CDNS 3015 [0.5] Indigenous Ecological Ways of Knowing and the Academy

6. **1.0 credit at the 4000-level, from the list of Approved Canadian Studies or Indigenous Studies Electives below**

7. The requirements for Combined Honours in the other discipline must be satisfied

8. Sufficient free electives to achieve a total of 20.0 credits for the program
**Minor in Canadian Studies (4.0 credits)**

The Minor in Canadian Studies is open to all undergraduate degree students not in Canadian Studies programs.

**Requirements:**

1. **1.0 credit from:**
   - CDNS 1000 [0.5] Introduction to Canadian Studies

Mention : Français

Students who wish to qualify for the Mention : Français notation in Canadian Studies may do so by fulfilling the requirements listed below, in consultation with the Undergraduate Supervisor. Courses taken for the Mention : Français notation may be used to fulfill the Canadian Studies B.A. or the Canadian Studies B.A. Combined Honours program requirements.

Courses taught in French at the University of Ottawa or at another university and which are approved by the Undergraduate Supervisor may be used to satisfy Mention : Français requirements. Students who wish to enrol in University of Ottawa courses for this purpose must do so through the University of Ottawa Exchange Agreement. To enroll in courses in French at another university, a Letter of Permission is required from the Registrar’s Office.

Mention Français: Canadian Studies Honours (4.0 credits)

To graduate with the notation Mention : Français, Honours and Combined Honours students must include the following courses in their degree program:

1. 1.0 credit in the advanced study of the French language 1.0
2. 1.0 credit in French-Canadian culture and heritage such as:
   - FREN 2202 [0.5] Introduction aux études littéraires 1
   - FREN 2203 [0.5] Introduction aux études littéraires 2
   - FREN 2401 [1.0] Introduction à la linguistique française
or a course in another appropriate discipline, given in French, which is approved by the Undergraduate Supervisor. Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.

3. 1.0 credit on a Canadian subject at the 2000- or 3000-level, taught in French, in any appropriate discipline. For Carleton University courses that may be used to fulfill this requirement, consult the list of Approved Canadian Studies Electives (below). Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.

4. 1.0 credit on a Canadian subject at the 4000-level, taught in French, including either:
   - CDNS 4903 [0.5] Études dirigées I
   - CDNS 4904 [0.5] Études dirigées II
or a directed studies, tutorial, research paper, or course in any appropriate discipline.

Total Credits 4.0

Notes:

1. All written work must be submitted in French. Note that directed studies, tutorials, and research papers are weighted differently in various departments. Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.

Mention Français: Canadian Studies Combined Honours (4.0 credits)

To graduate with the notation Mention : Français, Combined Honours students must include the following courses in their degree program:

1. 1.0 credit in the advanced study of the French language 1.0
2. 1.0 credit in French-Canadian culture and heritage such as:
   - FREN 2202 [0.5] Introduction aux études littéraires 1
   - FREN 2203 [0.5] Introduction aux études littéraires 2
   - FREN 2401 [1.0] Introduction à la linguistique française

Total Credits 4.0

Notes:

1. All written work must be submitted in French. Note that directed studies, tutorials, and research papers are weighted differently in various departments. Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.
or a course in another appropriate discipline, given in French, which is approved by the Undergraduate Supervisor. Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.

3. 1.0 credit on a Canadian subject at the 2000- or 3000-level, taught in French, in any appropriate discipline. For Carleton University courses that may be used to fulfill this requirement, consult the list of Approved Canadian Studies Electives (below). Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.

4. 1.0 credit on a Canadian subject at the 4000-level, taught in French, including either:

or a course in another appropriate discipline, given in French, which is approved by the Undergraduate Supervisor. Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.

3. 1.0 credit on a Canadian subject at the 2000- or 3000-level, taught in French, in any appropriate discipline. For Carleton University courses that may be used to fulfill this requirement, consult the list below of Approved Canadian Studies Electives. Courses from the University of Ottawa or another university must be approved by the Undergraduate Supervisor.

Total Credits: 3.0

Approved Canadian Studies Electives

The following courses are deemed by the School of Indigenous and Canadian Studies to have significant Canadian content, and can be included where appropriate as part of a Canadian Studies degree. Carleton courses not on this list may be applied as approved Canadian Studies electives, but they must be approved by the Undergraduate Supervisor. Students taking courses at the University of Ottawa should consult with the Undergraduate Supervisor to gain approval for substituting them as approved Canadian Studies electives.

**Social Work**

- SOWK 4102 [0.5] Indigenous Peoples and Social Policy

**South Asian Studies**

- SAST 1001 [0.5] Introduction to South Asian Studies I
- SAST 1002 [0.5] Introduction to South Asian Studies II

**Women’s and Gender Studies**

- WGST 2800 [0.5] Intersectional Identities
- WGST 3803 [0.5] Feminisms and Transnationalism
- WGST 3807 [0.5] Gendered Violence

**Language Requirement**

The School of Indigenous and Canadian Studies requires students in its Honours, Combined Honours and 15 credit programs to demonstrate proficiency in a language other than English, normally French or an Indigenous language. Proficiency is normally demonstrated through the completion of 1.0 credit in FREN, or FINS 2105 and FINS 3105; or approved equivalent. For students who consider that they have proficiency in French, the School of Canadian Studies conducts a French language examination in September and January. For students who consider that they have proficiency in an Indigenous language, the onus is on the student to provide suitable documentary evidence of proficiency to the School of Canadian Studies.

**B.A. Regulations**

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

**First-Year Seminars**

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

**Breadth Requirement**

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

**Breadth Area 1: Culture and Communication**

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

**Subject codes:** ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESNA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

**Breadth Area 2: Humanities**

**Subject codes:** AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

**Breadth Area 3: Science, Engineering, and Design**

**Subject codes:** AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOL, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECON, ELEC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, SYS, ITEC, MAAE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

**Breadth Area 4: Social Sciences**

**Subject codes:** ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

**Declared and Undeclared Students**
Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

**Change of Program Within the B.A. Degree**
Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

**Minors, Concentrations and Specializations**
Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

**Mention : Français**
Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:
1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:
1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfill the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

**Admissions Information**
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific
course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

• Bachelor of Arts (B.A.)(Honours)
• Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.
The six 4U or M courses must include a 4U course in English (or anglais ). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement.
Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Advanced Standing

B.A. and B.A. (Honours) Program
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Canadian Studies (CDNS) Courses

CDNS 1000 [1.0 credit]
Introduction to Canadian Studies
Introduction to interdisciplinary Canadian Studies and diversity's role in defining Canada. Examination of the relationship between national identity and values in an evolving Canada. Topics include: Indigenous peoples, language and ethnicity, race, technology, gender, the arts, and international relations.
Two hour lecture, one hour weekly discussion group.

CDNS 1001 [0.5 credit]
Studying Canada
Introduction to interdisciplinary Canadian Studies and approaches to the critical study of Canada.
Lectures/groups three hours a week.

CDNS 1002 [0.5 credit]
Themes in the Study of Canada
Examination of various themes and issues that affect Canadians and Canadian society. Topics may include Indigenous peoples, literature, language and ethnicity, race, gender, culture and cultural producers, the environment, and international relations.
Lectures/groups three hours a week.

CDNS 1101 [0.5 credit]
Ottawa: Exploring National Institutions
An interdisciplinary examination of Ottawa, looking at its history, evolution, and role as Canada's capital. This course investigates various national institutions related to public policy, governance, history, culture and the arts.
Field trips and topics vary from year to year.
Includes: Experiential Learning Activity
Lecture/groups three hours a week.

CDNS 1102 [0.5 credit]
Introduction to Canada and the World
Introductory examination of interdisciplinary themes, ideas, and debates related to Canada and its place in the world.
Topics vary from year to year.
Lecture/groups three hours a week.

CDNS 2000 [0.5 credit]
Debating Canada
An in-depth examination of key debates that have shaped the nature of Canada, focusing on major thinkers and the debates their ideas produced. Topics vary annually.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lectures/groups three hours a week.

CDNS 2210 [0.5 credit]
Introduction to the Study of Canadian Culture
The challenges of constructing a national culture in Canada. Topics may include: colonialism and its cultural legacies, cultural nationalism, cultural policies and institutions, popular culture, technology, regionalism, fears of Americanization, gender, multiculturalism, globalization and cultural hybridity.
Precludes additional credit for CDNS 2200.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lectures/groups three hours a week.
CDNS 2300 [0.5 credit]
Critical Nationalism
This course questions whether a national identity is possible or even desirable within an increasingly diverse and complex Canada. Examination of the construction of Canadian identities, competing nationalism within Canadian borders and critical evaluation of the role of nationalism.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lectures/groups three hours a week.

CDNS 2400 [0.5 credit]
Heritage Conservation in Canada
Approaches to heritage conservation. Topics include built heritage, movable heritage, collections and museums, and intangible heritage. Heritage as a source of memory and identity in Canadian and Aboriginal life.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lectures/groups three hours a week.

CDNS 2510 [0.5 credit]
Introduction to Québec Society (English version)
This course surveys geographical, historical, demographic, cultural, political and social developments in Québec, relations with English Canada and debates on identity and nationalism. Also available in French as CDNS 2511/ FINS 2511.
Also listed as FINS 2510.
Precludes additional credit for CDNS 2511 and FINS 2511.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lectures/groups three hours per week.

CDNS 2511 [0.5 credit]
Introduction à la société et à la culture québécoises (version française)
Ce cours permettra de découvrir et d'analyser des référents dominants de la trame historique du Québec de même que les débats entourant l'identité et le nationalism et les relations avec le Canada anglais.
Also listed as CDNS 2510/FINS 2510 (English), FINS 2511 (French).
Precludes additional credit for CDNS 2510/ FINS 2510.
Prerequisite(s): niveau de deuxième année ou permission de L'École d'études canadiennes.
Exclusivement en ligne. Équivalent d'un cours de trois heures par semaine, accessible toute la semaine.

CDNS 2600 [0.5 credit]
Branding Canada
What does it mean to sell a country the same way one sells coffee? This course examines the rise of national-branding in Canada. It discusses the ways governments brand Canada internationally and domestically and the ways corporations brand themselves as "Canadian" to customers.
Two hour lecture and one hour discussion group a week.

CDNS 3000 [0.5 credit]
Producing Knowledge
Investigates the theory and methods used in qualitative approaches to research, offering hands-on experience and discussion of the underlying beliefs and claims implicit in scholarly work. Examines the ethical and practical dilemmas confronting researchers and develops student skills in gathering, interpreting, and presenting knowledge.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Canadian Studies or permission of the School of Indigenous and Canadian Studies.
Seminar three hours a week.

CDNS 3400 [0.5 credit]
Feminists and Feminism in Canada
Interdisciplinary examination of feminism's impact on Canadian history, culture and politics, and Canadian approaches to feminism in a global context. Surveys the role of feminist thinkers, activists and organizations in shaping Canadian society.
Also listed as WGST 3400.
Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies.
Seminar three hours a week.

CDNS 3550 [0.5 credit]
Interfaces between English and French Canadian Cultures
Exploration of intercultural encounters between French and English Canadians in political, popular and "official" cultures, through an examination of media, art, music, literature, cinema and the built environment.
Also listed as FINS 3550.
Precludes additional credit for CDNS 2500 and FINS 2500.
Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies.
Seminar three hours a week.

CDNS 3600 [0.5 credit]
Cultural Politics and Identities in Canada
Interdisciplinary study of questions related to identity, belonging, and Canadianness. Intersections of individual and group dimensions of "being Canadian" and state efforts to define the Canadian identity. Topics may include: religion, sexuality, immigrant and diasporic relations, race and ethnicity, region, nationalisms, and multiculturalism.
Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies.
Seminar three hours a week.

CDNS 3610 [0.5 credit]
The Canadian Political Economy Tradition
An examination of the political economy tradition in Canada, looking at explanations of Canada's political, economic, social and cultural development, and Canada's evolving position in the global economy.
Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies.
Seminar three hours a week.
CDNS 3620 [0.5 credit]  
*Canada-US Relations*  
Comparative, interdisciplinary examination of Canada and the United States, including the evolution of the Canada-US relationship. Historical, sociological, cultural, and political approaches are used. Topics covered may include the economy, defence, foreign policy, diplomacy, borderlands, Indigenous peoples, and culture.  
Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies.  
Seminar three hours a week.

CDNS 3700 [0.5 credit]  
*Cultural Traditions in Canada*  
Aspects of cultural heritage, folklore and/or cultural traditions in Canadian folk art, music, dance, storytelling and performance. The genesis of these various expressions, and the cultural contexts that have ensured their survival.  
Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies.  
Seminar three hours a week.

CDNS 3901 [0.5 credit]  
*Selected Topics in Canadian Studies*  
Topics vary from year to year.  
Prerequisite(s): permission of the School of Indigenous and Canadian Studies.  
Seminar three hours a week.

CDNS 4000 [0.5 credit]  
*Capstone Seminar in Advanced Research in Canadian Studies*  
Emphasis on refining analytic and research skills, including teamwork skills and using knowledge to solve problems outside the university. Students will engage in a collective research project in partnership with a local, national or international organization.  
Includes: Experiential Learning Activity  
Prerequisite(s): CDNS 3000 and fourth-year standing in Canadian Studies or permission of the School of Indigenous and Canadian Studies.  
Seminar three hours a week.

CDNS 4010 [0.5 credit]  
*Language, Culture, and Power in Canada*  
The relationship between language use and political, economic, and cultural power in Canada. Topics may include cultural and linguistic pluralism, bilingualism, Aboriginal language revitalization, discourses of endangerment, the role of media and the state and in legitimizing language use.  
Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies.  
Seminar three hours a week.

CDNS 4200 [0.5 credit]  
*Canadian Popular Culture*  
An interdisciplinary seminar using cultural studies methods to explore how popular cultural texts, images, rituals and practices are constructed, disseminated, regulated, consumed and reappropriated by Canadian institutions, corporations, cultural groups and individuals.  
Prerequisite(s): fourth-year honours standing, or permission of the School.  
Seminar three hours a week.

CDNS 4300 [0.5 credit]  
*Contested Spaces and Communities*  
Exploration of the relationship between space, culture, and identities in Canada. Analysis of concepts, practices and conflicts which may include: urban/rural space, the suburbs, regionalism, gender and space, public/private space, national spaces, borderlands, Indigenous territories, cultural survival, collective identity, and memory.  
Prerequisite(s): fourth-year honours standing or permission of the School of Indigenous and Canadian Studies.  
Seminar three hours a week.

CDNS 4400 [0.5 credit]  
*Cultural Landscape and Cultural Identity in Canada*  
Cultural landscape appreciation and the development of Canadian individual and collective cultural identities, through the lenses of history, geography, planning, and representational/literary sources of expression. Cultural landscapes as a tool for understanding physical and mental landscapes and their shaping of identity.  
Precludes additional credit for CDNS 3200.  
Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies.  
Seminar three hours a week.

CDNS 4403 [0.5 credit]  
*Heritage Conservation and Sustainability*  
Exploration of the recent shift in heritage conservation discourse that embraces objectives of environmental, social, and economic sustainability. Investigation of synergies and gaps between natural and cultural conservation ideas. Introduction to theory, principles and practices through analysis of Canadian and international research, policy and projects.  
Includes: Experiential Learning Activity  
Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies.  
Also offered at the graduate level, with different requirements, as CDNS 5403, for which additional credit is precluded.  
Seminar three hours a week.
CDNS 4500 [0.5 credit]
Canada and the World
Interdisciplinary examination of Canada's role in the global political economy and its impact on issues such as work, community, public services, and the state.
Precludes additional credit for CDNS 3301.
Prerequisite(s): fourth-year honours standing or permission of the School of Indigenous and Canadian Studies.
Seminar three hours a week.

CDNS 4510 [0.5 credit]
Québec Studies
Advanced seminar focusing on selected aspects of Québec history, society, culture and/or politics.
Also listed as FINS 4510.
Precludes additional credit for CDNS 3510 (no longer offered), FINS 3510 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies.
Seminar three hours a week.

CDNS 4800 [1.0 credit]
Internship Practicum
Practicum placements are available in institutional settings, primarily in the Ottawa area. Students must meet regularly with the academic evaluator and submit a final written report. A maximum of 1.0 practicum credits may be taken in fulfillment of Canadian Studies requirements.
Includes: Experiential Learning Activity
Precludes additional credit for CDNS 3800, CDNS 3801, CDNS 3802 and CDNS 3803.
Prerequisite(s): permission of the School and fourth-year Honours standing in an Indigenous and Canadian Studies program.

CDNS 4801 [0.5 credit]
Internship/Practicum
Practicum placements are available in institutional settings, primarily in the Ottawa area. Students must meet regularly with the academic evaluator and submit a final written report. A maximum of 1.0 practicum credits may be taken in fulfillment of Canadian Studies requirements.
Includes: Experiential Learning Activity
Precludes additional credit for CDNS 3800, CDNS 3801, CDNS 3802 and CDNS 3803.
Prerequisite(s): permission of the School and fourth-year Honours standing in a Indigenous and Canadian Studies program.

CDNS 4802 [0.5 credit]
Internship/Practicum
Practicum placements are available in institutional settings, primarily in the Ottawa area. Students must meet regularly with the academic evaluator and submit a final written report. A maximum of 1.0 practicum credits may be taken in fulfillment of Canadian Studies requirements.
Includes: Experiential Learning Activity
Precludes additional credit for CDNS 3800, CDNS 3801, CDNS 3802 and CDNS 3803.
Prerequisite(s): permission of the School and fourth year Honours standing in an Indigenous and Canadian Studies program.

CDNS 4901 [0.5 credit]
Selected Topics in Canadian Studies
Topics vary from year to year.
Prerequisite(s): permission of the School of Indigenous and Canadian Studies.

CDNS 4902 [0.5 credit]
Selected Topics in Canadian Studies
Topics vary from year to year.
Prerequisite(s): permission of the School of Indigenous and Canadian Studies.

CDNS 4903 [0.5 credit]
Études dirigées I
Cours facultatif offert seulement aux étudiants de quatrième année Honours en Études canadiennes (Mention : Français). Ce cours comprend des lectures dirigées et des travaux écrits dans un domaine relié aux Études canadiennes.
Prerequisite(s): permission of the School of Indigenous and Canadian Studies.

CDNS 4904 [0.5 credit]
Études dirigées II
Cours facultatif offert seulement aux étudiants de quatrième année Honours en Études canadiennes (Mention : Français). Ce cours comprend des lectures dirigées et des travaux écrits dans un domaine relié aux Études canadiennes.
Prerequisite(s): permission of the School.

CDNS 4905 [0.5 credit]
Directed Studies I
An optional course normally restricted to fourth-year Honours students in Canadian Studies and to Qualifying-year Graduate students. Includes supervised reading and written work in a Canadian Studies area.
Prerequisite(s): permission of the School of Indigenous and Canadian Studies.
CDNS 4906 [0.5 credit]
Directed Studies II
An optional course normally restricted to fourth-year Honours students in Canadian Studies and to Qualifying-year graduate students. Includes supervised reading and written work in a Canadian Studies area.
Prerequisite(s): permission of the School of Indigenous and Canadian Studies.

CDNS 4907 [1.0 credit]
Directed Studies III
An optional course normally restricted to fourth-year Honours students in Canadian Studies and to Qualifying-year graduate students. Includes supervised reading and written work in a Canadian Studies area.
Prerequisite(s): permission of the School of Indigenous and Canadian Studies.

Indigenous Studies (INDG) Courses
INDG 1000 [1.0 credit]
Introduction to Indigenous Studies
Survey of historical and contemporary issues relating to Indigenous peoples in Canada. Cultural traditions and the social interactions between Indigenous and non-Indigenous societies are approached from an interdisciplinary perspective.
Precludes additional credit for INDG 1010 and INDG 1011.
Online only.

INDG 1010 [0.5 credit]
Introduction to Indigenous Peoplehood Studies
This course begins by looking at Creation Stories of different Indigenous peoples and builds to discuss Indigenous worldviews, ways of living, ecological relationships, inter-Indigenous relations and diplomacy among Indigenous peoples. Course materials are rooted in self-situated and collective understandings of Indigenous peoples.
Precludes additional credit for INDG 1000.
Lecture/groups, three hours a week.

INDG 1011 [0.5 credit]
Introduction to Indigenous-Settler Encounters
An interdisciplinary examination of the history of relations between different Indigenous peoples and settler populations from first meetings to the mid-20th century. Topics vary by year, but may include diplomatic relations, trade, spirituality and religion, military alliances, policy, education.
Precludes additional credit for INDG 1000.
Lecture/groups, three hours a week.

INDG 2011 [0.5 credit]
Contemporary Indigenous Studies
Indigenous and non-Indigenous perspectives on issues since the 1960s. Topics include: contemporary explorations of treaty relationship and governance, cultural appropriation, identity politics, urban Aboriginality and contemporary social and cultural issues.
Precludes additional credit for CDNS 2100 and CDNS 2011.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lectures/groups three hours a week.

INDG 2012 [0.5 credit]
Anishinaabe Studies
In-depth look at the Anishinaabe peoples. Topics may include: Anishinaabe creation stories, migration, the clan system, worldviews; oral, written, and recorded history; treaties, contemporary events, ecological knowing, cultural production, relations with settler-colonies and other nations, self-governance, diplomatic relations.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lecture/groups three hours a week.

INDG 2013 [0.5 credit]
Haudenosaunee Studies
Focuses on the Haudenosaunee from the founding of the Confederacy to present. Discussion of the culture, language, and structure of Haudenosaunee society, the Kaianerekowa (Great Law of Peace) and the Code of Handsome Lake, symbolism, and contemporary issues, including the impact of Euro-Canadian government policies.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lecture/groups, three hours a week.

INDG 2015 [0.5 credit]
Indigenous Ecological Ways of Knowing
Indigenous peoples’ relationships with the non-human world in both historical and contemporary contexts. Topics may include: the origins of Indigenous ecological ways of knowing, Indigenous languages, collective stewardship, water, land, and challenges to maintaining traditional knowledge.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lecture/groups, three hours a week.

INDG 2020 [0.5 credit]
Decolonizing Gender, Sex, and Sexuality
Effects of colonization in unbalancing Indigenous peoples’ lives through the imposition of constructions of gender, sex, and sexuality, and the ways that Indigenous peoples are working to restore balance to their families and communities. Topics vary by year.
Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.
Lecture/groups, three hours a week.
INDG 2709 [0.5 credit]
Indigenous Drama
A study of dramatic literatures and theatre practice from Indigenous theatre makers, including playwrights, directors and other practitioners. Also listed as ENGL 2709. Prerequisite(s): second-year standing or permission of the School. Lecture three hours per week.

INDG 3001 [0.5 credit]
Indigenous Governance
An examination and discussion of different Indigenous forms of governance. Topics will vary by year and may include: Indigenous ways of knowing and forms of governance, community leadership, diplomatic relations, and struggles for self-determination. Precludes additional credit for INDG 3000 (no longer offered). Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies. Seminar three hours per week.

INDG 3011 [0.5 credit]
Indigenous Rights, Resistance, and Resurgence
Indigenous approaches to restoring balance within their nations. Topics include: direct action; political organizing; land claims; rights, courts, and legal action; everyday acts of resistance and resurgence such as petitioning, social media, arts-based movements, and community initiatives. Includes: Experiential Learning Activity Precludes additional credit for INDG 3010 (no longer offered). Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies. Seminar three hours per week.

INDG 3015 [0.5 credit]
Indigenous Ecological Ways of Knowing and the Academy
The relationship between Indigenous traditional ecological knowledges and the academy. Topics include: linguistic barriers, tensions in diffuse ways of knowing, research ethics with respect to Indigenous traditional knowledge, and working with knowledge holders. Prerequisite(s): third-year standing or permission of the School of Indigenous and Canadian Studies. Seminar three hours per week.

INDG 3901 [0.5 credit]
Selected Topics in Indigenous Studies
Topics vary from year to year. Prerequisite(s): third- or fourth-year standing, or permission of the School of Indigenous and Canadian Studies. Seminar three hours per week.

INDG 4001 [0.5 credit]
Indigeneity in the City
This course begins with an examination of the relationship between Indigenous peoples and the construction of cities and urban space. Culminates in the undertaking of research projects that directly link students to the urban Indigenous community in Ottawa. Includes: Experiential Learning Activity Prerequisite(s): Fourth-year standing or permission of the School of Indigenous and Canadian Studies. Seminar three hours per week.

INDG 4011 [0.5 credit]
Indigenous Representations
Through an examination of instances of Indigenous misrepresentation, students will explore how Indigenous peoples have used cultural production in various forms (such as literature, film, television, visual arts, music, performance) to put forth their own visions of their peoples, worldviews, and lives. Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies. Seminar three hours a week.

INDG 4015 [0.5 credit]
Land as a Relation
This is an intensive 14-day field course that brings students together with knowledge holders on the land. The connections between Indigenous ways of knowing, the land, Indigenous languages, and the land’s non-human inhabitants, will be explored. Locations and course fee varies by year. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies. Fourteen-day field course.

INDG 4020 [0.5 credit]
Practicum
Students will learn to apply their knowledge of topics in Indigenous Studies with a local organization whose mandate involves working with and/or for Indigenous peoples. To be arranged in consultation with the Program Coordinator. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies.

INDG 4901 [0.5 credit]
Selected Topics in Indigenous Studies
Topics vary from year to year. Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies. Seminar three hours per week.
INDG 4905 [0.5 credit]
Directed Studies I
An optional course normally restricted to fourth-year Honours students in Canadian Studies or Indigenous Studies and to Qualifying-year Graduate students. Includes supervised reading and written work in an Indigenous Studies area. Prerequisite(s): fourth-year standing or permission of the School of Indigenous and Canadian Studies.

Certificate in Nunavut Public Service Studies (C.N.P.S.S.)

This section presents the requirements for programs in:
- Certificate in Nunavut Public Service Studies C.N.P.S.S.

Program Requirements
Certificate in Nunavut Public Service Studies C.N.P.S.S. (5.0 credits)

Requirements:
1. 1.0 credit in:
   - PADM 1501 [0.5] Public Administration in Nunavut
   - PADM 1502 [0.5] Management of Federal-Territorial Relations

2. 1.0 credit in:
   - ENGL 1002 [0.5] Writing and Language I
   - ENGL 1003 [0.5] Writing and Language II

3. 1.0 credit in:
   - BUSI 1001 [0.5] Principles of Financial Accounting
   - BUSI 2101 [0.5] Organizational Behaviour

4. 1.0 credit in:
   - ECON 1001 [0.5] Introduction to Microeconomics
   - ECON 1002 [0.5] Introduction to Macroeconomics

5. 0.5 credit in:
   - HIST 1010 [0.5] History of Northern Canada

6. 0.5 credit in:
   - PSCI 1100 [0.5] Democracy in Theory and Practice

Total Credits: 5.0

Regulations
See the Academic Regulations of the University section of this Calendar.

This Certificate program is designed primarily for prospective or practicing public employees in Nunavut who seek special training in public service subjects at the undergraduate level.

Courses taken for the Certificate may be credited towards a Bachelor of Arts degree. A transfer student from the Certificate program into the Bachelor of Arts program normally will be required to take at least 10.0 further credits. At least 5.0 of the credits required for the degree must be completed after awarding of the Certificate.

Academic Standing
A candidate for the Certificate must obtain a grade of C or higher in at least half of the credits taken at Carleton University for the Certificate.

Admissions Information

Certificate
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais) with a grade of 60 percent or higher. For applicants whose first language is not English, the requirement of 4U English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar. Special consideration will be extended to other applicants under Mature Applicant regulations (see Mature and Special Admissions, in the Admissions Regulations and Procedures section of this Calendar).

Candidates may be admitted with advanced standing, but must take at least 3.0 credits for the Certificate from Carleton University.

Certificate in Science and Policy

This section presents the requirements for programs in:
- Certificate in Science and Policy

Certificate in Science and Policy (5.0 credits)

May be taken following successful completion of a college diploma or equivalent with a minimum average grade of B or concurrently with an Honours degree or Bachelor of Engineering degree, with completion of a minimum of 4.0 credits, and a minimum CGPA of 7.0.

Requirements
1. 1.5 credits in:
   - ISAP 2001 [0.5] Foundations in Critical Inquiry
   - PAPM 1001 [0.5] Policy: Analysis, Implementation, and Evaluation
   - PSCI 2003 [0.5] Canadian Political Institutions
Chemistry

This section presents the requirements for programs in:
- Chemistry B.Sc. Honours
- Chemistry B.Sc.
- Chemistry with Concentration in Chemical Toxicology B.Sc. Honours
- Chemistry with Concentration in Nanotechnology B.Sc. Honours
- Chemistry and Earth Sciences B.Sc. Combined Honours
- Chemistry and Physics B.Sc. Combined Honours
- Minor in Chemistry

Graduation Requirements

In addition to the requirements listed below, students must satisfy:

1. the University regulations (see the Academic Regulations of the University section of this Calendar),
2. the common regulations applying to all B.Sc. programs including those relating to Science Continuation and Breadth requirements (see the Academic Regulations for the Bachelor of Science Degree).

Students should consult with the Department when planning their program and selecting courses.

Program Requirements

Chemistry

B.Sc. Honours (20.0 credits)

A. Credits Included in the Major CGPA (10.5 credits)

1. 6.5 credits in:

### Chemistry and Earth Sciences

**B.Sc. Combined Honours (20.0 credits)**

#### A. Credits Included in the Major CGPA (13.5 credits)

1. **4.0 credits in:**
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - CHEM 2103 [0.5] Physical Chemistry I
   - CHEM 2302 [0.5] Analytical Chemistry I
   - CHEM 2303 [0.5] Analytical Chemistry II
   - CHEM 2501 [0.5] Introduction to Inorganic and Bioinorganic Chemistry
   - CHEM 3100 [0.5] Physical Chemistry II
   - CHEM 3503 [0.5] Inorganic Chemistry

2. **1.0 credit in CHEM at the 4000-level**
   - CHEM 4908 [1.0] Research Project and Seminar

3. **1.0 credits in:**
   - ERTT 1006 [0.5] Exploring Planet Earth
   - ERTT 1009 [0.5] The Earth System Through Time

4. **3.0 credits in:**
   - ERTT 2102 [0.5] Mineralogy to Petrology
   - ERTT 2104 [0.5] Igneous Systems, Geochemistry and Processes
   - ERTT 2105 [0.5] Geodynamics
   - ERTT 2314 [0.5] Sedimentation and Stratigraphy
   - ERTT 2406 [0.5] Geology and Map Interpretation
   - ERTT 2802 [0.5] Field Geology I

5. **0.5 credit from:**
   - ERTT 3203 [0.5] Sedimentology
   - ERTT 3206 [0.5] Sedimentary Depositional Systems (See Note, below)

6. **2.0 credits in:**
   - ERTT 3003 [0.5] Geochronology
   - ERTT 3204 [0.5] Mineral Deposits
   - ERTT 3207 [0.5] Metamorphic Petrology and Processes
   - ERTT 3806 [0.5] Structural Geology

7. **1.0 credit in ERTT at the 4000-level**

8. **1.0 credit from:**
   - CHEM 4907 [1.0] Honours Essay and Research Proposal
   - CHEM 4908 [1.0] Research Project and Seminar
   - ERTT 4908 [1.0] Honours Thesis
   - ERTT 4909 [0.5] Research in Earth Sciences (and 0.5 credit in ERTT at the 4000-level)

#### B. Credits Not Included in the Major CGPA (6.5 credits)

9. **1.0 credit in:**
   - MATH 1004 [0.5] Calculus for Engineering or Physics
   - MATH 1107 [0.5] Linear Algebra I

10. **0.5 credit from:**
    - MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
    - MATH 2007 [0.5] Elementary Calculus II

11. **0.5 credit in:**
    - STAT 2507 [0.5] Introduction to Statistical Modeling I

12. **0.5 credit in:**
    - ERTT 2004 [0.5] Maps, Satellites and the Geospatial Revolution

13. **1.0 credit from:**
    - MATH 2007 [0.5] Elementary Calculus II
    - ERTT 1009 [0.5] The Earth System Through Time

---

**Total Credits**: 20.0
PHYS 1003 [0.5]  Introductory Mechanics and Thermodynamics  
& PHYS 1004 [0.5]  Introductory Electromagnetism and Wave Motion

PHYS 1007 [0.5]  Elementary University Physics I  
& PHYS 1008 [0.5]  Elementary University Physics II

14. 0.5 credit in:  0.5
    BIOL 1104 [0.5]  Foundations of Biology II

15. 0.5 credit in:  0.5
    Science Faculty Electives (not CHEM or ERTH)

16. 0.5 credit in:  0.5
    NSCI 1000 [0.5]  Seminar in Science (or approved course outside the faculties of Science and Engineering and Design)

17. 1.5 credits in:  1.5
    approved courses outside the faculties of Science and Engineering and Design

Total Credits  20.0

Note: for Item 5 above, ERTH 3203 is required if prerequisite conditions are met.

Chemistry and Physics
B.Sc. Combined Honours (20.0 credits)

A. Credits Included in the Major CGPA (13.0 credits)

1. 1.0 credit from:

   PHYS 1001 [0.5]  Foundations of Physics I  
   & PHYS 1002 [0.5]  Foundations of Physics II (recommended)

   PHYS 1003 [0.5]  Introductory Mechanics and Thermodynamics  
   & PHYS 1004 [0.5]  Introductory Electromagnetism and Wave Motion

   PHYS 1007 [0.5]  Elementary University Physics I  
   & PHYS 1008 [0.5]  Elementary University Physics II (with an average grade of B- or higher)

2. 3.0 credits in:

   PHYS 2202 [0.5]  Wave Motion and Optics
   PHYS 2305 [0.5]  Electricity and Magnetism
   PHYS 2604 [0.5]  Modern Physics I
   PHYS 3007 [0.5]  Third Year Physics Laboratory: Selected Experiments and Seminars
   PHYS 3701 [0.5]  Elements of Quantum Mechanics
   PHYS 3807 [0.5]  Mathematical Physics I

3. 1.5 credits from:

   PHYS 3308 [0.5]  Electromagnetism
   PHYS 3606 [0.5]  Modern Physics II
   PHYS 3802 [0.5]  Advanced Dynamics
   PHYS 4707 [0.5]  Introduction to Quantum Mechanics I

4. 0.5 credit in PHYS at the 4000 level  0.5

5. 5.0 credits in:  5.0

   CHEM 1001 [0.5]  General Chemistry I
   CHEM 1002 [0.5]  General Chemistry II
   CHEM 2103 [0.5]  Physical Chemistry I
   CHEM 2203 [0.5]  Organic Chemistry I
   CHEM 2204 [0.5]  Organic Chemistry II
   CHEM 2501 [0.5]  Introduction to Inorganic and Bioinorganic Chemistry

   CHEM 3100 [0.5]  Physical Chemistry II
   CHEM 3102 [0.5]  Methods of Computational Chemistry
   CHEM 3503 [0.5]  Inorganic Chemistry I
   CHEM 4102 [0.5]  Advanced Topics in Physical Chemistry II

6. 0.5 credit from:  0.5

   CHEM 3106 [0.5]  Computational Chemistry Methods Laboratory
   CHEM 3107 [0.5]  Experimental Methods in Nanoscience

7. 0.5 credit in CHEM at the 4000 level  0.5

8. 1.0 credit from:

   CHEM 4908 [1.0]  Research Project and Seminar
   PHYS 4909 [1.0]  Fourth-Year Project
   PHYS 4907 plus 0.5 credit in PHYS at the 4000 level
   PHYS 4908 plus 0.5 credit in PHYS at the 4000 level

B. Credits Not Included in the Major CGPA (7.0 credits)

9. 3.0 credits in:

   MATH 1004 [0.5]  Calculus for Engineering or Physics
   MATH 1005 [0.5]  Differential Equations and Infinite Series for Engineering or Physics
   MATH 1104 [0.5]  Linear Algebra for Engineering or Science
   MATH 2004 [0.5]  Multivariable Calculus for Engineering or Physics
   STAT 3502 [0.5]  Probability and Statistics
   MATH 3705 [0.5]  Mathematical Methods I

10. 0.5 credit from:  0.5

    COMP 1005 [0.5]  Introduction to Computer Science I
    ECOR 1606 [0.5]  Problem Solving and Computers

11. 0.5 credit from:  0.5

    MATH 3800 [0.5]  Mathematical Modeling and Computational Methods
    ECOR 2606 [0.5]  Numerical Methods

12. 0.5 credit from:  0.5

    NSCI 1000 [0.5]  Seminar in Science
    Approved courses outside the faculties of Science and Engineering and Design

13. 1.5 credits in:  1.5

    approved courses outside the faculties of Science and Engineering and Design (may include NSCI 1000, if not used above)

14. 1.0 credit in free electives.  1.0

Total Credits  20.0

Minor in Chemistry (4.0 credits)
The Minor in Chemistry is available to degree students registered in programs other than those associated with the Department of Chemistry.

Requirements

1. 1.0 credit from:  1.0

   CHEM 1001 [0.5]  General Chemistry I
   & CHEM 1002 [0.5]  General Chemistry II
   or
   CHEM 1005 [0.5]  Elementary Chemistry I
   & CHEM 1006 [0.5]  Elementary Chemistry II
   with a grade of B- or higher in CHEM 1006

2. 3.0 credits in Chemistry at 2000-level or higher  3.0
3. The remaining requirements of the major discipline(s) and degree must be satisfied.

**Total Credits** 4.0

**B.Sc. Regulations**

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

**Breadth Requirement for the B.Sc.**

Students in a Bachelor of Science program must present the following credits at graduation:

1. 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in science continuation courses in each of the two majors.
2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for fewer than 10.0 credits.
2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for 10.0 or more credits.

**Declared and Undeclared Students**

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.Sc. degree without being registered in a program. These students are referred to as Undeclared students. The recommended course pattern for Undeclared students is provided in the Undeclared entry of the Programs section of this Calendar. Undeclared students normally must apply to enter a program before beginning their second year of study. The Science Student Success Centre (SSSC) provides Undeclared students guidance to the appropriate support services in making this decision.

**Change of Program within the B.Sc. Degree**

Students may transfer to a program within the B.Sc. degree if upon entry to the new program they would be in good academic standing.

Other applications for change of program will be considered on their merits; students may be accepted in the new program in Good Standing or on Academic Warning.

Applications to declare or change their program within the B.Sc. Degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

**Minors, Concentrations and Specializations**

Students may add a minor, concentration or specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a minor, concentration or specialization requires that the student be in Good Standing and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.

**Experimental Science Requirement**

Students in a B.Sc. degree program must present at graduation at least two full credits of experimental science chosen from two different departments or institutes from the list below:

- **GEOG 2014 [0.5]** The Earth's Surface
- **GEOG 3003 [0.5]** Quantitative Geography
- **GEOG 3010 [0.5]** Field Methods in Physical Geography
- **GEOG 3102 [0.5]** Geomorphology
- **GEOG 3103 [0.5]** Watershed Hydrology
- **GEOG 3104 [0.5]** Principles of Biogeography
- **GEOG 3105 [0.5]** Climate and Atmospheric Change
- **GEOG 3106 [0.5]** Aquatic Science and Management
- **GEOG 3108 [0.5]** Soil Properties
- **GEOG 4000 [0.5]** Field Studies
- **GEOG 4005 [0.5]** Directed Studies in Geography
- **GEOG 4013 [0.5]** Cold Region Hydrology
- **GEOG 4017 [0.5]** Global Biogeochemical Cycles
- **GEOG 4101 [0.5]** Two Million Years of Environmental Change
- **GEOG 4103 [0.5]** Water Resources Engineering
- **GEOG 4104 [0.5]** Microclimatology
- **GEOG 4108 [0.5]** Permafrost

#### Science Psychology Courses
- **PSYC 2001 [0.5]** Introduction to Research Methods in Psychology
- **PSYC 2002 [0.5]** Introduction to Statistics in Psychology
- **PSYC 2700 [0.5]** Introduction to Cognitive Psychology
- **PSYC 3000 [1.0]** Design and Analysis in Psychological Research
- **PSYC 3506 [0.5]** Cognitive Development
- **PSYC 3700 [1.0]** Cognition (Honours Seminar)
- **PSYC 3702 [0.5]** Perception
- **PSYC 2307 [0.5]** Human Neuropsychology I
- **PSYC 3307 [0.5]** Human Neuropsychology II

#### Science Continuation Courses
- A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:
  - **BIOC (Biochemistry)**
  - **BIOL (Biology)**
  - **CHEM (Chemistry)**
  - **COMP (Computer Science)** A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.
  - **ERTH (Earth Sciences), except ERTH 2415** which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.
  - **Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.**
  - **ENSC (Environmental Science)**
  - **FOOD (Food Science and Nutrition)**
  - **GEOM (Geomatics)**
  - **HLTH (Health Sciences)**
  - **ISAP (Interdisciplinary Science Practice)**
  - **MATH (Mathematics)**
  - **NEUR (Neuroscience)**
  - **PHYS (Physics), except PHYS 2903**
  - **Science Geography Courses (see list above)**
  - **Science Psychology Courses (see list above)**
  - **STAT (Statistics)**
  - **TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.**
## Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

- BIOC (Biochemistry)
- BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives
- CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007
- COMP (Computer Science) except COMP 1001
- ERTH (Earth Sciences) except ERTH 1010, ERTH 1011 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

## Engineering

- ENSC 2001

## Food (Food Science and Nutrition)

- FOOD

## Health Science

- HLTH (Health Science)

## Interdisciplinary Science Practice

- ISAP

## Mathematics

- MATH

## Neuroscience

- NEUR

## Physics (Physics)

- PHYS

## Science Geography

- STAT

## Science Psychology

- TSES

## Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

### Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). NSCI 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

## Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

### Courses Allowable Only as Free Electives in any B.Sc. Program

- **Biol 4810 [0.5]** Education Research in Biology
- **Chem 1003 [0.5]** The Chemistry of Food, Health and Drugs
- **Chem 1004 [0.5]** Drugs and the Human Body
- **Chem 1007 [0.5]** Chemistry of Art and Artifacts
- **Erth 1010 [0.5]** Our Dynamic Planet Earth
- **Erth 1011 [0.5]** Evolution of the Earth
- **Erth 2415 [0.5]** Natural Disasters
- **Isct 1001 [0.5]** Introduction to the Environment
- **Isct 2000 [0.5]** Natural Laws
- **Isct 2002 [0.5]** Human Impacts on the Environment
- **Math 0107 [0.5]** Algebra and Geometry
- **Phys 1901 [0.5]** Planetary Astronomy
- **Phys 1902 [0.5]** From our Star to the Cosmos
- **Phys 1905 [0.5]** Physics Behind Everyday Life
- **Phys 2903 [0.5]** Physics Towards the Future

### Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

- **COMP 1001 [0.5]** Introduction to Computational Thinking for Arts and Social Science Students
- **Math 0005 [0.5]** Precalculus: Functions and Graphs
- **Math 0006 [0.5]** Precalculus: Trigonometric Functions and Complex Numbers
- **Math 1009 [0.5]** Mathematics for Business
- **Math 1119 [0.5]** Linear Algebra: with Applications to Business
- **Math 1401 [0.5]** Elementary Mathematics for Economics I
- **Math 1402 [0.5]** Elementary Mathematics for Economics II

### Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

### Undergraduate Co-operative Education Policy

#### Admission Requirements

Students can apply to co-op in one of two ways: directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.
Participation Requirements

**COOP 1000**

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

**Communication with the Co-op Office**

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

**Employment**

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

**Registering in Co-op Courses**

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

**Work Term Assessment and Evaluation**

To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

**Voluntary Withdrawal from the Co-op Option**

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.
International Students
All International Students are required to possess a Co- op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

B.Sc. Honours Chemistry: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:
1. Completion of 5.0 or more credits at Carleton University;
2. Registered as a full-time student in the Bachelor of Science Honours degree program;
3. Obtained and maintained a major CGPA of 8.0 or higher and an overall CGPA of 6.50 or higher

B.Sc. Honours Chemistry students must successfully complete three (3) work terms to obtain the co-op designation.

Work Term Course: CHEM 3999

Work/Study Pattern:

- Have successfully completed COOP 1000 [0.0]

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees
- B.Sc. (Honours)
- B.Sc. (Major)
- B.Sc.

Admission Requirements
B. Sc. Honours Program

First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions and two of Biology, Chemistry, Earth and Space Sciences or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements
For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For the Combined Honours program in Chemistry and Computer Science, 4U Chemistry and Calculus and Vectors are strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing
For entry to an Honours program after the completion of 5.0 included credits, a student must have a major CGPA of 5.50 or higher, an overall CGPA of 4.50 or higher and the recommendation of the Honours department or committee. A student beginning the final 10.0 credits towards an Honours degree must present a major CGPA of 6.00 or higher, an overall CGPA of 5.00 or higher and the recommendation of the Honours department or committee. A student beginning the final 5.0 credits towards an Honours degree must present a major CGPA of 6.50 or higher and an overall CGPA of 5.00 or higher, as calculated for graduation. Advanced standing will be
granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

**B.Sc. Major Program**

**B.Sc. Program**

**First Year**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended. Equivalent courses may be substituted between the old and new Ontario mathematics curriculum.

**Advanced Standing**
For entry to a B.Sc. or B.Sc. Major program after the completion of 5.0 included credits, a student must have a major and core CGPA of 3.50 or higher and an overall CGPA of 3.50 or higher. A student beginning the final 5.0 credits towards a B.Sc. or B.Sc. Major degree must present a major and core CGPA of 4.00 or higher and an overall CGPA of 4.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

**Co-op Option**

**Direct Admission to the First Year of the Co-op Option**
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Chemistry (CHEM) Courses**

**CHEM 1001 [0.5 credit]**

*General Chemistry I*
This maths-intensive course covers introduction to periodicity, gas laws, equilibrium, bonding, electrochemistry, and organic chemistry. This is a specialist course for students intending to take second year chemistry.

Includes: Experiential Learning Activity
Precludes additional credit for CHEM 1000 (no longer offered), CHEM 1005, CHEM 1101.
Prerequisite(s): Ontario 4U/M in Chemistry or equivalent.
Lectures and tutorial four hours a week, laboratory three hours every other week.

**CHEM 1002 [0.5 credit]**

*General Chemistry II*
This maths-intensive course covers an introduction to solution chemistry, acids and bases, thermodynamics, and kinetics. Specialist course for students intending to take second year chemistry.

Includes: Experiential Learning Activity
Precludes additional credit for CHEM 1000 (no longer offered), CHEM 1006.
Prerequisite(s): CHEM 1005 with a minimum grade of B-.
Lectures and tutorial four hours a week, laboratory three hours every other week.

**CHEM 1003 [0.5 credit]**

*The Chemistry of Food, Health and Drugs*
Aspects of chemistry relating to food, food additives, drugs (illicit and beneficial) and their relation to metabolism and health. Topics may include: proteins, carbohydrates, fats, vitamins, cofactors, enzymes, steroids, electrolyte and pH balance, trace elements. Available only as a free option for Science students.
Prerequisite(s): a course in Chemistry (e.g. Ontario Grade 11).
Lectures three hours a week.

**CHEM 1004 [0.5 credit]**

*Drugs and the Human Body*
No science background required. Topics include drug origins, laws, metabolism and dependence, pharmaceutical industry, over the counter medications, placebo effect, antibiotics, pain killers, stimulants, alcohol, marijuana, hallucinogens, birth control and steroids. Students in Science programs may use this course only as a free elective.
Lectures three hours a week.
CHEM 1005 [0.5 credit]
Elementary Chemistry I
Introduction to stoichiometry, periodicity, gas laws, equilibrium, bonding, and organic chemistry with emphasis on examples of relevance to the life sciences. For students who lack the prerequisite for CHEM 1001 or who are not intending to take upper year chemistry.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 1000 (no longer offered), CHEM 1001, CHEM 1101.
Lectures and tutorial four hours a week, laboratory three hours every other week.

CHEM 1006 [0.5 credit]
Elementary Chemistry II
Introduction to solution chemistry, acids and bases, thermodynamics, and kinetics, with emphasis on examples of relevance to the life sciences. For students who lack the prerequisite for CHEM 1002 or who are not intending to take upper year chemistry.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 1000 (no longer offered), CHEM 1002.
Prerequisite(s): CHEM 1001 or CHEM 1005.
Lectures and tutorial four hours a week, laboratory three hours every other week.

CHEM 1007 [0.5 credit]
Chemistry of Art and Artifacts
The chemistry of arts and artifacts created throughout the ages (Paleolithic, Neolithic, Bronze, Iron, Middle and Modern) will be examined. Basic chemical principles will be explored and reviewed when required. Students in Science programs may use this course only as a free elective.
Lectures three hours a week.

CHEM 1101 [0.5 credit]
Chemistry for Engineering Students
Topics include stoichiometry, atomic and molecular structure, thermodynamics and chemical equilibrium, acid-base chemistry, carbon dioxide in water, alkalinity, precipitation, electrochemistry, kinetics and basic organic chemistry. Laboratory component emphasizes techniques and methods of basic experimental chemistry.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 1000 (no longer offered), CHEM 1001, and CHEM 1005.
Prerequisite(s): Ontario 4U/M in Chemistry or equivalent.
Lectures three hours a week, laboratory three hours every other week.

CHEM 2103 [0.5 credit]
Physical Chemistry I
Basic principles of thermodynamics. Development of the laws of thermodynamics, enthalpy, entropy and free energy, and their applications to phase equilibria, electrochemistry, and kinetics. Brief introduction to quantum mechanics.
Includes: Experiential Learning Activity
Precludes additional credit for BIOC 2300, CHEM 2101 (no longer offered) and CHEM 2102 (no longer offered).
Prerequisite(s): CHEM 1006 with a minimum grade of B- or CHEM 1002, MATH 1004, MATH 1107, PHYS 1007 and PHYS 1008 or PHYS 1003 and PHYS 1004.
Lectures three hours a week, problems one hour a week, laboratory three hours a week.

CHEM 2203 [0.5 credit]
Organic Chemistry I
Structure, organization, and scope of organic chemistry including molecular structures of well-known and important organic chemicals, types of chemical reactions, and spectroscopic methods used in identification. Training in the handling and purification of organic compounds, organic chemical reactions, and the use of infrared spectroscopy.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 2207.
Prerequisite(s): CHEM 1006 with a minimum grade of B- or CHEM 1002.
Lectures three hours a week and laboratory three hours a week.

CHEM 2204 [0.5 credit]
Organic Chemistry II
Further discussion of chemical bonding in organic compounds, nomenclature, stereochemistry, and a systematic coverage of the chemical reactions of organic functional groups. Laboratory experience in organic chemical reactions, use of infrared spectroscopy and other techniques to determine the structure of unknown organic compounds.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 2208 and CHEM 2206.
Prerequisite(s): CHEM 2203.
Lectures three hours a week and laboratory three hours a week.

CHEM 2207 [0.5 credit]
Introduction to Organic Chemistry I
Structure, organization, and scope of organic chemistry, including molecular structures of well-known and important organic chemicals, types of chemical reactions, and spectroscopic methods used in identification.
Precludes additional credit for CHEM 2203.
Prerequisite(s): CHEM 1006 with a minimum grade of B- or CHEM 1002.
Lectures three hours a week.
CHEM 2208 [0.5 credit]
Introduction to Organic Chemistry II
Further discussion of the chemical bonding in organic compounds, nomenclature, stereochemistry, and a systematic coverage of chemical reactions of the organic functional groups.
Precludes additional credit for CHEM 2204 and CHEM 2206.
Prerequisite(s): CHEM 2207 or CHEM 2203.
Lectures three hours a week.

CHEM 2302 [0.5 credit]
Analytical Chemistry I
Introduction to quality assurance measures, calibration strategies and the fundamentals of solution-based analytical measurement processes. Qualitative and quantitative analysis using potentiometric and electrolysis techniques including ion selective electrodes, coulometry, amperometry and voltammetry. Redox, acid/base and EDTA titrations in the context of various buffer systems.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 2300.
Prerequisite(s): CHEM 1006 with a minimum grade of B-, or CHEM 1002 or CHEM 1101 and (MATH 1007 or MATH 1004).
Lectures three hours a week, laboratory three hours a week.

CHEM 2303 [0.5 credit]
Analytical Chemistry II
Spectrophotometric analysis using Uv-Vis, fluorescence and FTIR instrumentation. Modern separation methods including CE, GC and LC. Recent techniques and applications using mass spectrometry. Applications of all of the above to real-world analysis including the advancement of environmental, biochemistry and health-related research.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 2300 and CHEM 2301.
Prerequisite(s): CHEM 1006 with a minimum grade of B-, or CHEM 1002, or CHEM 1101, and (MATH 1007 or MATH 1004).
Lectures three hours a week, laboratory three hours a week.

CHEM 2400 [0.5 credit]
Independent Research I
Students carry out a laboratory research project under the supervision of a faculty member from the Department of Chemistry. A research report must be submitted by the last day of classes for evaluation by the Chair and Faculty supervisor.
Includes: Experiential Learning Activity
Prerequisite(s): restricted to Honours students having second-year standing in a Chemistry program with an overall CGPA of 10.0 or higher, and approval of the Chair and a Faculty supervisor.
Laboratory research for at least three hours a week over two terms.

CHEM 2501 [0.5 credit]
Introduction to Inorganic and Bioinorganic Chemistry
The basic concepts of inorganic chemistry, including the origins of elemental properties, simple theories of bonding, intermolecular forces, main group and transition metal chemistry, coordination chemistry. Inorganic ions in biochemistry, including ion transport and storage, oxygen carriers and hydrolases, redox proteins.
Precludes additional credit for CHEM 3506.
Prerequisite(s): CHEM 1006 with a minimum grade of B-, or CHEM 1002.
Lectures three hours a week, tutorial one hour a week.

CHEM 2800 [0.5 credit]
Foundations for Environmental Chemistry
A basis of chemistry needed to understand the environment: composition of the atmosphere and natural waters; equilibrium; surface properties; kinetics and spectroscopy; physical and chemical properties of chemicals in the environment. Limited enrolment course. Priority is given to students in Environmental Science/Engineering.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 1006 with a minimum grade of B- or CHEM 1002, or CHEM 1101, (MATH 1007 or MATH 1004).
Lectures three hours a week, laboratory three hours a week.

CHEM 3100 [0.5 credit]
Physical Chemistry II
Further development of thermodynamic equations and their applications to mass changes, chemical potential, chemical equilibria, transport properties and advanced phase equilibria. Use of partial differentials and development of Maxwell's relations will also be covered.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 2102.
Prerequisite(s): CHEM 2103 or BIOC 2300, and MATH 1005 or MATH 2007.
Lectures three hours a week, problems one hour a week, laboratory three hours a week.

CHEM 3101 [0.5 credit]
Quantum Chemistry
Classical equations of motion, harmonic oscillator, diatomic and polyatomic molecules, molecular mechanics, quantum mechanics, Schrödinger equation and wave functions, vibrational spectra, hydrogen atom, quantum numbers, electronic spectra, bonding in small molecules.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 2103, MATH 2007 and MATH 2008.
Lectures three hours a week, tutorial one hour per week.
CHEM 3102 [0.5 credit]
Methods of Computational Chemistry
Molecular orbital theory of organic and inorganic chemistry. Applications of computational chemistry to chemical bonding, aromaticity, molecular spectra. Semi-empirical and ab initio electronic structure theory. Comparison of theoretical methods used to obtain molecular properties. Introduction to statistical thermodynamics.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 3101 or PHYS 3701.
Lectures and problems three hours a week.

CHEM 3106 [0.5 credit]
Computational Chemistry Methods Laboratory
Industry-standard quantum chemistry software is used for Hartree-Fock, density functional, and post Hartree-Fock correlation calculations. Results are applied to problems in molecular structure, thermodynamics, vibrational spectroscopy, and kinetics. The UNIX operating system, Bourne-shell programming, and Python scripting are also introduced.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 3102 (may be taken concurrently).
Laboratory three hours a week.

CHEM 3107 [0.5 credit]
Experimental Methods in Nanoscience
Thin film production and characterization, scanning electron microscopy, synthesis of metal nanoparticles and particle size determination, computational modeling of nanostructures.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 3100.
Laboratory four hours a week.

CHEM 3201 [0.5 credit]
Advanced Organic Chemistry I
Instrumental methods for determining organic structures. Selected organic reactions with emphasis on mechanisms and reactive intermediates.
Prerequisite(s): CHEM 2204 or CHEM 2206 or CHEM 2208.
Lectures three hours a week, tutorial one and a half hours per week.

CHEM 3202 [0.5 credit]
Advanced Organic Chemistry II
Continued mechanistic survey of additional organic reactions with emphasis on synthetic usefulness and stereochemistry. Interspersed with selected topics such as instrumental methods, photochemistry, literature of organic chemistry, natural and synthetic polymers, heterocycles, terpenes and alkaloids.
Prerequisite(s): CHEM 3201 or equivalent.
Lectures three hours a week, tutorial one and a half hours per week.

CHEM 3205 [0.5 credit]
Experimental Organic Chemistry
A laboratory-based course including advanced concepts and techniques in organic synthesis, structure determination, and the rates and mechanisms of reactions. Students are responsible for literature surveys, acquisition of theoretical background, and design of experimental procedures.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 2204 or CHEM 2206 and CHEM 3201.
Laboratory four hours a week.

CHEM 3305 [0.5 credit]
Advanced Analytical Chemistry Laboratory
Advanced instrumentally based techniques of analysis. Emphasis on identification and quantitation of low-level contaminants in environmental matrices using chromatographic and spectroscopic methods, including sampling, cleanup, measurement and reporting of results.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 2302 or CHEM 2303.
Laboratory four hours a week.

CHEM 3400 [0.5 credit]
Independent Research II
Students carry out a laboratory research project supervised by a Chemistry faculty member. A research report must be submitted by the last day of classes for evaluation by the Chair and Faculty supervisor; expectations of student performance and evaluation exceed that of CHEM 2400.
Includes: Experiential Learning Activity
Prerequisite(s): restricted to Honours students having third-year standing in a Chemistry program with an overall CGPA of 10.0 or higher, and approval of the Chair and a Faculty supervisor.
Laboratory research for at least three hours a week over two terms.

CHEM 3401 [0.5 credit]
Physical Aspects of Biochemistry
Chemistry, structure and function of nucleic acids, proteins, carbohydrates, and lipids. Thermodynamics of biological systems, chemical mechanisms and organic transformations. Intended for Chemistry Majors.
Precludes additional credit for BIOC 2200, BIOL 2200, and BIOC 3101.
Prerequisite(s): CHEM 2103 and CHEM 2204.
Lectures three hours a week.
CHEM 3503 [0.5 credit]
Inorganic Chemistry I
Symmetry, identification of Raman and infrared active vibrations, symmetry-adapted molecular orbital theory of polyatomic molecules, electron deficient bonding, bonding in coordination complexes, solid state bonding, ionic lattices. Laboratory will introduce the student to a range of synthetic techniques and physical methods of characterization.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 3507.
Prerequisite(s): CHEM 2501.
Lectures three hours a week, tutorial one hour a week and laboratory four hours a week.

CHEM 3504 [0.5 credit]
Inorganic Chemistry II
Physical properties of coordination complexes, ligand substitutions and electron transfer reaction mechanisms, organometallic chemistry: bonding, nomenclature and catalysis. Laboratory will introduce the student to a range of synthetic techniques and physical methods of characterization.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 3508.
Prerequisite(s): CHEM 3503.
Lectures three hours a week, tutorial one hour a week and laboratory four hours a week.

CHEM 3507 [0.5 credit]
General Inorganic Chemistry I
Symmetry, identification of Raman and infrared active vibrations, symmetry-adapted molecular orbital theory of polyatomic molecules, electron deficient bonding, bonding in coordination complexes, solid state bonding, ionic lattices.
Precludes additional credit for CHEM 3503.
Prerequisite(s): CHEM 2501.
Lectures three hours a week, tutorial one hour a week.

CHEM 3508 [0.5 credit]
General Inorganic Chemistry II
Physical properties of coordination complexes, ligand substitutions and electron transfer reaction mechanisms, organometallic chemistry: bonding, nomenclature and catalysis.
Precludes additional credit for CHEM 3504.
Prerequisite(s): CHEM 3503 or CHEM 3507.
Lectures three hours a week, tutorial one hour a week.

CHEM 3600 [0.5 credit]
Introduction to Nanotechnology
Nanoscale units, bulk vs. nanoproperties, electrons, atoms and ions, metals, band structure, electrical conduction, biosystems, molecular devices, quantum mechanics and optics, tools for measuring nanostructures. Production of nanostructures: self assembly, nanoscale crystal growth, polymerization. Applications to sensors, magnets, electronics, drug delivery. Toxicology of nanostructures.
Prerequisite(s): CHEM 3100.
Lectures three hours a week.

CHEM 3700 [0.5 credit]
Industrial Applications of Chemistry
Uses of chemistry in a number of industries: fertilizers, electrochemical, metallurgical, petrochemical, pulp and paper, plastics, pharmaceutical. Interaction of chemistry with economic, political, engineering, environmental, health, legal considerations. Guest lecturers.
Prerequisite(s): (BIOC 2300 or CHEM 2103) and one of CHEM 2207 or CHEM 2203.
Lecture three hours a week.

CHEM 3800 [0.5 credit]
The Chemistry of Environmental Pollutants
Prerequisite(s): CHEM 2207 or CHEM 2203 or CHEM 2800.
Lectures three hours a week.

CHEM 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

CHEM 4100 [0.5 credit]
Advanced Topics in Physical Chemistry I
Principles of Group Theory as applied to Chemistry. Point groups, character tables, symmetry orbitals, molecular orbitals, aromaticity, allowed and forbidden reactions, sandwich complexes. Selection rules in spectroscopy, molecular vibrations.
Prerequisite(s): CHEM 3102.

CHEM 4102 [0.5 credit]
Advanced Topics in Physical Chemistry II
Prerequisite(s): CHEM 3102.
Lectures and seminars three hours a week.

CHEM 4103 [0.5 credit]
Surface Chemistry and Nanostructures
Surface structure, thermodynamics, energy states, equilibrium, partition functions for diatomic molecules. Chemical kinetics: rate laws, solution of differential equations, transition state theory, bimolecular reactions in gases and in solution, chain reactions, catalysis, atmospheric chemical reactions and photochemistry.
Prerequisite(s): CHEM 3102. Also offered at the graduate level, with different requirements, as CHEM 5108, for which additional credit is precluded.
Lectures three hours a week.
CHEM 4104 [0.5 credit]
Physical Methods of Nanotechnology
An overview of methods used in nanotechnology. Principles of scanning probe techniques ranging from surface physics to biology. State of the art methods to create nanostructures for future applications in areas such as nanolithography, nano-electronics, nano-optics, data storage and bio-analytical nanosystems.
Prerequisite(s): CHEM 3600 and CHEM 3107.
Lectures three hours a week.

CHEM 4201 [0.5 credit]
Macromolecular Nanotechnology
Prerequisite(s): CHEM 3600 or permission of the department.
Also offered at the graduate level, with different requirements, as CHEM 5207, CHEM 5208, for which additional credit is precluded.
Lectures three hours a week.

CHEM 4202 [0.5 credit]
Advanced Topics in Organic Chemistry I
Topics include 2-dimensional 1H and 13CNMR spectroscopy and structure determination of complex organic molecules.
Prerequisite(s): CHEM 3201.
Also offered at the graduate level, with different requirements, as CHEM 5407, for which additional credit is precluded.
Lectures three hours a week.

CHEM 4203 [0.5 credit]
Synthetic Organic Chemistry
The application of reactions to the synthesis of organic molecules. Emphasis on design of synthetic sequences, new reagents, and stereoselectivity. Topics include advanced methods for synthesis and reactions of alkenes, carbonyls, and enolates, functional group interconversion, oxidation and reduction, protecting groups, rearrangements, and metal-catalyzed cross-coupling.
Prerequisite(s): CHEM 3201 and CHEM 3202.
Lectures and seminars three hours a week.

CHEM 4204 [0.5 credit]
Organic Polymer Chemistry
Introduction to basic principles of polymer chemistry, industrial and synthetic polymers, different types of polymerization and polymer characterization. Study of commodity plastics, engineering thermoplastics, and specialty polymers, with emphasis on their synthesis.
Prerequisite(s): CHEM 3201 or equivalent.
Also offered at the graduate level, with different requirements, as CHEM 5406, for which additional credit is precluded.
Lectures three hours a week.

CHEM 4205 [0.5 credit]
Reactivity and Mechanism in Organic Chemistry
The application of frontier molecular orbital theory (HOMO-LUMO interactions) to organic reactions, including thermal and photochemical cycloadditions of pi-systems (including 1,3-dipoles) and rearrangements. Reactions of radicals and carbenes; conformational analysis, stereochemical effects, and methods for the determination of reaction mechanisms.
Prerequisite(s): CHEM 3202 and CHEM 3503 (may be taken concurrently).
Lectures and seminars three hours a week.

CHEM 4206 [0.5 credit]
Natural Products Chemistry
A survey of the major classes of natural products with respect to their structural elucidation, synthesis, biosynthesis and bioactivity, with emphasis on compounds that have medicinal importance.
Prerequisite(s): CHEM 3201 and CHEM 3202.
Lectures and seminars three hours a week.

CHEM 4301 [0.5 credit]
Advanced Topics in Analytical Chemistry I
Prerequisite(s): CHEM 2103 and one of CHEM 2302 or CHEM 2303.
Lectures and seminars three hours a week.

CHEM 4302 [0.5 credit]
Advanced Topics in Analytical Chemistry II
Prerequisite(s): CHEM 2103 and one of CHEM 2302 or CHEM 2303.
Lectures and seminars three hours a week.
CHEM 4304 [0.5 credit]  
Advanced Applications In Mass Spectrometry  
Detailed breakdown of the physical, electrical and chemical operation of mass spectrometers. Applications in MS ranging from the analysis of small molecules to large biological macromolecules. Descriptions of the use of mass spectrometry in industry as well as commercial opportunities in the field.  
Prerequisite(s): CHEM 2103 or BIOC 2300, and one of CHEM 2302 or CHEM 2303.  
Also offered at the graduate level, with different requirements, as CHEM 5109, for which additional credit is precluded.  
Lectures and seminars three hours a week.

CHEM 4305 [0.5 credit]  
Environmental Chemistry and Toxicology  
Overview of environmental chemistry and toxicology principles including chemical sources, fate, and effects in the environment. Examining organic reactions occurring in abiotic environments and biological systems, and studying aspects of toxicant disposition and biotransformation. Emphasis on contemporary problems in human health and the environment.  
Prerequisite(s): CHEM 2203 or CHEM 2207, and CHEM 2800 or CHEM 2103, or BIOC 3101 or permission of the department.  
Also offered at the graduate level, with different requirements, as CHEM 5606, for which additional credit is precluded.  
Lectures three hours per week.

CHEM 4406 [0.5 credit]  
Pharmaceutical Drug Design  
Important elements of rational drug design. Ligand-receptor interactions, structure-activity relationships, molecular modeling of pharmacophores, structure and mechanism-based approaches to drug design. Enzyme inhibition in chemotherapy and design of anti-viral drugs. Includes: Experiential Learning Activity  
Prerequisite(s): CHEM 2103 and (CHEM 2203 or CHEM 2207), BIOC 3101 and (BIOC 3102 or BIOC 3008).  
Lectures and laboratory five hours a week.

CHEM 4407 [0.5 credit]  
Polymer Modeling  
Polymer architectures; Flexible and rigid rod polymers; Rotational isomeric states (RIS); Molecular mechanics, Ramachandran Map, Helix parameters; internal and external parameters; regular and random coil structures; molecular dynamics; calculation of end-to-end distance, NMR chemical shifts; conformational entropy and properties.  
Prerequisite(s): MATH 1107 and CHEM 2204 or permission of the department.  
Lectures three hours per week.

CHEM 4502 [0.5 credit]  
Radiochemistry  
A study of nuclear stability and decay; chemical studies of nuclear phenomena. Applications of radioactivity.  
Prerequisite(s): CHEM 2302, CHEM 2303, and CHEM 3100, or permission of the Department.  
Also offered at the graduate level, with different requirements, as CHEM 5905, for which additional credit is precluded.  
Lectures and seminars three hours a week.

CHEM 4503 [0.5 credit]  
Advanced Topics in Inorganic Chemistry I  
A quantitative basis for ligand field theory; unreal and real wavefunctions of d-orbitals; derivation of the energies of d-orbitals using variational principle, secular determinants, and lined field operators; the effect of ligand field on free ion term symbols, wavefunction descriptions of terms symbols; applications.  
Prerequisite(s): CHEM 3504 and CHEM 3101.  
Lectures three hours a week.

CHEM 4504 [0.5 credit]  
Advanced Topics in Inorganic Chemistry II  
Reactivity of inorganic coordination compounds. Thermodynamic and kinetic factors affecting reactivity. Industrial and biochemical processes catalyzed by metal coordination compounds. Experimental methodologies, data analysis and rate law evaluation used to obtain reaction mechanisms leading to improved methods of catalysis.  
Prerequisite(s): CHEM 3504 or equivalent.  
Lectures three hours a week.

