Regulations

In addition to the program requirements described here, students must satisfy:

- the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar); and
- for B.G.In.S. students the regulations pertaining to the B.G.In.S. degree (see the Global and International Studies section of this Calendar).

Latin American and Caribbean Studies (LACS) Courses

LACS 1001 [0.5 credit]

Introduction to Latin American and Caribbean Studies

An interdisciplinary introduction to the history, culture, societies, and literatures of the region. Students will get a broad overview of the region and will be introduced to the disciplines used to study these societies.

Lectures/groups three hours per week.

LACS 2001 [0.5 credit]

Latin America and the Caribbean in Global Context

A study of the global dynamics affecting Latin America and the Caribbean today. Themes addressed will include globalization, neoliberalism, underdevelopment, populism, social movements, political ideas, and migration. Prerequisite(s): second-year standing.

Prerequisite(s): second-year standing Lectures/groups three hours a week.

LACS 4001 [0.5 credit]

Issues in Latin American and Caribbean Studies

An examination of the major issues confronting Latin America and the Caribbean including democratization, economic integration, indigenous and women's movements, human rights, social justice, and political change.

Prerequisite(s): fourth-year standing or permission from Latin American and Caribbean Studies. Seminar three hours per week.

LACS 4819 [0.5 credit]

Latin America and the World

Latin America's changing relations with states, international institutions and non-state actors in the Global North and South. Topics may include security, South-South cooperation, trade, investment and transnational migration and drug trafficking.

Also listed as PSCI 4819.

Prerequisite(s): fourth-year standing or permission from Latin American and Caribbean Studies.

Seminar three hours a week.

Total Credits 4.0

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public

Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the

Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- 3. Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours Law: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- Registered as a full-time student in the B.A. Honours Law program;
- 2. Successfully completed 5.0 or more credits;
- Successfully completed, by the start-date of the first work term, LAWS 2908 and 1.0 credit from LAWS 2201, LAWS 2301, LAWS 2501, and LAWS 2601;

 Obtained an Overall CGPA of at least 9.00 and a Major CGPA of at least 9.00. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours Law students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only. and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or anglais). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are

described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Direct Admission to the First Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European, Russian, and Eurasian Studies, French, Geography, Geography with a Concentration in Physical Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Law (LAWS) Courses

Note: some graduate courses may also be open to interested fourth-year students with permission of the Department.

LAWS 1001 [0.5 credit] **Introduction to Legal Studies 1**

Introduction to legal studies: concepts, sources, nature and functions of law; historical, cultural and constitutional foundations of Canadian legal system; common and civil law traditions; statutory interpretation; precedent; legal institutions; frameworks for analyzing formal and informal conceptions of law and its role in society.

Lectures and discussion three hours a week.

LAWS 1002 [0.5 credit]

Introduction to Legal Studies 2

Introduction to legal rules and theoretical approaches for critically understanding the creation, interpretation and enforcement of those rules; the role of judges, juries, lawyers, and lay persons; adjudication and alternative dispute resolution; relationship of law with social change and justice; challenges of access to justice.

Lectures and discussion three hours a week.

LAWS 2105 [0.5 credit]

Social Justice and Human Rights

Theories and practices of law and social justice. Issues examined may include: civil democracy and repression; global governance and the rule of law; democratic movements and social power; human rights instruments, regimes and remedies; armed conflict; and humanitarian intervention.

Prerequisite(s): 1.0 credit from LAWS 1001 and LAWS 1002, or HRSJ 1101 and HRSJ 1102, or PAPM 1001 and PSCI 2003. Lectures three hours a week.

LAWS 2201 [0.5 credit] Persons and Property

Origins and scope of the concept of person in law and how concepts of legal personality change over time. Origins and scope of the concept of property and how concepts of property change over time.

Prerequisite(s): LAWS 1001 and LAWS 1002.

Lectures three hours a week.

LAWS 2202 [0.5 credit] Obligations

The concepts employed by the law for creating and enforcing legal obligations between persons within society, including contract, tort, fiduciary obligation and restitution. Consideration is given to the role of persons and the role of the state in ordering private legal obligations. Prerequisite(s): LAWS 1001 and LAWS 1002. Lectures three hours a week.

LAWS 2301 [0.5 credit] Criminal Justice System

The institutional and social production of criminal law in Canada. Processes, personnel, and agencies. The role of discretion. The accused and the place of the victim. Issues in sentencing and punishment. Particular attention to racialization, Indigenous experiences, and discrimination in the operations of criminal law.

Prerequisite(s): LAWS 1001 and LAWS 1002

Prerequisite(s): LAWS 1001 and LAWS 1002. Lectures three hours a week.

LAWS 2302 [0.5 credit]

Criminal Law

The legal and social dimensions of criminal liability and responsibility in Canada, including issues and problems surrounding mens rea, actus reus, and the attachment of liability. Excuses and justifications, the Canadian Criminal Code and the role of the Charter in the criminal legal system.

An examination of the foundations, politics, deployments and legal context of public and private policing. Theoretical and strategic themes related to corporate and state surveillance and security provision are analyzed in the context of class, race, and gender in contemporary and historical context.

Prerequisite(s): LAWS 2301 and LAWS 2302. Lectures three hours a week.

LAWS 3310 [0.5 credit] Race and Law

This course explores theorizations and intersections of race and law in legal studies. Particular attention to case studies, institutional, structural, and systemic racism, the currency of "race" in legal categories and in the work of legal actors in multiple areas of law.

Prerequisite(s): 1.0 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3401 [0.5 credit] Employment Law

Legal regulation of the employment relationship; its contractual basis; defining employment; rights and duties of employees and employers; termination of employment; statutory regulation through employment standards legislation, human rights codes, workers' compensation acts, occupational health and safety and related statutes. Prerequisite(s): (0.5 credit from LAWS 2201, LAWS 2202, LAWS 2501, LAWS 2502, BUSI 2601) and 0.5 credit in LAWS at the 2000 level.

LAWS 3405 [0.5 credit]

Labour Law

Role of law in industrial relations; effect of law on collective bargaining relationships; recognition of bargaining agent; regulation of bargaining; administration of the collective agreement; methods of conflict resolution. Prerequisite(s): (0.5 credit from LAWS 2201, LAWS 2202, LAWS 2501, LAWS 2502, BUSI 2601) and 0.5 credit in LAWS at the 2000 level.

Lectures three hours a week.

LAWS 3500 [0.5 credit] Constitutional Law

An investigation of the Canadian constitution. Sovereignty, the nature and units of executive, legislative, and judicial power in Canada as interpreted by the courts. The distribution of powers under the Canadian constitution, including an investigation of contemporary problems of federalism. Problems of judicial review. Prerequisite(s): (LAWS 2501 or PSCI 2003) and 0.5 credit in LAWS at the 2000 level.

Lectures three hours a week.

LAWS 3501 [0.5 credit] Law in the Information Society

Legal responses to challenges of the information society. Topics may include privacy, surveillance and monitoring, access to information, freedom of expression, control of objectionable content, Charter and human rights issues, and security.

Prerequisite(s): 1.0 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3502 [0.5 credit]

Regulating Freedom of Expression in Canada

The claimed relationship between freedom of expression and Canadian democracy, including the historical development of the right and various limits on it, and the regulatory structures governing contemporary media, criminalized and commercial expression, and use of media in the courtroom.

Prerequisite(s): 1.0 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3503 [0.5 credit] Equality and Discrimination

Human rights issues and law in Canada; history and present day experiences of discrimination; critical exploration of laws effectiveness in responding to discrimination; meaning(s) of equality and discrimination; focus on Human Rights Codes - interpretation, administration, enforcement with some reference to s.15 of the Charter.

Prerequisite(s): (0.5 credit from LAWS 2105, LAWS 2302, LAWS 2502) and 0.5 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3504 [0.5 credit] Law and Aboriginal Peoples

The legal situation of aboriginal peoples in Canada. Topics include status, aboriginal rights, treaties, legislative jurisdiction and the constitutional framework, aboriginal claims, and self-government. Comparative references to aboriginal policy in other countries.

Prerequisite(s): 1.0 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3506 [0.5 credit] Administrative Law

Structure and procedure of Canadian administrative authorities; policy, statutory and judicial environments in which they operate. Topics include techniques for implementing public policy and structuring public authorities; statutory interpretation; procedural safeguards; exercise of statutory discretion; reconciling efficiency and fairness.

Prerequisite(s): LAWS 2502 and 0.5 credit in LAWS at the 2000 level.

Lectures three hours a week.

LAWS 3508 [0.5 credit]

Health Law

Legal/ethical issues in health care regulation. Topics may include: regulation of health professions; economics of health care; informed consent/choice; regulation of drugs, devices and research; medical malpractice and other liability; mental health issues; patient/client records. Prerequisite(s): 1.0 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3509 [0.5 credit]

Selected Topics in The Charter of Rights

Selected issues in the Canadian Charter of Rights and Freedoms. The topics of this course may vary from year to year, and are announced in advance of registration. Prerequisite(s): (0.5 Credit from LAWS 2105, LAWS 2201, LAWS 2302, LAWS 2502) and 0.5 credit in LAWS at the 2000 level.

Lectures three hours a week.

LAWS 3602 [0.5 credit] International Human Rights

An introduction to the law, theory, and historical context of international human rights. The course examines key doctrinal, theoretical, political, and institutional elements of international human rights law, past and present debates about human rights practices and politics.

Precludes additional credit for LAWS 4604 (no longer offered).

Prerequisite(s): (0.5 credit from LAWS 2105, LAWS 2502, LAWS 2601 or HRSJ 2001) and 0.5 credit in LAWS at the 2000 level or PAPM 1001 and PSCI 2003.

LAWS 3604 [0.5 credit] International Organizations

Nature, character, legal status and jurisdiction of intergovernmental international organizations. Rights and duties of states arising from membership in international organizations. Distinction between international and supranational institutions. United Nations system, selected subsidiary organs, and specialized agencies; nongovernmental organizations at times of crisis. Prerequisite(s): LAWS 2601 and 0.5 credit in LAWS at the 2000 level or PAPM 1001 and PSCI 2003. Lectures three hours a week.

LAWS 3800 [0.5 credit] Environmental Law

Introduction to theories and practices of environment law, including, international, administrative, civil, criminal, constitutional, and Indigenous aspects; enforcement, compliance, litigation, and law reform; political and socioeconomic aspects; market-based and rights-based approaches; environmental justice; critiques grounded in critical theories.

Prerequisite(s): 1.0 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3804 [0.5 credit] Law of the Family

Legal framework surrounding the family and family relationships in Canadian society. Topics include marriage and cohabitation, matrimonial support, custody and access, and dissolution of marriage. State interventions through law; law and change in family structures; equality issues; dispute resolution processes.

Also listed as SOWK 3804.

Prerequisite(s): LAWS 2201 and LAWS 2202. Lectures three hours a week.

LAWS 3903 [0.5 credit] Special Topics in Legal Studies

The topics of this course may vary from year to year, and are announced in advance of registration.

Prerequisite(s): 1.0 credit in LAWS at the 2000 level. Lectures three hours a week.

LAWS 3904 [0.5 credit] Special Topics in Legal Studies

The topics of this course may vary from year to year, and are announced in advance of registration.

Prerequisite(s): 1.0 credit in LAWS at the 2000-level. Lectures three hours a week.

LAWS 3908 [0.5 credit]

Methodological Approaches in Legal Studies 2

Advanced approaches to interdisciplinary research and analysis in law and legal studies. Methodological approaches considered will vary by section, and may include theoretical, quantitative, qualitative, literary, or historical approaches.

Prerequisite(s): LAWS 2908 and third-year Honours standing. Honours students are strongly encouraged to take this course in the third year of their program. Lectures three hours a week.

LAWS 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity
Prerequisite(s): registration in the B.A. Honours
(concentration in Business Law or concentration in Law,
Policy and Government) Cooperative Program, completion
of Co-op preparation classes offered by the Co-op office
and permission of the Department.

LAWS 4001 [0.5 credit] Law, Family and Gender

Relationship between family law and ideology of the family, gender roles and the reproduction of family structures. Social ramifications of family law; potential for family law reform as an agency of social change. Prerequisite(s): LAWS 2908, 0.5 credit from LAWS 3001 or LAWS 3804, and fourth-year Honours standing. Seminars three hours a week.

LAWS 4002 [0.5 credit] Feminist Theories of Law

The literature comprising feminist perspectives on law; theoretical bases of these perspectives; place of feminist theories within other critiques of law; significance of different feminist theories for equality theory and law reform strategies; unique contributions of the various perspectives.

Prerequisite(s): LAWS 2908 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4006 [0.5 credit] Religion and State in Canada

Legal nature of the interaction of religion and state within an historical framework. Emphasis on Canada after the Charter of Rights and Freedoms and on religious pluralism and resistance to state intervention in religion. Interdisciplinary readings drawn from legal, historical and theological sources.

Prerequisite(s): LAWS 2908 and fourth-year Honours standing.

LAWS 4100 [0.5 credit] **Modern Legal Theory**

Realist and post-realist legal scholarship; emphasis on Canadian, American and British approaches. Topics include the Canadian treatise tradition, American legal realism, empirical approaches to legal problems, the sociological movement in law, critical and Canadian feminist legal scholarship, Marxian theories of law, normative economic theory.

Prerequisite(s): LAWS 2908 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4101 [0.5 credit]

Contemporary Justice Theories

Selected major contemporary theories of justice such as those associated with Rawls, Walzer, and Habermas. with emphasis on both their procedural and substantive elements and their concrete ramifications for law, policy and political practice.

Prerequisite(s): LAWS 2908 or PAPM 3000 and fourthyear Honours standing.

Seminars three hours a week.

LAWS 4102 [0.5 credit] **Controversies in Rights Theory**

This course examines selected controversies in rights theories, practices, and/or historiography. Illustrative questions may include: Are rights universal or culturally relative? Can rights be justified after the demise of natural rights philosophy? Do rights undermine difference? Do communities benefit from a rights-based culture?. Prerequisite(s): LAWS 2908 or PAPM 3000 and fourthyear Honours standing.

Seminars three hours a week.

LAWS 4105 [0.5 credit] **Global Justice Theory**

Selected theories of global justice as they pertain to legality, which may include guestions such as the justice of military force and just war theory, global social justice and global inequality, sovereignty and cosmopolitan conceptions of justice, demands for global democracy and human rights.

Prerequisite(s): LAWS 2105, LAWS 2908 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4106 [0.5 credit]

Law and Violence

Examination of how law defines, justifies, and addresses individual, collective and state violence: contemporary and historical case studies; theoretical inquiries into the relationship between law, legality and different forms of violence.

Prerequisite(s): LAWS 2908 or PAPM 3000 and fourthyear Honours standing.

Seminars three hours a week.

LAWS 4107 [0.5 credit] Law in Modern Society

Sociological and legal theory accounts of the changing role and function of law in modern society with particular reference to advanced capitalist societies. Topics include: the welfare state and the use of regulatory law; juridification and legalization; counter-trends, deregulation, informalism, legal pluralism.

Prerequisite(s): LAWS 2908 and fourth-year Honours

Seminars three hours a week.

LAWS 4200 [0.5 credit]

Selected Topics in International Economic Law

Selected topics in international economic law. May include: the legal regulation of international economic activity; methods of dispute settlement; standardization and development of an autonomous international trade law; and selected conventions and institutions governing international economic law.

Prerequisite(s): LAWS 2908, 0.5 credit from LAWS 3207 or LAWS 3208, and fourth-year Honours standing. Seminars three hours a week.

LAWS 4202 [0.5 credit]

Accountability of Management

Role, function, and legal regulation of persons managing business enterprises. Status, social responsibility, fiduciary obligations and rights. Control and accountability of managers, obligations owed to the enterprise unit itself, constitutional rights of members, standards imposed by statutory regulation.

Prerequisite(s): LAWS 2908, LAWS 3201 and fourth-year Honours standing.

LAWS 4204 [0.5 credit]

Legal Issues in eCommerce

An examination of selected legal topics relevant to the conduct of electronic commerce. Topics include types of regulation, government support, jurisdiction challenges, contract disputes and consumer protection. Court and alternative dispute resolution policy of Domain Names challenges are also included.

Prerequisite(s): LAWS 2908, LAWS 2201, LAWS 2202 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4209 [0.5 credit] Selected Topics in Business Law

Examination of a selected advanced topic in business law. The topics of this course may vary from year to year and are announced in advance of registration.

Prerequisite(s): LAWS 2908, 0.5 credit from LAWS 2201 or LAWS 2202, and fourth-year Honours standing. Seminars three hours a week.

LAWS 4302 [0.5 credit] Regulation of Corporate Crime

Legal, policy and theoretical perspectives on the regulation of corporate crime. Nature and causes of corporate crime. Selected case studies on the role of the state in regulating corporate behaviour. Failure of the criminal justice system to respond to corporate crime. Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and fourth-year Honours standing. Seminars three hours a week.

LAWS 4303 [0.5 credit] Drugs, The User and The State

This course explores the state's attempts to control drugs and drug users by exploring different aspects of national and international drug control. The Canadian experience of drug control, viewed from different perspectives, will be explored within a broader socio-legal context.

Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002, and 0.5 credit from LAWS 2301 or LAWS 2302, and

fourth-year Honours standing. Seminars three hours a week.

LAWS 4304 [0.5 credit] Policing and Social Surveillance

Theoretical consideration of the emergence and transformation of "policing" activities through an examination of law and changes in social relations, with special attention to the myriad agencies involved in contemporary security provision. Evolving notions of risk, surveillance, the state, and the private-public dichotomy. Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002, and 0.5 credit from LAWS 2301 or LAWS 2302, and fourth-year Honours standing. Seminars three hours a week.

LAWS 4305 [0.5 credit] Criminal Justice Reform

Social transformation and criminal justice reform. Theoretical and practical reasons for the use of criminal law as an instrument of social control. Specific reform initiatives and processes. Alternate responses to social problems.

Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and LAWS 2301, LAWS 2302 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4306 [0.5 credit]

Selected Topics in Criminal Law Issues

Selected issues and problems in the area of criminal law. The topics may vary from year to year depending on demand and interest and are announced in advance of registration.

Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and LAWS 2301, LAWS 2302 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4307 [0.5 credit] Medical Criminal Law Issues

Legal-medical issues, conflicts and relationships in the field of social control. Topics include mental disorder and criminal liability, diversion of offenders to civil commitment in hospital, insanity, automatism, fitness to stand trial, prediction of dangerousness, regulation of psychoactive drugs.

Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and LAWS 2301, LAWS 2302 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4308 [0.5 credit] Sentencing

Theories of sentencing, current sentencing laws and practices, perceptions of sentencing. Data on sentencing practice across Canada. Reforms in other jurisdictions. Critical review of the Canadian Sentencing Commission. Multidisciplinary approach using research and theory in law, criminology, social psychology and sociology. Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and LAWS 2301, LAWS 2302 and fourth-year Honours standing.

LAWS 4309 [0.5 credit] **State Security and Dissent**

Historical and contemporary analysis of legal responses of Canadian governments to dissent, political opposition, insurrection, etc. Includes trial of political offences (treason, sedition, riot), national security measures (War Measures/Emergencies Act, Official Secrets Act), and other special powers (police, labour, immigration, parliamentary privilege, etc.).

Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and 0.5 credit from LAWS 3305, LAWS 3503, LAWS 3509, and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4311 [0.5 credit] **Human Rights in Canadian Prisons**

Correctional law in the Canadian criminal justice system; competing objectives of punishment and rehabilitation in the context of respect for the rule of law and human rights: protection of human rights of prisoners in Canada and in in international and comparative contexts.

Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and fourth-year Honours standing. Seminars three hours a week.

LAWS 4402 [0.5 credit] **Employment Dispute Resolution**

Theory and practice of dispute resolution in employment relations; analysis of such techniques as negotiation, grievance and interest arbitration, mediation, investigation and litigation applied to a range of employment disputes such as collective agreements, termination of employment, discrimination, harassment, occupational health and

Prerequisite(s): LAWS 2908, 0.5 credit from LAWS 3006, LAWS 3401, LAWS 3405, and fourth-year Honours

Seminars three hours a week.

LAWS 4503 [0.5 credit] Law, Disability and Society

Exploration of the ways in which law promotes or hinders the inclusion of disabled persons in society. Consideration of different theories of 'disability' and the creation of barriers faced by disabled persons. Topics may include barriers affecting education, employment, transportation, benefits, and life/death decisions.

Prerequisite(s): LAWS 2908 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4504 [0.5 credit] **Indigenous Criminal Justice**

Indigenous peoples and the administration of Canadian criminal justice including policing, courts, corrections and aftercare. Content and effects of past and present policies, processes and laws. Alternatives such as selfgovernment and self-determination; potential approaches to an appropriate justice system for Indigenous peoples. Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and LAWS 2301, LAWS 2302 and fourth-year Honours

Seminars three hours a week.

LAWS 4510 [0.5 credit]

Selected Topics in Law, Policy and Government

Examination of a selected advanced topic in the area of law, policy and government. The topics of this course may vary from year to year and are announced in advance of registration.

Prerequisite(s): LAWS 2501, LAWS 2502, LAWS 2908 and fourth-year Honours standing. Seminars three hours a week.

LAWS 4601 [0.5 credit]

Transnational Law and Human Rights

Examination of the role of law in addressing human rights issues that transcend traditional categories of domestic and international law; the potential and limits of law in addressing human rights issues; the growth of transnational approaches to law and human rights. Prerequisite(s): LAWS 2908, 0.5 credit from LAWS 3503 or LAWS 3602, and fourth-year Honours standing. Seminars three hours a week.

LAWS 4602 [0.5 credit]

Is Religious Freedom a Human Right?

Legal, theoretical, and theological interconnections between religion and human rights. Evaluation of concepts including religious freedom, secularism, public sphere, accommodation and neutrality. Examination of religion and culture, interdependence of legal and religious perspectives, boundaries of religion and state, and religious compulsion. Use of case studies.

Also listed as HRSJ 4602, RELI 4602.

Prerequisite(s): LAWS 2908, LAWS 3602, and fourth-year Honours standing.

LAWS 4603 [0.5 credit]

Transitional Justice

Legal and ethical responses to human rights violations in the transition to democracy. Dilemmas of the rule of law; truth and reconciliation; prosecution and punishment; amnesty; retribution and revenge; restorative justice; administrative remedy; reparations; International case studies. Theoretical arguments about justice in context of country.

Prerequisite(s): LAWS 2908 or PAPM 3000 and fourthyear Honours standing.

Seminars three hours a week.

LAWS 4605 [0.5 credit]

Selected Topics in International Law

Topics vary from year to year and are announced in advance. May include transnational environmental issues; the international law of armed conflict, peacekeeping and neutrality; the law of international treaties and transnational agreements; state responsibility under international law.

Prerequisite(s): LAWS 2908 or PAPM 3000, LAWS 2601 and fourth-year Honours standing. Seminars three hours a week.

LAWS 4606 [0.5 credit]

International Law of Armed Conflict

UN Charter prohibition of the use of force. Exceptional, permissible uses of armed force. Role of Security Council in determining legality of armed intervention. Collective security, peacemaking, peacekeeping, neutrality, prohibited means of warfare. Humanitarian International Law, Geneva Red Cross Conventions, war crimes, International Criminal Court.

Prerequisite(s): LAWS 2908 or PAPM 3000, LAWS 2601 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4607 [0.5 credit] Immigration and Refugee Law

Immigrants and refugees; demographics; Canadian, international and human rights law and policy. The Canadian Immigration Act. Legal and social problems including entry and removal, family reunion, citizenship, remedies, the rights of clandestine migrants; settlement rights; non-discrimination; asylum; a nation's right to determine membership.

Prerequisite(s): LAWS 2908 or PAPM 3000, LAWS 2502 and fourth-year Honours standing. Seminars three hours a week.

LAWS 4610 [0.5 credit]

Selected Topics in Transnational Law and Human Rights

Examination of a selected advanced topic in the area of transnational law and human rights. The topics of this course may vary from year to year and are announced in advance of registration.

Prerequisite(s): LAWS 2908 or PAPM 3000, LAWS 2601 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4702 [0.5 credit]

Special Topic in Criminal Justice and Social Policy

Examination of a selected topic in criminal justice and social policy. Topics to be announced.

Also listed as SOWK 4702 and SOCI 4702.

Prerequisite(s): LAWS 2908 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4800 [0.5 credit]

Environment and Social Justice

The potential of environmental law to protect the environment and people while promoting opportunities for informed participation in environmental decision making by groups traditionally excluded from these processes; contemporary issues of social justice raised by legal regulation of the environment.

Prerequisite(s): LAWS 2908 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4801 [0.5 credit] Risk and the Legal Process

Application of risk assessment and management in various legal arenas including insurance, liability and tort, litigation management, environmental protection, and sentencing and parole.

Prerequisite(s): LAWS 2908 or PAPM 3000 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4802 [0.5 credit] Criminal Jury Trials

Critical analysis of the criminal jury system including its history and context, the role of the judge, jury dynamics and jury composition. Perspectives and roles of the accused, victims, police, defence counsel, Crown attorney, judges, juries, media, politicians and the public. Prerequisite(s): LAWS 2908, CRCJ 3001, or CRCJ 3002 and LAWS 2301, LAWS 2302 and fourth-year Honours standing.

LAWS 4901 [0.5 credit]

Tutorial in Law

Tutorials or reading courses conducted under the supervision of a faculty member of the Department of Law on a selected topic in which advanced courses are not available (guidelines are posted by the Department). Prerequisite(s): LAWS 3908, fourth-year Honours standing, written acceptance by a faculty member and permission of the Undergraduate Supervisor. Independent work 7-10 hours per week. Regular meetings with supervisor (bi-weekly).

LAWS 4902 [0.5 credit] Tutorial in Law

Tutorials or reading courses conducted under the supervision of a faculty member of the Department of Law on a selected topic in which advanced courses are not available (guidelines are posted by the Department). Prerequisite(s): LAWS 3908, fourth-year Honours standing, written acceptance by a faculty member and permission of the Undergraduate Supervisor. Independent work 7-10 hours per week. Regular meetings with supervisor (bi-weekly).

LAWS 4903 [0.5 credit]

Advanced Special Topics in Legal Studies

The topics of this course vary from year to year and are announced in advance of registration.

Prerequisite(s): LAWS 2908 and fourth-year Honours

Seminars three hours a week.

LAWS 4904 [0.5 credit]

Advanced Special Topics in Legal Studies

The topics of this course vary from year to year and are announced in advance of registration.

Prerequisite(s): LAWS 2908 and fourth-year Honours standing.

Seminars three hours a week.

LAWS 4905 [1.0 credit]

Full-Year Service Learning Placement

This course gives students the opportunity to work with an organization whose focus relates to law. Participating students must identify a host organization and a faculty member to provide supervision (guidelines are posted by the Department).

Includes: Experiential Learning Activity
Precludes additional credit for LAWS 4906, LAWS 4907.
Prerequisite(s): LAWS 2908, fourth-year Honours
standing in Law with a Law GPA of 9.00 or higher, written
acceptance by a faculty member, permission of the
Undergraduate Supervisor and the host organization.
Work at placement site 7-10 hours per week. Regular
weekly meetings with on-site supervisor or faculty
supervisor.

LAWS 4906 [0.5 credit] Service Learning Placement

This course gives students the opportunity to work with an organization whose focus relates to law. Participating students must identify a host organization and a faculty member to provide supervision (guidelines are posted by the Department).

Includes: Experiential Learning Activity
Precludes additional credit for LAWS 4905 (1.0 credit).
Prerequisite(s): LAWS 2908, fourth-year Honours
standing in Law with a Law GPA of 9.00 or higher, written
acceptance by a faculty member, permission of the
Undergraduate Supervisor and the host organization.
Work at placement site 7-10 hours per week. Regular
weekly meetings with on-site supervisor or faculty
supervisor.

LAWS 4907 [0.5 credit] Service Learning Placement

This course gives students the opportunity to work with an organization whose focus relates to law. Participating students must identify a host organization and a faculty member to provide supervision (guidelines are posted by the Department).

Includes: Experiential Learning Activity
Precludes additional credit for LAWS 4905 (1.0 credit).
Prerequisite(s): LAWS 2908, fourth-year Honours
standing in Law with a Law GPA of 9.00 or higher, written
acceptance by a faculty member, permission of the
Undergraduate Supervisor and the host organization.
Work at placement site 7-10 hours per week. Regular
weekly meetings with on-site supervisor or faculty
supervisor.

LAWS 4908 [1.0 credit] Honours Paper

Students in the BA Honours Law program may write an Honours paper under the supervision of a faculty member of the Department of Law (guidelines are posted by the Department). Students intending to undertake graduate studies are encouraged to complete an Honours paper. Includes: Experiential Learning Activity Prerequisite(s): LAWS 3908, fourth-year Honours standing in Law with a Law GPA of 9.00 or higher and written acceptance by a faculty member. Independent work 7-10 hours per week. Regular meetings with supervisor (bi-weekly).

Linguistics (Bachelor of Arts)

School Language Proficiency Requirement

Students in B.A. Honours, Combined Honours, or 15 credit programs of the School of Linguistics and Language Studies are required, at graduation, to have a working knowledge of a language other than English. Proficiency is determined by successful completion of a 1.0 credit university course in the language or by an oral or written test given by the School.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

1.5

2.5

5.0

1.0

2.5

15.0

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention: français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult

the Academic Regulations of the University section of this Calendar for information regarding study on exchange or Letter of Permission.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may

use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Linguistics (LING) Courses

LING 1001 [0.5 credit]

Introduction to Linguistics I

Nature of language and linguistic knowledge. Formal description and analysis of language: phonetics, phonology, morphology, syntax and semantics. Lecture and tutorial three hours a week.

LING 1002 [0.5 credit]

Introduction to Linguistics II

Survey of topics in linguistics: language change, sociolinguistics, language acquisition and processing. May include language typology, language contact and writing systems.

Prerequisite(s): LING 1001 (may be taken concurrently). Lectures three hours a week.

LING 1100 [0.5 credit]

The Mysteries of Language

This course explores some intriguing mysteries of language - whether it is unique to humans, how children master its complexities so easily, how the brain handles language, how languages are born and die. These questions lead us to interesting discoveries about the human mind.

Lectures three hours a week.

LING 2005 [0.5 credit] Linguistic Analysis

Phonological, morphological and syntactic analysis of linguistic data. Coursework consists primarily of practical exercises in data analysis.

Includes: Experiential Learning Activity

Prerequisite(s): LING 1001.

Lecture and tutorial three hours a week.

LING 2007 [0.5 credit]

Phonetics

Description of speech sounds; transcription systems; articulation; acoustics of speech sounds; perception of speech sounds; cross-linguistic diversity and phonetic universals; the role of phonetics in grammar.

Includes: Experiential Learning Activity

Precludes additional credit for LING 2001 (no longer

offered).

Prerequisite(s): LING 1001.

Lecture and tutorial three hours a week.

LING 2504 [0.5 credit]

Language and Communication

Some of the central topics in the study of language and communication as pursued by linguists and philosophers. Topics include: the nature of meaning; the connections between language, communication and cognition; language as a social activity.

Also listed as PHIL 2504, COMS 2504. Prerequisite(s): second-year standing.

Lectures three hours a week.

LING 2604 [0.5 credit]

Communication Differences and Disabilities I

A survey course highlighting a variety of communication differences and disabilities. Specific topics vary from year to year but typically will include speech, language, fluency and hearing differences and disabilities.

Also listed as ALDS 2604.

Prerequisite(s): LING 1001 and second year standing, or permission of the instructor.

Lectures three hours a week.

LING 2802 [0.5 credit] History of the English Language

A historical study of the English language, its structure, variety, and cultural contexts, with an introduction to grammatical terminology and constructions.

Also listed as ENGL 2105.

Prerequisite(s): second-year standing or permission of the department.

Lectures three hours a week.

LING 3004 [0.5 credit]

Syntax I

Introduction to syntactic theory. Representation and analysis of sentence structure, syntactic relations and syntactic dependencies. Testing of grammatical hypotheses.

Includes: Experiential Learning Activity

Prerequisite(s): LING 2005.

Lecture and tutorial three hours a week.

LING 3005 [0.5 credit] Morphology I

Introduction to word structure and morphological theory. Topics include inflectional and derivational morphology, morphological processes, and interaction of morphology with phonology and syntax.

Includes: Experiential Learning Activity
Prerequisite(s): LING 2005 and LING 2007.