CHEM 4505 [0.5 credit]  
Application of Physical Methods to Electron Transfer Chemistry  
Spectroscopic techniques (i.e. UV-visible NIR, IR, EPR) and electrochemistry methods that are used to study photochemical and thermal intermolecular and intramolecular electron transfer in transition metal complexes are presented. Electron transfer theory and redox-active (non-innocent) ligands are discussed.  
Prerequisite(s): CHEM 3504.  
Lectures three hours a week.

CHEM 4700 [0.5 credit]  
Special Topics in Chemistry  
A topic of current interest in any branch of chemistry. Only one special topics course may be presented for credit.  
Prerequisite(s): permission of the Department.
CHEM 4800 [0.5 credit]
Atmospheric Chemistry
Properties of natural atmospheric constituents; biogeochemical cycles involving gases; chemical reactions in the atmosphere; anthropogenic atmospheric pollutants (e.g., chlorofluorocarbons, sulphur and nitrogen oxides, photochemical smog sources and effects on the biosphere. Relation between the structure of molecules and their spectral and reactive properties.
Prerequisite(s): CHEM 2103 or CHEM 2800.
Lectures three hours a week.

CHEM 4907 [1.0 credit]
Honours Essay and Research Proposal
Students conduct an independent research study using library resources, and prepare a critical review and study proposal on a topic approved by a faculty supervisor. A written report and oral poster presentation of the work are required before a grade can be assigned.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 4908, FOOD 4907 and FOOD 4908.
Prerequisite(s): fourth year standing in an Honours Chemistry program and permission of the department.

CHEM 4908 [1.0 credit]
Research Project and Seminar
Senior students in Honours Chemistry carry out a research project under the direction of one of the members of the Department. A written report and an oral presentation of the work are required before a grade can be assigned.
Includes: Experiential Learning Activity
Precludes additional credit for CHEM 4907, FOOD 4907 and FOOD 4908.
Prerequisite(s): any two of CHEM 3106, CHEM 3107, CHEM 3205, CHEM 3305 and CHEM 3504 and permission of the department.
Laboratory and associated work equivalent to at least eight hours a week for two terms.

Childhood and Youth Studies
This section presents the requirements for programs in:
- Childhood and Youth Studies B.A. Honours
- Childhood and Youth Studies B.A.

Childhood and Youth Studies
B.A. Honours (20.0 credits)
Requirements:
A. Credits Included in the Major CGPA (8.0 credits)
1. 1.0 credit in:
   CHST 1003 [1.0] Introduction to Childhood and Youth Studies
2. 1.0 credit in:
   CHST 2001 [0.5] Experiential Learning in Childhood and Youth Studies
   CHST 2003 [0.5] Introduction to Research Methods in Childhood and Youth Studies
3. 1.5 credits in:
   CHST 3103 [0.5] Critical Approaches to Child Development
   CHST 3302 [0.5] Children, Policy, and Practice
   CHST 3303 [0.5] Children's Rights

4. 1.0 credit from:
   CHST 3000 [0.5] Conceptualizing Adolescence in Childhood and Youth Studies
   CHST 3003 [0.5] Theoretical Advances in Developmental Sciences
   CHST 3201 [0.5] Children's Knowledges, Cultures, and Representations
   CHST 3202 [0.5] Reconceptualizing Early Childhood Education and Care

5. 1.0 credit from:
   CHST 3002 [0.5] Special Topics in Child Studies
   CHST 3203 [0.5] Youth Culture and Activism
   CHST 3304 [0.5] Disability and Childhood: Transnational Perspectives
   CHST 4003 [0.5] History of 'The African Child'
   CHST 4004 [0.5] Theories of Inclusion in Childhood and Youth Education
   HIST 3115 [0.5] Childhood and Youth in History
   SOCI 3300 [0.5] Studies in the Sociology of Education

6. 1.0 credit from:
   CHST 3204 [0.5] Literary Representations of Childhood and Youth
   CHST 3205 [0.5] Race, Childhood, and Youth
   CHST 3305 [0.5] Childhood and Youth in Indigenous Contexts
   CHST 4001 [0.5] Advanced Topics in Child Studies
   CHST 4102 [0.5] Queer and Trans Youth
   CHST 4101 [0.5] Children, Youth, and Popular Culture
   SOCI 3045 [0.5] Children and Childhood in a Globalized World

7. 1.5 credits from:
   CHST 3101 [0.5] Research Seminar
   CHST 4908 [1.0] Honours Research Project
   Or
   1.5 credits CHST courses at the 3000 or 4000 level, which may include:
   CHST 3904 [1.0] Service-Learning in Community Settings

B. Credits Not Included in the Major CGPA (12.0 credits)
8. 8.0 credits in electives not in CHST
9. 4.0 credits in free electives
Total Credits 20.0

Notes:
1. Registration in the Honours Research Project requires a Major CGPA of at least 10.0.

Childhood and Youth Studies
B.A. (15.0 credits)
Requirements
A. Credits Included in the Major CGPA (6.0 credits)
1. 1.0 credit in:
   CHST 1003 [1.0] Introduction to Childhood and Youth Studies
2. 1.0 credit in:

252 The Academic Year (Graduate and Undergraduate Studies)
B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

Breadth Area 2: Humanities

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURLR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Subject codes: AERO, ARCC, ARCH, ARCN, ARCS, ARCJ, BIOL, BIT, CHEM, CIVE, CMPS, COMP, COR, ELEC, ENVE, ERNG, FOOD, HLTH, IDES, IMD, IPM, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students
Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

Change of Program Within the B.A. Degree
Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations
Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

Mention : Français
Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada.

The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:
1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:
1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements
Degrees
- Bachelor of Arts (B.A.)(Honours)
- Bachelor of Arts (B.A.)

First Year
For B.A. and B.A. (Honours)
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or \textit{anglais}). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

**Advanced Standing**

**B.A. and B.A. (Honours) Program**

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

**Child and Youth Studies**

Students who have obtained an Ontario College diploma with a B+ average or higher will be granted up to a maximum of 5.0 credits on admission to the Child and Youth Studies program.

**Childhood and Youth Studies (CHST) Courses**

**CHST 1003 [1.0 credit]**

\textbf{Introduction to Childhood and Youth Studies}

An introduction to multiple approaches to studying childhood and youth through a diverse range of historical periods and cultural contexts. Students will apply an interdisciplinary lens to explore the ways that children and youth have been discussed, researched, and understood. Precludes additional credit for CHST 1000 (no longer offered), CHST 1002 (no longer offered).

Lecture and discussion groups three hours a week.

**CHST 2001 [0.5 credit]**

\textbf{Experiential Learning in Childhood and Youth Studies}

An examination of the philosophies, purposes, methods, techniques, and issues of childhood and youth studies through engagement with children and youth in campus and community settings. Students will make connections to theoretical and curriculum frameworks and current debates and perspectives.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing in Childhood and Youth Studies.

Lecture and discussion three hours a week.

**CHST 2003 [0.5 credit]**

\textbf{Introduction to Research Methods in Childhood and Youth Studies}

An introduction to the foundations of research involving children and youth. Students will learn research paradigms and strategies for designing and conducting research with children and young people. Ethical considerations and the involvement of children as co-researchers will be emphasized.

Precludes additional credit for CHST 2000 (no longer offered).

Prerequisite(s): second-year standing in Childhood and Youth Studies.

Lectures and discussion groups three hours a week.

**CHST 2011 [0.5 credit]**

\textbf{Children’s Literature}

Introduction to the critical study of children’s literature. Also listed as ENGL 2011.

Precludes additional credit for ENGL 2006 (no longer offered).

Prerequisite(s): second-year standing or permission of the department.

Lectures three hours a week.

**CHST 3000 [0.5 credit]**

\textbf{Conceptualizing Adolescence in Childhood and Youth Studies}

A comprehensive interdisciplinary overview of key issues, research, and theoretical developments in the study of childhood and youth. Students will explore the different and often conflicting conceptualizations of adolescence and examine youth theories and their implications.

Prerequisite(s): Third year standing in Childhood and Youth Studies.

Lectures three hours a week.

**CHST 3002 [0.5 credit]**

\textbf{Special Topics in Child Studies}

Analysis of selected topics relevant to theory, research, and practice involving children and youth. The choice of topics will vary from year to year. Students should consult with the Institute regarding the topic offered.

Prerequisite(s): Third-year standing in Childhood and Youth Studies, or permission of the department.

Lectures three hours a week.

**CHST 3003 [0.5 credit]**

\textbf{Theoretical Advances in Developmental Sciences}

Developments and advances in theories of human development and their applications. Population-based models of child development, bio-ecological frameworks, and epigenetic theories with emphasis on interdisciplinary frameworks relating to childhood and youth.

Prerequisite(s): Third year standing in the Childhood and Youth Studies Program or permission of the department.

Lecture three hours a week.
CHST 3101 [0.5 credit]
Research Seminar
This seminar is designed for students who wish to complete an Honours research project in their 4th year. Students will select a topic of study, investigate methodological and ethical considerations, and implement the key steps involved in designing rigorous research projects in diverse settings.
Precludes additional credit for CHST 3100 (no longer offered).
Prerequisite(s): CHST 2003 or CHST 2000 (no longer offered), and third-year standing in Childhood and Youth Studies.
Seminar three hours a week.

CHST 3103 [0.5 credit]
Critical Approaches to Child Development
A critical examination of philosophical, ideological, and discursive perspectives on childhood and youth. Students will analyze normative constructs reproduced in developmental discourses and research, particularly concerning gender, racism, disability, and oppressive practices.
Precludes additional credit for CHST 3001 (no longer offered).
Prerequisite(s): Third-year standing in Childhood and Youth Studies.
Lecture three hours a week.

CHST 3201 [0.5 credit]
Children's Knowledges, Cultures, and Representations
An analysis of the ways children construct social relations through cultures and systems of representations. Students will investigate how children’s knowledges and identities are constructed through their relationships with the world and develop theoretical and practical approaches for working with children from diverse cultures.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Childhood and Youth Studies.
Seminar three hours a week.

CHST 3202 [0.5 credit]
Reconceptualizing Early Childhood Education and Care
A study of historical, contemporary, global, and local conversations about the professional field of early childhood education and care and its diverse practices and contexts. Topics may include reconciliation, anti-racist pedagogies, asset-based practices, inclusiveness, caring in context, and critical reflection.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Childhood and Youth Studies.
Seminar three hours a week.

CHST 3203 [0.5 credit]
Youth Culture and Activism
An exploration of youth cultures and participation in local, national, and global contexts. Students will examine youth engagement and advocacy, including definitions of citizenship, theories of resistance, the construction of “youth” as a social category, and the impact of technology and social media.
Prerequisite(s): Third-year standing in Childhood and Youth Studies, or permission of the department.
Seminar three hours a week.

CHST 3204 [0.5 credit]
Literary Representations of Childhood and Youth
An examination of the ways in which childhood, children, and youth have been represented in creative literature (fiction, poetry, drama, and/or creative nonfiction).
Also listed as ENGL 3204.
Prerequisite(s): third-year standing, or permission of the department.
Seminar three hours a week.

CHST 3205 [0.5 credit]
Race, Childhood, and Youth
An examination of historical and contemporary issues, debates, and methodologies pertaining to the studies of race, ethnicities, and racialization in childhood and youth studies. Students will also theorize the intersectionality of race, racism, racialization, racial and ethnic formations, nationalism, and colonialism in a contemporary context.
Prerequisite(s): third-year standing in Childhood and Youth Studies, or permission of the department.
Seminar three hours a week.

CHST 3302 [0.5 credit]
Children, Policy, and Practice
An introduction to the concepts of policy and practice and how these are influenced by history, economy, geography, and culture. Topics may include provincial, national, and international economic, social, and educational policies concerning children and youth.
Precludes additional credit for CHST 4000 (no longer offered).
Prerequisite(s): third-year standing in Childhood and Youth Studies.
Lecture three hours a week.

CHST 3303 [0.5 credit]
Children’s Rights
This course examines children’s rights from a range of historical, cultural, and global perspectives. Topics may include the rights for Indigenous children, children with disabilities, female, trans and queer children, children in armed conflict and refugees in Canada and transnational contexts.
Also listed as HUMR 3303.
Precludes additional credit for CHST 3901 (no longer offered).
Prerequisite(s): third-year standing in Childhood and Youth Studies.
Lecture three hours a week.
CHST 3304 [0.5 credit]
Disability and Childhood: Transnational Perspectives
Drawing on theory and research in disabled children's childhood studies, sociology of childhood, disability studies, and girlhood studies, this course examines the discursive and material constructions of disabled youth and childhood in transnational contexts in relation to emerging neo-colonial, neo-imperialist, and neo-liberal ideologies.
Also listed as DBST 3304.
Prerequisite(s): third-year standing in Childhood and Youth Studies or Disability Studies, or permission of the department.
Lecture three hours a week.

CHST 3305 [0.5 credit]
Childhood and Youth in Indigenous Contexts
An introduction to indigenous perspectives and contexts, both historical and contemporary, in relation to practice with Indigenous children, youth, families, and communities. Students will explore critical theory and necessary protocols for respectful entry into child and youth care practice within Indigenous contexts.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Childhood and Youth Studies or Indigenous Studies, or permission of the department.
Seminar three hours a week.

CHST 3904 [1.0 credit]
Service-Learning in Community Settings
Students will learn to apply their knowledge pertaining to children and youth to a policy- or practice-oriented work environment. Students will complete a term paper and other assignments documenting gains in experiential knowledge. Graded SAT/UNS.
Includes: Experiential Learning Activity
Prerequisite(s): students with third- or fourth-year standing in Childhood and Youth Studies may apply to the Undergraduate Advisor for permission.
Field placement six hours per week in a community setting, and regular class forum.

CHST 4001 [0.5 credit]
Advanced Topics in Child Studies
In-depth analysis of theoretical, empirical, and applied topics related to children and youth in Canada and/or internationally. Topics may include poverty and social inequality, child and youth health, social media and social change. This course is repeatable when the topic changes.
Prerequisite(s): fourth-year standing in Childhood and Youth Studies, or permission of the department.
Seminar three hours a week.

CHST 4003 [0.5 credit]
History of 'The African Child'
Students will analyze the history of the figure of ‘the African child’ using a range of visual, sources from colonial officials, anthropologists, historians, advertisers, charity and development workers, and African children themselves.
Includes: Experiential Learning Activity
Also listed as AFRI 4003.
Precludes additional credit for CHST 4001 if taken in 2014-15.
Prerequisite(s): fourth-year standing.
Seminar three hours a week.

CHST 4004 [0.5 credit]
Theories of Inclusion in Childhood and Youth Education
An examination of the ways that educational discourses construct and perpetuate marginalization of disadvantaged individuals across historical, political, and educational contexts. Students will explore inclusive and exclusive approaches to education and care and how these discursive and material conditions shape the learning experiences of children.
Prerequisite(s): third-year standing in Childhood and Youth Studies, or permission of the department.
Seminar three hours a week.

CHST 4101 [0.5 credit]
Children, Youth, and Popular Culture
A critical examination how popular culture, including consumer culture and digital media, mediates the identities, aspirations, and experiences of children and youth. Students will engage in critical dialogue about media culture and ideology and use cultural production to explore counter-narratives to problematic media representations.
Prerequisite(s): fourth-year standing in Childhood and Youth Studies, or permission of the department.
Seminar three hours a week.

CHST 4102 [0.5 credit]
Queer and Trans Youth
An examination of the ways that queer and trans youth have been conceptualized in research, media, literature, policy, and education. A range of multimedia sources will be used to explore the ways queer and trans youth are using language to render themselves intelligible.
Prerequisite(s): fourth-year standing in Childhood and Youth Studies or Women's and Gender Studies, or permission of the department.
Seminar three hours a week.
CHST 4900 [0.5 credit]
Independent Study
A reading or research course for students who wish to investigate a particular topic of interest within Childhood and Youth Studies. Students may not take more than one credit of Independent Study in their total program.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in Childhood and Youth Studies and permission of the CHST Program Advisor.

CHST 4908 [1.0 credit]
Honours Research Project
Interdisciplinary research project for students in the Honours Research Project stream. Projects will be completed under the supervision of a CHST faculty member. Students must contact the CHST Program Advisor to request approval to register in this course.
Includes: Experiential Learning Activity
Prerequisite(s): CHST 3101, fourth-year standing in Childhood and Youth Studies with a Major CGPA of 10.0 or higher, and permission of the CHST Program Advisor.

Cognitive Science
This section presents the requirements for programs in:
• Cognitive Science with Concentration in Philosophical and Conceptual Issues Bachelor of Cognitive Science Honours
• Cognitive Science with Concentration in Language and Linguistics Bachelor of Cognitive Science Honours
• Cognitive Science with Concentration in the Biological Foundations of Cognition Bachelor of Cognitive Science Honours
• Cognitive Science with Concentration in Cognition and Psychology Bachelor of Cognitive Science Honours
• Cognitive Science with Concentration in Cognition and Computation Bachelor of Cognitive Science Honours
• Cognitive Science Bachelor of Cognitive Science
• Post-Baccalaureate Diploma in Cognitive Science

Program Requirements
Cognitive Science with Concentration in Philosophical and Conceptual Issues
Bachelor of Cognitive Science Honours (20.0 credits)
A. Credits Included in the Major CGPA (15.5 credits)
1. 1.0 credit from:
   1.0
   - CGSC 1001 [0.5] Mysteries of the Mind
   - FYSM 1607 [1.0] Cognitive Science: Thinking and Knowing
   - PHIL 1301 [0.5] Mind, World, and Knowledge

2. 1.0 credit in:
   1.0
   - CGSC 2001 [0.5] Theories in Cognitive Science
   - CGSC 2002 [0.5] Methods in Cognitive Science

3. 1.0 credit in:
   1.0
   - CGSC at the 3000-level or above

4. 0.5 credit from:
   0.5
   - CGSC 1005 [0.5] Computational Methods in Cognitive Science

B. 0.5 credit from:
   0.5
   - CGSC 3908 [0.5] Honours Seminar in Cognitive Science
   - CGSC 4909 [1.0] Honours Thesis

OR
b. Project pathway
   - CGSC 4909 [1.0] Honours Project
   and 0.5 credit in CGSC at the 3000-level or above

OR
c. Coursework pathway
   1.5 credits in CGSC, COMP, LING, NEUR, PHIL, or PSYC at the 3000-level or above

13. 4.5 credits in the concentration:
   4.5
   a. 4.0 credits from:
      - CGSC 3004 [0.5] Philosophy and Cognitive Science
      - PHIL 2301 [0.5] Introduction to the Philosophy of Science
      - PHIL 2504 [0.5] Language and Communication
      - PHIL 3104 [0.5] The Roots of Analytic Philosophy
      - PHIL 3301 [0.5] Issues in the Philosophy of Science
      - PHIL 3306 [0.5] Symbolic Logic
      - PHIL 3501 [0.5] Philosophy of Cognitive Science
      - PHIL 3502 [0.5] Mind and Action
      - PHIL 3504 [0.5] Pragmatics
      - PHIL 3506 [0.5] Semantics
      - PHIL 3530 [0.5] Philosophy of Language

5. 0.5 credit in:
   0.5
   - CGSC 3601 [0.5] Artificial Intelligence and Cognitive Science

6. 0.5 credit in:
   0.5
   - LING 1001 [0.5] Introduction to Linguistics I

7. 1.0 credit in:
   1.0
   - LING 2005 [0.5] Linguistic Analysis
   - LING 2007 [0.5] Phonetics

8. 1.0 credit in:
   1.0
   - PHIL 2001 [0.5] Introduction to Logic
   - PHIL 2501 [0.5] Introduction to Philosophy of Mind

9. 0.5 credit from:
   0.5
   - CGSC 3004 [0.5] Philosophy and Cognitive Science
   - PHIL 2301 [0.5] Introduction to the Philosophy of Science
   - PHIL 2504 [0.5] Language and Communication
   - PHIL 3104 [0.5] The Roots of Analytic Philosophy
   - PHIL 3301 [0.5] Issues in the Philosophy of Science
   - PHIL 3306 [0.5] Symbolic Logic
   - PHIL 3501 [0.5] Philosophy of Cognitive Science
   - PHIL 3502 [0.5] Mind and Action
   - PHIL 3504 [0.5] Pragmatics
   - PHIL 3506 [0.5] Semantics
   - PHIL 3530 [0.5] Philosophy of Language

10. 2.0 credits in:
    2.0
    - PSYC 1001 [0.5] Introduction to Psychology I
    - PSYC 1002 [0.5] Introduction to Psychology II
    - PSYC 2001 [0.5] Introduction to Research Methods in Psychology
    - PSYC 2700 [0.5] Introduction to Cognitive Psychology

11. 0.5 credit from:
    0.5
    - NEUR 1202 [0.5] Neuroscience of Mental Health and Psychiatric Disease
    - PSYC 2307 [0.5] Human Neuropsychology I

12. 1.5 credits from:
    1.5
    a. Thesis pathway
       - CGSC 3908 [0.5] Honours Seminar in Cognitive Science
       - CGSC 4909 [1.0] Honours Thesis

    OR

    b. Project pathway
       - CGSC 4909 [1.0] Honours Project
       and 0.5 credit in CGSC at the 3000-level or above

    OR

    c. Coursework pathway
       1.5 credits in CGSC, COMP, LING, NEUR, PHIL, or PSYC at the 3000-level or above

13. 4.5 credits in the concentration:
    4.5
    a. 4.0 credits from:
       - CGSC 3004 [0.5] Philosophy and Cognitive Science
       - PHIL 2301 [0.5] Introduction to the Philosophy of Science
       - PHIL 2504 [0.5] Language and Communication
       - PHIL 2540 [0.5] Personal Identity and the Self
       - PHIL 3104 [0.5] The Roots of Analytic Philosophy
       - PHIL 3140 [0.5] Epistemology
PHIL 3301 [0.5] Issues in the Philosophy of Science
PHIL 3306 [0.5] Symbolic Logic
PHIL 3501 [0.5] Philosophy of Cognitive Science
PHIL 3502 [0.5] Mind and Action
PHIL 3504 [0.5] Pragmatics
PHIL 3506 [0.5] Semantics
PHIL 3530 [0.5] Philosophy of Language
b. 0.5 credit from:
PHIL 4055 [0.5] Lexical Semantics
PHIL 4210 [0.5] Seminar in Philosophy of Language or Linguistics
PHIL 4220 [0.5] Seminar in philosophy of Mind or Cognition
PHIL 4230 [0.5] Seminar in Metaphysics, Epistemology, or Philosophy of Science
PHIL 4503 [0.5] Special Topic in Philosophy of Computing
PHIL 4505 [0.5] Formal Semantics

B. Credits not included in the Major (4.5 credits)

14. 4.5 credits in free electives. 4.5

Total Credits 20.0

Note: normally, students may not offer more than one credit of independent study (eg. CGSC 4801 Independent Study and CGSC 4802 Independent Study) in their total program, including independent study credits taken through other departments.

Cognitive Science with Concentration in Language and Linguistics
Bachelor of Cognitive Science Honours (20.0 credits)

A. Credits Included in the Major CGPA (15.5 credits)

1. 1.0 credit from:
   CGSC 1001 [0.5] Mysteries of the Mind
   FYSM 1607 [1.0] Cognitive Science: Thinking and Knowing

Post-Baccalaureate Diploma in Cognitive Science (4.0 credits)

Admission to this program requires the permission of the Department of Cognitive Science. Normally, students are required to have completed an undergraduate degree with a minimum B average or higher to be admitted. Applications will be reviewed on a case-by-case basis.

Requirements:
1. 0.5 credit from:
   - CGSC 2001 [0.5] Theories in Cognitive Science
   - CGSC 2002 [0.5] Methods in Cognitive Science
2. 1.0 credit in:
   - CGSC 3601 [0.5] Artificial Intelligence and Cognitive Science
   - CGSC 3908 [0.5] Honours Seminar in Cognitive Science
3. 1.5 credits in CGSC at the 3000-level or above
4. 1.0 credit from:
   - CGSC 4908 [1.0] Honours Thesis
   - CGSC 4909 [1.0] Honours Project

Total Credits 4.0

Regulations

In addition to the program requirements listed in this section, students must satisfy the academic regulations of the university, and the faculty regulations for the Bachelor of Cognitive Science.

Academic Regulations and Requirements for the Bachelor of Cognitive Science Degree

The regulations presented below apply to all Bachelor of Cognitive Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.Cog.Sc. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM (one 1.0-credit FYSM or two 0.5-credit FYSM's) and can only register in a FYSM while they have first-year standing in their B.Cog.Sc. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

Change of Program Within the B.Cog.Sc. Degree

Students may transfer to a program within the B.Cog.Sc. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.Cog.Sc. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

Mention : Français

Students registered in the B.Cog.Sc. may earn the notation Mention: Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below.

Students in the B.Cog.Sc. Honours program must present:
1. 1.0 credit in the French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level taken in French. These credits may come from any of Philosophy, Psychology, Computer Science, Linguistics, Neuroscience, or Cognitive Science, without restriction.

Students in the B.Cog.Sc. program must present:
1. 1.0 credit in the French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level taken in French. This credit may come from any of Philosophy, Psychology, Computer Science, Linguistics, Neuroscience, or Cognitive Science, without restriction.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Regulations

Post-Baccalaureate Diploma

In addition to the requirements presented here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

Definition

A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:
• qualify a candidate for consideration for entry into a master’s program, or
• bring a candidate who already possesses a bachelor’s degree up to a level of a bachelor’s degree of 20.0 credits or more in another discipline, or
• provide a candidate who already possesses a twenty-credit bachelor’s degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas, or
• provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

Program Requirements
- A post-baccalaureate diploma is normally constituted of a minimum of 3.0 credits to a maximum of 5.0 credits of advanced undergraduate courses.
- A minimum of 3.0 residency credits counting toward the post-baccalaureate diploma.

English as a Second Language Requirement
In addition to the program requirements, completion of English as a Second Language (ESLA) courses may be required from the following sequence: ESLA 1300, ESLA 1500, ESLA 1900, ESLA 1905. No credits from this sequence will be counted toward the post-baccalaureate diploma.

Continuation
All post-baccalaureate diploma students are expected to complete their diploma requirements within two calendar years after the date of initial registration. After this period student may be withdrawn.

Graduation
- A candidate for a post-baccalaureate diploma must have an overall CGPA of at least 6.5 to graduate.
- A candidate for a post-baccalaureate diploma must obtain a grade of C- or higher in each course taken in fulfillment of the program requirements.
- Students should consult with the Department, School or Institute when planning their diploma and selecting courses.

Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy

Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study.

The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton’s co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job.

It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.
Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

**Work Term Assessment and Evaluation**
To obtain a Satisfactory grade for the co-op work term students must have:
1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account. Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

**Voluntary Withdrawal from the Co-op Option**
Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**
Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:
1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

**International Students**
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit.

Students are advised to discuss the application process and requirements with the International Student Services Office.

**Bachelor of Cognitive Science Honours: Co-op Admission and Continuation Requirements**
- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:
1. Registered as a full-time student in the Bachelor of Cognitive Science program;
2. Obtained and maintained an overall CGPA of 8.50 or higher;

Bachelor of Cognitive Science Honours students must successfully complete three (3) work terms to obtain the Co-op designation.

Admissions Information

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

• Bachelor of Cognitive Science (Honours)
• Bachelor of Cognitive Science

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section "English Language Requirements" in the Admissions Requirements and Procedures section of this Calendar. The cut-off average for admission will be set annually and will normally be above the minimum requirement.

Advanced Standing

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Co-op Option

Direct Admission to the First Year of the Co-op Option

Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Cognitive Science;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Admissions Information

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Diploma

• Post-Baccalaureate Diploma in Cognitive Science

Admission to this program requires the permission of the Department of Cognitive Science. Normally, students are required to have completed an undergraduate degree with a minimum B average or higher to be admitted. Applications will be reviewed on a case-by-case basis.

Cognitive Science (CGSC) Courses

CGSC 1001 [0.5 credit]
Mysteries of the Mind

Challenges faced in understanding the mind, and some of the approaches cognitive science has brought to bear on them. Topics may include the nature of knowledge, how we learn, the extent to which human thinking is rational, biases in thinking, and evolutionary influences on cognition.

Lectures three hours per week.

CGSC 1005 [0.5 credit]
Computational Methods in Cognitive Science

Introduction to computational methods, with an emphasis on programming. Topics and assignments will focus on applications in cognitive science. No prior computing experience required.

Includes: Experiential Learning Activity

Lecture three hours and tutorial one and a half hours a week.
CGSC 2001 [0.5 credit]
Theories in Cognitive Science
An integrated background of the discipline of Cognitive Science, with an historical overview (1940's onward) and examination of the extent to which the discipline has assimilated the collective knowledge of contributing disciplines (e.g., psychology, philosophy, linguistics, artificial intelligence and neuroscience).
Prerequisite(s): second-year standing and FYSM 1607 or CGSC 1001, or permission of the Department.
Lectures three hours a week.

CGSC 2002 [0.5 credit]
Methods in Cognitive Science
Selected topics in cognitive science covered from the perspectives of psychology, computer science, linguistics, philosophy, and other related disciplines. Students may be required to complete independent research projects. Includes: Experiential Learning Activity
Prerequisite(s): CGSC 1001 or FYSM 1607, second year standing, or permission of the Department. Restricted to students enrolled in B.Cog.Sc. programs.
Seminars and tutorials six hours per week.

CGSC 3004 [0.5 credit]
Philosophy and Cognitive Science
An examination of the significance and role of philosophy in cognitive science. Topics may include: philosophical methods for studying the mind, prospects for naturalizing consciousness and intentionality, assessing competing models of the mind.
Prerequisite(s): CGSC 2001 and PHIL 2501, and third-year standing.
Seminar three hours per week.

CGSC 3201 [0.5 credit]
Cognitive Processes
An examination of research findings on cognitive processes. Topics may include attention, speech perception, memory, intelligence, reasoning, learning, working memory, reading, and mathematics.
Prerequisite(s): third-year standing, and CGSC 2001 or PSYC 2700.
Seminar three hours per week.

CGSC 3301 [0.5 credit]
Language and Cognitive Science
Issues related to language and cognitive science are examined through a detailed consideration of selected topics.
Prerequisite(s): third-year standing, and CGSC 2001.
Seminar three hours per week.

CGSC 3501 [0.5 credit]
Cognitive Neuroscience
Issues related to the role of cognitive neuroscience research in cognitive science are examined through a detailed consideration of selected topics.
Prerequisite(s): third-year standing and CGSC 2001.
Seminar, three hours per week.

CGSC 3601 [0.5 credit]
Artificial Intelligence and Cognitive Science
An introduction to the contribution of artificial intelligence and computer modeling of cognitive processes to cognitive science.
Includes: Experiential Learning Activity
Precludes additional credit for CGSC 4001.
Prerequisite(s): third-year standing and CGSC 2002 and (CGSC 1005 or COMP 1005). Restricted to students enrolled in B.Cog.Sc. Honours.
Seminars and labs six hours per week.

CGSC 3704 [0.5 credit]
Cognitive Science and the Digital Humanities
Exploration of the roles of human and artificial cognition in the digital humanities. Topics may include virtual and augmented reality as applied to the humanities, cognitive issues in hypertext and hypermedia; linguistic and philosophical considerations in digital media, cognitive narratology, and artificial intelligence.
Also listed as DIGH 3704.
Prerequisite(s): CGSC 1001; CGSC 2001 or DIGH 2001; and third-year standing.
Seminar three hours per week.

CGSC 3908 [0.5 credit]
Honours Seminar in Cognitive Science
Major theories and empirical approaches within Cognitive Science are examined through a detailed consideration of selected topics. Students are required to complete independent research projects to prepare for their fourth-year honours theses.
Includes: Experiential Learning Activity
Precludes additional credit for CGSC 3001 (no longer offered) and CGSC 3002 (no longer offered).
Prerequisite(s): third year standing, CGSC 2001 and CGSC 2002, and enrolment in B. Cog. Sc. Honours with a CGPA in the major requirements of 8.0.
Seminars and tutorials six hours per week.

CGSC 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

CGSC 4601 [0.5 credit]
Cognitive Modelling in Cognitive Science
Introduction to the field of cognitive modelling. Different modelling systems and how to evaluate them against human data; how to create cognitive models using the ACT-R cognitive architecture.
Prerequisite(s): third year standing, CGSC 2001, and (CGSC 1005 or COMP 1005).
Also offered at the graduate level, with different requirements, as CGSC 5106, for which additional credit is precluded.
Seminar three hours per week, tutorial one and a half hours per week.
CGSC 4801 [0.5 credit]
Independent Study
A reading or research course for selected students who wish to investigate a particular topic of interest. Normally students may not offer more than one credit of independent study in their total program (including independent study credits taken through other departments).
Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing and permission of the Department.

CGSC 4802 [0.5 credit]
Independent Study
A reading or research course for selected students who wish to investigate a particular topic of interest. Normally students may not offer more than one credit of independent study in their total program (including independent study credits taken through other departments).
Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing and permission of the Department.

CGSC 4900 [0.5 credit]
Special Topics in Cognitive Science
The topic of this course will vary from year to year. Students may register in more than one section of CGSC 4900 but may register in each section only once. Prerequisite(s): each section will have its own prerequisites and permission of the department if is required.
Seminar three hours per week.

CGSC 4908 [1.0 credit]
Honours Thesis
Interdisciplinary thesis. In developing a thesis, students must consult the Undergraduate Supervisor. Only the Undergraduate Supervisor can assign a supervisor or grant approval to register in this course. Faculty regulations governing Honours Research Essays and Honours Theses apply.
Includes: Experiential Learning Activity
Prerequisite(s): fourth year standing, CGSC 3908, and enrollment in B.Cog.Sc. Honours with a major CGPA of 8.0.

CGSC 4909 [1.0 credit]
Honours Project
Interdisciplinary project. Students engage in one or more group research projects.
Includes: Experiential Learning Activity
Precludes additional credit for CGSC 4908.
Prerequisite(s): 4th year standing, enrollment in B.Cog.Sc. Honours.
Seminar

Communication and Media Studies
This section presents the requirements for programs in:
### A. Credits Included in the Communication Studies Major CGPA (7.0 credits)

### B. Credits Not Included in the Major CGPA (11.0 credits):

1. **8.0 credits in electives not in Communication and Media Studies**
2. **3.0 credits in free electives**

### Total Credits

**20.0**

### Communication and Media Studies

#### B.Co.M.S. Combined Honours (20.0 credits)

Students already admitted to the B.CO.M.S. may register for a combined honours degree in Communication and Media Studies and any other discipline offered within the B.A. Honours degree as a Combined Honours.

#### A. Credits Included in the Communication Studies Major CGPA (7.0 credits)

1. **1.0 credit from:**
   - COMS 1001 [0.5] Foundations in Communication and Media Studies
   - COMS 1002 [0.5] Current Issues in Communication and Media
   - JOUR 1001 [0.5] Foundations: Journalism in Context
   - JOUR 1002 [0.5] Foundations: Practicing Journalism in a Diverse Society

2. **1.0 credit in:**
   - COMS 2003 [0.5] Theoretical Foundations in Communication and Media Studies
   - COMS 2004 [0.5] Introduction to Communication Research

3. **1.5 credits in:**
   - COMS 3001 [0.5] Quantitative Research in Communication
   - COMS 3002 [0.5] Qualitative Research in Communication
   - COMS 3500 [0.5] Current Issues in Communication and Media Theory

4. **1.5 credits from** the following, including at least 0.5 credit at the 3000-level:
   - FYSM 1217 [0.5] Selected Topics in Communication and Media Studies
   - COMS 2200 [0.5] Big Data and Society
   - COMS 2300 [0.5] Communication as Propaganda
   - COMS 2500 [0.5] Communication and Science
   - COMS 2501 [0.5] Media Law
   - COMS 2504 [0.5] Language and Communication
   - COMS 2600 [0.5] Communication and Culture
   - COMS 2700 [0.5] Global Media and Communication
   - COMS 3100 [0.5] Introduction to Political Management
   - COMS 3108 [0.5] Media Industries and the Network Society
   - COMS 3109 [0.5] Communication, Culture and Identity
The Academic Year (Graduate and Undergraduate Studies)

### B.Co.M.S. (15.0 credits)

The B.Co.M.S. is for students in second year or above who have been previously in the B.Co.M.S. Honours.

#### A. Credits Included in the Major CGPA (6.0 credits):

1. **1.0 credit from:**  
   - **COMS 1001 [0.5]** Foundations in Communication and Media Studies
   - **COMS 1002 [0.5]** Current Issues in Communication and Media
   - **JOUR 1001 [0.5]** Foundations: Journalism in Context
   - **JOUR 1002 [0.5]** Foundations: Practicing Journalism in a Diverse Society

2. **1.0 credit in:**  
   - **COMS 2003 [0.5]** Theoretical Foundations in Communication and Media Studies
   - **COMS 2004 [0.5]** Introduction to Communication Research

3. **1.5 credits in:**  
   - **COMS 3001 [0.5]** Quantitative Research in Communication
   - **COMS 3002 [0.5]** Qualitative Research in Communication
   - **COMS 3500 [0.5]** Current Issues in Communication and Media Theory

4. 2.5 credits, including at least 1.0 credit at the 3000 level, chosen from:
   - **FYSM 1217 [0.5]** Selected Topics in Communication and Media Studies
   - **COMS 2200 [0.5]** Big Data and Society
   - **COMS 2300 [0.5]** Communication as Propaganda
   - **COMS 2500 [0.5]** Communication and Science
   - **COMS 2501 [0.5]** Media Law
   - **COMS 2504 [0.5]** Language and Communication
   - **COMS 2600 [0.5]** Communication and Culture
   - **COMS 2700 [0.5]** Global Media and Communication
   - **COMS 3100 [0.5]** Introduction to Political Management
   - **COMS 3108 [0.5]** Media Industries and the Network Society

### Communication and Media Studies

#### B. Additional Requirements (13.0 credits)  13.0

1. The requirements from the other discipline must be satisfied.
2. Sufficient credits in free electives to total 20.0 credits for the program.

#### Total Credits  20.0
COMS 3109 [0.5] Communication, Culture and Identity
COMS 3302 [0.5] Political Communication
COMS 3308 [0.5] Critical Studies in Advertising and Consumer Culture
COMS 3310 [0.5] Critical Perspectives of Public Relations
COMS 3311 [0.5] Media and Communication in Regional Contexts
COMS 3400 [0.5] Ethical Controversies in Media and Communication
COMS 3401 [0.5] Communications Regulation in Canada
COMS 3403 [0.5] Communication, Technology and Culture
COMS 3404 [0.5] Music Industries
COMS 3406 [0.5] Media Audiences and Users
COMS 3407 [0.5] Comparative Media Studies
COMS 3410 [0.5] Visual Media and Communication
COMS 3411 [0.5] Alternative Media and Social Activism
COMS 3800 [0.5] Special Topic in Communication and Media Studies

B. Credits Not Included in the Major CGPA (9.0 credits):
5. 7.0 credits in electives not in communication and media studies 7.0
6. 2.0 credits in free electives 2.0
Total Credits 15.0

Specialization in Global Media and Communication
B.G.In.S. Honours (20.0 credits)

A. Credits Included in the Major CGPA (12.0 credits)
1. 4.5 credits in: Core Courses 4.5
   GINS 1000 [0.5] Global History
   GINS 1010 [0.5] International Law and Politics
   GINS 1020 [0.5] Ethnography, Globalization and Culture
   GINS 2000 [0.5] Ethics and Globalization
   GINS 2010 [0.5] Globalization and International Economic Issues
   GINS 2020 [0.5] Global Literatures
   GINS 3010 [0.5] Global and International Theory
   GINS 3020 [0.5] Places, Boundaries, Movements and Global Environmental Change
   GINS 4090 [0.5] Honours Seminar in Global and International Studies
2. 0.0 credit in: International Experience Requirement Preparation
   GINS 1300 [0.0] International Experience Requirement Preparation
3. 7.5 credits in: the Specialization
   a. 1.5 credits in: Foundations 1.5
      COMS 1001 [0.5] Foundations in Communication and Media Studies
      COMS 1002 [0.5] Current Issues in Communication and Media
      COMS 2700 [0.5] Global Media and Communication
   b. 1.0 credit in: Introductory Theory and Methods 1.0

B. Credits Not Included in the Major CGPA (8.0 credits)
4. 8.0 credits in: free electives 8.0
C. Additional Requirements
5. The International Experience requirement must be met.
6. The Language requirement must be met.

Total Credits 20.0

Stream in Global Media and Communication
B.G.In.S. (15.0 credits)

A. Credits Included in the Major CGPA (8.0 credits)
1. 4.0 credits in: Core Courses 4.0
   GINS 1000 [0.5] Global History
   GINS 1010 [0.5] International Law and Politics
   GINS 1020 [0.5] Ethnography, Globalization and Culture
   GINS 2000 [0.5] Ethics and Globalization
   GINS 2010 [0.5] Globalization and International Economic Issues
   GINS 2020 [0.5] Global Literatures
   GINS 3010 [0.5] Global and International Theory
   GINS 3020 [0.5] Places, Boundaries, Movements and Global Environmental Change
2. 4.0 credits from: the Stream 4.0
   a. Foundations
**Minor in Communication and Media Studies (4.0 credits)**

This Minor is open to all undergraduate degree students in programs other than Communication and Media Studies, and B.G.In.S. Global Media and Communication.

**Requirements:**

1. **1.0 credit from:**
   - COMS 1001 [0.5] Foundations in Communication and Media Studies
   - COMS 1002 [0.5] Current Issues in Communication and Media
   - JOUR 1001 [0.5] Foundations: Journalism in Context
   - JOUR 1002 [0.5] Foundations: Practicing Journalism in a Diverse Society

2. **1.0 credit in:**
   - COMS 2003 [0.5] Theoretical Foundations in Communication and Media Studies
   - COMS 2004 [0.5] Introduction to Communication Research

3. **2.0 credits, including at least 1.5 credit at the 3000 level, chosen from:**
   - FYSM 1217 [0.5] Selected Topics in Communication and Media Studies
   - COMS 2200 [0.5] Big Data and Society
   - COMS 2300 [0.5] Communication as Propaganda
   - COMS 2500 [0.5] Communication and Science
   - COMS 2501 [0.5] Media Law
   - COMS 2504 [0.5] Language and Communication
   - COMS 2600 [0.5] Communication and Culture

4. The Language requirement must be met.

**Total Credits** 15.0

---

**B. Credits Not Included in the Major CGPA (7.0 credits)**

3. **7.0 credits in:**
   - free electives

**C. Additional Requirements**

4. The remaining requirements of the major discipline(s) and degree must be satisfied.

**Total Credits** 4.0

---

**Journalism and Communication and Media Studies**

**B.J. Combined Honours (20.0 credits)**

This program is available only to students registered in the Bachelor of Journalism program.

**A. Credits Included in the Journalism Major CGPA (8.0 credits):**

1. **6.0 credits in:**
   - JOUR 1001 [0.5] Foundations: Journalism in Context
   - JOUR 1002 [0.5] Foundations: Practicing Journalism in a Diverse Society
   - JOUR 2201 [1.0] Fundamentals of Reporting
   - JOUR 2202 [0.5] Digital Journalism Toolkit
   - JOUR 2501 [0.5] Media Law
   - JOUR 3207 [0.5] Audio Journalism
   - JOUR 3208 [0.5] Video Journalism
   - JOUR 3225 [0.5] Reporting in Depth
   - JOUR 3235 [0.5] Digital Journalism
   - JOUR 3300 [0.5] Media Ethics in a Digital World
   - JOUR 4001 [0.5] Journalism Now - and Next

2. **2.0 credits from:**
   - Journalism Publications and/or Specialized Journalism and/or Professional Skills and/or Investigating Journalism (at least 0.5 credit must be taken from Journalism Publications courses and at least 0.5 credit must be taken from the Specialized Journalism courses)
   - Journalism Publications
### Major CGPA (7.0 credits):

1. **3.0 credits from:**
   - COMS 3001 [0.5] Quantitative Research in Communication
   - COMS 3002 [0.5] Qualitative Research in Communication
   - COMS 3500 [0.5] Current Issues in Communication and Media Theory

2. **2.5 credits, including at least 0.5 credit at the 3000 level, from:**
   - COMS 2200 [0.5] Big Data and Society
   - COMS 2300 [0.5] Communication as Propaganda
   - COMS 2500 [0.5] Communication and Science
   - COMS 2501 [0.5] Media Law
   - COMS 2504 [0.5] Language and Communication
   - COMS 2600 [0.5] Communication and Culture
   - COMS 2700 [0.5] Global Media and Communication
   - COMS 3100 [0.5] Introduction to Political Management
   - COMS 3108 [0.5] Media Industries and the Network Society
   - COMS 3109 [0.5] Communication, Culture and Identity
   - COMS 3302 [0.5] Political Communication
   - COMS 3308 [0.5] Critical Studies in Advertising and Consumer Culture
   - COMS 3310 [0.5] Critical Perspectives of Public Relations
   - COMS 3311 [0.5] Media and Communication in Regional Contexts
   - COMS 3400 [0.5] Ethical Controversies in Media and Communication
   - COMS 3401 [0.5] Communications Regulation in Canada
   - COMS 3403 [0.5] Communication, Technology and Culture
   - COMS 3404 [0.5] Music Industries
   - COMS 3406 [0.5] Media Audiences and Users
   - COMS 3407 [0.5] Comparative Media Studies
   - COMS 3410 [0.5] Visual Media and Communication
   - COMS 3411 [0.5] Alternative Media and Social Activism
   - COMS 3412 [0.5] Communication and Health

3. **2.0 credits from:**
   - COMS 4004 [0.5] Communication and Discourse
   - COMS 4006 [0.5] Professional Communication Research
   - COMS 4306 [0.5] Media and Conflict
   - COMS 4307 [0.5] Politics, Communication, and the Publicity State
   - COMS 4311 [0.5] Environmental Communication
   - COMS 4312 [0.5] Crisis and Risk Communication
   - COMS 4313 [0.5] Screen Studies
   - COMS 4315 [0.5] Communication and the Built Environment
   - COMS 4316 [0.5] Indigenous Media in Global Contexts
   - COMS 4317 [0.5] Digital Media and Global Network Society
   - COMS 4337 [0.5] Communication and Public Affairs Strategies
Communication and Media Studies

B.A. Combined Honours (20.0 credits)

Students enrolled in a single discipline within a B.A. Honours program may add Communication and Media Studies as a second discipline within a B.A. Combined Honours. Communication and Media Studies course requirements for the B.A. Combined Honours are the same as those for the B.Co.M.S. Combined Honours.

Regulations

The regulations presented in this section apply to all Bachelor of Communication Studies (B.Co.M.S.) programs.

In addition to program requirements, B.Co.M.S. students must satisfy the Academic Regulations of the University, and the same Breadth requirements that apply to students enrolled in B.A. programs, described below. Students should consult with the School of Journalism and Communication when selecting courses and planning their program.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew,
Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

**Subject codes:** ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

**Breadth Area 2: Humanities**

**Subject codes:** AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

**Breadth Area 3: Science, Engineering, and Design**

**Subject codes:** AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, ISIS, ITEC, MAAE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

**Breadth Area 4: Social Sciences**

**Subject codes:** ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GECO, GEM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

**Declared and Undeclared Students**

Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

**Change of Program Within the B.A. Degree**

Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

**Minors, Concentrations and Specializations**

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

**Mention : Français**

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:

1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this
Calendar for information regarding study on Exchange or Letter of Permission.

Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.
All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy
Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.
If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements
COOP 1000
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton’s co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job.

It is the student’s responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:
1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option
Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.
Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

**International Students**

All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

**Bachelor of Communication and Media Studies Honours: Co-op Admission and Continuation Requirements**

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Registered as a full-time student in the Bachelor of Communication and Media Studies Honours program;
2. Obtained and maintained an overall CGPA of 9.00 or higher.

Bachelor of Communication and Media Studies Honours students must successfully complete three (3) work terms to obtain the Co-op designation.

**Admissions Information**

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as **recommended** are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

**Degrees**

- Bachelor of Communication and Media Studies (Honours)
- Bachelor of Communication and Media Studies

**Admission Requirements**

**First Year**

**B. Co.M.S. (Honours)**

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or **anglais**). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section English.
Language Requirements in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

**B. Co.M.S.**

Access to the B.Co.M.S. degree is limited to B.Co.M.S. (Honours) students who apply to transfer.

**Advanced Standing**

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

**Co-op Option**

**Direct Admission to the First Year of the Co-op Option**

Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Communication and Media Studies (Honours);
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Communication and Media Studies (COMS) Courses**

**COMS 1001 [0.5 credit]**

**Foundations in Communication and Media Studies**

An exploration of past and present media, patterns of change, and key approaches to their study.

Includes: Experiential Learning Activity

Precludes additional credit for COMS 1000, COMM 1101. Lecture and discussion groups.

**COMS 1002 [0.5 credit]**

**Current Issues in Communication and Media**

An exploration of communication and media in relation to contemporary political, technological and cultural issues, with a focus on Canada.

Includes: Experiential Learning Activity

Precludes additional credit for COMS 1000, COMM 1101. Lecture and discussion groups.

**COMS 2003 [0.5 credit]**

**Theoretical Foundations in Communication and Media Studies**

The development of communication theory in the context of major social, economic and cultural periods and events. Emphasis on the central debates and traditions that have shaped and defined the field.

Precludes additional credit for COMM 2101 (no longer offered) and COMM 2100 (no longer offered).

Prerequisite(s): COMS 1001 and COMS 1002, or JOUR 1001 and JOUR 1002, and second-year standing in Communication and Media Studies (including BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures and discussion groups three hours a week.

**COMS 2004 [0.5 credit]**

**Introduction to Communication Research**

Introduction to the scientific method as interpreted through major traditions in Communication and Media Studies. The course addresses the relationship between theory and evidence, research design, ethics and data management.

Includes: Experiential Learning Activity

Precludes additional credit for COMM 2000 (no longer offered), COMM 2001 (no longer offered).

Prerequisite(s): COMS 1001 and COMS 1002, or JOUR 1001 and JOUR 1002, and second-year standing in Communication and Media Studies (including BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures and discussion three hours a week.

**COMS 2200 [0.5 credit]**

**Big Data and Society**

How big data and small data shape society. Databases as a form of media. Topics may include: data policy and regulation, the politics and ethics of big data, data and decision-making, and data as discourse.

Includes: Experiential Learning Activity

Prerequisite(s): Second-year standing or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3100 [0.5 credit]
Introduction to Political Management
Introduction to the field of political management. The institutional, legislative and ethical context in which party strategists, campaign managers, pollsters, lobbyists and civil society operate. Related administrative and communications skills. Also listed as POLM 3000, PSCI 3410. Precludes additional credit for COMM 3100 (no longer offered).
Prerequisite(s): third-year standing.
Lectures three hours a week.

COMS 3108 [0.5 credit]
Media Industries and the Network Society
Examines the theoretical frameworks and major issues and debates relating to media industries and institutions in Canada and internationally. Includes: Experiential Learning Activity Precludes additional credit for COMM 3108 (no longer offered).
Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM and BGInS related specializations and streams), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 3109 [0.5 credit]
Communication, Culture and Identity
Examines the relationship between media, communication, and identity categories. The course explores identity formation as a cultural phenomenon including questions of race, ethnicity, gender, class, and sexuality. Precludes additional credit for COMM 3109 (no longer offered).
Prerequisite(s): third-year standing in Communication and Media Studies (including BPAPM and BGInS related specializations and streams) or in the Minor in Critical Race Studies, or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 3302 [0.5 credit]
Political Communication
Examines the relationship between various kinds of communication and political activity in a variety of contexts. Case studies will be drawn from speeches, political campaigns, and debates, using a variety of media forms, from photographs to web sites. Includes: Experiential Learning Activity Precludes additional credit for COMM 3302 (no longer offered).
Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 3308 [0.5 credit]
Critical Studies in Advertising and Consumer Culture
A critical analysis of major constructs and basic mechanisms of advertising, social marketing and other aspects of consumer culture. The course examines the social, political-economic and cultural implications of consumer culture. Precludes additional credit for COMM 3301 (no longer offered) and COMM 3308 (no longer offered).
Prerequisite(s): third-year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures and discussion groups three hours a week.

COMS 3310 [0.5 credit]
Critical Perspectives of Public Relations
A critical examination of key aspects of public relations, including histories of PR, media representations of PR, gender and public relations, and the role of PR in business, politics and civil society. Includes: Experiential Learning Activity Precludes additional credit for COMM 4304 (no longer offered).
Prerequisite(s): third-year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 3311 [0.5 credit]
Media and Communication in Regional Contexts
Provides a historical overview of the development of media technologies, and an understanding of the place of media within the political, regulatory, and legal activities of different international regions (e.g., Europe, Asia, Africa, Latin America, etc.). Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM and BGInS related specializations and streams), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 3400 [0.5 credit]
Ethical Controversies in Media and Communication
Explores ethical problems and controversies relating to research in media and communication. Focuses on rights and responsibilities of researchers and practitioners as relates to media consumers, producers, and professional communicators in an age when communication circulates quickly within and across borders and other boundaries. Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM and BGInS related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.
COMS 3401 [0.5 credit]  
Communications Regulation in Canada  
Examines historical and contemporary issues in the regulation of communication practices and institutions in Canada.  
Precludes additional credit for COMM 3401 (no longer offered).  
Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.  
Lectures three hours a week.

COMS 3403 [0.5 credit]  
Communication, Technology and Culture  
Examines the relationship between communication technology and society, including factors that contribute to changes in the collection, storage and distribution of information and their cultural implications.  
Includes: Experiential Learning Activity  
Precludes additional credit for COMM 3403 (no longer offered).  
Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.  
Lecture three hours a week.

COMS 3404 [0.5 credit]  
Music Industries  
An introduction to the structure and history of the music industries.  
Also listed as MUSI 3403.  
Precludes additional credit for COMM 3404 (no longer offered).  
Prerequisite(s): second year standing.  
Lectures three hours a week.

COMS 3406 [0.5 credit]  
Media Audiences and Users  
Examines the role of audiences in contemporary media industries. Topics include history of audience studies, ratings and the audience commodity, active audience theory, and media fandom.  
Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.  
Lectures three hours a week.

COMS 3407 [0.5 credit]  
Comparative Media Studies  
The comparative study of one or more media organizations and/or types of media content with reference to their operation, audiences, and impacts.  
Also listed as JOUR 3407.  
Precludes additional credit for COMM 3407 (no longer offered).  
Prerequisite(s): Third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.  
Lectures three hours a week.

COMS 3410 [0.5 credit]  
Visual Media and Communication  
Examines the central importance of visual imagery in contemporary media, culture and everyday life. Draws connections between historical/contemporary explanations of ‘the visual,’ and how texts and technologies reflect the context and cultural values of the environments that produce them, and the challenges for regulation.  
Includes: Experiential Learning Activity  
Prerequisite(s): third year standing in Communication and Media Studies or permission of the School of Journalism and Communication.  
Lectures three hours a week.

COMS 3411 [0.5 credit]  
Alternative Media and Social Activism  
Examines links between media and activism through the lens of past and present social movements and protest events. Addresses leading theories that help conceptualize various types of activist movements, with a focus on the role of media in shaping activist identity and political opportunity.  
Includes: Experiential Learning Activity  
Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.  
Lectures three hours a week.

COMS 3412 [0.5 credit]  
Communication and Health  
The concept of health as a sociocultural phenomenon; the many ways that health issues are communicated, defined, represented, and framed.  
Prerequisite(s): third year standing in Communication and Media Studies or permission of the School of Journalism and Communication.  
Lectures three hours a week.
COMS 3500 [0.5 credit]
Current Issues in Communication and Media Theory
Examines theoretical debates and issues facing the field of Communication and Media Studies today.
Precludes additional credit for COMM 2101, COMM 2102 (no longer offered).
Prerequisite(s): COMS 2003 and third-year standing in Communication and Media Studies (including BGInS related specializations and streams), or permission of the School of Journalism and Communication.
Lectures and discussion groups three hours a week.

COMS 3800 [0.5 credit]
Special Topic in Communication and Media Studies
A selected topic not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the Communication and Media Studies program regarding the topic offered.
Prerequisite(s): third-year standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lecture three hours a week.

COMS 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

COMS 4004 [0.5 credit]
Communication and Discourse
Examines the development of theory and methods related to discourse and its use in the analysis of images and texts.
Precludes additional credit for COMM 4004 (no longer offered).
Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4006 [0.5 credit]
Professional Communication Research
Students will work in a team-based environment to carry out empirical research in support of current faculty-led projects. In addition to learning advanced research techniques, students will develop project management and collaborative research skills.
Includes: Experiential Learning Activity
Precludes additional credit for COMM 4000 (no longer offered), COMM 4002 (no longer offered).
Prerequisite(s): COMS 3001 or COMS 3002, and fourth-year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Workshop three hours a week.

COMS 4305 [0.5 credit]
Media and Religion
Critical examination of the ways religion mediates communicative practices, engages with media technologies, and is mediated in mainstream or popular culture. Topics may include: secularization and post-secularization; the politics of representation; religious organizations as communicative actors; fundamentalism.
Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4306 [0.5 credit]
Media and Conflict
Media representations of conflict such as war and terrorism, and how they influence the collective imagination.
Precludes additional credit for COMM 4306 (no longer offered).
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BGInS related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4307 [0.5 credit]
Politics, Communication, and the Publicity State
Examines the histories, key actors, issues and trends in political communication, including the shift of government communication from information to promotion, its reliance on publicity practices, issues and crisis management, and implications for democratic citizenship.
Precludes additional credit for COMM 4307 (no longer offered).
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4311 [0.5 credit]
Environmental Communication
Examines environmental, animal, and earth observing media and pays special attention to the production of visual materials. The course explores the influence of media systems on the production, dissemination, and meaning of environmental observations and looks at sites of contemporary environmental contention.
Prerequisite(s): fourth-year Honours standing and enrollment in Communication and Media Studies or in the Minor in Environmental and Climate Humanities, or permission of the School of Journalism and Communication.
Lectures three hours a week.
COMS 4312 [0.5 credit]
Crisis and Risk Communication
Examines crises and risks from the perspective of communication. The course explores the role of various media in shaping risk perceptions and constructions of crisis, the politics of crisis and risk management, symbolic dimensions in crisis construction, and ethical dilemmas. Includes: Experiential Learning Activity
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4313 [0.5 credit]
Screen Studies
Issues in the past, present and future of film, television and related media. Screens are examined as media that represent and shape values and culture, as technologies that are produced and purchased, and as objects that are regulated through policy.
Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4315 [0.5 credit]
Communication and the Built Environment
How communication occurs in conjunction with the built environment, with special attention to cultural artefacts such as houses, schools, factories, prisons, office buildings, roads, parks, and the urban (and suburban) environment. Various models, theories, and philosophies of the built environment are considered.
Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4316 [0.5 credit]
Indigenous Media in Global Contexts
Overview of Indigenous global media exploring film and film festivals, television networks, media arts, and the Internet. We will discuss struggles over mediated self-representation as well as debates over what constitutes Indigenous media relating to aesthetics, community affiliation, and identity.
Includes: Experiential Learning Activity
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BGInS related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4317 [0.5 credit]
Digital Media and Global Network Society
Critical and institutional approaches to the expansion of digital media in the context of international media regulation, globalization, media concentration and ownership, and the global flows of networked communication and information.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth year Honours standing in Communication and Media Studies (including BPAPM and BGInS related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4337 [0.5 credit]
Communication and Public Affairs Strategies
This hands-on course teaches students how to develop, design, and execute a public affairs strategy. Emphasis on understanding the interaction between public institutions and stakeholders and how effective public affairs strategies can be designed to help organizations achieve goals through public or opinion leader persuasion.
Includes: Experiential Learning Activity
Also listed as PAPM 4000.
Prerequisite(s): fourth-year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4401 [0.5 credit]
Global Internet Policy and Governance
Public interest and policy battles over critical internet resources and implications for development of the internet, citizens’ rights and freedoms, the economy, and democratic culture; common carriage, privacy, security and surveillance, access, speech rights, and diversity of information sources.
Includes: Experiential Learning Activity
Precludes additional credit for COMM 4401 (no longer offered).
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM and BGInS related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4403 [0.5 credit]
Digital Media Industries
Key approaches to the study of media as industries and how economics, markets and technologies intersect with social choices, politics and power to shape how decisions are made about the design, ownership, organization and control of media.
Includes: Experiential Learning Activity
Precludes additional credit for COMM 4403 (no longer offered).
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.
COMS 4405 [0.5 credit]
The Networked Self
How notions of identity are changing as we conduct our lives through networked media and communication such as social media, online search, the Internet of Things, and wearable devices. Subjectivity, personhood, posthumanism, algorithmic control, and privacy.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4406 [0.5 credit]
Open Government and Communication
The contemporary open government movement; how communication can be used to improve governance and to foster a more collaborative relationship between governments and citizens. Access to information, the challenges of open data, expectations of transparency, and models of citizen engagement/consultation.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year Honours standing in Communication and Media Studies (including BPAPM and BGInS related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4407 [0.5 credit]
Communication and Critical Data Studies
Theoretical perspectives, ethical problems, and contemporary issues relevant to communication and data studies. Students will critically examine the rise of ‘big data’ and ‘datafication’ as socio-technical phenomena that have become a crucial part of our communication landscape.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4408 [0.5 credit]
Creative Work
Contemporary trends affecting creative work in cultural industries. How careers in the arts, culture and media are increasingly desirable as a way for individual workers to find personal fulfillment and as a means of reinvigorating post-industrial economies.
Prerequisite(s): Fourth-year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4410 [0.5 credit]
Mobile Media
Critical examination of the history, development, and expansion of mobile media and its impact on culture, connectivity, and practice; locative media practices, geocoding, wireless communication, mobile technologies, and user experience in everyday life.
Prerequisite(s): Fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4411 [0.5 credit]
Algorithmic Culture
The ways in which computerized algorithms engage in the traditional work of culture: the sorting, classifying, and hierarchizing of people, places, objects, and ideas to produce new habits of thought, conduct, expression, and material outcomes.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4412 [0.5 credit]
Game Studies
Games as media. The history of gaming and mediated play in terms of technology and form, industry, labour, gender and subcultural practice.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4501 [0.5 credit]
Digital Media Production
This workshop introduces practice-based tools and techniques relevant in contemporary professional communication, such as basic web development, podcasting, and digital photography.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.
Workshop three hours a week.

COMS 4502 [0.5 credit]
Storytelling in the Digital Age
In this workshop students learn to write compelling stories for the digital age. They engage with examples of great storytelling across print and online platforms, from magazines and newspapers to blogs and podcasts, to gain a deeper understanding of what makes some stories stand out.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.
Workshop three hours a week.
COMS 4503 [0.5 credit]
Visualizing Social Media: Hashtags, keywords, & conversations
This workshop introduces a range of methods and practices in data mining and analytics. Techniques include data and text mining, data analysis (including sentiment and social network analysis), data visualization and modeling. Opportunity to work with analytics and mapping software on students’ own projects.
Includes: Experiential Learning Activity
Prerequisite(s): COMS 3001 and fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.
Workshop three hours a week.

COMS 4504 [0.5 credit]
Engaging the Public: Stakeholders, participation & consultation
This workshop introduces the challenges of conceptualizing and conducting public consultations. This includes audience or participant selection, a range of consultation techniques and formats, marketing and communication, analysis, as well as an awareness of policies and regulations governing consultations.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.
Workshop three hours a week.

COMS 4505 [0.5 credit]
Professional Writing and Speaking
In this workshop students develop skills in professional written communication, such as press releases, blogs, op-eds, policy briefs, and speeches. Students will also hone their public speaking skills presenting their written work in different formats.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.
Workshop three hours a week.

COMS 4506 [0.5 credit]
Event Management and Community Partnerships
This workshop introduces the stages of event management for potential community partners. This includes conceptualization, marketing and sponsorships, production and financing, to risk management.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.
Workshop three hours a week.
COMS 4607 [0.5 credit]
Communication and Food
Food in and as communication. Food and identity, food and culture, food environments, food systems, food politics, and food and community development.
Includes: Experiential Learning Activity
Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4608 [0.5 credit]
Sound Studies
How hearing and listening practices have changed over time, and the role of sound technology in shaping our understanding of each other, our world, and ourselves.
Prerequisite(s): fourth year Honours standing in Communication and Media Studies, or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4800 [0.5 credit]
Special Topic in Communication and Media Studies
A selected topic not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the Communication and Media Studies program regarding the topic offered.
Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.
Lectures three hours a week.

COMS 4908 [1.0 credit]
Honours Research Essay
The Honours Research Essay (HRE) provides eligible students with an opportunity to complete an independent research essay under the supervision of a faculty member. The HRE must be completed over two consecutive academic terms, beginning in the fall term.
Includes: Experiential Learning Activity
Precludes additional credit for COMM 4908 (no longer offered).
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BGINs related specializations), with a CGPA of 10.0 or higher, or permission of the Undergraduate Supervisor. Unscheduled.

Community Engagement (Minor)
This section presents the requirements for programs in:
• Minor in Community Engagement

Minor in Community Engagement (4.0 credits)
This minor is open to all undergraduate degree students in any program. Students in any Sociology or Anthropology major should select courses carefully if they wish to use courses from the major in their minor. Such students should always consult the department.

Requirements:
1. 0.5 credit from:

<table>
<thead>
<tr>
<th>Course Code</th>

### Courses Earned

#### Credits Earned

- 4.0 credits from courses:
  - GEOG 4021 [0.5] - Seminar in Culture, Identity and Place
  - GEOG 4022 [0.5] - Seminar in People, Resources and Environmental Change
  - GEOG 4323 [0.5] - Urban and Regional Planning
  - GINS 3300 [0.5] - Global and International Studies Abroad: Selected Topics
  - HIST 2811 [0.5] - Public History from Memory to Museums
  - HIST 3814 [0.5] - Crafting Digital History
  - HLTH 2003 [0.5] - Social Determinants of Health
  - HLTH 3101 [0.5] - Global Health
  - HLTH 3102 [0.5] - Indigenous Health in a Global World
  - HUMR 3504 [0.5] - Public Health and Human Rights
  - IDES 2600 [0.5] - Human Factors/Ergonomics in Design
  - IDES 3107 [0.5] - Design and Sustainability
  - IDES 3601 [0.5] - Research for Design
  - INDG 3001 [0.5] - Indigenous Governance
  - INDG 3011 [0.5] - Indigenous Rights, Resistance, and Resurgence
  - LAWS 2105 [0.5] - Social Justice and Human Rights
  - LAWS 3307 [0.5] - Youth and Criminal Law
  - LAWS 3503 [0.5] - Equality and Discrimination
  - LAWS 3504 [0.5] - Law and Aboriginal Peoples
  - LAWS 3800 [0.5] - Law of Environmental Quality
  - LAWS 4001 [0.5] - Law, Family and Gender
  - LAWS 4305 [0.5] - Criminal Justice Reform
  - LAWS 4311 [0.5] - Human Rights in Canadian Prisons
  - LAWS 4503 [0.5] - Law, Disability and Society
  - LAWS 4504 [0.5] - Indigenous Criminal Justice
  - LAWS 4603 [0.5] - Transitional Justice
  - LAWS 4607 [0.5] - Immigration and Refugee Law
  - LAWS 4800 [0.5] - Environment and Social Justice
  - MUSI 2008 [0.5] - Music of the World's Peoples
  - MUSI 3103 [0.5] - Music in Canada
  - MUSI 3302 [0.5] - Music and Gender II
  - MUSI 4102 [0.5] - Theory and Methods in Ethnomusicology
  - MUSI 4103 [0.5] - Ethnomusicology of Canadian Traditions
  - MUSI 4104 [0.5] - First Peoples Music in Canada
  - MUSI 4303 [0.5] - Music and Gender II
  - MUSI 4306 [0.5] - Music and Wellbeing in a Global Context
  - PHIL 1550 [0.5] - Introduction to Ethics and Social Issues
  - PHIL 2103 [0.5] - Philosophy of Human Rights
  - PHIL 2306 [0.5] - Philosophy and Feminism
  - PHIL 2307 [0.5] - Gender and Philosophy
  - PHIL 2380 [0.5] - Introduction to Environmental Ethics
  - PHIL 3340 [0.5] - Topics in Contemporary Social and Political Philosophy
  - PHIL 3350 [0.5] - Philosophy, Ethics, and Public Affairs
  - PHIL 3360 [0.5] - Philosophy, Economics, and Public Policy

5. The remaining requirements of the major discipline(s) and degree must be satisfied.

**Total Credits** 4.0

**Regulations**

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students, including the process of Academic Performance Evaluation. See the Academic Regulations of the University section of this Calendar.