LING 3007 [0.5 credit]

Phonology I

The sound-systems of languages, analysis of phonological structure; generative phonology; phonological rules and derivations; cross-linguistic diversity and universals; segmental phonology; stress;

Includes: Experiential Learning Activity Precludes additional credit for LING 3002 (no longer

Prerequisite(s): LING 2001 (no longer offered) or LING 2007.

Lecture and tutorial three hours a week.

LING 3009 [0.5 credit]

Special Topic in Linguistics

Selected topics in general linguistics not ordinarily treated in the regular course program. Contents of the course vary from year to year.

Lectures and discussion three hours per week.

LING 3504 [0.5 credit]

Pragmatics

The study of language in its conversational and cultural contexts. Topics include: conversational implicature; deixis; the semantics-pragmatics boundary; speaker's reference; speech acts. May include cross-cultural pragmatics.

Also listed as PHIL 3504.

Prerequisite(s): third-year standing, and one of LING 1001, PHIL 2001, PHIL 2504/COMS 2504/ LING 2504 or PHIL 3506, or LING 3505 or permission of the Department of Philosophy or School of Linguistics and Language Studies.

Lectures three hours a week.

LING 3505 [0.5 credit]

Semantics

Study of language meaning. Lexical meaning and meanings of larger linguistic expressions, including nominal units, verbal units, and sentences. Meaning relationships between utterances. Relationship between linguistic meaning (semantics) and contextual meaning (pragmatics). Basic formal treatments of semantics. Also listed as PHIL 3506.

Prerequisite(s): third-year standing, and one of LING 1001, PHIL 2001, PHIL 2504/LING 2504/ COMS 2504 or PHIL 3504/LING 3504, or permission of the Department of Philosophy or School of Linguistics and Language Studies.

Lectures three hours a week.

LING 3601 [0.5 credit]

Language Processing and the Brain

Introduction to adult language processing and neurolinguistics. Psychological processes underlying speech production and perception, word recognition and sentence processing. Biological foundation and neuro-cognitive mechanisms of language. Experimental techniques and methodologies of current psycholinguistic studies.

Includes: Experiential Learning Activity

Also listed as PSYC 3709.

Prerequisite(s): LING 1001 or PSYC 2700 and second-

year standing, or permission of the instructor.

Lectures three hours a week.

LING 3603 [0.5 credit] Child Language

Milestones associated with the development of grammatical, pragmatic and metalinguistic competence from birth to about age ten, and the relative contributions of the environment, cognitive development and inborn knowledge to this development.

Includes: Experiential Learning Activity

Also listed as PSYC 3508.

Prerequisite(s): LING 1001 and second-year standing, or permission of the instructor.

Lectures three hours a week.

LING 3604 [0.5 credit]

Communication Differences and Disabilities II

An in-depth examination of select topics in the field of communication differences and disabilities. An emphasis is placed on theoretical accounts of specific differences and disabilities and the cross-linguistic evidence for these accounts. Specific topics may vary from year to year. Also listed as ALDS 3604.

Prerequisite(s): LING 1001 and one of ALDS 2604 or LING 2604.

Lectures three hours a week.

LING 3701 [0.5 credit] **Corpus Linguistics**

Computer-assisted analysis of electronic collections of naturally occurring language. Applications in such areas as language variation, grammar, lexicology, phraseology, translation, and learner language.

Includes: Experiential Learning Activity

Also listed as ALDS 3701.

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

LING 3702 [0.5 credit]

Sociolinguistics

The place of language within society; bilingual and multilingual communities; language, social mobility and social stratification; sociolinguistic factors in language change.

Also listed as ALDS 3202.

Precludes additional credit for ALDS 2701 (no longer offered).

Prerequisite(s): ALDS 1001 and third-year standing. Lecture three hours a week.

LING 3801 [0.5 credit]

Structure of a Specific Language

Description and analysis of the structure of a specific language applying phonology, morphology, syntax, and semantics. Language to be studied will be announced in advance by the School.

Prerequisite(s): LING 2001 (no longer offered) or LING 2005 or LING 2007.

Lectures three hours a week.

LING 3810 [0.5 credit] Historical Linguistics I

Language change; sound change; analogy; the comparative method; internal reconstruction; the philological method; historical linguistics and pre-history; language change and theories of grammar.

Precludes additional credit for LING 3101 (no longer offered).

Prerequisite(s): LING 2007. Lectures three hours a week.

LING 3811 [0.5 credit]

Language Typology and Universals

Cross-linguistic survey of syntactic and morphological patterns found in the languages of the world. Typological classification and identification of language universals. Includes: Experiential Learning Activity

Precludes additional credit for LING 3001 (no longer offered).

Prerequisite(s): LING 2005. Lectures three hours a week.

LING 3900 [1.0 credit] Independent Study

Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Linguistics.

Includes: Experiential Learning Activity Prerequisite(s): permission of the instructor.

LING 3901 [0.5 credit] Independent Study

Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Linguistics.

Includes: Experiential Learning Activity
Prerequisite(s): permission of the instructor.

LING 4004 [0.5 credit]

Syntax II

Advanced topics in syntax.

Includes: Experiential Learning Activity

Precludes additional credit for LING 4002 (no longer

offered).

Prerequisite(s): LING 3004 and third-year standing.

Seminars three hours a week.

LING 4005 [0.5 credit] Morphology II

Advanced topics in morphology. Includes: Experiential Learning Activity

Prerequisite(s): LING 3005 and third-year standing.

Seminars three hours a week.

LING 4007 [0.5 credit] Phonology II

Advanced topics in phonology.

Includes: Experiential Learning Activity

Precludes additional credit for LING 4001 (no longer

offered).

Prerequisite(s): LING 3007, and third-year standing.

Seminars three hours a week.

LING 4009 [0.5 credit]

Special Topic in Linguistics

Examination of a topic or more specialized area in linguistics or language study. Topic to be announced.

Repeatable for credit when the topic changes.

Prerequisite(s): third- or fourth-year standing in Linguistics or permission of the instructor.

Also offered at the graduate level, with different

requirements, as LING 5009, for which additional credit is precluded.

LING 4412 [0.5 credit]

Diversité du français

Études des variétés du français, dans ses dimensions spatiales. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. The course is taught in French, but students will submit written assignments in English. Also listed as FREN 4412.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5412 and LING 5412, for which additional credit is precluded.

Seminars three hours a week.

LING 4413 [0.5 credit] Diachronie du français

Étude du français, dans ses dimensions historiques. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. The course is taught in French, but students will submit written assignments in English. Also listed as FREN 4413.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5413 and LING 5413, for which additional credit is precluded.

Seminars three hours a week.

LING 4414 [0.5 credit] Analyse du français

Étude du français, dans ses dimensions morphologiques, syntaxiques ou phonologiques. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. Course is taught in French, but students will submit written assignments in English.

Also listed as FREN 4414.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5414 and LING 5414, for which additional credit is precluded.

Seminars three hours a week.

LING 4415 [0.5 credit] Variation du français

Étude des variations internes de la langue, dans des dimensions orales/écrites. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. Course is taught in French, but students submit assignments in English.

Also listed as FREN 4415.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5415 and LING 5415, for which additional credit is precluded.

Seminars three hours a week.

LING 4505 [0.5 credit] Formal Semantics

Advanced topics in compositional semantics and its interfaces. Topics may include: logic, semantic types, lambda calculus, intentional contexts, possible world semantics, interfaces with syntax and pragmatics quantification, anaphora, presupposition, implicatures, scope and binding, and model theory. Includes: Experiential Learning Activity

Also listed as PHIL 4505.

Prerequisite(s): LING 3505 or PHIL 3506, and third-year standing, or permission of the Department of Philosophy or School of Linguistics and Language Studies. Seminars three hours a week.

LING 4510 [0.5 credit]

Lexical Semantics

Study of the meaning of words. Topics may include lexical decomposition, meaning variation, lexical relations, and lexical aspect.

Includes: Experiential Learning Activity Also listed as PHIL 4055.

Precludes additional credit for LING 4055 (no longer offered).

Prerequisite(s): LING 3505 or PHIL 3506, and third-year standing.

Also offered at the graduate level, with different requirements, as LING 5510, for which additional credit is precluded.

LING 4601 [0.5 credit]

Cognitive Neuroscience of Language

Further study of psychological and neurolinguistic mechanisms of adult language processing. May include topics from first language acquisition.
Includes: Experiential Learning Activity
Prerequisite(s): LING 3601 or permission of the instructor.

Also offered at the graduate level, with different requirements, as LING 5601, for which additional credit is precluded.

Seminars three hours a week.

LING 4603 [0.5 credit]

First Language Acquisition

Advanced topics in language acquisition and development and the relative contributions of the environment, cognitive development, and inborn knowledge.

Includes: Experiential Learning Activity
Prerequisite(s): LING 1001 and LING 3603.
Also offered at the graduate level, with different requirements, as LING 5603, for which additional credit is precluded.

Seminars three hours a week.

LING 4604 [0.5 credit]

Practicum in Speech Language Pathology

Through field placements, students pursue personal learning objectives related to speech-language pathology, with a focus on the clinical application of knowledge gained in the Psycholinguistics and Communication Differences concentration.

Includes: Experiential Learning Activity
Prerequisite(s): LING 3604, fourth-year Honours standing
in B.A. or B.Sc. in Linguistics with a Concentration in
Psycholinguistics and Communication Disorders with
a CGPA of 10.0 in the major, and permission from the
School of Linguistics and Language Studies.
Field placement one day a week.

LING 4605 [0.5 credit]

Psycholinguistic Research Methods

Experimental methodologies used in current psycholinguistic studies. Topics include experimental design and techniques, descriptive statistics, and interpreting and reporting research findings. Includes: Experiential Learning Activity Precludes additional credit for LING 4009 Section "A" (2015-16 and 2016-17) and LING 4009 Section "B" (2013-14) and LING 4009 Section "C" (2017-18). Prerequisite(s): third- or fourth-year standing and LING 3601, or permission of the instructor. Also offered at the graduate level, with different requirements, as LING 5605, for which additional credit is precluded.

Seminar three hours a week.

LING 4606 [0.5 credit]

Statistics for Language Research

Application of statistical procedures to analysis of language data and to problems of measurement in experimental linguistics, applied linguistics, psycholinguistics, and related fields. Includes: Experiential Learning Activity Also listed as ALDS 4606.

Precludes additional credit for ALDS 4906/LING 4009 Section "B" if taken Winter 2015 or Winter 2016. Prerequisite(s): Third-year standing in Linguistics or Applied Linguistics and Discourse Studies or Cognitive Science, or permission of the instructor. Also offered at the graduate level, with different requirements, as LING 5606 and ALDS 5604, for which additional credit is precluded. Seminar three hours a week.

LING 4801 [0.5 credit] Linguistic Field Methods

With a language consultant, students discover the phonological, morphological, and syntactic structures of the target language using linguistic elicitation. Language will vary from year to year, but will normally be a non-European language. Language documentation, data management, ethical issues surrounding research in Indigenous communities.

Includes: Experiential Learning Activity
Prerequisite(s): LING 2005 and LING 2007.
Also offered at the graduate level, with different requirements, as ALDS 5801, for which additional credit is precluded.

Lectures three hours a week.

LING 4802 [0.5 credit]

Historical Linguistics: English

A theory-intensive course that will study the development of English starting with Proto-Indo-European progressing through Common Germanic to the stages of English itself. Topics include phonological sound changes, phonemic inventories, and morphological and syntactic typology. Precludes additional credit for LING 4101 (no longer offered)

Prerequisite(s): LING 2005 and LING 2007, and one of LING 3005, LING 3810 or LING 3811.

Also offered at the graduate level, with different requirements, as LING 5802, ENGL 5101., for which additional credit is precluded.

Seminars three hours a week.

LING 4805 [0.5 credit] Old English

Studies in Old English literature and its cultural and historical contexts. Instruction in grammar to facilitate reading knowledge of the Old English language.

Also listed as ENGL 4105.

Precludes additional credit for ENGL 3102 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

LING 4900 [1.0 credit] Independent Study in Linguistics

Permits fourth-year Honours students to pursue their interests in a selected area of linguistics.

Prerequisite(s): permission of the instructor.

LING 4901 [0.5 credit] Independent Study in Linguistics

Permits fourth-year Honours students to pursue their interests in a selected area of linguistics.

Prerequisite(s): permission of the instructor.

LING 4905 [1.0 credit]

Honours Project in Experimental Linguistics

Students choose existing study in linguistic literature, replicate the study, present findings, compare to original study. Practical experience gathering and preparing materials, running experiments, analyzing data, interpreting findings; real, important contributions to the field of linguistics via replication studies (as mandated by the scientific method).

Includes: Experiential Learning Activity
Precludes additional credit for LING 4910.
Prerequisite(s): fourth-year Honours standing in
Linguistics, with a Major CGPA of 9.0, and permission of
the instructor.
Unscheduled.

LING 4910 [1.0 credit]

Honours Thesis in Linguistics

and carried out under the direction of a faculty supervisor. Includes: Experiential Learning Activity
Precludes additional credit for LING 4905.
Prerequisite(s): fourth-year Honours standing in
Linguistics with a CGPA of 10.0 in the major; one of
LING 3004, LING 3007, LING 3505, or LING 3601; and
permission of the instructor.

A thesis project selected in consultation with the School

Linguistics (Bachelor of Science)

This section presents the requirements for programs in:

- Linguistics with Concentration in Computer Science B.Sc. Honours
- Linguistics with Concentration in Neuroscience B.Sc. Honours
- Linguistics with Concentration in Psychology B.Sc. Honours
- Psycholinguistics and Communication Differences with Concentration in Computer Science B.Sc. Honours
- Psycholinguistics and Communication Differences with Concentration in Neuroscience B.Sc. Honours
- Psycholinguistics and Communication Differences with Concentration in Psychology B.Sc. Honours

Linguistics

with Concentration in Computer Science B.Sc. Honours (20.0 credits)

To	otal Credits		20.0

School Language Proficiency Requirement

Students in B.A. Honours, Combined Honours, or 15 credit programs of the School of Linguistics and Language Studies are required, at graduation, to have a working knowledge of a language other than English. Proficiency is determined by successful completion of a 1.0 credit university course in the language or by an oral or written test given by the School.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits: or.
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Approved Experimen	ital ocience ooalses
Biochemistry	
BIOC 2200 [0.5]	Cellular Biochemistry
BIOC 4001 [0.5]	Methods in Biochemistry
BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering
Biology	
BIOL 1103 [0.5]	Foundations of Biology I
BIOL 1104 [0.5]	Foundations of Biology II
BIOL 2001 [0.5]	Animals: Form and Function
BIOL 2002 [0.5]	Plants: Form and Function
BIOL 2104 [0.5]	Introductory Genetics
BIOL 2200 [0.5]	Cellular Biochemistry
BIOL 2600 [0.5]	Ecology
Chemistry	
CHEM 1001 [0.5]	General Chemistry I
CHEM 1002 [0.5]	General Chemistry II

ERTH 2102 [0.5]	Mineralogy to Petrology
ERTH 2404 [0.5]	Engineering Geoscience
ERTH 2802 [0.5]	Field Geology I
ERTH 3111 [0.5]	Vertebrate Evolution: Mammals, Reptiles, and Birds
ERTH 3112 [0.5]	Vertebrate Evolution: Fish and Amphibians
ERTH 3204 [0.5]	Mineral Deposits
ERTH 3205 [0.5]	Physical Hydrogeology
Food Sciences	
FOOD 3001 [0.5]	Food Chemistry
FOOD 3002 [0.5]	Food Analysis
FOOD 3005 [0.5]	Food Microbiology
Geography	
GEOG 1010 [0.5]	Global Environmental Systems
GEOG 3108 [0.5]	Soil Properties
Neuroscience	
NEUR 3206 [0.5]	Sensory and Motor Neuroscience
NEUR 3207 [0.5]	Systems Neuroscience
NEUR 4600 [0.5]	Advanced Lab in Neuroanatomy
Physics	
PHYS 1001 [0.5]	Foundations of Physics I
PHYS 1002 [0.5] PHYS 1003 [0.5]	Foundations of Physics II Introductory Mechanics and Thermodynamics

PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II
PHYS 2202 [0.5]	Wave Motion and Optics
PHYS 2604 [0.5]	Modern Physics I
PHYS 3007 [0.5]	Third Year Physics Laboratory: Selected Experiments and Seminars
PHYS 3606 [0.5]	Modern Physics II
PHYS 3608 [0.5]	Modern Applied Physics

Course Categories for B.Sc. Programs

Science Geography Courses

GEOG 1010 [0.5]	Global Environmental Systems
GEOG 2006 [0.5]	Introduction to Quantitative Research
GEOG 2013 [0.5]	Weather and Water
GEOG 2014 [0.5]	The Earth's Surface
GEOG 3003 [0.5]	Quantitative Geography
GEOG 3010 [0.5]	Field Methods in Physical Geography
GEOG 3102 [0.5]	Geomorphology
GEOG 3103 [0.5]	Watershed Hydrology
GEOG 3104 [0.5]	Principles of Biogeography
GEOG 3105 [0.5]	Climate and Atmospheric Change
GEOG 3106 [0.5]	Aquatic Science and Management
GEOG 3108 [0.5]	Soil Properties
GEOG 4000 [0.5]	Field Studies
GEOG 4005 [0.5]	Directed Studies in Geography
GEOG 4013 [0.5]	Cold Region Hydrology
GEOG 4017 [0.5]	Global Biogeochemical Cycles
GEOG 4101 [0.5]	Two Million Years of Environmental Change
GEOG 4103 [0.5]	Water Resources Engineering
GEOG 4104 [0.5]	Microclimatology
GEOG 4108 [0.5]	Permafrost

Science Psychology Courses

PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
PSYC 2002 [0.5]	Introduction to Statistics in Psychology
PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development
PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives

CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use

ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

	D.Sc. Flogram		
	BIOL 4810 [0.5]	Education Research in Undergraduate Science	
	CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs	
	CHEM 1004 [0.5]	Drugs and the Human Body	
	CHEM 1007 [0.5]	Chemistry of Art and Artifacts	
	ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years	
	ERTH 2415 [0.5]	Natural Disasters	
	ISCI 1001 [0.5]	Introduction to the Environment	
	ISCI 2000 [0.5]	Natural Laws	
	ISCI 2002 [0.5]	Human Impacts on the Environment	
	PHYS 1901 [0.5]	Planetary Astronomy	
	PHYS 1902 [0.5]	From our Star to the Cosmos	
	PHYS 1905 [0.5]	Physics Behind Everyday Life	
	PHYS 2903 [0.5]	Physics Towards the Future	
D	Prohibited Courses		

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I
MATH 1402 [0.5]	Elementary Mathematics for Economics II

all 0000-level courses

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum

admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- B.Sc. (Honours)
- B.Sc. (Major)
- · B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Linguistics (LING) Courses

LING 1001 [0.5 credit]

Introduction to Linguistics I

Nature of language and linguistic knowledge. Formal description and analysis of language: phonetics, phonology, morphology, syntax and semantics. Lecture and tutorial three hours a week.

LING 1002 [0.5 credit] Introduction to Linguistics II

Survey of topics in linguistics: language change, sociolinguistics, language acquisition and processing. May include language typology, language contact and writing systems.

Prerequisite(s): LING 1001 (may be taken concurrently). Lectures three hours a week.

LING 1100 [0.5 credit]

The Mysteries of Language

This course explores some intriguing mysteries of language - whether it is unique to humans, how children master its complexities so easily, how the brain handles language, how languages are born and die. These questions lead us to interesting discoveries about the human mind.

Lectures three hours a week.

LING 2005 [0.5 credit]

Linguistic Analysis

Phonological, morphological and syntactic analysis of linguistic data. Coursework consists primarily of practical exercises in data analysis.

Includes: Experiential Learning Activity

Prerequisite(s): LING 1001.

Lecture and tutorial three hours a week.

LING 2007 [0.5 credit]

Phonetics

Description of speech sounds; transcription systems; articulation; acoustics of speech sounds; perception of speech sounds; cross-linguistic diversity and phonetic universals; the role of phonetics in grammar. Includes: Experiential Learning Activity Precludes additional credit for LING 2001 (no longer offered).

Prerequisite(s): LING 1001.

Lecture and tutorial three hours a week.

LING 2504 [0.5 credit]

Language and Communication

Some of the central topics in the study of language and communication as pursued by linguists and philosophers. Topics include: the nature of meaning; the connections between language, communication and cognition; language as a social activity.

Also listed as PHIL 2504, COMS 2504.

Prerequisite(s): second-year standing. Lectures three hours a week.

LING 2604 [0.5 credit]

Communication Differences and Disabilities I

A survey course highlighting a variety of communication differences and disabilities. Specific topics vary from year to year but typically will include speech, language, fluency and hearing differences and disabilities.

Also listed as ALDS 2604.

Prerequisite(s): LING 1001 and second year standing, or permission of the instructor.

Lectures three hours a week.

LING 2802 [0.5 credit]

History of the English Language

A historical study of the English language, its structure, variety, and cultural contexts, with an introduction to grammatical terminology and constructions.

Also listed as ENGL 2105.

Prerequisite(s): second-year standing or permission of the department.

Lectures three hours a week.

LING 3004 [0.5 credit]

Syntax I

Introduction to syntactic theory. Representation and analysis of sentence structure, syntactic relations and syntactic dependencies. Testing of grammatical hypotheses.

Includes: Experiential Learning Activity

Prerequisite(s): LING 2005.

Lecture and tutorial three hours a week.

LING 3005 [0.5 credit] Morphology I

Introduction to word structure and morphological theory. Topics include inflectional and derivational morphology, morphological processes, and interaction of morphology with phonology and syntax.

Includes: Experiential Learning Activity
Prerequisite(s): LING 2005 and LING 2007.

Lectures three hours a week.

LING 3007 [0.5 credit] Phonology I

The sound-systems of languages, analysis of phonological structure; generative phonology; phonological rules and derivations; cross-linguistic diversity and universals; segmental phonology; stress; tone

Includes: Experiential Learning Activity
Precludes additional credit for LING 3002 (no longer offered)

Prerequisite(s): LING 2001 (no longer offered) or LING 2007.

Lecture and tutorial three hours a week.

LING 3009 [0.5 credit]

Special Topic in Linguistics

Selected topics in general linguistics not ordinarily treated in the regular course program. Contents of the course vary from year to year.

Lectures and discussion three hours per week.

LING 3504 [0.5 credit]

Pragmatics

The study of language in its conversational and cultural contexts. Topics include: conversational implicature; deixis; the semantics-pragmatics boundary; speaker's reference; speech acts. May include cross-cultural pragmatics.

Also listed as PHIL 3504.

Prerequisite(s): third-year standing, and one of LING 1001, PHIL 2001, PHIL 2504/COMS 2504/ LING 2504 or PHIL 3506, or LING 3505 or permission of the Department of Philosophy or School of Linguistics and Language Studies.

Lectures three hours a week.

LING 3505 [0.5 credit] Semantics

Study of language meaning. Lexical meaning and meanings of larger linguistic expressions, including nominal units, verbal units, and sentences. Meaning relationships between utterances. Relationship between linguistic meaning (semantics) and contextual meaning (pragmatics). Basic formal treatments of semantics. Also listed as PHIL 3506.

Prerequisite(s): third-year standing, and one of LING 1001, PHIL 2001, PHIL 2504/LING 2504/ COMS 2504 or PHIL 3504/LING 3504, or permission of the Department of Philosophy or School of Linguistics and Language Studies.

Lectures three hours a week.

LING 3601 [0.5 credit]

Language Processing and the Brain

Introduction to adult language processing and neurolinguistics. Psychological processes underlying speech production and perception, word recognition and sentence processing. Biological foundation and neuro-cognitive mechanisms of language. Experimental techniques and methodologies of current psycholinguistic studies.

Includes: Experiential Learning Activity

Also listed as PSYC 3709.

Prerequisite(s): LING 1001 or PSYC 2700 and secondyear standing, or permission of the instructor.

Lectures three hours a week.

LING 3603 [0.5 credit]

Child Language

Milestones associated with the development of grammatical, pragmatic and metalinguistic competence from birth to about age ten, and the relative contributions of the environment, cognitive development and inborn knowledge to this development.

Includes: Experiential Learning Activity

Also listed as PSYC 3508.

Prerequisite(s): LING 1001 and second-year standing, or permission of the instructor.

Lectures three hours a week.

LING 3604 [0.5 credit]

Communication Differences and Disabilities II

An in-depth examination of select topics in the field of communication differences and disabilities. An emphasis is placed on theoretical accounts of specific differences and disabilities and the cross-linguistic evidence for these accounts. Specific topics may vary from year to year. Also listed as ALDS 3604.

Prerequisite(s): LING 1001 and one of ALDS 2604 or LING 2604.

Lectures three hours a week.

LING 3701 [0.5 credit]

Corpus Linguistics

Computer-assisted analysis of electronic collections of naturally occurring language. Applications in such areas as language variation, grammar, lexicology, phraseology, translation, and learner language.

Includes: Experiential Learning Activity

Also listed as ALDS 3701.

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

LING 3702 [0.5 credit] Sociolinquistics

The place of language within society; bilingual and multilingual communities; language, social mobility and social stratification; sociolinguistic factors in language change.

Also listed as ALDS 3202.

Precludes additional credit for ALDS 2701 (no longer offered).

Prerequisite(s): ALDS 1001 and third-year standing. Lecture three hours a week.

LING 3801 [0.5 credit]

Structure of a Specific Language

Description and analysis of the structure of a specific language applying phonology, morphology, syntax, and semantics. Language to be studied will be announced in advance by the School.

Prerequisite(s): LING 2001 (no longer offered) or LING 2005 or LING 2007.

Lectures three hours a week.

LING 3810 [0.5 credit] Historical Linguistics I

Language change; sound change; analogy; the comparative method; internal reconstruction; the philological method; historical linguistics and pre-history; language change and theories of grammar.

Precludes additional credit for LING 3101 (no longer offered).

Prerequisite(s): LING 2007. Lectures three hours a week.

LING 3811 [0.5 credit]

Language Typology and Universals

Cross-linguistic survey of syntactic and morphological patterns found in the languages of the world. Typological classification and identification of language universals. Includes: Experiential Learning Activity

Precludes additional credit for LING 3001 (no longer

Precludes additional credit for LING 3001 (no longer offered).

Prerequisite(s): LING 2005. Lectures three hours a week.

LING 3900 [1.0 credit] Independent Study

Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Linguistics.

Includes: Experiential Learning Activity Prerequisite(s): permission of the instructor.

LING 3901 [0.5 credit] Independent Study

Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Linguistics.

Includes: Experiential Learning Activity
Prerequisite(s): permission of the instructor.

LING 4004 [0.5 credit]

Syntax II

Advanced topics in syntax.

Includes: Experiential Learning Activity

Precludes additional credit for LING 4002 (no longer

offered).

Prerequisite(s): LING 3004 and third-year standing.

Seminars three hours a week.

LING 4005 [0.5 credit] Morphology II

Advanced topics in morphology. Includes: Experiential Learning Activity

Prerequisite(s): LING 3005 and third-year standing.

Seminars three hours a week.

LING 4007 [0.5 credit]

Phonology II

Advanced topics in phonology.

Includes: Experiential Learning Activity

Precludes additional credit for LING 4001 (no longer

offered).

Prerequisite(s): LING 3007, and third-year standing.

Seminars three hours a week.

LING 4009 [0.5 credit]

Special Topic in Linguistics

Examination of a topic or more specialized area in linguistics or language study. Topic to be announced. Repeatable for credit when the topic changes.

Prerequisite(s): third- or fourth-year standing in Linguistics

or permission of the instructor.

Also offered at the graduate level, with different requirements, as LING 5009, for which additional credit is

Seminars three hours a week.

LING 4412 [0.5 credit]

Diversité du français

Études des variétés du français, dans ses dimensions spatiales. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. The course is taught in French, but students will submit written assignments in English. Also listed as FREN 4412.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5412 and LING 5412, for which additional credit is precluded. Seminars three hours a week.

LING 4413 [0.5 credit] Diachronie du français

Étude du français, dans ses dimensions historiques. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. The course is taught in French, but students will submit written assignments in English. Also listed as FREN 4413.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5413 and LING 5413, for which additional credit is precluded. Seminars three hours a week.

LING 4414 [0.5 credit] Analyse du français

Étude du français, dans ses dimensions morphologiques, syntaxiques ou phonologiques. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. Course is taught in French, but students will submit written assignments in English.

Also listed as FREN 4414.

Prerequisite(s): FREN 2401 and FREN 3050, or

permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5414 and LING 5414, for which additional credit is precluded.

Seminars three hours a week.

LING 4415 [0.5 credit] Variation du français

Étude des variations internes de la langue, dans des dimensions orales/écrites. Le contenu précis de ce cours varie selon les années. Consulter le site web du Département de français pour obtenir les détails. Course is taught in French, but students submit assignments in English.

Also listed as FREN 4415.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5415 and LING 5415, for which additional credit is precluded. Seminars three hours a week.

LING 4505 [0.5 credit]

Formal Semantics

Advanced topics in compositional semantics and its interfaces. Topics may include: logic, semantic types, lambda calculus, intentional contexts, possible world semantics, interfaces with syntax and pragmatics quantification, anaphora, presupposition, implicatures, scope and binding, and model theory.

Includes: Experiential Learning Activity

Also listed as PHIL 4505.

Prerequisite(s): LING 3505 or PHIL 3506, and third-year standing, or permission of the Department of Philosophy or School of Linguistics and Language Studies.

Seminars three hours a week.

LING 4510 [0.5 credit]

Lexical Semantics

Study of the meaning of words. Topics may include lexical decomposition, meaning variation, lexical relations, and lexical aspect.

Includes: Experiential Learning Activity

Also listed as PHIL 4055.

Precludes additional credit for LING 4055 (no longer offered).

Prerequisite(s): LING 3505 or PHIL 3506, and third-year standing.

Also offered at the graduate level, with different requirements, as LING 5510, for which additional credit is precluded.

Seminar three hours a week.

LING 4601 [0.5 credit]

Cognitive Neuroscience of Language

Further study of psychological and neurolinguistic mechanisms of adult language processing. May include topics from first language acquisition.

Includes: Experiential Learning Activity

Prerequisite(s): LING 3601 or permission of the instructor.

Also offered at the graduate level, with different requirements, as LING 5601, for which additional credit is precluded.

Seminars three hours a week.

LING 4603 [0.5 credit] First Language Acquisition

Advanced topics in language acquisition and development and the relative contributions of the environment, cognitive development, and inborn knowledge.

Includes: Experiential Learning Activity
Prerequisite(s): LING 1001 and LING 3603.
Also offered at the graduate level, with different requirements, as LING 5603, for which additional credit is precluded.

Seminars three hours a week.

LING 4604 [0.5 credit]

Practicum in Speech Language Pathology

Through field placements, students pursue personal learning objectives related to speech-language pathology, with a focus on the clinical application of knowledge gained in the Psycholinguistics and Communication Differences concentration.

Includes: Experiential Learning Activity
Prerequisite(s): LING 3604, fourth-year Honours standing in B.A. or B.Sc. in Linguistics with a Concentration in Psycholinguistics and Communication Disorders with a CGPA of 10.0 in the major, and permission from the School of Linguistics and Language Studies.
Field placement one day a week.

LING 4605 [0.5 credit]

Psycholinguistic Research Methods

Experimental methodologies used in current psycholinguistic studies. Topics include experimental design and techniques, descriptive statistics, and interpreting and reporting research findings. Includes: Experiential Learning Activity
Precludes additional credit for LING 4009 Section
"A" (2015-16 and 2016-17) and LING 4009 Section
"B" (2013-14) and LING 4009 Section "C" (2017-18).
Prerequisite(s): third- or fourth-year standing and LING 3601, or permission of the instructor.
Also offered at the graduate level, with different requirements, as LING 5605, for which additional credit is precluded.

Seminar three hours a week.

LING 4606 [0.5 credit]

Statistics for Language Research

Application of statistical procedures to analysis of language data and to problems of measurement in experimental linguistics, applied linguistics, psycholinguistics, and related fields.

Includes: Experiential Learning Activity

Also listed as ALDS 4606.
Precludes additional credit for ALDS 4906/LING 4009
Section "B" if taken Winter 2015 or Winter 2016.
Prerequisite(s): Third-year standing in Linguistics or

Applied Linguistics and Discourse Studies or Cognitive Science, or permission of the instructor.