**Computer Science**

This section presents the requirements for programs in:
- Computer Science B.C.S. Honours
- Computer Science Industrial Applications Internship Option B.C.S. Honours
- Computer Science Algorithms Stream B.C.S. Honours
- Computer Science Management and Business Systems Stream B.C.S. Honours
- Computer Science Software Engineering Stream B.C.S. Honours
- Computer Science Network Computing Stream B.C.S. Honours
- Computer Science Computer and Internet Security Stream B.C.S. Honours
- Computer Science Mobile Computing Stream B.C.S. Honours
- Computer Science Computer Game Development Stream B.C.S. Honours
- Computer Science B.C.S. Major
- Minor in Computer Science

**Program Requirements**

**Course Categories**

The following categories of courses are used in defining the program requirements in Computer Science.

**Computer Science (COMP)**

In addition to the courses with subject code COMP, the following courses offered by the Faculty of Engineering and Design are relevant to the B.C.S. program and the Combined Honours programs. These courses are counted as Computer Science credits in B.C.S., Minor in Computer Science and Combined Honours program requirements:

- SYSC 3303 [0.5] Real-Time Concurrent Systems
- SYSC 4005 [0.5] Discrete Simulation/Modeling
- SYSC 4106 [0.5] The Software Economy and Project Management
- SYSC 4507 [0.5] Computer Systems Architecture

**Breadth Electives**

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, the Sprott School
of Business and the Faculty of Science except for courses in COMP, MATH, STAT and the Prohibited Courses category.

**Natural Science Electives**
This category is defined with the B.Math. programs. See the Mathematics Program section of this Calendar for details.

**Prohibited Courses**
The following courses cannot be used for credit in the B.C.S., the Computer Science Minor, or any Combined Computer Science program:

- BUSI 2402 [0.5] Business Applications Development
- BUSI 3400 [0.5] Data and Information Management
- CGSC 1005 [0.5] Computational Methods in Cognitive Science
- COMP 1001 [0.5] Introduction to Computational Thinking for Arts and Social Science Students
- MATH 1009 [0.5] Mathematics for Business
- MATH 1119 [0.5] Linear Algebra: with Applications to Business
- ECON 1401/MATH 1401 Elementary Mathematics for Economics I
- ECON 1402/MATH 1402 Elementary Mathematics for Economics II

**Bachelor of Computer Science Honours**

**Bachelor of Computer Science Honours Streams**
B.C.S. Honours students may either register in the B.C.S. Honours degree below, or in one of the B.C.S. Honours streams that follow.

**Computer Science**

**B.C.S. Honours (20.0 credits)**

**A. Credits Included in the Major CGPA (9.0 credits)**

1. **6.5 credits in:***
   - COMP 1405 [0.5] Introduction to Computer Science I
   - COMP 1406 [0.5] Introduction to Computer Science II
   - COMP 1805 [0.5] Discrete Structures I
   - COMP 2401 [0.5] Introduction to Systems Programming
   - COMP 2402 [0.5] Abstract Data Types and Algorithms
   - COMP 2404 [0.5] Introduction to Software Engineering
   - COMP 2406 [0.5] Fundamentals of Web Applications
   - COMP 2804 [0.5] Discrete Structures II
   - COMP 3000 [0.5] Operating Systems
   - COMP 3004 [0.5] Object-Oriented Software Engineering
   - COMP 3005 [0.5] Database Management Systems
   - COMP 3007 [0.5] Programming Paradigms
   - COMP 3804 [0.5] Design and Analysis of Algorithms I

2. **0.5 credit in COMP at the 2000-level or above**

3. **2.0 credits in:**
   - COMP 4905 and 1.5 credits in COMP at the 4000-level, or
   - COMP 4906 and 1.0 credit in COMP at the 4000-level

**B. Credits Not Included in the Major CGPA (11.0 credits)**

4. **1.5 credits from:**
   - MATH 1007 [0.5] Elementary Calculus I
   - MATH 1104 [0.5] Linear Algebra for Engineering or Science
   - 0.5 credit in MATH at the 2000-level or above

5. **0.5 credit in:**
   - STAT 2507 [0.5] Introduction to Statistical Modeling I

6. **5.0 credits in Breadth Electives**

7. **4.0 credits in free electives.**

**Total Credits**
20.0

**Computer Science Industrial Applications Internship Option**

**B.C.S. Honours (20.0 credits)**
Registration in the internship option is by permission of the School only.

**Courses Delivered at the Premises of the Industrial Partner - 4.0 credits**

**Internship Courses - 4.0 credits**
- COMP 1910 [0.5] Internship
- COMP 1911 [0.5] Internship
- COMP 2910 [0.5] Internship
- COMP 2911 [0.5] Internship
- COMP 3910 [0.5] Internship
- COMP 3911 [0.5] Internship
- COMP 4910 [0.5] Internship
- COMP 4911 [0.5] Internship

**Courses to be Delivered On-Campus - 11.0 credits**

**Core BCS Courses - 11.0 credits**
- COMP 1405 [0.5] Introduction to Computer Science I
- COMP 1406 [0.5] Introduction to Computer Science II
- COMP 2401 [0.5] Introduction to Systems Programming
- COMP 2402 [0.5] Abstract Data Types and Algorithms
- COMP 2404 [0.5] Introduction to Software Engineering
- COMP 2406 [0.5] Fundamentals of Web Applications
- COMP 3000 [0.5] Operating Systems
- COMP 3004 [0.5] Object-Oriented Software Engineering
- COMP 3005 [0.5] Database Management Systems
- COMP 3007 [0.5] Programming Paradigms
- COMP 1805 [0.5] Discrete Structures I
- COMP 2804 [0.5] Discrete Structures II
- COMP course at the 2000-level or above [0.5]
- COMP 3804 [0.5] Design and Analysis of Algorithms I
- COMP course at the 4000-level [0.5]
- COMP course at the 4000-level [0.5]
- COMP course at the 4000-level [0.5]
- COMP 4905 [0.5] Honours Project
Math 1007 [0.5] Elementary Calculus I  
Math 1107 [0.5] Linear Algebra I  
Math course at the 2000-level or above [0.5]  
Stat 2507 [0.5] Introduction to Statistical Modeling I

**Breadth Electives - 5.0 credits**

- Elective 1 [0.5]  
- Elective 2 [0.5]  
- Elective 3 [0.5]  
- Elective 4 [0.5]  
- Elective 5 [0.5]  
- Elective 6 [0.5]  
- Elective 7 [0.5]  
- Elective 8 [0.5]  
- Elective 9 [0.5]  
- Elective 10 [0.5]  

**Computer Science Algorithms Stream B.C.S. Honours (20.0 credits)**

**A. Credits Included in the Major CGPA (10.0 credits)**

1. **6.5 credits in:**

- Comp 1405 [0.5] Introduction to Computer Science I  
- Comp 1406 [0.5] Introduction to Computer Science II  
- Comp 1805 [0.5] Discrete Structures I  
- Comp 2401 [0.5] Introduction to Systems Programming  
- Comp 2402 [0.5] Abstract Data Types and Algorithms  
- Comp 2404 [0.5] Introduction to Software Engineering  
- Comp 2406 [0.5] Fundamentals of Web Applications  
- Comp 2804 [0.5] Discrete Structures II  
- Comp 3000 [0.5] Operating Systems  
- Comp 3004 [0.5] Object-Oriented Software Engineering  
- Comp 3005 [0.5] Database Management Systems  
- Comp 3007 [0.5] Programming Paradigms  
- Comp 3804 [0.5] Design and Analysis of Algorithms I

2. **1.5 credits in:**

- Comp 3801 [0.5] Algorithms for Modern Data Sets  
- Comp 3803 [0.5] Introduction to Theory of Computation  
- Comp 4804 [0.5] Design and Analysis of Algorithms II

3. **0.5 credit in:**

- Comp 4001 [0.5] Distributed Computing

4. **1.5 credits in:**

- Comp 4905 and 1.0 credit in Comp at the 4000-level  
- Comp 4906 and 0.5 credit in Comp at the 4000-level

**B. Credits Not Included in the Major CGPA (10.0 credits)**

5. **1.5 credits from:**

- Math 1007 [0.5] Elementary Calculus I  
- Math 1104 [0.5] Linear Algebra for Engineering or Science  
- 0.5 credit in Math at the 2000-level or above

6. **0.5 credit in:**

- Stat 2507 [0.5] Introduction to Statistical Modeling I

**Total Credits 20.0**

- COMP 1406 [0.5] Introduction to Computer Science II
- COMP 2401 [0.5] Introduction to Systems Programming
- COMP 2402 [0.5] Abstract Data Types and Algorithms
- COMP 2404 [0.5] Introduction to Software Engineering
- COMP 2406 [0.5] Fundamentals of Web Applications
- COMP 2804 [0.5] Discrete Structures II
- COMP 3000 [0.5] Operating Systems
- COMP 3004 [0.5] Object-Oriented Software Engineering
- COMP 3005 [0.5] Database Management Systems
- COMP 3804 [0.5] Design and Analysis of Algorithms I
- MATH 4821 [0.5] Quantum Computing (Honours)
- MATH 4822 [0.5] Wavelets and Digital Signal Processing (Honours)

3. 0.5 credit from:

- COMP 3805 [0.5] Discrete Structures and Applications (Honours)

4. 3.0 credits in:

- MATH 2454 [0.5] Ordinary Differential Equations (Honours)
- MATH 3806 [0.5] Numerical Analysis (Honours)
- STAT 2559 [0.5] Basics of Statistical Modeling (Honours)
- STAT 2655 [0.5] Introduction to Probability with Applications (Honours)
- STAT 3558 [0.5] Elements of Probability Theory (Honours)
- STAT 3559 [0.5] Mathematical Statistics (Honours)

5. 0.5 credit from:

- STAT 3506 [0.5] Stochastic Processes and Applications (Honours)
- STAT 3553 [0.5] Regression Modeling (Honours)

6. 1.0 credit in STAT at the 4000 level

7. 0.5 credit in COMP at the 4000 level

8. 3.5 credits not in MATH, STAT, or COMP consisting of:

a. 1.0 credit in Natural Science electives
b. 2.5 credits from Natural Science, or Approved Arts and Social Sciences electives

Total Credits 20.0

Note:

The following courses offered by the School of Business and the Faculty of Engineering are treated as Computer Science courses in this program:

- BUSI 2400 [0.5] Foundations of Information Systems
- BUSI 4400 [0.5] IS Strategy, Management and Acquisition
- BUSI 4406 [0.5] Business Analytics
- SYSC 3303 [0.5] Real-Time Concurrent Systems
- SYSC 4005 [0.5] Discrete Simulation/Modeling
- SYSC 4507 [0.5] Computer Systems Architecture

Computer Science and Mathematics:
Concentration in Statistics and Computing
B. Math. Combined Honours (20.0 credits)

A. Credits Included in the Major CGPA (16.5 credits)

1. 5.0 credits in:

- MATH 1052 [0.5] Calculus and Introductory Analysis I
- MATH 1152 [0.5] Introductory Algebra I
- MATH 1800 [0.5] Introduction to Mathematical Reasoning
- MATH 2000 [1.0] Multivariable Calculus and Fundamentals of Analysis
- MATH 2052 [0.5] Calculus and Introductory Analysis II
- MATH 2100 [1.0] Algebra
- MATH 2152 [0.5] Introductory Algebra II
- STAT 1500 [0.5] Introduction to Statistical Computing

2. 6.0 credits in:

- COMP 1405 [0.5] Introduction to Computer Science I
- COMP 1406 [0.5] Introduction to Computer Science II
- COMP 2401 [0.5] Introduction to Systems Programming
- COMP 2402 [0.5] Abstract Data Types and Algorithms
- COMP 2404 [0.5] Introduction to Software Engineering
- COMP 2406 [0.5] Fundamentals of Web Applications
- COMP 2804 [0.5] Discrete Structures II
- COMP 3000 [0.5] Operating Systems
- COMP 3004 [0.5] Object-Oriented Software Engineering
- COMP 3005 [0.5] Database Management Systems
- COMP 3804 [0.5] Design and Analysis of Algorithms I

Total Credits 20.0

Minor in Computer Science (4.0 credits)

Only students pursuing an undergraduate program requiring at least 20.0 credits to graduate and who have completed at least 4.0 credits toward their degree with a minimum Overall CGPA of 7.0 may be admitted to the Minor in Computer Science, except for the following:

- Bioinformatics B.Sc. Honours
- Cognitive Science with Concentration in Cognition and Computation Bachelor of Cognitive Science Honours
- Computational Biochemistry B.Sc. Honours
- Computer Science B.C.S. Honours, including all streams
- Computer Systems Engineering Bachelor of Engineering
- Economics B.Econ. Honours with Concentration in Computational Analysis
- Information Resource Management B.I.T.
- Interactive Multimedia and Design B.I.T.
- Linguistics with a Concentration in Linguistic Theory (Computer Science) B.Sc. Honours
- Linguistics with a Concentration in Psycholinguistics and Communication Disorders (Computer Science) B.Sc. Honours
Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

**Participation Requirements**

**COOP 1000**

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

**Communication with the Co-op Office**

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

**Employment**

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

**Registering in Co-op Courses**

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final
academic term. Students may not finish their degree on a
co-op work term.

**Work Term Assessment and Evaluation**
To obtain a Satisfactory grade for the co-op work term
students must have:

1. A satisfactory work term evaluation by the co-op
   employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion
of each four-month work term. Reports are due on the
16th of April, August, and December and students are
notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace
supervisor. Should a student receive an unsatisfactory
rating from their co-op employer, an investigation by
the co-op program manager will be undertaken. An
unsatisfactory employer evaluation does not preclude a
student from achieving an overall satisfactory rating for the
work term.

**Graduation with the Co-op Designation**
In order to graduate with the co-op designation, students
must satisfy all requirements for their degree program
in addition to the requirements according to each co-op
program (i.e. successful completion of three or four work
terms).

Note: Participation in the co-op option will add up to one
additional year for a student to complete their degree
program.

**Voluntary Withdrawal from the Co-op Option**
Students may withdraw from the co-op option of their
degree program during a study term ONLY. Students at
work may not withdraw from the work term or the co-op
option until s/he has completed the requirements of the
work term.

Students are eligible to continue in their regular academic
program provided that they meet the academic standards
required for continuation.

**Involuntary or Required Withdrawal from the Co-op
Option**
Students may be required to withdraw from the co-op option
of their degree program for one or any of the
following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which
   the student has applied
5. Declining more than one job offer during the job search
   process
6. Continuing a job search after accepting a co-op
   position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op
   manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**
The Co-op and Career Services office administers the
regulations and procedures that are applicable to all co-
program options. All instances of a student's failure
during a work term or other issues directly related to their
participation in the co-op option will be reported to the
academic department.

Any decision made by the Co-op and Career Services
office can be appealed via the normal appeal process
within the University.

**International Students**
All International Students are required to possess a Co-
Work Permit issued by Immigration, Refugees and
Citizenship Canada before they can begin working. It is
illegal to work in Canada without the proper authorization.
Students will be provided with a letter of support to
accompany their application. Students must submit their
application for their permit before being permitted to
view and apply for jobs on the Co-op Services database.
Confirmation of a position will not be approved until a
student can confirm they have received their permit.
Students are advised to discuss the application process
and requirements with the International Student Services
Office.

**Bachelor of Computer Science Honours and
Major: Co-op Admission and Continuation Requirements**

- Maintain full-time status in each study term (2.0
  credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. A major CGPA of 8.00 or higher and an overall CGPA
   of 8.00 or higher;
2. Successfully completed 3.0 required credits in
   Computer Science, including one of COMP 2402 or
   COMP 2404;
3. Registered as a full-time student in the Bachelor of
   Computer Science program (2.0 credits).

Bachelor of Computer Science Honours and Major
students must successfully complete four (4) work terms to
obtain the Co-op designation.

**Co-op Work Term Course: COMP 3999**

**Admissions Information**
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

**Degree**
- B.C.S. (Major)
- B.C.S. (Honours)

**Admission Requirements**

**First Year**
The Ontario Secondary School Diploma (OSSD) or equivalent, including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and Calculus and Vectors.

**Advanced Standing**
Applications for admission beyond first year will be assessed on their individual merits. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected. Students will not receive credit for courses graded below C-.

**Co-op Option**

**Direct Admission to the First Year of the Co-op Option**
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Computer Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

**Computer Science (COMP) Courses**

**Notes:**
1. Some of the following Computer Science courses are cross-listed from other parts of the Calendar. In every such case, only one course is actually offered and the two numbers are alternate identifiers for this single course. Students in the B.C.S. program should register in such a course under the Computer Science (COMP) number.

**COMP 0999 [0.0 credit]**
COMP Matters

**COMP 1001 [0.5 credit]**
Introduction to Computational Thinking for Arts and Social Science Students
An introduction to computational thinking and its applications to the arts and social sciences. Students will gain computational thinking skills by exploring data representation, basic programming concepts, a selection of algorithms, and advanced usage of software packages for the arts and social sciences.
Precludes additional credit for COMP 1004 (no longer offered). This course cannot be taken for credit by students in Business, Engineering, Computer Science, Mathematics or Science.
Lectures three hours a week.

**COMP 1006 [0.5 credit]**
Introduction to Computer Science II
A second course in programming emphasizing problem solving and computational thinking. Topics include pseudocode, variables, conditionals, iteration, arrays, objects, functions, sorting, searching, and simulation.
Includes: Experiential Learning Activity
Precludes additional credit for BIT 2400, COMP 1405, ECOR 1041, ECOR 1042, ECOR 1051, ECOR 1606, ITEC 1400, ITEC 1401, SYSC 1005.
Lectures three hours a week, tutorial one a half hours a week.

**COMP 1005 [0.5 credit]**
Introduction to Computer Science I
A first course in programming, emphasizing problem solving and computational thinking. Topics include pseudocode, variables, conditionals, iteration, arrays, objects, functions, sorting, searching, and simulation.
Includes: Experiential Learning Activity
Precludes additional credit for BIT 1400, COMP 1405, ECOR 1041, ECOR 1042, ECOR 1051, ECOR 1606, ITEC 1400, ITEC 1401, SYSC 1005.
Lectures three hours a week, tutorial one and a half hours a week.

**COMP 1002 [0.5 credit]**
Introduction to Computer Science III
A second course in programming emphasizing problem solving and computational thinking in an object-oriented language. Topics include abstraction, mutable data structures, methods, inheritance, polymorphism, recursion, program efficiency, testing and debugging.
Includes: Experiential Learning Activity
Precludes additional credit for BIT 2400, BUSI 2402, COMP 1406, ITEC 2400, ITEC 2401, SYSC 2004.
Prerequisite(s): COMP 1005 or COMP 1405.
Lectures three hours a week, tutorial one and a half hours a week.
**COMP 1008 [0.5 credit] Math for Game Programmers**
Prerequisite(s): one Grade 12 university preparation mathematics course.
Lectures three hours a week, tutorial one and a half hours a week.

**COMP 1405 [0.5 credit] Introduction to Computer Science I**
A first course in programming for B.C.S. students emphasizing problem solving and computational thinking. Topics include pseudocode, variables, conditionals, iteration, arrays, objects, functions, sorting, searching, and simulation.
Includes: Experiential Learning Activity
Precludes additional credit for BIT 1400, COMP 1005, ECOR 1041, ECOR 1042, ECOR 1051, ECOR 1606, ITEC 1400, ITEC 1401, SYSC 1005.
Prerequisite(s): restricted to students registered in the B.C.S. program, combined Honours in Computer Science and Mathematics, Honours Computer Mathematics, and Honours Computer Statistics.
Lectures three hours a week, tutorial one and a half hours a week.

**COMP 1406 [0.5 credit] Introduction to Computer Science II**
A second course in programming for BCS students, emphasizing problem solving and computational thinking in an object-oriented language. Topics include abstraction, mutable data structures, methods, inheritance, polymorphism, recursion, program efficiency, testing and debugging.
Precludes additional credit for BIT 2400, BUSI 2402, COMP 1006, ITEC 2400, ITEC 2401, SYSC 2004.
Prerequisite(s): COMP 1005 or COMP 1405. Restricted to students registered in the B.C.S. program, combined Honours in Computer Science and Mathematics, Honours Computer Mathematics, and Honours Computer Statistics.
Lectures three hours a week, tutorial one and a half hours a week.

**COMP 1501 [0.5 credit] Introduction to Computer Game Design**
Introduction to computer game programming interfaces. Topics may include: game balance and level design; storytelling and narrative; basic game architecture; sprite-based games and isometric games; representation of scenes; user interaction; architecture of game consoles; development tools for game consoles; interaction with game peripherals.
Prerequisite(s): COMP 1005 or COMP 1405.
Lectures three hours a week, tutorial one and a half hours a week.

**COMP 1601 [0.5 credit] Introduction to Mobile Application Development**
Introduction to developing mobile applications using the Mac OS X platform. Topics include: the Objective-C programming language; development tools; framework APIs; and the Quartz graphic system. Extensive practical experience with development for Apple mobile devices such as the iPhone.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 1005 or COMP 1405.
Lecture/lab four hours a week.

**COMP 1805 [0.5 credit] Discrete Structures I**
Introduction to discrete mathematics and discrete structures. Topics include: propositional logic, predicate calculus, set theory, complexity of algorithms, mathematical reasoning and proof techniques, recurrences, induction, finite automata and graph theory. Material is illustrated through examples from computing.
Includes: Experiential Learning Activity
Precludes additional credit for MATH 1800.
Prerequisite(s): one Grade 12 university preparation mathematics course.
Lectures three hours a week, tutorial one hour a week.

**COMP 1910 [0.5 credit] Internship**
The internship exposes students to industrial software development via placement in a local enterprise. This course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.
Includes: Experiential Learning Activity
Prerequisite(s): Permission of the School and registration in internship option.

**COMP 1911 [0.5 credit] Internship**
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 1910 and registration in internship option.

**COMP 2401 [0.5 credit] Introduction to Systems Programming**
Introduction to system-level programming with fundamental OS concepts, procedures, primitive data types, user-defined types. Topics may include process management, memory management, process coordination and synchronization, inter-process communication, file systems, networking, pointers, heap and stack memory management, and system/library calls.
Precludes additional credit for SYSC 2006.
Prerequisite(s): (COMP 1006 or COMP 1406 or SYSC 2004) with a minimum grade of C-.
Lectures three hours a week, tutorial one and a half hours a week.
COMP 2402 [0.5 credit]
Abstract Data Types and Algorithms
Introduction to the design and implementation of abstract data types and to complexity analysis of data structures. Topics include: stacks, queues, lists, trees and graphs. Special attention is given to abstraction, interface specification and hierarchical design using an object-oriented programming language. Precludes additional credit for SYSC 2100. Prerequisite(s): (COMP 1006 or COMP 1406 or SYSC 2004) with a minimum grade of C-.
Lectures three hours a week.

COMP 2404 [0.5 credit]
Introduction to Software Engineering
Introduction to object-oriented software development, with emphasis on the design and implementation of maintainable, reusable software. Topics include abstraction, modularity, encapsulation, and an introduction to design patterns. Includes: Experiential Learning Activity Precludes additional credit for SYSC 3010, SYSC 3110. Prerequisite(s): COMP 2401 with a minimum grade of C-.
Lectures three hours a week, tutorial one and a half hours a week.

COMP 2406 [0.5 credit]
Fundamentals of Web Applications
Introduction to Internet application development; emphasis on computer science fundamentals of technologies underlying web applications. Topics include: scripting and functional languages, language-based virtual machines, database query languages, remote procedure calls over the Internet, and performance and security concerns in modern distributed applications. Includes: Experiential Learning Activity Precludes additional credit for SYSC 4504. Prerequisite(s): (COMP 1006 or COMP 1406 or SYSC 2004) with a minimum grade of C-.
Lectures three hours a week and tutorial one and a half hours a week.

COMP 2501 [0.5 credit]
Computer Game Design and Development
Topics may include: user interaction in multiplayer games, representation of animated scenes, tools for game character development, special effects, sound programming, game AI, motion planning and control, collision detection and physics, digital rights management. Includes: Experiential Learning Activity Prerequisite(s): COMP 1501, COMP 2401 with a minimum grade of C- and MATH 1104.
Lectures three hours a week, tutorial one and a half hours a week.

COMP 2601 [0.5 credit]
Mobile Applications
Development of applications for mobile environments taking advantage of gesture-based input and using location and presence services. Topics include introduction to low-level network services and mobile platforms, description of architectural patterns, principles of mobile development and interaction styles for network service usage. Includes: Experiential Learning Activity Prerequisite(s): COMP 1601. Lecture/lab four hours a week.

COMP 2801 [0.5 credit]
Introduction to Robotics
An introduction to the field of mobile robots and their applications from a computer science perspective. The course will discuss common robot programming architectures and strategies. Students will build various robot configurations and experiment with a variety of sensors using behavior-based programming. Includes: Experiential Learning Activity Precludes additional credit for COMP 1807 (no longer offered). Prerequisite(s): (COMP 1006 or COMP 1406 or SYSC 2004) with a minimum grade of C-.
Lab four hours a week.

COMP 2804 [0.5 credit]
Discrete Structures II
A second course in discrete mathematics and discrete structures. Topics include: counting, sequences and sums, discrete probability, basic statistics, recurrence relations, randomized algorithms. Material is illustrated through examples from computing. Prerequisite(s): COMP 1805 with a minimum grade of C-, or permission of the School of Computer Science for those in Combined Honours in Computer Science and Mathematics.
Lectures three hours a week.

COMP 2910 [0.5 credit]
Internship
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S. Includes: Experiential Learning Activity Prerequisite(s): COMP 1911 and registration in internship option.

COMP 2911 [0.5 credit]
Internship
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the BCS. Includes: Experiential Learning Activity Prerequisite(s): COMP 2910 and registration in internship option.
COMP 3000 [0.5 credit]
Operating Systems
Operating system implementation course stressing fundamental issues in design and how they relate to modern computer architectures. Assignments involve the modification and extension of a multitasking operating system.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4001.
Prerequisite(s): COMP 2401 with a minimum grade of C- and (COMP 2402 or SYSC 2100).
Lectures three hours a week, tutorial one and a half hours a week.

COMP 3002 [0.5 credit]
Compiler Construction
The structure, organization and design of the phases of a compiler are considered: lexical translators, syntactical translators, scope handlers, type checkers, code generators and optimizers. Components of a compiler will be implemented.
Prerequisite(s): (COMP 2402 or SYSC 2100).
Lectures three hours a week.

COMP 3004 [0.5 credit]
Object-Oriented Software Engineering
Development of object-oriented software systems: theory and practice. Topics include: Computer ethics, software development processes, requirement specification, class and scenario modeling, state modeling, UML, design patterns, traceability. Students are to complete a team project.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3020, SYSC 3120, SYSC 4120.
Prerequisite(s): COMP 2401 with a minimum grade of C-, (COMP 2404 or SYSC 3010 or SYSC 3110) with a minimum grade of C-, and (COMP 2406 or SYSC 4504).
Lectures three hours a week.

COMP 3005 [0.5 credit]
Database Management Systems
Introduces students to concepts of database management systems, database design and file structures. Topics include: entity-relationship modeling and object oriented database design, data models (relational, network and object oriented), the relational algebra, SQL, normalization theory, physical data organization, object oriented databases and OQL.
Precludes additional credit for BUSI 3400.
Prerequisite(s): COMP 1805 with a minimum grade of C-, and either COMP 2402 or (SYSC 2004 and SYSC 2100).
Lectures three hours a week.

COMP 3007 [0.5 credit]
Programming Paradigms
An introduction to alternative programming paradigms such as functional, constraint-based, concurrent, and logic programming.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3101.
Prerequisite(s): COMP 1805 with a minimum grade of C- and either COMP 2402 or (SYSC 2004 and SYSC 2100).
Lectures three hours a week.

COMP 3008 [0.5 credit]
Human-Computer Interaction
Fundamentals of the underlying theories, design principles, development and evaluation practices of human-computer interaction (HCI). Topics may include: theories of interaction, user interface frameworks, desktop, web, mobile, and immersive applications, usability inspection and testing methods, and qualitative and quantitative approaches to HCI research.
Prerequisite(s): (COMP 2404 or SYSC 3010 or SYSC 3110) and (COMP 2406 or SYSC 4504).
Lectures three hours a week.

COMP 3009 [0.5 credit]
Computer Graphics
An overview of computer graphics covering rendering, modeling, and animation. Topics include geometric primitives and modeling; image formation algorithms such as ray tracing and the Z-buffer; lighting, shading, and texture; and introduction to physics-based animation and character animation.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 2401 with a minimum grade of C-, (COMP 2402 or SYSC 2100), MATH 1007, and MATH 1104.
Lectures/lab four hours a week.

COMP 3106 [0.5 credit]
Introduction to Artificial Intelligence
Includes: Experiential Learning Activity
Precludes additional credit for COMP 4106 (no longer offered).
Prerequisite(s): (COMP 2402 or SYSC 2100) and (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 2804.
Lectures three hours a week.
COMP 3109 [0.5 credit]
Applied Cryptography and Authentication
Practical aspects of cryptography. Pseudo random number generation, symmetric cryptography (stream and block ciphers), modes of operation, hash functions, message and entity authentication protocols, zero knowledge, pitfalls deploying public-key encryption and digital signatures, key distribution, secret-sharing. Precludes additional credit for COMP 4109 (no longer offered).
Prerequisite(s): (COMP 2402 or SYSC 2100) and COMP 2804.
Lectures three hours a week.

COMP 3203 [0.5 credit]
Principles of Computer Networks
This is an introductory course to the field of Network Computing. Topics include: Protocol Architectures and Internetworking, Types of Networks, Communication Protocols, End-System and Network Traffic Management, Structure of Routing and Congestion Control. Includes: Experiential Learning Activity. Precludes additional credit for SYSC 4602. Prerequisite(s): COMP 2401 with a minimum grade of C-, (COMP 2402 or SYSC 2100).
Lectures three hours a week.

COMP 3301 [0.5 credit]
Technical Writing for Computer Science
Technical communication for computer science majors, concentrating on writing scientific papers and technical reports. Principles of clarity and precision in writing and communication. Practical exercises and readings from recent technical publications will be used. Prerequisite(s): (COMP 2402 or SYSC 2100) and (COMP 2404 or SYSC 3010 or SYSC 3110).
Lectures three hours a week.

COMP 3308 [0.5 credit]
Bioinformatics
This practical interdisciplinary course will provide a broad overview of bioinformatics in which computer science and mathematics are applied to solve problems in molecular biology. Topics include gene prediction, sequence alignment, phylogeny, molecular interactions, macromolecular structure prediction and biological databases. Includes: Experiential Learning Activity. Also listed as BIOL 3008. Prerequisite(s): BIOL 2200 or BIOL 2200, or permission of the Biochemistry Institute. Lecture two hours a week, computer workshop three hours a week.

COMP 3400 [0.5 credit]
Computational Logic and Automated Reasoning
Applications of formal logic in computer science. Symbolic logics such as classical predicate calculus are used to represent domain knowledge, to model computational problems and to solve them by means of automated reasoners. Applications include artificial intelligence, software engineering, data management and hardware verification. Prerequisite(s): COMP 2804.
Lectures three hours a week.

COMP 3501 [0.5 credit]
Foundations of Game Programming and Computer Graphics
Mathematical concepts of 3D engines. Topics may include: illumination and visibility determinations; quaternions; homogeneous coordinates; transforms; ray tracing; bump mapping; portal systems; polygonal techniques; shadows; and linear and rotational physics. Prerequisite(s): (COMP 2402 or SYSC 2100) and (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 2501.
Lectures three hours a week.

COMP 3801 [0.5 credit]
Algorithms for Modern Data Sets
Algorithm design techniques for modern data sets arising in, for example, data mining, web analytics, epidemic spreads, search engines and social networks. Topics may include: data mining, hashing, streaming, clustering, recommendation systems, link analysis, dimensionality reduction, online, social networking, game theoretic and probabilistic algorithms. Prerequisite(s): COMP 2804 with a minimum grade of B+. Lecture three hours a week.

COMP 3803 [0.5 credit]
Introduction to Theory of Computation
Theoretical aspects of computer science. Topics include: formal languages and automata theory, computability theory. Precludes additional credit for COMP 2805 (no longer offered). Prerequisite(s): COMP 2804.
Lectures three hours a week.

COMP 3804 [0.5 credit]
Design and Analysis of Algorithms I
An introduction to the design and analysis of algorithms. Topics include: divide-and-conquer, dynamic programming, linear programming, greedy algorithms, graph algorithms, NP-completeness. Also listed as MATH 3804. Prerequisite(s): (COMP 2402 or SYSC 2100) and either COMP 2804 or (MATH 2007 and MATH 2108).
Lectures three hours a week.
COMP 3805 [0.5 credit]
Discrete Structures and Applications (Honours)
Enumeration: inclusion and exclusion, recurrence relations, generating functions and applications. Graph theory: connectivity, planarity, Hamilton paths and Euler trails. Error-correcting codes. Designs and finite geometries. Symmetry and counting. Also listed as MATH 3855.
Precludes additional credit for MATH 3805 (no longer offered) and MATH 3825.
Prerequisite(s): MATH 2100 or a grade of B or higher in MATH 2108 or MATH 3101.
Lectures three hours a week and one hour tutorial.

COMP 3807 [0.5 credit]
Mathematical Software
Incorporation of basic numerical methods into efficient, reliable software. The course includes examination of existing software systems, e.g., linear systems, non-linear systems, optimization, or differential equations. Includes: Experiential Learning Activity
Also listed as MATH 3807.
Prerequisite(s): A grade of C- or higher in COMP 3806 or MATH 3806.

COMP 3910 [0.5 credit]
Internship
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 2911 and registration in internship option.

COMP 3911 [0.5 credit]
Internship
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 3910 and registration in internship option.

COMP 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

COMP 4000 [0.5 credit]
Distributed Operating Systems
An advanced course emphasizing the principles of distributed operating systems including networking protocols, distributed file systems, remote IPC mechanisms, graphical user interfaces, load balancing, and process migration. Case studies include current "standards" as well as novel systems under development. Includes: Experiential Learning Activity
Prerequisite(s): (COMP 3000 or SYSC 4001) and (COMP 3203 or SYSC 4602).
Lectures three hours a week.

COMP 4001 [0.5 credit]
Distributed Computing
Overview of distributed computing. Topics include: computational models, communication complexity, design and analysis of distributed algorithms and protocols, fault-tolerant protocols, synchronous computations. Applications may include: communication in data networks, control in distributed system (e.g., election, distributed mutual exclusion), manipulation of distributed data (e.g., ranking).
Prerequisite(s): COMP 1805 with a minimum grade of C-, COMP 2401 with a minimum grade of C-, and (COMP 2406 or SYSC 4504).
Lectures three hours a week.

COMP 4002 [0.5 credit]
Real-Time 3D Game Engines
The design and implementation of game engines for real-time 3D games including topics such as camera control, environmental effects, articulated models, terrain, vegetation, collision detection, particles, emitters, triggers, portals, waypoints, mirrors, and shadows.
Prerequisite(s): COMP 2404 or SYSC 3010 or SYSC 3110.
Lectures three hours a week.

COMP 4003 [0.5 credit]
Transaction Processing Systems
Concepts and architectures of transaction processing systems and on-line transaction processing, with emphasis on data integration systems. Transaction properties and models, embedded-SQL, active rules, consistency maintenance, serializability, concurrency control, recovery, data integration systems and federated databases, introduction to transactions in web services and workflow systems.
Prerequisite(s): (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 3005.
Lectures three hours a week.
COMP 4004 [0.5 credit]
Software Quality Assurance
Introduction to the theory and practice of Software Quality Assurance. Topics include: equivalence partitioning, test-driven testing, unit testing patterns, refactoring, software metrics, requirements engineering, scenario modeling and acceptance testing, model-based testing, state machine testing, software testing theory and tools.
Precludes additional credit for SYSC 4101.
Prerequisite(s): COMP 3004.
Lectures three hours a week.

COMP 4009 [0.5 credit]
Programming for Clusters and Multi-Core Processors
Introduction to parallel architectures, programming languages and algorithms for processor clusters and multi-core processors. Distributed memory architectures, cluster computing, message passing parallel programming, multi-core processors, shared memory parallel programming, use of thread libraries, parallel performance analysis.
Prerequisite(s): (COMP 2402 or SYSC 2100) and (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 2804.
Lectures three hours a week.

COMP 4102 [0.5 credit]
Computer Vision
The basic ideas and techniques of computer vision. The central theme is reconstructing 3D models from 2D images. Topics include: image formation, image feature extraction, camera models, camera calibration, structure from motion, stereo, recognition, augmented reality, image searching.
Prerequisite(s): (COMP 2404 or SYSC 3010 or SYSC 3110) and (MATH 1104 or MATH 1107).
Lectures three hours a week.

COMP 4105 [0.5 credit]
Machine Learning
A subset of topics in Artificial Intelligence that emphasize algorithms and statistical models that rely on patterns and inference. Some topics include decision trees, dimension reduction, ensemble methods, Support Vector Machines, some of the fundamental aspects of Neural Networks, and clustering.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 3106 and (MATH 1104 or MATH 1107).
Lecture three hours a week.

COMP 4107 [0.5 credit]
Neural Networks
Theory and application of Neural Networks to problems in machine learning. Topics include explanation of the representation, transformation and compression of data, biological models, Hebbian learning and the Perceptron. Modern neural network architectures, including feed forward, recurrent, convolutional and generative adversarial are introduced.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 5206.
Prerequisite(s): COMP 3106 and (MATH 1104 or MATH 1107).
Lectures three hours a week.

COMP 4108 [0.5 credit]
Computer Systems Security
Introduction to information security in computer and communications systems, including network, operating systems, web and software security; Passwords, authentication applications, privacy, data integrity, anonymity, secure email, IP security, security infrastructures, firewalls, viruses, intrusion detection, network attacks.
Precludes additional credit for SYSC 4810.
Prerequisite(s): (COMP 3000 or SYSC 4001) and COMP 3109.
Lectures three hours a week.

COMP 4111 [0.5 credit]
Data Management for Business Intelligence
Application of computational techniques to support business activities, such as decision making, business understanding, data analysis, business process automation, learning from data, producing and using data-centric business models, ontology-based data access and integration, data quality assessment and cleaning and use of contextual data.
Prerequisite(s): COMP 3005.
Also offered at the graduate level, with different requirements, as COMP 5111, for which additional credit is precluded.
Lectures three hours a week.

COMP 4202 [0.5 credit]
Computational Aspects of Geographic Information Systems
Through recent advances in navigation systems, mobile devices, and new software such as Mapquest and Google Earth, GIS is becoming increasingly important and exciting from a CS perspective. This course lays the algorithmic foundations to understand, use and further this technology.
Prerequisite(s): COMP 3804 or MATH 3804.
Also offered at the graduate level, with different requirements, as COMP 5204, for which additional credit is precluded.
Lecture three hours a week.
COMP 4203 [0.5 credit]
Wireless Networks and Security
An introduction to wireless networks covering both networking issues and security aspects of modern wireless environments. Fundamentals of mobile LANs, ad hoc, sensor networks, secure routing, searching, clustering, multicasting, localization, mobile IP/TCP, confidentiality, key establishment, authentication, broadcasting, RFID, and rogue attacks.
Prerequisite(s): COMP 3203 or SYSC 4602.
Lectures three hours a week.

COMP 4206 [0.5 credit]
Evolving Information Networks
Convergence of social and technological networks. Interplay between information content, entities creating it and technologies supporting it. Structure and analysis of such networks, models abstracting their properties, techniques link analysis, search, mechanism design, power laws, cascading, clustering and connections with work in social sciences.
Prerequisite(s): COMP 1805, (COMP 2401 with a minimum grade of C-) and (COMP 2406 or SYSC 4504). Also offered at the graduate level, with different requirements, as COMP 5310, for which additional credit is precluded.
Lecture three hours a week.

COMP 4308 [0.5 credit]
Computational Systems Biology
Modeling and simulation of metabolic and regulatory networks towards understanding complex and highly dynamic cellular systems. Biotechnological applications include metabolic engineering, synthetic biology, and drug discovery.
Includes: Experiential Learning Activity
Also listed as BIOC 4008.
Prerequisite(s): BIOC 3101 or permission of the Biochemistry Institute.
Lecture one and a half hours per week, workshop one and a half hours per week.

COMP 4501 [0.5 credit]
Advanced Facilities for Real-Time Games
A practical course on advanced facilities of game engines. Such facilities include notions such as physics engines, shadow mapping, lighting with thousands of lights, relief mapping, ambient occlusion, water flow, deferred rendering, occlusion culling, water effects, mirrors, and screen space reflection.
Prerequisite(s): COMP 3501.
Lectures three hours a week.

COMP 4601 [0.5 credit]
Intelligent Web-based Information Systems
Introduction to the principles and practice of creation, delivery and analysis of multimedia content in web-based systems. Topics include analysis of webs of documents, social network analysis, recommender systems and problems of trust, reputation and influence in e-commerce systems.
Includes: Experiential Learning Activity
Prerequisite(s): (COMP 2404 or SYSC 3010 or SYSC 3110) and (COMP 2406 or COMP 2601 or SYSC 4504).
Lecture/lab four hours a week.

COMP 4602 [0.5 credit]
Social Networking
Introduction to virtual communities, overlay networks and social networking. Topics include architectural principles for heterogeneous social networking platforms, trust and reputation as social concepts, agent-based computing, and extraction of trends and patterns from information exchanged between community members.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 3601 (no longer offered).
Prerequisite(s): ((COMP 2404 or SYSC 3010 or SYSC 3110) and (COMP 2406 or SYSC 4504)) or COMP 2601.
Lectures/labs four hours per week.

COMP 4803 [0.5 credit]
Computable Functions
Recursive functions and computability, algorithms, Church's thesis, Turing machines, computational logic, NP-completeness.
Also listed as MATH 4803.
Prerequisite(s): MATH 2100 or COMP 3805 or permission of the School.

COMP 4804 [0.5 credit]
Design and Analysis of Algorithms II
A second course on the design and analysis of algorithms. Topics include: advanced recurrence relations, algebraic complexity, advanced graph algorithms, amortized analysis, algorithms for NP-complete problems, randomized algorithms.
Prerequisite(s): COMP 3804 or MATH 3804.
Lectures three hours a week.

COMP 4805 [0.5 credit]
Theory of Automata
Finite automata and regular expressions, properties of regular sets, context-free grammars, pushdown automata, deterministic context-free languages. Turing machines, the Chomsky hierarchy. Undecidability, intractable problems.
Also listed as MATH 4805.
Precludes additional credit for MATH 5605.
Prerequisite(s): COMP 3805 or MATH 3106 or MATH 3158 (or MATH 3100) or permission of the School.
Lectures three hours a week.
COMP 4806 [0.5 credit]
Numerical Linear Algebra
Study of matrix inversion techniques; techniques of finding eigenvalues and eigenvectors, solution of systems of linear equations; direct and indirect methods, their comparison and error analysis; applications in optimization and other areas.
Also listed as MATH 4806.
Prerequisite(s): MATH 2152 or MATH 1102 (no longer offered) or MATH 2107; and MATH 2000 and COMP 3806, or permission of the School.
Lectures three hours a week.

COMP 4900 [0.5 credit]
Advanced Topics in Computer Science
Selected topics in Computer Science offered by members of the School of Computer Science.
Prerequisite(s): permission of the School of Computer Science.
Lectures three hours a week and up to three hours of tutorials a week.

COMP 4901 [0.5 credit]
Directed Studies
Independent study under the supervision of a member of the School of Computer Science, open only to students in the B.C.S. program. Students are required to obtain their supervisor's written approval prior to registration and are limited to two such courses in their program.
Prerequisite(s): permission of the School of Computer Science.

COMP 4905 [0.5 credit]
Honours Project
Under the supervision of a faculty member, Honours students complete a major Computer Science project in fourth year. Permission to register is granted once an approved project proposal is submitted to the Department. See deadlines and details on the School web site.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 4906.
Prerequisite(s): registration in the B.C.S. Honours program or one of the Combined Computer Science Honours programs and permission of the School of Computer Science.

COMP 4906 [1.0 credit]
Honours Thesis
An independent research project under the direct supervision of a faculty advisor. Permission to register is granted once an approved project proposal is submitted to the School of Computer Science. Evaluation is based on a written thesis and a poster presentation.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 4905.
Prerequisite(s): fourth-year standing in a B.C.S. Honours program with a minimum CGPA of 9.0 in the major and permission of the School of Computer Science.

COMP 4910 [0.5 credit]
Internship
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 3911 and registration in internship option.

COMP 4911 [0.5 credit]
Internship
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 4910 and registration in internship option.

Criminology and Criminal Justice
This section presents the requirements for programs in:
• CCJ with Concentration in Law B.A. Honours
• CCJ with Concentration in Psychology B.A. Honours
• CCJ with Concentration in Sociology B.A. Honours
• CCJ with Concentration in Law B.A.
• CCJ with Concentration in Psychology B.A.
• CCJ with Concentration in Sociology B.A.
• Minor in Criminology & Criminal Justice

Program Requirements
Criminology and Criminal Justice
B.A. Honours
Students in the B.A. Honours program choose to follow one of the three following concentrations. The selection must take place before second year status is achieved.

CCJ with Concentration in Law
B.A. Honours (20.0 credits)
A. Credits Included in the Major CGPA (13.5 credits)

1. 1.5 credit in:
   - CRCJ 1000 [0.5] Introduction to Criminology and Criminal Justice
   - CRCJ 2100 [0.5] Criminological Theories
   - CRCJ 2200 [0.5] Contemporary Issues in Criminology & Criminal Justice

2. 2.5 credits in:
   - LAWS 1001 [0.5] Introduction to Legal Studies 1
   - LAWS 1002 [0.5] Introduction to Legal Studies 2
   - LAWS 2301 [0.5] Criminal Justice System
   - LAWS 2302 [0.5] Criminal Law
   - LAWS 2908 [0.5] Methodological Approaches in Legal Studies 1

3. 0.5 credit in LAWS at the 2000-level or higher
4. 1.5 credits in LAWS at the 3000-level or higher
5. 2.0 credits in:

### Notes for all Concentrations:

1. See note entitled **Maximum Number of CCJ Credits** in the Regulations tab above, regarding the maximum permissible Criminology credits for your program.

### CCJ with Concentration in Psychology

#### B.A. Honours (20.0 credits)

**A. Credits Included in the Major CGPA (12.5 credits)**

1. **1.5 credits in:**
   - CRCJ 1000 [0.5] Introduction to Criminology and Criminal Justice
   - CRCJ 2100 [0.5] Criminological Theories
   - CRCJ 2200 [0.5] Contemporary Issues in Criminology & Criminal Justice

2. **2.0 credits in:**
   - LAWS 1001 [0.5] Introduction to Legal Studies 1
   - LAWS 1002 [0.5] Introduction to Legal Studies 2
   - LAWS 2301 [0.5] Criminal Justice System
   - LAWS 2302 [0.5] Criminal Law

3. **2.0 credits in:**
   - PSYC 1001 [0.5] Introduction to Psychology I
   - PSYC 1002 [0.5] Introduction to Psychology II
   - PSYC 2400 [0.5] Introduction to Forensic Psychology
   - PSYC 3402 [0.5] Criminal Behaviour

4. **1.0 credit from:**
   - PSYC 2001 [0.5] Introduction to Research Methods in Psychology
   - PSYC 2002 [0.5] Introduction to Statistics in Psychology

5. **0.5 credit in PSYC at the 2000-level or higher**

6. **0.5 credit in PSYC at the 3000-level or higher**

7. **1.0 credit from:**

**B. Credits Not Included in the Major CGPA (7.5 credits)**

12. **5.0 credits in electives, not in Approved CCJ Electives**

13. **2.5 credits in free electives**

**Total Credits** 20.0

### Notes for all Concentrations:

1. See note entitled **Maximum Number of CCJ Credits** in the Regulations tab above, regarding the maximum permissible Criminology credits for your program.
**CCJ with Concentration in Law**

**B.A. (15.0 credits)**

**Notes**

- The total number of Criminology and Criminal Justice courses in the B.A. and B.A. (Honours) program may not exceed 12.5 (B.A.) and 15.0 (B.A. Honours). Consult the Institute if clarification is required.
- Students may request permission to offer courses towards the Major which are not listed as electives, including those offered by the Criminal Justice and Social Policy Summer School, as well as special topics courses offered from time to time by the Institute or Departments of Law, Psychology and Sociology. Students should consult the Institute for a listing of courses approved as alternative electives.

**Regulations**

In addition to the program requirements described here, students must satisfy:

1. the University regulations (see the Academic Regulations of the University section of this Calendar),
2. the common regulations applying to all B.A. students. The B.A. Breadth requirement is waived for students in Criminology and Criminal Justice.

Students should consult with the Institute when selecting courses and planning their program.

**Maximum Number of CCJ Credits**

The total number of Criminology and Criminal Justice credits in the B.A. and B.A. (Honours) program may not exceed 12.5 (B.A.) and 15.0 (B.A. Honours). This is the sum of credits used in the Major and Concentration PLUS free electives chosen from the list of Approved CCJ electives. Consult the Institute if clarification is required.

**Field Placement Practicum**

The Field Placement Practicum (CRCJ 3901 [1.0] Practicum in Criminology I) is offered at the 3000-level to students in CCJ programs. Students complete a 1.0 (or 2.0) credit Field Placement Practicum course during the fall/winter session. To be eligible for the Practicum students must have completed at least 9.0 credits by May 1, including all of the 1000- and 2000-level requirements in the Major CGPA. Enrollment is restricted. A floating cutoff will be used to identify the students with the highest Major CGPA over those required courses, who may then receive permission to register for the Field Placement. Allocation of Field Placements will be determined by the Field Placement Coordinator.

Students wishing to register for a Field Placement Practicum must apply to the Institute no later than May 1 of their second year. Applications are available at carleton.ca/criminology by January 1. If granted permission, students will then register in CRCJ 3901 [1.0] Practicum in Criminology I during registration. Students in the B.A. Honours program may receive permission to complete a 2.0 credit placement, in which case they will also register in CRCJ 3902 [1.0] Practicum in Criminology II.

**B.A. Regulations**

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

**First-Year Seminars**

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

**Breadth Requirement**

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration or Specialization may be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

**Breadth Area 1: Culture and Communication**

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

**Subject codes**: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESIA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN
Students may transfer to a program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

Mention : Français

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. program must present:
1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. Honours program must present:
1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in Combined Honours programs must fulfil the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Admission Requirements

Degrees
- Bachelor of Arts (B.A.)(Honours)
- Bachelor of Arts (B.A.)
First Year

For B.A. and B.A. (Honours)
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Advanced Standing

B.A. and B.A. (Honours) Program
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

B.A. Honours Criminology and Criminal Justice
Admission to Criminology and Criminal Justice (CCJ) with advanced standing and transfer within the B.A. to CCJ by change of major is limited. Students require a minimum overall CGPA of 7.50 and will be admitted to the Honours program. Access to the CCJ B.A. degree is limited to CCJ B.A. Honours registered students who apply to transfer and to graduates of the Algonquin College Police Foundations program.

Criminology and Criminal Justice (CRCJ) Courses

CRCJ 1000 [0.5 credit]
Introduction to Criminology and Criminal Justice
Overview of the field, including the foundational approaches of criminology and criminal justice, crime as an object of study; criminal law and criminality in Canada; (neo) classical, aetiological and social reaction perspectives; alternative criminologies. Lectures/tutorials three hours a week.

CRCJ 2100 [0.5 credit]
Criminological Theories
Comprehensive survey of the plurality of criminological theories, from phrenology to contemporary theories concerned with issues related to crime and punishment. Students are encouraged to develop critical and reflexive thinking on various criminological issues and theories. Prerequisite(s): CRCJ 1000 and second-year standing. Lectures three hours per week.

CRCJ 2200 [0.5 credit]
Contemporary Issues in Criminology & Criminal Justice
Survey of contemporary criminological and criminal justice issues, ranging from criminalization, crime prevention, and surveillance strategies to debates about the criminal justice system, punishment, and reintegration. Specific topics will vary from year to year. Prerequisite(s): CRCJ 1000 and second-year standing. Lecture three hours per week.

CRCJ 3001 [0.5 credit]
Quantitative Methods in Criminology
Methods used conducting quantitative research. Topics include measuring and manipulating variables, reliability, validity, sampling, experimental, quasi-experimental designs and ethics. Prerequisite(s): CRCJ 1000 and third-year standing in the B.A Honours program in Criminology and Criminal Justice. Lectures and seminar three hours a week, laboratory one hour a week.

CRCJ 3002 [0.5 credit]
Qualitative Methods in Criminology
Methods used conducting qualitative research. Topics include field research, interviewing, ethnographic research, content analysis and ethics. Includes: Experiential Learning Activity Prerequisite(s): CRCJ 1000 and third-year standing in the B.A Honours program in Criminology and Criminal Justice. Lectures and seminar three hours a week, laboratory one hour a week.

CRCJ 3100 [0.5 credit]
Policing (in)Security
Theories and case studies addressing contemporary efforts to police the world of (in)securities. Emphasis on Canadian dynamics within these broader transformations. Prerequisite(s): CRCJ 1000, third-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute. Lecture and discussion three hours per week.

CRCJ 3200 [0.5 credit]
Indigeneity, Coloniality, and Crime
This course explores issues related to Indigenous peoples, the criminal justice system and community with an emphasis on Indigenous scholarship and perspectives on criminology and crime. Prerequisite(s): CRCJ 1000, INDG 1010, or INDG 1011, third year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute. Lecture and discussion three hours per week.
CRCJ 3201 [0.5 credit]
Selected Criminological Topics
The topics of this course may vary from year to year, and are announced in advance of registration.
Prerequisite(s): CRCJ 1000, third-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Lectures three hours per week.

CRCJ 3202 [0.5 credit]
Selected Criminological Topics
The topics of this course may vary from year to year, and are announced in advance of registration.
Prerequisite(s): CRCJ 1000, third-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Lectures three hours per week.

CRCJ 3901 [1.0 credit]
Practicum in Criminology I
Through a field placement in an agency setting, students are provided the opportunity to obtain practical involvement in various aspects of criminal justice. In the seminar class, discussions, presentations and assignments integrate applied, theoretical and empirical knowledge. CRCJ 3901 may not be repeated.
Includes: Experiential Learning Activity
Prerequisite(s): Third-year standing in a B.A. in Criminology and Criminal Justice, including all of the 1000- and 2000-level requirements in the Major CGPA, and permission of the Institute.
Field placement eight hours a week, seminar three hours a week.

CRCJ 3902 [1.0 credit]
Practicum in Criminology II
Through a field placement in an agency setting, students are provided the opportunity to obtain practical involvement in various aspects of criminal justice. In the seminar class, discussions, presentations and assignments integrate applied, theoretical and empirical knowledge. CRCJ 3902 may not be repeated.
Includes: Experiential Learning Activity
Prerequisite(s): Third-year Honours standing in Criminology and Criminal Justice, including all of the 1000- and 2000-level requirements in the Major CGPA, and permission of the Institute.
Field placement eight hours a week, seminar three hours a week.

CRCJ 4001 [0.5 credit]
Special Topics in Criminology
Examination of a special topic in criminology. Topics to be announced in advance of registration each year.
Prerequisite(s): CRCJ 1000, CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Seminar three hours per week.

CRCJ 4002 [0.5 credit]
Special Topics in Criminology
Examination of a special topic in criminology. Topics to be announced in advance of registration each year.
Prerequisite(s): CRCJ 1000, CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Seminar three hours per week.

CRCJ 4100 [0.5 credit]
Psychology of the Jury
This course will explore the jury system in Canada and other countries. Jury selection, deliberation, and instructions will be discussed, in addition to a number of legal and extra-legal influences on jury decision-making.
Prerequisite(s): CRCJ 1000, CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Seminar three hours per week.

CRCJ 4200 [0.5 credit]
Policing Sex
This seminar explores the policing of consensual sexual practices, paying particular attention to the theorization of consent, harm, liberation and agency in a sexual and legal context.
Prerequisite(s): CRCJ 1000, CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Seminar three hours per week.

CRCJ 4300 [0.5 credit]
Social Control
Introduction to social control from early theorizations linking social control to the genesis of the self, to preoccupations with the sorting of humans and the guiding of their conducts, including contemporary engagements with moralization, penal intensification, sovereign exceptionality, and immigration control.
Prerequisite(s): CRCJ 1000, CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Seminar three hours per week.

CRCJ 4400 [0.5 credit]
Crime, Emotions, and The Senses
This course examines the relationship between sensations, emotions, affect, crime, criminalization, social control, and penalty. It questions the rational/emotional binary and investigates how shame, humiliation, fear, panic, pain, pleasure, disgust, empathy and revenge, relate to offender motivation, criminalization, victimization, adjudication, and punishment.
Prerequisite(s): CRCJ 1000, CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.
Seminar three hours per week.
Critical Race Studies (Minor)

Program Requirements

Minor in Critical Race Studies (4.0 credits)

This minor is available to all undergraduate degree students.

Requirements:

1. 1.0 credit from:
   - FYSM 1402 [1.0] Issues in Women's and Gender Studies
   - WGST 1808 [1.0] Introduction to Feminist Social Transformation

2. 0.5 credit in:
   - CRST 2001 [0.5] Introduction to Critical Race Studies

3. 1.0 credits in CRST or CRST-approved electives at the 2000-level or higher

4. 1.5 credits in CRST or CRST-approved electives at the 3000-level or higher

5. The remaining credits of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Notes:

Other courses may be substituted for the credits specified in item 3 and 4, when material on critical race is central to the course. Such substitutions must be individually approved by the Institute of Women's and Gender Studies. Students are encouraged to consult course descriptions of Special Topics courses.

Approved Critical Race Studies Electives

Note: access to these courses is not guaranteed, and may depend on space availability and the satisfaction of other requirements such as course prerequisites.

**African Studies**

- AFRI 2006 [0.5] Southern Africa
- AFRI 3001 [0.5] Globalization and Popular Culture in Africa
- AFRI 3002 [0.5] Regions in Africa: Cultures, Society, Politics
- AFRI 3003 [0.5] African Social and Political Thought
- AFRI 3005 [0.5] African Migrations and Diasporas
- AFRI 3609 [0.5] African Cinema

**Anthropology**

- ANTH 1001 [0.5] Introduction to Socio-Cultural Anthropology
- ANTH 2001 [1.0] Foundations in Socio-Cultural Anthropology
- ANTH 2020 [0.5] Race and Ethnicity
- ANTH 2610 [0.5] Studies in Indigenous Peoples of North America: Current Issues in Anthropological Research
- ANTH 2620 [0.5] Ethnography of Sub-Saharan Africa
- ANTH 2630 [0.5] Studies in Asian Societies: Current Issues in Anthropological Research
- ANTH 2635 [0.5] Tradition and Modernity in the Pacific
- ANTH 2640 [0.5] Andean Ethnography
- ANTH 2660 [0.5] Ethnography of North Africa
- ANTH 2670 [0.5] Ethnography of Brazil
- ANTH 3020 [0.5] Studies in Race and Ethnicity
- ANTH 3600 [0.5] Studies in Anthropology and Indigenous Peoples
- ANTH 4006 [0.5] Decolonizing Methodologies in the 21st Century: Practicing Engaged Anthropology

**Regulations**

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

**Critical Race Studies (CRST) Courses**

**CRST 2001 [0.5 credit]**

**Introduction to Critical Race Studies**

Foundations and central tenets of critical race theory, its interdisciplinary debates, applications, and evolutions. Historical roots of oppression, white settler-colonialism, understanding of privilege and power, social construction of race, socio-political conditions producing systemic and institutional racism, intersections with sexism, homophobia, transphobia, classism, and ableism. Includes: Experiential Learning Activity

Prerequisite(s): One of WGST 1808, DBST 1001, HUMR 1001, FYSM 1402 or FYSM 1403, OR permission of the Institute.

Lectures and discussion three hours a week.
CRST 4001 [0.5 credit]
Advanced Critical Race Studies
Interdisciplinary seminar on race, colonialism and feminisms including theories of racial and cultural difference, structures of privilege and power, and forms of resistance. Intersectional theoretical approaches to anti-colonial and feminist analyses of racial subjugation, and engagements with Black, Indigenous and women of colour feminisms.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year standing and 1.0 credit in Women's and Gender Studies or permission of the Institute of Women's and Gender Studies.
Seminar three hours per week.

Digital Humanities

Program Requirements

Minor in Digital Humanities (4.0 credits)
Open to all undergraduate students.

Requirements:
1. 1.0 credit in:
   - DIGH 2001/ENGL 2400 [0.5] Introduction to Digital Humanities
   - DIGH 2002/ENGL 2 Digital Humanities: Theory and Method
2. 2.0 credits from:
   - DIGH 2035/SOCI 2 Technology, Culture and Society
   - DIGH 2705/SOCI 2 Culture in the Digital Age
   - DIGH 3001/ENGL 3 The Book in the Digital Age
   - DIGH 3812/HIST 3 History
   - DIGH 4001/ENGL 4 Studies in Digital Humanities
   - DIGH 4002/ENGL 4 Digital Culture and the Text I
   - DIGH 4003/ENGL 4 Digital Culture and the Text II
   - DIGH 4004/ENGL 4 Digital Humanities Workshop
   - DIGH 4005/ENGL 4 Digital Humanities Practicum
   - HIST 4302 [1.0] Canada: Ideas & Culture
3. 1.0 credit in approved electives at the 1000 level or higher
4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Digital Humanities Electives

Applied Linguistics and Discourse Studies
   - ALDS 3701 [0.5] Corpus Linguistics
Greek and Roman Studies
   - CLCV 2305 [1.0] Ancient Science and Technology
Computer Science
   - COMP 1001 [0.5] Introduction to Computational Thinking for Arts and Social Science Students
Communication & Media Studies
   - COMS 2200 [0.5] Big Data and Society
English
   - ENGL 2100 [0.5] Topics in Popular Culture
   - ENGL 2107 [0.5] Science Fiction
Digital Humanities
   - DIGH 3001 [0.5] The Book in the Digital Age

DIGH 4001 [0.5] Studies in Digital Humanities
DIGH 4002 [0.5] Digital Culture and the Text I
DIGH 4003 [0.5] Digital Culture and the Text II
DIGH 4004 [0.5] Digital Humanities Workshop
DIGH 4005 [0.5] Digital Humanities Practicum

Film Studies
   - FILM 4901 [0.5] Special Topic

Geography and Environmental Studies
   - GEOM 1004 [0.5] Maps, Satellites and the Geospatial Revolution
   - GEOM 2007 [0.5] Points, Lines and Polygons

History
   - HIST 3812 [0.5] Digital History
   - HIST 4006 [1.0] Seminar in Medieval History
   - HIST 4805 [1.0] Seminar on a Transnational or Thematic Topic

Music
   - MUSI 3603 [0.5] Computer Music Techniques

Philosophy
   - PHIL 2106 [0.5] Information Ethics

Political Science
   - PSCI 3406 [0.5] Public Affairs and Media Strategies
   - PSCI 4003 [0.5] Politics and the Media

Sociology
   - SOCI 2035 [0.5] Technology, Culture and Society
   - SOCI 2705 [0.5] Popular Culture in the Digital Age

Systems and Computer Engineering
   - SYSC 1005 [0.5] Introduction to Software Development
   - SYSC 2001 [0.5] Computer Systems Foundations

Technology, Society, Environment Studies
   - TSES 3001 [0.5] Technology-Society Interactions
   - TSES 4005 [0.5] Information Technology and Society

Regulations
In addition to the requirements listed here, students must satisfy:
1. the University regulations including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

Digital Humanities (DIGH) Courses

DIGH 2001 [0.5 credit]
Introduction to Digital Humanities
An introduction to the principal debates in and approaches to the Digital Humanities. Also listed as ENGL 2400.
Prerequisite(s): second-year standing or permission of the College of Humanities.
Lecture three hours a week.
DIGH 2002 [0.5 credit]
Digital Humanities: Theory and Method
A multidisciplinary survey of core theories, methodologies and tools within the Digital Humanities. Assignments will include collaborative work and applied projects.
Includes: Experiential Learning Activity
Also listed as ENGL 2401.
Prerequisite(s): second-year standing or permission of the College of Humanities.
Lecture and workshop three hours a week.

DIGH 2035 [0.5 credit]
Technology, Culture and Society
Principal theories and methods used by Science and Technology Studies (STS) scholars to examine the social and cultural shaping of technology. The substantive focus of the course is on the design, development, production, diffusion, consumption and use of technology.
Also listed as SOCI 2035.
Precludes additional credit for SOCI 2400.
Prerequisite(s): SOCI 1001 and SOCI 1002, or ANTH 1001 or ANTH 1002.
Lectures/discussion groups three hours a week.

DIGH 2705 [0.5 credit]
Popular Culture in the Digital Age
An examination of various approaches to analyzing digital media and their role in the production and consumption of contemporary cultural forms and practices. Students will reflect upon their use of digital media and the influence they have on their lives and popular culture, more generally.
Also listed as SOCI 2705.
Prerequisite(s): SOCI 1001 and SOCI 1002, or ANTH 1001 or ANTH 1002.
Lecture/discussion groups three hours a week.

DIGH 3001 [0.5 credit]
The Book in the Digital Age
A multidisciplinary course focused on the social, economic and political dimensions of the book in its manuscript, print and digital forms.
Also listed as ENGL 3401.
Prerequisite(s): third-year standing, or permission of the College of Humanities.
Lecture three hours a week.

DIGH 3035 [0.5 credit]
Science, Culture and Society: Social Studies of Science
Principal theories and methods used by Science and Technology Studies scholars to examine the social construction of scientific knowledge. Topics may include the demarcation of science from non-science, the relationship between experts and laypersons, and the study of scientific controversies.
Also listed as SOCI 3035, ANTH 3035.
Prerequisite(s): DIGH 2035 or SOCI 2035 and third-year standing.
Lecture three hours a week.

DIGH 3704 [0.5 credit]
Cognitive Science and the Digital Humanities
Exploration of the roles of human and artificial cognition in the digital humanities. Topics may include virtual and augmented reality as applied to the humanities, cognitive issues in hypertext and hypermedia; linguistic and philosophical considerations in digital media, cognitive narratology, and artificial intelligence.
Also listed as CGSC 3704.
Prerequisite(s): CGSC 1001; CGSC 2001 or DIGH 2001; and third-year standing.
Seminar three hours per week.

DIGH 3812 [0.5 credit]
Digital History
The digital representation of history, exploring the approaches, issues, and methods of working in this environment. Topics may include gaming, virtual environments, digital research tools, public digital history. (Field e).
Includes: Experiential Learning Activity
Also listed as HIST 3812.
Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.
Lecture three hours a week.

DIGH 3814 [0.5 credit]
Crafting Digital History
This course applies the creative use of information and media/computing technologies to address the digital cultural heritage issues of public historians, archaeologists, and anthropologists. Topics may include webscraping, data mining, designing and implementing research databases, and visual storytelling of those results. (Field e).
Includes: Experiential Learning Activity
Also listed as HIST 3814.
Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.
Lectures three hours a week or online.

DIGH 4001 [0.5 credit]
Studies in Digital Humanities
A study of current issues and debates in Digital Humanities.
Also listed as ENGL 4155.
Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.
Seminar or lecture three hours a week.

DIGH 4002 [0.5 credit]
Digital Culture and the Text I
A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year.
Also listed as ENGL 4125.
Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.
Seminar or lecture three hours a week.
DIGH 4003 [0.5 credit]
Digital Culture and the Text II
A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year. Also listed as ENGL 4145.
Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.
Seminar or lecture three hours a week.

DIGH 4004 [0.5 credit]
Digital Humanities Workshop
This workshop will provide students with the opportunity to complete an individual or collaborative capstone project in the Digital Humanities.
Includes: Experiential Learning Activity
Also listed as ENGL 4404.
Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.
Workshop three hours a week.

DIGH 4005 [0.5 credit]
Digital Humanities Practicum
Practical experience gained by working on projects under the supervision of the staff of a participating public- or private-sector institution or organization, including a final written assignment or equivalent project. A maximum of 1.0 practicum credit may be applied towards degree requirements.
Includes: Experiential Learning Activity
Also listed as ENGL 4405.
Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.
Practicum.

Disability Studies (Minor)

Program Requirements

Minor in Disability Studies (4.0 credits)
Open to all undergraduate degree students.

Requirements:

1. 2.0 credits in:
   - WGST 1808 [1.0] Introduction to Feminist Social Transformation
   - or FYSM 1402 [1.0] Issues in Women's and Gender Studies
   - DBST 2001 [0.5] Disability Society
   - DBST 3001 [0.5] Disability Studies: Policy and Activism
   - 2.0 credits in

2. 1.0 credit from:
   - CHST 3304/DBST 3304 Disability and Childhood: Transnational Perspectives
   - HUMR 3304 [0.5] Disability Rights
   - SOCI 3060/DBST 3304 Disability Studies
   - SOWK 4300 [0.5] Social Work and Persons with Disabilities
   - SXST 3103 [0.5] Sexuality and Disability

3. 1.0 credits in DBST or Approved Disability Studies Electives

4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Notes

1. Courses used to fulfill Items 2 and 3 above must be from more than one discipline.
2. Other courses may be substituted for the credits specified in Items 2 and 3, when material on disability is central to the course. Such substitutions must be individually approved by the Pauline Jewett Institute of Women's and Gender Studies. Students are encouraged to consult course descriptions of Special Topics courses.

APPROVED DISABILITY STUDIES ELECTIVES

Note: access to these courses is not guaranteed, and may depend on space availability and the satisfaction of other requirements such as course prerequisites.

Anthropology
   - ANTH 3310 [0.5] Studies in Medical Anthropology
   - ANTH 4780 [0.5] Anthropology of Personhood

Critical Race Studies
   - CRST 2001 [0.5] Introduction to Critical Race Studies
   - CRST 4001 [0.5] Advanced Critical Race Studies

First Year Seminars (FYSM)
   - FYSM 1504 [1.0] Society and the Designed Environment

History
   - HIST 3515 [0.5] Madness in Modern Times

Human Rights
   - HUMR 3504 [0.5] Public Health and Human Rights
   - HUMR 4305 [0.5] Disability and Social Justice

Law
   - LAWS 3503 [0.5] Equality and Discrimination
   - LAWS 3508 [0.5] Health Law
   - LAWS 4503 [0.5] Law, Disability and Society

Psychology
   - PSYC 2301 [0.5] Introduction to Health Psychology
   - PSYC 2500 [0.5] Foundations of Developmental Psychology

Public Administration
   - PADM 4221 [0.5] Health Policy in Canada
   - PADM 4817 [0.5] Health Policy in Developing Countries

Sexuality Studies
   - SXST 2101 [0.5] Sexuality Studies: A Critical Introduction
   - SXST 2102 [0.5] Sexuality, Gender, and Security
   - SXST 3103 [0.5] Sexuality and Disability
   - SXST 3104 [0.5] Transnational Sexualities
   - SXST 3106 [0.5] Queer(ing) Archives
   - SXST 4101 [0.5] Interdisciplinary Studies of Sexuality
   - SXST 4102 [0.5] Queer Theory
   - SXST 4103 [0.5] Politics of Kink
   - SXST 4104 [0.5] Sexuality and Political Economy
   - SXST 4105 [0.5] Queer Ecologies
**SXST 4106 [0.5]**  Queer Aesthetics: Affect, Cultural Production, Sexuality

**Social Work**

SOWK 4300 [0.5]  Social Work and Persons with Disabilities

**Sociology**

SOCI 2050 [0.5]  Sociology of Health

SOCI 3050 [0.5]  Studies in the Sociology of Health

SOCI 3056 [0.5]  Women and Health

**Technology, Society, Environment Studies**

TSES 3001 [0.5]  Technology-Society Interactions

**Women's and Gender Studies**

WGST 2801 [0.5]  Activism, Feminisms, and Social Justice

WGST 2803 [0.5]  Body Matters: The Politics of Bodies

WGST 2811 [0.5]  Masculinities

WGST 2812 [0.5]  Selected Topics in Women's and Gender Studies

WGST 2814 [0.5]  Gender, Sexuality and Cultural Production

WGST 3803 [0.5]  Feminisms and Transnationalism

WGST 3807 [0.5]  Gendered Violence

WGST 3812 [0.5]  Selected Topics in Women's and Gender Studies

WGST 4812 [0.5]  Selected Topics in Women's and Gender Studies

---

**Regulations**

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

**Disability Studies (DBST) Courses**

**DBST 1001 [0.5 credit]**

**Introduction to Disability Studies**

Challenging negative stereotypes of disability by allowing students the opportunity to explore disability through many different venues including history, theory, culture, ethics, policy and disability rights. Reframing disability from personal tragedy to issues of oppression, access, inclusion and equality.

Lectures and discussion groups three hours per week.

**DBST 2001 [0.5 credit]**

**Disabling Society**

Interdisciplinary approach to the debates and theories that challenge the normative values, knowledge sources, and cultural representations of disablement in society.

Prerequisite(s): second-year standing and DBST 1001.

Lecture and discussion three hours a week.

**DBST 3001 [0.5 credit]**

**Disability Studies: Policy and Activism**

The complex legal, policy and discursive frameworks that shape the lives of persons with disability and the history of the emergence of the disability rights movement as a scholar and activist challenge to, and renegotiation of, those frameworks.

Includes: Experiential Learning Activity

Precludes additional credit for DBST 4001 (no longer offered).

Prerequisite(s): third-year standing.

Lecture three hours a week.

**DBST 3060 [0.5 credit]**

**Critical Disability Studies**

Course engages contemporary disability theory, culture, and activism to consider bodily difference and its relation to the workings of power and social control, accessibility, normalization, ableism, and medicalization. Students will gain an understanding of the contemporary debates, theories, and methodologies of critical disability studies.

Also listed as SOCI 3060.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lectures three hours a week.

**DBST 3301 [0.5 credit]**

**Introduction to Deaf Studies**

A critical introduction to Deaf community and culture as they relate to a social model of disability, to ethnicity, and to issues of diversity and inclusion. Discourse analysis of research and policy in education for Deaf students from early childhood and beyond.

Also listed as ALDS 3301.

Precludes additional credit for ALDS 3903A if taken in Winter term 2016 or Winter term 2018, and ALDS 4906A if taken in Fall term 2016.

Prerequisite(s): third-year standing in Linguistics or Applied Linguistics and Discourse Studies or enrolment in the Minor in Disability Studies.

Seminars three hours a week.

**DBST 3304 [0.5 credit]**

**Disability and Childhood: Transnational Perspectives**

Drawing on theory and research in disabled children’s childhood studies, sociology of childhood, disability studies, and girlhood studies, this course examines the discursive and material constructions of disabled youth and childhood in transnational contexts in relation to emerging neo-colonial, neo-imperialist, and neo-liberal ideologies.

Also listed as CHST 3304.

Prerequisite(s): third-year standing in Childhood and Youth Studies or Disability Studies.

Lecture three hours a week.
**DBST 3900 [0.5 credit]**  
**Independent Study**  
Essays, discussions, and/or examinations based on a bibliography constructed by the student in consultation with an instructor.  
Prerequisite(s): third or fourth-year standing in the Disability Studies Minor and a CGPA of 9.0 or higher.

### Earth Sciences

This section presents the requirements for programs in:

- Earth Sciences B.Sc. Honours
- Earth Sciences with Concentration in Finance: Resource Valuation B.Sc. Honours
- Earth Sciences with Concentration in Resource Economics B.Sc. Honours
- Earth Sciences with Concentration in Vertebrate Paleontology and Paleoecology B.Sc. Honours
- Earth Sciences with Concentration in Geophysics B.Sc. Honours
- Earth Sciences with Concentration in Geophysics B.Sc. Honours
- Earth Sciences B.Sc. Major
- Earth Sciences B.Sc.
- Earth Sciences and Physical Geography B.Sc. Combined Honours
- Earth Sciences and Geography: Concentration in Terrain Science B.Sc. Combined Honours
- Earth Sciences: Earth Resources and Processes

#### Program Requirements

**Course Categories for Earth Sciences Programs**  
The program descriptions below make use of the following course categories that are defined in the *Academic Regulations for the Bachelor of Science Degree* section of this Calendar.

- Science Faculty Electives
- Advanced Science Faculty Electives
- Science Continuation Courses
- Science Geography
- Science Psychology
- Approved Courses Outside the Faculties of Science and Engineering and Design
- Free Elective

#### Earth Sciences

**B.Sc. Honours (20.0 credits)**

**A. Credits Included in the Major CGPA (11.0 credits)**

<table>
<thead>
<tr>
<th>1.</th>
<th>1.0 credit in:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.0</td>
<td><strong>ERTH 1006 [0.5]</strong></td>
</tr>
<tr>
<td></td>
<td><strong>ERTH 1009 [0.5]</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>2.</th>
<th>3.5 credits in:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>ERTH 2102 [0.5]</strong></td>
</tr>
<tr>
<td></td>
<td><strong>ERTH 2104 [0.5]</strong></td>
</tr>
</tbody>
</table>

#### 3. 0.5 credit from:

| 0.5 | **ERTH 3203 [0.5]** | Sedimentology |
|     | **ERTH 3206 [0.5]** | Sedimentary Depositional Systems (See Note, below) |

#### 4. 3.0 credits in:

| 3.0 | **ERTH 3003 [0.5]** | Geochemistry and Geochronology |
|     | **ERTH 3204 [0.5]** | Mineral Deposits |
|     | **ERTH 3205 [0.5]** | Physical Hydrogeology |

|     | **ERTH 3207 [0.5]** | Metamorphic Petrology and Processes |
|     | **ERTH 3405 [0.5]** | Geophysical Methods |
|     | **ERTH 3806 [0.5]** | Structural Geology (See Note, below) |

#### 5. 2.0 credits in **ERTH** at the 4000-level

| 2.0 | **ERTH 4908 [1.0]** | Honours Thesis |
|     | **ERTH 4909 [0.5]** | and 0.5 credit in ERTH at the 4000 level |

**B. Credits Not Included in the Major CGPA (9.0 credits)**

| 1.0 | **MATH 1007 [0.5]** | Elementary Calculus I |
|     | **MATH 1107 [0.5]** | Linear Algebra I |

| 1.0 | **CHEM 1001 [0.5]** & **CHEM 1002 [0.5]** | General Chemistry I & General Chemistry II |
|     | **CHEM 1005 [0.5]** & **CHEM 1006 [0.5]** | Elementary Chemistry I & Elementary Chemistry II |

| 1.0 | **PHYS 1007 [0.5]** & **PHYS 1008 [0.5]** | Elementary University Physics I & Elementary University Physics II |

| 0.5 | **Biol 1104 [0.5]** | Foundations of Biology II |

| 0.5 | **COMP 1005 [0.5]** | Introduction to Computer Science I |

| 0.5 | **STAT 2507 [0.5]** | Introduction to Statistical Modeling I |

| 0.5 | **ERTH 2004 [0.5]** | Maps, Satellites and the Geospatial Revolution |

| 1.0 | **1.0 credit in Science Continuation Courses (not ERTH)** |
|     | **1.0 credit in Science Continuation Courses (not ERTH)** |

| 0.5 | **NSCI 1000 [0.5]** | Seminar in Science (or approved courses outside the faculties of Science and Engineering and Design) |

| 1.5 | **1.5 credits in approved courses outside the faculties of Science and Engineering and Design** |

| 1.0 | **1.0 credit in free electives.** |

**Total Credits**  
20.0

**Note:**
1. For Items 14-17, students admitted to the Minor in Business should substitute the requirements for the Minor. See the Business section of this Calendar.

### Earth Sciences with Concentration in Finance: Resource Valuation

#### B.Sc. Honours (21.0 credits)

B.Sc. Honours (20.0 credits)
Earth Sciences with Concentration in
Geophysics
B.Sc. Honours (20.0 credits)

A. Credits Included in the Major CGPA (10.5 credits)
1. 1.0 credit in:
   ERTH 1006 [0.5] Exploring Planet Earth
   ERTH 1009 [0.5] The Earth System Through Time
2. 1.0 credit in:
   MATH 1004 [0.5] Calculus for Engineering or Physics
   MATH 1104 [0.5] Linear Algebra for Engineering or Science
3. 1.0 credit in:
   PHYS 1001 [0.5] Foundations of Physics I
   & PHYS 1002 [0.5] Foundations of Physics II (recommended)
   OR
   PHYS 1003 [0.5] Introductory Mechanics and Thermodynamics
   & PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion
   OR
   PHYS 1007 [0.5] Elementary University Physics I
   & PHYS 1008 [0.5] Elementary University Physics II (with an average grade of B- or higher)
4. 3.0 credits in:
   ERTH 2102 [0.5] Mineralogy to Petrology
   ERTH 2104 [0.5] Igneous Systems, Geochemistry and Processes
   ERTH 2105 [0.5] Geodynamics
   ERTH 2314 [0.5] Sedimentation and Stratigraphy
   ERTH 2406 [0.5] Geology and Map Interpretation
   ERTH 2802 [0.5] Field Geology I
5. 0.5 credit from:
   ERTH 3203 [0.5] Sedimentology
   ERTH 3206 [0.5] Sedimentary Depositional Systems
6. 2.5 credits in:
   ERTH 3003 [0.5] Geochemistry and Geochronology
   ERTH 3204 [0.5] Mineral Deposits
   ERTH 3205 [0.5] Physical Hydrogeology
   ERTH 3405 [0.5] Geophysical Methods
   ERTH 3806 [0.5] Structural Geology
7. 0.5 credit in:
   ERTH 4707 [0.5] Engineering Seismology
8. 1.0 credit from:
   ERTH 4908 [1.0] Honours Thesis
   OR
   ERTH 4909 [0.5] Research in Earth Sciences
   and 0.5 credit in ERTH at the 4000-level
B. Credits Not Included in the Major CGPA (9.5 credits)
9. 0.5 credit from:
   COMP 1005 [0.5] Introduction to Computer Science I
   COMP 1006 [0.5] Introduction to Computer Science II
10. 1.0 credit from:
    CHEM 1001 [0.5] General Chemistry I
    & CHEM 1002 [0.5] General Chemistry II
    CHEM 1005 [0.5] Elementary Chemistry I
    & CHEM 1006 [0.5] Elementary Chemistry II
11. 1.0 credit in:
    MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
    STAT 2507 [0.5] Introduction to Statistical Modeling I
12. 0.5 credit in:
    ERTH 2004 [0.5] Maps, Satellites and the Geospatial Revolution
13. 4.5 credits from:
    ERTH 2312 [0.5] Paleontology
    ERTH 4003 [0.5] Directed Studies in Geology
    ERTH 4107 [0.5] Geophysical Mechanics
    ERTH 4206 [0.5] Contaminant and Remediation Hydrogeology
    ERTH 4303 [0.5] Resources of a Finite Earth
    ERTH 4305 [0.5] Carbonate Sedimentology
    ERTH 4306 [0.5] Resource Basin Analysis
    ERTH 4402 [0.5] Structural Geology
    ERTH 4403 [0.5] Tectonic Evolution of Canada
    ERTH 4801 [0.5] Physics of the Earth
    ERTH 4804 [0.5] Exploration Geophysics
    ERTH 4807 [0.5] Field Geology II
    ERTH 4820 [0.5] Research Methods in Earth Sciences
    MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics
14. 0.5 credit in:
    NSCI 1000 [0.5] Seminar in Science

Note:
For Item 3 above, ERTH 3203 is required if prerequisite conditions are met.

Sedimentary Depositional Systems
Exploring Planet Earth
Field Geology I
Geology and Map Interpretation
Sedimentation and Stratigraphy
Geodynamics
Igneous Systems, Geochemistry and Processes
Geodynamics
Sedimentation and Stratigraphy
Geology and Map Interpretation
Field Geology I

   ERTH 3203 [0.5] Sedimentology
   ERTH 3206 [0.5] Sedimentary Depositional Systems
or approved course outside the Faculties of Science and Engineering and Design

15. 1.5 credits in free electives.  

Total Credits 20.0

Earth Sciences
B.Sc. Major (20.0 credits)

A. Credits Included in the Major CGPA (11.0 credits)

1. 1.0 credit in:
   - ERTH 1006 [0.5] Exploring Planet Earth
   - ERTH 1009 [0.5] The Earth System Through Time

2. 3.5 credits in:
   - ERTH 2102 [0.5] Mineralogy to Petrology
   - ERTH 2104 [0.5] Igneous Systems, Geochemistry and Processes
   - ERTH 2105 [0.5] Geodynamics
   - ERTH 2312 [0.5] Paleontology
   - ERTH 2314 [0.5] Sedimentation and Stratigraphy
   - ERTH 2406 [0.5] Geology and Map Interpretation
   - ERTH 2802 [0.5] Field Geology I

3. 0.5 credit from:
   - ERTH 3203 [0.5] Sedimentology
   - ERTH 3206 [0.5] Sedimentary Depositional Systems

4. 3.0 credits in:
   - ERTH 3003 [0.5] Geochemistry and Geochronology
   - ERTH 3204 [0.5] Mineral Deposits
   - ERTH 3205 [0.5] Physical Hydrogeology
   - ERTH 3207 [0.5] Metamorphic Petrology and Processes
   - ERTH 3405 [0.5] Geophysical Methods
   - ERTH 3806 [0.5] Structural Geology

5. 3.0 credits in ERTH at the 4000-level 3.0

B. Credits Not Included in the Major CGPA (7.0 credits)

6. 1.0 credit in:
   - MATH 1007 [0.5] Elementary Calculus I
   - MATH 1107 [0.5] Linear Algebra I

7. 1.0 credit from:
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - CHEM 1005 [0.5] Elementary Chemistry I
   - CHEM 1006 [0.5] Elementary Chemistry II

8. 1.0 credit in:
   - PHYS 1007 [0.5] Elementary University Physics I
   - PHYS 1008 [0.5] Elementary University Physics II

9. 0.5 credit in:
   - BIOL 1104 [0.5] Foundations of Biology II

10. 0.5 credit in:
    - COMP 1005 [0.5] Introduction to Computer Science I

11. 0.5 credit in:
    - STAT 2507 [0.5] Introduction to Statistical Modeling I

12. 0.5 credit in:
    - ERTH 2004 [0.5] Maps, Satellites and the Geospatial Revolution

13. 1.0 credit in Science Continuation Courses (not ERTH)

14. 0.5 credit in:

15. 1.5 credits in approved courses outside the faculties of Science and Engineering and Design

16. 0.5 credits in free electives.

Note:

1. For Items 13-16, students admitted to the Minor in Business should substitute the requirements for the Minor. See the Business section of this Calendar.

Earth Sciences
B.Sc. (15.0 credits)

A. Credits Included in the Major CGPA (8.0 credits)

1. 1.0 credit in:
   - ERTH 1006 [0.5] Exploring Planet Earth
   - ERTH 1009 [0.5] The Earth System Through Time

2. 3.5 credits in:
   - ERTH 2102 [0.5] Mineralogy to Petrology
   - ERTH 2104 [0.5] Igneous Systems, Geochemistry and Processes
   - ERTH 2105 [0.5] Geodynamics
   - ERTH 2312 [0.5] Paleontology
   - ERTH 2314 [0.5] Sedimentation and Stratigraphy
   - ERTH 2406 [0.5] Geology and Map Interpretation
   - ERTH 2802 [0.5] Field Geology I

3. 3.5 credits in:
   - ERTH 3003 [0.5] Geochemistry and Geochronology
   - ERTH 3204 [0.5] Mineral Deposits
   - ERTH 3205 [0.5] Physical Hydrogeology
   - ERTH 3207 [0.5] Metamorphic Petrology and Processes
   - ERTH 3405 [0.5] Geophysical Methods
   - ERTH 3806 [0.5] Structural Geology

B. Credits Not Included in the Major CGPA (7.0 credits)

4. 1.0 credit in:
   - MATH 1007 [0.5] Elementary Calculus I
   - MATH 1107 [0.5] Linear Algebra I

5. 1.0 credit from:
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - CHEM 1005 [0.5] Elementary Chemistry I
   - CHEM 1006 [0.5] Elementary Chemistry II

6. 1.0 credit in:
   - PHYS 1007 [0.5] Elementary University Physics I
   - PHYS 1008 [0.5] Elementary University Physics II

7. 0.5 credit in:
   - BIOL 1104 [0.5] Foundations of Biology II

8. 0.5 credit in:
   - COMP 1005 [0.5] Introduction to Computer Science I

9. 0.5 credit in:
   - STAT 2507 [0.5] Introduction to Statistical Modeling I

10. 0.5 credit in:
    - ERTH 2004 [0.5] Maps, Satellites and the Geospatial Revolution

11. 0.5 credit in:
    - PHYS 1007 [0.5] Elementary University Physics I
    - PHYS 1008 [0.5] Elementary University Physics II

12. 0.5 credit in:
    - BIOL 1104 [0.5] Foundations of Biology II
    - PHYS 1007 [0.5] Elementary University Physics I

13. 0.5 credit in:
    - ERTH 2004 [0.5] Maps, Satellites and the Geospatial Revolution

14. 0.5 credit in:

15. 0.5 credits in approved courses outside the faculties of Science and Engineering and Design

16. 0.5 credits in free electives.

B.Sc. Combined Honours (20.0 credits)

A. Credits Included in the Major CGPA (12.5 credits)

1. 0.5 credit in: GEOG 2014 [0.5] The Earth's Surface 0.5
2. 0.5 credit in: ERTH 1006 [0.5] Exploring Planet Earth 0.5
3. 2.5 credits in: ERTH 2102 [0.5] Mineralogy to Petrology 0.5
ERTH 2104 [0.5] Igneous Systems, Geochemistry and Processes 0.5
ERTH 2314 [0.5] Sedimentation and Stratigraphy 0.5
ERTH 2406 [0.5] Geology and Map Interpretation 0.5
ERTH 2802 [0.5] Field Geology I 0.5
4. 0.5 credit from: ERTH 3203 [0.5] Sedimentology 0.5
ERTH 3206 [0.5] Sedimentary Depositional Systems (See Note, below) 0.5
5. 1.5 credits in: ERTH 3205 [0.5] Physical Hydrogeology 1.5
ERTH 3207 [0.5] Metamorphic Petrology and Processes 1.5
ERTH 3806 [0.5] Structural Geology 1.5
6. 1.0 credit in ERTH at the 4000-level 1.0
7. 0.5 credit from: GEOG 2006 [0.5] Introduction to Quantitative Research 0.5
STAT 2507 [0.5] Introduction to Statistical Modeling I 0.5
8. 1.5 credits in: GEOM 1004 [0.5] Maps, Satellites and the Geospatial Revolution 1.5
GEOM 2007 [0.5] Points, Lines and Polygons 1.5
GEOM 2013 [0.5] Weather and Water 1.5
9. 2.0 credits in: GEOM 3002 [0.5] Introduction to Remote Sensing 2.0
GEOM 3102 [0.5] Geomorphology 2.0
GEOM 3105 [0.5] Climate and Atmospheric Change 2.0
GEOM 3108 [0.5] Soil Properties 2.0
10. 1.0 credit in: GEOG 4101 [0.5] Two Million Years of Environmental Change 1.0
GEOG 4108 [0.5] Permafrost 1.0
11. 1.0 credit from: GEOG 4906 [1.0] Honours Research Project 1.0
ERTH 4908 [1.0] Honours Thesis 1.0
ERTH 4909 and 0.5 credit 4000-level ERTH 0.5
B. Credits Not Included in the Major CGPA (7.5 credits)

12. 1.0 credit in: MATH 1007 [0.5] Elementary Calculus I 1.0
MATH 1107 [0.5] Linear Algebra I 1.0
13. 1.0 credit from: CHEM 1001 [0.5] General Chemistry I 1.0
& CHEM 1002 [0.5] General Chemistry II 1.0

**Biology and Earth Sciences**

B.Sc. Combined Honours (20.0 credits)

A. Credits Included in the Major CGPA (12.0 credits)

1. 1.5 credits in: BIOL 1103 [0.5] Foundations of Biology I 1.5
BIOL 1104 [0.5] Foundations of Biology II 1.5
BIOL 2001 [0.5] Animals: Form and Function 1.5
2. 1.0 credit in: ERTH 1006 [0.5] Exploring Planet Earth 1.0
ERTH 1009 [0.5] The Earth System Through Time 1.0
3. 0.5 credit from: BIOL 2600 [0.5] Ecology 0.5
BIOL 3605 [0.5] Field Course I 0.5
4. 3.5 credits in BIOL or BIOC, with at least 1.0 credit at the 3000-level and 1.0 credit at the 4000-level 3.5
5. 3.0 credits in: ERTH 2102 [0.5] Mineralogy to Petrology 3.0
ERTH 2312 [0.5] Paleontology 3.0
ERTH 2314 [0.5] Sedimentation and Stratigraphy 3.0
ERTH 3111 [0.5] Vertebrate Evolution: Mammals, Reptiles, and Birds 3.0
ERTH 3112 [0.5] Vertebrate Evolution: Fish and Amphibians 3.0
ERTH 3113 [0.5] Geology of Human Origins 3.0
6. 0.5 credit from: ERTH 3203 [0.5] Sedimentology 0.5
ERTH 3206 [0.5] Sedimentary Depositional Systems 0.5
7. 1.0 credit in ERTH at the 4000-level 1.0
8. 1.0 credit from: BIOL 4905 [1.0] Honours Workshop 1.0
BIOL 4907 [1.0] Honours Essay and Research Proposal 1.0
BIOL 4908 [1.0] Honours Research Thesis 1.0
**B.Sc. Combined Honours (20.0 credits)**

**Chemistry and Earth Sciences**

### A. Credits Included in the Major CGPA (13.5 credits)

**Note:** for Item 5 above, ERTH 3203 is required if prerequisite conditions are met.
Students admitted to B.Sc. programs by transfer from another institution must present the following credits at graduation:

1. 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in science continuation courses in each of the two majors
2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for fewer than 10.0 credits.

2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for 10.0 or more credits.

Declared and Undeclared Students

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.Sc. degree without being registered in a program. These students are referred to as Undeclared students. The recommended course pattern for Undeclared students is provided in the Undeclared entry of the Programs section of this Calendar. Undeclared students normally must apply to enter a program before beginning their second year of study. The Science Student Success Centre (SSSC) provides Undeclared students guidance to the appropriate support services in making this decision.

Change of Program within the B.Sc. Degree

Students may transfer to a program within the B.Sc. degree if, upon entry to the new program, they would be in good academic standing.

Other applications for change of program will be considered on their merits; students may be accepted in the new program in Good Standing or on Academic Warning.

Applications to declare or change their program within the B.Sc. Degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may add a minor, concentration or specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a minor, concentration or specialization requires that the student be in Good Standing and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of experimental science chosen from two different departments or institutes from the list below:

Course Categories for B.Sc. Programs

Science Geography Courses
- GEOG 1010 [0.5] Global Environmental Systems
- GEOG 2006 [0.5] Introduction to Quantitative Research
- GEOG 2013 [0.5] Weather and Water
- GEOG 2014 [0.5] The Earth's Surface
- GEOG 3003 [0.5] Quantitative Geography
- GEOG 3010 [0.5] Field Methods in Physical Geography

Science Psychology Courses
- PSYC 2001 [0.5] Introduction to Research Methods in Psychology
- PSYC 2002 [0.5] Introduction to Statistics in Psychology
- PSYC 2700 [0.5] Introduction to Cognitive Psychology
- PSYC 3000 [1.0] Design and Analysis in Psychological Research
- PSYC 3506 [0.5] Cognitive Development
- PSYC 3700 [1.0] Cognition (Honours Seminar)
- PSYC 3702 [0.5] Perception
- PSYC 3207 [0.5] Human Neuropsychology I
- PSYC 3307 [0.5] Human Neuropsychology II

Science Continuation Courses
A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

- BIOC (Biochemistry)
- BIOL (Biology)
- CHEM (Chemistry)
- COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.
Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)
FOOD (Food Science and Nutrition)
GEOM (Geomatics)
HLTH (Health Sciences)
ISAP (Interdisciplinary Science Practice)
MATH (Mathematics)
NEUR (Neuroscience)
PHYS (Physics), except PHYS 2903
Science Geography Courses (see list above)
Science Psychology Courses (see list above)
STAT (Statistics)
TSES (Technology, Society, Environment) except TSES 2305

Science Faculty Electives
Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)
BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives
CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007
COMP (Computer Science) except COMP 1001
ERTH (Earth Sciences) except ERTH 1010, ERTH 1011 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering
ENSC 2001

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). NSCI 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives
Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Advanced Science Faculty Electives
Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)

Prohibited Courses
The following courses are not acceptable for credit in any B.Sc. program:

Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.
Undergraduate Co-operative Education Policy

Admission Requirements

Students can apply to co-op in one of two ways: directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton’s co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation

To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

Graduation with the Co-op Designation

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:
1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

B.Sc. Honours Earth Sciences: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:
1. Completion of 5.0 or more credits at Carleton University;
2. Registered as a full-time student in the Bachelor of Science Honours degree program;
3. Obtained and maintained a major CGPA of 8.0 or higher and an overall CGPA of 6.50 or higher

B.Sc. Honours Earth Sciences students must successfully complete three (3) work terms to obtain the co-op designation.

Work Term Course: EERTH 3999

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees
- B.Sc. (Honours)
- B.Sc. (Major)
- B.Sc.

Admission Requirements
B. Sc. Honours Program
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions and two of Biology, Chemistry, Earth and Space Sciences or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements
For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.
For the Honours programs in Physics and Applied Physics and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For the Combined Honours program in Chemistry and Computer Science, 4U Chemistry and Calculus and Vectors are strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing
For entry to an Honours program after the completion of 5.0 included credits, a student must have a major CGPA of 5.50 or higher, an overall CGPA of 4.50 or higher and the recommendation of the Honours department or committee. A student beginning the final 10.0 credits towards an Honours degree must present a major CGPA of 6.00 or higher, an overall CGPA of 5.00 or higher and the recommendation of the Honours department or committee. A student beginning the final 5.0 credits towards an Honours degree must present a major CGPA of 6.50 or higher and an overall CGPA of 5.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

B.Sc. Major Program
B.Sc. Program
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics. 4U Physics is strongly recommended. Equivalent courses may be substituted between the old and new Ontario mathematics curriculum.

Advanced Standing
For entry to a B.Sc. or B.Sc. Major program after the completion of 5.0 included credits, a student must have a major and core CGPA of 3.50 or higher and an overall CGPA of 3.50 or higher. A student beginning the final 5.0 credits towards a B.Sc. or B.Sc. Major degree must present a major and core CGPA of 4.00 or higher and an overall CGPA of 4.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

Co-op Option
Direct Admission to the First Year of the Co-op Option
Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Earth Sciences (ERTH) Courses

ERTH 1006 [0.5 credit]
Exploring Planet Earth
Origin of the Earth, concepts of geological time, and exploration of the interaction and duration of geological processes that shape the surface to deep interior of our planet, the climate, and formation of rocks and earth resources.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 1001 (no longer offered), ERTH 1010, ERTH 2404.
Prerequisite(s): a 4U/M level in Advanced Functions and at least one of Biology, Chemistry, Earth and Space Sciences or Physics are recommended. This course is for students who are enrolled in the Faculty of Science.
Lectures three hours a week, a laboratory three hours a week.

ERTH 1009 [0.5 credit]
The Earth System Through Time
Origin and co-evolution of Earth and life over its 4.56 billion year history. Connections between plate tectonics, rock formation, climate and global change. Early marine life, colonization of land, mass extinctions, and the use of fossils for interpreting past ecosystems.
Includes: Experiential Learning Activity
Precludes additional credit for GEOL 1008 (no longer offered), ERTH 1011.
Prerequisite(s): This course is for students who are enrolled in the Faculty of Science.
Lectures three hours a week, a laboratory three hours a week.
ERTH 1010 [0.5 credit]
Our Dynamic Planet Earth
Origin of the Earth, concepts of geological time, and exploration of the interaction and duration of geological processes that shape the surface to deep interior of our planet, the climate, and formation of rocks and earth resources.
Precludes additional credit for ERTH 1001 (no longer offered) and ERTH 1006.
Prerequisite(s): a 4U/M level in Advanced Functions and at least one of Biology, Chemistry, Earth and Space Sciences or Physics are recommended. This course is for students who are not enrolled in the Faculty of Science. Lectures three hours a week.

ERTH 1011 [0.5 credit]
Evolution of the Earth
Origin and co-evolution of Earth and life over its 4.56 billion year history. Connections between plate tectonics, rock formation, climate and global change. Early marine life, colonization of land, mass extinctions and the use of fossils for interpreting past ecosystems.
Precludes additional credit for GEOL 1008 (no longer offered) and ERTH 1009.
Prerequisite(s): a 4U/M level in Advanced Functions and at least one of Biology, Chemistry, Earth and Space Sciences or Physics are recommended; ERTH 1010 is normally taken prior to this course. This course is for students who are not enrolled in the Faculty of Science. Lectures three hours a week.

ERTH 2004 [0.5 credit]
Maps, Satellites and the Geospatial Revolution
Introduction to the creation and use of maps using a variety of geospatial tools to better understand and resolve physical, social and environmental problems. Overview of geomatics (cartography and map design, geographic information systems, GPS, remote sensing).
Also listed as GEOM 1004.
Precludes additional credit for GEOM 2004 (no longer offered).
Lectures and laboratory, four hours per week.

ERTH 2102 [0.5 credit]
Mineralogy to Petrology
Chemical, optical and crystallographic properties of common rock-forming minerals, with introduction to common mineral assemblages of igneous, sedimentary, and metamorphic rocks.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 3202 (no longer offered).
Prerequisite(s): ERTH 1006 and (ERTH 1009 or GEOG 2013) and (CHEM 1001 or CHEM 1005) and (CHEM 1002 or CHEM 1006) and (MATH 1004 or MATH 1007) and (MATH 1104 or MATH 1107).
Lectures two hours a week and laboratory three hours a week.

ERTH 2104 [0.5 credit]
Igneous Systems, Geochemistry and Processes
The sources and magmatic evolution of volcanic and plutonic rocks systems, with emphasis on geochemical, mineralogical, and textural characteristics, and relations to igneous processes.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 3202 (no longer offered).
Prerequisite(s): (CHEM 1001 or CHEM 1005) and (CHEM 1002 or CHEM 1006), (MATH 1004 or MATH 1007), (MATH 1104 or MATH 1107) and ERTH 2102.
Lectures three hours a week, laboratory three hours a week and a field excursion.

ERTH 2105 [0.5 credit]
Geodynamics
The structure, composition, and rheological properties of the Earth: lithosphere, mantle and core. Plate tectonics and its relation to geophysical fields, driving mechanisms, and processes at plate boundaries and in plate interiors.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 3805 (no longer offered).
Prerequisite(s): ERTH 1006 and (ERTH 1009 or GEOG 2013).
Lectures two hours a week and a laboratory three hours a week.

ERTH 2312 [0.5 credit]
Paleontology
Introduction to macrofossil and microfossil groups, their paleoenvironmental significance, and principles of evolutionary paleoecology.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 2316, GEOL 2301 (no longer offered) and GEOL 2306 (no longer offered).
Prerequisite(s): ERTH 1006 and (ERTH 1009 or GEOG 2013).
Lectures two hours a week and a laboratory three hours a week.
ERTH 2314 [0.5 credit]
Sedimentation and Stratigraphy
Origin of sediments and their transport, distribution, and primary structures; processes of sediment-to-rock transformation; spatial patterns; controls of stratigraphy; methods of correlation.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 2318.
Prerequisite(s): ERTH 1006 and (ERTH 1009 or GEOG 2013).
Lectures three hours a week and a laboratory three hours a week.

ERTH 2316 [0.5 credit]
Paleoecology
Introduction to macrofossil and microfossil groups, their paleoenvironmental significance, and principles of evolutionary paleoecology.
Precludes additional credit for ERTH 2312. Not available for credit in B.Sc. Earth Sciences programs.
Prerequisite(s): ERTH 1006 and ERTH 1009. Priority given to students in the Minor in Earth Sciences.
Lectures two hours a week.

ERTH 2318 [0.5 credit]
Sedimentology
Origin of sediments and their transport, distribution, and primary structures; processes of sediment-to-rock transformation; spatial patterns; controls of stratigraphy and methods of correlation.
Precludes additional credit for ERTH 2314. Not available for credit in B.Sc. Earth Sciences programs.
Prerequisite(s): ERTH 1006 and ERTH 1009. Priority given to students in the Minor in Earth Sciences.
Lectures three hours a week.

ERTH 2401 [0.5 credit]
Dinosaurs
A general introduction to dinosaurs, their place in evolution, their social behaviour, the Mesozoic landscape and extinction theories.
Lectures three hours a week.

ERTH 2402 [0.5 credit]
Climate Change: An Earth Sciences Perspective
An exploration of the often dramatic climate changes that have occurred through earth history from a geological perspective, emphasizing the history of earth climates, geological causes of climate change and impact that rapid climate change has had on the biosphere.
Lectures three hours a week.

ERTH 2403 [0.5 credit]
Introduction to Oceanography
An environmental approach to understanding the oceans; introducing the physical and biological aspects of oceanography, marine resources and marine pollution.
Precludes additional credit for ERTH 3206.
Lectures three hours per week.

ERTH 2406 [0.5 credit]
Geology and Map Interpretation
Analysis and interpretation of geological features and processes using rocks, maps and cross sections. Introduction to computational methods.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2102 and ERTH 2004.
Lectures two hours a week and a laboratory three hours a week.

ERTH 2415 [0.5 credit]
Natural Disasters
Physical characteristics and causes of natural disasters of geological origin such as volcanic eruptions, earthquakes, tsunami, landslides, hurricanes and meteor impacts. Discussion on historical perspective, societal impact and mitigation strategies. Emphasis on Canadian case histories.
Precludes additional credit for ERTH 1003 (no longer offered).
Prerequisite(s): second-year standing in any degree program. With the exception of the Minor in Earth Sciences, available as a free elective only in any B.Sc. program, including Earth Sciences.
Lectures three hours a week.

ERTH 2419 [0.5 credit]
On the Origin of Planets
Origin and evolution of all planetary objects in the solar system. Topics include the geology of comets, asteroids, the terrestrial planets and rocky moons, Earth’s formation and early evolution, ocean worlds, the search for exoplanets and detection of extraterrestrial life.
Lectures three hours a week.

ERTH 2802 [0.5 credit]
Field Geology I
Field analysis using geological, geophysical and computational methods leading to the interpretation of the origins of geological features and processes.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2406 and permission of the department.
Field work for two weeks off campus. A supplementary fee will apply.
ERTH 3002 [0.5 credit]
Gemology
Gemstones including their physical and chemical properties, geological formation and geographic occurrence. Introduction to gemological laboratory methods.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2102.
Lectures two hours a week and laboratory two hours a week.

ERTH 3003 [0.5 credit]
Geochemistry and Geochronology
Geochemical composition of reservoirs from the deep Earth to surface environments. Use of geochemistry and isotope geochemistry to track geological processes. Introduction to a variety of scientific dating methods (geochronology).
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 2101 (no longer offered).
Prerequisite(s): ERTH 2102, ERTH 2104 and ERTH 2105.
Lecture three hours a week and a laboratory two hours a week.

ERTH 3111 [0.5 credit]
Vertebrate Evolution: Mammals, Reptiles, and Birds
Evolution of mammals, reptiles and birds. Emphasis on surveying amniote diversity, and the origin of key amniote transformations, as evidenced by the fossil record.
Includes: Experiential Learning Activity
Also listed as BIOL 3111.
Prerequisite(s): ERTH 1009 or BIOL 2001, or permission of the department.
Lectures two hours a week and a laboratory three hours a week.

ERTH 3112 [0.5 credit]
Vertebrate Evolution: Fish and Amphibians
Evolution of fish and amphibians. Emphasis on surveying fish and amphibian diversity, and the origin of key transformations of these groups, as evidenced by the fossil record.
Includes: Experiential Learning Activity
Also listed as BIOL 3112.
Prerequisite(s): ERTH 1009 or BIOL 2001, or permission of the department.
Lectures two hours a week and a laboratory three hours a week.

ERTH 3113 [0.5 credit]
Geology of Human Origins
The origin and evolution of our species from geological, biological and cultural perspectives. The course traces human ancestry from our primate roots through time and changing environments, and explores controversies, frauds, and misperceptions.
Prerequisite(s): any 1000 or 2000 level Earth Sciences or Biology course.
Lectures three hours per week.

ERTH 3203 [0.5 credit]
Sedimentology
A 10-day field study of modern and ancient sedimentary and ecological systems and their stratigraphy in a geological region outside of the Ottawa area. Subsequent in-class seminars examine significant changes in sedimentary environments through Earth's history. A supplementary fee will apply.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 3201 (no longer offered).
Prerequisite(s): ERTH 2314, enrolment in one of the ERTH Honours, Combined Honours or Major programs, a 2000-level CGPA of 8.0 and permission of the Department.
Ten-day off-campus field course.

ERTH 3204 [0.5 credit]
Mineral Deposits
Analysis and interpretation of the geological and geochemical processes responsible for mineral deposit genesis in a global context.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2104.
Lectures and laboratory five hours a week.

ERTH 3205 [0.5 credit]
Physical Hydrogeology
Principles of deep- to shallow fluid flow within the Earth's crust, and introduction to the exploration, development and management of groundwater as a global resource.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 1006 and (ERTH 1009 or GEOG 2013).
Lecture three hours a week and a laboratory three hours a week.

ERTH 3206 [0.5 credit]
Sedimentary Depositional Systems
Application of sedimentary facies in class and local field-based settings to interpret modern and ancient depositional environments and stratigraphic succession related to climatic and oceanographic influences. Subsequent in-class seminars examine significant changes in sedimentary environments through Earth's history.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 3208 (no longer offered).
Prerequisite(s): ERTH 2314.
Field and class based instruction, 6 hours a week.

ERTH 3207 [0.5 credit]
Metamorphic Petrology and Processes
Genesis of metamorphic rocks as determined from field, petrographic and geochemical data.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 3202 (no longer offered).
Prerequisite(s): ERTH 2104.
Lectures two hours a week, a laboratory three hours a week and a field excursion.
ERTH 3405 [0.5 credit]
Geophysical Methods
An introduction to the tools of applied geophysics including seismology, electrical, magnetic, and gravitational surveying methods.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2105.
Lecture two hours a week and a laboratory three hours a week.

ERTH 3806 [0.5 credit]
Structural Geology
Structures and deformational processes in a variety of crustal settings. Applications to geological engineering and mineral and petroleum exploration.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2105 and ERTH 2406.
Lecture two hours a week and a laboratory three hours a week.

ERTH 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

ERTH 4003 [0.5 credit]
Directed Studies in Geology
One or more projects involving at least 15 days field and/or laboratory research, not related to thesis research. Assessment based on written reports and an oral presentation. Expenses for long-distance travel are borne by the student.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in any B.Sc. Hons. or Combined Hons. program in Earth Sciences.
Schedule to be arranged.

ERTH 4004 [0.5 credit]
Special Topics in Earth Sciences
Field, laboratory or literature research, not related to thesis research. Assessment based on written reports and an oral presentation. Expenses for travel are borne by the student.
Prerequisite(s): fourth-year standing in any B.Sc. Hons. or Combined Hons. program in Earth Sciences. Major CGPA 8.5 or higher at time of registration for the course.
Schedule to be arranged.

ERTH 4005 [0.5 credit]
Micropaleontology
Paleoecological and biostratigraphic significance, and evolutionary history of marine and freshwater microorganisms.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2312.
Lectures, seminars and/or laboratory five hours a week.

ERTH 4006 [0.5 credit]
Geobiology
Exploration of the relationship between micro- and macro-evolutionary processes and the Earth's physical and chemical environment. Paleobiology and evolutionary ecology in the context of paleoceanography, paleolimnology and paleoclimatology. May include one or two weeks of field based instruction with costs borne by the student.
Prerequisite(s): ERTH 2312.
Field excursions in addition to lectures or seminars three hours a week.

ERTH 4007 [0.5 credit]
Evolutionary Developmental Paleobiology
This course explores the mechanistic basis of organismic evolution from genetic, morphogenetic and epigenetic perspectives, within a phylogenetic context of living and extinct vertebrates.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 2312 or BIOL 2001, and BIOL 2104.
Lectures or seminars three hours per week.

ERTH 4107 [0.5 credit]
Geotechnical Mechanics
Includes: Experiential Learning Activity
Also listed as CIVE 3208.
Prerequisite(s): ERTH 2406 and ERTH 3405.
Lectures three hours a week, laboratory three hours alternate weeks.

ERTH 4206 [0.5 credit]
Contaminant and Remediation Hydrogeology
Geochemical and physical processes controlling contaminant release, migration, and fate in groundwater along with the processes and techniques used for contaminant mitigation and remediation. Examples will include organic and inorganic contaminants in a variety of settings.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 3003 and ERTH 3205.
Lectures and seminars three hours per week.
ERTH 4209 [0.5 credit]  
**Mineral Exploration Field Geology**  
Introduction to the essentials of conducting geological mapping campaign in the Canadian Shield in a field area that has seen considerable industry exploration for volcanogenic massive sulfide mineralization. Activities include outcrop and trench mapping, strain analysis, interpretation of geophysical data, drilling proposals, report writing.  
Includes: Experiential Learning Activity  
Precludes additional credit for ERTH 3209.  
Prerequisite(s): ERTH 2104, ERTH 3207, ERTH 3806.  
Field work for two weeks off-campus. A supplementary fee will apply.  

ERTH 4303 [0.5 credit]  
**Resources of a Finite Earth**  
Earth's resources: where they occur, how they are concentrated, how they are extracted and used, how human exploitation of natural resources affects the environment, and the limits to growth imposed by finite supplies of natural resources.  
Prerequisite(s): third-year standing in any degree program.  
Lectures three hours a week.  

ERTH 4305 [0.5 credit]  
**Carbonate Sedimentology**  
The origin, composition and diagenesis of carbonate rocks. Study of modern and ancient platform systems; development of facies models; petrographic and geochemical analysis of limestones and dolostones.  
Includes: Experiential Learning Activity  
Prerequisite(s): ERTH 3203 or ERTH 3206.  
Lecture two hours a week and a laboratory three hours a week.  

ERTH 4306 [0.5 credit]  
**Resource Basin Analysis**  
Surface and subsurface geological and geophysical techniques used to define the distribution and origin of geological basins, the architecture of basin fill, and characterize the distribution of water, petroleum and mineral resources.  
Includes: Experiential Learning Activity  
Prerequisite(s): ERTH 3203 or ERTH 3206, ERTH 3205, and ERTH 3806.  
Lectures, seminars and laboratory five hours a week.  

ERTH 4402 [0.5 credit]  
**Structural Geology**  
A study of the structural evolution of mountain belts, with emphasis on field methods.  
Includes: Experiential Learning Activity  
Prerequisite(s): ERTH 3806.  
Lectures, seminars and laboratory five hours a week.  

ERTH 4403 [0.5 credit]  
**Tectonic Evolution of Canada**  
Geologic evolution of Canada focusing on geological styles and tectonic processes of Archean cratons, Proterozoic and Phanerozoic orogenic belts.  
Prerequisite(s): ERTH 3806.  
Lectures and seminars three hours a week.  

ERTH 4504 [0.5 credit]  
**Advanced Igneous Petrology**  
Volcanology, petrology, mineralogy and geochemistry of igneous rocks and their tectonic setting. May include one to two weeks of field-based instruction with costs borne by the student.  
Includes: Experiential Learning Activity  
Prerequisite(s): ERTH 3003.  
Field excursions in addition to lectures or seminars three hours per week.  

ERTH 4507 [0.5 credit]  
**Advanced Metamorphic Petrology**  
Introduction to the quantitative analysis of pressure-temperature-time trajectories and rock-forming processes during metamorphic petrogenesis; may include one or two weeks of field-based instruction, with costs borne by the student.  
Includes: Experiential Learning Activity  
Prerequisite(s): ERTH 2802 and ERTH 3207.  
Field excursions, lectures, or seminars three hours per week.  

ERTH 4707 [0.5 credit]  
**Engineering Seismology**  
Prerequisite(s): (MATH 1004 or MATH 1007), (MATH 1104 or MATH 1107), STAT 2507 and ERTH 3405 or permission of the department.  
Also offered at the graduate level, with different requirements, as ERTH 5707, for which additional credit is precluded.  
Lectures three hours a week.  

ERTH 4801 [0.5 credit]  
**Physics of the Earth**  
The physical properties of the solid Earth. Gravitational, magnetic and palaeomagnetic fields; seismology and earthquake occurrence; heat flow and thermal history. Geodynamic processes.  
Prerequisite(s): ERTH 3405 and ERTH 3806.  
Also offered at the graduate level, with different requirements, as ERTH 5701, for which additional credit is precluded.  
Lectures three hours a week.
ERTH 4803 [0.5 credit]
Radiogenic Isotope Geology
Use of radiogenic isotope systems to understand the differentiation history and evolution of large-scale isotopic reservoirs. Data, models and interpretations behind our present day knowledge and understanding of the Earth's history. Assessment of geochronological results and interpretations.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 3003.
Also offered at the graduate level, with different requirements, as ERTH 5609, for which additional credit is precluded.
Lectures, seminars or laboratories three hours per week.

ERTH 4804 [0.5 credit]
Exploration Geophysics
Application of geophysical methods to explore for petroleum and mineral resources, with emphasis on seismic and electromagnetic methods. Case histories illustrate the concepts.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 3405.
Lectures and laboratories five hours per week.

ERTH 4807 [0.5 credit]
Field Geology II
Field camp integrating advanced field, theory and experimental data. Assessment is based on reports, seminars, and oral examinations. Part of the cost is borne by the student. Departmental funding assistance is available for only one 4000-level field course per student.
Includes: Experiential Learning Activity
Prerequisite(s): completion of the third-year Earth Sciences course requirements and permission of the Department. A supplementary fee will apply.
Field work off campus.

ERTH 4808 [0.5 credit]
Vertebrate Paleontology Field Camp
Field camp extends the student's vertebrate paleontological knowledge by integrating field, theory, and experimental data. Assessment based on written reports and seminars. Part of the cost is borne by the student. Departmental funding assistance is available for only one 4000-level field course per student.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 3111 or ERTH 3112, and ERTH 3113. A Major CGPA of 8.5 or higher and permission of the department is required at the time of registration.
Field work for two weeks off campus. A supplementary fee will apply.

ERTH 4815 [0.5 credit]
Natural Hazards in Canada
Overview of the main natural hazards (such as floods, landslides, forest fires, earthquakes) and severe weather phenomena (such as ice storms, hail, tornadoes) in the Canadian environment. Risk of catastrophic events and their impact on society and infrastructure.
Prerequisite(s): third-year standing in earth science programs or permission of the department.
Also offered at the graduate level, with different requirements, as ERTH 5215 and IPIS 5505, for which additional credit is precluded.
Lectures three hours a week.

ERTH 4820 [0.5 credit]
Research Methods in Earth Sciences
Research approaches, methodologies and resources in Earth Sciences; analytical methods in Earth Sciences; data acquisition, evaluation and interpretation; principles and strategies of scientific and professional writing; and communication of results.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Earth Sciences programs.
Lectures, seminars, or laboratories three hours a week. May also include visits to other research institutes or workshops with visiting instructors.

ERTH 4908 [1.0 credit]
Honours Thesis
Independent studies. Requires prior written approval of a topic from a supervisor and the course co-ordinator. Oral and written proposal, progress and defence reports are required.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 4909, ERTH 4910.
Prerequisite(s): restricted to B.Sc. Honours and Combined Honours ERTH programs. Major CGPA 8.5 or higher at time of registration for the course.

ERTH 4909 [0.5 credit]
Research in Earth Sciences
Understanding research methods, data interpretation and presentation, through readings, seminars and-or laboratory projects related to a topic selected by the student with approval of a faculty advisor.
Includes: Experiential Learning Activity
Precludes additional credit for ERTH 4908, ERTH 4910.
Prerequisite(s): restricted to B.Sc. Honours and Combined Honours Earth Sciences programs.
Economics Program Requirements

This section presents the requirements for programs in:

- Economics B.Econ. Honours
- Economics B.Econ. Honours with Concentration
- Economics B. Econ. Honours with Concentrations
- Concentration in Computational Analysis
- Concentration in Development
- Concentration in Economic Data Science
- Concentration in Economic Theory
- Concentration in Financial Economics
- Concentration in International Political Economy
- Concentration in Natural Resources, Environment, and Economy
- Concentration in Mathematics and Quantitative Economics
- Economics B.Econ. Combined Honours
- Economics B.A. Honours Combined
- Economics B.Econ.
- Specialization in International Economic Policy B.G.In.S. Honours
- Stream in International Economic Policy B.G.In.S.
- Minor in Economics
- Minor in Industrial Economics
- Post-Baccalaureate Diploma in Economics

Program Requirements

Economics

B.Econ. Honours (20.0 credits)

A. Credits Included in the Major CGPA (10.5 credits)

ERTH 4910 [1.0 credit]
Honours Thesis in Resource Evaluation

Independent studies: Analysis and interpretation of geological, environmental and/or financial data to determine economic value of a natural resource, and its viability for sustainable development. Requires approval of the supervisor and course coordinator. Oral and written proposal, progress and defense reports are required. Includes: Experiential Learning Activity Precludes additional credit for ERTL 4908 and ERTL 4909.

Prerequisite(s): Restricted to B.Sc. Honours in Earth Sciences with Concentration in Finance: Resource Valuation. Major CGPA 8.5 or higher at time of registration.

ERTH 4909.

Includes: Experiential Learning Activity proposal, progress and defense reports are required. Oral and written viability for sustainable development. Requires approval to determine economic value of a natural resource, and its geological, environmental and/or financial data to

Total Credits 20.0

Note:
An Honours essay, ECON 4908 [1.0], may be written by students with Overall and Major CGPAs of 9.50 or higher. In cases where a grade of B- or higher is earned on this essay, it may replace both the ECON 4905 requirement and a 0.5-credit 4000 level ECON elective requirement. Qualified students who choose to pursue the Honours essay pathway must first complete an Honours essay prospectus to the satisfaction of both their advisor and the Undergraduate Supervisor. See The Honours Essay Guidelines maintained by the Department for further details.

Economics
B. Econ. Honours
with Concentrations (20.0 credits)

A. Credits Included in the Major CGPA (14.5 credits)

1. 6.5 credits in:

</tbody>
</table>

Total Credits 4.0

Notes:
1. For Item 2a of the Concentration in Computational Analysis, COMP 1405 may replace COMP 1005 and COMP 1406 may replace COMP 1006.
2. COMP 1805 in the Concentration in Computational Analysis is not required if precluded course MATH 1800 is required by another component of the student’s program, such as the Concentration in Mathematics and Quantitative Economics, in which case an additional 0.5 credit in COMP is required from the list of electives in Item 2c.

Concentration in Development (4.0 credits)

**Total Credits: 4.0**

### Concentration in Economic Data Science (4.0 credits)

2a. 1.5 credits in:  
- BUSI 2400 [0.5] Foundations of Information Systems  
- COMC 1005 [0.5] Introduction to Computer Science I  
- ECON 2708 [0.5] Applied Data Analysis  

2b. 2.0 credits in:  
- ECON 4002 [0.5] Statistical Analysis in Economics  
- ECON 4706 [0.5] Econometrics I  
- ECON 4708 [0.5] Economic Data Science - Analytics  
- ECON 4709 [0.5] Economic Data Science - Applications  

2c. 0.5 credit from:  
- BUSI 4406 [0.5] Business Analytics  
- BUSI 4408 [0.5] Social Analytics  
- ECON 4707 [0.5] Econometrics II  
- ECON 4713 [0.5] Time-Series Econometrics  
- ECON 4880 [0.5] Special Topics in Economics  

**Total Credits: 4.0**

### Concentration in Economic Theory (4.0 credits)

2a. 3.0 credits in: Core Theory  
- ECON 3001 [0.5] Mathematical Methods of Economics  
- ECON 4001 [0.5] Mathematical Analysis in Economics  
- ECON 4002 [0.5] Statistical Analysis in Economics  
- ECON 4020 [0.5] Advanced Microeconomic Theory  
- ECON 4021 [0.5] Advanced Macroeconomic Theory  
- ECON 4706 [0.5] Econometrics I  

2b. 1.0 credit in:  
- ECON at the 4000 level  

**Total Credits: 4.0**

### Concentration in Financial Economics (4.0 credits)

2a. 1.0 credit in:  
- BUSI 1001 [0.5] Principles of Financial Accounting  
- BUSI 1002 [0.5] Management Accounting  
  (See Note 1 below)  

2b. 1.5 credits from:  
- ECON 3050 [0.5] Introduction to Financial Economics  
- ECON 4051 [0.5] Financial Asset Pricing  
- ECON 4052 [0.5] Corporate Financial Economics  
- BUSI 3500 [0.5] Applied Corporate Finance  
- BUSI 3502 [0.5] Investments  
- BUSI 3512 [0.5] Derivatives  
  (see Note 2, below)  

2c. 1.5 credits from:  
- ECON 3602 [0.5] International Monetary Problems  
  or ECON 4602 [0.5] International Monetary Theory and Policy  
- ECON 3607 [0.5] Monetary and Financial Institutions  
- ECON 4053 [0.5] Financial Market Institutions  
- ECON 4056 [0.5] Insurance Economics  
- ECON 4057 [0.5] Behavioural Financial Economics  
- PSCI 4805 [0.5] Political Economy of Global Money and Finance  
- BUSI 2504 [0.5] & BUSI 2505 [0.5] and one of:  
  - BUSI 4500 [0.5]  
  - BUSI 4502 [0.5] (see Note 3, below)  

**Total Credits: 4.0**

**Notes**

1. For Item 2a of the Concentration in Financial Economics, BUSI 1004 [0.5] may replace BUSI 1001 [0.5] and BUSI 1005 [0.5] may replace BUSI 1002 [0.5].

2. For Item 2b of the Concentration in Financial Economics, students taking BUSI 3500 [0.5], BUSI 3502 [0.5] and BUSI 3512 [0.5] must meet all required prerequisites for these courses as stated in the Undergraduate Calendar description at the time of registration.

3. For Item 2c of the Concentration in Financial Economics, BUSI 2504 [0.5] and BUSI 2505 [0.5] may not count for credit inside the major without also including either BUSI 4500 [0.5] or BUSI 4502 [0.5].
### Concentration in Mathematics and Quantitative Economics (4.0 credits)

2a. 3.0 credits in:
- ECON 3803 [0.5] The Economics of Natural Resources
- ECON 3804 [0.5] Environmental Economics
- GEOG 2200 [0.5] Global Connections
- GEOG 2300 [0.5] Space, Place and Culture
- GEOG 3022 [0.5] Environmental and Natural Resources
- PSCI 3801 [0.5] Environmental Politics

2b. 0.5 credit from:
- ECON 4407 [0.5] Project Evaluation
- GEOG 4004 [0.5] Environmental Impact Assessment
- TSES 4001 [0.5] Technology and Society: Risk

2c. 0.5 credit from:
- ERTH 4303 [0.5] Resources of a Finite Earth
- GEOG 3209 [0.5] Sustainability and Environment in the South
- GEOG 4022 [0.5] Seminar in People, Resources and Environmental Change
- PSCI 4808 [0.5] Global Environmental Politics
- TSES 3002 [0.5] Energy and Sustainability

### Concentration in Natural Resources, Environment, and Economy (4.0 credits)

2a. 3.0 credits in:
- ECON 1401 [0.5] Environmental Economics
- ECON 1402 [0.5] Global Connections
- GEOG 3022 [0.5] Environmental and Natural Resources
- PSCI 3801 [0.5] Environmental Politics

2b. 0.5 credit from:
- ECON 4407 [0.5] Project Evaluation
- GEOG 4004 [0.5] Environmental Impact Assessment
- TSES 4001 [0.5] Technology and Society: Risk

2c. 0.5 credit from:
- ERTH 4303 [0.5] Resources of a Finite Earth
- GEOG 3209 [0.5] Sustainability and Environment in the South
- GEOG 4022 [0.5] Seminar in People, Resources and Environmental Change
- PSCI 4808 [0.5] Global Environmental Politics
- TSES 3002 [0.5] Energy and Sustainability

### Notes:
1. Students enrolled in the Concentration in Mathematics and Quantitative Economics must replace ECON 1401 [0.5] and ECON 1402 [0.5] in Item 1 of the B.Econ. Honours with Concentration(s) program requirements with either (i) MATH 1052 [0.5] and MATH 1152 [0.5], or (ii) MATH 1007 [0.5] and MATH 1107 [0.5]. Students who intend to take MATH 2000 [1.0] are strongly recommended to choose option (i). Please note that MATH 2000 is a prerequisite to upper year MATH courses such as MATH 3001 [0.5].

2. Students who have completed MATH 1004 [0.5] and MATH 1104 [0.5] can replace ECON 1401 [0.5] and ECON 1402 [0.5] in Item 1 of the B.Econ. Honours with Concentration(s) program requirements.

3. MATH 2007 [0.5] may replace MATH 2052 [0.5]. Students who intend to take MATH 2000 [1.0] are strongly recommended to take MATH 2052 [0.5].

4. MATH 2107 Linear Algebra II may replace MATH 2152 [0.5]. Students who intend to take MATH 2000 [1.0] are strongly recommended to take MATH 2152 [0.5].

5. MATH 2008 [0.5] may replace MATH 2052 [0.5]. In this case, the credit requirement under Item 2b will be reduced from 1.0 credit to 0.5 credit, and the credit requirement under Item 2c will be increased from 1.0 credit to 1.5 credit.

6. Students interested in other 3000 level MATH courses not listed under requirement 2c, may seek permission from the Department of Economics to have these courses count towards this requirement.

7. Students interested in other 4000 level MATH courses not listed under requirement 2d, may seek permission from the Department of Economics to have these courses count towards this requirement.

### Economics

#### B.Econ. Combined Honours (20.0 credits)

Students admitted to the Bachelor of Economics may register for a Combined Bachelor of Economics and any other discipline in which a B.A. Combined program is available.

#### A. Credits Included in the Economics Major CGPA (7.5 credits)

1. **6.5 credits in:**
   - ECON 1001 [0.5] Introduction to Microeconomics
   - ECON 1002 [0.5] Introduction to Macroeconomics
   - ECON 1401/MATH 1200 [0.5] Elementary Mathematics for Economics I
   - ECON 1402/MATH 1205 [0.5] Elementary Mathematics for Economics II
   - ECON 4005 [0.5] Operations Research II
   - ECON 4700 [0.5] Measurement Economics
   - MATH 4007 [0.5] Measure and Integration Theory (Honours)
   - MATH 4205 [0.5] Introduction to General Topology (Honours)

   **Total Credits:** 4.0
ECON 2020 [0.5] Intermediate Microeconomics I: Producers and Market Structure
ECON 2030 [0.5] Intermediate Microeconomics II: Consumers and General Equilibrium
ECON 2102 [0.5] Intermediate Macroeconomics I
ECON 2103 [0.5] Intermediate Macroeconomics II
ECON 2210 [0.5] Introductory Statistics for Economics
ECON 2220 [0.5] Introductory Econometrics
ECON 3900 [0.5] Research Methods in Economics
ECON 3920 [0.5] Professional Practice of Economics
ECON 4905 [0.5] Honours Capstone Seminar (see Note 1 below)

2. 1.0 credit in ECON at the 3000 or 4000 level 1.0

B. Additional Requirements (12.5 credits) 12.5

3. The requirements for Combined Honours in the other discipline must be satisfied

4. Sufficient credits in free electives to make 20.0 credits for the degree.

Total Credits 20.0

Note: ECON 4908 [1.0] Honours Essay, may be written by students with Overall and Major CGPAs of 9.50 or higher. In cases where a grade of B- or higher is earned on this essay, it may replace the ECON 4905 requirement together with an ECON elective requirement. Qualified students who choose to pursue the Honours essay stream must first complete an Honours essay prospectus to the satisfaction of both their advisor and the Undergraduate Supervisor. See The Honours Essay guidelines maintained by the Department for further details.

Economics

B.A. Honours Combined (20.0 credits)

Students already enrolled in a B.A. discipline may add Economics as an additional discipline under the B.A. Combined Honours. Economics course requirements for the B.A. Combined Honours are the same as those listed under the B.Econ. Combined Honours, above.

Economics

B.Econ. (15.0 credits)

A. Credits Included in the Major CGPA (7.0 credits)

1. 3.5 credits in: 3.5
   - ECON 1001 [0.5] Introduction to Microeconomics
   - ECON 1002 [0.5] Introduction to Macroeconomics
   - FYSM 1003 [1.0] Introduction to Economics
   - ECON 1401/MATH 1401 Elementary Mathematics for Economics I
   - ECON 1402/MATH 1402 Elementary Mathematics for Economics II
   - ECON 2020 [0.5] Intermediate Microeconomics I: Producers and Market Structure
   - ECON 2102 [0.5] Intermediate Macroeconomics I
   - ECON 2210 [0.5] Introductory Statistics for Economics

2. 3.5 credits in ECON at the 2000 level or higher 3.5

3. 6.0 credits in electives not in ECON 6.0

4. 2.0 credits in free electives. 2.0

Total Credits 15.0

Specialization in International Economic Policy

B.G.In.S. Honours (20.0 credits)

A. Credits Included in the Major CGPA (12.0 credits)

1. 4.5 credits in: Core Courses 4.5
   - GINS 1000 [0.5] Global History
   - GINS 1010 [0.5] International Law and Politics
   - GINS 1020 [0.5] Ethnography, Globalization and Culture
   - GINS 2000 [0.5] Ethics and Globalization
   - GINS 2010 [0.5] Globalization and International Economic Issues
   - GINS 2020 [0.5] Global Literatures
   - GINS 3010 [0.5] Global and International Theory
   - GINS 3020 [0.5] Places, Boundaries, Movements and Global Environmental Change
   - GINS 4090 [0.5] Honours Seminar in Global and International Studies

2. 0.0 credits in: International Experience Requirement Preparation
   - GINS 1300 [0.0] International Experience Requirement Preparation

3. 7.5 credits in: the Specialization 7.5
   a. 1.0 credit in: Foundations 1.0
      - ECON 1001 [0.5] Introduction to Microeconomics
      - FYSM 1003 [1.0] Introduction to Economics
   b. 0.5 credit in: Microeconomics 0.5
      - ECON 2001 [0.5] Intermediate Microeconomics for Non-Mathematical Majors
      - ECON 2009 [0.5] Managerial Economics
      or
      - ECON 2020 [0.5] Intermediate Microeconomics I: Producers and Market Structure
   c. 0.5 credit in: Macroeconomics 0.5
      - ECON 2101 [0.5] Intermediate Macroeconomics for Non-Mathematical Majors
      - ECON 2102 [0.5] Intermediate Macroeconomics I
   d. 0.5 credit in: Research Methodologies 0.5
      - IPAF 2000 [0.5] Quantitative Approaches to Policy Analysis
      or
      - ECON 2210 [0.5] Introductory Statistics for Economics
   e. 2.0 credits in: International and Public Economics 2.0
      - ECON 3403 [0.5] Introduction to Public Economics: Expenditures
      - ECON 3405 [0.5] Introduction to Public Economics: Taxation
      - ECON 3601 [0.5] Introduction to International Trade
      - ECON 3602 [0.5] International Monetary Problems
   f. 3.0 credits from: International Economic Policy 3.0
      - ECON 3370 [0.5] The Economics of Migration
      - ECON 3508 [0.5] Introduction to Economic Development
      - ECON 3509 [0.5] Development Planning and Project Evaluation
      - ECON 3510 [0.5] African Economic Development
B.G.In.S. (15.0 credits)
Stream in International Economic Policy

a. Foundations
- ECON 1001 [0.5] Introduction to Microeconomics
- & ECON 1002 [0.5] Introduction to Macroeconomics
- or FYSM 1003 [1.0] Introduction to Economics

b. Microeconomics
- ECON 2001 [0.5] Intermediate Microeconomics for Non-Mathematical Majors
- or ECON 2009 [0.5] Managerial Economics
- or ECON 2020 [0.5] Intermediate Microeconomics: Producers and Market Structure

c. Macroeconomics
- ECON 2101 [0.5] Intermediate Macroeconomics for Non-Mathematical Majors
- or ECON 2102 [0.5] Intermediate Macroeconomics I

d. Research Methodologies
- IPAF 2000 [0.5] Quantitative Approaches to Policy Analysis
- or ECON 2210 [0.5] Introductory Statistics for Economics

e. International Economic Policy
- ECON 3403 [0.5] Introduction to Public Economics: Expenditures
- ECON 3405 [0.5] Introduction to Public Economics: Taxation

Note: To meet the prerequisite requirements for ECON 2009, ECON 2020, ECON 2102, and ECON 2210, students must have obtained a grade of C- or higher in ECON 1401 or MATH 1009 and a grade of C- or higher in FYSM 1003 or ECON 1000 or equivalent.

B. Credits Not Included in the Major CGPA (8.0 credits)
5. 4.0 credits in: 
- Free Electives

C. Additional Requirements
4. 8.0 credits in:
- ECON 3405
- ECON 3400
- ECON 3305
- ECON 3300
- ECON 3205
- ECON 3200
- ECON 3105
- ECON 3100

Note: To meet the prerequisite requirements for ECON at the 2000 level or higher, or IPAF 2000 [0.5], students must have obtained a grade of C- or higher in ECON 1401 or MATH 1009 and a grade of C- or higher in FYSM 1003 or ECON 1000 or equivalent.