Also offered at the graduate level, with different requirements, as LING 5606 and ALDS 5604, for which additional credit is precluded.

Seminar three hours a week.

LING 4801 [0.5 credit]

Linguistic Field Methods

With a language consultant, students discover the phonological, morphological, and syntactic structures of the target language using linguistic elicitation. Language will vary from year to year, but will normally be a non-European language. Language documentation, data management, ethical issues surrounding research in Indigenous communities.

Includes: Experiential Learning Activity Prerequisite(s): LING 2005 and LING 2007. Also offered at the graduate level, with different requirements, as ALDS 5801, for which additional credit is precluded.

Lectures three hours a week.

LING 4802 [0.5 credit]

Historical Linguistics: English

A theory-intensive course that will study the development of English starting with Proto-Indo-European progressing through Common Germanic to the stages of English itself. Topics include phonological sound changes, phonemic inventories, and morphological and syntactic typology. Precludes additional credit for LING 4101 (no longer

Prerequisite(s): LING 2005 and LING 2007, and one of LING 3005. LING 3810 or LING 3811.

Also offered at the graduate level, with different requirements, as LING 5802, ENGL 5101., for which additional credit is precluded.

Seminars three hours a week.

LING 4805 [0.5 credit] **Old English**

Studies in Old English literature and its cultural and historical contexts. Instruction in grammar to facilitate reading knowledge of the Old English language. Also listed as ENGL 4105.

Precludes additional credit for ENGL 3102 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

LING 4900 [1.0 credit]

Independent Study in Linguistics

Permits fourth-year Honours students to pursue their interests in a selected area of linguistics. Prerequisite(s): permission of the instructor.

LING 4901 [0.5 credit]

Independent Study in Linguistics

Permits fourth-year Honours students to pursue their interests in a selected area of linguistics. Prerequisite(s): permission of the instructor.

LING 4905 [1.0 credit]

Honours Project in Experimental Linguistics

Students choose existing study in linguistic literature, replicate the study, present findings, compare to original study. Practical experience gathering and preparing materials, running experiments, analyzing data, interpreting findings; real, important contributions to the field of linguistics via replication studies (as mandated by the scientific method).

Includes: Experiential Learning Activity Precludes additional credit for LING 4910. Prerequisite(s): fourth-year Honours standing in Linguistics, with a Major CGPA of 9.0, and permission of the instructor. Unscheduled.

LING 4910 [1.0 credit]

Honours Thesis in Linguistics

A thesis project selected in consultation with the School and carried out under the direction of a faculty supervisor. Includes: Experiential Learning Activity Precludes additional credit for LING 4905. Prerequisite(s): fourth-year Honours standing in Linguistics with a CGPA of 10.0 in the major; one of LING 3004, LING 3007, LING 3505, or LING 3601; and permission of the instructor.

Mandarin Chinese (Minor)

This section presents the requirements for programs in:

Minor in Mandarin Chinese

Minor in Mandarin Chinese (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Mandarin Chinese.

Requirements:

Total Credits

1. 3.0 credits in CHIN	3.0
2. 1.0 credit in CHIN at the 3000-level or higher	1.0
3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language.	
4. The remaining requirements of the major discipline(s) and degree must be satisfied.	

4.0

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

Regulations

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Chinese (CHIN) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

CHIN 1010 [0.5 credit] First-Year Mandarin Chinese I

For students with no knowledge of Mandarin. Oral skills; basic reading and writing skills. Placement test for non-literate speakers of other Chinese languages. Not open to students already literate in any Chinese language. Compulsory attendance.

Precludes additional credit for CHIN 1110. Four hours a week.

CHIN 1020 [0.5 credit] First-Year Mandarin Chinese II

Continuation of first-year Mandarin Chinese. Oral skills; basic reading and writing skills. Compulsory attendance. Precludes additional credit for CHIN 1110.

Prerequisite(s): grade of C or higher in CHIN 1010, or permission of the School.

Four hours a week.

CHIN 1110 [1.0 credit]

Intensive First-Year Mandarin Chinese

For students with no knowledge of Mandarin Chinese. Oral skills; basic reading and writing skills. Placement test for non-literate speakers of other Chinese languages. Not open to students already literate in any Chinese language. Compulsory attendance.

Precludes additional credit for CHIN 1010 and CHIN 1020.

Eight hours a week (one term).

CHIN 2010 [0.5 credit] Second-Year Mandarin Chinese I

Further study of Mandarin Chinese to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for CHIN 2110.

Prerequisite(s): grade of C or higher in CHIN 1020 or CHIN 1110, or permission of the School.

Four hours a week.

CHIN 2020 [0.5 credit] Second-Year Mandarin Chinese II

Continuation of second-year Mandarin Chinese. Further study of Mandarin Chinese to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for CHIN 2110.

Prerequisite(s): grade of C or higher in CHIN 2010 or permission of the School.

Four hours a week.

CHIN 2110 [1.0 credit]

Intensive Second-Year Mandarin Chinese

Further study of Mandarin Chinese to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for CHIN 2010 and CHIN 2020.

Prerequisite(s): grade of C or higher in CHIN 1020 or CHIN 1110, or permission of the School. Eight hours a week (one term).

CHIN 3010 [0.5 credit]

Third-Year Mandarin Chinese I

Continuation of the study of Mandarin Chinese to reach a more advanced level, including ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for CHIN 3015.

Prerequisite(s): grade of C or higher in CHIN 2020, or CHIN 2110, or permission of the School.

Three hours a week.

CHIN 3015 [0.5 credit]

Mandarin Chinese for Heritage Speakers

For students who have attained Mandarin Chinese proficiency in an informal setting, this course builds on existing language skills and develops them in a formal academic setting. The course will formalize grammar awareness and enhance Mandarin Chinese literacy skills. Compulsory attendance.

Precludes additional credit for 1000 and 2000 level CHIN courses, and also for CHIN 3010.

Prerequisite(s): permission of the School.

Three hours a week.

CHIN 3020 [0.5 credit]

Third-Year Mandarin Chinese II

Continuation of third-year Mandarin Chinese. Progress toward reaching a more advanced level, including ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Prerequisite(s): grade of C or higher in CHIN 3010 or CHIN 3015, or permission of the School.

Three hours a week.

CHIN 4010 [0.5 credit]

Fourth-Year Mandarin Chinese I

Development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance. Prerequisite(s): grade of C or higher in CHIN 3020, or

permission of the School.

Three hours a week.

CHIN 4020 [0.5 credit]

Fourth-Year Mandarin Chinese II

Continuation of fourth-year Mandarin Chinese. Further development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance.

Prerequisite(s): grade of C or higher in CHIN 4010, or permission of the School.

Three hours a week.

CHIN 4210 [0.5 credit]

Functional Contemporary Mandarin Chinese I

Further study of Mandarin Chinese to reach a more advanced level, aimed at developing speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Prerequisite(s): grade of C or higher in CHIN 4020, or permission of the School.

Three hours a week.

CHIN 4220 [0.5 credit]

Functional Contemporary Mandarin Chinese II

Continuation of CHIN 4210. Further development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Prerequisite(s): grade of C or higher in CHIN 4210 or permission of the School.

Three hours a week.

CHIN 4380 [0.5 credit]

Topics in Chinese Culture and Society

Selected topics in Chinese culture and society. Repeatable once for credit when topic varies. Taught in English.

Prerequisite(s): Third-year standing in the Minor in Mandarin Chinese, or permission of the instructor. Three hours a week.

CHIN 4900 [1.0 credit] Independent Study

Research in a topic in Mandarin Chinese language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in the Minor in Mandarin Chinese, grade of C or higher in CHIN 4020 or equivalent, and permission of the School.

CHIN 4901 [0.5 credit] Independent Study

Research in a topic in Mandarin Chinese language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in the Minor in Mandarin Chinese, grade of C or higher in CHIN 4020 or equivalent, and permission of the School.

Mathematics and Statistics

This section presents the requirements for programs in:

- Mathematics B. Math. Honours
- Mathematics with Concentration in Stochastics B. Math. Honours
- Computational and Applied Mathematics and Statistics with Concentration B.Math. Honours
- Concentration in Applied Analysis
- · Concentration in Applied Statistics and Probability
- · Concentration in Discrete Mathematics
- · Statistics B. Math. Honours

- Statistics with Concentration in Actuarial Science

- · Mathematics B. Math.
- · Computer Mathematics B. Math.
- · Statistics B. Math.
- Computer Science and Mathematics: Concentration in Computing Theory and Numerical Methods B. Math. Combined Honours
- Computer Science and Mathematics:
 Concentration in Statistics and Computing B. Math.
 Combined Honours
- Mathematics and Physics B.Sc. Double Honours
- Economics and Mathematics B.Math. Combined Honours
- Economics and Statistics B.Math. Combined Honours
- Mathematics (Combined B.Math./M.Sc.) B.Math.
- · Statistics (Combined B.Math./M.Sc.) B.Math.
- Minor in Mathematics
- · Minor in Statistics

Program Requirements

Course Prerequisites

The following courses central to B.Math. programs have grade requirements in their prerequisites:

- MATH 2000 requires C+ in (MATH 1002 (no longer offered) or MATH 2052), or B+ in (MATH 2007 or MATH 1005), and C+ in (MATH 1102 (no longer offered) or MATH 2152), or B+ in (MATH 1107 or MATH 1104).
- MATH 2100 requires C+ in (MATH 1102 (no longer offered) or MATH 2152), or B+ in MATH 2107.
- MATH 2454 requires C+ in (MATH 1002 (no longer offered) or MATH 2052 or MATH 2007or MATH 1005), and C+ in (MATH 1102 (no longer offered) or MATH 2152 or MATH 2107).
- STAT 2655 requires C+ in (MATH 1002 (no longer offered) or MATH 2052 or MATH 2007 or MATH 1005), and C+ in (MATH 1102 (no longer offered) or MATH 2152 or MATH 1107 or MATH 1104).
- MATH 2007 requires MATH 1004 or C- in (MATH 1007 or MATH 1009).
- MATH 2107 requires MATH 1104 or C- in MATH 1107

Course Categories for B.Math. Programs

2000-level Honours Sequence

The following courses constitute the 2000-level Honours Sequence:

Sequence:	
MATH 2000 [1.0]	Multivariable Calculus and Fundamentals of Analysis
MATH 2100 [1.0]	Algebra
MATH 2454 [0.5]	Ordinary Differential Equations (Honours)
STAT 2559 [0.5]	Basics of Statistical Modeling (Honours)

STAT 2655 [0.5]	Introduction to Probability with Applications (Honours)
MATH 2907 [0.5]	Directed Studies (Honours)

3000-level Honours Sequence

The following courses constitute the 3000-level Honours Sequence. Courses in the 3000-level Honours Sequence have grade levels in their prerequisites

have grade levels in th	eir prerequisites
MATH 3001 [0.5]	Real Analysis I (Honours)
MATH 3002 [0.5]	Real Analysis II (Honours)
MATH 3003 [0.5]	Advanced Differential Calculus (Honours)
MATH 3057 [0.5]	Functions of a Complex Variable (Honours)
MATH 3008 [0.5]	Ordinary Differential Equations (Honours)
MATH 3106 [0.5]	Introduction to Group Theory (Honours)
MATH 3158 [0.5]	Rings and Fields (Honours)
MATH 3306 [0.5]	Elements of Set Theory (Honours)
MATH 3355 [0.5]	Number Theory and Applications (Honours)
MATH 3806 [0.5]	Numerical Analysis (Honours)
MATH 3807 [0.5]	Mathematical Software (Honours)
MATH 3855 [0.5]	Discrete Structures and Applications (Honours)
STAT 3506 [0.5]	Stochastic Processes and Applications (Honours)
STAT 3553 [0.5]	Regression Modeling (Honours)
STAT 3558 [0.5]	Elements of Probability Theory (Honours)
STAT 3559 [0.5]	Mathematical Statistics (Honours)

Natural Science Electives

All courses with the following subject codes: BIOC, BIOL, CHEM, ENSC, ERTH, ISAP, ISCI, PHYS

APPROVED ARTS OR SOCIAL SCIENCES ELECTIVES

All courses offered by the Faculty of Arts and Social Sciences and the Faculty of Public Affairs are acceptable as Arts or Social Sciences Electives except for the following courses, which are only accepted for credit as free electives in any program of the School. See item 3 under Prohibited and Restricted Courses below concerning Computer Mathematics programs.

Business

_	usiness	
	BUSI 1001 [0.5]	Principles of Financial Accounting
	BUSI 1002 [0.5]	Management Accounting

PSYC 4001 [0.5]	Special Topics in Psychology

Prohibited and Restricted Courses

- MATH 1805/COMP 1805 can be counted only as a half-credit free elective in Mathematics and Statistics programs.
- 2. The following courses may not be counted for academic credit (even as free electives) in any program offered by the School of Mathematics and Statistics: BIOL 3604, COMS 3001, CRCJ 3001, ECON 1401, ECON 1402, ECON 2201 (no longer offered), ECON 2202 (no longer offered), ECON 2210, ECON 2220 (no longer offered), ECON 2400 (no longer offered), ECON 3001, ECON 3210, ECON 4001, ECON 4002, ECON 4004, ECON 4025 (no longer offered), ECON 4706, ECON 4707, ECON 4713, ECOR 2606, GEOG 2006, GEOG 3003, NEUR 2001, NEUR 2002, NEUR 3001, NEUR 3002, PSCI 2702, PSYC 2001, PSYC 2002, PSYC 3000 [1.0], SOCI 3000, SOCI 3002, SOCI 4009, SOWK 3001, SYSC 2510. Students who have completed ECON 2201 (no longer offered) and ECON 2202 (no longer offered) and enter

- a B.Math. program may be exempted from taking STAT 2507 and STAT 2509 only with permission of the School of Mathematics and Statistics, and provided the grade in ECON 2201 (no longer offered) and ECON 2202 (no longer offered) is B- or higher in each.
- 3. BUSI 1402, BUSI 2402, and COMP 1001 may not count for credit in a B.Math or a Computer Science and Mathematics B.Math Combined Honours program, even as free electives.
- Only one of MATH 3806, COMP 3806 (no longer offered), COMP 3800 (no longer offered), or MATH 3800 may count for credit in a B.Math. program.

Notes:

1. An Honours Essay (ECON 4908 [1.0]) may be written by students with Overall and Major CGPAS of 9.50 or higher. In cases where a grade of B- or higher

- is earned on this essay, it may count for 1.0 credit in ECON at the 4000-level. Qualified students who choose to pursue the Honours Essay option must first complete an Honours Essay prospectus to the satisfaction of both their adviser and the Department of Economics Undergraduate Supervisor.
- The following courses do not count for credit in this program: ECON 1401, ECON 1402, ECON 2201 (no longer offered), ECON 2202 (no longer offered), ECON 2210 , ECON 2220 (no longer offered), ECON 2400 (no longer offered), ECON 3001, ECON 3210, ECON 4001, ECON 4002, ECON 4004, ECON 4025 (no longer offered), ECON 4706, ECON 4707, and ECON 4713.

Notes:

- 1. An Honours Essay ECON 4908 [1.0] may be written by students with Overall and Major CGPAs of 9.50 or higher. In cases where a grade of B- or higher is earned on this essay, it may count for 1.0 credit in ECON at the 4000-level. Qualified students who choose to pursue the Honours Essay option must first complete an Honours Essay prospectus to the satisfaction of both their adviser and the Department of Economics Undergraduate Supervisor.
- 2. MATH 2100 [1.0] may replace MATH 3107 and 0.5 credit in free electives in this program.

Program Requirements for Combined B.Math./ M.Sc.

This "fast-track" program combines the requirements for Bachelor of Mathematics in Mathematics or Statistics, and Master of Science in Mathematics, into a sequence that will enable exceptional students to complete in four years of study.

Entry to this program directly from an Ontario High School requires both of the following:

- an average of 90 per cent or better on Grade 12 Mathematics: Advanced Functions and Grade 12 Mathematics: Calculus and Vectors;
- an average of 85 per cent or better over six credits in Grade 12 courses of University or University/College type.

Admission, continuation and graduation from the undergraduate portion of the program requires a Major CGPA of 11.0 or better and Overall CGPA of 10.00 or better.

Before entry into the fourth year of this program, students must: obtain a recommendation from the School of Mathematics and Statistics to continue, apply to graduate with a B.Math. degree, by the end of January of their third year, and submit an application for graduate studies to the School by mid-February.

Undergraduate Portion

Students may apply for admission to either the Mathematics or the Statistics versions of the program.

	STAT 3558 [0.5]	Elements of Probability Theory (Honours)	
	STAT 3559 [0.5]	Mathematical Statistics (Honours)	
	1.5 credits in MAT oove	H or STAT at the 4000 level or	1.5
В.	Credits Not Includ	ed in the Major CGPA (5.0 credits)	
3.		MATH, STAT, or COMP consisting of:	4.0
		ral Science Electives	
	b. 3.0 credits from Nand Social Sciences	Natural Science, or Approved Arts s electives	
4.	1.0 credit in free e	lectives	1.0
To	otal Credits		15.0

Graduate Portion - M.Sc.

During the graduate portion of the "fast-track" program, the student is registered as a graduate student and is covered by the regulations of the Faculty of Graduate Studies.

5. 1.5 credits at the 5000-level or higher in MATH or STAT	1.5
6. 1.0 credit at the 5000-level or higher in mathematics or statistics or from another department or school	1.0
7. Either:	2.0
MATH 4905 or STAT 4905 and 1.5 credits in MATH or STAT at the 5000-level or higher	
or	
an M.Sc. thesis in Mathematics	
Total Credits	4.5

Minor in Mathematics (4.0 credits)

This minor is open to students in all undergraduate programs except programs of the School of Mathematics and Statistics.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Mathematics.

Requirements

1.	1.0 credit from:		1.0	
	MATH 1007 [0.5] & MATH 2007 [0.5]	Elementary Calculus I Elementary Calculus II		
	or			
	MATH 1004 [0.5] & MATH 1005 [0.5]	Calculus for Engineering or Physics		
		Differential Equations and Infinite Series for Engineering or Physics		
	or			
	MATH 1052 [0.5] & MATH 2052 [0.5]	Calculus and Introductory Analysis I		
		Calculus and Introductory Analysis II		
2.	1.0 credit from:		1.0	
	MATH 1107 [0.5] or MATH 1104 [0	Linear Algebra I .5inear Algebra for Engineering or Scie	nce	
	MATH 2107 [0.5]	Linear Algebra II		
	or			
	MATH 1152 [0.5] & MATH 2152 [0.5]	Introductory Algebra I Introductory Algebra II		
3.	0.5 credit from:		0.5	
	MATH 1800 [0.5]	Introduction to Mathematical Reasoning		
	or			
	0.5 credit in MATH a	at 2000-level		
4.	1.0 credit in MATH	at the 2000-level or higher	1.0	
5.	0.5 credit in MATH	at the 3000-level or higher	0.5	
	The remaining requi d degree must be sa	rements of the major discipline(s) atisfied.		
To	tal Credits		4.0	

Note: As a prerequisite, MATH 1800 opens more options at the 2000-level and above. It is recommended that students taking MATH 1800 do so as early as possible.

Minor in Statistics (4.0 credits)

This minor is open to students in all undergraduate programs except programs of the School of Mathematics and Statistics.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Statistics.

Requirements:

1.	0.5 credit from:		0.5
	MATH 1004 [0.5]	Calculus for Engineering or Physics	
	MATH 1007 [0.5]	Elementary Calculus I	
	MATH 1009 [0.5]	Mathematics for Business	
	MATH 1052 [0.5]	Calculus and Introductory Analysis	
2.	0.5 credit from:		0.5
	MATH 1104 [0.5]	Linear Algebra for Engineering or Science	
	MATH 1107 [0.5]	Linear Algebra I	
	MATH 1119 [0.5]	Linear Algebra: with Applications to Business	
	MATH 1152 [0.5]	Introductory Algebra I	
3.	1.0 credit from:		1.0
	STAT 2507 [0.5] & STAT 2509 [0.5]	Introduction to Statistical Modeling	
		Introduction to Statistical Modeling II	
	or		
	STAT 3502 [0.5] & STAT 2509 [0.5]	Probability and Statistics Introduction to Statistical Modeling II	
	or		
	STAT 2601 [0.5] & STAT 2602 [0.5]	Business Statistics Statistical Models for Business Analytics and Finance	
	or		
	STAT 2601 [0.5] & STAT 2509 [0.5]	Business Statistics Introduction to Statistical Modeling II	
	or		
	ECON 2210 [0.5] &	Introductory Statistics for Economics	
	ECON 3210 [0.5]	Introductory Econometrics	4 =
4.	1.5 credits in:	Degrapaion Analysis	1.5
	STAT 3503 [0.5]	Regression Analysis	
	STAT 3504 [0.5]	Analysis of Variance and Experimental Design	
	STAT 3507 [0.5]	Sampling Methodology	
5.	0.5 credit from:		0.5
	BUSI 1402 [0.5]	Introduction to Business Information and Communication Technologies (Business students only)	
	ECOR 1606 [0.5]	Problem Solving and Computers (Engineering students only)	
	STAT 1500 [0.5]	Introduction to Statistical Computing	
6.	The remaining requi	rements of the major discipline(s)	

Regulations

In addition to the program requirements described here, students must satisfy the University regulations common to all undergraduate students, including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Students should consult with the School of Mathematics and Statistics when planning their program and selecting courses.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or,
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

4.0

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Total Credits

and degree must be satisfied.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be Eligible to Continue (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the Academic Regulations of the University, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

	Biochemistry	
	BIOC 2200 [0.5]	Cellular Biochemistry
	BIOC 4001 [0.5]	Methods in Biochemistry
	BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering
	Biology	
	BIOL 1103 [0.5]	Foundations of Biology I
	BIOL 1104 [0.5]	Foundations of Biology II
	BIOL 2001 [0.5]	Animals: Form and Function
	BIOL 2002 [0.5]	Plants: Form and Function
	BIOL 2104 [0.5]	Introductory Genetics
	BIOL 2200 [0.5]	Cellular Biochemistry
	BIOL 2600 [0.5]	Ecology
	Chemistry	
	CHEM 1001 [0.5]	General Chemistry I
	CHEM 1002 [0.5]	General Chemistry II
	CHEM 2103 [0.5]	Physical Chemistry I
	CHEM 2203 [0.5]	Organic Chemistry I
	CHEM 2204 [0.5]	Organic Chemistry II
	CHEM 2302 [0.5]	Analytical Chemistry I
	CHEM 2303 [0.5]	Analytical Chemistry II
	CHEM 2800 [0.5]	Foundations for Environmental Chemistry
	Earth Sciences	
	ERTH 1002 [0.5]	The Earth and Life Odyssey: A Journey Through Billions of Years
	ERTH 2102 [0.5]	Mineralogy to Petrology
	ERTH 2404 [0.5]	Engineering Geoscience
	ERTH 2802 [0.5]	Field Geology I
	ERTH 3111 [0.5]	Vertebrate Evolution: Mammals, Reptiles, and Birds

ERTH 3112 [0.5]	Vertebrate Evolution: Fish and Amphibians			
ERTH 3204 [0.5]	Mineral Deposits			
ERTH 3205 [0.5]	Physical Hydrogeology			
Food Sciences				
FOOD 3001 [0.5]	Food Chemistry			
FOOD 3002 [0.5]	Food Analysis			
FOOD 3005 [0.5]	Food Microbiology			
Geography				
GEOG 1010 [0.5]	Global Environmental Systems			
GEOG 3108 [0.5]	Soil Properties			
Neuroscience				
NEUR 3206 [0.5]	Sensory and Motor Neuroscience			
NEUR 3207 [0.5]	Systems Neuroscience			
NEUR 4600 [0.5]	Advanced Lab in Neuroanatomy			
Physics				
PHYS 1001 [0.5]	Foundations of Physics I			
PHYS 1002 [0.5]	Foundations of Physics II			
PHYS 1003 [0.5]	Introductory Mechanics and Thermodynamics			
PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion			
PHYS 1007 [0.5]	Elementary University Physics I			
PHYS 1008 [0.5]	Elementary University Physics II			
PHYS 2202 [0.5]	Wave Motion and Optics			
PHYS 2604 [0.5]	Modern Physics I			
PHYS 3007 [0.5]	Third Year Physics Laboratory: Selected Experiments and Seminars			
PHYS 3606 [0.5]	Modern Physics II			
PHYS 3608 [0.5]	Modern Applied Physics			
Carrea Catamani	on for P.Co. Drograms			

Course Categories for B.Sc. Programs

Science Geography Courses				
GEOG 1010 [0.5]	Global Environmental Systems			
GEOG 2006 [0.5]	Introduction to Quantitative Research			
GEOG 2013 [0.5]	Weather and Water			
GEOG 2014 [0.5]	The Earth's Surface			
GEOG 3003 [0.5]	Quantitative Geography			
GEOG 3010 [0.5]	Field Methods in Physical Geography			
GEOG 3102 [0.5]	Geomorphology			
GEOG 3103 [0.5]	Watershed Hydrology			
GEOG 3104 [0.5]	Principles of Biogeography			
GEOG 3105 [0.5]	Climate and Atmospheric Change			
GEOG 3106 [0.5]	Aquatic Science and Management			
GEOG 3108 [0.5]	Soil Properties			
GEOG 4000 [0.5]	Field Studies			
GEOG 4005 [0.5]	Directed Studies in Geography			
GEOG 4013 [0.5]	Cold Region Hydrology			
GEOG 4017 [0.5]	Global Biogeochemical Cycles			
GEOG 4101 [0.5]	Two Million Years of Environmental Change			
GEOG 4103 [0.5]	Water Resources Engineering			
GEOG 4104 [0.5]	Microclimatology			
GEOG 4108 [0.5]	Permafrost			

Science Psychology Courses

PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
PSYC 2002 [0.5]	Introduction to Statistics in Psychology
PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development
PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives

CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

	COMP (Computer Science) except COMP 1001
	ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.
	Engineering
	ENSC 2001
	FOOD (Food Science and Nutrition)
	GEOM (Geomatics)
	HLTH (Health Science)
	ISAP (Interdisciplinary Science Practice)
	MATH (Mathematics)
	NEUR (Neuroscience)
	PHYS (Physics) except PHYS 1901, PHYS 1902, PHYS 1905, PHYS 2903
	Science Geography (see list above)
	Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

BIOL 4810 [0.5]	Education Research in Undergraduate Science
CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
CHEM 1004 [0.5]	Drugs and the Human Body
CHEM 1007 [0.5]	Chemistry of Art and Artifacts
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
ERTH 2415 [0.5]	Natural Disasters
ISCI 1001 [0.5]	Introduction to the Environment
ISCI 2000 [0.5]	Natural Laws
ISCI 2002 [0.5]	Human Impacts on the Environment
PHYS 1901 [0.5]	Planetary Astronomy
PHYS 1902 [0.5]	From our Star to the Cosmos
PHYS 1905 [0.5]	Physics Behind Everyday Life
PHYS 2903 [0.5]	Physics Towards the Future

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:					
COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students				
MATH 1009 [0.5]	Mathematics for Business				
MATH 1119 [0.5]	Linear Algebra: with Applications to Business				
MATH 1401 [0.5]	Elementary Mathematics for Economics I				
MATH 1402 [0.5]	Elementary Mathematics for Economics II				
all 0000-level cours	es				

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search:
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

Bachelor of Mathematics Honours, Combined B.Math./M.Sc.: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to:

- Registered as a full-time student in any B.Math.
 Honours program (excluding the Combined B.Math./
 M.Sc. "Fast Track" program);
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 6.50 and a Major CGPA of at least 8.0. These CGPAs must be maintained throughout the duration of the degree.

B.Math. Honours students must successfully complete four (4) work terms to obtain the Co-op Designation.

Co-op Work Term Course: MATH 3999 or STAT 3999

Work/Study Pattern:

Year 1	Year 2		Year 3			Year 4		Year 5	
Term	Pattern								
Fall	S	Fall	S	Fall	S	Fall	W	Fall	S
Winter	S	Winter	S	Winter	S	Winter	W	Winter	S
Summer		Summer	W	Summe	W	Summer	W		

Legend S: Study W: Work

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

- Bachelor of Mathematics (B. Math.) (Honours)
- Bachelor of Mathematics (B.Math.)

Admission Requirements

B.Math Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions, and Calculus and Vectors.

The overall admission cut-off average and/or the prerequisite course average may be considerably higher than the stated minimum requirements for admission to the combined B.Math./M.Sc. in Mathematics or Statistics.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

B.Math

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions, and Calculus and Vectors.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op Option Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Mathematics Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market (and thus the availability of co-op placement) may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System.

Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- · B.Sc. (Honours)
- · B.Sc. (Major)
- · B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are

described in the Co-operative Education Regulations section of this Calendar.

Mathematics (MATH) Courses

Note

• See also the course listings under Statistics (STAT) in this Calendar.

Prerequisites for First-year Mathematics Courses in B.Math. Programs

Students who do not have the required Ontario Grade 12 Mathematics courses or equivalents may take MATH 0005 Precalculus: Functions and Graphs and MATH 0006 Precalculus: Trigonometric Functions and Complex Numbers in lieu of Advanced Functions, MATH 0107 Algebra and Geometry in lieu of the algebra component of Calculus and Vectors. These 0000-level mathematics courses serve as alternate prerequisites for MATH 1052 Calculus and Introductory Analysis I and MATH 1152 Introductory Algebra I. These courses would be in addition to the minimum 15.0 credits required for B.Math programs, or 20.0 credits required for B.Math Honours programs.

MATH 0005 [0.5 credit]

Precalculus: Functions and Graphs

Review of algebraic manipulations. Polynomials: the remainder theorem, and the factor theorem; graphing. Real and Complex roots. Absolute values. Inequalities. Functions, including composition of functions, and Inverse functions. Logarithmic and exponential functions. Not available for degree credit for students who have successfully completed: Grade 12 Mathematics - Advanced Functions, or an equivalent High School functions course.

Prerequisite(s): Grade 11 Functions (University/College Preparation), or equivalent.

Lectures three hours a week, tutorial one hour a week.

MATH 0006 [0.5 credit]

Precalculus: Trigonometric Functions and Complex Numbers

Angles and the unit circle, radian measure. Definitions of trigonometric functions. Fundamental relations, Law of Sines and Cosines. Analytic trigonometry, graphs, inverse functions. Trigonometric identities and equations. Applications in science and engineering. Complex numbers in polar form, de Moivre's Theorem, n-th roots of complex numbers.

Prerequisite(s): Grade 11 Functions (University/College Preparation), or MATH 0005, or equivalent. Lectures three hours a week, tutorial one hour a week.

MATH 0009 [0.5 credit] Calculus and Vectors

Limits and continuity. Differentiation rules. Trigonometric, logarithmic, and exponential functions, and their derivatives. Curve sketching. Optimization problems. Introduction to vectors. Dot and cross products. Projections. Equations of lines and planes. Intersection points and distances between points, lines, and planes. Precludes additional credit for MATH 0007. Prerequisite(s): Grade 12 Mathematics (Advanced Functions); or both MATH 0005 and MATH 0006; or permission of the School.

Lectures three hours a week, tutorial one hour a week.

MATH 0107 [0.5 credit] Algebra and Geometry

Vectors in the plane and in 3-space. Linear combinations and linear independence. Equations of lines and planes in space. Solution of systems of linear equations. Proofs by induction. Binomial Theorem. Logic.

Prerequisite(s): Grade 11 Functions (University/College Preparation) or equivalent.

Lectures three hours a week, tutorial one hour a week.

MATH 1004 [0.5 credit] Calculus for Engineering or Physics

Limits. Differentiation of the elementary functions. Rules of differentiation. Inverse trigonometric functions. Applications of differentiation: max-min problems, curve sketching, approximations. Definite and indefinite integrals, techniques of integration. Applications to areas and volumes.

Precludes additional credit for BIT 1000, BIT 1100, BIT 1200, MATH 1002 (no longer offered), MATH 1007, MATH 1052.

Prerequisite(s): Ontario Grade 12 Mathematics: Advanced Functions, or MATH 0005 and MATH 0006, or equivalent. Restricted to students in the Faculty of Engineering, or in certain B.Sc. and B.A.S. programs where specified. Lectures three hours a week, tutorial one hour a week.

MATH 1005 [0.5 credit] Differential Equations and Infinite Series for Engineering or Physics

First-order differential equations. Second-order linear equations with constant coefficients, undetermined coefficients, variation of parameters. Sequences and series, convergence tests, estimation of sums. Power series, Taylor series, remainders. Fourier series. Precludes additional credit for BIT 2004 (no longer offered), BIT 2007 (no longer offered), MATH 1002 (no longer offered), MATH 2007, MATH 2052, and MATH 2404.

Prerequisite(s): i) MATH 1004; and ii) MATH 1104 (or MATH 1107), either previously or concurrently; or equivalents; or permission of the School. Restricted to students in the Faculty of Engineering, or in certain B.Sc. programs where specified.

Lectures three hours a week, tutorial one hour a week.

MATH 1007 [0.5 credit] Elementary Calculus I

Limits. Differentiation of the elementary functions, including trigonometric functions. Rules of differentiation. Applications of differentiation: max-min problems, curve sketching, approximations. Introduction to integration: definite and indefinite integrals, areas under curves, fundamental theorem of calculus.

Precludes additional credit for BIT 1000, BIT 1100, BIT 1200, MATH 1002 (no longer offered), MATH 1004, MATH 1401/ECON 1401, MATH 1402/ECON 1402, MATH 1052.

Prerequisite(s): Ontario Grade 12 Mathematics: Advanced Functions; or MATH 0005 and MATH 0006; or equivalent. Lectures three hours a week, tutorial one hour a week.

MATH 1009 [0.5 credit] Mathematics for Business

An introductory course of mathematics for business. Thorough review of basic arithmetic and algebra. Elementary functions, their graphs, properties and applications in business models. Limits. Derivatives of elementary functions. Systems of linear equations/inequalities. Geometric series.

Precludes additional credit for BIT 1000, BIT 1100, BIT 1200, BUSI 1705 (no longer offered), MATH 1401/ ECON 1401, MATH 1052. This course is not acceptable for (substitute) credit in any of the following degree programs: B.Math., and also B.Sc., B.C.S., B.Eng., B.I.D. Prerequisite(s): Restricted to B.Com. and B.I.B students. Lectures three hours a week, tutorial one hour a week.

MATH 1052 [0.5 credit]

Calculus and Introductory Analysis I

Properties of the real numbers. Limits. Sequences and series. Elementary functions. Continuity. Derivatives. Extreme values. Mean Value Theorem. L'Hospital's rules. Antiderivatives. An emphasis is placed on proofs and theory.

Precludes additional credit for BIT 1000, BIT 1100, BIT 1200, MATH 1002 (no longer offered), MATH 1004, MATH 1007, MATH 1009, MATH 1401/ECON 1401, MATH 1402/ECON 1402.

Prerequisite(s): i) Grade 12 Mathematics: Advanced Functions, and Grade 12 Mathematics: Calculus and Vectors, with grades of at least 75% in each; or MATH 0005 and MATH 0006 with grades of at least B in each; or equivalents; and ii) MATH 1800 (may be taken concurrently); or permission of the School of Mathematics and Statistics

Lectures three hours a week, tutorial one and one half hours a week.

MATH 1104 [0.5 credit]

Linear Algebra for Engineering or Science

B.Sc. and B.A.S. programs where specified.

Lectures three hours a week and tutorial one hour a

Systems of linear equations. Matrix algebra.

Determinants. Invertible matrix theorem. Cramer's rule.

Vector space R^n; subspaces, bases. Eigenvalues,
diagonalization. Linear transformations, kernel, range.

Complex numbers (including De Moivre's theorem). Inner
product spaces and orthogonality. Applications.

Precludes additional credit for BIT 1001, BIT 1101,
BIT 1201, MATH 1102 (no longer offered), MATH 1107,
MATH 1119, MATH 1401/ECON 1401, MATH 1402/
ECON 1402, MATH 1152. Note: MATH 1119 is not an
acceptable substitute for MATH 1104.

Prerequisite(s): Ontario Grade 12 Mathematics: Advanced
Functions, or MATH 0005, or equivalent, or permission
of the School. Restricted to students in the Faculty of
Engineering, the School of Computer Science, or in certain

MATH 1107 [0.5 credit] Linear Algebra I

Systems of linear equations; vector space of n-tuples, subspaces, bases; matrix transformations, kernel, range; matrix algebra and determinants. Dot product. Complex numbers (including de Moivre's Theorem, and n-th roots). Eigenvalues, diagonalization and applications. Note: MATH 1119 is not an acceptable substitute for MATH 1107.

Precludes additional credit for BIT 1001, BIT 1101, BIT 1201, MATH 1102 (no longer offered), MATH 1104, MATH 1119, MATH 1401/ECON 1401, MATH 1402/ECON 1402, MATH 1152.

Prerequisite(s): Ontario Grade 12 Mathematics: Advanced Functions, or MATH 0005, or equivalent, or permission of the School.

Lectures three hours a week and tutorial one hour a week.

MATH 1119 [0.5 credit]

Linear Algebra: with Applications to Business

Introduction to systems of linear equations, geometric interpretation in two and three dimensions, introduction to matrices, vector addition and scalar multiplication, linear dependence, matrix operations, rank, inversion, invertible matrix theorem, determinants. Use of illustrative examples related to business.

Precludes additional credit for , but is not an acceptable substitute for: BIT 1001, BIT 1101, BIT 1201, MATH 1102 (no longer offered), MATH 1104, MATH 1107. BUSI 1704 (no longer offered), MATH 1109 (no longer offered), MATH 1401/ECON 1401, MATH 1402/ECON 1402, MATH 1152. This course is not acceptable for (substitute) credit in any of the following degree programs: B.Math., and also B.Sc., B.C.S., B.Eng., B.I.D.

Prerequisite(s): Ontario Grade 12 Mathematics of Data Management; or Ontario Grade 12 Mathematics: Advanced Functions, or MATH 0005, or equivalent, or permission of the School.

Lectures three hours a week, tutorial one hour a week.

week.

MATH 1152 [0.5 credit] Introductory Algebra I

Properties of numbers. Modular arithmetic. Fields, including complex numbers and finite fields. Vector spaces. Matrix algebra. Solutions of linear systems. Linear dependence. Spanning sets. Bases. Subspaces. The rank-nullity theorem. Linear transformations. An emphasis is placed on proofs and theory.

Precludes additional credit for BIT 1001, BIT 1101, BIT 1201, MATH 1102 (no longer offered), MATH 1104, MATH 1107, MATH 1119, MATH 1401/ECON 1401, MATH 1402/ECON 1402.

Prerequisite(s): i) Grade 12 Mathematics: Advanced Functions, and Grade 12 Mathematics: Calculus and Vectors, with grades of at least 75% in each; or MATH 0005, MATH 0006, and MATH 0107 with grades of at least B in each; or equivalents; and ii) MATH 1800 (may be taken concurrently); or permission of the School of Mathematics and Statistics.

Lectures three hours a week, tutorial one and a half hours a week.

MATH 1401 [0.5 credit]

Elementary Mathematics for Economics I

Functional relations: functional forms and error terms. Graphing economic magnitudes: scatter diagrams, timeseries graphs, functional relationships. Applied calculus: mechanics of differentiation and integration, elasticity, consumer/producer surplus. Applied algebra: solving systems of linear equations and Keynesian national-income analysis. Problem solving approaches. Precludes additional credit for BIT 1000, BIT 1001, BIT 1100, BIT 1101, BIT 1200, BIT 1201, ECON 1401, MATH 1007, MATH 1009, MATH 1052, MATH 1104, MATH 1107, MATH 1119, MATH 1152.

Prerequisite(s): Ontario Grade 12 U Advanced Functions, or MATH 0005, or equivalent; and ECON 1000 or FYSM 1003, which may be taken concurrently with MATH 1401/ECON 1401.

Lectures three hours a week, tutorial one hour a week.

MATH 1402 [0.5 credit]

Elementary Mathematics for Economics II

Calculus: including partial differentiation, definite and indefinite integrals, techniques of integration, and unconstrained optimization. Vectors and matrices: scalar multiplication, inner product, linear dependence, matrix operations, rank, invertible matrix theorem, and determinants. Economic applications such as profit maximization, comparative statics, and the Leontief inputoutput model.

Precludes additional credit for BIT 1000, BIT 1001, BIT 1100, BIT 1101, BIT 1200, BIT 1201, ECON 1402, MATH 1007, MATH 1009, MATH 1052, MATH 1104, MATH 1107, MATH 1119, MATH 1152.

Prerequisite(s): ECON 1000 or FYSM 1003 with a grade of C- or higher, and ECON 1401/MATH 1401 with a grade of C- or higher.

Lectures three hours a week, tutorial one hour a week.

MATH 1800 [0.5 credit]

Introduction to Mathematical Reasoning

Elementary logic, propositional and predicate calculus, quantifiers, sets and functions, bijections and elementary counting, the concept of infinity, relations, well ordering and induction. The practice of mathematical proof in elementary number theory and combinatorics.

Precludes additional credit for MATH 1805/COMP 1805.

Prerequisite(s): Ontario Grade 12 Mathematics: Advanced Functions, or MATH 0005, or equivalent.

Lectures three hours a week, tutorial one hour a week.

MATH 1805 [0.5 credit] Discrete Structures I

Introduction to discrete mathematics and discrete structures. Topics include: propositional logic, predicate calculus, set theory, complexity of algorithms, mathematical reasoning and proof techniques, recurrences, induction, finite automata and graph theory. Material is illustrated through examples from computing. Includes: Experiential Learning Activity Precludes additional credit for MATH 1800. Prerequisite(s): one Grade 12 university preparation Mathematics course; and one of: COMP 1005 or or COMP 1405 or SYSC 1100 (which may be taken concurrently).

Lectures three hours a week, tutorial one hour a week.

MATH 2000 [1.0 credit]

Multivariable Calculus and Fundamentals of Analysis

Higher dimensional calculus, chain rule, gradient, line and multiple integrals with applications. Use of implicit and inverse function theorems. Real number axioms, limits, continuous functions, differentiability, infinite series, uniform convergence, the Riemann integral. Precludes additional credit for BIT 2005 (no longer offered), MATH 2004, MATH 2008, and MATH 3009. Prerequisite(s): i) MATH 2052 with a grade of C+ or higher, or (MATH 2007 or MATH 1005 with a grade of B+ or higher and permission of the School); and ii) MATH 2152 with a grade of C+ or higher, or MATH 1107 or MATH 1104 with a grade of B+ or higher; and iii) MATH 1800 with a grade of C+ or higher; or permission of the School.

Lectures three hours a week, tutorial one hour a week.

MATH 2004 [0.5 credit]

Multivariable Calculus for Engineering or Physics

Curves and surfaces. Polar, cylindrical and spherical coordinates. Partial derivatives, gradients, extrema and Lagrange multipliers. Exact differentials. Multiple integrals over rectangular and general regions. Integrals over surfaces. Line integrals. Vector differential operators. Green's Theorem, Stokes' theorem, Divergence Theorem. Applications.

Precludes additional credit for BIT 2005, MATH 2000, and MATH 2008.

Prerequisite(s): i) MATH 1005 or MATH 2007; and ii) MATH 1104 or MATH 1107; or permission of the School. Restricted to students in the Faculty of Engineering, or in certain B.Sc. programs where specified.

Lectures three hours a week, tutorial one hour a week.

MATH 2007 [0.5 credit] Elementary Calculus II

Techniques of integration, improper integrals. Polar coordinates, parametric equations. Indeterminate forms, sequences and series, Taylor's formula and series. Precludes additional credit for BIT 2007 (no longer offered), MATH 1002 (no longer offered), MATH 1005, MATH 2052.

Prerequisite(s): i) MATH 1004, or a grade of C- or higher in MATH 1007; or MATH 1052 and permission of the School.

Lectures three hours a week, tutorial one hour a week.

MATH 2008 [0.5 credit] Intermediate Calculus

Partial differentiation, chain rule, gradient, line and multiple integrals with applications, transformations of multiple integrals.

Precludes additional credit for BIT 2005 (no longer offered), MATH 2000, and MATH 2004.

Prerequisite(s): one of MATH 1005, MATH 2052, or MATH 2007, and one of MATH 1104, MATH 1107, or MATH 1152.

Lectures three hours a week and one hour tutorial.

MATH 2052 [0.5 credit]

Calculus and Introductory Analysis II

Definite, indefinite integrals. Improper integrals. The fundamental theorem of calculus. An introduction to differential equations. Sequences and series of functions. Power series. Taylor's formulae. Uniform convergence. An emphasis is placed on proofs and theory.

Precludes additional credit for BIT 2007, MATH 1002 (no longer offered), MATH 1005, MATH 2007.

Prerequisite(s): (i) MATH1052 with a grade of C- or higher or (MATH1007 or MATH1004 with a grade of B+ or higher and permission of the School), and (ii) MATH1800 with a grade of C+ or higher; or permission of the School. Lectures three hours a week, tutorial one and one half hours a week.

MATH 2100 [1.0 credit] Algebra

Introduction to group theory: permutation groups, Lagrange's theorem, normal subgroups, homomorphism theorems. Introduction to ring theory: ring of polynomials, integral domains, ideals, homomorphism theorems. Hermitian forms, spectral theorem for normal operators, bilinear and quadratic forms, classical groups. Precludes additional credit for MATH 2108 and MATH 3101.

Prerequisite(s): i) MATH 2152 with a grade of C+ or higher, or (MATH 2107 with a grade of B+ or higher and permission of the School); and ii) MATH 1800 with a grade of C+ or higher; or permission of the School.

Lectures three hours a week, tutorial one hour a week.

MATH 2107 [0.5 credit] Linear Algebra II

Finite-dimensional vector spaces (over R and C), subspaces, linear independence and bases. Linear transformations and matrices. Inner product spaces (over R and C); Orthonormal bases. Eigenvalues and diagonalization. Bilinear and quadratic forms; principal axis theorem.

Precludes additional credit for MATH 1102 (no longer offered), MATH 2152.

Prerequisite(s): i) MATH 1104, or a grade of C- or higher in MATH 1107 or MATH 1109; and ii) a grade of C- or higher in MATH 1007 or equivalent; or MATH 1152 and permission of the School. Note: in item i), MATH 1119 is NOT acceptable as a substitute for MATH 1109. Lectures three hours a week and one hour tutorial.

MATH 2108 [0.5 credit] Abstract Algebra I

Sets and relations, number theory, group theory, ring theory, cardinal numbers.

Precludes additional credit for MATH 3101 and MATH 2100.

Prerequisite(s): i) MATH 2152 or MATH 2107; and ii) MATH 1800 (MATH 1800 may be taken concurrently, with permission of the School); or COMP 1805; or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 2152 [0.5 credit] Introductory Algebra II

Linear transformations. Determinants. Eigenvalues and eigenspaces. Diagonalization and other canonical forms. Inner products. An emphasis is placed on proofs and theory.

Precludes additional credit for MATH 1102 (no longer offered) and MATH 2107.

Prerequisite(s): (i) MATH1152 with a grade of C- or higher or (MATH1107 or MATH1104 with a grade of B+ or higher and permission of the School), and (ii) MATH1800 with a grade of C+ or higher; or permission of the School.

Lectures three hours a week, tutorial one and a half hours a week.

MATH 2210 [0.5 credit] Introduction to Geometry

An introduction to classical geometry; Euclidean plane geometry; plane tiling; polytopes in three and four dimensions; curved surfaces; Euler characteristic. This course is intended for a general audience, and is available to B.Math. students for credit only as a free elective. Prerequisite(s): Grade 12 Mathematics and second-year standing.

Lectures three hours a week, tutorial one hour a week.

MATH 2404 [0.5 credit] Ordinary Differential Equations I

First-order equations, linear second- and higher-order equations, linear systems, stability of second-order systems.

Precludes additional credit for BIT 2004 (no longer offered), MATH 1005, MATH 2454.

Prerequisite(s): MATH 2052 and MATH 1152 (or MATH 1107 and MATH 2007).

Lectures three hours a week and one hour tutorial.

MATH 2454 [0.5 credit] Ordinary Differential Equations (Honours)

Existence and uniqueness theorems. First-order equations, linear second- and higher-order equations, linear systems, stability of second-order systems.

Precludes additional credit for MATH 2404, BIT 2004 (no longer offered).

Prerequisite(s): MATH 2052 or MATH 2007 or MATH 1005 with a grade of C+ or higher, and MATH 2152 or MATH 2107 with a grade of C+ or higher.

Lectures three hours a week, tutorial one hour a week.

MATH 2800 [0.5 credit]

Discrete Mathematics and Algorithms

An introduction to discrete mathematics and algorithms in the context of the computational sciences. Basic number theory and counting methods, algorithms for strings, trees and sequences. Applications to DNA and protein sequencing problems. Analysis and complexity of algorithms.

Also listed as CMPS 2800.

Precludes additional credit for Only one of MATH 1805/ COMP 1805 or MATH 2800/CMPS 2800 may count for credit in a B.Math. program.

Prerequisite(s): COMP 1006 and at least one of MATH 1007, MATH 1107, or STAT 2507.

Lectures three hours a week.

MATH 2907 [0.5 credit] Directed Studies (Honours)

Available only to Honours students whose program requires a 0.5 credit not offered by the School of Mathematics and Statistics.

MATH 3001 [0.5 credit] Real Analysis I (Honours)

Metric spaces and their topologies, continuous maps, completeness, compactness, connectedness, introduction to Banach spaces.

Prerequisite(s): MATH 2000 with a grade of C- or higher; or (MATH 3009 and MATH 1800) each with a grade of B or higher, and permission of the instructor; or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3002 [0.5 credit] Real Analysis II (Honours)

Function spaces, pointwise and uniform convergence, Weierstrass approximation theorem, Lebesgue measure and Lebesgue integral on the real line, Hilbert space, Fourier series.

Prerequisite(s): MATH 3001 with a grade of C- or higher. or permission of the School.

Lectures three hours a week, tutorial one hour a week.

MATH 3003 [0.5 credit]

Advanced Differential Calculus (Honours)

Review of multivariable differentiation and integration. Vector fields, differential forms and exterior algebra. Introduction to manifolds and tangent bundles. Stokes' Theorem. Applications such as differential equations and the calculus of variations.

Prerequisite(s): MATH 3001 with a grade of C- or higher, or permission of the School.

Lectures three hours a week, tutorial one hour a week.

MATH 3007 [0.5 credit]

Functions of a Complex Variable

Analytic functions, contour integration, residue calculus, conformal mapping. Intended for non-engineering students.

Precludes additional credit for MATH 3057 and PHYS 3807.

Prerequisite(s): one of MATH 2004, MATH 2008 or MATH 2009, or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3008 [0.5 credit]

Ordinary Differential Equations (Honours)

Analytic ordinary differential equations: series solutions of ordinary differential equations about ordinary and regular singular points. Asymptotic solutions. Sturm-Liouville theory. Bessel and Legendre functions. Fourier series. Precludes additional credit for MATH 3404 and PHYS 3808.

Prerequisite(s): i) MATH 2000 with a grade of C- or higher, or (MATH 3009 with a grade of B or higher, and permission of the instructor); and ii) MATH 2454 with a grade of C- or higher, or (MATH 2404 with a grade of B or higher, and permission of the instructor).

Lectures three hours a week and one hour tutorial.

MATH 3009 [0.5 credit] **Introductory Analysis**

The real number system, sequences and series, functions of a single real variable, derivatives, the definite integral, uniform convergence.

Precludes additional credit for MATH 2000.

Prerequisite(s): one of MATH 2004, MATH 2008, MATH 2009, or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3057 [0.5 credit]

Functions of a Complex Variable (Honours)

Analytic functions, contour integration, residue calculus, conformal mappings.

Precludes additional credit for MATH 3007 and PHYS 3807.

Prerequisite(s): MATH 2000 with a grade of C- or higher; or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3101 [0.5 credit]

Algebraic Structures with Computer Applications

Introduction to algebraic structures: groups, rings, fields, lattices, and Boolean algebras; with applications of interest to students in Computer Science. This course may not be used to meet the 3000-level course requirements in any B.Math or B.Math Honours program in Mathematics and Statistics.

Precludes additional credit for MATH 2108 and MATH 2100.

Prerequisite(s): i) MATH 2107 or MATH 2152: and ii) either COMP 1805 or MATH 1800 (MATH 1800 may be taken concurrently, with permission of the School); or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3106 [0.5 credit]

Introduction to Group Theory (Honours)

Homomorphism theorems; groups acting on sets; permutation groups and groups of matrices; Sylow theory for finite groups; finitely generated abelian groups; generators and relations; applications.

Precludes additional credit for MATH 3108. Prerequisite(s): MATH 2100 with a grade of C- or higher; or (MATH 2108 or MATH 3101 with a grade of B or higher; and MATH 1800 with a grade of B or higher; and permission of the instructor); or permission of the School. Lectures three hours a week, tutorial one hour a week.

MATH 3107 [0.5 credit]

Linear Algebra III

Similarity and unitary triangularization of matrices. Direct methods of solving a system of linear equations. Iterative techniques. Bounds for eigenvalues. Power method and deflation techniques of approximation. Emphasis is primarily on computational aspects.

Prerequisite(s): i) a grade of C- or higher in MATH 2152 or MATH 2107: and ii) credit in MATH 2052 or MATH 2007: or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3108 [0.5 credit] Abstract Algebra II

Groups and rings. Permutations. Finite symmetry groups. Polynomials, unique factorization domains. Quotient rings, ideals. Field extensions, finite fields. Polynomial equations. Geometric constructions - three famous problems: duplication of the cube, trisection of an arbitrary angle, quadrature of the circle.

Precludes additional credit for MATH 3106 and MATH 3158

Prerequisite(s): MATH 2108, or permission of the School. Lectures three hours a week and one hour tutorial.

MATH 3158 [0.5 credit] Rings and Fields (Honours)

Rings, integral domains, Euclidean and principal ideal domains, fields, polynomial rings over a field, algebraic extensions of fields, the fundamental theorem of Galois theory, finite fields, applications.

Precludes additional credit for MATH 3108.

Prerequisite(s): MATH 2100 with a grade of C- or higher, or (MATH 2108 or MATH 3101 with a grade of B or higher and MATH 1800 with a grade of B or higher and permission of the instructor), or permission of the School. Lectures three hours a week, tutorial one hour a week.

MATH 3206 [0.5 credit] Plane Projective Geometry

Axioms of Desarguesian geometry, principle of duality; projectivities, perspectivities, and the fundamental theorem; collineations (homologies and elations); correlations (polarities and conics); algebraic model; projective curves; introduction to finite projective planes. Precludes additional credit for MATH 3256. Prerequisite(s): MATH 2100 or MATH 2108 or MATH

Lectures three hours a week and one hour tutorial.

MATH 3210 [0.5 credit] Euclidean and Non-Euclidean Geometry

Euclidean isometry and similarity groups; geometry of circles; inversion; hyperbolic geometry: Poincare disk model of the hyperbolic plane.

Precludes additional credit for MATH 3205.

Prerequisite(s): MATH 2100 or MATH 2108 or MATH 3101.

Lectures three hours a week, tutorial one hour a week.

MATH 3306 [0.5 credit] Elements of Set Theory (Honours)

Axioms of set theory. Development of the systems of natural numbers and the real numbers. Axiom of choice, Zorn's lemma, well-ordering. The Schröder-Bernstein theorem, cardinal numbers, ordinal numbers, transfinite induction, cardinal and ordinal arithmetics.

Prerequisite(s): MATH 2100 with a grade of C- or higher; or (MATH 2108 or MATH 3101 with a grade of B or higher; and MATH 1800 with a grade of B or higher; and permission of the instructor); or permission of the School. Lectures three hours a week and one hour tutorial.

MATH 3355 [0.5 credit]

Number Theory and Applications (Honours)

Congruences, distribution of primes, arithmetic functions, primitive roots, quadratic residues, quadratic reciprocity law, continued fractions, Diophantine equations, and applications: public key cryptography, primality testing and factoring in relation to cryptography.

Precludes additional credit for MATH 3809.

Prerequisite(s): MATH 2100 with a grade of C- or higher; or (MATH 2108 or MATH 3101 with a grade of B- or higher; and permission of the instructor); or permission of the School.

Lectures three hours a week, tutorial one hour a week.

MATH 3404 [0.5 credit] Ordinary Differential Equations II

Series solutions of ordinary differential equations of second order about regular singular points; asymptotic solutions. Systems of ordinary differential equations of first order; matrix methods. Existence and uniqueness theorems. Nonlinear autonomous systems of order 2; qualitative theory. Numerical solutions of ordinary differential equations.

Precludes additional credit for MATH 3008. Prerequisite(s): MATH 2404, MATH 2008; and MATH 2152 or MATH 2107.

Lectures three hours a week and one hour tutorial.

MATH 3705 [0.5 credit] Mathematical Methods I

Laplace transforms, series solutions of ordinary differential equations, the Frobenius method. Fourier series and Fourier transforms, solutions of partial differential equations of mathematical physics, boundary value problems, applications.

Precludes additional credit for PHYS 3808. This course may be taken for credit as a 3000-level Honours Mathematics course by students in any Honours program in the School of Mathematics and Statistics. Prerequisite(s): i) MATH 1005 or MATH 2404, and ii)

Prerequisite(s): i) MATH 1005 or MATH 2404, and ii) MATH 2004 or MATH 2008 or MATH 2009; or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3800 [0.5 credit]

Mathematical Modeling and Computational Methods

Design and analysis of mathematical models for problems in science. Computational methods, including function evaluation, interpolation, solution of linear equations, root finding, integration, solution of differential equations, Fourier series and Monte Carlo methods.

Includes: Experiential Learning Activity

Also listed as CMPS 3800.

Precludes additional credit for MATH 3806/COMP 3806. Prerequisite(s): i) MATH 1107 or MATH 1104; ii) MATH 1005 or MATH 2007; and iii) knowledge of a computer language.

Lectures three hours a week, laboratory one hour a week.

MATH 3806 [0.5 credit] Numerical Analysis (Honours)

Elementary discussion of error, polynomial interpolation, quadrature, linear systems of equations and matrix inversion, non-linear equations, difference equations and ordinary differential equations. Implementation of numerical methods using a computer language. Includes: Experiential Learning Activity
Precludes additional credit for MATH 3800.
Prerequisite(s): i) MATH 2000 with a grade of C- or higher; and ii) MATH 1152 with a grade of C- or higher and permission of the instructor).

Lectures three hours a week, laboratory one hour a week.

MATH 3801 [0.5 credit]

Linear Programming

Systems of linear inequalities, formulation of linear programming problems, geometric method, the simplex method, duality theory, complementary slackness, sensitivity analysis, branch-and-bound method and cutting plane method for integer linear programming, applications and extensions.

Precludes additional credit for ECON 4004, SYSC 3200. Prerequisite(s): MATH 2152 or MATH 2107, or permission of the School.

Lectures three hours a week and one hour tutorial.

MATH 3807 [0.5 credit] Mathematical Software (Honours)

Implementation of numerical methods using numerical software packages. Development of scientific and/ or operations research applications using application programming interfaces of numerical or optimization libraries. Functional programming for data analysis and machine learning. Experience working with Python, C++, or Java is essential.

Includes: Experiential Learning Activity Also listed as COMP 3807.

Prerequisite(s): A grade of C- or higher in MATH 3806 or COMP 3806.

Lectures three hours a week, laboratory one hour a week.

MATH 3802 [0.5 credit]

Combinatorial Optimization

Network flow problems, network simplex method, maxflow min-cut problem, integral polyhedra, minimumweight spanning tree problem, maximum matching problem, maximum stable set problem, introduction to approximation algorithms.

Prerequisite(s): MATH 3801 or permission of the School. Lectures three hours a week, tutorial one hour a week.

MATH 3808 [0.5 credit]

Mathematical Analyses of Games of Chance

This course covers mathematics used in the modern casino gaming industry. The topics include probabilities, odds, house advantages, variance and risks, optimal strategies, random walks and gambler's ruin, and gaming revenue estimation. Examples are taken from various games such as Roulette, Blackjack, and Poker. Prerequisite(s): one of STAT 2655, STAT 2605, STAT 2507, STAT 2606, STAT 3502, or MATH 3825 or MATH 3855.

Lectures three hours a week, tutorial one hour a week.

MATH 3804 [0.5 credit]

Design and Analysis of Algorithms I

An introduction to the design and analysis of algorithms. Topics include: recurrence relations, sorting and searching, divide-and-conquer, dynamic programming, greedy algorithms, NP-completeness.

Also listed as COMP 3804.

Prerequisite(s): i) one of COMP 2402 or SYSC 2100; and ii) one of COMP 2804 or MATH 3855 or MATH 3825 or COMP 3805.

Lectures and tutorials three to four and a half hours a week.

MATH 3809 [0.5 credit]

Introduction to Number Theory and Cryptography

Congruences, distribution of primes, general cryptographic systems, public key cryptographic systems and authentification using number theory, primality testing and factoring in relation to cryptography, continued fractions and Diophantine equations.

Prerequisite(s): MATH 2108 or MATH 3101 or MATH 2100; knowledge of a computer language.

Lectures three hours a week and one hour tutorial.

MATH 3819 [0.5 credit] Modern Computer Algebra

the School.

Algorithms for multiplication, division, greatest common divisors and factorization over the integers, finite fields and polynomial rings. Basic tools include modular arithmetic, discrete Fourier transform, Chinese remainder theorem, Newton iteration, and Hensel techniques. Some properties of finite fields and applications to cryptography. Includes: Experiential Learning Activity Prerequisite(s): MATH 2108 or MATH 3101 or MATH 2100, COMP 1005 or equivalent; or permission of

Lectures three hours a week, tutorial/laboratory one hour a week.

MATH 3825 [0.5 credit] Discrete Structures and Applications

Enumeration: elementary methods, inclusion and exclusion, recurrence relations, generating functions and applications. Graph theory and algorithms: connectivity, planarity, Hamilton paths and Euler trails. Error-correcting codes.

Precludes additional credit for MATH 3805 (no longer offered), and MATH 3855 and COMP 3805.

Prerequisite(s): MATH 2108 or MATH 3101.

Lectures three hours a week, tutorial one hour a week.

MATH 3855 [0.5 credit]

Discrete Structures and Applications (Honours)

Enumeration: inclusion and exclusion, recurrence relations, generating functions and applications. Graph theory: connectivity, planarity, Hamilton paths and Euler trails. Error-correcting codes. Designs and finite geometries. Symmetry and counting.

Also listed as COMP 3805.

Precludes additional credit for MATH 3805 (no longer offered) and MATH 3825.

Prerequisite(s): MATH 2100 with a grade of C- or higher; or (MATH 2108 or MATH 3101) with a grade of B or higher.

Lectures three hours a week, tutorial one hour a week.

MATH 3907 [0.5 credit] Directed Studies

Available only to students whose program requires a 0.5 credit not offered by the School of Mathematics and Statistics.

MATH 3999 [0.0 credit]

Co-operative Work Term Report (Honours)

On completion of each work term, the student must submit to the School of Mathematics and Statistics a written report on the work performed. Graded Sat or Uns. Includes: Experiential Learning Activity

Prerequisite(s): registration in the Co-operative Education Option of an Honours program offered by the School of Mathematics and Statistics, and permission of the School.

MATH 4002 [0.5 credit] Fourier Analysis (Honours)

Fourier series, Fourier integrals; introduction to harmonic analysis on locally compact abelian groups, Plancherel Theorem, Pontryagin duality; selected applications. Prerequisite(s): MATH 3001 or permission of the School. Lectures three hours a week.

MATH 4003 [0.5 credit] Functional Analysis (Honours)

Banach spaces and bounded linear operators, Hahn-Banach extension and separation, dual spaces, bounded inverse theorems, uniform boundedness principle, applications. Compact operators.

Prerequisite(s): MATH 4007 or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5008, for which additional credit is precluded.

Lectures three hours a week.

MATH 4007 [0.5 credit]

Measure and Integration Theory (Honours)

Lebesgue measure and integration on the real line; sigma algebras and measures; integration theory; Lp spaces; Fubini's theorem; decomposition theorems and Radon-Nikodym derivatives.

Prerequisite(s): MATH 3001 or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5007, for which additional credit is precluded.

Lectures three hours a week.

MATH 4102 [0.5 credit]

Group Representations and Applications (Honours)

An introduction to the group representations and character theory, with selected applications.