B. Credits Not Included in the Major CGPA (7.0 credits)
3. 7.0 credits in: 
- Free Electives

C. Additional Requirements
4. The Language requirement must be met.

Total Credits 20.0

Stream in International Economic Policy
B.G.In.S. (15.0 credits)

A. Credits Included in the Major CGPA (8.0 credits)
1. 4.0 credits in: Core Courses
- GINS 1000 [0.5] Global History
- GINS 1010 [0.5] International Law and Politics
- GINS 1020 [0.5] Anthropology, Globalization and Culture
- GINS 2000 [0.5] Ethics and Globalization
- GINS 2010 [0.5] Globalization and International Economic Issues
- GINS 2020 [0.5] Global Literature
- GINS 3010 [0.5] Global and International Theory
- GINS 3020 [0.5] Places, Boundaries, Movements and Global Environmental Change

2. 4.0 credits from: the Stream

a. Foundations
- ECON 1001 [0.5] Introduction to Microeconomics
- & ECON 1002 [0.5] Introduction to Macroeconomics
- or FYSM 1003 [1.0] Introduction to Economics

b. Microeconomics
- ECON 2001 [0.5] Intermediate Microeconomics for Non-Mathematical Majors
- or ECON 2009 [0.5] Managerial Economics
- or ECON 2020 [0.5] Intermediate Microeconomics I: Producers and Market Structure

c. Macroeconomics
- ECON 2101 [0.5] Intermediate Macroeconomics for Non-Mathematical Majors
- or ECON 2102 [0.5] Intermediate Macroeconomics I

d. Research Methodologies
- IPAF 2000 [0.5] Quantitative Approaches to Policy Analysis
- or ECON 2210 [0.5] Introductory Statistics for Economics

e. International Economic Policy
- ECON 3403 [0.5] Introduction to Public Economics: Expenditures
- ECON 3405 [0.5] Introduction to Public Economics: Taxation

Note: To meet the prerequisite requirements for ECON at the 2000 level or higher, or IPAF 2000 [0.5], students must have obtained a grade of C- or higher in ECON 1401 or MATH 1009 and a grade of C- or higher in FYSM 1003 or ECON 1000 or equivalent.

B. Credits Not Included in the Major CGPA (7.0 credits)
3. 7.0 credits in: 
- Free Electives

C. Additional Requirements
4. The Language requirement must be met.

Total Credits 15.0

Minor in Economics (4.0 credits)
Open to all undergraduate degree students not pursuing a Major in Economics or the B.G.In.S. Specialization or Stream in International Economic Policy.

Requirements:
1. 1.0 credit in:
- ECON 1001 [0.5] Introduction to Microeconomics
- & ECON 1002 [0.5] Introduction to Macroeconomics
- or FYSM 1003 [1.0] Introduction to Economics

2. 0.5 credit in:
- ECON 2001 [0.5] Intermediate Microeconomics for Non-Mathematical Majors
- or ECON 2009 [0.5] Managerial Economics
- or ECON 2020 [0.5] Intermediate Microeconomics I: Producers and Market Structure

3. 0.5 credit in:
- ECON 2101 [0.5] Intermediate Macroeconomics for Non-Mathematical Majors
- or ECON 2102 [0.5] Intermediate Macroeconomics I

4. 0.5 credit in:
- ECON at the 2000 level or higher,
- or IPAF 2000 [0.5]

5. 1.5 credits in ECON at the 2000 level or higher

6. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Minor in Industrial Economics (4.0 credits)
Open to all B.Eng. students and other undergraduate degree students not pursuing a Major in Economics who have successfully completed ECOR 3800 and SYSC 3200 while registered in a B.Eng. program.

Requirements:
1. 1.0 credit in:
- ECON 3508 [0.5] Introduction to Economic Development
- ECON 3509 [0.5] Development Planning and Project Evaluation
- ECON 3510 [0.5] African Economic Development
- ECON 3601 [0.5] Introduction to International Trade
- ECON 3602 [0.5] International Monetary Problems
- ECON 3603 [0.5] The Economics of Natural Resources
- ECON 3604 [0.5] Environmental Economics
- ECON 3607 [0.5] European Economic Integration
- ECON 3608 [0.5] The Economics of Transition
- ECON 3680 [0.5] Agricultural Economics
- ECON 3670 [0.5] Comparative Economic Systems

Note: To meet the prerequisite requirements for ECON 2009, ECON 2020, ECON 2102, and ECON 2210, students must have obtained a grade of C- or higher in ECON 1401 or MATH 1009 and a grade of C- or higher in FYSM 1003 or ECON 1000 or equivalent.
**Bachelor of Economics Regulations**

The regulations presented in this section apply to all Bachelor of Economics (B.Econ.) programs.

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

**First-Year Seminars**

B.Econ. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.Econ. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

**0000-Level Courses**

Students in B.Econ. programs may not count any 0000-level Mathematics courses for credit toward their degree. Such students may, however, be required to take one or more of these courses to replace missing program prerequisites in which case the courses will be set aside as “no credit for degree” (NCD).

**Access to Economics Courses**

To meet the prerequisite requirements for most 2000-level Economics courses, students must have obtained a grade of C- or higher in ECON 1401 and a grade of C- or higher in FYSM 1003 [1.0] or ECON 1000 [1.0] or, equivalently, an average grade of C- or higher in ECON 1001 and ECON 1002, one or both of which have been transferred from another university.

**Regulations**

**Post-Baccalaureate Diploma**

In addition to the requirements presented here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

**Definition**

A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:

- qualify a candidate for consideration for entry into a master's program, or
- bring a candidate who already possesses a bachelor's degree up to a level of a bachelor's degree of 20.0 credits or more in another discipline, or
- provide a candidate who already possesses a twenty-credit bachelor's degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas, or
- provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

**Program Requirements**

- A post-baccalaureate diploma is normally constituted of a minimum of 3.0 credits to a maximum of 5.0 credits of advanced undergraduate courses.
- A minimum of 3.0 residency credits counting toward the post-baccalaureate diploma.

**English as a Second Language Requirement**

In addition to the program requirements, completion of English as a Second Language (ESLA) courses may be required from the following sequence: ESLA 1300, ESLA 1500, ESLA 1900, ESLA 1905. No credits from this sequence will be counted toward the post-baccalaureate diploma.

---

### Post-Baccalaureate Diploma in Economics (4.0 credits)

**Admission to this program requires the permission of the Department of Economics.**

**Requirements:**

1. **3.0 credits in:**
   - ECON 4001 [0.5] Mathematical Analysis in Economics
   - ECON 4002 [0.5] Statistical Analysis in Economics
   - ECON 4020 [0.5] Advanced Microeconomic Theory
   - ECON 4021 [0.5] Advanced Macroeconomic Theory
   - ECON 4706 [0.5] Econometrics I
   - ECON 4990 [0.5] Research and Writing in Economics

2. **1.0 credit in electives approved by the Department,** normally in economics at the 4000 level but may include ESLA 1906 and/or ECON 3001.

**Total Credits** 4.0

---

### Bachelor of Economics Regulations

The regulations presented in this section apply to all Bachelor of Economics (B.Econ.) programs.

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).
Continuation

All post-baccalaureate diploma students are expected to complete their diploma requirements within two calendar years after the date of initial registration. After this period student may be withdrawn.

Graduation

• A candidate for a post-baccalaureate diploma must have an overall CGPA of at least 6.5 to graduate.
• A candidate for a post-baccalaureate diploma must obtain a grade of C- or higher in each course taken in fulfillment of the program requirements.
• Students should consult with the Department, School or Institute when planning their diploma and selecting courses.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy

Admission Requirements

Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation

To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.
Graduation with the Co-op Designation
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option
Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option
Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database.

Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

Bachelor of Economics Honours: Co-op Admission and Continuation Requirements
- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000 [0.0]

In addition to the following:
1. Registered as a full-time student in the second year of the Bachelor of Economics Honours program
2. A major CGPA of 8.00 or higher and an overall CGPA of 8.00 or higher;
3. Successfully completed all required first- and second-year courses before beginning the first work term.

To obtain the co-op designation in Bachelor of Economics, students must successfully complete three (3) work terms.

Work Term Report Course: ECON 3999

Work/Study Pattern:

Legend
S: Study
W: Work
O: Optional
* indicates recommended work study pattern
** student finds own employer for this work-term.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.
Degree
• Bachelor of Economics (B.Econ.) (Honours)

Admission Requirements
First Year
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais) as well as 4U Advanced Functions or MATH 0005. In addition, 4U Calculus and Vectors or MATH 0107 is strongly recommended. Equivalent courses may be substituted between the old and new Ontario mathematics curriculum. For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

Advanced Standing
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Co-op Option
Direct Admission to the First Year of the Co-op Option
Applicants must:
1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in a Bachelor of Economics Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Diploma
• Post-Baccalaureate Diploma in Economics
To be eligible for admission to the Post-Baccalaureate Diploma in Economics students must normally have:
1. an undergraduate degree with a GPA of 9.0 or higher, preferably with honours,
2. successfully completed university-level introductory (micro- and macro-) economics, calculus, and linear algebra with a grade of C+ or higher in each, and
3. permission of the Department of Economics.

Students may be granted advanced standing to a maximum of 1.0 credit. Advanced standing does not negate the 3.0 credit residency requirement.

Note: students who already hold an honours undergraduate degree in economics are encouraged to apply for admission to graduate programs in economics through the Graduate Admissions web site at graduate.carleton.ca.

Economics (ECON) Courses

ECON 1000 [1.0 credit]
Introduction to Economics
An introduction to the major tools and policy problems of economics. Economic analysis is applied to a variety of contemporary problems such as pollution, poverty, the control of monopoly, unemployment, inflation, and international economic problems.
Precludes additional credit for ECON 1001, ECON 1002, and FYSM 1003.
Lectures three hours a week, discussion groups one hour every two weeks.

ECON 1001 [0.5 credit]
Introduction to Microeconomics
An introduction to the major tools and policy problems of microeconomics. Economic analysis is applied to a variety of contemporary issues such as taxation, pollution, wage determination, poverty, market power, and international trade.
Precludes additional credit for ECON 1000 and FYSM 1003.
Lectures three hours a week, discussion groups one hour every two weeks.
ECON 1002 [0.5 credit]
Introduction to Macroeconomics
An introduction to the major tools and policy problems of macroeconomics. Economic analysis is applied to a variety of contemporary problems such as: saving, investment and interest rates; unemployment; money and inflation; exchange rates; fiscal and monetary policy. Precludes additional credit for ECON 1000 and FYSM 1003.
Lectures three hours a week, discussion groups one hour every two weeks.

ECON 1401 [0.5 credit]
Elementary Mathematics for Economics I
Precludes additional credit for BIT 1000, BIT 1001, BIT 1100, BIT 1101, BIT 1200, BIT 1201, MATH 1007, MATH 1009, MATH 1104, MATH 1107, MATH 1119, MATH 1052, MATH 1152.
Prerequisite(s): Ontario Grade-12 U Advanced Functions, or MATH 0005, or equivalent; and ECON 1001 or ECON 1000 or FYSM 1003, which may be taken concurrently with ECON 1401.
Lectures three hours a week, tutorials one hour a week.

ECON 1402 [0.5 credit]
Elementary Mathematics for Economics II
Calculus: including partial differentiation, definite and indefinite integrals, techniques of integration, and unconstrained optimization. Vectors and matrices: scalar multiplication, inner product, linear dependence, matrix operations, rank, invertible matrix theorem, and determinants. Economic applications such as profit maximization, comparative statics, and the Leontief input-output model. Also listed as MATH 1402.
Precludes additional credit for BIT 1000, BIT 1001, BIT 1100, BIT 1101, BIT 1200, BIT 1201, MATH 1007, MATH 1009, MATH 1104, MATH 1107, MATH 1119, MATH 1052, MATH 1152.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003 with a grade of C- or higher, and ECON 1401 or MATH 1401 with a grade of C- or higher.
Lectures three hours a week, tutorials one hour a week.

ECON 2001 [0.5 credit]
Intermediate Microeconomics for Non-Mathematical Majors
The main topics in microeconomic theory presented in a relatively non-technical manner (e.g., without the requiring knowledge of calculus) with illustrations of their applications. Not open to students in any Economics, B.Com., B.C.S., B.Eng., B.I.D., B.I.B., B.Math., or B.Sc. program.
Precludes additional credit for ECON 2002 (no longer offered), ECON 2003 (no longer offered), ECON 2009, ECON 2020, and ECON 2030.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003, or permission of the Department.
Lectures three hours a week.

ECON 2009 [0.5 credit]
Managerial Economics
An economic analysis of managerial decision-making. Elements of production and cost; price and output determination under perfectly and imperfectly competitive market structures; the role of information; topics in business strategy; and the impact of government intervention. Not open to students in any Economics program.
Precludes additional credit for ECON 2001, ECON 2002 (no longer offered), ECON 2003 (no longer offered), and ECON 2020.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003 with a grade of C- or higher; MATH 1009 (or equivalent) with a grade of C- or higher.
Lectures three hours a week, tutorials one and half hours a week.

ECON 2020 [0.5 credit]
Intermediate Microeconomics I: Producers and Market Structure
Theory of the firm: elements of production and cost; input allocation, pricing, and firm behaviour under perfectly and imperfectly competitive market structures; the role of information; game theory and public policy, including basic competition policy. Precludes additional credit for ECON 2001, ECON 2002 (no longer offered), ECON 2003 (no longer offered), and ECON 2009.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003 with a grade of C- or higher; ECON 1401/MATH 1401 with a grade of C- or higher and ECON 1402/MATH 1402, or equivalent department-approved MATH course pair. May be taken concurrently with ECON 1402/MATH 1402.
Lectures three hours a week, tutorials one and a half hours a week.
ECON 2030 [0.5 credit]
Intermediate Microeconomics II: Consumers and General Equilibrium
Theory of consumer choice and demand; applications to intertemporal choice, labour supply, and/or choice under uncertainty; welfare analysis; general equilibrium theory; externalities and the role of government.
Precludes additional credit for ECON 2001, ECON 2002 (no longer offered), and ECON 2003 (no longer offered).
Prerequisite(s): ECON 2020 with a grade of C- or higher or ECON 2009 with a grade of C+ or higher, and ECON 1402 (or equivalent) with a grade of C- or higher.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 2101 [0.5 credit]
Intermediate Macroeconomics for Non-Mathematical Majors
The main topics in macroeconomic theory presented in a relatively non-technical manner (e.g., without the requiring knowledge of calculus) with illustrations of their application. Not open to students in any Economics, B.Com., B.C.S., B.Eng., B.I.D., B.Math., or B.Sc. program.
Precludes additional credit for ECON 2102 and ECON 2103.
Prerequisite(s): ECON 1002 or ECON 1000 or FYSM 1003, or permission of the Department.
Lectures three hours a week.

ECON 2102 [0.5 credit]
Intermediate Macroeconomics I
An introduction to the macroeconomic modeling of output in the short and long run, and to fixed-price models of the closed and open economy over the business cycle. Policy prescriptions in relation to the business cycle are analysed.
Precludes additional credit for ECON 2101.
Prerequisite(s): ECON 1002 or ECON 1000 or FYSM 1003 with a grade of C- or higher; ECON 1401/MATH 1401 (with a grade of C- or higher) and ECON 1402/MATH 1402, or equivalent department-approved MATH course pair. May be taken concurrently with ECON 1402/MATH 1402.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 2103 [0.5 credit]
Intermediate Macroeconomics II
An extension of macroeconomic modeling to the dynamics of wage-price adjustment in the intermediate and long run, to the theoretical foundations of basic macroeconomic relationships, and to contemporary policy issues arising in relation to the business cycle and long-run growth.
Precludes additional credit for ECON 2101.
Prerequisite(s): ECON 2102 with a grade of C- or higher, ECON 1001 with a grade of C- or higher, and ECON 1402 (or equivalent) with a grade of C- or higher.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 2210 [0.5 credit]
Introductory Statistics for Economics
Basic statistical methods for the study of economics. Topics include descriptive statistics, elementary probability theory, sampling distributions, estimation and hypothesis testing for one and two population parameters.
Precludes additional credit for BIT 2000, BIT 2009, BIT 2100 (no longer offered), BIT 2300 (no longer offered), ECON 2200 (no longer offered), ECON 2201 (no longer offered), STAT 2507, STAT 2606, and STAT 3502.
Prerequisite(s): ECON 1401/MATH 1401 (with a grade of C- or higher) and ECON 1402/MATH 1402, or equivalent department-approved MATH course pair. May be taken concurrently with ECON 1402/MATH 1402.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 2220 [0.5 credit]
Introductory Econometrics
Topics include correlation, simple and multiple linear regression, and an introduction to statistical computing using an econometrics package. Emphasis on understanding appropriate methods and their properties, as distinct from their formal theoretical development. Empirical applications.
Precludes additional credit for ECON 2200 (no longer offered), ECON 2202 (no longer offered), STAT 2509, and STAT 2607.
Prerequisite(s): ECON 2210 (or equivalent) with a grade of C- or higher, and ECON 1402 (or equivalent) with a grade of C- or higher.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 2708 [0.5 credit]
Applied Data Analysis
An introduction to concepts and tools for using various forms of data to study applied economic problems. Topics may include identifying relevant datasets, collecting and cleaning both research-ready and user-assembled data sets, data visualization, and summary statistics.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 1005 with a grade of C- or higher; and ECON 1402 (or equivalent), with a grade of C- or higher; and ECON 2210 (or equivalent), with a grade of C+ or higher.
Lectures three hours a week, tutorial 1.5 hours a week.
ECON 3001 [0.5 credit]
Mathematical Methods of Economics
Constrained optimization via Lagrange and Kuhn-Tucker conditions; implicit functions and implicit differentiation; comparative static methods applied to models such as utility maximization and least-cost production; homogeneous functions; concave and convex functions; compounding and exponential functions; economic models involving integration; differential equations.
Precludes additional credit for ECON 2400 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003 with a grade of C- or higher; and ECON 1401 and ECON 1402 (or equivalent) with a grade of C- or higher in each and a combined grade point average in ECON 1401 and ECON 1402 of 6.50 or higher.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 3050 [0.5 credit]
Introduction to Financial Economics
The major theories and basic tools used to address modern financial economic issues. Topics may include time value of money, bond and stock valuation, investment criteria, capital budgeting, the risk-return tradeoff, options and option valuation, cost of capital, and the fundamentals of international corporate finance.
Precludes additional credit for BUSI 2503, BUSI 2504, ECON 2504 (no longer offered), BUSI 2505, and ECON 2505 (no longer offered).
Prerequisite(s): ECON 1001 and ECON 1002 each with a grade of C- or higher, or ECON 1000 or FYSM 1003 with a grade of C- or higher, ECON 1402 (or equivalent) with a grade of C- or higher, and BUSI 1002 or BUSI 1005 with a grade of C- or higher.
Lectures three hours a week.

ECON 3201 [0.5 credit]
Economic Thought and Policy in Canada
An account of the interrelationship between economic theories expounded in Canada and their issue in national policy.
Precludes additional credit for ECON 3404 (no longer offered).
Prerequisite(s): an introductory course in one of the social sciences or Canadian history.
Lectures three hours a week.

ECON 3220 [0.5 credit]
Canadian Economic History
A survey of Canadian economic history from the sixteenth century to the present.
Also listed as HIST 3220.
Precludes additional credit for ECON 2305 or HIST 2305 (no longer offered), ECON 3203 (no longer offered), ECON 3202 or HIST 3203 (no longer offered), and ECON 3207 or HIST 3204 (no longer offered).
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3230 [0.5 credit]
Selected Topics in Economic History
An examination of the economic development of North America or Europe or other possible selected sets of countries. Countries examined vary from year to year. Also listed as HIST 3230.
Precludes additional credit for ECON 3005 (no longer offered).
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003, or permission of the Department.
Lectures three hours a week.

ECON 3300 [0.5 credit]
Public Policy Toward Business
The interaction of government and business in the Canadian economy. Reasons for government involvement in selected public policy areas. Topics covered may include competition policy, regulation of firms by boards and commissions, environmental regulation, and public enterprise.
Prerequisite(s): ECON 1001 and ECON 1002.
Lectures three hours a week.
ECON 3370 [0.5 credit]
The Economics of Migration
An introduction to the economic aspects of migration. Topics include, among others: the economics of migration within countries; the economics of host country integration of immigrants; the impact of immigration on outcomes in the host country; the impacts of emigration on the home country.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3380 [0.5 credit]
The Economics of Gender and Ethnicity
The impact of gender and ethnicity on labour-market outcomes. Topics may include: employment, work, earnings, and poverty; discrimination and policy responses; immigration; the economics of the household; gender and development; micro-credit; labour standards.
Precludes additional credit for ECON 3100 (no longer offered) and ECON 3810 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3403 [0.5 credit]
Introduction to Public Economics: Expenditures
The role and nature of the government sector in the economy, the theory of public goods, the equity and efficiency effects of public expenditures, voting rules and fiscal policies, techniques of public expenditure analysis, and intergovernmental fiscal relations.
Precludes additional credit for ECON 3003 (no longer offered) and ECON 3408 (no longer offered). Credit will not be given if taken concurrently with or after ECON 4402 (no longer offered) or ECON 4403.
Prerequisite(s): ECON 1001 and ECON 1002 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3405 [0.5 credit]
Introduction to Public Economics: Taxation
The role and nature of the government sector in the economy, principles of taxation, tax equity, incidence and excess burden of taxes, structure of taxes in the economy, role of personal, corporate, sales and wealth taxes, fiscal stabilization policy, and the economics of public debt.
Precludes additional credit for ECON 3003 (no longer offered) and ECON 3407 (no longer offered). Credit will not be given if taken concurrently with or after ECON 4401 (no longer offered) or ECON 4404.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3420 [0.5 credit]
Economic Theories of Federalism
Economic dimensions of federalism, with reference to Canadian experience. Issues include: fiscal federalism; impact of federal economic policies on provincial economies; decentralization possibilities for fiscal and economic development policies; and consequences of policies such as provincial trade barriers and impediments to factor flows.
Precludes additional credit for ECON 3206 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3450 [0.5 credit]
Political Economy in the Modern State
An examination of the role of government in the economy, with emphasis on alternate forms of social coordination and the advantages and disadvantages of each form in the Canadian system.
Precludes additional credit for ECON 3305 (no longer offered).
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3460 [0.5 credit]
Introduction to Health Economics
Health as an economic good: demand and need; supply and cost. Public health and personal health care.
Alternative health-care delivery systems: financing, performance, quality, and cost effectiveness.
Preclusion: credit will not be given if taken concurrently with or after ECON 4460.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3508 [0.5 credit]
Introduction to Economic Development
A discussion of the principles of economic development. Application to the problems of the developing countries.
Precludes additional credit for ECON 3603 (no longer offered). Credit will not be given if taken concurrently with or after ECON 4507.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3509 [0.5 credit]
Development Planning and Project Evaluation
An introduction to the tools used in the planning and evaluation of development projects. Topics include the theory, application, strengths and limitations of cost-benefit analysis and competing approaches, and an examination of project evaluation techniques.
Precludes additional credit for ECON 3604 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.
ECON 3510 [0.5 credit]
African Economic Development
Domestic and international aspects of development problems and policies in the African context. Topics may include human resource development, growth and poverty reduction, domestic resource mobilization, the implications of ethnic diversity, governance, and institutions, and issues of trade, investment, aid, migration, and health.
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3600 [0.5 credit]
Introduction to International Economics
A discussion of theory and policy in international trade and finance. Intended for students planning to take only 0.5 credit in international economics at the 3000-level.
Precludes additional credit for ECON 3601 and ECON 3602. Credit will not be given if taken concurrently with or after ECON 4601 or ECON 4602.
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003, or permission of the Department.
Lectures three hours a week.

ECON 3601 [0.5 credit]
Introduction to International Trade
An extension of the basic principles of economics to international trade. Topics covered include the theory of international specialization, tariffs and other barriers to trade, trade liberalization and economic integration, international movements of labour and capital, trade and development.
Precludes additional credit for ECON 3600. Credit will not be given if taken concurrently with or after ECON 4601.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3602 [0.5 credit]
International Monetary Problems
A discussion of the theory and institutions of the international monetary system, and the related balance of payments problems of nation states.
Precludes additional credit for ECON 3600. Credit will not be given if taken concurrently with or after ECON 4602.
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3607 [0.5 credit]
Monetary and Financial Institutions
The behaviour of financial intermediaries and institutions such as the Bank of Canada, banks and trust companies, and regulatory bodies such as the Canada Deposit Insurance Corporation and the Superintendent of Financial Institutions.
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3706 [0.5 credit]
Applied Econometrics
Introduction to applied econometric methods with emphasis on the use of the regression model for empirical research. Real-world examples are used extensively to illustrate key concepts. Hands-on computer exercises are an integral part of the course.
Includes: Experiential Learning Activity
Precludes additional credit for ECON 4706.
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003, ECON 2201 (or equivalent) with a grade of C- or higher, and ECON 2202 (or equivalent) with a grade of C+ or higher.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 3801 [0.5 credit]
Regional Economics
Unequal distribution of economic activity between spatially defined regions. The pattern in Canada since World War II and the outlook for the future is evaluated, considering "natural" adjustment mechanisms and policy tools.
Precludes additional credit for ECON 3401 (no longer offered).
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3803 [0.5 credit]
The Economics of Natural Resources
The application of economic analysis to questions concerning natural-resource use, management and conservation, as well as market failures and environmental effects. Policy problems relating to natural resources are discussed.
Precludes additional credit for ECON 3805 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3804 [0.5 credit]
Environmental Economics
Microeconomic analysis of environmental issues. Frameworks for measuring environmental costs and benefits. The efficiency of alternative pollution control policies. Applications include air and water pollution and global environmental problems such as ozone depletion and global warming.
Precludes additional credit for ECON 3806 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.
ECON 3807 [0.5 credit]
European Economic Integration
A discussion of the theories of free trade areas and customs, monetary, and economic unions, and the related historical experience of Europe. Topics include: currency area and the euro, coordination of fiscal policy and the EU budget, common agricultural policy, labour mobility, and regional policy.
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3808 [0.5 credit]
The Economics of Transition
The transition from state ownership and central planning to mixed ownership structure with resource allocation by market mechanisms. "Classical socialism" is criticized and the processes of transition in countries of Central and Eastern Europe, the former Soviet Union, and Asia are compared.
Precludes additional credit for ECON 3700 (no longer offered), ECON 3701 (no longer offered), and ECON 3702 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3820 [0.5 credit]
Topics in Canadian Economic Policy
Economic analysis applied to selected policy areas, issues or institutions. One or more of the following topics may be dealt with: decision-making by bureaucratic institutions, policy problems arising from poverty, the economics of natural resources and pollution, urban economics.
Precludes additional credit for ECON 3800 (no longer offered).
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3840 [0.5 credit]
An Economic Analysis of Law
An introduction to the application of economic principles and methodology to a variety of legal problems with emphasis on the theory of property rights and the allocation of resources.
Precludes additional credit for ECON 3204 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3850 [0.5 credit]
Economics of Information and the Media
An introduction to the economics of information and the media, with a focus on the analysis of production and distribution of information, the application of theory to selected communications-media industries in Canada, and the analysis of existing Canadian policies.
Precludes additional credit for ECON 3200 (no longer offered). Credit will not be given if taken concurrently with or after ECON 4205 (no longer offered) or ECON 4850.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3856 [0.5 credit]
Housing Economics
Examination of housing markets, housing finance, and government housing policy using the tools of microeconomics. Models of demand, supply, and market equilibrium emphasizing the special characteristics of housing, including heterogeneity, durability, and spatial fixity. Relationships to other goods and markets and the wider macroeconomy.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3860 [0.5 credit]
Agricultural Economics
An examination of the agricultural industry in the national economy and in low-income societies, with emphasis on the working out of the basic forces that determine supply and demand for the industry, and the functional distribution of income among the factors of production.
Precludes additional credit for ECON 3406 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3864 [0.5 credit]
Transportation Economics
Factors affecting demand for and supply of transportation services; demand elasticities and cost structures of various modes of transport; transportation service pricing. Topics may include transport demand forecasting, transportation investment and project appraisal, and the role of transport in economic development.
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.
ECON 3870 [0.5 credit]
Comparative Economic Systems
Analysis of the structure, institutions, and performance of alternative economic systems, including capitalism, socialism, and communism. Selected countries are studied as examples of these systems.
Precludes additional credit for ECON 4806 (no longer offered) and ECON 4807 (no longer offered).
Prerequisite(s): ECON 1001 or ECON 1000 or FYSM 1003.
Lectures three hours a week.

ECON 3878 [0.5 credit]
Contemporary Economic Issues
Content may vary from year to year and is announced in advance of the registration period.
Lectures and/or seminars three hours a week.

ECON 3880 [0.5 credit]
Special Studies in Economics
Content may vary from year to year and is announced in advance of the registration period.
Precludes additional credit for ECON 3402 (no longer offered).
Prerequisite(s): ECON 1001 and ECON 1002, or ECON 1000 or FYSM 1003.
Lectures and/or seminars three hours a week.

ECON 3900 [0.5 credit]
Research Methods in Economics
The process of doing basic research in economics: development of the research proposal, finding and critically evaluating relevant literature, model development, methods for locating and collecting economic data, analytical methods, and writing mechanics. This course has a strong practical focus.
Includes: Experiential Learning Activity
Prerequisite(s): ECON 2030 with a grade of C+ or higher, ECON 2103 with a grade of C+ or higher, ECON 2210 (or equivalent) with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C+ or higher.
Seminars three hours a week.

ECON 3920 [0.5 credit]
Professional Practice of Economics
Development of skills used by professional economists, including writing professional documents such as policy briefs and memos, data visualization, communication of economic ideas in non-technical terms, presentation skills, and team-based problem solving.
Includes: Experiential Learning Activity
Prerequisite(s): ECON 2030 with a grade of C+ or higher, ECON 2103 with a grade of C+ or higher, ECON 2210 (or equivalent) with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C+ or higher.
Seminars three hours a week.

ECON 3999 [0.0 credit]
Co-operative Work Term
Graded Sat/Uns.
Includes: Experiential Learning Activity
Prerequisite(s): registration in the Honours Economics or Applied Economics Co-operative Education option, satisfactory completion of the Co-op preparation classes offered by the Co-operative Education Office, and permission of the Department.

ECON 4001 [0.5 credit]
Mathematical Analysis in Economics
Analysis and algebra: set theory, sequences and series, quadratic forms, separation and fixed-point theorems. Static optimization: the Weierstrass, Lagrange, and Kuhn-Tucker theorems; convexity and quasi-convexity; the envelope theorem. Dynamic optimization: the Maximum Principle and Bellman's equation. Applications of these tools to economic theory.
Prerequisite(s): ECON 3001 with a grade of C+ or higher. Lectures three hours a week, tutorials one and a half hours a week.

ECON 4002 [0.5 credit]
Statistical Analysis in Economics
Probability: including conditional probability, random variables and distributions, unconditional and conditional expectations. Distributions: including special distributions and their properties, and sampling distributions of estimators. Nonparametric methods and limit theorems; stochastic processes; simulation and bootstrap methods. Applications of these tools to economic theory.
Precludes additional credit for STAT 3500 (no longer offered), STAT 3508, and STAT 3558.
Prerequisite(s): ECON 2210 (or equivalent) with a grade of C+ or higher, and ECON 2220 (or equivalent) with a grade of C+ or higher.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 4004 [0.5 credit]
Operations Research I
Linear programming, duality, sensitivity analysis, transportation and network problems. Both theory and a wide range of applications are studied.
Precludes additional credit for BUSI 2300 (no longer offered), MATH 3801, and SYSC 3200.
Prerequisite(s): ECON 1402 (or equivalent) with a grade of C- or higher.
Lectures three hours a week.

ECON 4005 [0.5 credit]
Operations Research II
Dynamic programming, inventory models, queuing, simulation, and non-linear programming.
Prerequisite(s): ECON 1402 (or equivalent) with a grade of C- or higher, and ECON 2210 (or equivalent) or STAT 2605 or STAT 3502 with a grade of C- or higher.
Lectures three hours a week.
ECON 4020 [0.5 credit]
Advanced Microeconomic Theory
Advanced theory of individual economic behaviour in production, consumption, and general equilibrium. Elementary tools of mathematics are employed in the exposition of most topics. Precludes additional credit for ECON 4200 (no longer offered).
Prerequisite(s): ECON 2020 (or ECON 2009) and ECON 2030 each with a grade of C+ or higher; ECON 3001 (or MATH 2000 or MATH 2004) with a grade of C+ or higher; and ECON 2220 (or equivalent, or STAT 2605 or STAT 3502), which may be taken concurrently with ECON 4020.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 4021 [0.5 credit]
Advanced Macroeconomic Theory
An introduction to advanced macroeconomic models. Topics may include analysis of business cycles, inflation, unemployment, economic growth, fiscal and monetary policy, consumption decisions of households, and investment decisions of firms. Precludes additional credit for ECON 4201 (no longer offered).
Prerequisite(s): ECON 2102 with a grade of C+ or higher; ECON 2103 with a grade of C+ or higher; ECON 3001 (or MATH 2000 or MATH 2004) with a grade of C+ or higher; and ECON 2220 (or equivalent, or STAT 2605 or STAT 3502), which may be taken concurrently with ECON 4021.
Lectures three hours a week, tutorials one and a half hours a week.

ECON 4025 [0.5 credit]
Game Theory and Economics
Analysis of strategic behaviour using methods of modern game theory. Topics include analysis of business cycles, inflation, unemployment, economic growth, fiscal and monetary policy, consumption decisions of households, and investment decisions of firms. Precludes additional credit for ECON 4201 (no longer offered).
Prerequisite(s): ECON 2020 (or ECON 2009) and ECON 2030 each with a grade of C+ or higher; ECON 3001 (or MATH 2000 or MATH 2004) with a grade of C+ or higher; and ECON 2220 (or equivalent, or STAT 2605 or STAT 3502), which may be taken concurrently with ECON 4025.
Lectures three hours a week.

ECON 4026 [0.5 credit]
Macroeconomic Dynamics
Dynamic models as applied to topics such as economic growth, business cycles, consumption, investment, inflation, and real-financial linkages. Empirical and/or policy issues may also be discussed. Prerequisite(s): ECON 2102 with a grade of C+ or higher; ECON 2103 with a grade of C+ or higher; ECON 3001 (or MATH 2000 or MATH 2004) with a grade of C+ or higher; and ECON 2220 (or equivalent, or STAT 2605 or STAT 3502), which may be taken concurrently with ECON 4026.
Lectures three hours a week.

ECON 4030 [0.5 credit]
Economics of Uncertainty and Information
Uncertainty, imperfect information, and asymmetric information in the allocation of resources and the performance of markets and alternative coordinating mechanisms. Precludes additional credit for ECON 4006 (no longer offered) and ECON 4260 (no longer offered).
Prerequisite(s): ECON 2030 with a grade of C- or higher or ECON 2003 (no longer offered) with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.
Lectures three hours a week.

ECON 4051 [0.5 credit]
Financial Asset Pricing
Factors that drive security prices and models that attempt to account for aspects of security returns, including the generic arbitrage pricing model, the capital asset pricing model (CAPM), the consumption CAPM, and the intertemporal CAPM. Precludes additional credit for BUSI 3500, ECON 3500 (no longer offered), BUSI 3502, ECON 3502 (no longer offered).
Prerequisite(s): ECON 3050 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.
Lectures three hours a week.

ECON 4052 [0.5 credit]
Corporate Financial Economics
Optimization and corporate finance. Corporate governance and managerial compensation. Capital structure and the Modigliani-Miller theorem. Agency theory and asymmetric information. The issue of equity, debt, and other securities. Dividend policy. Investment and capital budgeting, NPV, and real options. Precludes additional credit for BUSI 3500 (or ECON 3500, no longer offered) and BUSI 3502 (or ECON 3502, no longer offered).
Prerequisite(s): ECON 3050 with a grade of C- or higher, and ECON 2030 with a grade of C- or higher or ECON 2003 (no longer offered) with a grade of C- or higher.
Lectures three hours a week.
ECON 4053 [0.5 credit]
Financial Market Modeling
The modeling of the evolution of prices in (near) efficient markets and the evaluation of functions of these prices such as guarantees, options, warrants, futures, and other types of derivatives. Arrow-Debreu state-contingent claims. Notions of complete and incomplete markets. Precludes additional credit for ECON 4100 (no longer offered) and ECON 4504 (no longer offered). Prerequisite(s): ECON 2030 with a grade of C- or higher and ECON 3001 with a grade of C- or higher. Lectures three hours a week.

ECON 4056 [0.5 credit]
Insurance Economics
The theory of insurance founded on probability and decision theory. The optimal design of insurance policies from a risk-sharing and an information economics perspective. Principal-agent problems including adverse selection, asymmetric information, and moral hazard with implications for insurance. The interaction between insurance and other markets. Prerequisite(s): ECON 2030 with a grade of C- or higher and ECON 2220 (or equivalent) with a grade of C- or higher. Lectures three hours a week.

ECON 4057 [0.5 credit]
Behavioural Financial Economics
Market efficiency and the limits of arbitrage. Heuristics and biases identified by behavioural decision theorists and their effect on the behaviour of managers and investors. Behavioural theories of market trading volume and asset prices. Behavioural approaches to corporate financial economics problems. Prerequisite(s): ECON 2030 with a grade of C- or higher or ECON 2003 (no longer offered) with a grade of C- or higher, and ECON 3050 with a grade of C- or higher. Lectures three hours a week.

ECON 4108 [0.5 credit]
Behavioural Economics
Major factors underlying economic behaviour, including various views of the role of rationality in economic analyses of individual decision-making and institutional design and a detailed treatment of behavioural heuristics and biases and their implications for nudging techniques that aim to improve economic outcomes. Prerequisite(s): ECON 2030 with a grade of C- or higher. Lectures three hours a week.

ECON 4109 [0.5 credit]
Experimental Economics
An introduction to the use of and insights gained from both laboratory- and field-type experimental methods in economic research. Topics include analysis of individual rationality, performance of markets, and design of economic systems. In-class experiments are an integral part of the course. Prerequisite(s): ECON 2030 with a grade of C- or higher and ECON 2220 with a grade of C- or higher. Lectures three hours a week.

ECON 4209 [0.5 credit]
Selected Topics in the History of Economic Thought
The development of economic thought through time in relation to selected economic problems. Precludes additional credit for ECON 4105 (no longer offered). Prerequisite(s): ECON 2030 with a grade of C+ or higher or ECON 2003 (no longer offered) with a grade of C+ or higher, and ECON 2103 with a grade of C+ or higher. Also offered at the graduate level, with different requirements, as ECON 5209, for which additional credit is precluded. Lectures and/or seminars three hours a week.

ECON 4230 [0.5 credit]
Economic History
The application of economic theory and quantitative techniques to selected topics in economic history, which may include historical patterns of growth and welfare, nineteenth-century globalization, technological change, the development of agriculture, industrialization, the Great Depression, and the origins of central banks. Prerequisite(s): ECON 2030 with a grade of C- or higher, ECON 2103 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher. Also offered at the graduate level, with different requirements, as ECON 5230, for which additional credit is precluded. Lectures three hours a week.

ECON 4301 [0.5 credit]
Market Structure and Firm Behaviour
Various theoretical and empirical studies of firm and market organization with emphasis on the pricing, advertising, investment and locational behaviour of firms in imperfectly competitive markets. Prerequisite(s): ECON 2030 with a grade of C- or higher or ECON 2003 (no longer offered) with a grade of C- or higher. Lectures three hours a week.

ECON 4302 [0.5 credit]
Competition and Regulatory Policy
Public policies relating to competition and regulation. Topics may include: Ramsey pricing, peak-load pricing, cross-subsidization, access pricing (ECPR), multi-part pricing and price discrimination, predatory and targeted pricing, vertical restrictions, traditional regulation (including rate-of-return regulation), incentive regulation (including price caps), and the political economy of regulation. Precludes additional credit for ECON 4300 (no longer offered). Prerequisite(s): ECON 2030 with a grade of C- or higher or ECON 2003 (no longer offered) with a grade of C- or higher. Lectures three hours a week.
ECON 4309 [0.5 credit]
Applied Industrial Economics
The empirical application of microeconomics, with special emphasis on the Canadian economy. Topics include: consumer demand, firm production and investment, and industrial and trade structure.
Prerequisite(s): ECON 2030 with a grade of C- or higher and ECON 2220 (or equivalent, or STAT 2605 or STAT 3502) with a grade of C- or higher.
Lectures three hours a week.

ECON 4360 [0.5 credit]
Labour Economics
The application of price theory to the labour market. Topics include models of labour supply and labour demand, human capital and the economics of education, and unions and their impact on the labour market.
Precludes additional credit for ECON 4305 (no longer offered) and ECON 4306 (no longer offered).
Prerequisite(s): ECON 2030 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.
Lectures three hours a week.

ECON 4365 [0.5 credit]
Industrial Relations
Economic analysis of selected industrial relations and labour market policy problems. Topics include unionization, strike activity, the economics of occupational health and safety, pension policy, and the impact of new technology on the labour market.
Precludes additional credit for ECON 4605 (no longer offered).
Prerequisite(s): ECON 2030 with a grade of C- or higher, or ECON 2003 (no longer offered) with a grade of C- or higher.
Lectures three hours a week.

ECON 4403 [0.5 credit]
Public Economics: Expenditures
A discussion of the theory of government expenditures and an examination of empirical attempts to quantify the theory. Examination of current topics such as expenditures and grants in the Canadian federation.
Precludes additional credit for ECON 4402 (no longer offered).
Prerequisite(s): ECON 2030 with a grade of C- or higher, or ECON 2003 (no longer offered) with a grade of C- or higher.
Lectures three hours a week.

ECON 4404 [0.5 credit]
Public Economics: Taxation
A discussion of the theory of taxation and an examination of empirical attempts to quantify the theory. Some topics of current interest, such as the redistribution of income in Canada and tax reform, are examined.
Precludes additional credit for ECON 4401 (no longer offered).
Prerequisite(s): ECON 2030 with a grade of C- or higher, or ECON 2003 (no longer offered) with a grade of C- or higher.
Lectures three hours a week.

ECON 4407 [0.5 credit]
Project Evaluation
Techniques and problems in the evaluation of public and private projects. Examination of alternative approaches to public decision-making including cost-benefit analysis, cost-effectiveness analysis, and multiple-objective frameworks. Case studies of projects in various areas such as natural resources, the environment, human resources, public services, and transportation.
Prerequisite(s): ECON 2030 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.
Lectures three hours a week.

ECON 4460 [0.5 credit]
Health Economics
Economic analysis of the organization, financing, and utilization of health-care services. Topics include supply and demand of health care, the impact of private and social health insurance on demand, and policy issues in the provision of health care in Canada.
Prerequisite(s): ECON 2030 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.
Lectures three hours a week.

ECON 4507 [0.5 credit]
The Economics of Development
An examination of some theoretical approaches to the economics of development, together with analysis of some economic policy issues of a largely internal character, such as intersectoral investment allocation, income distribution, unemployment, and investment in human development.
Prerequisite(s): ECON 2030 with a grade of C- or higher, or ECON 2003 (no longer offered) with a grade of C- or higher, and ECON 2103 with a grade of C- or higher.
Lectures three hours a week.
ECON 4601 [0.5 credit]  
International Trade Theory and Policy  
International trade theory and its implications for economic policy. Topics such as determinants of trade and specialization, gains from trade and commercial policy, international factor mobility, growth and development.  
Prerequisite(s): ECON 2030 with a grade of C- or higher or ECON 2003 (no longer offered) with a grade of C- or higher.  
Lectures three hours a week.

ECON 4602 [0.5 credit]  
International Monetary Theory and Policy  
International monetary theory and its implications for economic policy. Topics such as sources of disequilibrium and adjustment in the balance of payments under fixed versus flexible exchange rates, international capital movements, and international monetary reform.  
Prerequisite(s): ECON 2103 with a grade of C- or higher.  
Lectures three hours a week.

ECON 4670 [0.5 credit]  
Monetary Theory and Policy  
The role of money and the monetary system in determining income, employment, and price level; techniques of monetary policy; the relationship between monetary and fiscal policy.  
Precludes additional credit for ECON 4607 (no longer offered) and ECON 4608 (no longer offered).  
Prerequisite(s): ECON 2103 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.  
Lectures three hours a week.

ECON 4700 [0.5 credit]  
Measurement Economics  
National accounting and index numbers. Topics may include: the measurement of output and income, capital and depreciation, productivity, employment and unemployment, poverty and inequality, household production, pollution and resource depletion, and the balance of payments; price indexes; standard-of-living indexes; and international comparisons.  
Prerequisite(s): ECON 2030 with a grade of C- or higher, ECON 2103 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.  
Lectures three hours a week.

ECON 4706 [0.5 credit]  
Econometrics I  
An introduction to econometric theory and analysis of the classical normal linear regression model. Topics include estimation methods, hypothesis testing, multicollinearity, indicator variables, heteroscedasticity, and an introduction to time-series methods.  
Precludes additional credit for ECON 3706.  
Prerequisite(s): ECON 2210 (or equivalent) with a grade of C+ or higher, and ECON 2220 (or equivalent) with a grade of C+ or higher.  
Lectures three hours a week, tutorials one and a half hours a week.

ECON 4707 [0.5 credit]  
Econometrics II  
An extension of ECON 4706. Topics include model specification, diagnostic checks, qualitative and limited dependent variables, panel data, and simultaneous equations models.  
Prerequisite(s): ECON 4706 with a grade of C+ or higher, or STAT 3503 with a grade of C+ or higher.  
Lectures three hours a week.

ECON 4708 [0.5 credit]  
Economic Data Science - Analytics  
An introduction to methods of statistical and machine learning analytics for economic analysis. Tools relevant for both small and large data sets will be covered. Topics may include approaches to classification, dimension reduction strategies, and prediction models and tools.  
Includes: Experiential Learning Activity  
Prerequisite(s): ECON 2708 with a grade of C+ or higher; and ECON 4706 (or equivalent) with a grade of C+ or higher.  
Lectures three hours a week.

ECON 4709 [0.5 credit]  
Economic Data Science - Applications  
Application of data science and machine learning methods to real-world economic problems. Students will apply their data science knowledge in hands-on projects to answer topical research questions. This course has a strong practical focus.  
Includes: Experiential Learning Activity  
Prerequisite(s): ECON 4708 with a grade of C+ or higher.  
Lectures three hours a week.

ECON 4713 [0.5 credit]  
Time-Series Econometrics  
An introduction to the basic concepts and tools of time-series econometrics. Topics include stationary and non-stationary time series, identification, estimation and forecasting, unit root testing, cointegration analysis, error-correction models and ARCH models, together with relevant economic applications.  
Precludes additional credit for ECON 4803 (no longer offered) and STAT 4603.  
Prerequisite(s): ECON 4706 with a grade of C- or higher, or STAT 3503 with a grade of C- or higher.  
Lectures three hours a week.

ECON 4714 [0.5 credit]  
Advanced Topics in Applied Econometrics  
Advanced coverage of one or more areas of current interest in applied econometrics. An empirical research project may be required.  
Includes: Experiential Learning Activity  
Precludes additional credit for ECON 4804 (no longer offered).  
Prerequisite(s): ECON 4706 with a grade of C+ or higher; and ECON 4707, which may be taken concurrently with ECON 4714.  
Lectures three hours a week.
ECON 4800 [0.5 credit]
Spatial Economics
Spatial dimensions of economic activity and organization. Theories of urban agglomeration effects, transport costs, forward and backward linkages, and associated spatial dynamics; empirical analysis of spatial economic clusters; effects of globalization and economic growth on the spatial structure of production and the associated policy response.
Prerequisite(s): ECON 2030 with a grade of C- or higher, ECON 2103 with a grade of C- or higher, and ECON 2220 (or equivalent) with a grade of C- or higher.
Lectures three hours a week.

ECON 4850 [0.5 credit]
Advanced Economics of Information and Media
The economics of information production, its distribution through broadcasting, publishing or the Internet, its exchange through telephone and e-mail networks, and its use in private and public organizations. An analysis of telecommunications, broadcasting, copyright, privacy, and Internet policy.
Precludes additional credit for ECON 4205 (no longer offered).
Prerequisite(s): ECON 2030 with a grade of C- or higher or ECON 2003 (no longer offered) with a grade of C- or higher.
Lectures three hours a week.

ECON 4880 [0.5 credit]
Special Topics in Economics
Selected advanced topics of interest to upper-year Honours Economics and Applied Economics students. Topics may vary from year to year and are announced in advance of the registration period.
Includes: Experiential Learning Activity
Prerequisite(s): ECON 2030 with a grade of C+ or higher or ECON 2003 (no longer offered) with a grade of C+ or higher; and ECON 3706 or ECON 4706, which may be taken concurrently with ECON 4880 or may be waived by permission of the Department.
Lectures and/or seminars three hours a week.

ECON 4903 [0.5 credit]
Tutorial in Economics
An additional tutorial in economics may be taken subsequent to, or concurrently with, ECON 4890 (no longer offered) or ECON 4901 (no longer offered) or ECON 4902 (no longer offered) or ECON 4905.
Prerequisite(s): permission of the Department.

ECON 4904 [0.5 credit]
Tutorial in Economics
An additional tutorial in economics may be taken subsequent to, or concurrently with, ECON 4890 (no longer offered) or ECON 4901 (no longer offered) or ECON 4902 (no longer offered) or ECON 4905.
Prerequisite(s): permission of the Department.

ECON 4905 [0.5 credit]
Honours Capstone Seminar
The development of individual research projects in suitable economics topic areas with the exchange of results at each stage through in-class discussions and written and oral reports and culminating in a major research paper by each course registrant.
Includes: Experiential Learning Activity
Precludes additional credit for ECON 4890, ECON 4900 (no longer offered), ECON 4901, and ECON 4902.
Prerequisite(s): ECON 3900 with a grade of C+ or higher, ECON 3920 with a grade of C+ or higher, and registration in an Honours Economics program.
Seminars three hours a week.

ECON 4908 [1.0 credit]
Honours Essay
Students taking Honours in Economics or Applied Economics may write an Honours essay during their final year. This essay counts for one credit. Students work under an individual faculty adviser.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the Department.

ECON 4990 [0.5 credit]
Research and Writing in Economics
Development of fundamental research and writing skills pertinent to the discipline of economics. Writing summary reviews of economics texts of increasing sophistication; writing up empirical and/or theoretical results of increasing complexity.
Prerequisite(s): registration in the Post-Baccalaureate Diploma in Economics program and/or permission of the Department.
Seminars three hours a week, tutorials one and a half hours a week.

Engineering
This section presents the requirements for programs in:

- Aerospace Engineering - Bachelor of Engineering
  Stream A: Aerodynamics, Propulsion and Vehicle Performance
- Aerospace Engineering - Bachelor of Engineering
  Stream B: Aerospace Structures, Systems and Vehicle Design
- Aerospace Engineering - Bachelor of Engineering
  Stream C: Aerospace Electronics and Systems
- Aerospace Engineering - Bachelor of Engineering
  Stream D: Space Systems Design
- Architectural Conservation and Sustainability Engineering - Bachelor of Engineering
- Architectural Conservation and Sustainability Engineering - Bachelor of Engineering Stream A: Structural
- Architectural Conservation and Sustainability Engineering - Bachelor of Engineering Stream B: Environmental
- Biomedical and Electrical Engineering Bachelor of Engineering
• Biomedical and Mechanical Engineering Bachelor of Engineering
• Civil Engineering Bachelor of Engineering
• Communications Engineering Bachelor of Engineering
• Computer Systems Engineering Bachelor of Engineering
• Electrical Engineering Bachelor of Engineering
• Engineering Physics Bachelor of Engineering
• Environmental Engineering Bachelor of Engineering
• Mechanical Engineering Bachelor of Engineering
• Software Engineering Bachelor of Engineering
• Sustainable and Renewable Energy Stream A: Smart Technologies for Power Generation and Distribution Bachelor of Engineering
• Sustainable and Renewable Energy Stream B: Efficient Energy Generation and Conversion Bachelor of Engineering

Program Requirements
Course Categories for Engineering Programs
The following categories of courses are used in defining the programs.

Basic Science Electives
Courses in this classification must be chosen from among those listed as acceptable for the current academic year. The list is published annually on the engineering academic support website: carleton.ca/engineering/uas. The list will change from year to year and only courses on the list valid in the year the course is taken, or courses for which formal approval of the Faculty has been obtained can be used as credit toward an engineering degree. Courses not on the list may be used to fulfill a Basic Science elective requirement with the permission of the Faculty of Engineering and Design and provided all other specified course requirements are met. Note that access to courses on the list is not guaranteed and may depend on space availability and the satisfaction of other requirements including, for example, course prerequisites.

Complementary Studies Electives
Courses in this classification must be chosen from among those listed as acceptable for the current academic year. The list is published annually on the engineering academic support website: carleton.ca/engineering/uas. Registration in CUOL or online course sections is not acceptable. Note that access to courses on the list is not guaranteed and may depend on space availability and the satisfaction of other requirements including, for example, course prerequisites.

Communications Electives for Communications Engineering

Computer Science Electives for Software Engineering
The list of computer science (COMP) electives for software engineering degree is published annually on the engineering academic support website: carleton.ca/engineering/uas. The list will change from year to year and only courses on the list valid in the year the course is taken, or courses for which formal approval of the Faculty has been obtained, can be used as credit toward the Software Engineering degree.

Aerospace Engineering Bachelor of Engineering
Students in Aerospace Engineering must satisfy the requirements for one of the following streams:

Aerospace Engineering - Bachelor of Engineering Stream A: Aerodynamics, Propulsion and Vehicle Performance (21.0 credits)

First Year
1. a) 4.0 credits in: 4.0
   CHEM 1101 0.5 Chemistry for Engineering Students
   ECOR 1041 0.25 Computation and Programming
   ECOR 1042 0.25 Data Management
   ECOR 1043 0.25 Circuits
   ECOR 1044 0.25 Mechatronics
   ECOR 1045 0.25 Statics
   ECOR 1046 0.25 Mechanics
   ECOR 1047 0.25 Visual Communication
   ECOR 1048 0.25 Dynamics
   MATH 1004 0.5 Calculus for Engineering or Physics
   MATH 1104 0.5 Linear Algebra for Engineering or Science
   PHYS 1004 0.5 Introductory Electromagnetism and Wave Motion
   b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:
   ECOR 1055 0.0 Introduction to Engineering Disciplines I
   ECOR 1056 0.0 Introduction to Engineering Disciplines II
   ECOR 1057 0.0 Engineering Profession
2. 0.5 credit in Complementary Studies Electives 0.5
3. 0.5 credit in Basic Science Electives 0.5

Second Year
4. a) 5.0 credits in: 5.0
   AERO 2001 0.5 Aerospace Engineering Graphical Design
### Design (21.0 credits)

**Stream B: Aerospace Structures, Systems and Vehicle Design**

**Aerospace Engineering - Bachelor of Engineering**

<table>

Aerospace Engineering - Bachelor of Engineering

Stream C: Aerospace Electronics and Systems (21.0 credits)

First year

1. a) 4.0 credits in:  
   - CHEM 1101 [0.5] Chemistry for Engineering Students
   - ECOR 1041 [0.25] Computation and Programming
   - ECOR 1042 [0.25] Data Management
   - ECOR 1043 [0.25] Circuits
   - ECOR 1044 [0.25] Mechatronics
   - ECOR 1045 [0.25] Statics
   - ECOR 1046 [0.25] Mechanics
   - ECOR 1047 [0.25] Visual Communication
   - ECOR 1048 [0.25] Dynamics
   - MATH 1004 [0.5] Calculus for Engineering or Physics
   - MATH 1104 [0.5] Linear Algebra for Engineering or Science
   - PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion

   b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:
   - ECOR 1055 [0.0] Introduction to Engineering Disciplines I
   - ECOR 1056 [0.0] Introduction to Engineering Disciplines II
   - ECOR 1057 [0.0] Engineering Profession

2. 0.5 credit in Complementary Studies Electives 0.5

3. 0.5 credit in Basic Science Elective 0.5

Second year

4. a) 5.0 credits in:  
   - AERO 2001 [0.5] Aerospace Engineering Graphical Design
   - ECOR 2050 [0.5] Design and Analysis of Engineering Experiments
   - ELEC 2501 [0.5] Circuits and Signals
   - ELEC 2507 [0.5] Electronics I
   - ELEC 2607 [0.5] Switching Circuits
   - MAAE 2101 [0.5] Engineering Dynamics
   - MAAE 2202 [0.5] Mechanics of Solids I
   - MAAE 2700 [0.5] Engineering Materials
   - MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
   - MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics

   b) Successful completion of
   - ECOR 2995 [0.0] Engineering Portfolio

Third year

5. 5.5 credits in:  
   - AERO 3002 [0.5] Aerospace Design and Practice
   - CCDP 2100 [0.5] Communication Skills for Engineering Students
   - ECOR 3800 [0.5] Engineering Economics

Fourth year

6. 3.5 credits in:  
   - AERO 4003 [0.5] Aerospace Systems Design
   - ECOR 4995 [0.5] Professional Practice
   - ELEC 4504 [0.5] Avionics Systems
   - MAAE 2400 [0.5] Thermodynamics and Heat Transfer
   - MAAE 4907 [1.0] Engineering Design Project
   - SYSC 3501 [0.5] Communication Theory

7. 1.5 credits from:  
   4000-level AERO, MAAE or MECH, or
   - AERO 3240 [0.5] Orbital Mechanics
   - AERO 3841 [0.5] Spacecraft Design I
   - ELEC 4502 [0.5] Microwave Circuits
   - ELEC 4503 [0.5] Radio Frequency Lines and Antennas
   - ELEC 4505 [0.5] Telecommunication Circuits
   - ELEC 4506 [0.5] Computer-Aided Design of Circuits and Systems
   - ELEC 4509 [0.5] Communication Links
   - ELEC 4600 [0.5] Radar and Navigation
   - ELEC 4602 [0.5] Electrical Power Systems
   - ELEC 4609 [0.5] Integrated Circuit Design and Fabrication
   - ELEC 4703 [0.5] Solar Cells
   - ELEC 4706 [0.5] High-Speed Electronics: Circuits and Systems
   - ELEC 4707 [0.5] Analog Integrated Electronics
   - ELEC 4708 [0.5] Advanced Digital Integrated Circuit Design
   - ELEC 4709 [0.5] Integrated Sensors
   - SYSC 4205 [0.5] Image Processing for Medical Applications
   - SYSC 4600 [0.5] Digital Communications
   - SYSC 4607 [0.5] Wireless Communications

8. 0.5 credit in Complementary Studies Electives 0.5

Total Credits 21.0

Aerospace Engineering - Bachelor of Engineering

Stream D: Space Systems Design (21.0 credits)

First year

1. a) 4.0 credits in:  
   - CHEM 1101 [0.5] Chemistry for Engineering Students
   - ECOR 1041 [0.25] Computation and Programming
   - ECOR 1042 [0.25] Data Management
   - ECOR 1043 [0.25] Circuits
   - ECOR 1044 [0.25] Mechatronics
   - ECOR 1047 [0.25] Engineering Portfolio

Third year

5. 5.5 credits in:  
   - AERO 3002 [0.5] Aerospace Design and Practice
   - CCDP 2100 [0.5] Communication Skills for Engineering Students
   - ECOR 3800 [0.5] Engineering Economics

Fourth year

6. 3.5 credits in:  
   - AERO 4003 [0.5] Aerospace Systems Design
   - ECOR 4995 [0.5] Professional Practice
   - ELEC 4504 [0.5] Avionics Systems
   - MAAE 2400 [0.5] Thermodynamics and Heat Transfer
   - MAAE 4907 [1.0] Engineering Design Project
   - SYSC 3501 [0.5] Communication Theory

7. 1.5 credits from:  
   4000-level AERO, MAAE or MECH, or
   - AERO 3240 [0.5] Orbital Mechanics
   - AERO 3841 [0.5] Spacecraft Design I
   - ELEC 4502 [0.5] Microwave Circuits
   - ELEC 4503 [0.5] Radio Frequency Lines and Antennas
   - ELEC 4505 [0.5] Telecommunication Circuits
   - ELEC 4506 [0.5] Computer-Aided Design of Circuits and Systems
   - ELEC 4509 [0.5] Communication Links
   - ELEC 4600 [0.5] Radar and Navigation
   - ELEC 4602 [0.5] Electrical Power Systems
   - ELEC 4609 [0.5] Integrated Circuit Design and Fabrication
   - ELEC 4703 [0.5] Solar Cells
   - ELEC 4706 [0.5] High-Speed Electronics: Circuits and Systems

Total Credits 21.0
UNOFFICIAL 2021-22 Undergraduate Calendar
CIVE 3202 [0.5]  Mechanics of Solids II  
CIVE 3203 [0.5]  Introduction to Structural Analysis  
CIVE 3204 [0.5]  Introduction to Structural Design  
CIVE 3205 [0.5]  Design of Structural Steel Components  
CIVE 3206 [0.5]  Design of Reinforced Concrete Components  
CIVE 3207 [0.5]  Historic Site Recording and Assessment  
CIVE 3209 [0.5]  Building Science  
CIVE 4202 [0.5]  Wood Engineering  
ECOR 3800 [0.5]  Engineering Economics  

Fourth year  
5.  4.0 credits in:  
ARCH 4200 [0.5]  Architectural Conservation Philosophy and Ethics  
CIVE 4601 [0.5]  Building Pathology and Rehabilitation  
CIVE 4918 [1.0]  Design Project  
ECOR 4995 [0.5]  Professional Practice  
ENVE 4105 [0.5]  Green Building Design  
ENVE 4106 [0.5]  Indoor Environmental Quality  
ENVE 4107 [0.5]  Building Services Engineering  

6.  1.5 credits from:  
CIVE 3208 [0.5]  Geotechnical Mechanics  
CIVE 4200 [0.5]  Matrix Analysis of Framed Structures  
CIVE 4201 [0.5]  Finite Element Methods in Civil Engineering  
CIVE 4302 [0.5]  Reinforced and Prestressed Concrete Design  
CIVE 4303 [0.5]  Urban Planning  
CIVE 4307 [0.5]  Municipal Hydraulics  
CIVE 4308 [0.5]  Behaviour and Design of Steel Structures  
CIVE 4400 [0.5]  Construction/Project Management  
CIVE 4403 [0.5]  Masonry Design  
CIVE 4407 [0.5]  Municipal Engineering  
CIVE 4500 [0.5]  Computer Methods in Civil Engineering  
CIVE 4614 [0.5]  Building Fire Safety  
CIVE 4907 [1.0]  Engineering Research Project  
CIVE 4917 [0.5]  Undergraduate Directed Study  
ENVE 3003 [0.5]  Water Resources Engineering  
ENVE 4003 [0.5]  Air Pollution and Emissions Control  
ENVE 4200 [0.5]  Climate Change and Engineering  
MECH 4407 [0.5]  Heating and Air Conditioning  
SREE 4002 [0.5]  The Energy Economy, Reliability and Risk  

Total Credits 21.5  

Note: Students admitted starting from fall 2019 are not eligible to select either the Structural or Environmental stream of the program.

Architectural Conservation and Sustainability Engineering Bachelor of Engineering  
Architectural Conservation and Sustainability Engineering students with an admission and catalog term prior fall 2019 must satisfy the requirements for one of the following streams:

Architectural Conservation and Sustainability Engineering - Bachelor of Engineering  
Stream A: Structural (22.0 credits)  

First year  
1.  5.5 credits in:  
ARCH 1000 [0.5]  Introduction to Architecture  
CHEM 1001 [0.5]  General Chemistry I  
CHEM 1002 [0.5]  General Chemistry II  
ECOR 1010 [0.5]  Introduction to Engineering  
ECOR 1101 [0.5]  Mechanics I  
ECOR 1606 [0.5]  Problem Solving and Computers  
ENVE 1001 [0.5]  Architecture and the Environment  
MATH 1004 [0.5]  Calculus for Engineering or Physics  
MATH 1005 [0.5]  Differential Equations and Infinite Series for Engineering or Physics  
MATH 1104 [0.5]  Linear Algebra for Engineering or Science  
PHYS 1004 [0.5]  Introductory Electromagnetism and Wave Motion  

Second year  
2.  5.5 credits in:  
ARCC 2202 [0.5]  Architectural Technology 1  
CCDP 2100 [0.5]  Communication Skills for Engineering Students  
CDNS 2400 [0.5]  Heritage Conservation in Canada  
CIVE 2004 [0.5]  GIS, Surveying, CAD and BIM  
CIVE 2200 [0.5]  Mechanics of Solids I  
CIVE 2700 [0.5]  Civil Engineering Materials  
ECOR 2606 [0.5]  Numerical Methods  
ENVE 2001 [0.5]  Process Analysis for Environmental Engineering  
MAAE 2300 [0.5]  Fluid Mechanics I  
MAAE 2400 [0.5]  Thermodynamics and Heat Transfer  
MATH 2004 [0.5]  Multivariable Calculus for Engineering or Physics  

Third year  
3.  5.5 credits in:  
ARCC 2203 [0.5]  Architectural Technology 3  
ARCC 3202 [0.5]  Architectural Technology 4  
CIVE 3202 [0.5]  Mechanics of Solids II  
CIVE 3203 [0.5]  Introduction to Structural Analysis  
CIVE 3204 [0.5]  Introduction to Structural Design  
CIVE 3205 [0.5]  Design of Structural Steel Components  
CIVE 3206 [0.5]  Design of Reinforced Concrete Components  
CIVE 3207 [0.5]  Historic Site Recording and Assessment  
CIVE 3209 [0.5]  Building Science  
ECOR 2050 [0.5]  Design and Analysis of Engineering Experiments  
ECOR 3800 [0.5]  Engineering Economics  

Fourth year  
4.  4.0 credits in:  

366  The Academic Year (Graduate and Undergraduate Studies)
### Arch 4200 [0.5]
Architectural Conservation Philosophy and Ethics

### CIVE 4202 [0.5]
Wood Engineering

### CIVE 4601 [0.5]
Building Pathology and Rehabilitation

### CIVE 4918 [1.0]
Design Project

### ECOR 4995 [0.5]
Professional Practice

### ENVE 4105 [0.5]
Green Building Design

### ENVE 4106 [0.5]
Indoor Environmental Quality

(See Note 2, below)

#### Total Credits

22.0

### Notes:

1. For Item 1 and students transferring into Architectural Conservation and Sustainability Engineering (Structural or Environmental Stream), students in good standing who have successfully completed CHEM 1101 while registered in another engineering program may replace CHEM 1001 and CHEM 1002 with CHEM 1101 plus one 0.5 credit course from the Basic Science Electives list.

2. For Item 5 in the Structural Stream, CIVE 4907 may replace 1.0 credit.

---

### Biomedical and Electrical Engineering Bachelor of Engineering (21.0 credits)

#### First year

1. **4.5 credits in:**
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - ECOR 1041 [0.25] Computation and Programming
   - ECOR 1042 [0.25] Data Management
   - ECOR 1043 [0.25] Circuits
   - ECOR 1044 [0.25] Mechatronics
   - ECOR 1045 [0.25] Statics
   - ECOR 1046 [0.25] Mechanics
   - ECOR 1047 [0.25] Visual Communication
   - ECOR 1048 [0.25] Dynamics
   - MATH 1004 [0.5] Calculus for Engineering or Physics
   - MATH 1104 [0.5] Linear Algebra for Engineering or Science
   - PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion

2. **0.5 credit from:**
   - CHEM 1101
   - CHEM 1002
   - OR (with permission of the department)

b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:

- ECOR 1055 [0.0] Introduction to Engineering Disciplines I
- ECOR 1056 [0.0] Introduction to Engineering Disciplines II
- ECOR 1057 [0.0] Engineering Profession

#### Second year

3. **5.0 credits in:**
   - BIOL 1103 [0.5] Foundations of Biology I
   - CCDP 2100 [0.5] Communication Skills for Engineering Students
   - ECOR 2050 [0.5] Design and Analysis of Engineering Experiments
   - ELEC 2501 [0.5] Circuits and Signals

#### Notes:

1. For **Item 1** and students transferring into Architectural Conservation and Sustainability Engineering (Structural or Environmental Stream), students in good standing and who have successfully completed CHEM 1101 while registered in another engineering program may replace CHEM 1001 and CHEM 1002 with CHEM 1101 plus one 0.5 credit course from the Basic Science Electives list.

#### Third year

4. **4.5 credits in:**
   - ELEC 3105 [0.5] Electromagnetic Fields
   - ELEC 3909 [0.5] Electromagnetic Waves
   - SYSC 3203 [0.5] Bioelectrical Systems
   - SYSC 3501 [0.5] Communication Theory
   - SYSC 3610 [0.5] Biomedical Systems, Modeling, and Control

   **or**

   - SYSC 4201 [0.5] Ethics, Research Methods
   - SYSC 4202 [0.5] and Standards for Biomedical Engineering

5. **0.5 credit from:**
   - CHEM 2204
   - CHEM 2203
   - BIOL 4309
   - BIOL 3306
   - BIOL 2303
   - BIOL 2201
   - BIOL 2004
   - BIOL 1104
   - MATH 1005
   - MATH 3007
   - MATH 2004
   - MATH 1005
   - ELEC 2607 [0.5] Switching Circuits
   - MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
   - MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics
   - SYSC 2006 [0.5] Foundations of Imperative Programming
   - SYSC 2510 [0.5] Probability, Statistics and Random Processes for Engineers
   - SYSC 3610 [0.5] Biomedical Systems, Modeling, and Control
   - SYSC 4201 [0.5] Ethics, Research Methods
   - SYSC 4202 [0.5] and Standards for Biomedical Engineering

   **or**

   - SYSC 4201 [0.5] Ethics, Research Methods
   - SYSC 4202 [0.5] and Standards for Biomedical Engineering

#### Fourth year

6. **0.5 credit from:**
   - ELEC 4319 [0.5] Studies in Exercise Physiology
   - CHEM 2203 [0.5] Organic Chemistry I
   - CHEM 2204 [0.5] Organic Chemistry II
   - OR (with permission of the department)

   **or**

   - SYSC 2004 [0.5] Object-Oriented Software Development
   - SYSC 2010 [0.5] Programming Project

7. **2.0 credits in:**
   - ECOR 4995 [0.5] Professional Practice
   - ELEC 4601 [0.5] Microprocessor Systems
   - SYSC 4203 [0.5] Bioinstrumentation and Signals
   - SYSC 4405 [0.5] Digital Signal Processing

8. **1.0 credit in:**
   - SYSC 4907 [1.0] Engineering Project

9. **0.5 credit from:**
   - ELEC 4709 [0.5] Integrated Sensors
   - SYSC 4202 [0.5] Clinical Engineering
   - SYSC 4205 [0.5] Image Processing for Medical Applications

10. **1.0 credit from:**
    - OR
Bachelor of Engineering (21.0 credits)
Biomedical and Mechanical Engineering
Bachelor of Engineering (21.0 credits)

   - ECOR 1047 [0.25] Visual Communication
   - ECOR 1048 [0.25] Dynamics
   - MATH 1004 [0.5] Calculus for Engineering or Physics
   - MATH 1104 [0.5] Linear Algebra for Engineering or Science
   - PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion
   - b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:
      - ECOR 1055 [0.0] Introduction to Engineering Disciplines I
      - ECOR 1056 [0.0] Introduction to Engineering Disciplines II
      - ECOR 1057 [0.0] Engineering Profession

2. 0.5 credit in Basic Science Electives 0.5

Second year
4. a) 5.0 credits in:
   - CIVE 2100 [0.5] Communication Skills for Engineering Students
   - ELEC 2501 [0.5] Circuits and Signals
   - ELEC 2507 [0.5] Electronics I
   - MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
   - MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics
   - SYSC 2004 [0.5] Object-Oriented Software Development
   - SYSC 2006 [0.5] Foundations of Imperative Programming
   - SYSC 2310 [0.5] Introduction to Digital Systems
   - SYSC 2320 [0.5] Introduction to Computer Organization and Architecture
   - SYSC 2510 [0.5] Probability, Statistics and Random Processes for Engineers
   - b) Successful completion of
      - ECOR 2995 [0.0] Engineering Portfolio
Bachelor of Engineering (21.0 credits)  
Computer Systems Engineering

First year  
1. a) 4.0 credits in:  
CHEM 1101 [0.5] Chemistry for Engineering Students  
ECOR 1041 [0.25] Computation and Programming  
ECOR 1042 [0.25] Data Management  
ECOR 1043 [0.25] Circuits  
ECOR 1044 [0.25] Mechatronics  
ECOR 1045 [0.25] Statics  
ECOR 1046 [0.25] Mechanics  
ECOR 1047 [0.25] Visual Communication  
ECOR 1048 [0.25] Dynamics  
MATH 1004 [0.5] Calculus for Engineering or Physics  
MATH 1104 [0.5] Linear Algebra for Engineering or Science  
PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion  

b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:

ECOR 1055 [0.0] Introduction to Engineering Disciplines I  
ECOR 1056 [0.0] Introduction to Engineering Disciplines II  
ECOR 1057 [0.0] Engineering Profession  

2. 0.5 credit in Basic Science Electives  
CCDP 2100 [0.5] Communication Skills for Engineering Students  
ELEC 2501 [0.5] Circuits and Signals  
MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics  
MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics  
MATH 2006 [0.5] Foundations of Imperative Programming  
SYSC 2100 [0.5] Algorithms and Data Structures  
SYSC 2310 [0.5] Introduction to Digital Systems  
SYSC 2320 [0.5] Introduction to Computer Organization and Architecture  
SYSC 2510 [0.5] Probability, Statistics and Random Processes for Engineers

b) Successful completion of  
ECOR 2995 [0.0] Engineering Portfolio

Third year  
5. 5.0 credits in:  
ECOR 2050 [0.5] Design and Analysis of Engineering Experiments  
ECOR 3800 [0.5] Engineering Economics  
ELEC 3509 [0.5] Electronics II  
ELEC 3909 [0.5] Electromagnetic Waves  
SYSC 3310 [0.5] Introduction to Real-Time Systems  
SYSC 3500 [0.5] Signals and Systems  
SYSC 3503 [0.5] Communication Theory II  
SYSC 4502 [0.5] Communications Software  
SYSC 4504 [0.5] Fundamentals of Web Development  
SYSC 4602 [0.5] Computer Communications

Fourth year  
6. 3.5 credits in:  
ECOR 4995 [0.5] Professional Practice  
SYSC 4405 [0.5] Digital Signal Processing  
SYSC 4604 [0.5] Digital Communication Theory  
SYSC 4607 [0.5] Wireless Communications  
SYSC 4700 [0.5] Telecommunications Engineering  
SYSC 4701 [0.5] Communications Systems Lab  
SYSC 4810 [0.5] Introduction to Network and Software Security

7. 1.0 credit from:  
SYSC 4907 [1.0] Engineering Project (if supervisor is in Systems and Computer Engineering)

8. 1.0 credit from:  
SYSC 2010 [0.5] Programming Project  
or SYSC or ELEC at the 3000 level or above (may include 1.0 credit in SYSC at the 5000 level)

9. 0.5 credit in Complementary Studies Electives  
Total Credits 21.0
Bachelor of Engineering (21.0 credits)

Electrical Engineering

First year
1. a) 4.0 credits in: 4.0
   - CHEM 1101 [0.5] Chemistry for Engineering Students
   - ECOR 1041 [0.25] Computation and Programming
   - ECOR 1042 [0.25] Data Management
   - ECOR 1043 [0.25] Circuits
   - ECOR 1044 [0.25] Mechatronics
   - ECOR 1045 [0.25] Statics
   - ECOR 1046 [0.25] Mechanics
   - ECOR 1047 [0.25] Visual Communication
   - ECOR 1048 [0.25] Dynamics
   - MATH 1004 [0.5] Calculus for Engineering or Physics
   - MATH 1104 [0.5] Linear Algebra for Engineering or Science
   - PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion
b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:
   - ECOR 1055 [0.0] Introduction to Engineering Disciplines I
   - ECOR 1056 [0.0] Introduction to Engineering Disciplines II
   - ECOR 1057 [0.0] Engineering Profession

2. 0.5 credit in: 0.5
   - Basic Science Electives

3. 0.5 credit in: 0.5
   - Complementary Studies Electives

Second year
4. a) 5.0 credits in: 5.0
   - CCDP 2100 [0.5] Communication Skills for Engineering Students
   - ELEC 2501 [0.5] Circuits and Signals
   - ELEC 2507 [0.5] Electronics I
   - ELEC 2602 [0.5] Electric Machines and Power
   - ELEC 2607 [0.5] Switching Circuits
   - MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
   - MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics
   - MATH 3705 [0.5] Mathematical Methods I
   - SYSC 2004 [0.5] Object-Oriented Software Development
   - SYSC 2006 [0.5] Foundations of Imperative Programming
b) Successful completion of
   - ECOR 2995 [0.0] Engineering Portfolio

Third year
5. 5.5 credits in: 5.5
   - ECOR 2050 [0.5] Design and Analysis of Engineering Experiments
   - ECOR 3800 [0.5] Engineering Economics
   - ELEC 3105 [0.5] Electromagnetic Fields
   - ELEC 3500 [0.5] Digital Electronics
   - ELEC 3509 [0.5] Electronics II
   - ELEC 3907 [0.5] Engineering Project
   - ELEC 3908 [0.5] Physical Electronics
   - ELEC 3909 [0.5] Electromagnetic Waves
   - SYSC 3006 [0.5] Computer Organization
   - SYSC 3501 [0.5] Communication Theory
   - SYSC 3600 [0.5] Systems and Simulation

Fourth year
6. 1.5 credits in: 1.5
   - ECOR 4995 [0.5] Professional Practice
   - ELEC 4601 [0.5] Microprocessor Systems
   - SYSC 4505 [0.5] Automatic Control Systems I

7. 1.0 credit from: 1.0
   - ECOR 4907 [1.0] Engineering Project (if supervisor is in Electronics)
   - SYSC 4907 [1.0] Engineering Project (if supervisor is in Systems and Computer Engineering)

8. 2.0 credits from: 2.0
   - MECH 4503 [0.5] An Introduction to Robotics
   - SYSC 3020 [0.5] Introduction to Software Engineering
   - SYSC 3200 [0.5] Industrial Engineering
   - ELEC 3508 [0.5] Power Electronics
   - or ELEC OR SYSC at the 4000 level

9. 0.5 credit from: 0.5
   - Basic Science Electives, or
   - ENVE, CIVE, IDES, MAAE, AERO, MECH at the 2000 level or above, or
   - MECH 4503 [0.5] An Introduction to Robotics
   - SYSC 3020 [0.5] Introduction to Software Engineering
   - SYSC 3200 [0.5] Industrial Engineering
   - or any ELEC or SYSC at the 4000 level

10. 0.5 credit in: 0.5
    - Complementary Studies Electives

Total Credits: 21.0
b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:

- ECOR 1055 [0.0] Introduction to Engineering Disciplines I
- ECOR 1056 [0.0] Introduction to Engineering Disciplines II
- ECOR 1057 [0.0] Engineering Profession

2. 0.5 credit in Complementary Studies Electives

Second year

3. a) 5.5 credits in:

- ELEC 2501 [0.5] Circuits and Signals
- ELEC 2507 [0.5] Electronics I
- MAAE 2400 [0.5] Thermodynamics and Heat Transfer
- MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
- MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics
- MATH 3705 [0.5] Mathematical Methods I
- PHYS 2202 [0.5] Wave Motion and Optics
- PHYS 2604 [0.5] Modern Physics I
- SYSC 2004 [0.5] Object-Oriented Software Development
- SYSC 2006 [0.5] Foundations of Imperative Programming
- CCDP 2100 [0.5] Communication Skills for Engineering Students

b) Successful completion of:

- ECOR 2995 [0.0] Engineering Portfolio

Third year

4. 5.5 credits in:

- ECOR 2050 [0.5] Design and Analysis of Engineering Experiments
- ECOR 3800 [0.5] Engineering Economics
- ELEC 2607 [0.5] Switching Circuits
- ELEC 3105 [0.5] Electromagnetic Fields
- ELEC 3907 [0.5] Engineering Project
- ELEC 3908 [0.5] Physical Electronics
- ELEC 3909 [0.5] Electromagnetic Waves
- PHYS 3606 [0.5] Modern Physics II
- PHYS 3701 [0.5] Elements of Quantum Mechanics
- PHYS 3807 [0.5] Mathematical Physics I
- SYSC 3600 [0.5] Systems and Simulation

Fourth year

5. 3.5 credits in:

- ECOR 4995 [0.5] Professional Practice
- ELEC 3500 [0.5] Digital Electronics
- ELEC 3509 [0.5] Electronics II
- ELEC 4908 [1.0] Engineering Physics Project
- PHYS 4007 [0.5] Fourth-Year Physics Laboratory: Selected Experiments and Seminars
- PHYS 4707 [0.5] Introduction to Quantum Mechanics I

6. 0.5 credit from:

- PHYS 4203 [0.5] Physical Applications of Fourier Analysis
- PHYS 4208 [0.5] Modern Optics

- PHYS 4409 [0.5] Thermodynamics and Statistical Physics
- PHYS 4508 [0.5] Solid State Physics
- PHYS 4708 [0.5] Introduction to Quantum Mechanics II
- PHYS 4807 [0.5] Statistical Data Analysis Techniques for Physics

7. 0.5 credit in ELEC at the 4000 level excluding: 0.5

- ELEC 4504, ELEC 4600, ELEC 4703, and ELEC 4705

8. 0.5 credit in Complementary Studies Electives

Total Credits: 21.0

Environmental Engineering Bachelor of Engineering (21.0 credits)

First year

1. a) 4.5 credits in:

- CHEM 1001 [0.5] General Chemistry I
- CHEM 1002 [0.5] General Chemistry II
- ECOR 1041 [0.25] Computation and Programming
- ECOR 1042 [0.25] Data Management
- ECOR 1043 [0.25] Circuits
- ECOR 1044 [0.25] Mechatronics
- ECOR 1045 [0.25] Statics
- ECOR 1046 [0.25] Mechanics
- ECOR 1047 [0.25] Visual Communication
- ECOR 1048 [0.25] Dynamics
- MATH 1004 [0.5] Calculus for Engineering or Physics
- MATH 1104 [0.5] Linear Algebra for Engineering or Science
- PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion

b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:

- ECOR 1055 [0.0] Introduction to Engineering Disciplines I
- ECOR 1056 [0.0] Introduction to Engineering Disciplines II
- ECOR 1057 [0.0] Engineering Profession

Second year

2. 0.5 credit in Complementary Studies Electives

Third year

3. a) 5.0 credits in:

- BIOL 1103 [0.5] Foundations of Biology I
- BIOL 1104 [0.5] Foundations of Biology II
- CHEM 2800 [0.5] Foundations for Environmental Chemistry
- CIVE 2200 [0.5] Mechanics of Solids I
- ENVE 2001 [0.5] Process Analysis for Environmental Engineering
- ERTH 2404 [0.5] Engineering Geoscience
- MAAE 2300 [0.5] Fluid Mechanics I
- MAAE 2400 [0.5] Thermodynamics and Heat Transfer
- MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
- MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics

b) Successful completion of:

- ECOR 2995 [0.0] Engineering Portfolio
### Bachelor of Engineering (21.0 credits)

#### First year

**1. 4.0 credits in:**

   - ECOR 1057 [0.0] Engineering Profession
   
   **2. 0.5 credit in** Basic Science Electives 0.5

2. **0.5 credit in** Complementary Studies Electives 0.5

**Second year**

4. a) **5.0 credits in:**
   - CCDP 2100 [0.5] Communication Skills for Engineering Students
   - COMP 1805 [0.5] Discrete Structures I
   - COMP 2804 [0.5] Discrete Structures II
   - ELEC 2501 [0.5] Circuits and Signals
   - MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
   - SYSC 2004 [0.5] Object-Oriented Software Development
   - SYSC 2006 [0.5] Foundations of Imperative Programming
   - SYSC 2100 [0.5] Algorithms and Data Structures
   
   **b) Successful completion of:**
   - ECOR 2995 [0.0] Engineering Portfolio

**Third year**

5. **5.0 credits in:**
   - COMP 3005 [0.5] Database Management Systems
   - ECOR 2050 [0.5] Design and Analysis of Engineering Experiments
   - SYSC 3101 [0.5] Programming Languages
   - SYSC 3110 [0.5] Software Development Project
   - SYSC 3120 [0.5] Software Requirements Engineering
   - SYSC 3303 [0.5] Real-Time Concurrent Systems
   - SYSC 3310 [0.5] Introduction to Real-Time Systems
   - SYSC 4001 [0.5] Operating Systems
   - SYSC 4106 [0.5] The Software Economy and Project Management
   
   **6. 0.5 credit from:**
   - ELEC 2507 [0.5] Electronics I
   - ELEC 4705 [0.5] Electronic Materials, Devices and Transmission Media
   or 0.5 credit in Basic Science Electives

**Fourth year**

7. **2.0 credits in:**
   - ECOR 4995 [0.5] Professional Practice
   - SYSC 4101 [0.5] Software Validation
   - SYSC 4806 [0.5] Software Engineering Lab
   - SYSC 4810 [0.5] Introduction to Network and Software Security
   
   **8. 1.0 credit in:**
   - SYSC 4907 [1.0] Engineering Project

9. **1.0 credit from** SYSC or ELEC courses at the 3000 level or above 1.0

10. **1.0 credit from** the list in Item 9 or 1.0 credit in Computer Science Electives for Software Engineering or 1.0 credit in SYSC at the 5000 level (with permission of the department)

11. **0.5 credit in** Complementary Studies Electives 0.5

**Total Credits** 21.0

Sustainable and Renewable Energy Stream A: Smart Technologies for Power Generation and Distribution

Bachelor of Engineering (21.0 credits)

**First year**

1. a) **4.0 credits in:**
   - CHEM 1101 [0.5] Chemistry for Engineering Students
   - ECOR 1041 [0.25] Computation and Programming
   - ECOR 1042 [0.25] Data Management
   - ECOR 1043 [0.25] Circuits
   - ECOR 1044 [0.25] Mechatronics

- MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics
- SYSC 2006 [0.5] Foundations of Imperative Programming

b) Successful completion of

- ECOR 2995 [0.0] Engineering Portfolio

5. 5.5 credits in:

- ECOR 2050 [0.5] Design and Analysis of Engineering Experiments
- CCDP 2100 [0.5] Communication Skills for Engineering Students
- ECOR 3800 [0.5] Engineering Economics
- ELEC 3105 [0.5] Electromagnetic Fields
- ELEC 3508 [0.5] Power Electronics
- ELEC 4602 [0.5] Electrical Power Systems
- SREE 3001 [0.5] Sustainable and Renewable Energy Sources
- SREE 3002 [0.5] Electricity: Use, Distribution, Integration of Distributed Generation
- SREE 3003 [0.5] Sustainable and Renewable Electricity Generation
- SYSC 3006 [0.5] Computer Organization
- SYSC 3600 [0.5] Systems and Simulation

6. 3.5 credits in:

- ELEC 4703 [0.5] Solar Cells

- SREE 4001 [0.5] Efficient Energy Conversion
- SREE 4002 [0.5] The Energy Economy, Reliability and Risk
- SYSC 4505 [0.5] Automatic Control Systems I
- SYSC 4602 [0.5] Computer Communications

- 7. 1.0 credit in:

- SREE 4907 [1.0] Energy Engineering Project

- 8. 0.5 credit in Complementary Studies Electives

- 9. 0.5 credit in any 4000-level Engineering course for which prerequisites have been satisfied

Total Credits 21.0

Sustainable and Renewable Energy Stream B: Efficient Energy Generation and Conversion Bachelor of Engineering (21.0 credits)

First year

1. a) 4.0 credits in:

- CHEM 1101 [0.5] Chemistry for Engineering Students
- ECOR 1041 [0.25] Computation and Programming
- ECOR 1042 [0.25] Data Management
- ECOR 1043 [0.25] Circuits
- ECOR 1044 [0.25] Mechatronics
- ECOR 1045 [0.25] Statics
- ECOR 1046 [0.25] Mechanics
- ECOR 1047 [0.25] Visual Communication
- ECOR 1048 [0.25] Dynamics
- MATH 1004 [0.5] Calculus for Engineering or Physics
- MATH 1104 [0.5] Linear Algebra for Engineering or Science
- PHYS 1004 [0.5] Introductory Electromagnetism and Wave Motion

b) The Introduction to Engineering Disciplines requirement must be met through the successful completion of:

- ECOR 1055 [0.0] Introduction to Engineering Disciplines I
- ECOR 1056 [0.0] Introduction to Engineering Disciplines II
- MAAE 2202 [0.5] Engineering Graphical Design
- MAAE 2300 [0.5] Fluid Mechanics I
- MAAE 2400 [0.5] Engineering Graphical Design
- SREE 4907 [1.0] Energy Engineering Project

Second year

4. a) 5.0 credits in:

- ELEC 2501 [0.5] Circuits and Signals
- ELEC 2507 [0.5] Electronics I
- ELEC 2602 [0.5] Electric Machines and Power
- ELEC 2607 [0.5] Switching Circuits
- ENVE 2001 [0.5] Process Analysis for Environmental Engineering
- MAAE 2300 [0.5] Fluid Mechanics I
- MAAE 2400 [0.5] Thermodynamics and Heat Transfer
- MATH 1005 [0.5] Differential Equations and Infinite Series for Engineering or Physics
- MATH 2004 [0.5] Multivariable Calculus for Engineering or Physics
- SYSC 2006 [0.5] Foundations of Imperative Programming

b) Successful completion of

- ECOR 2995 [0.0] Engineering Portfolio

Third year

5. 5.5 credits in:

- ECOR 2050 [0.5] Design and Analysis of Engineering Experiments
- CCDP 2100 [0.5] Communication Skills for Engineering Students
- ECOR 3800 [0.5] Engineering Economics
- ELEC 3105 [0.5] Electromagnetic Fields
- ELEC 3508 [0.5] Power Electronics
- ELEC 4602 [0.5] Electrical Power Systems
- SREE 3001 [0.5] Sustainable and Renewable Energy Sources
- SREE 3002 [0.5] Electricity: Use, Distribution, Integration of Distributed Generation
- SREE 3003 [0.5] Sustainable and Renewable Electricity Generation
- SYSC 3006 [0.5] Computer Organization
- SYSC 3600 [0.5] Systems and Simulation

Fourth year

6. 3.5 credits in:

- ELEC 4703 [0.5] Solar Cells

- SREE 4001 [0.5] Efficient Energy Conversion
- SREE 4002 [0.5] The Energy Economy, Reliability and Risk
- SYSC 4505 [0.5] Automatic Control Systems I
- SYSC 4602 [0.5] Computer Communications

- 7. 1.0 credit in:

- SREE 4907 [1.0] Energy Engineering Project

- 8. 0.5 credit in Complementary Studies Electives

- 9. 0.5 credit in any 4000-level Engineering course for which prerequisites have been satisfied

Total Credits 21.0
Students in Engineering programs are covered by the common University regulations regarding graduation, with the following additions and amendments.

**Academic Performance Evaluation for Engineering**

Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar), all undergraduate students including the process of Graduation, with the following additions and amendments:

**Regulations**

The regulations presented in this section apply to all Bachelor of Engineering programs.

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar), with the following additions and amendments:

**Academic Performance Evaluation for Engineering**

1. In Engineering programs, all credits are included in the Major CGPA, making it identical to the Overall CGPA.
2. Students who are not assigned the status Good Standing or Academic Warning will be required to leave the degree with either the status Continue in Alternate (CA) or the status Dismissed from Program (DP).

**Graduation**

Students in Engineering programs are covered by the common University regulations regarding graduation, with the following additions and amendments.

**Course Load**

Regulations regarding Course Load and Overload can be found in the Academic Regulations of the University section of this Calendar. The normal course load in Engineering is defined as the number of credits required in the student's program for the current year status of the students. Since the programs in Engineering require more than 20.0 credits in total, the normal course load is more than 5.0 credits in some years of the program. Registration in more than this number of credits constitutes an overload.

**Co-operative Education Programs**

All Engineering programs are available with or without participation in the Co-operative Education option.

**Year Status Prerequisites**

Year Status in Engineering is used in some course prerequisites to limit access to only those students who have sufficient preparation. In particular, students will not have access to second, third or fourth year engineering, science or mathematics courses until they have achieved second year status. Similarly, to take some specific engineering, science and mathematics courses in third or fourth year, that year status must be achieved. For additional information on prerequisites, see the individual course descriptions.

**2nd year:** Students may not continue into 2000-level (or higher) engineering courses unless all the following requirements are met:

1. Successful completion of all ECOR 1040 series of courses, with a minimum grade of C-
2. Successful completion of all ECOR 1050 series of courses,
3. Successful completion of all MAAE 2700 series of courses, with a minimum grade of C-
4. Successful completion of all MATH 1004, MATH 1104, CHEM 1101 (or CHEM 1001 and CHEM 1002), and PHYS 1004 (or PHYS 1001 and PHYS 1002),
5. Successful completion of all English as a Second Language Requirements, and any additional requirements as determined in the admission process.

**3rd year:** Students may not take courses with third-year status in Engineering as a prerequisite until successful completion of 4.0 credits from the second-year requirements of their current program.

**4th year:** Students may not take courses with fourth-year status in Engineering as a prerequisite until successful completion of all second-year requirements and successful completion of 3.5 credits from the third-year requirements of their current program.

**Time Limit**

The Bachelor of Engineering degree must be completed within eight calendar years of initial registration. Students

</table>

### Year Status Prerequisites

**2nd year:**

- Successful completion of all ECOR 1040 series of courses with a minimum grade of C-
- Successful completion of all ECOR 1050 series of courses
- Successful completion of all MAAE 2700 series of courses with a minimum grade of C-
- Successful completion of all MATH 1004, MATH 1104, CHEM 1101 (or CHEM 1001 and CHEM 1002), and PHYS 1004 (or PHYS 1001 and PHYS 1002)
- Successful completion of all English as a Second Language Requirements, and any additional requirements as determined in the admission process.

**3rd year:**

- Students may not take courses with third-year status in Engineering as a prerequisite until successful completion of 4.0 credits from the second-year requirements of their current program.

**4th year:**

- Students may not take courses with fourth-year status in Engineering as a prerequisite until successful completion of all second-year requirements and successful completion of 3.5 credits from the third-year requirements of their current program.
who do not complete their program requirements within this limit will be given the status Continue in Alternate.

**Academic Appeals**
The Engineering Committee on Admission and Studies handles all academic appeals.

**Co-operative Education**
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

**Undergraduate Co-operative Education Policy**

**Admission Requirements**
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

**Participation Requirements**

**COOP 1000**
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

**Communication with the Co-op Office**
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

**Employment**
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

**Registering in Co-op Courses**
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

**Work Term Assessment and Evaluation**
To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**
In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.
Voluntary Withdrawal from the Co-op Option

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

Involuntary or Required Withdrawal from the Co-op Option

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student’s failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students

All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

Bachelor of Engineering: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Registered as a full-time student in the Engineering program
2. An overall CGPA of 8.00 or higher;
3. Successfully completed all required first and second year courses before beginning the first work term;
4. Students must be eligible for third-year standing when they return for a study term after their first work placement.

Students in all Bachelor of Engineering concentrations must successfully complete four (4) work terms to obtain the co-op designation.

Work Term Courses:

Aerospace Engineering and Mechanical Engineering, Biomedical and Mechanical Engineering:

- MAAE 3999 [0.0] Co-operative Work Term

Architectural Conservation and Sustainability Engineering:

- CIVE 3999 [0.0] Co-operative Work Term
- or ENVE 3999 [0.0] Co-operative Work Term

Civil Engineering:

- CIVE 3999 [0.0] Co-operative Work Term

Communications Engineering, Computer Systems Engineering and Software Engineering:

- SYSC 3999 [0.0] Co-operative Work Term

Biomedical and Electrical Engineering, Electrical Engineering and Engineering Physics:

- ELEC 3999 [0.0] Co-operative Work Term

Environmental Engineering:

- ENVE 3999 [0.0] Co-operative Work Term

Sustainable and Renewable Energy Engineering:

- ELEC 3999 [0.0] Co-operative Work Term
- MAAE 3999 [0.0] Co-operative Work Term

(depending on student’s stream)

Advances for admission to programs for which the demand for places by qualified applicants exceeds the stated minimum requirements. Some programs may also require specific course prerequisites and prerequisite course average. These averages may be considerably higher than the stated minimum requirements; be eligible for work in Canada (for off-campus work placements).

Note that meeting the above entrance requirements only establishes eligibility for admission to the program. Enrolment in the co-op option may be limited at the discretion of the department.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Aerospace Engineering (AERO) Courses
AERO 2001 [0.5 credit]
Aerospace Engineering Graphical Design
Engineering drawing techniques; fits and tolerances; working drawings; fasteners. Elementary descriptive geometry; true length, true view, and intersection of geometric entities; developments. Assignments will make extensive use of Computer-Aided Design (CAD) and will include the production of detail and assembly drawings from actual physical models.
Includes: Experiential Learning Activity
Also listed as MAAE 2001.
Prerequisite(s): Second-year status in Engineering.
Lectures and tutorials two hours a week, laboratory four hours a week.

AERO 3002 [0.5 credit]
Aerospace Design and Practice
Includes: Experiential Learning Activity
Prerequisite(s): MAAE 2001 and third-year status in Engineering.
Lectures three hours a week, problem analysis three hours a week.
AERO 3101 [0.5 credit]
Lightweight Structures
Structural concepts; theory of elasticity; bending, torsion and shear in thin-walled beams having single or multi-cell sections; work and energy principles; deformation and force analysis of advanced structures, including stiffened thin-wall panels; finite element methods. Stability and buckling of thin-walled structures.
Includes: Experiential Learning Activity
Prerequisite(s): MAAE 3202.
Lectures three hours a week; problem analysis one hour a week.

AERO 3240 [0.5 credit]
Orbital Mechanics
Prerequisite(s): MAAE 2101.
Lectures three hours per week, tutorial one hour per week.

AERO 3700 [0.5 credit]
Aerospace Materials
Includes: Experiential Learning Activity
Prerequisite(s): MAAE 2700.
Lectures three hours a week; problem analysis one hour a week.

AERO 3841 [0.5 credit]
Spacecraft Design I
Design of spacecraft and spacecraft subsystems with emphasis on mission requirements and current design methods: spacecraft configuration, payload, structural, attitude control, thermal, power, and other related subsystems. Spacecraft integration and testing.
Includes: Experiential Learning Activity
Prerequisite(s): AERO 3240.
Lectures three hours a week, tutorials or laboratories three hours per week.

AERO 4003 [0.5 credit]
Aerospace Systems Design
Stress and deflection analysis; fatigue, safe life, damage tolerant design. Propulsion systems integration; landing gear; control and other subsystems. Mechanical component design. Airworthiness regulations and certification procedures. Weight and cost estimation and control. System reliability. Design studies of aircraft or spacecraft components.
Includes: Experiential Learning Activity
Prerequisite(s): AERO 3002 and fourth-year status in Engineering.
Lectures three hours a week, problem analysis three hours a week.

AERO 4009 [0.5 credit]
Aviation Management and Certification
Product development, quality control. Strategic organizational analysis and design. Airworthiness, type certification and planning, delegation of authority, airplane flight manual. Aerospace system design and safety. Prerequisite(s): fourth-year status in Engineering.
Lectures three hours per week.

AERO 4300 [0.5 credit]
Acoustics and Noise Control
Behaviour of compressible fluids, sound waves and properties of sound sources; measurement of sound; human perception of sound; prediction methods based on energy considerations; sound propagation in realistic environments: outdoors, rooms, ducts; absorption and transmission loss, noise control; case studies.
Includes: Experiential Learning Activity
Prerequisite(s): MAAE 3004 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering.
Lectures three hours a week.

AERO 4302 [0.5 credit]
Aerodynamics and Heat Transfer
Differential equations of motion. Viscous and inviscid regions. Potential flow: superposition; thin airfoils; finite wings; compressibility corrections. Viscous flow: thin shear layer approximation; laminar layers; transition; turbulence modeling. Convective heat transfer: free versus forced convection; energy and energy integral equations; turbulent diffusion.
Prerequisite(s): MAAE 3300 or MECH 3310. Also offered at the graduate level, with different requirements, as MECH 5000, for which additional credit is precluded.
Lectures three hours a week.

AERO 4304 [0.5 credit]
Computational Fluid Dynamics
Prerequisite(s): (MAAE 3300 or MECH 3310) and fourth-year status in Engineering.
Lectures three hours a week.
AERO 4306 [0.5 credit]
Aerospace Vehicle Performance
Morphology of aircraft and spacecraft. Performance analysis of fixed wing aircraft: drag estimation, propulsion, take-off, climb and landing, endurance, payload/range, manoeuvres; operational economics. Performance analysis of rotor craft: rotor-blade motion, hovering and vertical ascent, forward flight, and autorotation. Rocket propulsion; escape velocity; orbital dynamics.
Prerequisite(s): (MAAE 3300 or MECH 3310) and fourth-year status in Engineering.
Lectures three hours a week.

AERO 4308 [0.5 credit]
Aircraft Stability and Control
Static stability and control: equilibrium requirements; longitudinal stability requirements; neutral points; manoeuvring flight; control forces and control requirements; lateral static stability certification requirements. Dynamic stability: axis systems; governing equations; phugoid and short period modes; lateral dynamic modes. Closed-loop control.
Prerequisite(s): MAAE 3500 and fourth-year status in Engineering.
Also offered at the graduate level, with different requirements, as MECH 5101, for which additional credit is precluded.
Lectures three hours a week.

AERO 4402 [0.5 credit]
Aerospace Propulsion
Propulsion requirements, effects of Mach Number, altitude, and application; basic propeller theory; propeller, turboshaft, turbojet, turbofan and rocket; cycle analysis and optimization for gas turbine power plant; inter-relations between thermodynamic, aerodynamic and mechanical designs; rocket propulsion; selection of aeroengines.
Precludes additional credit for MECH 4401.
Prerequisite(s): MAAE 2400, (MAAE 3300 or MECH 3310), and fourth-year status in Engineering.
Lectures three hours a week.

AERO 4442 [0.5 credit]
Transatmospheric and Spacecraft Propulsion
Planetary/interplanetary environments and effects. Launch and spacecraft propulsion: liquid/solid/hybrid rockets, ram/scramjets, combined cycle engines, electrothermal, electromagnetic, electrostatic, nuclear, and propellantless propulsion. Trajectory analysis, multi-staging, separation dynamics. Advanced engine concepts.
Prerequisite(s): MAAE 2400, (MAAE 3300 OR MECH 3310) and fourth-year status in Engineering.
Lectures three hours a week.

AERO 4446 [0.5 credit]
Heat Transfer for Aerospace Applications
Precludes additional credit for MECH 4406.
Prerequisite(s): MAAE 2400 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering.
Lectures three hours a week.

AERO 4540 [0.5 credit]
Spacecraft Attitude Dynamics and Control
Prerequisite(s): AERO 3240 and MAAE 3500 and fourth-year status in Engineering.
Lectures three hours a week.

AERO 4602 [0.5 credit]
Introductory Aeroelasticity
Review of structural behaviour of lifting surface elements; structural dynamics, Laplace Transforms, dynamic stability; modal analysis; flutter, Theodorsen's theory; flutter of a typical section; wing flutter, T-tail flutter, propeller whirl flutter; gust response; buffeting, limit cycle flutter.
Prerequisite(s): (MAAE 3300 or MECH 3310) and SYSC 3600 and fourth-year status in Engineering.
Lectures three hours a week.

AERO 4607 [0.5 credit]
Rotorcraft Aerodynamics and Performance
Prerequisite(s): MAAE 3004 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering.
Lectures three hours per week.

AERO 4608 [0.5 credit]
Composite Materials
Reinforcing mechanisms in composite materials; material properties. Strength and elastic constants of unidirectional composites; failure criteria. Analysis of laminated plates; bending and eigenvalue problems. Environmental effects and durability. Damage tolerance. Design of composite structures.
Prerequisite(s): MAAE 2202 and fourth-year status in Engineering.
Lectures three hours a week.
AERO 4609 [0.5 credit]
Joining of Materials
Design for joining: base material and component geometry. Selection of joining method and filler material; Adhesive bonding; Soldering; Brazing; Diffusion bonding; Resistance welding; Fusion welding (GTAW, EB, laser and plasma arc); Friction welding; NDE. Emphasis on Aerospace materials and applications. Prerequisite(s): MAAE 2700 and fourth-year status in Engineering. Lectures three hours per week.

AERO 4842 [0.5 credit]
Spacecraft Design II
System view of spacecraft. Requirements definition. Spacecraft payloads (remote sensing, imaging systems, astronomy instrumentation etc.). Exploration missions. Implications for systems and missions. Space system design case studies. Includes: Experiential Learning Activity Precludes additional credit for AERO 4802 (no longer offered). Prerequisite(s): AERO 3841 and fourth-year status in Engineering. Lectures three hours a week, tutorials or laboratories one hour per week.

Civil Engineering (CIVE) Courses
CIVE 2004 [0.5 credit]
GIS, Surveying, CAD and BIM

CIVE 2005 [0.5 credit]
Architectural Technology 2
Technical issues involved in architectural design of buildings from ancient times to the present. Technological innovation and materials related to structural developments, and the organization and design of structures. Basic concepts of calculus, equilibrium, and mechanics of materials. Precludes additional credit for Not eligible for use for Bachelor of Engineering degree requirements. Prerequisite(s): ARCC 2202. Lectures three hours a week, laboratory three hours a week.

CIVE 2101 [0.5 credit]
Engineering Mechanics
Virtual work. Friction. Relative motion of particles. Kinematics of a rigid body: translation, rotation; general plane motion; absolute and relative motion. Kinetics of a rigid body: equations of motion; work-energy; impulse-momentum; conservation of momentum and energy. Conservative forces and potential energy. Precludes additional credit for MAAE 2101. Prerequisite(s): MATH 1004, MATH 1104 and second-year status in Engineering. Lectures three hours a week, problem analysis three hours a week.

CIVE 2200 [0.5 credit]
Mechanics of Solids I

CIVE 2700 [0.5 credit]
Civil Engineering Materials
CIVE 3202 [0.5 credit]
Mechanics of Solids II
Precludes additional credit for MAAE 3202.
Prerequisite(s): CIVE 2200.
Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

CIVE 3203 [0.5 credit]
Introduction to Structural Analysis
Concepts and assumptions for structural analysis: framed structures; joints; supports; compatibility and equilibrium; stability and determinacy; generalized forces and displacements. Principle of Virtual Work: unknown force calculations; influence lines. Complementary Virtual Work; displacement calculations, indeterminate analysis. Introduction to the Stiffness Method of Analysis.
Prerequisite(s): CIVE 2200 and MATH 1004.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3204 [0.5 credit]
Introduction to Structural Design
Prerequisite(s): CIVE 2200.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3205 [0.5 credit]
Design of Structural Steel Components
Introduction to CAN/CSA - S16, design and behaviour concepts; shear lag, block shear, local plate buckling, lateral torsional buckling, instantaneous centre, inelastic strength and stability. Design of tension members, axially loaded columns, beams, beam-columns, simple bolted and welded connections.
Prerequisite(s): CIVE 2200 and CIVE 2700.
Recommended prerequisite: CIVE 3204.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3206 [0.5 credit]
Design of Reinforced Concrete Components
Introduction to CAN/CSA - A23.3; design and behaviour concepts; flexural analysis at service loads; shear, bond, Whitney stress block, under, over reinforced behaviour, ultimate strength. Flexural design of singly reinforced, doubly reinforced T-beams, one-way slabs. Shear design for beams. One-way, two-way slab systems, columns.
Prerequisite(s): CIVE 2200 and CIVE 2700.
Recommended prerequisite: CIVE 3204.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3207 [0.5 credit]
Historic Site Recording and Assessment
Methods of heritage documentation including hand recording, photography, rectified photography, total station, gps, photogrammetry, and laser scanning. Non-destructive testing techniques; environmental assessment tools for determining air quality and energy efficiency. Multidisciplinary teams for all project work.
Includes: Experiential Learning Activity
Also listed as ARCN 4100.
Prerequisite(s): third-year status in B.Eng. in Architectural Conservation and Sustainability Engineering.
Lectures three hours a week, lab or field work two hours a week.

CIVE 3208 [0.5 credit]
Geotechnical Mechanics
Includes: Experiential Learning Activity
Also listed as ERTH 4107.
Prerequisite(s): third-year status in Engineering, or permission of the department. Additional recommended background: ERTH 2404 or equivalent.
Lectures three hours a week, laboratory three hours alternate weeks.

CIVE 3209 [0.5 credit]
Building Science
Building envelope design and analysis; applied heat transfer and moisture transport; solar radiation; hygrothermal modelling; control of rain, air, vapour, and heat; materials for wall, window, curtain wall, roof, and foundation systems; building envelope retrofit case studies; building code; envelope construction.
Prerequisite(s): MAAE2400 and third-year status in B.Eng. Architectural Conservation and Sustainability Engineering or in Civil Engineering.
Lectures three hours a week, problem analysis three hours alternate weeks.
CIVE 3304 [0.5 credit]
Transportation Engineering and Planning
Transportation and the socio-economic environment; modal and intermodal systems and components; vehicle motion, human factors, system and facility design; traffic flow; capacity analysis; planning methodology; environmental impacts; evaluation methods. Also listed as GEOG 4304.
Prerequisite(s): third-year status in Engineering, or permission of the Department.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

CIVE 4200 [0.5 credit]
Matrix Analysis of Framed Structures
Prerequisite(s): CIVE 3203.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4201 [0.5 credit]
Finite Element Methods in Civil Engineering
Introduction to the theory and application of finite element methods. The relationship with virtual work, Rayleigh-Ritz, system of linear equations, polynomial interpolation, numerical integration, and theory of elasticity is explored. Isoparametric formulations of structural and plane elements are examined. Geotechnical and nonlinear problems are introduced.
Prerequisite(s): CIVE 2200 and fourth year status in engineering.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4202 [0.5 credit]
Wood Engineering
Also listed as ARCC 4202.
Prerequisite(s): CIVE 2200, CIVE 2700 and third-year status in B.Eng.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4208 [0.5 credit]
Geotechnical Engineering
Prerequisite(s): CIVE 3208.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4209 [0.5 credit]
Highway Engineering
Highway planning; highway location and geometric design; traffic engineering; highway capacity; soil classifications; subgrade and base materials; highway drainage; frost action; structural design of rigid and flexible pavements; highway economics and finance; maintenance and rehabilitation.
Prerequisite(s): Fourth year status in engineering.
Recommended prerequisites: CIVE 2004, CIVE 3304 and CIVE 3208.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4301 [0.5 credit]
Foundation Engineering
A critical study of the theories in soil mechanics and their application to the solution of geotechnical engineering problems. Field investigations, laboratory and field testing, shallow foundations, special footings, mat foundations, pile foundations and excavations. Discussion of new methods and current research.
Prerequisite(s): CIVE 4208.
Lectures three hours a week, laboratory three hours alternate weeks.

CIVE 4302 [0.5 credit]
Reinforced and Prestressed Concrete Design
Reinforced concrete shear and torsion design. Two-way slab design by Direct Design and Equivalent Frame Method. Behaviour and design of slender reinforced concrete columns. Prestressed concrete concepts; flexural analysis and design; shear design; anchorage zone design; deflection and prestress loss determination.
Prerequisite(s): CIVE 3202, CIVE 3203 and CIVE 3206.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4303 [0.5 credit]
Urban Planning
A systematic approach to urban planning; urban sprawl; data collection; forecasting; standards; space requirements; land use; zoning; transportation; land development; site selection; land capability; layout; evaluation; housing; urban renewal and new towns.
Prerequisite(s): fourth-year status in Engineering, second-year standing in B.A.S. (Urbanism), or permission of the Department.
Lectures three hours a week, problem analysis three hours alternate weeks.
CIVE 4307 [0.5 credit]
Municipal Hydraulics
Prerequisite(s): MAAE 2300.
Lectures three hours a week, problem analysis one and a half hours a week.

CIVE 4308 [0.5 credit]
Behaviour and Design of Steel Structures
Behaviour and design of open web steel joists, steel and composite decks, composite beams and columns, stud girders, and plate girders. Design of moment connections, base plates and anchor bolts, and bracing connections. Stability of rigid and braced frames. Design for lateral load effects.
Prerequisite(s): CIVE 3205 and fourth-year status in Engineering.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4400 [0.5 credit]
Construction/Project Management
Systems approach to project planning and control. Analysis of alternative network planning methods: CPM, precedence and PERT; planning procedure; computer techniques and estimating; physical, economic and financial feasibility; implementation feedback and control; case studies.
Prerequisite(s): fourth-year status in Engineering.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4403 [0.5 credit]
Masonry Design
Introduction to structural design in masonry. Properties of masonry materials and assemblages. Behaviour and design of beams, walls and columns. Selected topics including veneer wall systems, differential movement, workmanship, specifications, inspection, maintenance and repair. Lowrise and highrise building design.
Prerequisite(s): CIVE 3204, CIVE 3206 and fourth-year status in Engineering or permission of the Department. Also offered at the graduate level, with different requirements, as CIVE 5200, for which additional credit is precluded.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4407 [0.5 credit]
Municipal Engineering
Prerequisite(s): fourth-year status in Engineering.
Lectures three hours a week, problem analysis one and a half hours a week.

CIVE 4500 [0.5 credit]
Computer Methods in Civil Engineering
Advanced software development for Civil Engineering applications. Examples may be chosen from surveying, transportation, geotechnical and/or structural engineering. Software technologies include object-oriented programming, data base management, Internet-based applications and graphical user interfaces.
Prerequisite(s): Fourth-year status in Engineering.
Also offered at the graduate level, with different requirements, as CIVE 5602, for which additional credit is precluded.
Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4601 [0.5 credit]
Building Pathology and Rehabilitation
Deterioration mechanisms for concrete, timber, steel and masonry structures. Identification of design deficiencies; criteria for selection and design of rehabilitation systems. Design techniques to reduce deterioration in new construction and historical structures.
Includes: Experiential Learning Activity Also listed as ARCN 4200.
Prerequisite(s): CIVE 3207 and fourth-year status in B.Eng. in Architectural Conservation and Sustainability Engineering.
Lectures three hours a week, lab/field work two hours a week.

CIVE 4614 [0.5 credit]
Building Fire Safety
Understanding fire-structure interaction and the concepts of fire severity and resistance; behaviour of steel, concrete, and timber buildings exposed to fires; compartment fire dynamics; correlations and computer models to predict fire dynamics; fire retardants; laboratory-scale fire experiments; performance-based approach for building fire safety design.
Prerequisite(s): MAAE 2400 and fourth-year status in Engineering, or permission of the Department.
Lectures three hours a week, problem analysis and laboratories one and one-half hours per week.
CIVE 4907 [1.0 credit]
Engineering Research Project
A research project in engineering analysis, design or development carried out by individual students or small teams, for an opportunity to develop initiative, self-reliance, creative ability and engineering judgment and is normally intended for students with high CGPAs and an interest in graduate studies.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Engineering and permission of the department.

CIVE 4917 [0.5 credit]
Undergraduate Directed Study
Student carries out a study, analysis, and solution of an engineering problem which results in a written final report. Carried out under close supervision of a faculty member. Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the Department and completion of, or concurrent registration in, CIVE 4918.

CIVE 4918 [1.0 credit]
Design Project
Teams of students develop professional level experience through a design project that incorporates fundamentals acquired in previous mathematics, science, engineering, and complementary studies courses. A final report and oral presentations are required.
Includes: Experiential Learning Activity
Prerequisite(s): ECOR 3800 and fourth-year status in Engineering. Certain projects may have additional requirements.
Lectures two hours alternate weeks, problem analysis three hours a week.

Electronics (ELEC) Courses
ELEC 1908 [0.5 credit]
First Year Project
A practical introduction to engineering design. Students work in small teams to specify, design and implement a system, formally managing the project progress and submitting oral and written reports. Professionalism: engineering ethics; health and safety. Technology, society and the environment.
Includes: Experiential Learning Activity
Prerequisite(s): registration in the Engineering Physics program.
Lectures and tutorials three hours a week, laboratory four hours a week.

ELEC 2501 [0.5 credit]
Circuits and Signals
Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 (may be taken concurrently) and (PHYS 1004 or PHYS 1002), and second-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours a week.

ELEC 2507 [0.5 credit]
Electronics I
Qualitative semiconductor physics, leading to the diode equation. Diode applications. Operational amplifiers and their application in feedback configurations including active filters. Introduction to bipolar transistors and MOSFETs, analysis of biasing circuits. Transistor applications including small signal amplifiers.
Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005, ELEC 2501, and second-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours a week.

ELEC 2602 [0.5 credit]
Electric Machines and Power
Modeling and analysis of basic electric power systems. Single-phase and three-phase circuits: real and reactive power, per-phase analysis, power factor correction. Electro-mechanical energy conversion: operation, characteristics and analysis of transformers, DC-, induction-, and synchronous electric machines. Motor and generator operation.
Includes: Experiential Learning Activity
Prerequisite(s): PHYS 1004 and ELEC 2501, and second-year status in Engineering.
Lectures 3 hours per week. Laboratory and problem analysis 3 hours per week alternate weeks.
ELEC 2607 [0.5 credit]

Switching Circuits
Prerequisite(s): PHYS 1004 or PHYS 1002 and second-year status in Engineering.
Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 2607 [0.5 credit]

ELEC 3105 [0.5 credit]

Electromagnetic Fields
Prerequisite(s): MATH 1005, MATH 2004, and (PHYS 1004 or PHYS 1002), and second-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 3500 [0.5 credit]

Digital Electronics
Digital circuit design using verilog and logic synthesis, the electronic properties of logic gates, electrical interfacing between logic families, asynchronous to synchronous interfacing, clock distribution and timing, VLSI design options. Students implement substantial circuits with field-programmable gate arrays. Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2507 and ELEC 2607.
Lectures three hours a week, laboratory three hours a week.

ELEC 3508 [0.5 credit]

Power Electronics
Power semiconductor devices: Thyristor, GTO, IGBT, SiC, GaN. Converter circuits: controlled AC to DC rectifiers, choppers, DC to AC inverters, AC voltage controllers. Protection of conversion circuits. Applications to high-efficiency control of electric machines and electromechanical energy conversion devices. Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2507 and ELEC 2602.
Lectures three hours per week, laboratories/problem analysis three hours per week.

ELEC 3509 [0.5 credit]

Electronics II
Introduction to semiconductor devices and ICs. DC, AC and switching properties of BJTs. Linear amplifiers; bandwidth considerations; two-port analysis. Large signal amplifiers; power amplifiers; transformerless circuits. Feedback and operational amplifiers; gain, sensitivity, distortion and stability. Filter design. Oscillators. Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2507.
Lectures three hours a week, laboratory three hours a week.

ELEC 3605 [0.5 credit]

Electrical Engineering
DC circuits: elements, sources, analysis. Single phase AC circuits: phasors, RLC circuits, real and reactive power, impedance, network analysis, three phase systems. Power transformers. DC motors: operation and characteristics. AC motors: single phase and three phase. Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 and (PHYS 1004 or PHYS 1002), and second-year status in Engineering.
Lectures three hours a week, problem analysis 1.5 hours a week.

ELEC 3907 [0.5 credit]

Engineering Project
Student teams work on open-ended projects based on previously acquired knowledge. Lectures are devoted to discussing project-related issues and student presentations. A project proposal, a series of project reports, and oral presentations, and a comprehensive final report are required. Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2607, ELEC 2507, and ((ECOR 1051, ECOR 1052, ECOR 1053 and ECOR 1054) or (ECOR 2606)), and enrolment in the Electrical Engineering program.
Lecture two hours per week, laboratory six hours per week.

ELEC 3908 [0.5 credit]

Physical Electronics
Fundamentals of device physics and operation of the pn junction, bipolar transistor and MOSFET. Basic integrated circuit processing and application to diodes, BJTs and MOSFETs. Correlation between processing, structure, operation and modeling. Consideration of parasitic and small geometry effects, reliability and process variation. Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2507.
Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.
ELEC 3909 [0.5 credit]
Electromagnetic Waves
Maxwell's equations and EM wave solutions. Polarization. Poynting vector. EM waves in dielectrics and conductors; skin depth. Reflection and refraction. Standing waves. Fresnel relations, Brewster angle. Transmission lines. Line termination, basic impedance matching and transformation. Smith charts. Introduction to guided waves; slab waveguide. Includes: Experiential Learning Activity Precludes additional credit for PHYS 3308. Prerequisite(s): ELEC 3105 or permission of the Department. Lectures three hours a week, problem analysis three hours alternate weeks.

ELEC 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

ELEC 4502 [0.5 credit]
Microwave Circuits
Introduction to microwave semiconductor devices, microwave passive components, microwave integrated circuit technology, and microwave circuit measurements. Basic network theory and scattering matrix description of circuits. Design of matching networks, filters, amplifiers and oscillators at microwave frequencies. Includes: Experiential Learning Activity Prerequisite(s): ELEC 4503; may be taken concurrently. Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4503 [0.5 credit]
Radio Frequency Lines and Antennas
Introduction to distributed circuits, travelling and standing waves, reflection coefficient, SWR, impedance transformation, Smith charts. Introduction to transmission lines; coaxial, rectangular waveguide, resonators, optical fibers. Introduction to antennas; gain, directivity, effective area. Introduction to linear arrays. Includes: Experiential Learning Activity Prerequisite(s): ELEC 3909. Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4504 [0.5 credit]
Avionics Systems
Electromagnetic spectrum. Air data sensing, display. Communications systems. Navigation and landing systems; ground-based, inertial and satellite systems. Airborne radar. Guidance, control for aircraft, autopilots; stability augmentation; active control; sensor requirements; display techniques. Aircraft power systems. Safety systems. Vehicle/systems integration, certification. Precludes additional credit for AERO 4504 (no longer offered). Prerequisite(s): fourth-year status in Engineering. Not open to students in Electrical Engineering, Computer Systems Engineering, Engineering Physics or Communications Engineering. Lecture three hours a week.

ELEC 4505 [0.5 credit]
Telecommunication Circuits
A course of study of the commonly used circuit components in modern telecommunication systems. Both analog and digital systems are included. The design of the hardware is emphasized. Examples are drawn from broadcasting, telephony and satellite systems. Includes: Experiential Learning Activity Prerequisite(s): ELEC 3509 and (SYSC 3501 or SYSC 3503). Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4506 [0.5 credit]
Computer-Aided Design of Circuits and Systems
Basic principles of Computer-Aided Design tools used for analysis and design of communication circuits and systems. Frequency and time-domain analysis. Noise and distortion analysis. Transmission line effects. Sensitivity analysis and circuit performance optimization. Digital simulation. Includes: Experiential Learning Activity Prerequisite(s): fourth-year status in Engineering. Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4509 [0.5 credit]
Communication Links
Fundamentals; decibel, intermodulation, 1dB compression, dynamic range, SNR, noise figure, noise temperature, antenna gain, EIRP, G/T. Line-of-sight links; receiver, diversity, fade margin. Satellite links; link calculations, multiple accessing, earth stations. Fiber links, fiber types, sources, detectors, systems. Prerequisite(s): fourth-year status in Engineering or permission of the Department. Lectures three hours a week, problem analysis three hours alternate weeks.
ELEC 4600 [0.5 credit]
Radar and Navigation
Prerequisite(s): fourth-year status in Engineering or permission of the Department.
Lectures three hours a week, problem analysis 3 hours alternate weeks.

ELEC 4601 [0.5 credit]
Microprocessor Systems
Interfacing aspects in microprocessor systems. Microprocessors and bus structures, internal architecture, instruction set and pin functions. Memory interfacing, input-output, interrupts, direct memory accesses, special processors and multiprocessor systems.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 3006 (no longer offered), SYSC 3320, SYSC 3601.
Prerequisite(s): ELEC 2607 and one of SYSC 2003 or SYSC 3003 (no longer offered) or SYSC 3006 or permission of the Department.
Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4602 [0.5 credit]
Electrical Power Systems
Prerequisite(s): ELEC 2602 or ELEC 3605.
Lectures three hours a week, problem analysis two hours a week.

ELEC 4609 [0.5 credit]
Integrated Circuit Design and Fabrication
Introduction to nMOS IC design: static logic gates, noise margin, transmission gates, factors influencing switching speed, dynamic logic, input protection, output buffers, circuit simulation with SPICE. Laboratory work includes design and layout of a simple nMOS IC that is fabricated and returned for testing.
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 3500 or ELEC 3908.
Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4700 [0.5 credit]
The Physics and Modeling of Advanced Devices and Technologies
Prerequisite(s): ELEC 3908.
Lectures three hours a week, problem analysis two hours alternate weeks.

ELEC 4702 [0.5 credit]
Fiber Optic Communications
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 3908 and ELEC 3909.
Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4703 [0.5 credit]
Solar Cells
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2501 and ELEC 2507 and fourth-year status in Sustainable and Renewable Energy Engineering, or ELEC 2501 and ELEC 2507 and fourth-year status in Engineering with permission of the instructor.
Lectures three hours per week, laboratories/problem analysis three hours alternate weeks.

ELEC 4704 [0.5 credit]
Nanoscale Technology and Devices
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 3908, ELEC 3909.
Lectures three hours a week, problem analysis 1.5 hours a week.
ELEC 4705 [0.5 credit]
Electronic Materials, Devices and Transmission Media
Review of solid-state theory, conductors, semiconductors, superconductors, insulators, and optical and magnetic properties. Devices used in modern high speed electronic and communication systems: transistors, lasers, photodiodes, fiber optics, Josephson junctions. Implications of material properties on fabrication and operation of devices and circuits.
Precludes additional credit for ELEC 3908.
Prerequisite(s): fourth-year status in Engineering. Not available for credit to students in Electrical Engineering or Engineering Physics.
Lectures three hours a week.

ELEC 4706 [0.5 credit]
High-Speed Electronics: Circuits and Systems
Challenges faced in designing high-speed electronic circuits and systems. Fundamentals of high-speed Tx/Rx architectures including: timing and HDL, PLL/DLL, Tx drivers, interface to photonic components, channel modeling, Rx channel, choice of modulation, equalization, clock and data recovery. VHDL hardware and CAD software laboratories.
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 3500.
Lectures three hours a week, laboratory three hours a week.

ELEC 4707 [0.5 credit]
Analog Integrated Electronics
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 3509.
Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4708 [0.5 credit]
Advanced Digital Integrated Circuit Design
Advanced Verilog, test benches. VLSI design based on CMOS technology, characteristics of CMOS logic circuits, cell libraries, building blocks, structured design, testing, Computer-Aided Design tools. Laboratory emphasis on design synthesis from Verilog.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Engineering and ELEC 3500 or permission of the Department.
Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4709 [0.5 credit]
Integrated Sensors
Overview of sensor technologies with emphasis on devices suitable for integration with silicon integrated circuits. Sensor design and fabrication principles including signal conditioning; discussion of automotive, biomedical, and other instrumentation applications.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4906 [0.5 credit]
Special Topics
At the discretion of the Engineering Faculty Board, a course dealing with selected advanced topics of interest to students in Biomedical and Electrical, Communications, Computer Systems, Electrical and Software Engineering and Engineering Physics may be offered.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4907 [1.0 credit]
Engineering Project
Student teams develop professional-level experience by applying, honing, integrating, and extending previously acquired knowledge in a major design project. Lectures are devoted to discussing project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 3907, ECOR 3800, ECOR 4995 (may be taken concurrently) and fourth-year status in Engineering.
Lecture one hour a week, laboratory seven hours a week.

ELEC 4908 [1.0 credit]
Engineering Physics Project
Student teams develop professional-level experience by applying, honing, integrating, and extending previously acquired knowledge in a major design project approved for Engineering Physics. Lectures devoted to discussing project-related issues and student presentations. A project proposal, interim report, oral presentations, and comprehensive final report are required.
Includes: Experiential Learning Activity
Prerequisite(s): ECOR 3800, fourth-year status in Engineering and ECOR 4995 (may be taken concurrently).
Certain projects may have additional prerequisites or corequisites.
Lecture one hour a week, laboratory seven hours a week.
Engineering Core (ECOR) Courses

ECOR 1010 [0.5 credit]
Introduction to Engineering
Technology, society and the environment. Graphical design communication: sketching, graphical projections; CAD. Managing data: statistical methods; spreadsheets. Design analysis: matrix programming software; symbolic computer algebra systems. Design process: proposals; reports; presentations; reporting software. Includes: Experiential Learning Activity
Precludes additional credit for ECOR 1000 (no longer offered), ECOR 1047, ECOR 1054.
Lectures four hours per week, laboratories two hours per week.

ECOR 1041 [0.25 credit]
Computation and Programming
Precludes additional credit for COMP 1005, COMP 1405, ECOR 1051, ECOR 1606, SYSC 1005.
Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours per week.

ECOR 1042 [0.25 credit]
Data Management
Precludes additional credit for COMP 1005, COMP 1405, ECOR 1051, ECOR 1606, SYSC 1005.
Prerequisite(s): ECOR 1041 with a minimum grade of C- and MATH 1004 (may be taken concurrently). This course may not be taken concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours per week.

ECOR 1043 [0.25 credit]
Circuits
Precludes additional credit for ECOR 1052.
Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours per week.

ECOR 1044 [0.25 credit]
Mechatronics
Precludes additional credit for ECOR 1052.
Prerequisite(s): ECOR 1041 with a minimum grade of C- and ECOR 1043 with a minimum grade of C-. This course may not be taken concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours per week.

ECOR 1045 [0.25 credit]
Statics
Precludes additional credit for ECOR 1053, ECOR 1101.
Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours per week.

ECOR 1046 [0.25 credit]
Mechanics
2D truss analysis (method of joints/sections). Normal stress/strain and shear stress/strain. 2D frames and machines. Internal loads - normal, shear and moment at a point. Shear and moment diagrams.
Precludes additional credit for ECOR 1053.
Prerequisite(s): ECOR 1045 with a minimum grade of C-. This course may not be taken concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours per week.

ECOR 1047 [0.25 credit]
Visual Communication
Precludes additional credit for ECOR 1054, ECOR 1010.
Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours per week.
ECOR 1048 [0.25 credit]

Dynamics
Kinematics and kinetics of a particle. Principle of work and energy. Conservation of energy, conservative forces, potential energy. Principles of impulse and momentum, conservation of momentum for a system of particles. Precludes additional credit for ECOR 1054, ECOR 1101. Prerequisite(s): ECOR 1045 with a minimum grade of C-. This course may not be taken concurrently with ESLA 1300 or ESLA 1500.

Lectures three hours per week, laboratories three hours per week.

ECOR 1051 [0.5 credit]
Fundamentals of Engineering I
Software development as an engineering discipline, using a modern programming language. Tracing and visualization of program execution. Testing and debugging. Data management: digital representation of numbers; numerical algorithms; storing data in files; container data types: sequences, sets, maps. Includes: Experiential Learning Activity
Precludes additional credit for COMP 1005, COMP 1405, ECOR 1041, ECOR 1042, ECOR 1606, SYSC 1005. Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.

Lectures three hours per week, laboratories three hours per week.

ECOR 1052 [0.5 credit]
Fundamentals of Engineering II
Precludes additional credit for ECOR 1043, ECOR 1044. Prerequisite(s): ECOR 1051 (may be taken concurrently). Lectures three hours per week, laboratories three hours per week.

ECOR 1053 [0.5 credit]
Fundamentals of Engineering III
Components of forces. Particle equilibrium and free body diagrams. Moments and cross product. Centre of gravity and centroids. Rigid body equilibrium. 2D Truss analysis (method of joints/sections). Normal stress/strain and Shear stress/strain. 2D frames and machines. Includes: Experiential Learning Activity
Precludes additional credit for ECOR 1045, ECOR 1046, ECOR 1101. Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.

Lectures three hours per week, laboratories three hours per week.

ECOR 1054 [0.5 credit]
Fundamentals of Engineering IV
Precludes additional credit for ECOR 1010, ECOR 1047, ECOR 1048. Prerequisite(s): ECOR 1053 (may be taken concurrently). Lectures three hours per week, laboratories three hours per week.

ECOR 1055 [0.0 credit]
Introduction to Engineering Disciplines I
Overview of professional activities oriented to the student's discipline of study: Architectural Conservation and Sustainability. Civil and Environmental. Aerospace and Mechanical. Electrical. Engineering Physics. Computer Systems, Communications and Software. Biomedical (Electrical and Mechanical). Sustainable and Renewable Energy. Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.

Lectures 1.5 hours per week.

ECOR 1056 [0.0 credit]
Introduction to Engineering Disciplines II
Selected lectures designed to provide students with exposure to the breadth of Engineering disciplines.
Online course.

ECOR 1057 [0.0 credit]
Engineering Profession
Online course

ECOR 1101 [0.5 credit]
Mechanics I
Precludes additional credit for ECOR 1045, ECOR 1048, ECOR 1053. Prerequisite(s): MATH 1004 and MATH 1104.

Lectures three hours a week, tutorials and problem analysis three hours a week.
ECOR 1606 [0.5 credit]
**Problem Solving and Computers**
Introduction to engineering problem solving. Defining and modeling problems, designing algorithmic solutions, using procedural programming, selection and iteration constructs, functions, arrays, converting algorithms to a program, testing and debugging. Program style, documentation, reliability. Applications to engineering problems; may include numerical methods, sorting and searching.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 1005, SYSC 1100 (no longer offered), SYSC 1102 (no longer offered), COMP 1005, COMP 1405, ECOR 1041, ECOR 1042, ECOR 1051.
Lectures three hours a week, laboratory three hours a week.

ECOR 2050 [0.5 credit]
**Design and Analysis of Engineering Experiments**
Includes: Experiential Learning Activity
Prerequisite(s): 2nd Year Status in Engineering.
Lectures three hours a week, problem analysis and laboratory three hours a week.

ECOR 2606 [0.5 credit]
**Numerical Methods**
Numerical algorithms and tools for engineering and problem solving. Sources of error and error propagation, solution of systems of linear equations, curve fitting, polynomial interpolation and splines, numerical differentiation and integration, root finding, solution of differential equations. Software tools.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 2606 (no longer offered).
Prerequisite(s): MATH 1005 and (ECOR 1606 or SYSC 1005) and (ECOR 1010 or ELEC 1908).
Lectures three hours a week, laboratory one hour a week.

ECOR 2995 [0.0 credit]
**Engineering Portfolio**
Students will be asked to reflect on their skills, strengths and weaknesses as preparation for the professional practice course. Engineering students must submit samples of their writing and communications (including, for example, laboratory reports and professional memos).

Online

ECOR 3800 [0.5 credit]
**Engineering Economics**
Introduction to engineering economics; cash flow calculations; methods of comparison of alternatives; structural analysis; replacement analysis; public projects; depreciation and income tax; effects of inflation; sensitivity analysis; break-even analysis; decision making under risk and uncertainty.
Prerequisite(s): third-year status in Engineering or (ECOR 1051, ECOR 1052, ECOR 1053 and ECOR 1054).
Lectures three hours a week.

ECOR 4995 [0.5 credit]
**Professional Practice**
Presentations by faculty and external lecturers on the Professional Engineers Act, professional ethics and responsibilities, practice within the discipline and its relationship with other disciplines and to society, health and safety, environmental stewardship, principles and practice of sustainable development. Communication skills are emphasized.
Precludes additional credit for MAAE 4905, CIVE 4905, SYSC 3905 or ELEC 3905 (all no longer offered).
Prerequisite(s): ECOR 2995 and fourth-year status in Engineering.
Lectures three hours a week.

Environmental Engineering (ENVE) Courses

ENVE 1001 [0.5 credit]
**Architecture and the Environment**
Impacts of the environment on architecture; deterioration, freeze/thaw, solar heat, air pollution, moisture; Impacts of architecture on the environment; ecologic footprint, energy consumption, air quality, waste generation; designing with the environment; renewable energy, effective siting and landscape, passive solar energy, natural lighting, energy efficiency.
Lectures three hours a week, problem analysis one and a half hours a week.

ENVE 2001 [0.5 credit]
**Process Analysis for Environmental Engineering**
Material and energy balances for reacting and non-reacting systems. Applications in mining, metallurgy, pulp and paper, power generation, energy utilization. Emissions to the environment per unit product or service generated. Introduction to life cycle analysis, comparative products and processes.
Prerequisite(s): CHEM 1002 or CHEM 1101 or equivalent, and MAAE 2400 (may be taken concurrently), and second-year status in Engineering.
Lectures two hours a week, problem analysis three hours a week.
ENVE 2002 [0.5 credit]
Microbiology
The biology of the Bacteria, Archaea, Viruses and Prototozoans, from the fundamentals of cell chemistry, molecular biology, structure and function, to their involvement in ecological and industrial processes and human disease.
Also listed as BIOL 2303.
Prerequisite(s): BIOL 1103 or CHEM 1002 or CHEM 1101 or equivalent.
Lectures three hours a week.

ENVE 3001 [0.5 credit]
Water Treatment Principles and Design
Theoretical aspects of unit operations for water treatment with design applications. Topics include water characteristics and contaminants, coagulation, flocculation, sedimentation, filtration, adsorption, ion exchange, membrane processes, disinfection and disinfection by-products, and management of water treatment residuals. Laboratory procedures: settling operations, filtration, aeration, and adsorption.
Includes: Experiential Learning Activity
Prerequisite(s): ENVE 3002.
Lectures three hours a week, problem analysis one hour a week, laboratory three hours alternate weeks.

ENVE 3002 [0.5 credit]
Environmental Engineering Systems Modeling
Engineered systems for pollution abatement; chemical reaction engineering; reaction kinetics and rate data analysis; design and modeling of reactors; single and multiple reactions; ideal and nonideal reactors; single and multi-parameter models; biochemical reaction engineering; process control. Laboratory procedures: reactor systems performance: Batch, CSTR and PFR.
Includes: Experiential Learning Activity
Prerequisite(s): CHEM 1002 or CHEM 1101 or equivalent and MATH 2004, and second-year status in Engineering. Additional recommended background: ENV 2001.
Lectures three hours a week, problem analysis one hour a week, laboratory three hours alternate weeks.