Prerequisite(s): MATH 3106, or a grade of B or higher in MATH 3108.

Also offered at the graduate level, with different requirements, as MATH 5102, for which additional credit is precluded.

MATH 4105 [0.5 credit]

Rings and Modules (Honours)

Fundamental concepts in rings and modules, structure theorems, applications.

Prerequisite(s): MATH 3158 or permission of the School. Lectures three hours a week.

MATH 4106 [0.5 credit] **Group Theory (Honours)**

Fundamental principles as applied to abelian, nilpotent, solvable, free and finite groups; representations. Prerequisite(s): MATH 3106 or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5106, for which additional credit is precluded.

Lectures three hours a week.

MATH 4107 [0.5 credit] **Commutative Algebra (Honours)**

Fields, including algebraic and transcendental extensions. Galois theory, valuation theory; Noetherian commutative rings, including Noether decomposition theorem and localization.

Prerequisite(s): MATH 3158 or permission of the School. Lectures three hours a week.

MATH 4108 [0.5 credit]

Homological Algebra and Category Theory (Honours)

Axioms of set theory; categories, functors, natural transformations; free, projective, injective and flat modules; tensor products and homology functors, derived functors; dimension theory.

Prerequisite(s): MATH 3158 or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5108, for which additional credit is precluded.

Lectures three hours a week.

MATH 4109 [0.5 credit]

Fields and Coding Theory (Honours)

Introduction to field theory, emphasizing the structure of finite fields, primitive elements and irreducible polynomials. The influence of computational problems will be considered. Theory and applications of error-correcting codes: algebraic codes, convolution codes, decoding algorithms, and analysis of code performance. Prerequisite(s): MATH 2100, or MATH 3101 or MATH 2108 or equivalent; or permission of the School. Lectures three hours a week.

MATH 4205 [0.5 credit]

Introduction to General Topology (Honours)

Topological spaces, maps, subspaces, product and identification topologies, separation axioms, compactness, connectedness.

Prerequisite(s): MATH 3001 or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5205, for which additional credit is precluded.

Lectures three hours a week.

MATH 4206 [0.5 credit]

Introduction to Algebraic Topology (Honours)

An introduction to homotopy theory. Topics include the fundamental group, covering spaces and the classification of two-dimensional manifolds.

Prerequisite(s): MATH 3106 and MATH 4205; or permission of the School.

Also offered at the graduate level, with different requirements, as MATH 5206, for which additional credit is

Lectures three hours a week.

MATH 4207 [0.5 credit]

Foundations of Geometry (Honours)

A study of at least one modern axiom system of Euclidean and non-Euclidean geometry, embedding of hyperbolic and Euclidean geometries in the projective plane, groups of motions, models of non-Euclidean geometry. Prerequisite(s): MATH 3106 (may be taken concurrently)

or permission of the School.

Lectures three hours a week.

MATH 4208 [0.5 credit]

Introduction to Differentiable Manifolds (Honours)

Introduction to differentiable manifolds: Riemannian manifolds; vector fields and parallel transport; geodesics; differential forms on a manifold; covariant derivative; Betti numbers.

Prerequisite(s): MATH 3002 or permission of the School. Lectures three hours a week.

MATH 4305 [0.5 credit]

Analytic Number Theory (Honours)

Dirichlet series, characters, Zeta-functions, prime number theorem, Dirichlet's theorem on primes in arithmetic progressions, binary quadratic forms.

Prerequisite(s): MATH 3057 or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5305, for which additional credit is precluded.

MATH 4306 [0.5 credit]

Algebraic Number Theory (Honours)

Algebraic number fields, bases, algebraic integers, integral bases, arithmetic in algebraic number fields, ideal theory, class number.

Prerequisite(s): MATH 3158 (may be taken concurrently) or permission of the School.

Also offered at the graduate level, with different requirements, as MATH 5306, for which additional credit is precluded.

Lectures three hours a week.

MATH 4600 [0.5 credit]

Case Studies in Operations Research (Honours)

Applications of the principles of Operations Research to practical problems in business, management, and science. Students present at least one case and analyze cases in the published literature. Cases may also be presented by visiting practitioners.

Includes: Experiential Learning Activity

Precludes additional credit for Students in Honours Mathematics/Statistics programs may only take course as a free option.

Prerequisite(s): STAT 2509 (or STAT 2559) and MATH 3801; or permission of the School. Seminars three hours a week.

MATH 4700 [0.5 credit] Partial Differential Equations (Honours)

First-order partial differential equations. Classification of second-order linear partial differential equations; the diffusion equation, wave equation and Laplace's equation; separation of variables; Fourier and Laplace transform methods for the solution of initial/boundary value problems; Green's functions.

Prerequisite(s): MATH 3057 and one of MATH 3008 or MATH 3705, or permission of the School.

Lectures three hours a week.

MATH 4701 [0.5 credit]

Topics in Differential Equations (Honours)

Topics in the theory and application of differential equations; for example, hyperbolic systems, fluid dynamics, nonlinear wave equations, optimal mass transport, control theory, calculus of variations.

Prerequisite(s): i) MATH 3008; and ii) one of MATH 3001 or MATH 3057; or permission of the School.

Also offered at the graduate level, with different requirements, as MATH 5407, for which additional credit is precluded.

Lectures three hours a week.

MATH 4703 [0.5 credit] Dynamical Systems (Honours)

Basic concepts of dynamical systems. Vector formulation for systems. Theory of autonomous systems in one, two and higher dimensions. Limit sets, stability. Phase plane, qualitative interpretation, limit cycles and attractors. Parametric dependence, bifurcations and chaos. Applications.

Prerequisite(s): MATH 3001 and MATH 3008 or permission of the School. Lectures three hours a week.

MATH 4708 [0.5 credit] Asymptotic Methods of Applied Mathematics (Honours)

Asymptotic series: properties, matching, application to differential equations. Asymptotic expansion of integrals: elementary methods, methods of Laplace, stationary phase and steepest descent, Watson's lemma, Riemann-Lebesgue lemma. Perturbation methods: regular and singular perturbation for differential equations, multiple scale analysis, boundary layer theory, WKB theory. Prerequisite(s): MATH 3057 and at least one of MATH 3008 or MATH 3705, or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5408, for which additional credit is precluded.

Lectures three hours a week.

MATH 4801 [0.5 credit]

Topics in Combinatorics (Honours)

An in-depth study of one or more topics from: generating functions, Polya's theory of counting, block designs, coding theory, partially ordered sets and Ramsey theory. Prerequisite(s): MATH 2100 and MATH 3855 or permission of the School.

Lectures three hours a week.

MATH 4802 [0.5 credit]

Introduction to Mathematical Logic (Honours)

Symbolic logic, propositional and predicate calculi, set theory and model theory, completeness.

Prerequisite(s): MATH 2100 or permission of the School. Lectures three hours a week.

MATH 4803 [0.5 credit] Computable Functions (Honours)

Recursive functions and computability, algorithms, Church's thesis, Turing machines, computational logic, NP-completeness.

Also listed as COMP 4803.

Prerequisite(s): MATH 2100 or MATH 3855 or permission of the School.

MATH 4805 [0.5 credit]

Theory of Automata (Honours)

Finite automata and regular expressions, properties of regular sets, context-free grammars, pushdown automata, deterministic context-free languages. Turing machines, the Chomsky hierarchy. Undecidability, intractable problems. Also listed as COMP 4805.

Prerequisite(s): MATH 3106 or MATH 3158 or MATH 3855 or permission of the School.

Also offered at the graduate level, with different requirements, as MATH 5605, for which additional credit is precluded.

Lectures three hours a week.

MATH 4806 [0.5 credit]

Numerical Linear Algebra (Honours)

Matrix computations, conditioning/stability, direct methods for linear systems, classical iterative methods: Jacobi, Gauss-Seidel; modern iterative methods, Arnoldi decomposition, GMRES and other Krylov subspace-based methods for sparse and structured matrices; numerical solution of eigenvalue problems, implementation using suitable programming language, application to differential equations/optimization problems.

Also listed as COMP 4806.

Prerequisite(s): MATH 2152 or MATH 2107; MATH 2000 and MATH 3806; or permission of the School. Lectures three hours a week.

MATH 4807 [0.5 credit] Game Theory (Honours)

multi-player games, games in normal form, games in extensive form, utility theory, Nash equilibrium and Nash arbitration scheme, games in characteristic function form, cooperative solutions, dominations, stable sets, core, Shapley value, applications of game theory.

Prerequisite(s): MATH 3801 or permission of the School. Also offered at the graduate level, with different requirements, as MATH 5607, for which additional credit is

One-player games, two-player zero-sum games,

Lectures three hours a week.

MATH 4808 [0.5 credit]

precluded.

Graph Theory and Algorithms (Honours)

Paths, circuits, Eulerian and Hamiltonian graphs, connectivity, colouring problems, matching, Ramsey theory, network flows.

Prerequisite(s): MATH 3106 or MATH 3158 or MATH 3855 or permission of the School.

Lectures three hours a week.

MATH 4809 [0.5 credit]

Mathematical Cryptography (Honours)

Topics covered include: a general survey of public key cryptography; classical applications of finite fields and number theory; relevant background in geometry and algebraic curves; computational issues concerning elliptic curves; elliptic curve cryptosystems; security issues. Prerequisite(s): MATH 3158, or permission of the School. Lectures three hours a week.

MATH 4811 [0.5 credit]

Combinatorial Design Theory (Honours)

Existence and construction of combinatorial designs: finite geometries, pairwise balanced designs, balanced incomplete block designs, Steiner triple systems, symmetric designs, PBD closure, latin squares, transversal designs, and applications to information theory.

Prerequisite(s): MATH 3855, or permission of the School. Lectures three hours a week.

MATH 4816 [0.5 credit]

Numerical Analysis for Differential Equations (Honours)

Floating point arithmetic; numerical solution of ODEs; finite difference methods for PDEs; stability, accuracy and convergence: von Neumann analysis, CFL condition, Lax Theorem. Finite element methods: boundary value problems and elliptic PDEs. Spectral and pseudo-spectral methods.

Prerequisite(s): MATH 2454 and MATH 3806, or permission of the School.

Also offered at the graduate level, with different requirements, as MATH 5806, for which additional credit is precluded.

Lectures three hours a week.

MATH 4821 [0.5 credit] Quantum Computing (Honours)

Space of quantum bits; entanglement. Observables in quantum mechanics. Density matrix and Schmidt decomposition. Quantum cryptography. Classical and quantum logic gates. Quantum Fourier transform. Shor's quantum algorithm for factorization of integers.

Precludes additional credit for COMP 4114.

Prerequisite(s): MATH 2152 (or MATH 2107) with a grade of C+ or better, and permission of the School. Also offered at the graduate level, with different requirements, as MATH 5821, for which additional credit is

precluded.
Lectures three hours a week.

MATH 4822 [0.5 credit]

Wavelets and Digital Signal Processing (Honours)

Lossless compression methods. Discrete Fourier transform and Fourier-based compression methods. JPEG and MPEG. Wavelet analysis. Digital filters and discrete wavelet transform. Daubechies wavelets. Wavelet compression.

Prerequisite(s): MATH 2152 (or MATH 2107) with a grade of C+ or better, and permission of the School. Also offered at the graduate level, with different requirements, as MATH 5822, for which additional credit is precluded.

Lectures three hours a week.

MATH 4905 [0.5 credit] Honours Project (Honours)

Consists of a written report on some approved topic or topics in the field of mathematics, together with a short lecture on the report.

Includes: Experiential Learning Activity

Prerequisite(s): B.Math.(Honours) students only.

MATH 4907 [0.5 credit] Directed Studies (Honours)

Prerequisite(s): B.Math.(Honours) students only.

Statistics (STAT) Courses

STAT 1500 [0.5 credit]

Introduction to Statistical Computing

Basics of programming in R and introduction to statistical software; generating statistical plots; computing descriptive statistics; performing basic statistical procedures; fundamentals of numerical analysis; optimization; generating random numbers, performing simple simulations and simulation-based inference. Includes: Experiential Learning Activity

Prerequisite(s): Ontario Grade 12 Mathematics: Advanced Functions, or MATH 0005, or equivalent.

Lectures three hours a week, laboratory one hour a week.

STAT 2507 [0.5 credit] Introduction to Statistical Modeling I

A data-driven introduction to statistics. Basic descriptive statistics, introduction to probability theory, random variables, discrete and continuous distributions, contingency tables, sampling distributions, distribution of sample mean, Central Limit Theorem, interval estimation and hypothesis testing. A statistical software package will be used.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 2000, BIT 2009, BIT 2100 (no longer offered), BIT 2300 (no longer offered),
DATA 1517, ECON 2201 (no longer offered), ECON 2210,
ENST 2006, GEOG 2006, STAT 2601, STAT 2606, and
STAT 3502. May not be counted for credit in any program if taken after successful completion of STAT 2559.
Prerequisite(s): an Ontario Grade 12 universitypreparation Mathematics or equivalent, or permission of the School of Mathematics and Statistics.
Lectures three hours a week, laboratory one hour a week.

STAT 2509 [0.5 credit] Introduction to Statistical Modeling II

A data-driven approach to statistical modeling. Basics of experimental design, analysis of variance, simple linear regression and correlation, nonparametric procedures. A statistical software package will be used.

Includes: Experiential Learning Activity

Precludes additional credit for DATA 1519, ECON 2202, ECON 2220 (no longer offered), ECON 3210, STAT 2602, STAT 2607.

Prerequisite(s): STAT 2507 or STAT 2601 or STAT 2606 or STAT 3502; or permission of the School.

Lectures three hours a week, laboratory one hour a week.

STAT 2559 [0.5 credit]

Basics of Statistical Modeling (Honours)

Estimation and hypothesis testing for one and two samples, analysis of categorical data, basics of experimental design, analysis of variance, simple linear regression and correlation. Nonparametric procedures. A statistical software package will be used. Includes: Experiential Learning Activity

Precludes additional credit for DATA 1519.

Prerequisite(s): STAT 2655 or permission of the School.

Lectures three hours a week, tutorial/laboratory one hour a week.

STAT 2601 [0.5 credit] Business Statistics

Introduction to statistical computing, descriptive statistics, probability concepts, interval estimation and hypothesis testing, categorical data analysis. Introduction to simple regression, multiple regression, and time series. Emphasis on the development of an ability to interpret results of statistical analyses with applications from business. Includes: Experiential Learning Activity

Precludes additional credit for BIT 2000, BIT 2009, BIT 2100 (no longer offered), BIT 2300 (no longer offered), DATA 1517, ECON 2201 (no longer offered), ECON 2210, ENST 2006, GEOG 2006, STAT 2507, STAT 2606 (no longer offered) and STAT 3502.

Prerequisite(s): MATH 1009. Restricted to B.Com. and B.I.B students.

Lectures three hours a week and laboratory one hour a week.

STAT 2602 [0.5 credit] Statistical Models for Business Analytics and Finance

Analysis of variance, multiple regression (including polynomial regression), logistic and Poisson regression, probit models, time series (including decomposition into components, exponential smoothing, model diagnostics and ARIMA models), Monte Carlo simulation. Includes: Experiential Learning Activity Precludes additional credit for DATA 1519, ECON 2220 (no longer offered), STAT 2607 (no longer offered). Prerequisite(s): STAT 2601.

Lectures three hours a week and laboratory one hour a week.

STAT 2605 [0.5 credit] Probability Models

Basic probability; discrete random variables with focus on binomial and Poisson random variables; continuous random variables, transformation theorem, simulating continuous random variables; exponential random variable, normal random variable, sums of random variables, central limit theorem. Elements of Markov chains, and introduction to Poisson processes.

Precludes additional credit for STAT 2655 and STAT 3502.

Prerequisite(s): MATH 1007 or MATH 1004 or MATH 1002 (no longer offered) or MATH 1052, and MATH 1104 or MATH 1107 or MATH 1102 (no longer offered) or MATH 1152. Restricted to students in Bachelor of Computer Science and Bachelor of Mathematics in Computer Mathematics.

Lectures three hours a week, tutorial one hour a week.

STAT 2655 [0.5 credit] Introduction to Probability with Applications (Honours)

Probability axioms, basic combinatorial analysis, conditional probability and independence, discrete and continuous random variables, joint and conditional distributions, expectation and moments, probability and moment generating functions, Chebyshev's inequality and weak law of large numbers, central limit theorem, sampling distributions, simulation and applications to descriptive statistics.

Precludes additional credit for STAT 2605.

Prerequisite(s): MATH 2052 with a grade of C+ or higher or MATH 2007 or MATH 1005 with a grade of B+ or higher; and MATH 2152 with a grade of C+ or higher or MATH 2107 with a grade of B+ or higher; or permission of the School.

Lectures three hours a week, tutorial one hour a week.

STAT 2660 [0.5 credit] Mathematics for Finance (Honours)

Interest rates, growth of money, discount functions, yield rates, time value of money, annuities, cash flows and portfolios, loans, mortgages, bonds, immunization, swaps, hedging and investment strategies, stocks and financial markets, arbitrage.

Prerequisite(s): i) one of MATH 2052 or MATH 2007 or MATH 1005, grade of C+ or higher; and ii) one of MATH 1152 or MATH 1107 or MATH 1104, grade of C+ or higher; or permission of the School.

Lectures three hours a week, tutorial one hour a week.

STAT 2907 [0.5 credit] Directed Studies (Honours)

Available only to Honours students whose program requires a 0.5 credit not offered by the School of Mathematics and Statistics.

STAT 3210 [0.5 credit] Inferential Data Science Foundations I

Theoretical foundations to data science using open source software. Empirical distribution functions, point estimation, interval estimation, tests of hypotheses, maximum likelihood and method of moments. Formal tools are developed, and concepts are demonstrated using simulation. Abstract concepts are made concrete through visualization and numerical computation.

Precludes additional credit for STAT 3508, STAT 3558. Prerequisite(s): MATH 2007 (or MATH 1005 or MATH 2052);and DATA 2500; and DATA 2519 (or STAT 2509 or STAT 2559).

Lectures three hours a week, laboratory one hour a week.

STAT 3502 [0.5 credit] Probability and Statistics

Axioms of probability; conditional probability and independence; random variables; distributions: binomial, Poisson, hypergeometric, normal, gamma; central limit theorem; sampling distributions; point estimation: maximum likelihood, method of moments; confidence intervals; testing of hypotheses: one and two populations; engineering applications: acceptance sampling, control charts, reliability.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 2000, BIT 2009, BIT
2100 (no longer offered), BIT 2300 (no longer offered),
DATA 1517, ECON 2201 (no longer offered), ECON 2210,
STAT 2507, STAT 2605, STAT 2601, and STAT 2606.
Prerequisite(s): MATH 2004 and enrolment in the Faculty
of Engineering or B.Sc. programs of the Department
of Physics [except Double Honours Mathematics and
Physics].

Lectures three hours a week and one hour laboratory.

STAT 3503 [0.5 credit] Regression Analysis

Review of simple and multiple regression with matrices, Gauss-Markov theorem, polynomial regression, indicator variables, residual analysis, weighted least squares, variable selection techniques, nonlinear regression, correlation analysis and autocorrelation. Computer packages are used for statistical analyses. Includes: Experiential Learning Activity
Precludes additional credit for STAT 3553.
Prerequisite(s): i) STAT 2509 or STAT 2602 or STAT 2607 or ECON 2202 or equivalent; and ii) MATH 1152 or MATH 1107 or MATH 1119 or equivalent; or permission of the School.

Lectures three hours a week and one hour laboratory.

STAT 3504 [0.5 credit]

Analysis of Variance and Experimental Design

Single and multifactor analysis of variance, orthogonal contrasts and multiple comparisons, analysis of covariance; nested, crossed and repeated measures designs; completely randomized, randomized block, Latin squares, factorial experiments, related topics. Computer packages are used for statistical analyses. Includes: Experiential Learning Activity Precludes additional credit for STAT 4504.

Prerequisite(s): STAT 3503 or permission of the School. Lectures three hours a week and one hour laboratory.

STAT 3506 [0.5 credit]

Stochastic Processes and Applications (Honours)

Conditional probability and conditional expectation; Stochastic modeling; discrete time Markov chains including classification of states, stationary and limiting distributions; exponential distribution and the Poisson processes; queueing models; applications to computer systems, operations research and social sciences. Prerequisite(s): STAT 2655 with a grade of C- or higher; or permission of the School.

Lectures three hours a week, tutorial one hour a week.

STAT 3507 [0.5 credit] Sampling Methodology

The sample survey as a vehicle for information collection in government, business, scientific and social agencies. Topics include: planning a survey, questionnaire design, simple random, stratified, systematic and cluster sampling designs, estimation methods, problem of non-response, related topics.

Includes: Experiential Learning Activity
Prerequisite(s): one of: STAT 2507, STAT 2509,
STAT 2601, STAT 2602, STAT 2606, STAT 2607, ECON 2201, ECON 2202, ECON 2210, or equivalent; or permission of the School.

Lectures three hours a week and one hour laboratory.

STAT 3508 [0.5 credit] Elements of Probability Theory

Discrete and continuous distributions, moment-generating functions, marginal and conditional distributions, transformation theory, limiting distributions.

Precludes additional credit for ECON 4002, STAT 3210, STAT 3558 and STAT 3608.

Prerequisite(s): i) MATH 2008 (or MATH 2004 or MATH 2009); and ii) one of STAT 2507, STAT2601, STAT 2606, ECON 2200, or ECON 2201 or permission of the School. Lectures three hours a week, tutorial one hour a week.

STAT 3509 [0.5 credit] Mathematical Statistics

Point and interval estimation, sufficient statistics, hypothesis testing, chi-square tests with enumeration data.

Precludes additional credit for STAT 3559, STAT 4321. Prerequisite(s): STAT 3508 or permission of the School. Lectures three hours a week, tutorial one hour a week.

STAT 3553 [0.5 credit]

Regression Modeling (Honours)

Linear regression - theory, methods and application(s). Normal distribution theory. Hypothesis tests and confidence intervals. Model selection. Model diagnostics. Introduction to weighted least squares and generalized linear models.

Includes: Experiential Learning Activity Precludes additional credit for STAT 3503.

Prerequisite(s): i) STAT 2559 with a grade of C- or higher, or STAT 2509 with a grade of B or higher, or DATA 1519 with a grade of C or higher; and ii) a grade of C- or higher in MATH 1152 or MATH 1107 or MATH 1104; or permission from the School of Mathematics and Statistics. Lectures three hours a week, laboratory one hour a week.

STAT 3558 [0.5 credit]

Elements of Probability Theory (Honours)

Random variables and moment-generating functions, concepts of conditioning and correlation; laws of large numbers, central limit theorem; multivariate normal distribution; distributions of functions of random variables, sampling distributions, order statistics.

Precludes additional credit for ECON 4002, STAT 3210, STAT 3508 and STAT 3608.

Prerequisite(s): i) STAT 2655 with a grade of C- or higher; and ii) MATH 2000 with a grade of C- or higher, or (a grade of C+ or higher in MATH 2008 or MATH 2004, and permission of the instructor); or permission of the School. Lectures three hours a week, tutorial one hour a week.

STAT 3559 [0.5 credit]

Mathematical Statistics (Honours)

Empirical distribution functions, Monte Carlo methods, elements of decision theory, point estimation, interval estimation, tests of hypotheses, robustness, nonparametric methods.

Precludes additional credit for STAT 3509, STAT 4321. Prerequisite(s): STAT 3558 with a grade of C- or higher; or (STAT 3508 with a grade of B or higher, and permission of the instructor); or permission of the School.

Lectures three hours a week, tutorial one hour a week.

STAT 3660 [0.5 credit] Actuarial Mathematics I

Severity, frequency models, loss models, risk measures, value at risk, stochastic processes, Poisson process, characteristics of actuarial models, creating new univariate distributions, heavy-tailed distributions, mixed distributions, coverage modifications.

Prerequisite(s): STAT 2655, or permission from the school.

Lectures three hours a week, tutorial one hour a week.

STAT 3661 [0.5 credit] Life Contingent Risk Modelling I

Introduction to life insurance; traditional and modern insurance contracts; underwriting; premiums; present value random variable; force of mortality; life tables; insurance benefits; annuities; premium calculation, reserves.

Prerequisite(s): STAT 2660 and STAT 3660, or permission of the School.

Lectures three hours a week, tutorial one hour a week.

STAT 3907 [0.5 credit] Directed Studies

Available only to students whose program requires a 0.5 credit not offered by the School of Mathematics and Statistics.

STAT 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

STAT 4321 [0.5 credit] Inferential Data Science Foundations II

Inferential data science tools extending to big data using open-source software. Asymptotic properties of likelihoods, parametric and non-parametric approaches, bootstrap, jackknife estimation, frequentist and Bayesian perspectives. Formal tools are developed. Concepts are demonstrated using simulation. Abstract concepts are made concrete through visualization and numerical computation.

Precludes additional credit for STAT 3509 or STAT 3559. Prerequisite(s): STAT 3210.

Lectures three hours a week, laboratory one hour a week.

STAT 4322 [0.5 credit] Learning from Big Data

A data-first tour of advanced statistical models. Focus will be on a series of large real world forecasting and prediction competitions. Tools and workflows for statistical modelling are explored.

Prerequisite(s): DATA 3500 and STAT 3210. Lectures three hours a week, laboratory one hour a week.

STAT 4500 [0.5 credit]

Parametric Estimation (Honours)

Preliminaries on probability theory; exact and asymptotic sampling distributions; unbiasedness, consistency, efficiency, sufficiency and completeness; properties of maximum likelihood estimators; least squares estimation of location and scale parameters based on order statistics and sample quantiles; Best Asymptotically Normal (BAN) estimators.

Prerequisite(s): STAT 3559 or permission of the School. Also offered at the graduate level, with different requirements, as STAT 5600, for which additional credit is precluded.

Lectures three hours a week.

STAT 4501 [0.5 credit] Probability Theory (Honours)

Introduction to probability, characteristic functions, probability distributions, limit theorems.

Prerequisite(s): STAT 3506 and STAT 3558 or permission of the School.

Lectures three hours a week.

STAT 4502 [0.5 credit] Survey Sampling (Honours)

Basic concepts in sampling from finite populations; simple random sampling; stratified sampling; choice of sampling unit; cluster and systematic sampling; introduction to multistage sampling; ratio estimation; sampling with unequal probabilities and with replacement; replicated sampling; related topics.

Prerequisite(s): i) STAT 2559 or STAT 2509; and ii) either STAT 3559, or a grade of C + or better in STAT 3509; or permission of the School.

Lectures three hours a week.

STAT 4503 [0.5 credit] Applied Multivariate Analysis (Honours)

Selected topics in regression and correlation nonlinear models. Multivariate statistical methods, principal components, factor analysis, multivariate analysis of variance, discriminant analysis, canonical correlation, analysis of categorical data.

Prerequisite(s): STAT 3553 or (STAT 3509 and STAT 3503) or permission of the School. Also offered at the graduate level, with different requirements, as STAT 5509, for which additional credit is precluded.

Lectures three hours a week.

STAT 4504 [0.5 credit] Statistical Design and Analysis of Experiments (Honours)

An extension of the designs discussed in STAT 2559 to

include analysis of the completely randomized design, designs with more than one blocking variable, incomplete block designs, fractional factorial designs, multiple comparisons; and response surface methods. Includes: Experiential Learning Activity
Precludes additional credit for STAT 3504 and ECON 4706. PSYC 3000 is precluded for additional credit for students registered in a Mathematics program.
Prerequisite(s): STAT 3553 or STAT 3503; or permission of the School of Mathematics and Statistics.
Lectures three hours a week, laboratory one hour a week.

STAT 4506 [0.5 credit] Nonparametric Statistics (Honours)

Classical nonparametric techniques; nonparametric density estimation; nonparametric regression analysis: kernel estimators, orthogonal series estimators, smoothing splines; estimation of statistical functionals; nonparametric bootstrap; jackknife; elements of high dimensional statistical inference; multiple testing and false discovery. Statistical software will be used.

Prerequisite(s): STAT 3559 or permission of the School. Also offered at the graduate level, with different requirements, as STAT 5516, for which additional credit is precluded.

Lectures three hours a week.

STAT 4507 [0.5 credit] Statistical Inference (Honours)

Sufficient statistics, simple and composite hypotheses, most powerful and similar region test, distribution-free tests, confidence intervals, goodness-of-fit and likelihood ratio tests, large sample theory, Bayesian and likelihood methods, sequential tests.

Prerequisite(s): STAT 4500 or permission of the School. Also offered at the graduate level, with different requirements, as STAT 5501, for which additional credit is precluded.

STAT 4508 [0.5 credit]

Stochastic Models (Honours)

Review of discrete Markov chains and Poisson processes; continuous time Markov chains; pure jump Markov processes, and birth and death processes including the Q-matrix approach; the Kolmogorov equations; renewal theory; introduction to Brownian motion; queueing theory.

Prerequisite(s): STAT 3506 or permission of the School. Also offered at the graduate level, with different requirements, as STAT 5701, for which additional credit is precluded.

Lectures three hours a week.

STAT 4509 [0.5 credit]

Advanced Mathematical Modeling (Honours)

Real-life situations in the physical, social, and life sciences are often modeled using mathematical tools. This course will examine various models and techniques used in their analysis, e.g., matrix procedures in connection with population models. Students will use a computer package to obtain numerical results.

Prerequisite(s): i) MATH 2454 and STAT 2655 (or MATH 2404 and STAT 2605) and ii) STAT 3506; or permission of the School.

Also offered at the graduate level, with different requirements, as STAT 5601, for which additional credit is precluded.

Lectures three hours a week.

STAT 4555 [0.5 credit] Monte Carlo Simulation (Honours)

Basic ideas and algorithms of Monte Carlo; simulation of basic stochastic processes. Brownian motion and the Poisson process, applications to financial modelling, queueing theory. Output analysis; variance reduction. Markov chain Monte Carlo methods; Gibbs sampling, simulated annealing and Metropolis-Hastings samplers with applications.

Includes: Experiential Learning Activity
Precludes additional credit for STAT 3555 (no longer offered).

Prerequisite(s): STAT 3558, or a grade of B or higher in STAT 3508, or permission of the School.

Lectures three hours a week, tutorial/laboratory one hour a week.

STAT 4601 [0.5 credit] Data Mining I (Honours)

Data visualization; knowledge discovery in datasets; unsupervised learning: clustering algorithms; dimension reduction; supervised learning: pattern recognition, smoothing techniques, classification. Computer software will be used.

Includes: Experiential Learning Activity

Prerequisite(s): STAT 3553 or STAT 3503 or MATH 3806, or permission of the School.

Lectures three hours a week, laboratory one hour a week.

STAT 4603 [0.5 credit]

Time Series and Forecasting (Honours)

Time series regression. Nonstationary and stationary time series models. Nonseasonal and seasonal time series models. ARIMA (Box-Jenkins) models. Smoothing methods. Parameter estimation, model identification, diagnostic checking. Forecasting techniques. A statistical software package will be used.

Includes: Experiential Learning Activity
Precludes additional credit for ECON 4713.

Prerequisite(s): STAT 3553 or STAT 3503, or permission of the School.

of the School.

Lectures three hours a week.

STAT 4604 [0.5 credit] Statistical Computing (Honours)

Statistical computing techniques, pseudo-random number generation, tests for randomness, numerical algorithms in statistics; optimization techniques; environments for data analysis, efficient programming techniques; statistics with mainstream software.

Includes: Experiential Learning Activity

Prerequisite(s): STAT 3553 or STAT 3503 or permission of the School.

Lectures three hours a week, laboratory one hour a week.

STAT 4607 [0.5 credit]

Bayesian Statistical Analysis (Honours)

Probability basics for Bayesian statistics. Bayesian inference for simple exponential families. Markov Chain Monte Carlo for posterior inference. Empirical Bayes. Hierarchical Bayes. Bayesian inference for the multivariate normal model. Bayesian linear regression. More advanced topics may be included. Computer software will be used. Includes: Experiential Learning Activity Prerequisite(s): STAT 3553 or permission of the School. Lectures three hours a week, laboratory one hour a week.

STAT 4660 [0.5 credit] Actuarial Mathematics II

Empirical models, complete data, grouped data, credibility theory, failure time, accuracy, kernel estimation, goodness of fit tests, Bayesian analysis, inference for loss models, frequentist estimation, model selection.

Prerequisite(s): STAT 3660 with C+ or higher, or permission of the school.