ENVE 3003 [0.5 credit]
Water Resources Engineering
A quantitative analysis of natural water systems and the development of these systems as a resource. Components of the hydrologic cycle. Quantitative analysis of stream flow. Probability concepts in water resources. Reservoir design and operation. Hydraulic properties and availability of groundwater. Storm water management. Also listed as GEOG 4103.
Prerequisite(s): third-year status in Engineering.
Lectures three hours a week, problem analysis one hour a week.

ENVE 3004 [0.5 credit]
Contaminant and Pollutant Transport in the Environment
Physical phenomenon governing the transport of contaminants in the environment: diffusion, advection, dispersion, sorption, interphase transfer. Derivation and application of transport equations in air, surface and groundwater pollution; analytical and numerical solutions. Equilibrium partitioning of contaminants among air, water, sediment, and biota.
Prerequisite(s): CHEM 1002 or CHEM 1101 or equivalent; ENVE 3002.
Lectures three hours a week, problem analysis one hour a week.

ENVE 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

ENVE 4002 [0.5 credit]
Environmental Geotechnical Engineering
Landfill design; hydrogeologic principles, water budget, landfill liners, geosynthetics, landfill covers, quality control/quality assurance, clay leachate interaction, composite liner design and leak detection. Landfill operation, maintenance and monitoring. Case studies of landfill design and performance. Geotechnical design of environmental control and containment systems.
Prerequisite(s): ENVE 3004, CIVE 3208.
Also offered at the graduate level, with different requirements, as ENVE 5201/EVG 7201, for which additional credit is precluded.
Lectures three hours a week, problem analysis one hour a week.

ENVE 4003 [0.5 credit]
Air Pollution and Emissions Control
Air pollutants, classification, sources, and effects. Ambient air quality objectives and monitoring. Pollutant formation mechanisms in combustion. Major pollutant categories and control methods. Indoor air quality. Laboratory procedures: emissions from boilers and IC engines, particulate size distribution and control, IAQ parameters.
Includes: Experiential Learning Activity
Prerequisite(s): MAAE 2400 and fourth-year status in Engineering or permission of the department. Also offered at the graduate level, with different requirements, as ENVE 5101/EVG 7101, for which additional credit is precluded.
Lectures three hours a week, problem analysis one hour a week, laboratory three hours alternate weeks.
ENVE 4005 [0.5 credit]
Wastewater Treatment Principles and Design
Theoretical aspects of unit operations and processes for wastewater treatment with design applications. Topics include wastewater characteristics, flow rates, primary treatment, chemical unit processes, biological treatment processes, advanced wastewater treatment, disinfection, biosolids treatment and disposal. Laboratory procedures: activated sludge, anaerobic growth, chemical precipitation, disinfection.
Includes: Experiential Learning Activity
Prerequisite(s): ENVE 3001, ENVE 3002.
Lectures three hours a week, problem analysis one hour a week, laboratory three hours alternate weeks.

ENVE 4006 [0.5 credit]
Contaminant Hydrogeology
Theory of flow through porous media. Site investigation: geology, hydrology and chemistry. Contaminant transport. Unsaturated and multiphase flow. Numerical modeling. Site remediation and remediation technologies. Prerequisite(s): ENVE 3004 and MAAE 2300. Additional recommended background: ENVE 3003. Also offered at the graduate level, with different requirements, as ENVE 5301/EVG 7301, for which additional credit is precluded.
Lectures three hours a week, problem analysis one and a half hours a week.

ENVE 4101 [0.5 credit]
Waste Management
Municipal, hazardous, and mine waste management. Waste composition and potential impacts, collection and transport, recycling and reuse, biological and thermal treatments, isolation. Integrated waste management planning. Prerequisite(s): ENVE 3001, ENVE 3002 and ENVE 3004. Also offered at the graduate level, with different requirements, as ENVE 5203/EVG 5203, for which additional credit is precluded.
Lectures three hours a week, problem analysis one hour a week.

ENVE 4104 [0.5 credit]
Environmental Planning and Impact Assessment
Prerequisite(s): ENVE 3004 and fourth-year status in Engineering.
Lectures three hours a week, problem analysis three hours alternate weeks.

ENVE 4105 [0.5 credit]
Green Building Design
Concepts, calculations, modeling; design of green buildings and their components; sustainable sites and landscaping; passive design; building envelope; building materials; daylighting; heating, cooling, and ventilation; building-integrated renewable energy systems; indoor environmental quality; overview of building standards and codes. Prerequisite(s): fourth-year status in B.Eng. Architectural Conservation and Sustainability Engineering, Environmental Engineering or Civil Engineering or fourth-year standing in B.A.S. concentration in Conservation and Sustainability.
Lectures three hours a week, problem analysis one and a half hours per week.

ENVE 4106 [0.5 credit]
Indoor Environmental Quality
Indoor environmental quality (air quality, thermal, visual, and acoustic comfort); physical and chemical parameters for characterization. Types and sources of indoor air pollution and discomfort; measurement techniques. Heating, ventilation, air conditioning, lighting practices and issues. Modelling of and design for indoor environmental quality. Prerequisite(s): fourth year status in B.Eng. Architectural Conservation and Sustainability Engineering or B.Eng. Environmental Engineering or fourth year standing in B.A.S. concentration in Conservation and Sustainability. Also offered at the graduate level, with different requirements, as ENVE 5104, for which additional credit is precluded.
Lectures three hours a week, problem analysis and laboratory three hours alternate weeks.

ENVE 4107 [0.5 credit]
Building Services Engineering
This course provides details on how buildings are designed and operated. The materials provide foundational knowledge to understand building services: mechanical, electrical, plumbing systems with associated controls. Prerequisite(s): CIVE 3209, ENVE 4105 (may be taken concurrently).
Lecture three hours per week, problem analysis three hours every other week.
ENVE 4200 [0.5 credit]
Climate Change and Engineering
Survey of the physical science of climate change, impacts on the built environment, and climate adaptation in engineering. Greenhouse gases, global warming, paleoclimatology, and Earth system responses. Climate change impacts on structural, water, transportation, and energy systems. Climate vulnerability assessment, examples of design adaptation.  
Prerequisite(s): Fourth-year status in Engineering. Also offered at the graduate level, with different requirements, as ENVE 5200, for which additional credit is precluded. Lecture three hours per week, problem analysis three hours every other week.

ENVE 4907 [1.0 credit]
Engineering Research Project
A research project in engineering analysis, design or development carried out by individual students or small teams, for an opportunity to develop initiative, self-reliance, creative ability and engineering judgment and is normally intended for students with high CGPAs and an interest in graduate studies. Includes: Experiential Learning Activity  
Precludes additional credit for ENVE 4917. Prerequisite(s): fourth-year status in Engineering and permission of the department.

ENVE 4917 [0.5 credit]
Undergraduate Directed Study
Student carries out a study, analysis, and solution of an engineering problem which results in a written final report. Carried out under close supervision of a faculty member. Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student. Includes: Experiential Learning Activity  
Precludes additional credit for ENVE 4907. Prerequisite(s): permission of the Department and completion of, or concurrent registration in, ENVE 4918. Self study.

ENVE 4918 [1.0 credit]
Design Project
Teams of students develop professional level experience through a design project that incorporates fundamentals acquired in previous mathematics, science, engineering, and complementary studies courses. A final report and oral presentations are required. Includes: Experiential Learning Activity  
Prerequisite(s): ECOR 3800 and fourth-year Status in Engineering. Certain projects may have additional requirements. Lectures two hours alternate weeks, problem analysis three hours a week.

Mechanical Engineering (MECH) Courses

MECH 3002 [0.5 credit]
Machine Design and Practice
The design of mechanical machine elements is studied from theoretical and practical points of view. Topics covered include: design factors, fatigue, and discrete machine elements. Problem analysis emphasizes the application to practical mechanical engineering problems. Includes: Experiential Learning Activity  
Prerequisite(s): MAAE 2001 and MAAE 3202. Lectures three hours a week, problem analysis three hours a week.

MECH 3310 [0.5 credit]
Biofluid Mechanics
Applications of fundamental fluid mechanics to human circulatory and respiratory systems. Basic viscous flow theory including: blood flow in the heart and large arteries, air flow in extra-thoracic (nose-mouth throat) airways and lungs. Includes: Experiential Learning Activity  
Prerequisite(s): MATH 2004 and MAAE 2300. Lectures three hours per week, laboratories or tutorials three hours per week.

MECH 3700 [0.5 credit]
Principles of Manufacturing
Prerequisite(s): MAAE 2700. Lectures three hours a week, problem analysis and laboratories three hours a week on alternate weeks.

MECH 3710 [0.5 credit]
Biomaterials
Prerequisite(s): MAAE 2700. Lectures three hours per week, laboratories and problem analysis three hours per week.
MECH 4003 [0.5 credit]
Mechanical Systems Design
Design of mechanical systems: establishing design criteria, conceptual design, design economics, value analysis, synthesis and optimization. Mechanical elements/systems: gear and flexible drive systems, fluid power systems. These elements are utilized in group design projects.
Includes: Experiential Learning Activity
Prerequisite(s): MECH 3002 and fourth-year status in Engineering.
Lectures three hours a week, problem analysis three hours a week.

MECH 4006 [0.5 credit]
Vehicle Engineering I
The course emphasizes the engineering and design principles of road transport vehicles. Topics to be covered include: performance characteristics, handling behaviour and ride quality of road vehicles.
Prerequisite(s): MAAE 3004 and fourth-year status in Engineering.
Lectures three hours a week.

MECH 4007 [0.5 credit]
Vehicle Engineering II
Engineering and design principles of off-road vehicles and air cushion technology. Topics include: mechanics of vehicle-terrain interaction - terramechanics, performance characteristics of off-road vehicles, steering of tracked vehicles, air cushion systems and their performance, applications of air cushion technology to transportation.
Prerequisite(s): MAAE 3004 and fourth-year status in Engineering.
Lectures three hours a week.

MECH 4013 [0.5 credit]
Biomedical Device Design
Includes: Experiential Learning Activity
Prerequisite(s): MECH 3710, MAAE 3202, and MECH 4210 and fourth-year status in Engineering.
Lectures three hours per week, laboratories or tutorial three hours per week.

MECH 4101 [0.5 credit]
Mechanics of Deformable Solids
Course extends the student's ability in design and stress analysis. Topics include: introductory continuum mechanics, theory of elasticity, stress function approach, Lamé and Mitchell problems, stress concentrations, thermoelasticity and plasticity.
Prerequisite(s): MAAE 3202 and fourth-year status in Engineering.
Lectures three hours a week.

MECH 4102 [0.5 credit]
Corrosion and Corrosion Control
Prerequisite(s): Fourth-year status in Engineering.
Lectures three hours a week.

MECH 4103 [0.5 credit]
Fatigue and Fracture Analysis
Elastic and elasto-plastic fracture mechanics. Fatigue design methods, fatigue crack initiation and growth Paris law and strain-life methods. Fatigue testing, scatter, mean stress effects and notches. Welded and built up structures, real load histories and corrosion fatigue. Damage tolerant design and fracture control plans.
Prerequisite(s): MAAE 3202 and fourth-year status in Engineering.
Lectures three hours a week.

MECH 4104 [0.5 credit]
Vibration Analysis
Prerequisite(s): MAAE 3004 and fourth-year status in Engineering.
Lectures three hours per week.

MECH 4105 [0.5 credit]
Introduction to Nuclear Engineering
Prerequisite(s): Fourth-year status in Engineering.
Lectures three hours per week.

MECH 4106 [0.5 credit]
Nuclear Power Plant Design
Prerequisite(s): Fourth-year status in Engineering.
Lectures three hours per week.
MECH 4107 [0.5 credit]
Internal Combustion Engines
This course explores the design process of an internal combustion engine including: Internal Aerodynamics, Combustion, Rotating and Reciprocating Components, Structures, Control Systems, Manufacturing and Testing Methods. Students will design/optimize an engine component utilizing industry standard Ricardo Wave simulation software.
Prerequisite(s): Fourth-year status in Engineering.
Lecture three hours per week.

MECH 4210 [0.5 credit]
Biomechanics
The biomechanics of biological systems; muscles and movement, nerves and motor control. Measurements of motion, strain and neural signals. The hand and manipulation; locomotion and the leg.
Includes: Experiential Learning Activity
Prerequisite(s): MAAE 2101 and fourth-year status in Engineering.
Lectures three hours per week, laboratories or tutorials three hours per week.

MECH 4305 [0.5 credit]
Fluid Machinery
Prerequisite(s): (MAAE 3300 or MECH 3310) and fourth-year status in Engineering.
Lectures three hours a week.

MECH 4401 [0.5 credit]
Power Plant Analysis
Criteria of merit; selection of power plant for transportation and power generation applications; interrelation among mechanical, thermodynamic and aerodynamic design processes; jet propulsion, turbojets and turbosfans; alternative proposals for vehicular power plant; combined cycle applications.
Precludes additional credit for AERO 4402.
Prerequisite(s): MAAE 2400 and fourth-year status in Engineering.
Lectures three hours a week.

MECH 4403 [0.5 credit]
Power Generation Systems
Includes: Experiential Learning Activity
Precludes additional credit for SREE 4001.
Prerequisite(s): MAAE 2300 and MAAE 2400 and fourth-year status in Engineering.
Lectures three hours a week and problem analysis three hours per week.

MECH 4406 [0.5 credit]
Heat Transfer
Precludes additional credit for AERO 4446.
Prerequisite(s): MAAE 2400 and (MAAE 3300, MECH 3310, or (ENVE 3001 and permission of the Department of Mechanical and Aerospace Engineering)) and fourth-year status in Engineering.
Lectures three hours a week. Problem analysis and laboratories three hours a week.

MECH 4407 [0.5 credit]
Heating and Air Conditioning
Prerequisite(s): MAAE 2400 and fourth-year status in Engineering.
Lectures three hours a week.

MECH 4408 [0.5 credit]
Thermofluids and Energy Systems Design
Integration of fluid mechanics, thermodynamics, and heat transfer for design of energy conversion systems. Chemical kinetics and mass transfer. Efficient combustion, fuel cells and batteries. Efficient operation and design of engines, power generators, boilers, furnaces, incinerators, and co-generation systems. Emerging energy systems.
Prerequisite(s): MAAE 3400 and fourth-year status in Engineering.
Lectures three hours per week.
MECH 4501 [0.5 credit]
State Space Modeling and Control
Review of matrices. Geometric structure and dynamics of linear systems. Controllability and observability. Pole placement design of controllers and observers. Design of regulator and servo systems. Transmission zeros. Eigenstructure assignment. Relationship to frequency or classical control techniques. Computer solutions using MATLAB. Applications. Precludes additional credit for SYSC 5502. Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourth-year status in Engineering. Lectures three hours a week.

MECH 4503 [0.5 credit]
An Introduction to Robotics

MECH 4604 [0.5 credit]
Finite Element Methods
Finite element methodology with emphasis on applications to stress analysis, heat transfer and fluid flow using the simplest one- and two-dimensional elements. Direct equilibrium, variational and Galerkin formulations. Computer programs and practical applications. Higher order elements. Prerequisite(s): MAAE 3202 and fourth-year status in Engineering. Lectures three hours a week.

MECH 4704 [0.5 credit]
Integrated Manufacturing - CIMS
Overview of the topics essential to CIMS including integration of design and assembly techniques, numerical analysis, statistical process control and related production technologies within the manufacturing enterprise. Prerequisite(s): Fourth-year status in Engineering. Also offered at the graduate level, with different requirements, as MECH 5704, for which additional credit is precluded. Lectures three hours a week.

MECH 4705 [0.5 credit]
CAD/CAM
Introduction to contemporary computer aided design and manufacturing (CAD/CAM) Topics covered include mathematical representation, solid modeling, drafting, mechanical assembly mechanism design, (CNC) machining. Current issues such as CAD data exchange standards, rapid prototyping, concurrent engineering, and design for X (DFX) are also discussed. Prerequisite(s): MAAE 2001 and fourth-year status in Engineering. Lectures three hours a week.

MECH 4805 [0.5 credit]
Measurement and Data Systems

MECH 4806 [0.5 credit]
Mechatronics
Introduction to the integration of mechanical, electronic and software components to build mechatronic devices. Mechanical and electrical systems modeling, simulation and implementation. Basic automation and computer requirements. Design tools and examples of mechatronic applications. Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourth-year status in Engineering. Lectures three hours per week.

MECH 4701 [0.5 credit]
State Space Modeling and Control
Review of matrices. Geometric structure and dynamics of linear systems. Controllability and observability. Pole placement design of controllers and observers. Design of regulator and servo systems. Transmission zeros. Eigenstructure assignment. Relationship to frequency or classical control techniques. Computer solutions using MATLAB. Applications. Precludes additional credit for SYSC 5502. Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourth-year status in Engineering. Lectures three hours a week.

MECH 4703 [0.5 credit]
An Introduction to Robotics

MECH 4604 [0.5 credit]
Finite Element Methods
Finite element methodology with emphasis on applications to stress analysis, heat transfer and fluid flow using the simplest one- and two-dimensional elements. Direct equilibrium, variational and Galerkin formulations. Computer programs and practical applications. Higher order elements. Prerequisite(s): MAAE 3202 and fourth-year status in Engineering. Lectures three hours a week.

MECH 4704 [0.5 credit]
Integrated Manufacturing - CIMS
Overview of the topics essential to CIMS including integration of design and assembly techniques, numerical analysis, statistical process control and related production technologies within the manufacturing enterprise. Prerequisite(s): Fourth-year status in Engineering. Also offered at the graduate level, with different requirements, as MECH 5704, for which additional credit is precluded. Lectures three hours a week.

MECH 4705 [0.5 credit]
CAD/CAM
Introduction to contemporary computer aided design and manufacturing (CAD/CAM) Topics covered include mathematical representation, solid modeling, drafting, mechanical assembly mechanism design, (CNC) machining. Current issues such as CAD data exchange standards, rapid prototyping, concurrent engineering, and design for X (DFX) are also discussed. Prerequisite(s): MAAE 2001 and fourth-year status in Engineering. Lectures three hours a week.

MECH 4805 [0.5 credit]
Measurement and Data Systems

MECH 4806 [0.5 credit]
Mechatronics
Introduction to the integration of mechanical, electronic and software components to build mechatronic devices. Mechanical and electrical systems modeling, simulation and implementation. Basic automation and computer requirements. Design tools and examples of mechatronic applications. Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourth-year status in Engineering. Lectures three hours per week.

MECH 4701 [0.5 credit]
State Space Modeling and Control
Review of matrices. Geometric structure and dynamics of linear systems. Controllability and observability. Pole placement design of controllers and observers. Design of regulator and servo systems. Transmission zeros. Eigenstructure assignment. Relationship to frequency or classical control techniques. Computer solutions using MATLAB. Applications. Precludes additional credit for SYSC 5502. Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourth-year status in Engineering. Lectures three hours a week.

MECH 4703 [0.5 credit]
An Introduction to Robotics

MECH 4604 [0.5 credit]
Finite Element Methods
Finite element methodology with emphasis on applications to stress analysis, heat transfer and fluid flow using the simplest one- and two-dimensional elements. Direct equilibrium, variational and Galerkin formulations. Computer programs and practical applications. Higher order elements. Prerequisite(s): MAAE 3202 and fourth-year status in Engineering. Lectures three hours a week.

MECH 4704 [0.5 credit]
Integrated Manufacturing - CIMS
Overview of the topics essential to CIMS including integration of design and assembly techniques, numerical analysis, statistical process control and related production technologies within the manufacturing enterprise. Prerequisite(s): Fourth-year status in Engineering. Also offered at the graduate level, with different requirements, as MECH 5704, for which additional credit is precluded. Lectures three hours a week.

MECH 4705 [0.5 credit]
CAD/CAM
Introduction to contemporary computer aided design and manufacturing (CAD/CAM) Topics covered include mathematical representation, solid modeling, drafting, mechanical assembly mechanism design, (CNC) machining. Current issues such as CAD data exchange standards, rapid prototyping, concurrent engineering, and design for X (DFX) are also discussed. Prerequisite(s): MAAE 2001 and fourth-year status in Engineering. Lectures three hours a week.

MECH 4805 [0.5 credit]
Measurement and Data Systems

MECH 4806 [0.5 credit]
Mechatronics
Introduction to the integration of mechanical, electronic and software components to build mechatronic devices. Mechanical and electrical systems modeling, simulation and implementation. Basic automation and computer requirements. Design tools and examples of mechatronic applications. Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourth-year status in Engineering. Lectures three hours per week.

Mechanical and Aerospace Engineering (MAAE) Courses
MAAE 2001 [0.5 credit]
Engineering Graphical Design
Engineering drawing techniques; fits and tolerances; working drawings; fasteners. Elementary descriptive geometry; true length, true view, and intersection of geometric entities; developments. Assignments will make extensive use of Computer-Aided Design (CAD) and will include the production of detail and assembly drawings from actual physical models. Includes: Experiential Learning Activity Also listed as AERO 2001. Prerequisite(s): Second-year status in Engineering. Lectures and tutorials two hours a week, laboratory four hours a week.
MAAE 2101 [0.5 credit]
Engineering Dynamics
Review of kinematics and kinetics of particles: rectilinear and curvilinear motions; Newton's second law; energy and momentum methods. Kinematics and kinetics of rigid bodies: plane motion of rigid bodies; forces and accelerations; energy and momentum methods. Includes: Experiential Learning Activity
Precludes additional credit for CIVE 2101.
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, problem analysis three hours a week.

MAAE 2202 [0.5 credit]
Mechanics of Solids I
Review of Principles of Statics; friction problems; Concepts of stress and strain at a point; statically determinate and indeterminate stress systems; torsion of circular sections; bending moment and shear force diagrams; stresses and deflections in bending; buckling instability. Includes: Experiential Learning Activity
Precludes additional credit for CIVE 2200.
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, problem analysis and laboratory three hours a week.

MAAE 2300 [0.5 credit]
Fluid Mechanics I
Fluid properties. Units. Kinematics, dynamics of fluid motion: concepts of streamline, control volume, steady and one-dimensional flows; continuity, Bernoulli, steady flow energy, momentum, moment of momentum equations; applications. Fluid statics; pressure distribution in fluid at rest; hydrostatic forces on plane and curved surfaces; buoyancy.
Includes: Experiential Learning Activity
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours a week.

MAAE 2400 [0.5 credit]
Thermodynamics and Heat Transfer
Includes: Experiential Learning Activity
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours a week.

MAAE 2700 [0.5 credit]
Engineering Materials
Materials (metals, alloys, polymers) in engineering service; relationship of interatomic bonding, crystal structure and defect structure (vacancies, dislocations) to material properties; polymers, phase diagrams and alloys; microstructure control (heat treatment) and mechanical properties; material failure; corrosion.
Includes: Experiential Learning Activity
Precludes additional credit for CIVE 2700.
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, problem analysis and laboratory three hours a week.

MAAE 3004 [0.5 credit]
Dynamics of Machinery
Includes: Experiential Learning Activity
Prerequisite(s): MAAE 2101 and MATH 1005.
Lectures three hours a week, problem analysis and laboratories two hours a week.

MAAE 3202 [0.5 credit]
Mechanics of Solids II
Stress and strain transformations: torsion of non-circular sections; unsymmetric bending and shear centre; energy methods; complex stresses and criteria of yielding; elementary theory of elasticity; axisymmetric deformations. Includes: Experiential Learning Activity
Precludes additional credit for CIVE 3202.
Prerequisite(s): MAAE 2202 and MATH 1005 (co-req).
Lectures three hours a week, problem analysis and laboratory three hours a week.

MAAE 3300 [0.5 credit]
Fluid Mechanics II
Includes: Experiential Learning Activity
Prerequisite(s): MATH 2004 and MAAE 2300.
Lectures three hours a week, problem analysis and laboratory three hours a week.
MAAE 3400 [0.5 credit]
Applied Thermodynamics
Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 and MAAE 2400.
Lectures three hours a week, problem analysis and laboratories three hours a week.

MAAE 3500 [0.5 credit]
Feedback Control Systems
Includes: Experiential Learning Activity
Precludes additional credit for MAAE 4500 (no longer offered), SYSC 4505.
Prerequisite(s): MATH 3705 and (SYSC 3600 or SYSC 3610).
Lectures three hours a week, problem analysis and laboratories three hours a week.

MAAE 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

MAAE 4102 [0.5 credit]
Materials: Strength and Fracture
Analysis and prevention of failures in metals; plasticity analysis and plastic collapse; micro-mechanisms of fracture, conditions leading to crack growth and transition temperature effects, fracture mechanics, fatigue, environmentally assisted cracking, non-destructive evaluation and testing.
Prerequisite(s): MAAE 2202 and MAAE 2700 and fourth-year status in Engineering.
Lectures three hours a week.

MAAE 4904 [0.5 credit]
Special Topics: Mechanical and Aerospace Engineering
Selected advanced topics of interest to Aerospace and Mechanical Engineering students, subject to the discretion of the Faculty of Engineering and Design.
Prerequisite(s): permission of department.
Lectures three hours a week.

MAAE 4906 [0.5 credit]
Special Topics: Mech and Aero Eng.
At the discretion of the Faculty, a course may be offered that deals with selected advanced topics of interest to Aerospace and Mechanical Engineering students.
Prerequisite(s): permission of the Department.

MAAE 4907 [1.0 credit]
Engineering Design Project
Team project in the design of an aerospace, biomedical, mechanical, or sustainable energy system. Opportunity to develop initiative, engineering judgement, self-reliance, and creativity in a team environment. Results submitted in a comprehensive report as well as through formal oral presentations.
Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year status in engineering and (completion of or concurrent registration in AERO 4003, AERO 4842, MECH 4003, MECH 4013, or SREE 4001, or permission of Department). Certain projects may have additional prerequisites.

MAAE 4908 [0.5 credit]
Undergraduate Directed Study
Study, analysis, and solution of an engineering problem. Results presented in the form of a written report. Carried out under the close supervision of a faculty member.
Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the Department and completion of, or concurrent registration in, MAAE 4907.

Sustainable and Renewable Energy (SREE) Courses

SREE 1000 [0.0 credit]
Introduction to Sustainable Energy
Prerequisite(s): registration in Sustainable and Renewable Energy Engineering.
Lectures one hour per week.
SREE 3001 [0.5 credit]  
**Sustainable and Renewable Energy Sources**  
Primary energy sources and the pathways to use.  
Renewables: photovoltaic, solar-thermal, hydropower, geothermal, tidal. Fossil fuels and nuclear. Terrestrial, thermodynamic and electrical limitations.  
Includes: Experiential Learning Activity  
Prerequisite(s): ENVE 2001 and MAAE 2300 and (ELEC 3605 or ELEC 2501 or fourth-year status in Environmental Engineering).  
Lectures three hours per week, laboratories/problem analysis one hour per week.

SREE 3002 [0.5 credit]  
**Electricity: Use, Distribution, Integration of Distributed Generation**  
Electricity use in Ontario: rates, government incentives, smart use. Electricity Distribution: topology, reliability, load characteristics, voltage regulation, power loss, capacitors, economics of optimum choice, system protection.  
Distributed Generation: guides and regulations, case study.  
Includes: Experiential Learning Activity  
Prerequisite(s): SREE 3001, ELEC 4602 and (ELEC 2501 or ELEC 3605).  
Lectures three hours per week, laboratories three hours per week alternate weeks.

SREE 3003 [0.5 credit]  
**Sustainable and Renewable Electricity Generation**  
Power system structures; photovoltaic (PV) cell model, PV current-voltage curves, maximum power point tracking, grid-connected PV systems; power flow of wind generation, grid connection of wind generator; energy storage classification, battery equivalent circuit model, battery charging and discharging; renewable generation; feed-in tariff program.  
Includes: Experiential Learning Activity  
Prerequisite(s): SREE 3001, ELEC 4602 and (ELEC 2501 or ELEC 3605).  
Lectures three hours per week, laboratories three hours per week alternate weeks.

SREE 4001 [0.5 credit]  
**Efficient Energy Conversion**  
Comparative analysis of raw material, energy, or product transport. Life-cycle analysis.  
Includes: Experiential Learning Activity  
Prerequisite(s): MAAE 2300, MAAE 2400 and fourth year status in Sustainable & Renewable Energy Engineering.  
Lectures three hours per week, laboratories/problem analysis three hours per week.

SREE 4002 [0.5 credit]  
**The Energy Economy, Reliability and Risk**  
Interrelationship between energy and economic policy and regulations. Reliability of energy supply systems. Risk analysis and its application to the generation, distribution and environmental impacts of energy. Risks analysis and management associated with natural and human and regulatory influences. Environmental and public health risk analysis.  
Prerequisite(s): fourth-year status in Engineering.  
Lectures three hours per week.

SREE 4907 [1.0 credit]  
**Energy Engineering Project**  
Student teams develop professional-level experience by applying, honing, integrating and extending previously acquired knowledge in a major design project. Lectures are devoted to discussing project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.  
Includes: Experiential Learning Activity  
Prerequisite(s): SREE 3002 and SREE 3003, fourth-year status in Sustainable and Renewable Energy Engineering and ECON 4995 (may be taken concurrently).  
Certain projects may have additional prerequisites or corequisites.  
Lecture one hour a week, laboratory seven hours a week.

**Systems and Computer Engineering (SYSC) Courses**

Note: the Departments of Systems and Computer Engineering and Electronics offer courses in: Biomedical and Electrical Engineering, Communications Engineering, Computer Systems Engineering, Electrical Engineering, Software Engineering and Engineering Physics.

SYSC 1005 [0.5 credit]  
**Introduction to Software Development**  
Software development as an engineering discipline, using a modern programming language, Language syntax. Algorithm design. Tracing and visualizing program execution. Testing and debugging. Program style, documentation, reliability. Lab projects are drawn from a variety of application domains: digital image manipulation, computer games, robotics.  
Includes: Experiential Learning Activity  
Prerequisite(s): SYSC 1005.  
Lectures three hours a week, laboratory three hours a week.
SYSC 2001 [0.5 credit]
Computer Systems Foundations
Computer architecture and organization: CPU, cache, memory, input/output, bus structures, interrupts; computer arithmetic: integer and floating point; CPU: instruction sets, addressing modes, instruction encoding. Input/output: programmed, interrupt-driven, block-oriented. Examples from several modern processor families. Includes: Experiential Learning Activity
Prerequisite(s): ECOR 1606 or SYSC 1005. Additional recommended background: SYSC 2006. Lectures three hours a week, laboratory two hours a week.

SYSC 2003 [0.5 credit]
Introductory Real-Time Systems
Prerequisite(s): SYSC 2001 and SYSC 2006. Lectures three hours a week, laboratory two hours a week.

SYSC 2004 [0.5 credit]
Object-Oriented Software Development
Designing and implementing small-scale programs as communities of collaborating objects, using a dynamically-typed or statically-typed programming language. Fundamental concepts: classes, objects, encapsulation, information hiding, inheritance, polymorphism. Iterative, incremental development and test-driven development. Includes: Experiential Learning Activity
Prerequisite(s): SYSC 2006 or permission of the department, and second-year status in Engineering. Lectures three hours a week, laboratory two hours a week.

SYSC 2006 [0.5 credit]
Foundations of Imperative Programming
Prerequisite(s): Second-year status in Engineering. Lectures three hours a week, laboratory two hours a week.
SYSC 2320 [0.5 credit]
Introduction to Computer Organization and Architecture
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 2001 and SYSC 3006.
Prerequisite(s): SYSC 2310 and second-year status in Engineering.
Lectures three hours a week, laboratory three hours a week.

SYSC 2510 [0.5 credit]
Probability, Statistics and Random Processes for Engineers
Includes: Experiential Learning Activity
Prerequisite(s): MATH 1004 and MATH 1104, and second-year status in Engineering.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3006 [0.5 credit]
Computer Organization
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 2001, SYSC 2003, SYSC 2320 and SYSC 3310. May not be taken for credit by students in Computer Systems Engineering, Communications Engineering, or Software Engineering.
Prerequisite(s): SYSC 2006 and ELEC 2607.
Lectures three hours a week, laboratory two hours a week.

SYSC 2310 [0.5 credit]
Computer Systems Development Project
Development of expertise in designing, implementing and testing industrial-quality embedded systems through team projects. Applying modern programming languages, system design practices, current development processes (refactoring, iterative and incremental development) as well as current team-management tools (communication, version control) to medium-scale projects.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 2404, SYSC 2010, SYSC 2101 (no longer offered), and SYSC 3110.
Prerequisite(s): SYSC 2100 and either SYSC 2003 or SYSC 3310 (may be taken concurrently), and enrolment in Computer Systems Engineering.
Lectures two hours a week, laboratory three hours a week.

SYSC 3020 [0.5 credit]
Introduction to Software Engineering
Introduction to software engineering principles, software development life-cycles. Modelling in software engineering. Current techniques, notations, methods, processes and tools used in software engineering. UML modelling. Introduction to software quality, software verification and validation, software testing.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3100, SYSC 3120, SYSC 4120 and COMP 3004.
Prerequisite(s): SYSC 2004 and (SYSC 2006 or SYSC 2002).
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3101 [0.5 credit]
Programming Languages
Principles underlying different kinds of programming languages (procedural, functional, logic programming) and their semantics. Overview of machinery needed for language support (compilers, interpreters and run-time systems).
Includes: Experiential Learning Activity
Precludes additional credit for COMP 3007.
Prerequisite(s): SYSC 2004.
Lectures three hours a week, laboratory three hours alternate weeks.
SYSC 3110 [0.5 credit]
Software Development Project
Development of expertise in designing, implementing and testing maintainable, reusable software through team projects. Applying modern programming languages, design patterns, frameworks, UML and modern development processes (detection of olfactible source code defects, refactoring, iterative and incremental development, version control techniques) to medium-scale projects.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 2404, SYSC 2010, SYSC 2101 and SYSC 3010.
Prerequisite(s): SYSC 2004 and SYSC 2100, and enrolment in Software Engineering.
Lectures two hours a week, laboratory three hours a week.

SYSC 3120 [0.5 credit]
Software Requirements Engineering
Current techniques, notations, methods, processes and tools used in Requirements Engineering. Requirements elicitation, negotiation, modeling requirements, management, validation. Skills needed for Requirements Engineering and the many disciplines on which it draws. Requirements analysis: domain modeling, modeling object interactions; UML modeling. Introduction to software development processes.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3020 and COMP 3004.
Prerequisite(s): SYSC 2004 and enrolment in Software Engineering.
Lectures three hours a week, laboratory three hours a week alternate weeks.

SYSC 3200 [0.5 credit]
Industrial Engineering
Techniques of operations research for decision-making in complex engineering systems. Linear programming, network models, PERT, integer programming, dynamic programming, queuing systems and inventory models. Problem solving is emphasized.
Includes: Experiential Learning Activity
Precludes additional credit for BUSI 2300, ECON 4004, or MATH 3801.
Prerequisite(s): MATH 1004 and MATH 1104, and second-year status in Engineering.
Lectures three hours a week, laboratory/problem analysis one and a half hours per week.

SYSC 3203 [0.5 credit]
Bioelectrical Systems
Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 and (ELEC 2507 or ELEC 3605), and enrolment in Biomedical and Electrical Engineering or Biomedical and Mechanical Engineering, and second-year status in Engineering.
Lectures three hours a week, laboratory three hours a week.

SYSC 3303 [0.5 credit]
Real-Time Concurrent Systems
Principles and practice of a systems engineering approach to the development of software for real-time, concurrent, distributed systems. Designing to achieve concurrency, performance, and robustness, using visual notations. Converting designs into programs. Introduction to hard real-time systems. Team project.
Includes: Experiential Learning Activity
Prerequisite(s): for students in the Faculty of Engineering and Design: (SYSC 2003 or SYSC 3310) and SYSC 2004.
For students in Computer Science: COMP 2401 and COMP 2402.
Lectures three hours a week, laboratory two hours a week.

SYSC 3310 [0.5 credit]
Introduction to Real-Time Systems
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 2003, SYSC 3006.
Prerequisite(s): SYSC 2006 with a minimum grade of C- and SYSC 2320.
Lectures three hours a week, laboratory two hours a week.

SYSC 3320 [0.5 credit]
Computer Systems Design
System on Chip (SoC)-based computer system design. SoC internal organization. Cache memory. Interfacing: external memory, hardware subsystems. Direct memory access. Floating point units. Introduction to field programmable gate arrays.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3601 and ELEC 4601.
Prerequisite(s): SYSC 3310 and third year status in Computer Systems Engineering, or permission of the Department.
Lectures three hours a week, laboratory three hours alternate weeks.
SYSC 3500 [0.5 credit]
Signals and Systems
Signals: energy and power signals, discrete-time and continuous. Linear systems and convolution. Fourier Transform; complex Fourier series; signal spectral properties and bandwidth. Laplace transform and transient analysis. Transfer functions, block diagrams. Baseband and passband signals, with applications to communications systems.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3600 and SYSC 3610.
Prerequisite(s): MATH 1005 and enrolment in Communications Engineering, and second-year status in Engineering.
Lectures three hours a week, problem analysis three hours alternate weeks.

SYSC 3501 [0.5 credit]
Communication Theory
Review of signals, linear systems and Fourier theory; signal bandwidth and spectra; digital waveform coding; introduction to analog and digital modulation systems; synchronization; characterization and effects of noise; link budgets; communications media and circuits; applications to current communications systems.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3503.
Prerequisite(s): SYSC 3600 or SYSC 3610.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3503 [0.5 credit]
Communication Theory II
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3501 or SYSC 4600.
Prerequisite(s): SYSC 3500 and (STAT 2605 or SYSC 2510).
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3600 [0.5 credit]
Systems and Simulation
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3500 or SYSC 3610.
Prerequisite(s): MATH 1005 and second-year status in Engineering.
Lectures three hours a week, laboratory three hours a week.

SYSC 3601 [0.5 credit]
Microprocessor Systems
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3320 or ELEC 4601.
Prerequisite(s): ELEC 2607, and SYSC 2003 or permission of the department.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3610 [0.5 credit]
Biomedical Systems, Modeling, and Control
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3500 or SYSC 3600.
Prerequisite(s): MATH 1005 and enrolment in Biomedical and Electrical Engineering or Biomedical and Mechanical Engineering, and second-year status in Engineering.
Lectures three hours a week, laboratory three hours a week.

SYSC 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

SYSC 4001 [0.5 credit]
Operating Systems
Introduction to operating system principles. Processes and threads. CPU scheduling. Managing concurrency: mutual exclusion and synchronization, deadlock and starvation. Managing memory and input/output. Concurrent programming, including interprocess communication in distributed systems.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3001 and COMP 3000.
Prerequisite(s): SYSC 2006 with a minimum grade of C-.
Lectures three hours a week, laboratory three hours a week.
SYSC 4005 [0.5 credit]
Discrete Simulation/Modeling
Simulation as a problem solving tool. Random variable
generation, general discrete simulation procedure: event
table and statistical gathering. Analyses of simulation
data: point and interval estimation. Confidence intervals.
Overview of modeling, simulation, and problem solving
using SIMSCRIPT, MODSIM, and other languages.
Includes: Experiential Learning Activity
Prerequisite(s): (ECOR 2050 or SYSC 2510 or STAT 2605
or STAT 3502) and fourth-year status in Engineering, or
permission of the Department.
Also offered at the graduate level, with different
requirements, as SYSC 5001, for which additional credit is
precluded.
Lectures three hours a week, laboratory one hour a week.

SYSC 4006 [0.5 credit]
Introduction to Systems Programming
Introduction to C programming: Data types, flow control,
functions, arrays, pointers, and arithmetic, logical and
bitwise operators. Memory models, collections. Low-level
I/O. Build pipeline (version control, make, preprocessing,
compiling, linking) in Linux. Testing and debugging.
Precludes additional credit for SYSC 2006.
Prerequisite(s): Third-year status in Engineering, or
enrollment in the M.Eng. Program in Electrical & Computer
Engineering.
Lectures three hours a week.

SYSC 4101 [0.5 credit]
Software Validation
Techniques for the systematic testing of software systems.
Software validation and verification, software debugging,
quality assurance, measurement and prediction of
software reliability. Emphasis on the treatment of these
topics in the context of real-time and distributed systems.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 4004.
Prerequisite(s): SYSC 3120 or SYSC 3020.
Lectures three hours a week, laboratory/problem analysis
three hours a week.

SYSC 4102 [0.5 credit]
Performance Engineering
Techniques based on measurements and models, for
predicting and evaluating the performance of computer
systems. Instrumentation. Simple queueing models
and approximations. Techniques for modifying software
designs to improve performance.
Includes: Experiential Learning Activity
Prerequisite(s): (ECOR 2050 or STAT 3502) and
SYSC 4001.
Also offered at the graduate level, with different
requirements, as SYSC 5101, for which additional credit is
precluded.
Lectures three hours a week, laboratory/problem analysis
three hours alternate weeks.

SYSC 4106 [0.5 credit]
The Software Economy and Project Management
Introduction to software project management and
economics; Return on software investments; Software
life cycle; Work breakdown structure, scheduling and
planning; Risk analysis and management; Product size
and cost estimation; Earn value management; Statistical
process control; Managing project team and process
improvement; Bidding and contract types.
Prerequisite(s): SYSC 3120 (may be taken concurrently)
or COMP 3004, and enrolment in Software Engineering or
the Bachelor of Computer Science.
Lectures three hours a week.

SYSC 4111 [0.5 credit]
Formal Methods in Software Engineering
Introduction to formal methods in software engineering
with coverage of propositional and first-order logic (syntax,
semantics, proof theory), formal specification languages,
bounded analysis and validation, formal specification tools,
and model checking with finite-state machines, temporal
logic, and model checking tools.
Prerequisite(s): COMP 1805, SYSC 3120, and
SYSC 4001.
Lectures three hours a week.

SYSC 4120 [0.5 credit]
Software Architecture and Design
Introduction and importance of software architectures and
software system design in software engineering. Current
techniques, modeling notations, methods, processes and
tools used in software architecture and system design.
Software architectures, architectural patterns, design
patterns, software qualities, software reuse.
Includes: Experiential Learning Activity
Precludes additional credit for COMP 3004, SYSC 3020
and SYSC 4800 (no longer offered).
Prerequisite(s): SYSC 3120.
Lectures three hours a week, laboratory three hours
alternate weeks.

SYSC 4201 [0.5 credit]
Ethics, Research Methods and Standards for
Biomedical Engineering
Ethical theories, ethical decision-making, biomedical
research ethics: informed consent, confidentiality,
privacy, research ethics boards; research methods:
hypothesis formulation, data collection, sampling bias,
experimental design, statistical literacy; regulations for
design, manufacture, certification of medical devices;
impact of technology and research (social, political,
financial).
Includes: Experiential Learning Activity
Prerequisite(s): ELEC 3605 or SYSC 3203.
Lectures three hours a week, problem analysis one and a
half hours per week.
SYSC 4202 [0.5 credit]
Clinical Engineering
Overview of the Canadian health care system; brief examples of other countries; clinical engineering and the management of technologies in industrialized and in developing countries; safety, reliability, quality assurance; introduction to biomedical sensor technologies; applications of telemedicine; impact of technology on health care.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Biomedical and Electrical or Biomedical and Mechanical Engineering. Also offered at the graduate level, with different requirements, as BIOM 5406, for which additional credit is precluded.
Lectures three hours a week, problem analysis three hours alternate weeks.

SYSC 4203 [0.5 credit]
Bioinstrumentation and Signals
Bioinstrumentation and biological signals; instrumentation systems, noise, electrical safety, and biocompatibility; bioelectric signals; biopotential electrodes: material properties, selection, and fabrication; measurement of flow and pressure; data acquisition; signal processing; biomedical imaging technologies; performance and characteristics of bioamplifier systems; major physiological systems and associated measurements.
Includes: Experiential Learning Activity
Prerequisite(s): (SYSC 3600 or SYSC 3500 or SYSC 3610) and (ELEC 2507 or ELEC 3605 or SYSC 3203) and fourth-year status in Biomedical and Electrical Engineering or fourth-year status in Biomedical and Mechanical Engineering.
Lectures three hours a week, laboratory/problem analysis three hours a week.

SYSC 4205 [0.5 credit]
Image Processing for Medical Applications
Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 and fourth-year status in Engineering.
Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

SYSC 4310 [0.5 credit]
Computer Systems Architecture
Includes: Experiential Learning Activity
Prerequisite(s): SYSC 3320, and enrolment in Computer Systems Engineering.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4320 [0.5 credit]
Case Studies in Computer Systems
Examples of several modern computer systems are presented in a computer systems context: system objectives, software and hardware components, interactions. The case studies present computer systems trends emerging in practice.
Prerequisite(s): SYSC 4310, and enrolment in Computer Systems Engineering.
Lectures three hours a week, problem analysis one hour a week.

SYSC 4405 [0.5 credit]
Digital Signal Processing
Includes: Experiential Learning Activity
Prerequisite(s): SYSC 3600 or SYSC 3600 or SYSC 3610. Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4415 [0.5 credit]
Introduction to Machine Learning
Introduction to supervised and unsupervised machine learning (ML), including deeper knowledge of several algorithms of each type. Evaluation and quantification of predictive performance of ML systems. Use of one or more ML development environments.
Prerequisite(s): (ECOR 2050 or STAT 3502 or STAT 2605 or SYSC 2510), SYSC 2006 (with a minimum grade of C-), and third-year status in Engineering.
Lectures three hours a week, problem analysis one hour a week.
SYSC 4502 [0.5 credit]
Communications Software
Communications software architectures, protocols and operating systems. Application layer protocols, APIs and socket programming. P2P algorithms, network virtualization, SDN. Reliable data transfer algorithms, FSM, MSC. Network security. Multimedia applications, RTSP, CDN, DASH, RTP, RTCP. Packet scheduling algorithms, DiffServ, IntServ, RSVP. Traffic classification, cross-layer optimization.
Includes: Experiential Learning Activity
Prerequisite(s): SYSC 2004 and SYSC 4602.
Lectures three hours a week, problem analysis three hours alternate weeks.

SYSC 4504 [0.5 credit]
Fundamentals of Web Development
Includes: Experiential Learning Activity
Precludes additional credit for COMP 2406.
Prerequisite(s): SYSC 2004. Additional recommended background: SYSC 4602 or SYSC 3303.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4505 [0.5 credit]
Automatic Control Systems I
Includes: Experiential Learning Activity
Precludes additional credit for MAAE 3500, MAAE 4500 (no longer offered).
Prerequisite(s): MATH 2004 and (SYSC 3500 or SYSC 3600 or SYSC 3610).
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4507 [0.5 credit]
Computer Systems Architecture
Evolution of computer systems architecture, influences of changing technology, techniques to improve performance, memory hierarchy, hardware accelerators. Instruction level parallelism, pipelining, vector processing, superscalar, out of order execution, speculative execution. Thread level parallelism, multi-core, many-core, heterogeneous systems. Evolution of architectures for specific application domains.
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4310.
Prerequisite(s): ELEC 2607 and (SYSC 2001 or SYSC 3006).
Lectures three hours a week, laboratory/problem analysis one hour a week.

SYSC 4600 [0.5 credit]
Digital Communications
Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3503 and SYSC 4604.
Prerequisite(s): SYSC 3501 and STAT 3502.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4602 [0.5 credit]
Computer Communications
Includes: Experiential Learning Activity
Precludes additional credit for COMP 3203.
Prerequisite(s): ECOR 2050 or SYSC 2510 or STAT 2605 or STAT 3502 (may be taken concurrently), and third-year status in Biomedical and Electrical, Electrical, Communications, Computer Systems, Software, or Sustainable and Renewable Energy Engineering.
Lectures three hours a week, laboratory three hours alternate weeks.
SYSC 4604 [0.5 credit]
Digital Communication Theory
Introduction to information theory, source coding and data compression, Error control coding, Trellis coded modulation, advanced topics of current interest: spread spectrum; digital wireless communications.
Includes: Experiential Learning Activity
Prerequisite(s): SYSC 3503.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4607 [0.5 credit]
Wireless Communications
Wireless radio channel characterization, diversity, equalization; cellular architecture, multiple access principles, spread spectrum systems, radio resource management; examples from modern wireless systems, networks, and standards, including cellular networks, WLANs, ad hoc networks, and satellite systems.
Includes: Experiential Learning Activity
Prerequisite(s): SYSC 3501 or SYSC 3503.
Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4700 [0.5 credit]
Telecommunications Engineering
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Electrical, Computer Systems or Communications Engineering, and (SYSC 3501 or SYSC 3503).
Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

SYSC 4701 [0.5 credit]
Communications Systems Lab
Project-oriented level experience in the design of communication systems to meet user requirements. Lectures on queuing theory and teletraffic analysis; system specification and design: requirements analysis, solution alternatives, evaluation of alternative technologies, design, costing, implementation, test.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Communications Engineering or permission of the department.
Lectures two hours a week, laboratory four hours a week.

SYSC 4805 [0.5 credit]
Computer Systems Design Lab
Project-oriented experience in the design of embedded computer systems. Lectures will discuss practical aspects related to the design and development of embedded systems, starting from sensor data acquisition and processing to decision systems, testing and embedded-system based project management, with practical application examples.
Includes: Experiential Learning Activity
Prerequisite(s): SYSC 3320 or SYSC 3601, and enrolment in Computer Systems Engineering.
Lectures two hours a week, laboratory four hours a week.

SYSC 4806 [0.5 credit]
Software Engineering Lab
Applying the full spectrum of engineering and programming knowledge acquired in the program through team projects in the laboratory. Practice in doing presentations and reviews. Lectures will discuss software engineering issues as they relate to the projects, from a mature point of view.
Includes: Experiential Learning Activity
Prerequisite(s): COMP 3005, SYSC 3110, and enrolment in Software Engineering, or permission of the department.
Lectures two hours a week, laboratory four hours a week.

SYSC 4810 [0.5 credit]
Introduction to Network and Software Security
Fundamental concepts, terminologies, and theories of computer security; principles underlying common security controls; various types of threats and attacks on networks and software systems, how they work, and controls for dealing with them; security risk assessment and management; legal and ethical aspects of computer security.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Communications, Computer Systems or Software Engineering.
Lectures three hours a week, problem analysis one and a half hours a week.

SYSC 4906 [0.5 credit]
Special Topics
At the discretion of the Department, a course dealing with selected advanced topics of interest to students in Biomedical and Electrical, Communications, Computer Systems, Electrical, Software Engineering, and Engineering Physics may be offered.
Prerequisite(s): permission of the Department.
SYSC 4907 [1.0 credit]
Engineering Project
Student teams develop professional-level experience by applying previously acquired knowledge to a major design project. Lectures discuss project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Engineering and ECOR 4995 (may be taken concurrently). Certain projects may have additional prerequisites.
Lecture one hour a week, laboratory seven hours a week.

SYSC 4917 [1.0 credit]
Biomedical Engineering Project
Student teams develop professional-level experience by applying previously acquired knowledge to a major design project in biomedical engineering. Lectures discuss project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in Biomedical and Electrical Engineering and ECOR 4995 (may be taken concurrently). Certain projects may have additional prerequisites.
Lecture one hour a week, laboratory seven hours a week.

SYSC 4927 [1.0 credit]
Software Engineering Project
Student teams gain professional-level experience by applying and extending previously acquired knowledge in a major design project in software engineering. Lectures discuss project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Software Engineering and ECOR 4995 (may be taken concurrently). Certain projects may have additional prerequisites.
Lecture one hour a week, laboratory seven hours a week.

SYSC 4937 [1.0 credit]
Communications Engineering Project
Student teams gain professional-level experience by applying and extending previously acquired knowledge in a major design project in communications engineering. Lectures discuss project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Communications Engineering and ECOR 4995 (may be taken concurrently). Certain projects may have additional prerequisites.
Lecture one hour a week, laboratory seven hours a week.

English
This section presents the requirements for programs in:
- English B.A. Honours
- English with Concentration in Creative Writing B.A. Honours
- English with Concentration in Drama Studies B.A. Honours
- English B.A. Combined Honours
- English B.A.
- Specialization in Global Literatures B. G. In. S. Honours
- Stream in Global Literatures B.G.In.S.
- Minor in Drama Studies
- Minor in English Language and Literature
- Minor in Performance in the Public Sphere
- Minor in Professional Writing
- Certificate in Professional Writing
- Post-Baccalaureate Diploma in Professional Writing

Program Requirements

English

B.A. Honours (20.0 credits)

A. Credits Included in the Major CGPA (10.0 credits)

1. 1.0 credit from:
   - FYSM 1004 [1.0] Reading Literatures and Cultures
   or
   - ENGL 1010 [0.5] Writing Essays about Literature
   and one from:
   - ENGL 1009 [0.5] Literature in Global Context
   - ENGL 1100 [0.5] Literature, Law, and Criminality
   - ENGL 1200 [0.5] Literature, Science, and Technology
   - ENGL 1300 [0.5] Literature, Psychology, and the Mind
   - ENGL 1400 [0.5] Literature, Art, and Culture
   - ENGL 1600 [0.5] Literature and Magic
   - ENGL 1700 [0.5] Climate Change and the Humanities

2. 2.0 credits in:
   - ENGL 2802 [1.0] Indigenous and Canadian Literatures
   - ENGL 3106 [1.0] Theories and Critical Practices

3. 2.0 credits in:
   - ENGL 2301 [0.5] Literatures and Cultures 500-1500
   - ENGL 2302 [0.5] Literatures and Cultures 1500-1700
   - ENGL 3500 [0.5] Literatures and Cultures 1700-1900
   - ENGL 3501 [0.5] Literatures and Cultures 1900-Now

4. 1.0 credit in:
   - ENGL 2920 [0.5] Topics in Decolonization and Migration I
   - ENGL 3930 [0.5] Topics in Decolonization and Migration II

5. 0.5 credit from:
   - ENGL 3910 [0.5] From Degree to Career
   - ENGL 3911 [0.5] Cultural Studies

6. 0.5 credit in:
   - ENGL 4950 [0.5] Topics in Postcolonial and Diaspora Lit. and Theory

7. 0.5 credit in ENGL at the 3000-level
### English with Concentration in Creative Writing

**B.A. Honours (20.0 credits)**

#### A. Credits Included in the Major CGPA (11.0 credits)

1. **1.0 credit from:**
   - ENGL 1009 [0.5] Literature in Global Context
   - ENGL 1100 [0.5] Literature, Law, and Criminality
   - ENGL 1200 [0.5] Literature, Science, and Technology
   - ENGL 1300 [0.5] Literature, Psychology, and the Mind
   - ENGL 1400 [0.5] Literature, Art, and Culture
   - ENGL 1600 [0.5] Literature and Magic
   - ENGL 1700 [0.5] Climate Change and the Humanities

2. **2.0 credits in:**
   - ENGL 2802 [1.0] Indigenous and Canadian Literatures
   - ENGL 3106 [1.0] Theories and Critical Practices

3. **2.0 credits in:**
   - ENGL 2301 [0.5] Literatures and Cultures 500-1500
   - ENGL 2302 [0.5] Literatures and Cultures 1500-1700
   - ENGL 3500 [0.5] Literatures and Cultures 1700-1900
   - ENGL 3501 [0.5] Literatures and Cultures 1900-Now

4. **1.0 credit in:**
   - ENGL 2920 [0.5] Topics in Decolonization and Migration I
   - ENGL 3930 [0.5] Topics in Decolonization and Migration II

5. **0.5 credit from:**
   - ENGL 3910 [0.5] From Degree to Career
   - ENGL 3911 [0.5] Cultural Studies

6. **1.0 credit from:**
   - ENGL 2901 [0.5] Writing Poetry
   - ENGL 2903 [0.5] Writing Fiction
   - ENGL 2915 [0.5] Writing Creative Nonfiction

7. **1.0 credit from:**
   - ENGL 3902 [0.5] Writing Screenplays
   - ENGL 3903 [0.5] Writing Fiction (Intermediate)
   - ENGL 3906 [0.5] Writing Popular Fiction
   - ENGL 3915 [0.5] Special Topics in Writing
   - ENGL 3916 [0.5] Spoken Word Poetry Workshop

8. **0.5 credit from:**
   - ENGL 2011 [0.5] Children’s Literature
   - ENGL 2103 [0.5] Introduction to the Novel
   - ENGL 2104 [0.5] Drama Workshop
   - ENGL 2107 [0.5] Science Fiction

#### Total Credits: 20.0

### English with Concentration in Drama Studies

**B.A. Honours (20.0 credits)**

     - HIST 2811 [0.5] Public History from Memory to Museums
     - HIST 3001 [0.5] History at the Movies
Honours Concentration in Drama Studies.

Concentration in Creative Writing or the English BA undergraduate students not in the English BA Honours program. CGPA in the Honours program is at least 7.5. Open to all undergraduate students. Students may declare only one of the Professional Writing Minor in Professional Writing (4.0 credits) and degree must be satisfied.

### Minor in Professional Writing (4.0 credits)

Students may declare only one of the Professional Writing Certificate or the Professional Writing Minor. Open to all undergraduate students.

**Requirements:**

1. **1.0 credit in:**
   - ENGL 1008 [0.5] English Grammar: Fundamentals
   - ALDS 2202 [0.5] Analysis of Written Language Use

2. **1.0 credit in:**
   - ALDS 3402/ENGL 3415 Research and Theory in Workplace Writing
   - ALDS 3414/ENGL 4414 Introduction to Professional Writing and Editing

3. **2.0 credits in:**
   - ENGL 4135 [0.5] Studies in Publishing
   - ALDS 4404/ENGL 4414 Writing and Knowledge-Making in the Professions
   - ALDS 4414/ENGL 4415 Professional Writing I
   - ALDS 4415/ENGL 4416 Professional Writing II

4. The remaining requirements of the major discipline(s) and degree must be satisfied.

**Total Credits** 4.0

### Certificate in Professional Writing (5.0 credits)

Students may declare only one of the Professional Writing Certificate or the Professional Writing Minor. To be taken concurrently with an Honours degree, provided the Major CGPA in the Honours program is at least 7.5. Open to all undergraduate students not in the English BA Honours Concentration in Creative Writing or the English BA Honours Concentration in Drama Studies.

**Graduation**

A candidate for the Certificate in Professional Writing (CPW) must obtain a grade of C or higher in all courses taken at Carleton University under the CPW program.

**Requirements:**

1. **1.0 credit in:**
   - ENGL 1008 [0.5] English Grammar: Fundamentals
   - ALDS 2202 [0.5] Analysis of Written Language Use

2. **3.0 credits in:**
   - ALDS 3402/ENGL 3415 Research and Theory in Workplace Writing
   - ALDS 3414/ENGL 3415 Introduction to Professional Writing and Editing
   - ALDS 4404/ENGL 4415 Writing and Knowledge-Making in the Professions
   - ENGL 4135 [0.5] Studies in Publishing
   - ALDS 4414/ENGL 4415 Professional Writing I
   - ALDS 4415/ENGL 4416 Professional Writing II

3. **1.0 credit from:**
   - ALDS 3401/ENGL 3416 Studies in Writing in Academic Writing
   - ALDS 4403/ENGL 4416 Writing and Knowledge-Making in the Disciplines
   - ALDS 4405/ENGL 4416 Writing in School and the Workplace

**Total Credits** 5.0

### Post-Baccalaureate Diploma in Professional Writing (5.0 credits)

Students applying for admission must have an Honours undergraduate degree with a GPA of 8.0 or higher. The PBD is a one-year, 5.0 credit post-degree option.

**Graduation**

A candidate for the post-baccalaureate diploma must obtain a grade of C- or higher in all courses taken at Carleton University under the post-baccalaureate program.

**Requirements:**

1. **1.0 credit in:**
   - ENGL 1008 [0.5] English Grammar: Fundamentals
   - ALDS 2202 [0.5] Analysis of Written Language Use

2. **3.0 credits in:**
   - ALDS 3402/ENGL 3415 Research and Theory in Workplace Writing
   - ALDS 3414/ENGL 3415 Introduction to Professional Writing and Editing
   - ALDS 4404/ENGL 4415 Writing and Knowledge-Making in the Professions
   - ENGL 4135 [0.5] Studies in Publishing
   - ALDS 4414/ENGL 4415 Professional Writing I
   - ALDS 4415/ENGL 4416 Professional Writing II

3. **1.0 credit from:**
   - ALDS 3401/ENGL 3416 Studies in Writing in Academic Writing
   - ALDS 4403/ENGL 4416 Writing and Knowledge-Making in the Disciplines
   - ALDS 4405/ENGL 4416 Writing in School and the Workplace

**Total Credits** 5.0
B.A. Regulations
The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars
B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.

Breadth Requirement
Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication
American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

Breadth Area 2: Humanities

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Subject codes: AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SRVE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students
Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

Change of Program Within the B.A. Degree
Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific

at Carleton, at the University of Ottawa on the Exchange

Agreement, or at a francophone university on a Letter

Permission. Students planning to take courses on

exchange or on a Letter of Permission should take
careful note of the residence requirement for a minimum

number of Carleton courses in their programs. Consult

Academic Regulations of the University section of this

Calendar for information regarding study on Exchange or

Letter of Permission.

Regulations

Post-Baccalaureate Diploma

In addition to the requirements presented here, students

must satisfy the University regulations (see the Academic

Regulations of the University section of this Calendar).

Definition

A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:

• qualify a candidate for consideration for entry into a

master's program, or

• bring a candidate who already possesses a bachelor's
degree up to a level of a bachelor's degree of 20.0

credits or more in another discipline, or

• provide a candidate who already possesses a twenty-
credit bachelor's degree in the same discipline the

opportunity to bring their previous studies to current

equivalents and/or to examine alternative areas, or

• provide a candidate with a professional undergraduate
credential for which the prior completion of an

undergraduate degree program is appropriate.

Program Requirements

• A post-baccalaureate diploma is normally constituted

of a minimum of 3.0 credits to a maximum of 5.0

credits of advanced undergraduate courses.

• A minimum of 3.0 residency credits counting toward

the post-baccalaureate diploma.

English as a Second Language Requirement

In addition to the program requirements, completion of

English as a Second Language (ESLA) courses may

be required from the following sequence: ESLA 1300,

ESLA 1500, ESLA 1900, ESLA 1905. No credits from this

sequence will be counted toward the post-baccalaureate
diploma.

Continuation

All post-baccalaureate diploma students are expected to

complete their diploma requirements within two calendar

years after the date of initial registration. After this period

student may be withdrawn.

Graduation

• A candidate for a post-baccalaureate diploma must

have an overall CGPA of at least 6.5 to graduate.

• A candidate for a post-baccalaureate diploma must

obtain a grade of C- or higher in each course taken in

fulfillment of the program requirements.

• Students should consult with the Department, School

or Institute when planning their diploma and selecting
courses.

Co-operative Education

For more information about how to apply for the Co-op

program and how the Co-op program works please visit

the Co-op website.

All students participating in the Co-op program are

governed by the Undergraduate Co-operative Education

Policy.

Undergraduate Co-operative Education Policy

Admission Requirements

Students can apply to co-op in one of two ways; directly

from high school or after beginning a degree program at

Carleton.

If a student is admitted to co-op from high school, their

grades will be reviewed two terms to one year prior to

their first work term to ensure they continue to meet the

academic requirements after their 1st or 2nd year of study.
The time at which evaluation takes place depends on the

program of study. Students will automatically be notified
via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

**Participation Requirements**

**COOP 1000**

Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

**Communication with the Co-op Office**

Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

**Employment**

Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

**Registering in Co-op Courses**

Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts. While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

**Work Term Assessment and Evaluation**

To obtain a Satisfactory grade for the co-op work term students must have:

1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

**Voluntary Withdrawal from the Co-op Option**

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

Standing and Appeals
The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student’s failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

International Students
All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

B.A. Honours English: Co-op Admission and Continuation Requirements
- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:
1. Registered in the B.A. Honours English program;
2. Obtained and maintained an overall CGPA of 9.0 or higher at the end of second year of academic study
3. Obtained and maintained an overall CGPA of 8.0 or higher and a major CGPA of 9.0 or higher by the end of third year of academic study

Students in B.A. Honours English must successfully complete three (3) work terms to obtain the Co-op designation.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements
Degrees
- Bachelor of Arts (B.A.)(Honours)
- Bachelor of Arts (B.A.)

First Year
For B.A. and B.A. (Honours)
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or French). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Advanced Standing
B.A. and B.A. (Honours) Program
Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Admissions Information
Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off
averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Diploma

• Post-Baccalaureate Diploma in Professional Writing

To be eligible for admission to the Post-Baccalaureate Diploma in Professional Writing students must normally present an honours undergraduate degree with a GPA of 8.0 or higher.

English (ENGL) Courses

ENGL 1002 [0.5 credit]
Writing and Language I
The first half of an introduction to the principles, styles, and structures of effective writing, including essay writing. Course offered only in Nunavut as part of Certificate in Nunavut Public Service Studies Program.
Includes: Experiential Learning Activity
Precludes additional credit for ENGL 1005 (no longer offered).
Lectures and workshop three hours a week.

ENGL 1003 [0.5 credit]
Writing and Language II
The second half of an introduction to the principles, styles, and structures of effective writing, including essay writing. Course offered only in Nunavut as part of Certificate in Nunavut Public Service Studies Program.
Includes: Experiential Learning Activity
Precludes additional credit for ENGL 1005 (no longer offered).
Prerequisite(s): ENGL 1002.
Lectures and workshop three hours a week.

ENGL 1008 [0.5 credit]
English Grammar: Fundamentals
A practical and intensive overview of English grammar designed for students who want to improve their understanding of grammar for their own writing and reading. This is not an ESL course.
Lectures three hours a week.

ENGL 1009 [0.5 credit]
Literature in Global Context
Introduction to the study of literature from a global perspective. Students will be exposed to writers from various locations and to methods for studying literature across national boundaries.
Lecture three hours a week.

ENGL 1010 [0.5 credit]
Writing Essays about Literature
An intensive writing course focusing on the formulation and construction of a literary essay.
Precludes additional credit for ENGL 1020.
Lectures three hours a week.

ENGL 1020 [0.5 credit]
Effective Writing
The rhetorical principles, skills, and structures necessary for the kind of writing done at the university level. Clear and effective composition as a mode of research, discovery, analysis, and persuasion. Students pursuing the English major or minor should take ENGL 1010 instead of ENGL 1020.
Precludes additional credit for ENGL 1010.
Lectures three hours a week.

ENGL 1100 [0.5 credit]
Literature, Law, and Criminality
An introductory course whose readings focus on the intersections between literature, law, and criminality. Topics will vary. Consult the English Department website for the current topic.
Precludes additional credit for ENGL 1000 (no longer offered), ENGL 1200, ENGL 1300, ENGL 1400, ENGL 1600, ENGL 1700, FYSM 1004.
Lecture three hours a week.

ENGL 1200 [0.5 credit]
Literature, Science, and Technology
An introductory course whose readings focus on the intersections between literature, science, and technology. Topics will vary. Consult the English Department website for the current topic.
Precludes additional credit for ENGL 1000 (no longer offered), ENGL 1100, ENGL 1300, ENGL 1400, ENGL 1600, ENGL 1700, FYSM 1004.
Lectures three hours a week.

ENGL 1300 [0.5 credit]
Literature, Psychology, and the Mind
An introductory course whose readings focus on the intersections between literature, psychology, and the mind. Topics will vary. Consult the English Department website for the current topic.
Precludes additional credit for ENGL 1000 (no longer offered), ENGL 1100, ENGL 1200, ENGL 1400, ENGL 1600, ENGL 1700, FYSM 1004.
Lectures three hours a week.
ENGL 1400 [0.5 credit]
Literature, Art, and Culture
An introductory course whose readings focus on the intersections between literature, art, and culture. Topics will vary. Consult the English Department website for the current topic.
Precludes additional credit for ENGL 1000 (no longer offered), ENGL 1100, ENGL 1200, ENGL 1300, ENGL 1600, ENGL 1700, FYSM 1004.
Lectures three hours a week.

ENGL 1500 [0.5 credit]
Introduction to Creative Writing
An introduction to the practice of creative writing, focusing on poetry, the short story, creative non-fiction, and drama. Emphasis is also placed on contextualizing creative writing as an academic discipline, a mode of self-expression, and a professional industry.
Includes: Experiential Learning Activity
Lectures and workshops three hours a week.

ENGL 1600 [0.5 credit]
Literature and Magic
An introductory course whose readings focus on the intersections between literature and magic. Topics will vary. Consult the English Department website for the current topic.
Precludes additional credit for ENGL 1000 (no longer offered), ENGL 1100, ENGL 1200, ENGL 1300, ENGL 1400, ENGL 1700, FYSM 1004.
Lecture three hours a week.

ENGL 1609 [0.5 credit]
Introduction to Drama Studies
An introduction to drama studies, combining attention to theatre history, conventions, and devices, with attention to theatrical practice, and interpretation of selected dramatic texts. Students will develop a vocabulary for speaking and writing with confidence about theatrical productions, theatre practice, and dramatic texts.
Lecture three hours a week.