Lectures three hours a week, tutorial one hour a week.

STAT 4661 [0.5 credit]

Life Contingent Risk Modelling II

Policy values; multiple state models; formulae for probability; Markov multiple state models; pension mathematics; yield curves; interest rate risk; emerging costs for life insurance; equity linked insurance; deterministic and stochastic pricing; reserving, participating, and universal life insurance. Precludes additional credit for STAT 3662 (no longer offered).

Prerequisite(s): STAT 3661 with a grade of C+ or higher; or permission of the School.

Lectures three hours a week, tutorial one hour a week.

STAT 4905 [0.5 credit] Honours Project (Honours)

Consists of a written report on some approved topic or topics in the field of statistics, together with a short lecture on the report.

Includes: Experiential Learning Activity
Prerequisite(s): B.Math.(Honours) or B.Data Science
(Honours) students only.

STAT 4907 [0.5 credit] Directed Studies (Honours)

Prerequisite(s): B.Math.(Honours) students only.

Media Production and Design

This section presents the requirements for programs in:

Media Production and Design B.M.P.D. Honours

Program Requirements

Media Production and Design B.M.P.D. Honours (20.0 credits)

A. Credits Included in the Major (11.0 credits)

1. 2.0 credits in:		2.0
ITEC 1005 [0.5]	Web Development	
ITEC 1100 [0.5]	Introduction to Interactive Media Design	
MPAD 1001 [0.5]	Introduction to Storytelling: The Context	
MPAD 1002 [0.5]	Introduction to Storytelling: The Practice	
2. 1.0 credits in:		1.0

	ITEC 1401 [0.5]	Introduction to Scripting and	
	& ITEC 2401 [0.5]	Problem Solving	
	0	Intermediate Scripting	
	Or		
	ITEC 1400 [0.5]	Introduction to Programming and	
	& ITEC 2400 [0.5]	Problem Solving Intermediate Programming	
2	2.0 anadita in .	intermediate Frogramming	2.0
ა.	3.0 credits in:	D 1 15 15 15	3.0
	ITEC 2100 [0.5]	Data Visualization	
	MPAD 2001 [0.5]	Basics of Visual Communication I	
	MPAD 2002 [0.5]	Basics of Visual Communication II	
	MPAD 2003 [0.5]	Introductory Data Storytelling	
	MPAD 2004 [0.5]	Writing for Media	
	MPAD 2501 [0.5]	Media Law	
4.	2.5 credits in:		2.5
	ITEC 3100 [0.5]	Immersive Storytelling	
	MPAD 3001 [0.5]	Storytelling and Social Media	
	MPAD 3002 [0.5]	Civics for Journalists	
	MPAD 3003 [0.5]	Minor Design Project	
	MPAD 3300 [0.5]	Media Ethics in a Digital World	
5	1.0 credits in:	Wedia Ethics in a Digital World	1.0
J.	MPAD 4000 [1.0]	Capstone Project	1.0
	01 WPAD 4906 [1	.Oapstone Projects: Translational Approach to Indigenous Community	
		Wellness	
6	0.5 credit from:		0.5
٠.	MPAD 3000 [0.5]	Directed Studies	0.0
	MPAD 4001 [0.5]	Media Industries Now and Next	
	MPAD 4200 [0.5]	Freelance Media Survival Skills	
	MPAD 4300 [0.5]	Special Topic	
	MPAD 4400 [0.5]	Directed Studies	
	MPAD 4403 [0.5]	Professional Skills: Strategic Communication	
	MPAD 4500 [0.5]	Special Topic	
	MPAD 4501 [0.5]	Gender, Identity and Inequality	
	MPAD 4502 [0.5]	Journalism and Conflict	
	MPAD 4503 [0.5]	Journalism, Indigenous Peoples and Canada	
	MPAD 4504 [0.5]	The Media and International	
7	O E one dit for	Development	0.5
7.	0.5 credit from:	NA(A	0.5
	ITEC 4012 [0.5]	Web Application Frameworks	
	ITEC 4014 [0.5]	User Experience Design and Accessibility	
	ITEC 4015 [0.5]	Designing and Producing Sound	
	ITEC 4016 [0.5]	Virtual and Augmented Reality	
	ITEC 4019 [0.5]	Directing and Cinematography for Digital Storytelling	
	ITEC 4021 [0.5]	Empirical Research Methods in HCI	
8.	0.5 credit from:		0.5
	INDG 1010 [0.5]	Indigenous Ways of Knowing	
	INDG 1011 [0.5]	Introduction to Indigenous-Settler Encounters	
	INDG 2011 [0.5]	Critical Indigenous Studies	
	INDG 2012 [0.5]	Anishinaabe Ontologies	
	INDG 2013 [0.5]	Haudenosaunee Ontologies	
	INDG 2015 [0.5]	Indigenous Relationalities,	
		Kinships, and Knowledges	

INDG 2020 [0.5]	Indigenous Feminisms: Perspectives on Gender, Sex, and Sexualities	
INDG 2709 [0.5]	Indigenous Drama	
INDG 3001 [0.5]	Indigenous Sovereignties	
INDG 3015 [0.5]	Indigenous Cosmologies	
B. Credits Not Include	led in the Major (9.0 credits)

Bachelor of Media Production and Design Regulations

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

0000-Level Courses

Students in the B.M.P.D. program may not count any 0000-level courses for credit toward their degree. Such students may, however, be required to take one or more of these courses to replace missing program prerequisites in which case the courses will be set aside as "no credit for degree" (NCD).

Academic Continuation Evaluation for Bachelor of Media Production and Design (Honours)

Students in the B.M.P.D. (Honours) follow the continuation requirements for Honours programs, as described in Section 3.2.6 of the *Academic Regulations of the University*, with the following addition:

 Students with 15.5 or more program credits completed, but who have a Major CGPA less than 6.00, will be required to leave the B.M.P.D. program with the decision Required to Withdraw for Two Terms (WT).

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin

their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- 3. Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- 5. Continuing a job search after accepting a co-op position:
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

Bachelor of Media Production and Design: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- Registered as a full-time student in the B.M.P.D. Honours program;
- 2. Successfully completed 5.0 or more credits;
- 3. Successfully completed, by the start-date of the first work term, MPAD 2002;
- Obtained an Overall CGPA of at least 9.0. This CGPA must be maintained throughout the duration of the degree.

B.M.P.D. Honours students must successfully complete three (3) work terms to obtain the Co-op Designation.

Work Term Course: MPAD 3999 Work/Study Pattern:

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

 Bachelor of Media Production and Design (B.M.P.D. Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.

The six 4U or M courses must include English and one of Advanced Functions, or Calculus and Vectors, or

Mathematics of Data Management. Advanced Functions is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those assessed to be appropriate for the program.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Media Production and Design program;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market (and thus the availability of co-op placement) may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Information Technology (ITEC) Courses ITEC 1005 [0.5 credit]

Web Development

Introduction to Web development. Combining graphics, text, audio, and video to create Web sites; developing different, major working Web sites on an individual basis and in groups, using valid HTML5, cascading style sheets (CSS3), JavaScript and XML structures. Precludes additional credit for IMD 1005. Lectures and tutorials five hours a week.

ITEC 1100 [0.5 credit]

Introduction to Interactive Media Design

Introduction to interactive multimedia and design, focused on the production and processes of animation, visual fx, game design and development, web design and development, and user experience/interfaces. Topics include: mark-up languages, design process/ problem-solving tools, human-centered design, product development, ethics, and copyright and intellectual property.

Precludes additional credit for IMD 1000. Prerequisite(s): For students not enrolled in CSIT programs.

Lectures three hours a week.

ITEC 1400 [0.5 credit]

Introduction to Programming and Problem Solving

Introduction to basic concepts of procedural programming and algorithm design in C. Topics include: basic variables, functions, operators, program control with iteration and conditionals, I/O operations, text and file processing, structures, arrays, pointers, debugging, algorithmic thinking and pseudocode, computer architecture, operating systems, and libraries.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1400, COMP 1005,
COMP 1405, ITEC 1401.

Lectures/tutorials six hours a week.

ITEC 1401 [0.5 credit]

Introduction to Scripting and Problem Solving

Introduction to basic concepts of object-oriented scripting and algorithm design in Python. Topics include: basic variables, functions, operators, program control with iteration and conditionals, I/O operations, text and file processing, arrays, tuples, lists, debugging, algorithms and pseudocode, computer architecture, operating systems, and libraries.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1400, COMP 1005,
COMP 1405, ITEC 1400.
Lectures/tutorials six hours a week.

ITEC 2000 [0.5 credit] Multimedia Data Management

Issues involving the back-end organization of information focusing on databases and database design, server-side scripting, the structured query language (SQL), digital rights management, and watermarking.

Precludes additional credit for BIT 2008, IRM 2000 (no longer offered), IMD 2000 (no longer offered).

Prerequisite(s): BIT 1400 or ITEC 1400 or ITEC 1401 and IMD 1005 or IRM 1005 or ITEC 1005.

Lectures and tutorials five hours a week.

ITEC 2100 [0.5 credit] Data Visualization

Web-based data visualization techniques and systems. Good design practices for visualization, tools for visualization of data from a variety of fields, and programming of interactive web-based visualizations focusing on JavaScript, CSS, and related libraries. Includes: Experiential Learning Activity Also listed as IRM 2006. Prerequisite(s): ITEC 1005 and ITEC 1400 or ITEC 1401.

Lectures/labs five hours a week.

ITEC 2400 [0.5 credit]

Intermediate Programming

Introduction to object-oriented programming and algorithm design in C++. Topics include code and data encapsulation using classes and objects, inheritance, polymorphism, object-oriented design, data and code abstraction, program efficiency, user interface objects, event-driven systems, and an introduction to linked-lists and searching.

Includes: Experiential Learning Activity

Precludes additional credit for BIT 2400, COMP 1006,

COMP 1406, ITEC 2401. Prerequisite(s): ITEC 1400.

Lectures three hours a week, tutorial three hours a week.

ITEC 2401 [0.5 credit] Intermediate Scripting

Introduction to advanced object-oriented scripting and algorithm design in Python. Topics include class design and encapsulation, inheritance, polymorphism, object-oriented design, data and code abstraction, program efficiency, user interface objects, event-driven systems, and an introduction to linked-lists, sorting, and searching. Includes: Experiential Learning Activity

Precludes additional credit for BIT 2400, COMP 1006, COMP 1406. ITEC 2400.

Prerequisite(s): ITEC 1401.

Lectures/tutorials six hours a week.

ITEC 3100 [0.5 credit] Immersive Storytelling

The craft of digital storytelling, creating compelling online and game-engine packages. Using a variety of narrative formats, interactive tools, and digital content, including blogs and RSS feeds, developing an in-depth story using leading edge technologies and techniques.

Includes: Experiential Learning Activity
Prerequisite(s): MPAD 2004 or CCDP 3003.

Workshop three hours a week.

ITEC 4007 [0.5 credit]

Dynamics and Physics-Based Animation

This course deals with the essentials of physics-based animations and dynamics; topics include basics of animation mechanics, collision detection, particle systems, and dynamic systems (cloth, fluid, and hair).

Includes: Experiential Learning Activity

Precludes additional credit for IMD 4007 (no longer offered)

offered).

Prerequisite(s): BIT 1100 and IMD 3002 or equivalent. Lecture three hours a week, tutorial two hours a week.

ITEC 4009 [0.5 credit]

Rigging and Advanced Character Animation

This course covers the elements of rigging and advanced character animation; topics include the basics of forwards/ inverse kinematics, controls, and weighting, essentials of human and creature rigging, retargeting, face and body motion capture, and motion studies for advanced keyframe animation.

Includes: Experiential Learning Activity

Prerequisite(s): IMD 3002 and IMD 3900 or equivalent. Lectures three hours a week, tutorial two hours a week.

ITEC 4010 [0.5 credit]

Visual Effects and Compositing

This course covers the essentials of Visual FX and compositing, topics include camera setups (motion control systems), set issues, match-moving, image-based lighting, chroma-keying and object extraction, colour correction, 2D tracking, and rotoscoping.

Includes: Experiential Learning Activity Prerequisite(s): IMD 3002 or equivalent.

Lecture three hours a week, tutorial two hours a week.

ITEC 4011 [0.5 credit]

Artificial Intelligence for Digital Media

This course covers the basics of artificial intelligence in games and animation, including behaviour and crowd systems (e.g. boids, reciprocal velocity obstacles, social forces, agent-based modelling, cellular automata), path finding and route planning, as well as procedural animation systems.

Includes: Experiential Learning Activity

Prerequisite(s): BIT 2400 or ITEC 2400 or ITEC 2401 or equivalent.

Lecture three hours a week, tutorial two hours a week.

ITEC 4012 [0.5 credit]

Web Application Frameworks

A detailed look at web application frameworks, focusing client and server-side frameworks that enable more advanced user interactions, including configuration, understanding functionality, and develop with them effectively.

Includes: Experiential Learning Activity Prerequisite(s): IMD 1005 or ITEC 1005.

Lecture three hours a week, tutorial two hours a week.

ITEC 4014 [0.5 credit]

User Experience Design and Accessibility

User experience (UX) of interactive systems, including product and service design, usability and UX research. Emphasis on accessibility, with topics including creating accessible systems for users with a range of abilities, accessibility standards, and validation of designs in a practical context.

Includes: Experiential Learning Activity Prerequisite(s): IMD 3004 or MPAD 1002.

Lecture three hours a week, tutorial two hours a week.

ITEC 4015 [0.5 credit]

Designing and Producing Sound

Introduces the concepts of digital audio & music specifically how it relates to digital media (games, film, mobile, etc). Topics include, digital audio recording, multitrack production and mixing, foley effects, signal processing for effect, time & spatial variations, and studio recording.

Includes: Experiential Learning Activity

Prerequisite(s): Third-year standing in any degree

orogram.

Lecture three hours a week.

ITEC 4016 [0.5 credit]

Virtual and Augmented Reality

Design, development, and evaluation of virtual and augmented reality systems. Topics include VR/AR history, applications, hardware (display and input devices), software, interaction techniques for navigation, selection, manipulation, human factors, and empirical validation. Projects will use modern 3D game engines and VR/AR devices.

Includes: Experiential Learning Activity Prerequisite(s): IMD 2006 or ITEC 3100.

Lecture three hours a week, tutorial two hours a week.

ITEC 4017 [0.5 credit]

Photo and Non-Photo-Realistic Rendering

This course deals with physically-based rendering methods and techniques in the global illumination field; topics include the rendering equation, ray and path tracing, radiosity rendering, photon mapping, final gather methods, materials and shaders, as well taking a look at non-photo-realistic rendering.

Includes: Experiential Learning Activity

Prerequisite(s): Third-year standing in any degree

program.

Lecture three hours a week, tutorial two hours a week.

ITEC 4018 [0.5 credit]

GPU Programming and Real-Time Rendering

This course deals with the programming of the Graphics Processing Unit (GPU); topics include real-time rendering, shaders, and other advanced programming techniques that utilise single-instruction / multiple thread parallel processing units.

Includes: Experiential Learning Activity Prerequisite(s): BIT 2400 or equivalent.

Lecture three hours a week, tutorial two hours a week.

ITEC 4019 [0.5 credit]

Directing and Cinematography for Digital Storytelling

This course covers the basics of being a director in a digital storytelling environment, including the basics of direction, dealing with actors, following scripts, and dealing with elements of cinematography; including lighting, cameras, shade, and shadow.

Includes: Experiential Learning Activity

Prerequisite(s): Third-year standing in any degree

orogram.

Lecture three hours a week, tutorial two hours a week.

ITEC 4020 [0.5 credit]

Environment and Architectural Modelling

The course deals with the creation, development, and use of assets for digital environments; with specific focus on the workflows associated with scene construction and architectural modelling for a variety of real-time and non-real-time systems.

Includes: Experiential Learning Activity

Prerequisite(s): Third-year standing in any degree

program.

Studio five hours a week.

ITEC 4021 [0.5 credit]

Empirical Research Methods in HCI

Advanced quantitative methods and conducting controlled user studies, statistically analyzing and reporting results in a research paper. Topics include history of empirical HCI, experiment design, hypothesis testing, interaction models, and scientific writing. Students complete a termlong research project.

Includes: Experiential Learning Activity

Prerequisite(s): IMD 3004 or 4th year standing in the BMPD program.

Also offered at the graduate level, with different requirements, as ITEC 5209, for which additional credit is precluded.

Media Production and Design (MPAD) Courses MPAD 1001 [0.5 credit]

Introduction to Storytelling: The Context

Theories, origins and evolution of story within society as the digital age shapes the way we construct and consume narratives. How stories are conceived through words, sound and images, and how they resonate with and influence audiences.

Lectures three hours a week.

MPAD 1002 [0.5 credit]

Introduction to Storytelling: The Practice

Finding and telling stories in engaging ways using interactive digital mediums. Assignments build basic skills that may include research, interviewing, writing, storytelling, prototyping, editing, and ethics while focussing on how to structure and develop a fact-based digital media project for dissemination.

Includes: Experiential Learning Activity

Prerequisite(s): MPAD 1001. Workshop three hours a week.

MPAD 2001 [0.5 credit]

Basics of Visual Communication I

Introducing visual storytelling through an array of print, digital, and /or interactive media. Students will explore concepts such as visual literacy, rules of composition, and iconography while learning industry-standard software and tools.

Includes: Experiential Learning Activity

Prerequisite(s): MPAD 1002. Workshop three hours a week.

MPAD 2002 [0.5 credit] **Basics of Visual Communication II**

This course expands on the concepts introduced in MPAD 2001 while introducing additional visual storytelling theories and skills. Students will explore how visual storytelling is incorporated within multimedia projects using a wide range of techniques and tools.

Includes: Experiential Learning Activity

Prerequisite(s): MPAD 2001. Workshop three hours a week.

MPAD 2003 [0.5 credit] **Introductory Data Storytelling**

Governments use data for tracking. Numbers guide public policy and can become powerful and important stories. Students will gain a theoretical understanding of the promise and pitfalls of data availability alongside the practical skills needed for powerful data-based storytelling.

Includes: Experiential Learning Activity

Prerequisite(s): MPAD 1002. Workshop three hours a week.

MPAD 2004 [0.5 credit] Writing for Media

Honing of essential writing skills while building on students' baseline capabilities. Coursework is based on the principle that the best way to improve technique is through regular writing and editing, supported by constructive critiques.

Includes: Experiential Learning Activity

Prerequisite(s): MPAD 1002. Workshop three hours a week.

MPAD 2501 [0.5 credit]

Media Law

A survey of laws that affect the Canadian media. Specific areas include the development of freedom of expression. the Charter of Rights and Freedoms, and statutory and common law limitations on freedoms of the press, including publication bans, libel and contempt of court. Also listed as COMS 2501, JOUR 2501.

Prerequisite(s): Second-year standing in the Bachelor of Media Production and Design program.

Lectures three hours a week.

MPAD 3000 [0.5 credit]

Directed Studies

Directed Studies on select topics. Students interested in pursuing this course need to contact a faculty member to discuss a proposed directed study.

Prerequisite(s): Third year standing in Media Production and Design or permission from the School of Journalism and Communication.

Unscheduled.

MPAD 3001 [0.5 credit] Storytelling and Social Media

Exploring the different ways social media platforms can be used to tell stories. Through production and/or critiquing of social media content and trends students will learn about social media's impact and how they can be responsible digital citizens.

Includes: Experiential Learning Activity

Prerequisite(s): MPAD 2004. Lecture three hours a week.

MPAD 3002 [0.5 credit]

Civics for Journalists

This course offers an overview of key public institutions and civil society organizations in Canada to prepare aspiring journalists to effectively and critically engage with these actors in generating important and illuminating coverage of public affairs.

Also listed as JOUR 2203.

Prerequisite(s): third-year standing in the Bachelor of Media Production and Design or the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information.

MPAD 3003 [0.5 credit] **Minor Design Project**

Drawing on the theory and case studies presented in the fall, students will create a multimedia project involving the various development stages that will be employed in the final-year capstone project, including research, project management and/or community engagement. Includes: Experiential Learning Activity Prerequisite(s): MPAD 2004 and MPAD 3002. Workshop three hours a week.

MPAD 3300 [0.5 credit] Media Ethics in a Digital World

An examination of ethical issues relating to production of news and other forms of information content, particularly as they relate to digital environments. Discussion of various approaches to ethical decision-making, application in contemporary settings.

Also listed as JOUR 3300. Prerequisite(s): MPAD 2501. Lectures three hours a week.

MPAD 3501 [0.5 credit] Internet and Big Data Law

The legal use of big data to create content and analyze information. Who owns data; privacy and security implications within a legal landscape fraught with legal concerns and policy challenges.

Prerequisite(s): JOUR 2501 or MPAD 2501 and third-year standing in the Bachelor of Media Production and Design or in the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information. Lectures three hours a week.

MPAD 3600 [0.5 credit] **Special Topic**

Examination of a topic in storytelling and media not covered in depth in other courses.

Prerequisite(s): third-year standing in the Bachelor of Media Production and Design program.

Lecture three hours a week.

MPAD 3999 [0.0 credit] **Co-operative Work Term**

Includes: Experiential Learning Activity

Prerequisite(s): MPAD 2002.

MPAD 4000 [1.0 credit] **Capstone Project**

Student groups work in collaboration with partner organizations from the community to develop capstone projects beginning with story development and planning, completion of a story design document including project description, research, key vistas and sketches/ storyboards. Group presentations lead to final media project in second term.

Includes: Experiential Learning Activity Prerequisite(s): MPAD 2002, MPAD 3003, ITEC 2100, ITEC 2400 and fourth-year standing in the Bachelor of Media Production and Design program.

MPAD 4001 [0.5 credit] **Media Industries Now and Next**

Changes in the media, the public's relationship with the media and how journalists, news organizations and other media players respond. Practical issues and challenges in the professional life of an information producer. Also listed as JOUR 4001.

Prerequisite(s): Fourth-year standing in the Bachelor of Media Production and Design program. Lectures and discussions three hours a week.

MPAD 4200 [0.5 credit] Freelance Media Survival Skills

Preparation for freelancing to publications and production houses. Resumes, finding potential buyers, interviews, establishing and marketing an individual as a business. Pitching stories, ideas and services.

Prerequisite(s): MPAD 2004 and fourth-year standing in the Bachelor of Media Production and Design program. Lectures three hours a week.

MPAD 4300 [0.5 credit]

Special Topic

Students will choose a topic from a list of journalism options, to be announced each year.

Also listed as JOUR 4300.

Prerequisite(s): Fourth-year standing in the Bachelor of Media Production and Design program.

Seminar three hours a week.

MPAD 4400 [0.5 credit] **Directed Studies**

Directed study on select topics. Students interested in pursuing this course need to contact a faculty member to discuss a proposed directed study.

Prerequisite(s): Third year standing in Media Production and Design or permission from the School of Journalism and Communication.

Unscheduled.

MPAD 4403 [0.5 credit]

Professional Skills: Strategic Communication

Workshop pairing student teams with non-profit groups that are in need of strategic communication advice. Instruction in planning and implementation. Includes: Experiential Learning Activity

Also listed as JOUR 4403.

Prerequisite(s): MPAD 2004 and fourth year standing. Lecture and practicum three hours a week.

MPAD 4500 [0.5 credit] Special Topic

Examination of a topic in storytelling and media not covered in depth in other courses.

Also listed as JOUR 4500.

Prerequisite(s): Fourth-year standing in the Bachelor of Media Production and Design program.

Seminar three hours a week.

MPAD 4501 [0.5 credit] Gender, Identity and Inequality

How social concepts of gender, identity and inequality influence journalism. Theoretical and textual analysis. Historical and contemporary case studies from mainstream and alternative media exploring journalistic expression, professional practices, status and expectations, and cultural representations. Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of Media Production and Design program.

Seminar three hours a week.

Also listed as JOUR 4501.

MPAD 4502 [0.5 credit] Journalism and Conflict

For as long as there has been conflict between peoples, there have been those who bear witness and recount their observations. This course examines journalism and conflict with an emphasis on journalistic perspectives but also through discussion of interdisciplinary literature and academic research.

Includes: Experiential Learning Activity Also listed as JOUR 4502.

Prerequisite(s): fourth-year standing in the Bachelor of Media Production and Design program.

Seminar three hours a week.

MPAD 4503 [0.5 credit]

Journalism, Indigenous Peoples and Canada

Students will explore how journalism in Canada has been associated with colonialism, be challenged to confront misrepresentation in the news media, and learn to consider new strategies and ethical frameworks for covering Indigenous people in the era of reconciliation. Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4503 (no longer

offered).
Prerequisite(s): fourth-year standing in the Bachelor of

Prerequisite(s): fourth-year standing in the Bachelor of Media Production and Design program. Seminar three hours a week.

MPAD 4504 [0.5 credit]

The Media and International Development

A critical examination of the use of journalism as an instrument of international development, historically and currently. To what extent have these efforts been successful? On what grounds are they justified? In what regard have they been instruments of propaganda. Includes: Experiential Learning Activity

Also listed as JOUR 4504.

Prerequisite(s): fourth-year standing in the Bachelor of Media Production and Design program. Seminar three hours a week.

MPAD 4906 [1.0 credit]

Capstone Projects: Translational Approach to Indigenous Community Wellness

This course involves co-developing an Indigenous community-led process or product that addresses a current and specific mental health issue with students from other departments at Carleton University. Involves working in interdisciplinary groups with a community partner. This course may be taken instead of MPAD 4000.

Includes: Experiential Learning Activity
Also listed as ENSC 4909, ISAP 4909, NEUR 4906.
Precludes additional credit for ENSC 4906, ISAP 4906, ISAP 4907, ISAP 4908, NEUR 4905, NEUR 4907, NEUR 4908.

Prerequisite(s): MPAD 2002, MPAD 3003, ITEC 2100, ITEC 2400 and fourth-year standing in the Bachelor of Media production and Design program.

Seminars or workshops three hours a week. A field trip to the partner community is typically required.

Medieval and Early Modern Studies (Minor)

Minor in Medieval and Early Modern Studies (4.0 credits)

This minor is available to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Medieval and Early Modern Studies.

Requirements:

1. 1.0 credit in:		1.0
MEMS 2001 [0.5] &	Discovering the Medieval and Early Modern Past	
MEMS 3001 [0.5]	Researching the Medieval and	
	Early Modern Past	

- 2. 2.0 credits from Approved Medieval and Early Modern Studies Electives at the 2000-level or higher, with the exception of 1.0 credit in approved language training which may be at the 1000-level or higher.
- 3. 1.0 credit from Approved Medieval and Early Modern Studies Electives at the 3000-level or higher.
- 4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Notes:

- 1. Courses used to fulfil Items 2 and 3 above must be from more than one unit.
- 2. Other courses may be substituted for the credits specified in Items 2 and 3, when material on Medieval and Early Modern topics are central to the course. Such substitutions must be individually approved by the program coordinator, through the College of the Humanities. Students are encouraged to consult course descriptions of Special Topics courses in the related academic units.

Approved Medieval and Early Modern Studies Electives

Note: access to these courses is not guaranteed, and may depend upon space availability and the satisfaction of other requirements such as course prerequisites.

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Medieval and Early Modern Studies (MEMS) Courses

MEMS 2001 [0.5 credit]

Discovering the Medieval and Early Modern Past

An introduction to the Late Antique, Medieval and Early Modern worlds. Organized thematically, students will be introduced to interdisciplinary exploration of core topics. Prerequisite(s): second-year standing.

Lectures and discussion groups three hours a week.

MEMS 3001 [0.5 credit]

Researching the Medieval and Early Modern Past

Continued interdisciplinary study of the Late Antique, Medieval and Early Modern worlds, with a focus on how to develop a deeper analysis of the core topics examined in MEMS 2001.

Prerequisite(s): MEMS 2001, or permission of the Program Coordinator.

Lectures three hours a week.

Music

This section presents the requirements for programs in:

- · Music B.Mus. Honours
- Music B.A. Honours
- Music B.A. Combined Honours
- · Music B.A.
- Minor in Music
- Certificate in Carillon Studies

Certificate in Carillon Studies (4.0 credits)

While the Certificate in Carillon Studies may be completed as an independent, stand-alone certificate, all courses taken in completion of the curriculum outlined above may be applied for credit toward the Bachelor of Music or B.A. Music degrees, should a certificate student opt to apply for acceptance to one of these programs. Since the courses are transferable in this way, it will also be possible for students currently enrolled in one of Carleton's undergraduate Music programs to concurrently complete the Certificate in Carillon Studies.

Successful completion requires grades of C or higher in all courses.

Regulations

In addition to the program requirements described here, students must satisfy the University regulations (see the *Academic Regulations of the University* section of this calendar).

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines.

Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Academic Continuation Evaluation for Bachelor of Music

Students in the Bachelor of Music (Honours) follow the continuation requirements for Honours programs, as described in Section 3.2.6 of the *Academic Regulations*

of the University, with the following additions and amendments:

- Students with 15.5 or more program credits completed, but who have a Major CGPA less than 6.00, will be required to leave the B. Music program with the decision Continue in Alternate (CA).
- The Bachelor of Music defines a Performance Core consisting of the following courses:

MUSI 1900 [0.5]	Performance I
MUSI 1901 [0.5]	Performance II
MUSI 2900 [0.5]	Performance III
MUSI 2901 [0.5]	Performance IV
MUSI 3900 [0.5]	Performance V
MUSI 3901 [0.5]	Performance VI

 Bachelor of Music students who fail to obtain a grade of B- or higher in any two consecutive performance courses at the 2000- and/or 3000-level, or in any two consecutive attempts at the same 2000-level and/or 3000-level performance course, in credits 5.5 to 15.0 must leave the program with the status Continue in Alternate (CA).

Admissions Information

Admission Requirements are for the 2025-26 year only. and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite

averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow

the recommendations will not be disadvantaged in the admission process.

Degree

• B.Mus. (Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. Although it is not an admission requirement, a 4U course in English is recommended.

Note: An audition is required; for more information on the audition, consult admissions.carleton.ca.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those courses assessed as being appropriate for the program selected.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

To be eligible for admission to the Certificate in Carillon Studies, applicants must have:

- Successful audition (a minimum piano proficiency level equivalent to Royal Conservatory of Music Grade 9 is expected);
- Grade II Theory Rudiments, Royal Conservatory of Music (or equivalent);
- Approval of the relevant SSAC/Music Associate Performance Instructor (normally the Dominion Carillonneur);
- · Approval of the Music Program.

Music (MUSI) Courses

Note: the majority of courses are open to non-Majors; students are advised to consult the Discipline. Priority is given to Music students.

MUSI 1003 [0.5 credit] Understanding Music

Through musical examples drawn from diverse cultures and historical periods, students develop the ability to describe and analyze different aspects of music and deepen their appreciation of music as a cultural experience. No credit for students in B.Mus, B.A. Honours Music or B.A. Music.

Lectures three hours a week.

MUSI 1020 [1.0 credit] Thinking About Music

Introduction to issues and methods in the study of music, explored through case studies drawing from a wide range of musics (including Western art music, global music traditions, popular music, and jazz). Includes an introduction to writing and research about music. Precludes additional credit for MUSI 1000 (no longer offered), MUSI 1001 (no longer offered).

Prerequisite(s): First-year enrollment in a music program (B.Mus, Music BA Honours, Music BA Combined Honours, Music BA, Minor in Music, Certificate in Carillon Studies). Lectures two hours a week. Tutorials 1 hour a week.

MUSI 1107 [0.5 credit] Elementary Materials of Music

An introduction to the rudiments of music and aural training. Successful completion of this course will fulfill the prerequisite for entry into MUSI 1700.

Lectures three hours a week.

MUSI 1700 [0.5 credit] Foundations of Music Theory

An introduction to the organizational principles underlying tonal music including intervals, scales, rhythm, metre, chords, counterpoint, form, cadences, and harmonic progressions.

Prerequisite(s): MUSI 1107, or permission of the Discipline.

Lectures three hours a week.

MUSI 1701 [0.5 credit] Tonal Music Literacy

A study of the harmonic, melodic, rhythmic and formal structures of music of the common-practice period, with emphasis on the development of analytical and written skills of diatonic music.

Prerequisite(s): MUSI 1700 or permission of the Discipline.

Lectures three hours a week.

MUSI 1711 [0.5 credit] Applied Rhythmic Training I

A study of the rhythm of selected classical, popular, and world musics, with emphasis on applied performance, movement, and dictation.

Includes: Experiential Learning Activity
Prerequisite(s): permission of the Discipline.
Lectures and workshops three hours a week.

MUSI 1720 [0.5 credit] Vocal Musicianship

A study of aural training and musicianship through group and individual singing of selected classical, popular, and world musics.

Includes: Experiential Learning Activity
Precludes additional credit for MUSI 1710 (no longer offered).

Prerequisite(s): permission of the Discipline. Lectures and workshops three hours a week.

MUSI 1900 [0.5 credit] Performance I

Individual vocal or instrumental instruction in classical, traditional or popular idioms, in addition to individual performances and group class instruction.
Includes: Experiential Learning Activity
Prerequisite(s): audition and enrolment in the B.Mus. program; first-year standing or permission of the Discipline.

MUSI 1901 [0.5 credit] Performance II

Individual vocal or instrumental instruction in classical, traditional or popular idioms, in addition to individual performances and group class instruction.
Includes: Experiential Learning Activity
Prerequisite(s): MUSI 1900 and enrolment in the
B.Mus. program; first-year standing or permission of the Discipline.

MUSI 1914 [0.0 credit]

Ensemble I
Participation in a vocal

Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity

Prerequisite(s): first-year standing in the B.Mus. program and permission of the Ensemble Director.

Ensemble work approximately two hours a week throughout either the fall or winter term and participation in

concerts.

MUSI 1915 [0.0 credit]

Ensemble II

A continuation of MUSI 1914. Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance and Practical Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity

Prerequisite(s): first-year standing in the B.Mus. program

and permission of the Ensemble Director.

Ensemble work approximately two hours a week throughout either the fall or winter term and participation in

MUSI 2005 [0.5 credit] Jazz History

A survey of jazz styles from their roots in pre-twentiethcentury music to contemporary jazz idioms. Among others, areas may include New Orleans jazz, swing, bebop, cool jazz, free jazz, Latin jazz, and fusion.

Precludes additional credit for MUSI 2205.

Prerequisite(s): second-vear standing.

Lectures three hours a week.

MUSI 2007 [0.5 credit] Popular Music 1945-1980

History and style of popular musics (primarily in North America and the UK) from the mid-1940s to the 1980s. Among others, areas may include early rock 'n' roll, British blues, soul, country, psychedelia, punk, heavy metal, disco, and hip hop.

Precludes additional credit for MUSI 2207, MUSI 2208, MUSI 2209.

Prerequisite(s): second-year standing.

Lectures three hours a week.

MUSI 2008 [0.5 credit] Music of the World's Peoples

A survey of musical practices from various regions of the world, with an emphasis on the sociocultural contexts in which those musics are created and performed.

Includes: Experiential Learning Activity Precludes additional credit for MUSI 2300.

Prerequisite(s): second-year standing.

Lectures three hours a week.

MUSI 2009 [0.5 credit] Music of Asia

A comparative and analytical study of music in Asia, including India, China, Korea, Indonesia, Japan, and the Arabic world, through an examination of the music, musical instruments and theoretical systems. Precludes additional credit for MUSI 2301. Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 2102 [0.5 credit] Music in an Age of Spectacle, Commerce, and Colonization

The Baroque (1600-1750) was simultaneously shaped by absolutist regimes, competing religions, and an emerging public sphere. Music and culture from Monteverdi to Bach and Handel are investigated in the contexts of power, (geo)politics, religion, aesthetics, gender, socioeconomics, dissemination, genre, and compositional practices.

Precludes additional credit for MUSI 2001. Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 2103 [0.5 credit]

Music in an Age of Order, Invention, and Revolution

Peace and revolution, faith and secularism, noble privilege and bourgeois commerce: fundamental contradictions underlying the creative work of Mozart, Haydn, and Beethoven. This course studies their compositions—operas, sacred works, symphonies. chamber music—within the political, social and cultural institutions of their times (ca. 1730-1815). Precludes additional credit for MUSI 2002, MUSI 2108.

Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 2108 [0.5 credit] Western Art Music 1750-1900

Introduction to Western art music of the Classical and Romantic periods. Major musical genres, compositional practices, and cultural contexts are investigated through examinations of representative works.

Precludes additional credit for MUSI 1001 (no longer offered), MUSI 2103, MUSI 3408.

Prerequisite(s): Second-year standing.

Lectures three hours a week.

MUSI 2203 [0.5 credit] Music in Canada

Through an examination of selected genres, practices and creators, this course explores the ways that music participates in shaping complex and often conflicting ideas about nation, place, and identity in Canada.

Precludes additional credit for MUSI 2006 (no longer offered), MUSI 3006, MUSI 3103 (no longer offered).

Prerequisite(s): Second-year standing.

MUSI 2601 [0.5 credit]

Orchestration and Instrumentation

Introduction to the fundamentals of effective and professional arranging. All aspects of the various instruments of the orchestra and matters having to do with the practicalities of orchestration for both small and large ensembles, and accepted professional standards of score presentation.

Prerequisite(s): MUSI 1701 and MUSI 1711, or permission of the instructor.

Lecture three hours a week.

MUSI 2602 [0.5 credit] Composition I

Introduction to theories and technicalities involved in original creative writing through the preparation of individual assignments; based in the practice of recent music in the Western Classical tradition while allowing for the music of other Western styles and traditions to be addressed.

Includes: Experiential Learning Activity
Prerequisite(s): MUSI 1701 and MUSI 1711, or
permission of the instructor. MUSI 2601 is recommended.
Lectures and workshops three hours a week.

MUSI 2605 [0.5 credit] Choral Conducting

Introduction to the special stylistic features of choral music from the Renaissance to the present as well as to a variety of practical techniques (vocal production, gesture, conducting patterns, diction, etc.).

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing in the B.Mus.

program or permission of the instructor.

Lectures three hours a week.

MUSI 2607 [0.5 credit] Digital Music Literacy

Introduction to music theories and approaches with a focus on knowledge of digital music practices. This course embraces a variety of musical styles and traditions, and introduces students to Digital Audio Workstations, sound synthesis, analytical techniques of sound, and related concepts.

Includes: Experiential Learning Activity

Precludes additional credit for MUSI 2609 (no longer

offered).

Prerequisite(s): MUSI 1700 and enrolment in the BMus or BA Music program, or permission of the instructor. Lectures three hours a week.

MUSI 2608 [0.5 credit]

Fundamentals of Electronic Music Production

Theory and practice of electronic music creation, focusing on audio editing, synthesis, sampling, beat-making, signal processing, and sound design, using a variety of professional-grade software packages.

Includes: Experiential Learning Activity

Precludes additional credit for MUSI 2603 (no longer offered).

Prerequisite(s): MUSI 2607 and enrolment in the BMus or BA Music program, or permission of the instructor. Lectures three hours a week, plus individual studio time.

MUSI 2700 [0.5 credit] Western Art Music Theory

A continuation of the study of the harmonic, melodic, rhythmic and formal structures of music of the common-practice period and early twentieth century, with emphasis on chromaticism and the development of analytical and written skills.

Prerequisite(s): MUSI 1701 or permission of the instructor. Lectures three hours a week.

MUSI 2701 [0.5 credit] Popular Music Practice

A study of the rhythmic, melodic, harmonic and formal structures of popular musics.

Prerequisite(s): MUSI 1700 or permission of the instructor. Lectures three hours a week.

MUSI 2703 [0.5 credit] Practical Keyboard Skills

A practical study of rhythm, harmony and melody on the keyboard, with an emphasis on vocal and instrumental accompaniment and the development of improvisation skills in a variety of styles.

Includes: Experiential Learning Activity

Prerequisite(s): MUSI 1701 or permission of the instructor.

Labs three hours a week.

MUSI 2710 [0.5 credit] Aural Training

A continuation of the study of ear training, sight singing, and basic keyboard skills in relation to classical and popular musics, with emphasis on melodic, harmonic, and formal structures.

Includes: Experiential Learning Activity

Prerequisite(s): MUSI 1710, MUSI 1720, or permission of

the instructor.

MUSI 2711 [0.5 credit]

Applied Rhythmic Training II

A continuation of the study of the rhythm of commonpractice and world musics, with emphasis on applied performance, movement, and dictation. Includes: Experiential Learning Activity Prerequisite(s): MUSI 1700, MUSI 1711. Lectures and workshops three hours per week.

MUSI 2900 [0.5 credit] Performance III

A continuation of MUSI 1901. Includes: Experiential Learning Activity Prerequisite(s): second-year standing in the B.Mus. program and MUSI 1901 with a C+ or higher, or permission of the Discipline.

MUSI 2901 [0.5 credit] Performance IV

A continuation of MUSI 2900. Includes: Experiential Learning Activity Prerequisite(s): second-year standing in the B.Mus. program and MUSI 2900 with a B- or higher, or permission of the Discipline.

MUSI 2914 [0.0 credit]

Ensemble III

A continuation of MUSI 1915. Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance and Practical Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity
Prerequisite(s): second-year standing in the B.Mus.
program and permission of the Ensemble Director.
Ensemble work approximately two hours a week through either the fall or winter term, and participation in concerts.

MUSI 2915 [0.0 credit] Ensemble IV

A continuation of MUSI 2914. Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance and Practical Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity
Prerequisite(s): second-year standing in the B.Mus.
program and permission of the Ensemble Director.
Ensemble work approximately two hours a week
throughout either the fall or winter term and participation in
concerts.

MUSI 3000 [0.5 credit] Careers in Music

An introduction to building a career in music and musicadjacent disciplines. Topics include finances; issues in freelance work and private teaching; overview of recording arts; collaboration with other disciplines; and graduate school and other specialized study. Culminates in the creation of an individualized professional portfolio. Prerequisite(s): second-year standing.

Lectures and workshops three hours per week.

MUSI 3006 [0.5 credit] Popular Music Before 1945

Selected aspects of the development of popular musics (primarily in North American and the UK) from their roots in the nineteenth century until the mid-1940s. Among others, areas may include blues, country, ragtime and other early commercial dance musics, Tin Pan Alley, and musical theatre.

Precludes additional credit for MUSI 2006 (no longer offered), MUSI 2203.

Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 3104 [0.5 credit] Popular Musics of Canada

A survey of popular musics in Canada from early colonial times to the present. The course will consider a wide range of musical styles and genres, along with related cultural and historical issues.

Precludes additional credit for MUSI 3100. Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 3106 [0.5 credit] Popular Musics of the World

Through a series of case studies, this course examines the impacts of various socio-historical phenomena, including globalization, colonialism and technology on popular music practice and consumption in global contexts.

Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 3107 [0.5 credit] Classical Indian Music

An introduction to the history and theory of classical Indian music including ragas, instruments, rhythm and improvisation.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing, or permission of the instructor.

MUSI 3108 [0.5 credit]

Musics of the Middle East and North Africa

An examination of various musics, devotional traditions, and shifting cultural and art movements in the region, resulting from processes of globalization, political change, and technological innovation. Course sessions will include close and critical discussion of selected texts, audio-visual examples, and ethnomusicological documentary films. Prerequisite(s): second-year standing.

Seminars three hours a week.

MUSI 3200 [0.5 credit] **Special Topics**

Courses focusing on one selected aspect of music, in the area of musicology, theory or composition. The course offerings change from year to year.

Prerequisite(s): permission of the instructor.

Lectures and seminars three hours a week.

MUSI 3201 [0.5 credit]

Special Topics

Courses focusing on one selected aspect of music, in the area of musicology, theory or composition. The course offerings change from year to year.

Prerequisite(s): permission of the instructor.

Lectures and seminars three hours a week.

MUSI 3205 [0.5 credit] **Specialized Academic Studies**

Course designed for BMus or BA Music Honours students who have acquired an extensive background through courses in theory, musicology, or composition. Course content is planned with a Faculty Supervisor, and instruction is one-on-one.

Prerequisite(s): Proposal, permission of the Program, and a minimum GPA of 9.0 in Music.

Individual instruction.

MUSI 3206 [0.5 credit] **Specialized Performance Studies**

Course designed for BMus Honours students who have acquired an extensive background through performance. Course content is planned with the Supervisor of Performance Studies, and instruction is one-on-one. Prerequisite(s): Proposal, permission of the Program, and a minimum GPA of 9.0 in Music.

Individual instruction.

MUSI 3301 [0.5 credit]

Music, Religion, and Spiritual Practices

Through various case studies, this course considers the role music plays in selected religions and spiritual practices.

Also listed as RELI 3301.

Prerequisite(s): second-year standing.

Seminars three hours a week.

MUSI 3302 [0.5 credit]

Music and Gender I

The role of gender in the theory and practice of music in western and non-western cultures.

Prerequisite(s): second-year standing.

Lectures three hours a week.

MUSI 3303 [0.5 credit]

Principles and Practices of Music Therapy

Literature, practice and theory of music therapy. The use of music (improvisation, the voice, and reception) with various populations, including children and adults with special needs, people in long term care, people with neurological disorders, and in palliative care.

Prerequisite(s): second-vear standing or permission of the instructor.

Lectures three hours a week.

MUSI 3400 [0.5 credit] A History of Opera before 1800

A survey of the development of opera from the beginnings to about 1800. The major monuments of Italian, French, German and English opera, by such composers as Monteverdi, Cavalli, Scarlatti, Purcell, Lully, Gluck, Rameau, Mozart and Haydn.

Prerequisite(s): second-year standing.

Lectures three hours a week.

MUSI 3401 [0.5 credit]

A History of Opera from 1800 to 1945

A study of romantic and contemporary opera through an examination of selected works from Weber's Der Freischütz to Britten's Peter Grimes, including an investigation of national styles from Wagnerian music drama and Italian verismo to Russian realism and German expressionism.

Prerequisite(s): second-year standing.

Lectures three hours a week.

MUSI 3402 [0.5 credit]

Film Music

The use of music in film, from the silent era to the present day, studying the techniques, styles and theory of film music through the examination of selected scenes.

Also listed as FILM 3402.

Prerequisite(s): second-year standing.

Lectures three hours a week, screening two hours a week.

MUSI 3403 [0.5 credit]

Music Industries

An introduction to the structure and history of the music industries.

Also listed as COMS 3404.

Prerequisite(s): second-year standing.

MUSI 3405 [0.5 credit]

Musical Theatre

A survey of the styles, works, and artists of the musical theatre genre as well as the artistic elements that comprise musical theatre.

Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 3406 [0.5 credit]

Instrumental Music: Music for Orchestra

Origins and development of orchestral music from its beginnings as an independent form in the 18th century to the present. Major symphonies and symphonic poems by composers like Haydn, Beethoven, Liszt, Brahms, Strauss, and Shostakovich. Brief examination of concerto and ballet music.

Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 3407 [0.5 credit]

Instrumental Music: Chamber Music

History of chamber music and the cultural contexts within which it rose to prominence in Europe and North America in the 18th, 19th and 20th centuries. Genres by representative composers including the sonata, duos, trios, quartets, quintets, sextets, divertimenti, and works for small chamber orchestra.

Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 3408 [0.5 credit]

Music in an Age of Passion, Imagination, and Iconoclasm

This course examines European art music of the nineteenth century, a revolutionary period of socio-political change when inspiration, subjectivity, radical idealism, expressive intensity, cultural nationalism, and the primacy of the individual creative voice were held up as primary aesthetic ideals.

Precludes additional credit for MUSI 2108.

Prerequisite(s): Third-year standing or permission of the instructor.

Seminars three hours a week.

MUSI 3409 [0.5 credit]

Music in an Age of Tumult, Innovation, and Pluralism

A study of western art music of the 20th century. Musical works, compositional techniques and performance practices are examined in the context of musical innovation, social change, political upheaval, and stylistic pluralism in a rapidly changing "modern" world. Prerequisite(s): Third-year standing or permission of the instructor.

Seminars three hours a week.

MUSI 3602 [0.5 credit]

Composition II

Designed to enable students to develop abilities in the writing of original music. The study and appreciation of modern and contemporary styles and techniques are encouraged.

Includes: Experiential Learning Activity
Precludes additional credit for MUSI 3600 (no longer offered).

Prerequisite(s): MUSI 2601, MUSI 2602, and MUSI 2700, or permission of the instructor.

Lectures, workshops, and individual consultations three hours a week.

MUSI 3603 [0.5 credit] Computer Music Techniques

An introduction to the techniques of sound synthesis primarily through practical experience at the digital synthesizer and computer. The basics of machine operations, software and computer applications to composition and synthesis. Enrolment is limited. Includes: Experiential Learning Activity Prerequisite(s): second-year standing, MUSI 2608 and enrolment in the BMus or BA Music program, or permission of the instructor.

Lectures three hours a week, plus individual studio time.

MUSI 3604 [0.5 credit] Computer Music Projects

Examination of the various applications of digital equipment through the realization of original projects. Students may focus on studio composition, software development or analytic research. Appropriate compositional techniques and problem solving strategies are also discussed. Enrolment is limited.

Includes: Experiential Learning Activity
Prerequisite(s): second-year standing, and either MUSI
2603 (no longer offered) or MUSI 2608, or permission of
the instructor.

Lectures three hours a week, plus individual studio time.

MUSI 3605 [0.5 credit] Instrumental Conducting

Introduction to the practice of conducting Instrumental music from the Classical era to the present as well as to a variety of practical techniques (rehearsal techniques, gesture, conducting patterns, score study, etc.). Includes: Experiential Learning Activity Prerequisite(s): second-year standing in the B.Mus. program or permission of the instructor.

MUSI 3606 [0.5 credit]

Live Sound

Theoretical, practical and technical requirements of audio production in live settings are explored through lectures, demonstrations and workshops. Students develop skills in critical listening, pre-production planning, microphone selection and placement, signal routing, audio processing, monitoring and mixing for live event venues. Prior experience not required.

Includes: Experiential Learning Activity Lectures and workshops three hours a week.

MUSI 3700 [0.5 credit] Seminar in Theory and Analysis

Selected topic in music theory. Topics will change yearly and may include: methods of music analysis, analysis of selected works, styles and structures of common practice or post common practice period, music, modal, tonal, or post-tonal counterpoint, history of music theory. Precludes additional credit for MUSI 3500.

Prerequisite(s): MUSI 2700 or permission of the instructor.

Seminars three hours a week.

MUSI 3701 [0.5 credit] Jazz Styles and Structures

Techniques of arranging and composition for small and large ensembles will be studied through the examination of selected works drawn from the jazz repertoire. Works will be selected for stylistic and theoretical analysis, for exercises in aural recognition, and for arranging purposes.

Includes: Experiential Learning Activity
Precludes additional credit for MUSI 4203 (taken in
1994-95) or MUSI 4204 (taken in 1995-96).
Prerequisite(s): MUSI 2701 or permission of the instructor.

Workshops three hours a week.

MUSI 3702 [0.5 credit] Introduction to Physics and Psychoacoustics of Music

Basic topics in physics and psychoacoustics, with an emphasis on those concepts that are most useful for music performance, analysis, composition, and musicology.

Prerequisite(s): second-year standing. Lectures three hours a week.

MUSI 3703 [0.5 credit]

Improvisation in Theory and Practice

Selected forms of improvisation from diverse musical and cultural traditions. In addition to weekly seminar meetings, the class will engage in experiential forms of learning by actively improvising in a weekly performance-oriented seminar.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing.

Discussion and performance seminars three hours a

week.

MUSI 3710 [0.5 credit] Global Music Theories

A continuation of the study of aural skills, theory and analysis that focuses on global traditions in musicianship and musical practices.

Includes: Experiential Learning Activity

Prerequisite(s): MUSI 1700, MUSI 2710 and MUSI 2711,

or permission of the instructor.

Lectures and workshops three hours per week.

MUSI 3900 [0.5 credit] Performance V

A continuation of MUSI 2901. Includes: Experiential Learning Activity Prerequisite(s): third-year standing in B. Mus. and MUSI 2901 with a B- or higher, or permission of the Discipline.

MUSI 3901 [0.5 credit] Performance VI

A continuation of MUSI 3900.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in the B.Mus. program and MUSI 3900 with a B- or higher, or permission of the Discipline.

MUSI 3914 [0.0 credit] Ensemble V

A continuation of MUSI 2915. Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance and Practical Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in the B.Mus. program and permission of the Ensemble Director.

Ensemble work approximately two hours a week

throughout either the fall or winter term and participation in concerts.

MUSI 3915 [0.0 credit]

Ensemble VI

A continuation of MUSI 3914. Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance and Practical Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in the B.Mus. program

and permission of the Ensemble Director.

Ensemble work approximately two hours a week throughout either the fall or winter term and participation in

concerts.

MUSI 4000 [0.5 credit] Performance VII

This is an optional performance course for B.Mus. students with high academic standing.

Includes: Experiential Learning Activity

Precludes additional credit for MUSI 4900, MUSI 4901,

MUSI 4907.

Prerequisite(s): fourth-year standing in B.Mus.,

MUSI 3901, A- or higher average in second- and third-year MUSI performance courses, and permission of the Music performance supervisor.

Individual instruction.

MUSI 4001 [0.5 credit] Performance VIII

This is an optional performance course for B.Mus. students with high academic standing. Includes: Experiential Learning Activity Precludes additional credit for MUSI 4002, MUSI 4003, MUSI 4900 (no longer offered), MUSI 4901, MUSI 4907. Prerequisite(s): fourth-year standing in B.Mus. standing, MUSI 4000 with A- or higher, and permission of the Music performance supervisor. Individual instruction.

MUSI 4002 [0.5 credit] Graduating Demo Recording

A graduation recording of substantial duration arranged in consultation with the discipline. A proposal must be submitted one week before the last day for course changes. All recording costs must be borne by the student.

Includes: Experiential Learning Activity
Precludes additional credit for MUSI 4001, MUSI 4003,
MUSI 4900 (no longer offered), MUSI 4901 (no longer offered), MUSI 4907.

Prerequisite(s): fourth-year standing in B.Mus.,

MUSI 4000 with a grade of A- or higher, and permission of both the relevant associate music instructor and the music performance supervisor.

Individual instruction.

MUSI 4003 [0.5 credit] Graduating Recital

Public recital arranged in consultation with the Supervisor of Performance and Practical Studies. An outline of the program must be submitted one week before the last day for course changes.

Includes: Experiential Learning Activity

Precludes additional credit for MUSI 4001, MUSI 4002,

MUSI 4900, MUSI 4901, MUSI 4907.

Prerequisite(s): fourth-year standing in B.Mus., MUSI 4000 with A- or higher, and permission of both the relevant associate music instructor and the Music performance supervisor.

Individual instruction.

MUSI 4005 [0.5 credit] Issues in Jazz Studies

An examination of key issues in the study of jazz including history/historiography, gender, genre, race, politics, identity and performance.

Prerequisite(s): MUSI 2005 and third-year standing.

MUSI 4006 [0.5 credit] Issues in the Study of Popular Music

An introduction to current issues in the study of popular music. The course will be organized around a series of case studies.

Prerequisite(s): Third-year standing, and at least one of MUSI 2005 or MUSI 2007.

Seminars three hours a week.

MUSI 4007 [0.5 credit] The Composer in Context

Examination of the life and music of a selected composer, and the historical, social, cultural, and political factors that shaped the context within which they worked. Focus on history, biography, musical style and analysis.

Prerequisite(s): Fourth-year standing or permission of the instructor.

Lectures and seminars three hours a week.

MUSI 4102 [0.5 credit]

Ethnomusicology in Theory and Practice

In this course students learn and apply research methods common to ethnomusicological research, developing an individual ethnographic project that draws on critical contemporary theories in ethnomusicology.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing, or permission of the instructor.

Seminars three hours a week.

MUSI 4103 [0.5 credit]

Music, Migration and Diaspora in Canada

Critical analyses of diversity and multiculturalism narratives in Canada and the ways that settler-colonialism influenced and continues to inform music creation and expression. Various case studies examine the diversity of musics found in Canada and the ways that music facilitates belonging and/or exclusion to community. Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as MUSI 5015, for which additional credit is precluded.

Seminars three hours a week.

MUSI 4104 [0.5 credit]

First Peoples Music in Canada

This course examines the role of Indigenous music and musicians in various contemporary issues and priorities for First Peoples in Canada, including political activism, language and cultural maintenance and revitalization, environmental justice and the land, reconciliation and decolonization.

Prerequisite(s): fourth-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as MUSI 5016, for which additional credit is precluded.

Seminars three hours a week.

MUSI 4105 [0.5 credit] Study of Musics in Africa

This course explores musics in Africa, engaging with issues of colonialism, ownership and copyright, politics and protest, social change, and global relationships. Prerequisite(s): third year standing, or permission of the instructor.

Lectures and seminars three hours a week.

MUSI 4200 [0.5 credit]

Special Topics

Courses focusing on one selected aspect of music, in the area of either musicology, theory or composition. The course offerings change from year to year.

Prerequisite(s): permission of the instructor.

Lectures and seminars three hours a week.

MUSI 4201 [0.5 credit]

Special Topics

Courses focusing on one selected aspect of music, in the area of either musicology, theory or composition. Course offerings change from year to year.

Prerequisite(s): permission of the instructor.

Lectures and seminars three hours a week.

MUSI 4205 [0.5 credit]

Specialized Academic Studies

Course designed for BMus or BA Music Honours students who have acquired an extensive background through courses in theory, musicology, or composition. Course content is planned with a Faculty Supervisor, and instruction is one-on-one.

Prerequisite(s): Proposal, permission of the Program, and a minimum GPA of 9.0 in Music.

Individual instruction.

MUSI 4206 [0.5 credit] Specialized Performance Studies

Course designed for BMus Honours students who have acquired an extensive background through performance. Course content is planned with the Supervisor of Performance Studies, and instruction is one-on-one.

Prerequisite(s): Proposal, permission of the Program, and a minimum GPA of 9.0 in Music.

Individual instruction.

MUSI 4209 [1.0 credit] Specialized Academic Studies

A course designed for BMus or BA Music Honours students who have acquired an extensive background through courses in theory, musicology or composition. Course content is planned with a Faculty Supervisor, and instruction is one-on-one.

Prerequisite(s): Proposal, permission of the Program, and a minimum GPA of 9.0 in Music.

MUSI 4304 [0.5 credit] Music and Globalization

Examining music's role in the multifaceted and complex processes of globalization. Drawing on case studies of "world musics", this course explores how sound and music negotiate histories of post/colonialism, cultural and economic imperialism, and constructions of sameness and difference in "world music" contexts.

Prerequisite(s): fourth-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as MUSI 5017, for which additional credit is precluded.

Seminars three hours a week.

MUSI 4306 [0.5 credit]

Music and Wellbeing in a Global Context

An examination of the ways in which music contributes to mental, social and physical wellbeing throughout the world, drawing from the fields of neuroscience, medical ethnomusicology, community music and cross-cultural studies.

Prerequisite(s): fourth-year standing or permission of the instructor.

Seminar three hours a week.

MUSI 4307 [0.5 credit]

Music in an Age of Power, Plague, and Courtly Love

The music of the "dark ages" is illuminated in the context of politics, spectacle, devotion, celebration, compositional process, manuscript culture, dissemination, musical notation, plague, and courtly love. "Medievalism" is examined as an aesthetic of the era (ca. 400-1400) and as reinterpreted in our modern world.

Prerequisite(s): Fourth-year standing or permission of the instructor.

Seminar three hours a week.

MUSI 4308 [0.5 credit]

Music in an Age of Devotion, Seduction, and Rebirth

This course brings to life the Renaissance (1400-1600), when music played a vital role in lavish courts, grand cathedrals, and vibrant cities. Madrigals, masses, and motets are examined in the context of politics, religion, gender, manuscript and print culture, rhetoric, art, and architecture.

Prerequisite(s): Fourth-year standing or permission of the instructor.

Seminar three hours a week.

MUSI 4602 [0.5 credit] Composition III

A continuation of MUSI 3602, focusing on the development of creative individual approaches to music composition.

Includes: Experiential Learning Activity

Precludes additional credit for MUSI 3600 (no longer

offered).

Prerequisite(s): MUSI 3602, or permission of the

instructor.

Lectures, workshops, and individual consultations three hours a week.

MUSI 4700 [0.5 credit]

Advanced Seminar in Theory and Analysis

A study of a selected topic in music theory. Topics will change yearly and may include: methods of music analysis; analysis of selected works; styles and structures of common practice or post common practice period music; modal, tonal, or post-tonal counterpoint; history of music theory.

Prerequisite(s): MUSI 2700 or permission of the instructor. Seminars three hours a week.

MUSI 4701 [0.5 credit] Introduction to Jazz Arranging

The art of arranging for small and large jazz ensembles is introduced through analysis of recordings by artists such as Duke Ellington, Fletcher Henderson, Count Basie, Rob McConnell, and Maria Schneider. Topics may include 2-, 3-, and 4-voice writing in a jazz idiom.

Prerequisite(s): MUSI 3701 or permission of the instructor. Seminars three hours a week.

MUSI 4702 [0.5 credit]

Topics in Music Perception and Cognition

Selected advanced topics in the perception and cognition of music. Where appropriate, emphasis will be placed upon areas of overlap between psychological research and issues in aesthetics and cultural theory.

Prerequisite(s): third-year standing and MUSI 3702, or permission of the department.

Seminars three hours a week.

MUSI 4704 [0.5 credit]

Tonal Counterpoint

This course deals with the development of writing skills and knowledge of counterpoint as manifest in the Baroque era. Topics may include invention, canon, fugue, dance forms, the compositional language of J. S. Bach, and contrapuntal techniques in the late 18th century and beyond.

Prerequisite(s): MUSI 2700, or permission of the instructor.

Lectures and seminars three hours a week.

MUSI 4705 [0.5 credit]

Post-Tonal Theory and Analysis

Fundamentals of post-tonal music theory and analysis. Neo-tonal, atonal, twelve-tone and third-stream jazz. Students will develop the critical skills to understand these theoretical tools and be conversant with some of the aesthetic precepts associated with them.

Prerequisite(s): MUSI 2700 or permission of the instructor. Lectures and seminars three hours a week.

MUSI 4800 [0.5 credit] Practicum in Music

Practical experience in music-specific projects such as recording studios, librarianship, research, multimedia, etc. at local institutions. Placements are planned with the Practica Supervisor and a proposal is required. A maximum of one credit of practicum may be offered in fulfillment of Music requirements.

Includes: Experiential Learning Activity

Prerequisite(s): BMus or BA Music Honours students with third or fourth-year standing and minimum 9.0 CGPA.

MUSI 4906 [1.0 credit] Honours Portfolio in Composition

The course requires the composition of an original work of substantial proportions, with an accompanying analytical paper. Course content is planned with a Faculty Supervisor, and instruction is one-on-one.

Includes: Experiential Learning Activity Precludes additional credit for MUSI 4600.

Prerequisite(s): Fourth -year standing, MUSI 3602,

proposal, permission of the Program.

MUSI 4908 [1.0 credit] Honours Essay in Musicology

An Honours research essay of approximately 50 pages. Course content is planned with a Faculty Supervisor, and instruction is one-on-one.

Includes: Experiential Learning Activity

Prerequisite(s): Fourth-year standing, minimum 10.0 CGPA, proposal, and permission of the Program.

MUSI 4909 [1.0 credit] Portfolio in New Media

The course requires the creation of an original work (or works) of substantial proportions using applications in the electronic studios. A high level of independence and originality will be required. Course content is planned with a Faculty Supervisor, and instruction is one-on-one. Includes: Experiential Learning Activity Prerequisite(s): Fourth-year standing, proposal, and permission of the Program.

MUSI 4914 [0.0 credit]

Ensemble VII

A continuation of MUSI 3915. Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance and Practical Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the B.Mus.
program and permission of the Ensemble Director.
Ensemble work approximately two hours a week
throughout either the fall or winter term and participation in
concerts.