ENGL 1700 [0.5 credit]
Climate Change and the Humanities
An introduction to literature and culture in the context of the environmental humanities and climate change.
Precludes additional credit for ENGL 1000 (no longer offered), ENGL 1100, ENGL 1200, ENGL 1300, ENGL 1400, ENGL 1600, FYSM 1004.
Seminar or lecture three hours a week.

ENGL 2005 [0.5 credit]
Theory and Criticism
An introduction to theories and methods of literary analysis. Through the study of literature, theory, and criticism, students will explore disciplinary history, critical terms, textual analysis, and research methods.
Prerequisite(s): second-year standing or permission of the department.
Lecture three hours a week.

ENGL 2008 [1.0 credit]
Myth and Symbol
A literary study of myths and symbols from oral traditions to contemporary forms through selected interdisciplinary and theoretical approaches.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2100 [0.5 credit]
Topics in Popular Culture
Study of a selected topic related to popular culture.
Precludes additional credit for ENGL 2101 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lecture three hours a week.

ENGL 2103 [0.5 credit]
Introduction to the Novel
A historical and critical study of the novel.
Precludes additional credit for ENGL 2003 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2104 [0.5 credit]
Drama Workshop
A course dealing with the rudiments of theatrical performance: voice, movement, improvisation, interpretation. Exercises are based upon examples drawn from classical and contemporary repertoires.
Includes: Experiential Learning Activity
Precludes additional credit for ENGL 2000 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Workshop three hours a week.
ENGL 2105 [0.5 credit]
History of the English Language
A historical study of the English language, its structure, variety, and cultural contexts, with an introduction to grammatical terminology and constructions.
Also listed as LING 2802.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2106 [0.5 credit]
Topics in Popular Fiction
An introduction to the critical study of popular fiction. Topics will vary but may include popular narrative forms such as fantasy, horror, mystery, romance, Young Adult (YA) fiction, etc.
Prerequisite(s): second-year standing or permission of the department.
Lecture three hours a week.

ENGL 2107 [0.5 credit]
Science Fiction
A study of the history and traditions of science fiction, speculative fiction, fantasy, and utopia, covering various periods, nationalities, genres, and/or media.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2108 [0.5 credit]
Women and Literature
Representations of women and the construction of femininity in selected literary texts, the position of women as readers and authors, and the impact of feminist criticism on literary analysis.
Precludes additional credit for ENGL 2902 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2109 [0.5 credit]
Gender, Sexuality and Literature
How literature represents, reproduces, and resists cultural notions of gender and sexuality. Topics may include: gender and sexuality in relation to literary history, production, and reception; literature by/about “deviant” or subcultural sexualities and genders.
Precludes additional credit for ENGL 2902 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2200 [0.5 credit]
Creativity, Imagination, and Writing
Creativity, Imagination, and Writing
This course not only surveys theories about the imagination and creativity but also teaches various rhetorical exercises and strategies for sparking inventive thinking and new ideas to fire the writing process. Consult the English Department's website for detailed information.
Prerequisite(s): second-year standing or permission of the department. Students in English may take this course only as a free elective.
Lectures three hours a week.

ENGL 2201 [0.5 credit]
The Pleasures of Reading
This course introduces majors and non-majors to a selection of known and unknown "masterpieces." Texts may be grouped to explore specific themes. Requirements include a variety of assignments but no formal essay. Consult the English Department's website for detailed information.
Prerequisite(s): second-year standing or permission of the department. Students in English may take this course only as a free elective.
Lectures three hours a week.

ENGL 2202 [0.5 credit]
Weird Fiction
Introduction to a sub-category of speculative fiction that spans from traditional ghost stories and tales of the macabre to the “New Weird”: contemporary writing that overthrows the clichés, conventions, and expectations of fantasy, horror, and science fiction.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2301 [0.5 credit]
Literatures and Cultures 500-1500
A study of the period between 500 and 1500, with attention to cultural, historical, geographical, and literary contexts.
Precludes additional credit for ENGL 2300 (no longer offered).
Prerequisite(s): Second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2302 [0.5 credit]
Literatures and Cultures 1500-1700
A study of the period between 1500 and 1700, with attention to cultural, historical, geographical, and literary contexts.
Precludes additional credit for ENGL 2300 (no longer offered).
Prerequisite(s): Second-year standing or permission of the department.
Lectures three hours a week.
ENGL 2400 [0.5 credit]
Introduction to Digital Humanities
An introduction to the principal debates in and approaches to the Digital Humanities.
Also listed as DIGH 2001.
Prerequisite(s): second-year standing or permission of the department.
Lecture three hours a week.

ENGL 2401 [0.5 credit]
Digital Humanities: Theory and Method
A multidisciplinary survey of core theories, methodologies and tools within the Digital Humanities. Assignments will include collaborative work and applied projects.
Includes: Experiential Learning Activity
Also listed as DIGH 2002.
Prerequisite(s): second-year standing or permission of the department.
Lecture and workshop three hours a week.

ENGL 2500 [0.5 credit]
Classical Mythology
A study of classical mythology, emphasizing its use in Greek and Roman literature and its place in classical art and religion. There is some discussion of classical myths in terms of contemporary interpretations of myth.
Also listed as CLCV 2500.
Precludes additional credit for ENGL 2007/CLCV 2000 (no longer offered).
Prerequisite(s): second-year standing or permission of the unit.
Lectures three hours a week.

ENGL 2600 [0.5 credit]
History of World Cinema I
Historical survey of world cinema primarily from 1895 to 1945, examining the forms, structures and stylistic conventions of various periods and nations.
Also listed as FILM 2606.
Precludes additional credit for ENGL 2608 (no longer offered) and FILM 2608 (no longer offered).
Prerequisite(s): FILM 1101 or FILM 1120 or a 1000-level English course, and second-year standing, or permission of the discipline.
Lecture and screening three hours a week, lecture one hour a week.

ENGL 2601 [0.5 credit]
History of World Cinema II
Historical survey of world cinema primarily since 1945, examining the forms, structures and stylistic conventions of various periods and nations.
Also listed as FILM 2607.
Precludes additional credit for ENGL 2608 (no longer offered) and FILM 2608 (no longer offered).
Prerequisite(s): ENGL 2600 or FILM 2606 or permission of the department.
Lecture and screening three hours a week, lecture one hour a week.

ENGL 2605 [0.5 credit]
Greek and Roman Drama
An examination of the genres of tragedy and comedy in Greco-Roman antiquity.
Also listed as CLCV 2100.
Precludes additional credit for CLCV 2009, ENGL 2009.
Prerequisite(s): second year standing or permission of the unit.
Lecture three hours a week.

ENGL 2609 [0.5 credit]
Drama: Modes and Movements
A study of dramatic texts and traditions, offering attention to major dramatic modes and movements such as Ritual, Dance, Naturalism, Expressionism, Absurdism, Political Theatre, Feminist Theatre, and Global/Intercultural Theatre. Each will be investigated in the context of performance videos, live performances, and/or written text.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2700 [0.5 credit]
American Literatures I
Introduction to the traditions of American literature through 1865.
Precludes additional credit for ENGL 2702 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2701 [0.5 credit]
American Literatures II
Introduction to the traditions of American literature after 1865.
Precludes additional credit for ENGL 2702 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2709 [0.5 credit]
Indigenous Drama
A study of dramatic literatures and theatre practice from Indigenous theatre makers, including playwrights, directors, and other practitioners.
Also listed as INDG 2709.
Prerequisite(s): second-year standing, or permission of the Department.
Lectures three hours a week.

ENGL 2730 [0.5 credit]
Culture and Climate Change
Selected topics related to climate change and cultural studies.
Prerequisite(s): second-year standing or permission of the department.
Lecture three hours a week.
ENGL 2802 [1.0 credit]
Indigenous and Canadian Literatures
A survey of Canadian literary cultures in English from their beginnings to the present that frames them in the wider context of Indigenous writing and storytelling. This course is writing-attentive.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2900 [0.5 credit]
Literature of the Self
A study of developments in the literary representation of the self. The course considers a wide range of major texts from the Middle Ages to the present.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2901 [0.5 credit]
Writing Poetry
A workshop involving regular assignments in writing poetry and practical criticism based on this work. Permission to register in this course requires the student to submit a writing sample. Instructions can be found at carleton.ca/english.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the instructor.
Workshop three hours a week.

ENGL 2903 [0.5 credit]
Writing Fiction
A workshop involving regular assignments in writing prose fiction and practical criticism based on this work. Permission to register in this course requires the student to submit a writing sample. Instructions can be found at carleton.ca/english.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the instructor.
Workshop three hours a week.

ENGL 2906 [0.5 credit]
Culture and Society
A study of literature in relation to its social and political contexts. Topics and periods vary.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2908 [0.5 credit]
Celtic Literatures
The literatures of Ireland, Scotland, and/or Wales. Topics will vary in national and historical scope and may be organized by theme, author, and/or genre.
Precludes additional credit for ENGL 2602 and ENGL 2606 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2910 [0.5 credit]
Book Arts Workshop
This experiential learning course immerses students in the practical arts and histories of book production.
Includes: Experiential Learning Activity
Prerequisite(s): second-year standing or permission of the department.
Workshop three hours a week.

ENGL 2915 [0.5 credit]
Writing Creative Nonfiction
A workshop involving regular assignments in reading and writing creative nonfiction and practical criticism based on this work. Permission to register in this course requires the student to submit a writing sample. Instructions can be found at carleton.ca/english.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the instructor.
Workshop three hours a week.

ENGL 2920 [0.5 credit]
Topics in Decolonization and Migration I
An introduction to the study of literature and culture in the context of topics such as empire and decolonization, diaspora, migration and globalization, race, and ethnicity. Themes, authors, and geographical and temporal focus will vary.
Prerequisite(s): Second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2926 [0.5 credit]
African Literatures I
An introductory survey of modern African literatures, discourses, and cultural production in the first half of the 20th century.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2927 [0.5 credit]
African Literatures II
A survey of modern African literatures, discourses, and cultural production from the era of political independence from colonialism (the 1960s) to the present.
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

South Asian Literatures I
An introductory historical survey of the literatures of South Asia to the early colonial era, starting with the Indian epics and concluding with literary traditions of 18th-century India.
Precludes additional credit for ENGL 2502 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.
ENGL 2937 [0.5 credit]
South Asian Literatures II
An introductory survey of literatures of South Asia from the colonial and postcolonial eras. Topics include the nationalist movement, neo-colonialism, and post-colonialism. Precludes additional credit for ENGL 2502 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2956 [0.5 credit]
Literatures of the Americas I
Introduction to comparative and transnational approaches to the literatures and oratures of the Caribbean, and North and South America, with emphasis on the pre-colonial and colonial eras. Precludes additional credit for ENGL 2909 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 2957 [0.5 credit]
Literatures of the Americas II
Introduction to comparative and transnational approaches to 20th- and 21st-century writing from the Caribbean, and North and South America. Precludes additional credit for ENGL 2909 (no longer offered).
Prerequisite(s): second-year standing or permission of the department.
Lectures three hours a week.

ENGL 3003 [0.5 credit]
Literatures in Translation
A study of non-English literatures in translation with a special focus on cultural and historical contexts. Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3007 [0.5 credit]
Reading Poetry
This course is designed to enable students to develop skills in reading and writing about poetry. Readings will be chosen from a variety of authors, periods, and/or genres. Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3008 [0.5 credit]
Studies in Greek Literature
A study of an author or topic in Greek literature. Contents of this course vary from year to year. Also listed as CLCV 3701.
Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) at second year level or permission of the unit. Permission of the unit is required to repeat this course.
Lecture three hours a week.
ENGL 3201 [1.0 credit]  
European Literature  
Major movements and works from Dante’s Divine Comedy through Voltaire’s Candide. Themes include the New Humanism vs. old Chivalry in the Renaissance and Baroque periods; the rise of the modern novel and drama; reason, nature, and the Enlightenment project.

Prerequisite(s): HUMS 2000 and third-year standing in the Bachelor of Humanities program for Humanities Students.  
English students should have third year standing with a CGPA of 8.0 or higher.  
Lectures three hours a week.

ENGL 3202 [0.5 credit]  
Chaucer  
A study of Chaucer’s works including some attention to the Middle English language in which he wrote.  
Prerequisite(s): third-year standing or permission of the department.  
Lectures three hours a week.

ENGL 3204 [0.5 credit]  
Literary Representations of Childhood and Youth  
An examination of the ways in which childhood, children, and youth have been represented in creative literature (fiction, poetry, drama, and/or creative nonfiction).  
Also listed as CHST 3204.  
Prerequisite(s): third-year standing.  
Lecture three hours a week.

ENGL 3305 [0.5 credit]  
Shakespeare and the Stage  
Introduction to the study of early modern play-texts written by Shakespeare and/or his contemporaries.  
Precludes additional credit for ENGL 3304 (no longer offered).  
Prerequisite(s): third-year standing or permission of the department.  
Lectures three hours a week.

ENGL 3306 [0.5 credit]  
Shakespeare and Film  
A study of film adaptations of selected plays by Shakespeare.  
Prerequisite(s): third-year standing or permission of the department.  
Lectures three hours a week.

ENGL 3401 [0.5 credit]  
The Book in the Digital Age  
A multidisciplinary course focused on the social, economic and political dimensions of the book in its manuscript, print and digital forms.  
Also listed as DIGH 3001.  
Prerequisite(s): third-year standing, or permission of the English Department.  
Lecture three hours a week.

ENGL 3402 [0.5 credit]  
18th-Century Literature  
A detailed study of authors and movements of the period 1660 to 1780.  
Prerequisite(s): third-year standing or permission of the department.  
Lectures three hours a week.

ENGL 3414 [0.5 credit]  
Introduction to Professional Writing and Editing  
The fundamental skills of professional writing and editing, including writing for specific audiences, document design, revision strategies, copyediting.  
Also listed as ALDS 3414.  
Prerequisite(s): third-year standing or permission of the instructor.  
Seminars three hours a week.

ENGL 3500 [0.5 credit]  
Literatures and Cultures 1700-1900  
A study of the period between 1700 and 1900, with attention to cultural, historical, geographical, and literary contexts.  
Precludes additional credit for ENGL 3502 (no longer offered).  
Prerequisite(s): Third-year standing or permission of the department.  
Lectures three hours a week.

ENGL 3501 [0.5 credit]  
Literatures and Cultures 1900-Now  
A study of the period between 1900 and the present, with attention to cultural, historical, geographical, and literary contexts.  
Precludes additional credit for ENGL 3502 (no longer offered).  
Prerequisite(s): Third-year standing or permission of the department.  
Lectures three hours a week.

ENGL 3553 [0.5 credit]  
The 19th-Century Novel  
A study of the English novel in the 19th century.  
Precludes additional credit for ENGL 3503 (no longer offered).  
Prerequisite(s): third-year standing or permission of the department.  
Lectures three hours a week.

ENGL 3601 [0.5 credit]  
20th- and 21st-Century Poetry  
A study of 20th and 21st-century poetry in English. Topics and authors may vary.  
Prerequisite(s): third-year standing or permission of the department.  
Lectures three hours a week.
ENGL 3603 [0.5 credit]
20th- and 21st-century Fiction
A study of 20th- and 21st-century fiction in English. Topics and authors may vary.
Prerequisite(s): Third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3605 [0.5 credit]
Modern and Contemporary Literary Theory
Introduction to contemporary approaches to literary texts, such as formalist, structuralist, deconstructive, psychoanalytic, Marxist, historicist, and feminist. Topics may include: the nature and role of literature, of author and reader, of canons, ideology, gender, sexuality, and race. Precludes additional credit for ENGL 3002 (no longer offered).
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3608 [0.5 credit]
Topics in Theatre Management
A workshop taught by practitioners in the community that provides students with the knowledge and skills necessary to create, manage, and sustain theatre projects. Topics will vary but may include the development of children’s theatre or the operation of a festival or touring company. Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the department.
Workshop three hours a week.

ENGL 3609 [0.5 credit]
Drama: Contemporary Criticism
A study of dramatic texts and performance practices in contemporary professional theatre. Topics vary according to the season programs of professional theatre in Ottawa. Students will attend a number of productions, determined by the instructor. Field trip fees will apply. Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3702 [0.5 credit]
American Culture
A study of American writing in its cultural and historical contexts.
Precludes additional credit for ENGL 3703 (no longer offered).
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3801 [0.5 credit]
Canadian Poetry
A study of Canadian poetry in its social and political contexts.
Prerequisite(s): third-year standing or permission of the department.
Lecture three hours a week.
ENGL 3904 [0.5 credit]
Intermediate Drama Workshop
A course dealing with techniques of characterization, principles of ensemble performance, scene analysis for actors and directors, styles of performance.
Includes: Experiential Learning Activity
Precludes additional credit for ENGL 2001 (no longer offered).
Prerequisite(s): ENGL 2104 or permission of the Department.
Workshop three hours a week.

ENGL 3905 [0.5 credit]
Topics in Performance
A study of selected elements of performance. Topics will vary but may include such areas as the theory and practice of comic timing on stage or movement on stage space.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the department.
Lecture and workshop three hours a week.

ENGL 3906 [0.5 credit]
Writing Popular Fiction
An intermediate workshop in creative writing that focuses on the development of writing skills specific to the crafting of narratives in such genres as Speculative Fiction, Young Adult Fiction, and Historical Fiction. Permission to register requires the student to submit a writing sample.
Includes: Experiential Learning Activity
Prerequisite(s): a 2000-level creative writing workshop and permission of the instructor.
Workshop three hours a week.

ENGL 3908 [0.5 credit]
Research and Theory in Academic Writing
Study of contemporary research and theory (1970s to present) on academic writing in elementary, secondary and post-secondary school, with emphasis on writing in university. Consideration of what academic writing entails, how writing fosters learning, and how instruction can help students develop their writing abilities.
Includes: Experiential Learning Activity
Also listed as ALDS 3401.
Prerequisite(s): third-year standing or permission of the instructor.
Lectures three hours a week.

ENGL 3909 [0.5 credit]
Research and Theory in Workplace Writing
Study of contemporary research and theory (1980s to present) in writing in workplace settings. Consideration of how writing is used in accomplishing work, how novices learn to write effectively, and what the implications are for pedagogy.
Includes: Experiential Learning Activity
Also listed as ALDS 3402.
Prerequisite(s): third-year standing or permission of the instructor.
Lectures three hours a week.

ENGL 3910 [0.5 credit]
From Degree to Career
This experiential-learning course prepares students in English for their transition into the workplace. Project-based activities (including readings and research) and guest speakers will teach students to identify, develop, and apply the skills and knowledge gained from a degree in English studies.
Includes: Experiential Learning Activity
Prerequisite(s): Third-year standing or permission of the department.
Lectures and workshops three hours a week.

ENGL 3911 [0.5 credit]
Cultural Studies
This course explores cultural expression across diverse media, theorizing culture as a form of struggle that shapes material conditions, fuels knowledge production, and informs lived experience.
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3915 [0.5 credit]
Special Topics in Writing
An intermediate workshop that involves regular creative writing assignments and practical criticism based on this work. Topics will vary. Permission to register requires the student to submit a writing sample. Submission instructions and yearly special topics can be found at carleton.ca/english/.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing, a 2000-level creative writing workshop, and permission of the instructor.
Workshop three hours a week.

ENGL 3916 [0.5 credit]
Spoken Word Poetry Workshop
This intermediate-level workshop-based course explores traditions of spoken word poetry while requiring students to create and perform their own spoken word poems.
Includes: Experiential Learning Activity
Also listed as AFRI 3916.
Prerequisite(s): third-year standing or a 2000-level writing workshop and permission of the instructor.
Workshops three hours a week.

ENGL 3920 [0.5 credit]
Literary Ecological Fieldwork
This interdisciplinary, experiential fieldwork course brings together literature, culture, and ecology studies. At least 50% of class periods will be devoted to short field work excursions in the Ottawa region. These excursions will be complemented by classroom discussion time. Field trip fees will apply.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the department.
Field work and lectures three hours a week.
ENGL 3930 [0.5 credit]
Topics in Decolonization and Migration II
An intermediate study of literature, culture, and research in the context of topics such as empire and decolonization, diaspora, migration and globalization, race, and ethnicity. Themes, authors, and geographical and temporal focus will vary.
Prerequisite(s): Third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3940 [0.5 credit]
Studies in Diaspora Lit.
A study of diaspora literatures and cultures.
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3960 [0.5 credit]
Studies in Indigenous Literature
A study of Indigenous literatures and cultures.
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3965 [0.5 credit]
Intro to Postcolonial Theory
A survey of major concepts and key figures in postcolonial theory.
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3972 [0.5 credit]
Studies in Postcolonial Literature
A study of postcolonial literatures and cultures. Topics may vary from year to year.
Prerequisite(s): third-year standing or permission of the department.
Lectures three hours a week.

ENGL 3999 [0.0 credit]
Co-operative Work Term
Includes: Experiential Learning Activity

ENGL 4001 [0.5 credit]
Studies in Poetry
A study of a selected topic in poetry.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4003 [0.5 credit]
Studies in the Novel
A study of a selected topic in the novel.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4004 [0.5 credit]
Writing and Knowledge-Making in the Professions
The role of writing in constructing knowledge in the professions, as viewed from contemporary socio-cultural perspectives. Consideration of how the goals, values, and assumptions of different professions shape their writing in distinctive ways and what implications this holds for theory, research, and practice.
Includes: Experiential Learning Activity
Also listed as ALDS 4404.
Prerequisite(s): third-year standing or permission of the instructor.
Seminars three hours a week.

ENGL 4005 [0.5 credit]
Studies in Literary Theory
Study of a selected topic in literary theory and criticism.
Precludes additional credit for ENGL 4000 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4105 [0.5 credit]
Old English
Studies in Old English literature and its cultural and historical contexts. Instruction in grammar to facilitate reading knowledge of the Old English language.
Also listed as LING 4805.
Precludes additional credit for ENGL 3102 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4115 [0.5 credit]
Culture and the Text
Topics will vary from year to year.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4125 [0.5 credit]
Digital Culture and the Text I
A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year.
Also listed as DIGH 4002.
Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the Department.
Seminar or lecture three hours a week.

ENGL 4135 [0.5 credit]
Studies in Publishing
Topics will vary from year to year.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.
ENGL 4145 [0.5 credit]
Digital Culture and the Text II
A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year.
Also listed as DIGH 4003.
Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the Department.
Seminar or lecture three hours a week.

ENGL 4155 [0.5 credit]
Studies in Digital Humanities
A study of current issues and debates in the Digital Humanities.
Also listed as DIGH 4001.
Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the English Department.
Seminar or lecture three hours a week.

ENGL 4208 [0.5 credit]
Studies in Medieval Literature
A study of a selected topic in Medieval literature; requires previous experience reading medieval English.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4301 [0.5 credit]
Studies in Renaissance Literature
A study of a selected topic in Renaissance literature.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4401 [0.5 credit]
Studies in 18th-Century Literature
A study of a selected topic in Restoration or 18th-century literature.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4404 [0.5 credit]
Digital Humanities Workshop
This workshop will provide students with the opportunity to complete an individual or collaborative capstone project in the Digital Humanities.
Includes: Experiential Learning Activity
Also listed as DIGH 4004.
Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the English Department.
Workshop three hours a week.

ENGL 4405 [0.5 credit]
Digital Humanities Practicum
Practical experience gained by working on projects under the supervision of the staff of a participating public- or private-sector institution or organization, including a final written assignment or equivalent project. A maximum of 1.0 practicum credit may be applied towards degree requirements.
Includes: Experiential Learning Activity
Also listed as DIGH 4005.
Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the English Department.
Practicum.

ENGL 4414 [0.5 credit]
Professional Writing I
The role of writing in government and NGOs. Consideration of various genres, practices and styles of government and NGO writing, including grant proposals, administrative reports, press releases, briefing notes, recommendation reports.
Includes: Experiential Learning Activity
Also listed as ALDS 4414.
Prerequisite(s): third-year standing or permission of the instructor.
Seminars three hours a week. May include a work placement.

ENGL 4415 [0.5 credit]
Professional Writing II
The role of writing in science-related fields and in the health professions. Consideration of various genres, practices and styles of scientific and health-related writing, including research reports, grant proposals, case reports, popularizations of science, press releases.
Includes: Experiential Learning Activity
Also listed as ALDS 4415.
Prerequisite(s): third-year standing or permission of the instructor.
Seminars three hours a week. May include a work placement.

ENGL 4500 [0.5 credit]
Studies in Romanticism
A study of a selected topic, 1770-1830. Precludes additional credit for ENGL 4407 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.
ENGL 4515 [0.5 credit]
Teaching Writing in School and the Workplace
Introduction to approaches for teaching writing in elementary and secondary school, in university, and in the workplace, with a focus on socio-cultural theories of language and learning. Discussion of applications of these approaches to classroom and workplace teaching. Includes: Experiential Learning Activity
Also listed as ALDS 4405.
Prerequisite(s): third-year standing, or permission of the instructor.
Seminar three hours a week.

ENGL 4550 [0.5 credit]
Studies in Victorian Literature
A study of a selected topic in 19th-century British literature, 1830-1900.
Precludes additional credit for ENGL 4501 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4600 [0.5 credit]
The Great Russian Novel
A study of masterpieces of the Russian tradition, to be selected from among works by writers such as Tolstoy, Dostoevsky, Gogol, Turgenev, Bely, Bulgakov, and Nabokov. All novels will be read in English translation.
Also listed as EURR 4103.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4601 [0.5 credit]
Studies in Contemporary Poetry
A comparative and transnational approach to 20th- and 21st-century poetry.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4605 [0.5 credit]
Theatre Production Seminar
This course offers students advanced engagement with the theory and application of theatrical crafts and includes participation in a writing, acting, or technical capacity on a class production.
Includes: Experiential Learning Activity
Prerequisite(s): ENGL 3904 or permission of the department.
Seminar three hours a week.

ENGL 4607 [0.5 credit]
Studies in 20th- and 21st-century Literature
A study of a selected topic in literature of the 20th and 21st century.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4609 [0.5 credit]
Global Stages and Theories
An advanced study of dramatic texts from transnational, postcolonial, or European contexts. This course will offer sustained attention to specific theatre traditions, theatrical practice, and interpretation of texts. Topics and points of emphasis vary from year to year.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4708 [0.5 credit]
Studies in American Literature I
A study of a selected topic in American literature.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4709 [0.5 credit]
Studies in American Literature II
A study of a selected topic in American literature.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4802 [0.5 credit]
Race, Ethnicity and Canadian Lit.
A study of Canadian literature that engages with notions of race and ethnicity.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4806 [0.5 credit]
Studies in Canadian Literature I
A study of a selected topic in Canadian literature.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4807 [0.5 credit]
Studies in Canadian Literature II
A study of a selected topic in Canadian literature.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4908 [1.0 credit]
Independent Study
Independent research and writing, under the supervision of English faculty, requiring an essay of approximately 10,000 words. A written proposal outlining the project must be submitted to the undergraduate supervisor by July 31. Not available to students in a Combined Honours program.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in English with a CGPA of 10.0 in English courses, and permission of the undergraduate supervisor.
ENGL 4909 [0.5 credit]
Writing and Knowledge-Making in the Disciplines
The role of writing in constructing knowledge in academic disciplines, as viewed from contemporary socio-cultural perspectives. Consideration of how the goals, values, and assumptions of different disciplines shape their writing in distinctive ways and what implications this holds for pedagogy.
Includes: Experiential Learning Activity
Also listed as ALDS 4403.
Precludes additional credit for LALS 5406 (no longer offered) or ALDS 5602 (no longer offered) or LALS 5602 (no longer offered).
Prerequisite(s): third-year standing or permission of the instructor.
Lectures three hours a week.

ENGL 4910 [0.5 credit]
Independent Creative Writing Project
Independent creative writing, under the supervision of Departmental faculty, requiring the production of a poetry manuscript (10-15 poems), a one-act play, a 10,000-word novella, or two short stories. A written proposal outlining the project must be submitted to the faculty supervisor by July 31.
Includes: Experiential Learning Activity
Prerequisite(s): completion of required credits for the Creative Writing Concentration, fourth-year Honours standing in English with a CGPA OF 10.0 in English courses, and permission of the Undergraduate Supervisor in conjunction with the faculty supervisor.

ENGL 4915 [0.5 credit]
Advanced Writing Workshop
An advanced workshop involving regular assignments in creative writing and practical criticism based on this work. Topics will vary.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in English, a 3000-level creative writing workshop, or permission of the instructor. Permission to register in this course requires the student to submit a writing sample. Instructions on this process and on yearly special topics can be found at carleton.ca/english.
Workshop three hours a week.

ENGL 4947 [0.5 credit]
Issues in Diaspora Literature
A study of a selected topic in diaspora literature and culture.
Precludes additional credit for ENGL 4907 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4950 [0.5 credit]
Topics in Postcolonial and Diaspora Lit. and Theory
A study of a selected topic in postcolonial and/or diaspora literatures and theories. Themes, authors, and geographical and temporal focus will vary.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4960 [0.5 credit]
Indigenous Literatures I
A study of the literatures produced by Indigenous storytellers and writers, with a focus on the oral tradition and life writing.
Precludes additional credit for ENGL 4808 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4961 [0.5 credit]
Indigenous Literatures II
A study of the contemporary period of Indigenous literature, examining the historical and mythic influences on the literature.
Precludes additional credit for ENGL 4808 and ENGL 4809 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4975 [0.5 credit]
Issues in Postcolonial Theory
A study of a selected issue in postcolonial and/or diaspora theory.
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

ENGL 4976 [0.5 credit]
Issues in Postcolonial Literature
A study of a selected topic in postcolonial literature and culture.
Precludes additional credit for ENGL 4906 (no longer offered).
Prerequisite(s): fourth-year standing or permission of the department.
Seminar or lecture three hours a week.

Environmental and Climate Humanities (Minor)
This section presents the requirements for programs in:

- Minor in Environmental and Climate Humanities

Minor in Environmental and Climate Humanities (4.0 credits)
This minor is open to all undergraduate degree students.

Requirements:
1. 0.5 credit in: 0.5

Environmental Science

This section presents the requirements for programs in:

- Environmental Science B.Sc. Honours
- Environmental Science with Concentration in Chemistry B.Sc. Honours
- Environmental Science with Concentration in Earth Sciences B.Sc. Honours
- Environmental Science with Concentration in Ecology, Biodiversity and Conservation B.Sc. Honours
- Environmental Science with Concentration in Geomatics B.Sc. Honours
- Environmental Science B.Sc. Major

Program Requirements

Course Categories

The Environmental Science program description makes use of the following course categories:

- Approved Courses Outside the Faculties of Science and Engineering and Design (approved by the Environmental Science Institute)
- Approved Environmental Science Electives (approved by the Environmental Science Institute)
- Free Electives (see Academic Regulations for the B.Sc.)

Approved Science for Environmental Science

Courses approved by the Institute of Environmental Science include the following that comply with the Academic Regulations for the B.Sc.:

- Biochemistry
- Biology
- Chemistry
- Computer Science
- Earth Science
- Environmental Science
- Geography
- Geomatics
- Mathematics and Statistics
- Physics

Prohibited and Restricted Courses

Technology, Society, Environment Studies (TSES) courses are not accepted as Science Continuation courses in these programs, but may be used as Approved Environmental Science Specialization courses or as free electives.

Environmental Science

B.Sc. Honours (20.0 credits)

A. Credits Included in the Major CGPA (11.5 credits)

1. 3.0 credits in:

### Environmental Science B.Sc. Major (20.0 credits)

**Environmental Science**

**B.Sc. Major (20.0 credits)**

#### A. Credits Included in the Major CGPA (10.0 credits)

1. 2.5 credits in:
   - ENSC 1500 [0.5] Environmental Science Seminar
   - ENSC 2000 [0.5] Environmental Science Field Methods
   - ENSC 2001 [0.5] Earth Resources and Natural Hazards: Environmental Impacts
   - ENSC 2002 [0.5] Methods and Analysis in Environmental Science
   - ENSC 3000 [0.5] Environmental Science and Management: Theory and Practice

2. 2.0 credit in:
   - BIOL 2600 [0.5] Ecology
   - CHEM 2800 [0.5] Foundations for Environmental Chemistry
   - CHEM 2302 [0.5] Analytical Chemistry I
   - GEOG 2013 [0.5] Weather and Water

3. 1.0 credit from:
   - GEOG 3102 [0.5] Geomorphology
   - GEOG 3103 [0.5] Watershed Hydrology
   - GEOG 3104 [0.5] Principles of Biogeography
   - GEOG 3105 [0.5] Climate and Atmospheric Change
   - GEOG 3106 [0.5] Aquatic Science and Management
   - GEOG 3108 [0.5] Soil Properties

4. 1.0 credit from:
   - ERTH 2402 [0.5] Climate Change: An Earth Sciences Perspective
   - ERTH 2403 [0.5] Introduction to Oceanography
   - ERTH 3205 [0.5] Physical Hydrogeology

5. 0.5 credit from:
   - BIOL 2107 [0.5] Fundamentals of Genetics
   - BIOL 2201 [0.5] Cell Biology and Biochemistry

6. 1.0 credits from Science faculty electives or science continuation at the 4000 level

7. 2.0 credits from Science faculty electives or science continuation courses

#### B. Credits Not Included in the Major CGPA (10.0 credits)

8. 1.0 credit in:
   - MATH 1007 [0.5] Elementary Calculus I
   - STAT 2507 [0.5] Introduction to Statistical Modeling I

9. 2.5 credits in:
   - BIOL 1103 [0.5] Foundations of Biology I
   - BIOL 1104 [0.5] Foundations of Biology II
   - CHEM 1001 [0.5] General Chemistry I
   - CHEM 1002 [0.5] General Chemistry II
   - ERTH 1006 [0.5] Exploring Planet Earth

10. 0.5 credit in:
    - PHIL 2380 [0.5] Introduction to Environmental Ethics

---

**B.Sc. Regulations**

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the Academic Regulations of the University section of this Calendar).

### Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

1. 2.0 credits in Science Continuation courses not in the major discipline; **students completing a double major are considered to have completed this requirement providing they have 2.0 credits in science continuation courses in each of the two majors**

2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for fewer than 10.0 credits.

2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (but may include NSCI 1000) if, on transfer, the student received credit for 10.0 or more credits.

### Declared and Undeclared Students

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.Sc. degree without being registered in a program. These students are referred to as Undeclared students. The recommended course pattern for Undeclared students is provided in the Undeclared entry of the Programs section of this Calendar. Undeclared students normally must apply to enter a program before beginning their second year of study. The Science Student Success Centre (SSSC) provides Undeclared students guidance to the appropriate support services in making this decision.
Change of Program within the B.Sc. Degree
Students may transfer to a program within the B.Sc. degree if upon entry to the new program they would be in good academic standing.

Other applications for change of program will be considered on their merits; students may be accepted in the new program in Good Standing or on Academic Warning.

Applications to declare or change their program within the B.Sc. Degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations and Specializations
Students may add a minor, concentration or specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a minor, concentration or specialization requires that the student be in Good Standing and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement
Students in a B.Sc. degree program must present at graduation at least two full credits of experimental science chosen from two different departments or institutes from the list below:

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

- BIOC (Biochemistry)
- BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives
- CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007
- COMP (Computer Science) except COMP 1001
- ERTH (Earth Sciences) except ERTH 1010, ERTH 1011 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.
- Engineering
- ENSC 2001
- FOOD (Food Science and Nutrition)
- GEOM (Geomatics)
- HLTH (Health Science)
- ISAP (Interdisciplinary Science Practice)
- MATH (Mathematics)
- NEUR (Neuroscience)
- PHYS (Physics) except PHYS 1901, PHYS 1902, PHYS 1905, PHYS 2903
- Science Geography (see list above)
- Science Psychology (see list above)
- STAT (Statistics)
- TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include NSCI 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). NSCI 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

- BIOL 4810 [0.5] Education Research in Biology
- CHEM 1003 [0.5] The Chemistry of Food, Health and Drugs
- CHEM 1004 [0.5] Drugs and the Human Body
- CHEM 1007 [0.5] Chemistry of Art and Artifacts
- ERTH 1010 [0.5] Our Dynamic Planet Earth
- ERTH 1011 [0.5] Evolution of the Earth
- ERTH 2415 [0.5] Natural Disasters
- ISCI 1001 [0.5] Introduction to the Environment

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

- BIOL (Biology)
- CHEM (Chemistry)
- COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.
- ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.
- Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.
- ENSC (Environmental Science)
- FOOD (Food Science and Nutrition)
- GEOM (Geomatics)
- HLTH (Health Science)
- ISAP (Interdisciplinary Science Practice)
- MATH (Mathematics)
- NEUR (Neuroscience)
- PHYS (Physics), except PHYS 1901, PHYS 1902, PHYS 1905, PHYS 2903
- Science Geography (see list above)
- Science Psychology (see list above)
- STAT (Statistics)
- TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

- ERTH 1011 [0.5] Evolution of the Earth
- ERTH 2415 [0.5] Natural Disasters
- ISCI 1001 [0.5] Introduction to the Environment
Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy

Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:
1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

<table>
<thead>
<tr>

Co-operative Education

Undergraduate Co-operative Education Policy
Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students’ academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements

COOP 1000
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students’ Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:
1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.
Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

**Voluntary Withdrawal from the Co-op Option**

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

1. Failure to achieve a grade of SAT in COOP 1000
2. Failure to pay all co-op related fees
3. Failure to actively participate in the job search process
4. Failure to attend all interviews for positions to which the student has applied
5. Declining more than one job offer during the job search process
6. Continuing a job search after accepting a co-op position
7. Dismissal from a work term by the co-op employer
8. Leaving a work term without approval by the Co-op manager
9. Receipt of an unsatisfactory work term evaluation
10. Submission of an unsatisfactory work term report

**Standing and Appeals**

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

**International Students**

All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

**B.Sc. Environmental Science: Co-op Admission and Continuation Requirements**

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Completion of 5.0 or more credits at Carleton University;
2. Registered as a full-time student in the Bachelor of Science Honours degree program;
3. Obtained and maintained a major CGPA of 8.0 or higher and an overall CGPA of 6.50 or higher

B.Sc. Honours Environmental Science students must successfully complete three (3) work terms to obtain the co-op designation.

**Work Term Course:** ENSC 3999

**Admissions Information**

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the
number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

**Degrees**
- B.Sc. (Honours)
- B.Sc. (Major)
- B.Sc.

**Admission Requirements**

**B. Sc. Honours Program**

**First Year**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions and two of Biology, Chemistry, Earth and Space Sciences or Physics. (Calculus and Vectors is strongly recommended).

**Specific Honours Admission Requirements**
For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For the Combined Honours program in Chemistry and Computer Science, 4U Chemistry and Calculus and Vectors are strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

**Advanced Standing**
For entry to an Honours program after the completion of 5.0 included credits, a student must have a major CGPA of 5.50 or higher, an overall CGPA of 4.50 or higher and the recommendation of the Honours department or committee. A student beginning the final 10.0 credits towards an Honours degree must present a major CGPA of 6.00 or higher, an overall CGPA of 5.00 or higher and the recommendation of the Honours department or committee. A student beginning the final 5.0 credits towards an Honours degree must present a major CGPA of 6.50 or higher and an overall CGPA of 5.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

**B.Sc. Major Program**

**B.Sc. Program**

**First Year**
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Equivalent courses may be substituted between the old and new Ontario mathematics curriculum.

**Advanced Standing**
For entry to a B.Sc. or B.Sc. Major program after the completion of 5.0 included credits, a student must have a major and core CGPA of 3.50 or higher and an overall CGPA of 3.50 or higher. A student beginning the final 5.0 credits towards a B.Sc. or B.Sc. Major degree must present a major and core CGPA of 4.00 or higher and an overall CGPA of 4.00 or higher, as calculated for graduation. Advanced standing will be granted for studies undertaken elsewhere when these are recognized as the equivalent of subjects offered at Carleton University.

**Co-op Option**

**Direct Admission to the First Year of the Co-op Option**
Applicants must:

1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
2. be registered as a full-time student in the Bachelor of Science Honours program;
3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.
Environmental Science (ENSC) Courses

ENSC 1500 [0.5 credit]
Environmental Science Seminar
The purpose and nature of the program; society's view on the natural and human-modified environment; major environmental issues and their scientific aspects; preparation and presentation of paper and seminars. Includes: Experiential Learning Activity
Prerequisite(s): enrolment in the Environmental Science program.
Lectures, seminars and workshops four hours a week.

ENSC 2000 [0.5 credit]
Environmental Science Field Methods
A field-based course introducing students to practical methods in environmental science. Topics will include earth sciences, geography, biology, and chemistry related aspects of environmental sciences and will focus on quantitative techniques to assess environmental impacts and management. A supplementary fee will apply.
Includes: Experiential Learning Activity
Prerequisite(s): ERTH 1006 and BIOL 1004 or BIOL 1104, CHEM 1001 and CHEM 1002 and permission of the Institute.
Field trips, lectures and workshops, seven hours per week (delivered on a single day and on up to two mandatory weekend trips).

ENSC 2001 [0.5 credit]
Earth Resources and Natural Hazards: Environmental Impacts
Environmental impact of mineral, energy and water resource exploitation and impact of hazardous Earth processes such as volcanic eruptions, earthquakes and others: their prediction and mitigation.
Lectures three hours per week.

ENSC 2002 [0.5 credit]
Methods and Analysis in Environmental Science
Study and application of qualitative and quantitative techniques in environmental science, including study design, data collection and assembly, database manipulation, data analysis, and critically evaluating scientific information.
Includes: Experiential Learning Activity
Prerequisite(s): STAT 2507 or permission from the Institute.
Lectures and seminars three hours a week.

ENSC 3000 [0.5 credit]
Environmental Science and Management: Theory and Practice
Theoretical and practical perspectives related to environmental science and management; Emphasis on real-world problems associated with human activities and development of solutions in natural and built environments; Hands-on experience with environmental monitoring and restoration. A supplementary fee will apply.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Environmental Science or permission of the Institute.
Field trips, lectures and workshops, 7 hours per week (delivered on a single day).

ENSC 3106 [0.5 credit]
Aquatic Science and Management
Fundamentals of aquatic science. The physical, chemical, and biotic aspects of lake, river, and estuary systems including human impacts, management and conservation.
Includes: Experiential Learning Activity
Also listed as GEOG 3106.
Prerequisite(s): third-year standing and a second year science or engineering course.
Workshop four hours per week.

ENSC 3509 [0.5 credit]
Group Research in Environmental Science
Major project relating to an issue involving environmental science; effective methods of team research and presentation of group work. May include field work during class time or on weekends.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in the Honours Environmental Science program or permission of the Institute.
Lectures, seminars and workshops three hours a week.

ENSC 3700 [0.5 credit]
Topics in Environmental Science
Specific topics of current interest. Topics may vary from year to year.
Prerequisite(s): Third year standing in the Environmental Science program or permission of the Institute.

ENSC 3906 [0.5 credit]
Project Planning for Environmental Research
Independent or group study on the fundamentals of scientific investigation, which may include use of literature, learning of research techniques, and development of a research proposal, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work.
Includes: Experiential Learning Activity
Prerequisite(s): Good standing in third year Environmental Science and permission of the Institute.
ENSC 3999 [0.0 credit]
Co-operative Work Term
Practical experience for students enrolled in the Co-operative Option. To receive course credit a student must receive satisfactory evaluations from their work term employer. Written reports describing the work term project will be required. Graded Sat or Uns.
Includes: Experiential Learning Activity
Prerequisite(s): registration in the Environmental Science Co-operative Option and permission of the Institute. Four-month work term.

ENSC 4001 [0.5 credit]
Environmental Science Practicum
Experience working in the environmental science sector, applying academic training to practical environmental issues. Graded Sat/Uns.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the Environmental Science program.

ENSC 4002 [0.5 credit]
Environmental Decisions
The regulatory and scientific aspects of environmental management decisions, including risk analysis and mitigation, managing chronic and acute environmental impacts, and conservation of species and landscapes. Students will use real-world case studies to learn traditional and cutting-edge decision-making tools.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in any B.Sc. program or permission of the Institute.
Workshops three hours per week.

ENSC 4003 [0.5 credit]
Food Systems and the Environment
This course explores issues of food systems and their sustainability. We will discuss aspects of food systems, including production, distribution, consumption, waste management, and their impact on communities and the environment.
Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in B.Sc. or B.HSc. program or permission of the Institute.
Lecture three hours per week.

ENSC 4700 [0.5 credit]
Topics in Environmental Science
Prerequisite(s): third-year standing in the Environmental Science program or permission of the Institute.
Lectures and discussion three hours a week.

ENSC 4901 [0.5 credit]
Directed Projects
Independent or group study, for fourth-year students to explore a particular project, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the Institute. Students normally may not offer more than 1.0 credit of Directed Special Studies in their program.

ENSC 4906 [1.0 credit]
Honours Research Project
An independent investigation into an aspect of environmental science supervised by a member of the faculty. Approval of the topic and the research schedule must be obtained from the project supervisor and the course coordinator before the last date for registration.
Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the Honours Environmental Science program, a major CGPA 8.0 and permission of the Institute.

Environmental Studies
This section presents the requirements for programs in:
- Environmental Studies B.A. Honours
- Environmental Studies B.A.
- Minor in Environmental Studies

Program Requirements
Approved Environmental Studies Electives
Please note that the Approved Electives below may have prerequisite requirements or could be cross-listed.

Architecture
- ARCU 3902 [0.5] Urban Studies
- ARCC 3004 [0.5] Workshop: Energy and Form
- ARCC 4103 [0.5] Energy and Form
- ARCH 4105 [0.5] Theories of Landscape Design

Biology
- BIOL 1010 [0.5] Biotechnology and Society
- BIOL 1902 [0.5] Natural History
- BIOL 2600 [0.5] Ecology
- BIOL 2903 [0.5] Natural History and Ecology of Ontario
- BIOL 3601 [0.5] Ecosystems and Environmental Change
- BIOL 3602 [0.5] Conservation Biology

Business
- BUSI 3119 [0.5] Business and Environmental Sustainability

Earth Sciences
- ERTH 2402 [0.5] Climate Change: An Earth Sciences Perspective
- ERTH 2403 [0.5] Introduction to Oceanography

### Bachelor of Arts

**Environmental Studies**

**B.A. Honours (20.0 credits)**

**A. Credits Included in the Major CGPA (11.0 credits)**

1. **1.0 credit in:**
   - ENST 1000 [0.5] Introduction to Environmental Studies
   - or ENST 1020 [0.5] People, Places and Environments
   - GEOG 1010 [0.5] Global Environmental Systems

2. **1.0 credit in:**
   - ENST 2000 [0.5] Environmental Justice
   - ENST 2001 [0.5] Sustainable Futures: Environmental Challenges and Solutions

3. **0.5 credit from:**
   - GEOG 2013 [0.5] Weather and Water
   - GEOG 2014 [0.5] The Earth's Surface
   - GEOG 2020 [0.5] Ecosystems of Canada

4. **1.0 credit in:**
   - ENST 2005 [0.5] Introduction to Qualitative Research
   - ENST 2006 [0.5] Introduction to Quantitative Research

5. **1.0 credit in:**
   - ENST 3000 [0.5] Nature, Environment and Society
   - ENST 3022 [0.5] Environmental and Natural Resources

6. **0.5 credit from:**
   - INDG 2015 [0.5] Indigenous Ecological Ways of Knowing
   - PHIL 2380 [0.5] Introduction to Environmental Ethics

7. **1.0 credit from:**
   - ECON 3804 [0.5] Environmental Economics
   - GEOG 3206 [0.5] Health, Environment, and Society
   - GEOG 3209 [0.5] Sustainability and Environment in the South
   - GEOG 3501 [0.5] Geographies of the Canadian North
   - HUMR 3503 [0.5] Global Environmental Justice
   - LAWS 3800 [0.5] Law of Environmental Quality
   - PHIL 3801 [0.5] Environmental Politics
   - TSES 3002 [0.5] Energy and Sustainability

8. **0.5 credit from:**
   - ENST 3900 [0.5] Honours Field Course
   - GEOG 3030 [0.5] Regional Field Excursion

9. **0.5 credit in:**
   - ENST 4000 [0.5] Environmental Studies Seminar

10. **0.5 credit from:**
    - ENST 4006 [0.5] Environmental Policy Analysis
    - GEOG 4022 [0.5] Seminar in People, Resources and Environmental Change
    - GEOG 4023 [0.5] Seminar in Special Topics on the City
    - GEOG 4004 [0.5] Environmental Impact Assessment
    - ENST 4050 [0.5] Environmental and Geographic Education

11. **1.0 credit in:**
    
    a) **Thesis pathway**
    
    1.0 credit from:
    - ENST 4906 [1.0] Honours Research Project
    - ENST 4907 [1.0] Honours Research Essay

    or

    b) **Course pathway**
    
    1.0 credit in Approved Environmental Studies Electives at the 4000 level

12. **0.5 credit in:**

    a) **Co-op students must complete:**
    
    Approved Environmental Studies electives at 4000 level, excluding ENST 4001 and ENST 4002

    b) **All other students must complete one of:**
    
    - ENST 4001 [0.5] Environmental Studies Practicum I
    - ENST 4002 [0.5] Environmental Studies Practicum II

13. **1.0 credit in** Approved Environmental Studies Electives at the 3000 level or above

14. **1.0 credit in** Approved Environmental Studies Electives
### B. Credits Not Included in the Major CGPA (9.0 credits)

### Total Credits

**4.0**

Students should consult with the Department when planning their program and selecting courses. Some of the Environmental Studies Approved Electives have prerequisites, which are not explicitly included in the program. Students should plan to obtain all necessary prerequisites or waivers for courses selected for this program.

### B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (consult the Academic Regulations of the University section of this Calendar).

### First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program. Students who have completed the Enriched Support Program (ESP) or who are required to take a minimum of one English as a Second Language (ESLA) credit are not permitted to register in a FYSM.
Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, including 1.0 credit from each of three of the four Breadth Areas identified below. Credits that fulfill requirements in the Major, Minor, Concentration or Specialization may be used to fulfill the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Comparative Literary Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, Performance in Public Sphere, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, CLST, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PIPS, PORT, RUSS, SPAN

Breadth Area 2: Humanities

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURL, HIST, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Subject codes: AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, CMPS, COMP, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISCI, ISCS, ISYS, ITEC, MAEE, MATH, MECH, NET, NEUR, NSCI, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Open Studies program section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students should consult Academic Advising Centre for guidance in planning their studies prior to registration.

Change of Program Within the B.A. Degree

Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in Good Standing. Other applications for change of program will be considered on their merits; students may be admitted to the new program in Good Standing or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar’s Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrollment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry. Acceptance into a Concentration or Specialization requires that the student be in Good Standing.

Mention : Français

Students registered in certain B.A. programs may earn the notation Mention : Français by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada.
The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:
1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:
1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention : Français requirement in both disciplines.

Courses taught in French (Item 3, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on Exchange or Letter of Permission.

Co-operative Education
For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy
Admission Requirements
Students can apply to co-op in one of two ways; directly from high school or after beginning a degree program at Carleton.

If a student is admitted to co-op from high school, their grades will be reviewed two terms to one year prior to their first work term to ensure they continue to meet the academic requirements after their 1st or 2nd year of study. The time at which evaluation takes place depends on the program of study. Students will automatically be notified via their Carleton email account if they are permitted to continue.

Students not admitted to Carleton University with the co-op option on their degree can apply for admission via the co-operative education program website. To view application deadlines, visit carleton.ca/co-op.

Admission to the co-op option is based on the completion of 5.0 or more credits at Carleton University, the CGPA requirement for the students' academic program as well as any course prerequisites. The articulated CGPA for each program is the normal standard for assessment. Please see the specific degree program sections for the unique admission and continuation requirements for each academic program.

Participation Requirements
COOP 1000
Once a student has been given admission or continuation confirmation to the co-op option s/he must complete and pass COOP 1000 (a mandatory online 0.0 credit course). Students will have access to this course a minimum of two terms prior to their first work term and will be notified when to register.

Communication with the Co-op Office
Students must maintain contact with the co-op office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment
Although every effort is made to ensure a sufficient number of job postings for all students enrolled in the co-op option of their degree program, no guarantee of employment can be made. Carleton's co-op program operates a competitive job search process and is dependent upon current market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's responsibility to actively conduct a job search in addition to participation in the job search process operated by the co-op office. Once a student accepts a co-op job offer (verbally or written), his/her job search will end and access to co-op jobs will be removed for that term. Students that do not successfully obtain a co-op work term are expected to continue with their academic studies. The summer term is the exception to this rule. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Federal Government of Canada.

Registering in Co-op Courses
Students will be registered in a Co-op Work Term course while at work. The number of Co-op Work Term courses that a student is registered in is dependent upon the number of four-month work terms that a student accepts.

While on a co-op work term students may take a maximum of 0.5 credit throughout each four-month co-op work term. Courses must be scheduled outside of regular working hours.

Students must be registered as full-time before they begin their co-op job search (2.0 credits). All co-op work terms must be completed before the beginning of the final academic term. Students may not finish their degree on a co-op work term.

Work Term Assessment and Evaluation
To obtain a Satisfactory grade for the co-op work term students must have:
1. A satisfactory work term evaluation by the co-op employer;
2. A satisfactory grade on the work term report.

Students must submit a work term report at the completion of each four-month work term. Reports are due on the 16th of April, August, and December and students are notified of due dates through their Carleton email account.

Workplace performance will be assessed by the workplace supervisor. Should a student receive an unsatisfactory rating from their co-op employer, an investigation by the co-op program manager will be undertaken. An unsatisfactory employer evaluation does not preclude a student from achieving an overall satisfactory rating for the work term.

**Graduation with the Co-op Designation**

In order to graduate with the co-op designation, students must satisfy all requirements for their degree program in addition to the requirements according to each co-op program (i.e. successful completion of three or four work terms).

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

**Voluntary Withdrawal from the Co-op Option**

Students may withdraw from the co-op option of their degree program during a study term ONLY. Students at work may not withdraw from the work term or the co-op option until s/he has completed the requirements of the work term.

Students are eligible to continue in their regular academic program provided that they meet the academic standards required for continuation.

**Involuntary or Required Withdrawal from the Co-op Option**

Students may be required to withdraw from the co-op option of their degree program for one or any of the following reasons:

- Failure to achieve a grade of SAT in COOP 1000
- Failure to pay all co-op related fees
- Failure to actively participate in the job search process
- Failure to attend all interviews for positions to which the student has applied
- Declining more than one job offer during the job search process
- Continuing a job search after accepting a co-op position
- Dismissal from a work term by the co-op employer
- Leaving a work term without approval by the Co-op manager
- Receipt of an unsatisfactory work term evaluation
- Submission of an unsatisfactory work term report

**Standing and Appeals**

The Co-op and Career Services office administers the regulations and procedures that are applicable to all co-op program options. All instances of a student's failure during a work term or other issues directly related to their participation in the co-op option will be reported to the academic department.

Any decision made by the Co-op and Career Services office can be appealed via the normal appeal process within the University.

**International Students**

All International Students are required to possess a Co-op Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. It is illegal to work in Canada without the proper authorization. Students will be provided with a letter of support to accompany their application. Students must submit their application for their permit before being permitted to view and apply for jobs on the Co-op Services database. Confirmation of a position will not be approved until a student can confirm they have received their permit. Students are advised to discuss the application process and requirements with the International Student Services Office.

**B.A. Honours Environmental Studies: Co-op Admission and Continuation Requirements**

- Maintain full-time status in each study term (2.0 credits);
- Be eligible to work in Canada (for off-campus work)
- Have successfully completed COOP 1000 [0.0]

In addition to the following:

1. Registered in the B.A. Honours Environmental Studies program;
2. Obtained and maintained an overall minimum CGPA of 9.5 and a minimum major CGPA of 9.5;
3. Have obtained third-year standing;
4. Successfully completed, by the start date of the first work term:
   - a. the required second-year methods courses in their program (ENST 2005, ENST 2006)
   - b. the required field course in their program (ENST 3900)
5. Be registered as a full-time student.

B.A. Honours Environmental Studies students must successfully complete three (3) work terms to obtain the Co-op designation.

**Co-op work term course**: ENST 3999

Admissions Information

Admission Requirements are for the 2021-22 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.)(Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)
The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). For applicants whose first language is not English, the requirement of English can also be met under the conditions outlined in the section “English Language Requirements” in the Admissions Requirements and Procedures section of this Calendar.

The cut-off average for admission will be set annually and will normally be above the minimum requirement. Applicants falling slightly below the cut-off average will be considered on an individual basis to determine whether there are special circumstances that would permit their admission. Students who feel that their high school grade average does not reflect their potential may apply to the Enriched Support Program (see the Enriched Support Program section of this Calendar).

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Environmental Studies (ENST) Courses

ENST 1000 [0.5 credit]
Introduction to Environmental Studies
A critical introduction to the scholarly field of environmental studies, with an emphasis on society-environment entanglements. It is designed to engage with environmental issues. Possible themes include population, scarcity, institutions, commons, risks, hazards, markets, political economy, and the social construction of nature. Precludes additional credit for FYSM 1100 and ENST 1001 (no longer offered). Lecture two hours and workshops/tutorials one hour weekly.

ENST 1020 [0.5 credit]
People, Places and Environments
Introduction to human geography. Examination of relationships between people, communities, society and the natural environment at local to global scales. Population change, cultural patterns, and historical, economic, political and environmental forces that shape human activity and experiences from place to place. Includes: Experiential Learning Activity Also listed as GEOG 1020. Lectures two hours a week and tutorial one hour a week.

ENST 2000 [0.5 credit]
Environmental Justice
Contemporary and foundational theories, practice and praxis of environmental justice in Canadian and comparative settings. Combine and communicate about aspects of the physical, built and social environments to understand how uneven conditions develop. Strategies and ideas to move towards greater equity and good environmental relationships. Prerequisite(s): second-year standing in the Environmental Studies program or permission of the Department. Lecture two hours a week, discussion one hour a week.

ENST 2001 [0.5 credit]
Sustainable Futures: Environmental Challenges and Solutions
Individual and collective responses to pressing environmental problems. Innovative ways in which the environment can be protected and restored, taking into consideration socioeconomic, political and cultural factors. Topics include environmental lifestyles, sustainable communities, food systems, environmental design, and political activism. Includes: Experiential Learning Activity Prerequisite(s): second-year standing in the Environmental Studies program or permission of the Department. Lectures, seminars and field work three hours a week.
ENST 2005 [0.5 credit]  
Introduction to Qualitative Research  
Introduction to the research process, from generating questions through to reporting results. Topics include intensive and extensive research approaches; the use of surveys, interviews and other data collection methods; the analysis of qualitative information; and the ethical dimensions of doing research with people and communities.  
Includes: Experiential Learning Activity  
Also listed as GEOG 2005.  
Prerequisite(s): 1.0 credit in GEOG or ENST at the 1000-level and second-year standing, or permission of the Department.  
Lectures two hours a week, workshop two hours a week.

ENST 2006 [0.5 credit]  
Introduction to Quantitative Research  
Introduction to solving problems using descriptive and inferential statistical methods. Graphical and numerical tools to describe distributions. Probability, sampling and estimates, and hypothesis testing. Fundamentals of spatial statistics and analysis.  
Includes: Experiential Learning Activity  
Also listed as GEOG 2006.  
Precludes additional credit for BIT 2000, BIT 2009, BIT 2100 (no longer offered), BIT 2300 (no longer offered), NEUR 2002, PSCI 2702, STAT 2507, STAT 2606.  
Lectures two hours a week, laboratory two hours a week.

ENST 2500 [0.5 credit]  
Climate Change: Social Science Perspectives  
An introduction to climate change as a political, economic and socio-cultural phenomenon, including the political-economic and world-historical causes of anthropogenic greenhouse gas emissions; variations in impact and vulnerability; climate justice and other political movements; global mitigation and adaptation strategies; and proposals for radical systemic change.  
Includes: Experiential Learning Activity  
Also listed as GEOG 2500.  
Prerequisite(s): second-year standing or permission of the department.  
Lectures two hours a week, discussion groups one hour a week.

ENST 3000 [0.5 credit]  
Nature, Environment and Society  
Overview of social science perspectives analyzing the relationship of society and the environment. Examination of environmental problems, solutions, conditions, and interventions through the study of concepts, theories, and research drawn from a range of scholarly approaches to questions of nature.  
Includes: Experiential Learning Activity  
Prerequisite(s): third-year standing in Environmental Studies or permission of the department.  
Lecture and discussion three hours a week.

ENST 3022 [0.5 credit]  
Environmental and Natural Resources  
Exploration of complexity, dynamics, uncertainty and equity issues underpinning environmental and resource issues; review and appraisal of selected contemporary methods to assess and manage environmental and natural resources.  
Includes: Experiential Learning Activity  
Also listed as GEOG 3022.  
Prerequisite(s): third-year standing in Geography or Environmental Studies or BGInS Specialization/Stream in Globalization and Environment or permission of the Department.  
Lecture three hours a week.

ENST 3900 [0.5 credit]  
Honours Field Course  
Field research, with a focus on data collection methods, analysis and presentation of findings. Design and conduct research that links the human and biophysical environment. Topics may change from year to year.  
Includes: Experiential Learning Activity  
Also listed as GEOG 3000.  
Precludes additional credit for ENST 2900 (no longer offered).  
Prerequisite(s): GEOG 2005/ ENST 2005 and GEOG 2006/ ENST 2006, third-year Honours standing in Environmental Studies, Geomatics, or Geography, or permission of the Department.  
Normally consists of a multi-day field excursion in the Ottawa region. A supplementary charge may apply. Consult the department regarding course details.

ENST 3999 [0.0 credit]  
Co-operative Work Term  
Includes: Experiential Learning Activity

ENST 4000 [0.5 credit]  
Environmental Studies Seminar  
An advanced seminar designed to provide a capstone experience that builds upon and applies the analytical skills and interdisciplinary knowledge acquired in the Environmental Studies program. Topics vary year to year and by course section (see departmental website).  
Includes: Experiential Learning Activity  
Prerequisite(s): Registration is restricted to students eligible for fourth-year standing in the B.A. (Environmental Studies) Honours program.  
Seminar three hours per week.
ENST 4001 [0.5 credit]
Environmental Studies Practicum I
External agency setting provides the basis for translating academic training into practical involvement with environmental issues. Observation and involvement in issues and research methods used by professional environmental practitioners.
Includes: Experiential Learning Activity
Prerequisite(s): registration is restricted to students eligible for fourth-year standing in the B.A. (Environmental Studies) Honours program, and permission of the Environmental Studies Co-ordinator.

ENST 4002 [0.5 credit]
Environmental Studies Practicum II
External agency setting provides the basis for translating academic training into practical involvement with environmental issues. Observation and involvement in issues and research methods used by environmental practitioners.
Includes: Experiential Learning Activity
Prerequisite(s): restricted to students in the fourth year of the Environmental Studies Honours program, and permission of the Environmental Studies Co-ordinator.

ENST 4004 [0.5 credit]
Environmental Impact Assessment
Principles, scope and purpose of environmental impact assessment, from conceptual and methodological points of view; range of environmental issues, with emphasis on Canadian case studies.
Includes: Experiential Learning Activity
Also listed as GEOG 4004.
Prerequisite(s): GEOG 3022 or ENST 3022, and fourth-year Honours standing in Geography or Environmental Studies or Environmental Science, or permission of the Department.
Lectures and seminars three hours per week.

ENST 4005 [0.5 credit]
Directed Studies in Environmental Studies
Students pursue their interest in a selected theme in environmental studies on a tutorial basis with a faculty member.
Prerequisite(s): permission of the Department.

ENST 4006 [0.5 credit]
Environmental Policy Analysis
Critical examination of the creation, implementation and effectiveness of government policies related to environmental issues. Emphasis on perspectives, actors, institutions and social and economic relationships affecting policy responses to these issues, and on tools for analyzing the implications of specific policy choices.
Prerequisite(s): fourth-year Honours standing in Environmental Studies, Geography, or permission of the Department.
Seminar three hours per week.

ENST 4007 [0.5 credit]
Special Topics in Geography and Environmental Studies
Selected topics in geography and/or environmental studies.
Also listed as GEOG 4007.
Precludes additional credit for GEOG 4006 (no longer offered).
Prerequisite(s): fourth-year Honours standing in the Department or permission of the Department.
Seminar three hours per week.

ENST 4022 [0.5 credit]
Seminar in People, Resources, and Environmental Change
A selected topic or field of inquiry concerning natural resource use and environmental change.
Also listed as GEOG 4022.
Prerequisite(s): GEOG 3022 or ENST 3022 and fourth-year Honours standing in Geography or Environmental Studies or BGInS Specialization in Globalization and Environment, or permission of the Department.
Seminar three hours per week.

ENST 4050 [0.5 credit]
Environmental and Geographic Education
Selected theoretical and applied issues concerning environmental and geographic education.
Also listed as GEOG 4050.
Prerequisite(s): Third-year honours standing in Geography or Environmental Studies, or permission of the Department.
Seminar three hours per week.

ENST 4400 [0.5 credit]
Field Studies
Field observation and methodology in a selected region, special topic or contemporary problem; on an individual or group basis.
Includes: Experiential Learning Activity
Also listed as GEOG 4000.
Prerequisite(s): third-year Honours standing and permission of the Department.
Hours to be arranged.

ENST 4450 [0.5 credit]
Community-Engaged Research
Working in partnership with local organizations, students apply their geographical knowledge to conduct community-engaged research. Student projects will generate outputs for community partners. Research topics vary year to year.
Includes: Experiential Learning Activity
Also listed as GEOG 4450.
Prerequisite(s): fourth-year standing, or permission of the department.
Lectures, discussion and project work three hours a week.
ENST 4906 [1.0 credit]
Honours Research Project
An independent investigation into a select aspect of environmental studies, supervised by a faculty member. Possible outcomes might include: workshops, audio-visual productions, lay publications, and field projects accompanied by an essay demonstrating the student's capacity to critically reflect on the research project. Includes: Experiential Learning Activity
Precludes additional credit for GEOG 4904/GEOM 4904 (no longer offered), GEG 4909/GEOM 4909, GEOG 4906, GEOM 4906, and ENST 4907.
Prerequisite(s): fourth-year Honours standing in Environmental Studies, a minimum CGPA of 9.00 in the major or permission of the Department, and an approved research topic and adviser.
Hours to be arranged with faculty adviser.

ENST 4907 [1.0 credit]
Honours Research Essay
Interdisciplinary research essay on an environmental issue, carried out in consultation with a faculty supervisor. The student must consult with the undergraduate student advisor in selecting a project and a supervisor.
Includes: Experiential Learning Activity
Precludes additional credit for ENST 4906, GEOG 4909, GEOM 4909, GEOG 4904/GEOM 4904 (no longer offered), GEOG 4906 and GEOM 4906.
Prerequisite(s): fourth-year Honours standing in Environmental Studies, a minimum CGPA of 9.00 in the major or permission of the Department, and an approved research topic and adviser.
Hours to be arranged with faculty adviser.

European and Russian Studies
This section presents the requirements for programs in:
- European and Russian Studies B.A. Honours
- European and Russian Studies B.A. Combined Honours
- European and Russian Studies B.A.
- Specialization in Europe and Russia in the World B.G.In.S. Honours
- Stream in Europe and Russia in the World B.G.In.S.
- Minor in European and Russian Studies

Program Requirements
EURUS Language Requirement
All candidates in the European and Russian Studies B.A., B.A. Honours and B.A. Combined Honours programs are required to demonstrate proficiency in a major regional language. Language proficiency is defined as the completion of an intermediate level of university language instruction (two years, 2.0 Carleton credits). Students who wish to count a relevant regional language that is not taught at Carleton should consult with and request approval from the Undergraduate Supervisor.

Students in the Bachelor of Global and International Studies Specialization or Stream Europe and Russia in the World must complete the BGInS Language requirement in an approved regional language of Europe, Russia, and Eurasia. See the BGInS Language Requirement for details.

Students are encouraged to continue with language instruction beyond the intermediate level required for the Institute Language Requirement. Advanced-level regional language courses may be counted towards EURUS degree requirements (see specific program requirements for details).

This Institute Language requirement may be fulfilled in one of three ways:

1. Completion of one of the following courses (or equivalent): FREN 1100; FREN 1110; GERM 2020; GERM 2110; ITAL 2020; ITAL 2110; PORT 2110; RUSS 2020; SPAN 2020; SPAN 2110.
   Courses at other institutions may also be used to meet the language requirement as long as they are accepted by the Department of French or the School of Linguistics and Language Studies as being equivalent to or at a higher level than the courses listed above.
   For languages not taught at Carleton, an intermediate level is equal to two full years (2.0 Carleton credit) of university-level language instruction.

2. Certification by the unit offering the relevant language or the Institute that the student has attained a level of language proficiency equivalent to completion of one of the courses above. Proficiency may be demonstrated through documentation.

3. Secondary School Language of Instruction: Students whose secondary school transcripts show that their primary language of instruction in secondary school was a relevant regional language other than English may be exempted from the language requirement. Subject to approval of the Undergraduate Supervisor.

European and Russian Studies
B.A. Honours (20.0 credits)

A. Credits Included in the Major CGPA (10.0 credits):