MUSI 4915 [0.0 credit] Ensemble VIII

A continuation of MUSI 4914. Participation in a vocal or instrumental ensemble, by arrangement with the Supervisor of Performance and Practical Studies. Graded Sat/Uns.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the B.Mus.
program and permission of the Ensemble Director.
Ensemble work approximately two hours a week
throughout either the fall or winter term participation in
concerts.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

1. 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;

2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or,
- 2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree. applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be Eligible to Continue (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the Academic Regulations of the University, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives

CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402 and ERTH 2403 only as free

electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

BIOL 4810 [0.5]	Education Research in Undergraduate Science
CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
CHEM 1004 [0.5]	Drugs and the Human Body
CHEM 1007 [0.5]	Chemistry of Art and Artifacts
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
ERTH 2415 [0.5]	Natural Disasters
ISCI 1001 [0.5]	Introduction to the Environment
ISCI 2000 [0.5]	Natural Laws
ISCI 2002 [0.5]	Human Impacts on the Environment
PHYS 1901 [0.5]	Planetary Astronomy
PHYS 1902 [0.5]	From our Star to the Cosmos
PHYS 1905 [0.5]	Physics Behind Everyday Life
PHYS 2903 [0.5]	Physics Towards the Future

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

all 0000-level courses

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the

demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- · B.Sc. (Honours)
- B.Sc. (Major)
- · B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry,

Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Neuroscience

This section presents the requirements for programs in:

- Neuroscience and Mental Health B.Sc. Honours
- Neuroscience and Mental Health B.Sc. Major
- · Neuroscience and Mental Health B.Sc.

- Neuroscience and Biology B.Sc. Combined Honours
- Minor in Neuroscience and Mental Health

Program Requirements

Course Categories for B.Sc. Programs

The program descriptions for B.Sc. Combined Honours Neuroscience make use of the course categories defined for all B.Sc. programs (see Academic Regulations for the Bachelor of Science Degree):

- · Science Faculty Electives
- Science Continuation Courses
- Free Electives

Neuroscience and Mental Health B.Sc. Honours (20.0 credits)

Minor in Neuroscience and Mental Health (4.0 credits)

The Minor in Neuroscience is available to students registered in degree programs other than those offered by the Department of Neuroscience or the Bachelor of Science in Nursing with Concentration in Neuroscience and Mental Health.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Neuroscience and Mental Health.

Requirements:

170	equirements.		
1.	2.0 credits in:		2.0
	NEUR 1202 [0.5]	Neuroscience of Mental Health and Psychiatric Disease	
	NEUR 1203 [0.5]	Neuroscience of Mental Health and Neurological Disease	
	NEUR 2201 [0.5]	Cellular and Molecular Neuroscience

NEUR 4302 [0.5]	Sex and the Brain
NEUR 4303 [0.5]	Indigenous Health & Mental Health
NEUR 4306 [0.5]	The Neural Basis of Addiction

4.0

Students enrolled in the Neuroscience and Mental Health programs should consult with the Department of Neuroscience when planning their program or selecting courses. Those enrolled in the Neuroscience Combined Honours program should consult with either the Department of Biology or the Department of Neuroscience.

B.Sc. Regulations

Total Credits

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or,
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds

described in Section 3.1.9 of the Academic Regulations of the University.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be Eligible to Continue (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the Academic Regulations of the University, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

The same of the same

PSYC 2002 [0.5]	Introduction to Statistics in Psychology
PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development
PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use

ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

•	
BIOL 4810 [0.5]	Education Research in Undergraduate Science
CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
CHEM 1004 [0.5]	Drugs and the Human Body
CHEM 1007 [0.5]	Chemistry of Art and Artifacts
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
ERTH 2415 [0.5]	Natural Disasters
ISCI 1001 [0.5]	Introduction to the Environment
ISCI 2000 [0.5]	Natural Laws
ISCI 2002 [0.5]	Human Impacts on the Environment
PHYS 1901 [0.5]	Planetary Astronomy

	MATH 1401 [0.5]	Elementary Mathematics for Economics I
	MATH 1402 [0.5]	Elementary Mathematics for Economics II

all 0000-level courses

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This

zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.Sc. Honours Neuroscience and Mental Health; B.Sc. Combined Honours Neuroscience and Biology: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- Registered as a full-time student in the B.Sc. Honours Neuroscience and Mental Health or B.Sc. Combined Honours Neuroscience and Biology program;
- 2. Successfully completed 5.0 or more credits;
- 3. Obtained an Overall CGPA of at least 6.50 and a Major CGPA of at least 8.00. These CGPAs must be maintained throughout the duration of the degree.

B.Sc. Honours Neuroscience and Mental Health and B.Sc. Combined Honours Neuroscience and Biology students must successfully complete three (3) work terms to obtain the Co-op Designation.

Work Term Course for Neuroscience and Mental Health: NEUR 3999

Work Term Course for Combined Honours Neuroscience and Biology: NEUR 3999, BIOL 3999

Summer		Summer	W	Summer	W	Summer	W		

Legend S: Study W: Work

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow

the recommendations will not be disadvantaged in the admission process.

Degrees

- · B.Sc. (Honours)
- · B.Sc. (Major)
- · B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally

be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Science Honours program;
- be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Neuroscience (NEUR) Courses

NEUR 1202 [0.5 credit]

Neuroscience of Mental Health and Psychiatric Disease

Clinical symptoms of psychiatric disease, including biological, developmental, experiential and environmental factors that contribute to disease. Topics may include depressive and anxiety disorders, schizophrenia, autism, ADHD, anorexia, narcolepsy, and substance use disorders.

Precludes additional credit for NEUR 1201 (no longer offered).

Lecture three hours a week.

NEUR 1203 [0.5 credit]

Neuroscience of Mental Health and Neurological Disease

Clinical symptoms of neurological disease, including biological, developmental, experiential and environmental factors that contribute to disease. Topics may include stroke, multiple sclerosis, migraine, seizure disorder, Parkinson's disease, ALS, chronic pain, Alzheimer's disease and concussion.

Lectures three hours a week.

NEUR 2001 [0.5 credit]

Introduction to Research Methods in Neuroscience

A general introduction to research process within neuroscience. Topics covered include research strategies, methods, and techniques; basic descriptive statistics; research communication; and responsible scientific conduct.

Precludes additional credit for PSYC 2000 and PSYC 2001.

Prerequisite(s): second-year standing. Lecture three hours a week.

NEUR 2002 [0.5 credit]

Introduction to Statistics in Neuroscience

A general introduction to statistical techniques employed within contemporary neuroscience. Topics covered include basic data analysis using descriptive and inferential statistics (t-tests, ANOVA, correlation, chi-square). Precludes additional credit for ENST 2006, GEOG 2006, PSYC 2002.

Prerequisite(s): PSYC 2001 or NEUR 2001. Lectures three hours a week, online labs/tutorials.

NEUR 2003 [0.5 credit]

Introduction to Techniques in Neuroscience

Introduction to common techniques used in neuroscience research. Brain imaging, animal behaviour, electrophysiology, immunohistochemistry and microscopy, genomics, transgenics, cell culture, and DSM-IV-based clinical assessment.

Prerequisite(s): one of PSYC 1001, NEUR 1201, NEUR 1202 or NEUR 1203.
Lectures three hours a week.

NEUR 2004 [0.5 credit]

Fundamentals of Scientific Writing in Neuroscience

Introduction to various forms of scientific writing appropriate to neuroscience, with a focus in fundamental skills in scientific writing.

Includes: Experiential Learning Activity
Prerequisite(s): second-year standing in a Neuroscience
program and one of NEUR 1201, NEUR 1202 or
NEUR 1203.

Lectures and workshops three hours a week.

NEUR 2201 [0.5 credit]

Cellular and Molecular Neuroscience

Core principles in cellular and molecular neuroscience, including signal transmission along and between neurons, ion channels and transporters, intracellular signaling pathways, and regulation of gene expression. Precludes additional credit for PSYC 3200 (no longer offered) and NEUR 3200 (no longer offered). Prerequisite(s): Either NEUR 1201 and NEUR 1203, or NEUR 1202 and NEUR 1203, or both BIOL 1103 and BIOL 1104.

Lectures three hours a week, online labs.

NEUR 2202 [0.5 credit]

Neurodevelopment and Plasticity

Core principles in nervous system development from embryogenesis to plasticity in the adult brain. Topics include neural induction, neurogenesis, apoptosis, neuronal migration and axon growth, synaptogenesis and synaptic pruning both under normal conditions and in psychopathology.

Precludes additional credit for PSYC 3200 (no longer offered) and NEUR 3200 (no longer offered). Prerequisite(s): NEUR 2201.

Lectures three hours a week, online labs.

NEUR 2801 [0.5 credit]

Neuroscience and Creativity

Abnormal brain function associated with mental illness or substance abuse has been commonly depicted in or been the inspiration for important cultural works including movies, music, paintings and literature. The neurobiological basis of creativity in individuals with and without mental illness.

Prerequisite(s): one of PSYC 1001, NEUR 1201, NEUR 1202 or NEUR 1203.

Lectures and seminars three hours a week.

NEUR 3001 [0.5 credit]

Data Analysis in Neuroscience I

Introducing various software for analyzing neuroscience data. Dealing with real data, drawing graphs, application of descriptive and inferential statistics through the general linear model, assumptions of parametric tests, robust statistics, confidence intervals, correlations, use of appropriate statistical methods and interpretation of results.

Includes: Experiential Learning Activity
Prerequisite(s): PSYC 2001 and PSYC 2002, or
NEUR 2001 and NEUR 2002.

Lectures three hours a week, online labs/workshops.

NEUR 3002 [0.5 credit]

Data Analysis in Neuroscience II

Use of software for analyzing neuroscience data. Statistical techniques typically include nonparametric tests, t tests, and various forms of both ANOVA and regression including robust statistical tests, with a focus on the practical application of appropriate statistical methods and interpretation of results.

Includes: Experiential Learning Activity Prerequisite(s): NEUR 3001.

Lectures three hours a week, online labs/workshops.

NEUR 3003 [0.5 credit]

Epidemiology in Neuroscience

Introduction to the principles and methods of epidemiology, study designs, measures of effect, sources of error, confounding, bias, internal and external validity, and causality. The course also will provide an overview of the epidemiological features, and risk factors for common neurological disorders.

Precludes additional credit for HLTH 3201.

Prerequisite(s): NEUR 2002. Lectures three hours a week.

NEUR 3203 [0.5 credit]

Field Course in Animal Behaviour

Offered in the Department of Biology as BIOL 3605. Only those modules dealing with animal behaviour topics may be offered for Neuroscience credit.

Includes: Experiential Learning Activity

Also listed as BIOL 3605.

Precludes additional credit for PSYC 3203. Prerequisite(s): permission of the department.

NEUR 3204 [0.5 credit] Neuropharmacology

Overview of chemical neurotransmission and key neurotransmitter systems. A description of licit and illicit drugs covering topics that range from historical perspectives to pharmacology to mechanisms of action in the brain. Discussion of neurochemical basis of psychiatric diseases including anxiety, depression and schizophrenia. Precludes additional credit for PSYC 3204 (no longer offered).

Prerequisite(s): NEUR 2200 or NEUR 2201. Lectures and seminars three hours a week.

NEUR 3206 [0.5 credit] Sensory and Motor Neuroscience

Exploration of major topics in sensory processing and motor control, with a focus on underlying mechanisms and neurobiological principles. Topics include all sensory systems (such as vision, somatosensation and audition) plus motor system components including lower and upper motor neurons, basal ganglia, and cerebellum.

Includes: Experiential Learning Activity

Precludes additional credit for PSYC 3200 (no longer offered), NEUR 3200 (no longer offered), PSYC 3202 (no longer offered) and NEUR 3202 (no longer offered).

Prerequisite(s): NEUR 1201 or both NEUR 1202 and NEUR 1203, and either NEUR 2200 or both NEUR 2201 and NEUR 2202.

Lectures three hours a week, laboratory four hours a week.

NEUR 3207 [0.5 credit] Systems Neuroscience

Neural systems underlying complex behaviours including emotion, motivation, and sleep, and the role of association cortices in brain function.

Includes: Experiential Learning Activity

Precludes additional credit for NEUR 3200 (no longer offered) and PSYC 3200 (no longer offered).

Prerequisite(s): NEUR 3206.

Lectures three hours a week, laboratory four hours a week.

NEUR 3301 [0.5 credit] Genetics of Mental Health

Most common mental health diseases have a genetic component. By focusing on specific diseases, this course will discuss how disease susceptibility genes are identified, and describe the genetic, genomic and epigenetic mechanisms through which DNA alterations can predispose to disease.

Prerequisite(s): BIOL 2104 or BIOL 2107, and NEUR 2200 or NEUR 2201.

Lectures three hours a week.

NEUR 3303 [0.5 credit]

The Neuroscience of Consciousness

Consciousness remains one of the least understood aspects of the nervous system. This course explores neural mechanisms underlying consciousness, changes in consciousness associated with sleep, coma, vegetative states, drugs, and other stimuli, and considers the evolutionary basis of consciousness, and its relationship with awareness.

Prerequisite(s): NEUR 2200 or NEUR 2202.

Lectures three hours a week.

NEUR 3304 [0.5 credit] Hormones and Behaviour

The effects of hormones throughout life at all levels of the nervous system. The role of hormones in mediating behaviours that are both basic (feeding, reproduction and social interactions) and complex (motivation, emotion, learning and memory).

Prerequisite(s): NEUR 2200 or both NEUR 2201 and NEUR 2202.

Lectures three hours a week.

NEUR 3401 [0.5 credit]

Environmental Toxins and Mental Health

Exposure to environmental toxins from the air, water or food can interfere with neuronal function, alter neurodevelopment, and damage the brain. This course will explore associations between toxins and diseases such as Parkinson's disease, multiple sclerosis and depression, focusing on mechanisms underlying development of pathology.

Prerequisite(s): NEUR 2200 or both NEUR 2201 and NEUR 2202.

Lectures three hours a week.

NEUR 3402 [0.5 credit]

Impact of Lifestyle and Social Interactions on Mental Health

Healthy lifestyle choices and positive social interactions can reduce the incidence of pathological conditions such as depression, obesity, cardiovascular disease and impaired immunity. This course focuses on psychosocial and neurobiological mechanisms that underlie the relationship between lifestyle, social interactions and health.

Prerequisite(s): NEUR 2200 or both NEUR 2201 and NEUR 2202.

Lectures three hours a week.

NEUR 3403 [0.5 credit] Stress and Mental Health

Stressful events can have profound repercussions on physical and psychological well-being. This course examines the psychosocial and biological processes by which stressors predispose to both physical (immune-related disorders, diabetes, heart disease) and psychological (acute stress disorder, posttraumatic stress disorder, depression, anxiety) pathologies. Prerequisite(s): NEUR 2200 or both NEUR 2201 and

NEUR 2202.

Lectures three hours a week.

NEUR 3501 [0.5 credit] Neurodegeneration and Aging

Perspectives on aging and neurodegeneration from psychosocial and neuroscience points of view. How factors including TBI, stroke and alcohol make the brain vulnerable and contribute to neurodegeneration. Clinical overview of Alzheimer's, Parkinson's, Huntington's and ALS and the underlying pathology that differentiates these diseases.

Prerequisite(s): NEUR 2200 or both NEUR 2201 and NEUR 2202.

Lectures three hours a week.

NEUR 3502 [0.5 credit]

Neurodevelopmental Determinants of Mental Health

Development of the human brain, the generation and differentiation of the various cell types, and the formation of the vast network of neural connections. How neurodevelopmental dysregulation can result in pathologies including dyslexia, ADHD, schizophrenia and autism.

Prerequisite(s): NEUR 2200, or both NEUR 2201 and NEUR 2202.

Lectures three hours a week.

NEUR 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

NEUR 4001 [0.5 credit] Special Topics in Neuroscience

Each section of NEUR 4001 deals with a different topic. Topics change yearly. Students may register in more than one section of NEUR 4001 but can register in each section only once.

Prerequisite(s): NEUR 3200, or NEUR 3204 and NEUR 3206 and NEUR 3207, or permission of the Department.

Lectures three hours a week.

NEUR 4002 [0.5 credit]

Systematic Reviews and Meta-Analyses

Introduction to the methods used in conducting systematic reviews and meta-analyses. Topics include: conducting literature searches, extracting relevant literature, assessing quality of studies, synthesizing findings across studies, and the statistical methods used to carry out a meta-analysis.

Includes: Experiential Learning Activity
Precludes additional credit for NEUR 4904.
Prerequisite(s): NEUR 3003 or both NEUR 3001 and
NEUR 3002.

Also offered at the graduate level, with different requirements, as NEUR 5203, for which additional credit is precluded.

Lecture three hours a week.

NEUR 4003 [0.5 credit] Knowledge Mobilization

Knowledge mobilization concepts, tools, and frameworks, the challenges and value of translational research, and processes involved in integrated knowledge mobilization. Skills to maximize research impacts will be developed. Includes: Experiential Learning Activity Prerequisite(s): fourth year standing in a Neuroscience program OR permission of the department. Also offered at the graduate level, with different requirements, as NEUR 5801, for which additional credit is precluded.

Includes: Experiential Learning Activity

NEUR 4200 [0.5 credit]

Seminar on Current Advances in Neuroscience

Headline research in neuroscience. Topics may include technical and conceptual advances, ethical issues, medical improvement, and social impacts of neuroscience research.

Precludes additional credit for PSYC 4200 (no longer offered).

Prerequisite(s): fourth year standing and one of NEUR 3200, NEUR 3206 or NEUR 3207.

Seminar three hours a week.

NEUR 4202 [0.5 credit]

Seminar on Current Research in Neuroscience and Psychiatric Disease

Recent research in clinical neuroscience including biological, developmental, experiential and environmental factors that contribute to disease. Topics may include depressive disorders, schizophrenia, autism, ADHD, anorexia, narcolepsy, substance abuse, and personality disorders.

Prerequisite(s): fourth year standing and one of NEUR 3200, NEUR 3206 or NEUR 3207.

Seminar three hours a week.

NEUR 4203 [0.5 credit]

Seminar on Current Research in Neuroscience and Clinical Neurology

Recent research in neurological disease, including biological, developmental, experiential and environmental factors that contribute to disease. Topics may include stroke, multiple sclerosis, migraine, seizure disorder, Parkinson's disease, ALS, chronic pain, Alzheimer's disease and concussion.

Prerequisite(s): fourth year standing and one of NEUR 3200, NEUR 3206 or NEUR 3207.

Seminars three hours a week.

NEUR 4301 [0.5 credit]

Neurobiology of Energy Homeostasis

Focus on neuroanatomical and molecular mechanisms underlying how mammals adapt to changes and challenges in the environment. Topics include regulation of feeding, energy expenditure, water balance, and temperature regulation.

Prerequisite(s): NEUR 3304. Lectures three hours a week.

NEUR 4302 [0.5 credit]

Sex and the Brain

Neurobiological processes behind reproductive behaviours in various animal species including humans. Evaluation of data concerning neurobiological differences between sexes, biological determinants of sexual orientation, and relating to neurobiology of sex disorders. Precludes additional credit for NEUR 3302 (no longer offered).

Prerequisite(s): NEUR 3304. Lectures three hours a week

NEUR 4303 [0.5 credit]

Indigenous Health & Mental Health

The physical and mental health issues of Indigenous people in the context of the cultural, environmental, developmental and biological factors that contribute to comorbid conditions and greater risk and resilience. Prerequisite(s): 3rd year standing or above.

Lectures three hours a week.

NEUR 4305 [0.5 credit]

Immune-Brain Interactions

Communication between the brain and the immune system; messengers mediating the interaction. How disturbances of immune-brain signaling can lead to disease (multiple sclerosis, Parkinson's) and to changes in mood and cognition.

Precludes additional credit for NEUR 3305 (no longer offered).

Prerequisite(s): NEUR 3200 or NEUR 3207.

Lectures three hours a week.

NEUR 4306 [0.5 credit]

The Neural Basis of Addiction

How substance and behavioural addictions impact neural function to ultimately lead to the neuropathology of addiction in vulnerable populations. Contemporary neurobiological theories of addiction will also be addressed.

Precludes additional credit for NEUR 3306. Prerequisite(s): NEUR 3204. Lecture three hours a week.

NEUR 4600 [0.5 credit] Advanced Lab in Neuroanatomy

Advanced experiential learning in neuroanatomy, histology and microscopy.

Includes: Experiential Learning Activity

Prerequisite(s): NEUR 3200 or both NEUR 3206 and NEUR 3207, fourth-year standing in a Neuroscience program, a minimum Major CGPA of 9.0 and permission of the Department.

Laboratory/tutorials four hours per week.

NEUR 4801 [0.5 credit] Neuroethics

Ethical issues of key importance to current neurobiological research. Topics may include the use of animals in research, stem cell research, genetic diagnosis and gene therapy, neuroimaging, and the effect on identity and autonomy of manipulations such as psychopharmaceuticals and psychosurgery.

Prerequisite(s): NEUR 3200 or both NEUR 3206 and NEUR 3207

Lectures and seminars three hours a week.

NEUR 4900 [0.5 credit] Independent Study

A reading or research course for selected students who wish to investigate a particular topic of interest. Normally students may not offer more than one credit of independent study in their total program. Includes: Experiential Learning Activity Prerequisite(s): third- or fourth- year standing and permission of the Department.

NEUR 4904 [1.0 credit]

Honours Research Thesis in Systematic Reviews or Meta-Analyses

An independent systematic review or meta-analyses undertaken under the direct supervision of a faculty advisor typically from the Department of Neuroscience. Includes: Experiential Learning Activity Precludes additional credit for NEUR 4002, NEUR 4905, NEUR 4906, NEUR 4907, NEUR 4908, NEUR 5203. Prerequisite(s): NEUR 3003 or both NEUR 3001 and NEUR 3002 and fourth-year standing in an Honours Neuroscience program, a minimum Major CGPA of 9.0 and permission of the Department. Colloquia three hours a week.

NEUR 4905 [1.0 credit] Honours Workshop

The course will focus on active learning in areas that include written and oral communication, evaluation and interpretation of results, statistics and data management, emphasizing transferable skills that will be most appropriate for non-research career paths.

Includes: Experiential Learning Activity

Precludes additional credit for NEUR 4906, NEUR 4907 and NEUR 4908.

Prerequisite(s): fourth-year standing in an Honours Neuroscience program and permission of the Department. Lectures and seminars three hours a week, and colloquia three hours a week.

NEUR 4906 [1.0 credit]

Translational Approach to Indigenous Community Wellness

This course involves co-developing an Indigenous community-led process or product that addresses a current and specific mental health issue. Involves working in interdisciplinary groups with a community partner. Includes: Experiential Learning Activity
Also listed as ENSC 4909, ISAP 4909, MPAD 4906.
Precludes additional credit for ENSC 4906, ISAP 4906, ISAP 4907, ISAP 4908, NEUR 4905, NEUR 4907, NEUR 4908.

Prerequisite(s): Fourth-year standing with a minimum Major CGPA of 10.0 and a grade of A- or higher in one of NEUR 3401, NEUR 3402 or NEUR 3403 and permission of instructor. Prior completion of NEUR 4303 recommended.

Seminars or workshops three hours a week. A field trip to the partner community is typically required.

NEUR 4907 [1.0 credit]

Honours Essay and Research Proposal

An independent essay based critical review and research proposal on a topic in neuroscience, using library resources, under the direct supervision of a Faculty advisor. Evaluation is based on a written report. Includes: Experiential Learning Activity Precludes additional credit for NEUR 4905, NEUR 4906 and NEUR 4908.

Prerequisite(s): NEUR 3200, or both NEUR 3206 and NEUR 3207, and fourth-year standing in an Honours Neuroscience program, a minimum Major CGPA of 9.0 and permission of the Department. Colloquia three hours a week.

NEUR 4908 [1.0 credit] Honours Research Thesis

An independent research project undertaken under the direct supervision of a faculty advisor typically from the Department of Neuroscience. Evaluation is based on a written report and poster.

Includes: Experiential Learning Activity

Precludes additional credit for NEUR 4905, NEUR 4906 and NEUR 4907.

Prerequisite(s): NEUR 3200, or both NEUR 3206 and NEUR 3207, and fourth-year standing in an Honours Neuroscience program, a minimum Major CGPA of 10.0 and permission of the Department.

Colloquia three hours a week.

Open Studies

This section presents the requirements for programs in:

- Open Studies Program Requirements B.A.
- · Open Studies Program Requirements B.Sc.

Open Studies Program Requirements B.A. (15.0 credits)

Enrolment in the B.A. Open Studies program is restricted. Please consult with an academic advisor for more information.

6.0 credits from disciplines in the Faculty of Arts and Social Sciences or the Faculty of Public Affairs

2. 9.0 credits in free electives 9.0 Total Credits 15.0

Notes:

- Students must complete 2.0 credits at the 3000 level or above;
- 2. Subject to individual program restrictions, students may be eligible to declare a Minor.

In addition to the requirements presented here, students must satisfy the Bachelor of Arts regulations, including the Breadth Requirement, and University regulations common to all undergraduate students, including the Minimum Number of Carleton Credits (Residency and Advanced credits), the Maximum Number of Credits Below the 2000-level, and the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

Open Studies Program Requirements B.Sc. (15.0 credits)

Enrolment in the B.Sc. Open Studies programs is restricted. Please consult with an academic advisor for more information.

1. 6.0 credits from disciplines in the Faculty of Science or 6.0 the Faculty of Engineering and Design

2. 9.0 credits in free electives 9.0

Total Credits 15.0

Notes:

- Students must complete 2.0 credits at the 3000 level or above:
- Subject to individual program restrictions, students may be eligible to declare a Minor.

In addition to the requirements presented here, students must satisfy the Bachelor of Science regulations, including the Breadth and Experimental Science Requirements, and University regulations common to all undergraduate students, including the Minimum Number of Carleton Credits (Residency and Advanced credits), the Maximum Number of Credits Below the 2000-level, and the process of Academic Continuation Evaluation (consult the Academic Regulations of the University section of this Calendar).

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

6.0

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK,

HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI. PORT. RUSS. SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described

in Section 3.1.9 of the Academic Regulations of the University.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits: or.
- 2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

_	pproved Experimen	ital ocience oodises
	Biochemistry	
	BIOC 2200 [0.5]	Cellular Biochemistry
	BIOC 4001 [0.5]	Methods in Biochemistry
	BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering
	Biology	
	BIOL 1103 [0.5]	Foundations of Biology I
	BIOL 1104 [0.5]	Foundations of Biology II
	BIOL 2001 [0.5]	Animals: Form and Function
	BIOL 2002 [0.5]	Plants: Form and Function
	BIOL 2104 [0.5]	Introductory Genetics
	BIOL 2200 [0.5]	Cellular Biochemistry
	BIOL 2600 [0.5]	Ecology
	Chemistry	
	CHEM 1001 [0.5]	General Chemistry I
	CHEM 1002 [0.5]	General Chemistry II
	CHEM 2103 [0.5]	Physical Chemistry I
	CHEM 2203 [0.5]	Organic Chemistry I
	CHEM 2204 [0.5]	Organic Chemistry II
	CHEM 2302 [0.5]	Analytical Chemistry I
	CHEM 2303 [0.5]	Analytical Chemistry II
	CHEM 2800 [0.5]	Foundations for Environmental Chemistry
	Earth Sciences	
	ERTH 1002 [0.5]	The Earth and Life Odyssey: A Journey Through Billions of Years
	ERTH 2102 [0.5]	Mineralogy to Petrology
	ERTH 2404 [0.5]	Engineering Geoscience
	ERTH 2802 [0.5]	Field Geology I
	ERTH 3111 [0.5]	Vertebrate Evolution: Mammals, Reptiles, and Birds
	ERTH 3112 [0.5]	Vertebrate Evolution: Fish and Amphibians
	ERTH 3204 [0.5]	Mineral Deposits
	ERTH 3205 [0.5]	Physical Hydrogeology
	Food Sciences	
	FOOD 3001 [0.5]	Food Chemistry
	FOOD 3002 [0.5]	Food Analysis
	FOOD 3005 [0.5]	Food Microbiology
	Geography	

GEOG 1010 [0.5]	Global Environmental Systems
GEOG 3108 [0.5]	Soil Properties
Neuroscience	
NEUR 3206 [0.5]	Sensory and Motor Neuroscience
NEUR 3207 [0.5]	Systems Neuroscience
NEUR 4600 [0.5]	Advanced Lab in Neuroanatomy
Physics	
PHYS 1001 [0.5]	Foundations of Physics I
PHYS 1002 [0.5]	Foundations of Physics II
PHYS 1003 [0.5]	Introductory Mechanics and Thermodynamics
PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II
PHYS 2202 [0.5]	Wave Motion and Optics
PHYS 2604 [0.5]	Modern Physics I
PHYS 3007 [0.5]	Third Year Physics Laboratory: Selected Experiments and Seminars
PHYS 3606 [0.5]	Modern Physics II
PHYS 3608 [0.5]	Modern Applied Physics

Course Categories for B.Sc. Programs

Science Geography Courses

GEOG 1010 [0.5]	Global Environmental Systems
GEOG 2006 [0.5]	Introduction to Quantitative Research
GEOG 2013 [0.5]	Weather and Water
GEOG 2014 [0.5]	The Earth's Surface
GEOG 3003 [0.5]	Quantitative Geography
GEOG 3010 [0.5]	Field Methods in Physical Geography
GEOG 3102 [0.5]	Geomorphology
GEOG 3103 [0.5]	Watershed Hydrology
GEOG 3104 [0.5]	Principles of Biogeography
GEOG 3105 [0.5]	Climate and Atmospheric Change
GEOG 3106 [0.5]	Aquatic Science and Management
GEOG 3108 [0.5]	Soil Properties
GEOG 4000 [0.5]	Field Studies
GEOG 4005 [0.5]	Directed Studies in Geography
GEOG 4013 [0.5]	Cold Region Hydrology
GEOG 4017 [0.5]	Global Biogeochemical Cycles
GEOG 4101 [0.5]	Two Million Years of Environmental Change
GEOG 4103 [0.5]	Water Resources Engineering
GEOG 4104 [0.5]	Microclimatology
GEOG 4108 [0.5]	Permafrost

Science Psychology Courses

PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
PSYC 2002 [0.5]	Introduction to Statistics in Psychology
PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development

PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuronsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives CHEM (Chemistry) except CHEM 1003, CHEM 1004

and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use

ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

_	
BIOL 4810 [0.5]	Education Research in Undergraduate Science
CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
CHEM 1004 [0.5]	Drugs and the Human Body
CHEM 1007 [0.5]	Chemistry of Art and Artifacts
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
ERTH 2415 [0.5]	Natural Disasters
ISCI 1001 [0.5]	Introduction to the Environment
ISCI 2000 [0.5]	Natural Laws
ISCI 2002 [0.5]	Human Impacts on the Environment
PHYS 1901 [0.5]	Planetary Astronomy
PHYS 1902 [0.5]	From our Star to the Cosmos
PHYS 1905 [0.5]	Physics Behind Everyday Life
PHYS 2903 [0.5]	Physics Towards the Future

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

υ.	oc. program.	
	COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
	MATH 1009 [0.5]	Mathematics for Business
	MATH 1119 [0.5]	Linear Algebra: with Applications to Business
	MATH 1401 [0.5]	Elementary Mathematics for

MATH 1402 [0.5] Elementary Mathematics for Economics II

all 0000-level courses

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may

use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System.

Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. Degrees

- · B.Sc. (Honours)
- · B.Sc. (Major)
- · B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are

described in the Co-operative Education Regulations section of this Calendar.

Philosophy

This section presents the requirements for programs in:

- · Philosophy B.A. Honours
- Philosophy with Concentration in Philosophy, Ethics and Public Affairs B.A. Honours
- · Philosophy B.A. Combined Honours
- · Philosophy B.A.
- Minor in Philosophy
- · Mention : Français

Program Requirements

Course Categories for Philosophy

For purposes of program description the Philosophy courses are classified as follows:

History of Philosophy

PHIL 2005 [1.0]	Ancient Philosophy: The Search for Wisdom
PHIL 2101 [0.5]	History of Ethics
PHIL 2201 [0.5]	Introduction to Marxist Philosophy
PHIL 2202 [0.5]	Topics in Marxist Philosophy
PHIL 2700 [0.5]	Asian Philosophy
PHIL 3000 [0.5]	Topics in Ancient Philosophy
PHIL 3001 [0.5]	Early Greek Philosophy
PHIL 3002 [0.5]	17th Century Philosophy
PHIL 3003 [0.5]	18th Century Philosophy
PHIL 3005 [0.5]	19th Century Philosophy
PHIL 3009 [0.5]	Topics in European Philosophy
PHIL 3010 [0.5]	Special Topics in Global Philosophical Traditions
PHIL 3104 [0.5]	The Roots of Analytic Philosophy
PHIL 3330 [0.5]	Topics in History of Social and Political Philosophy

Ethics, Society, and Aesthetics (ESA)

PHIL 2020 [0.5]	Issues in Practical Philosophy
PHIL 2101 [0.5]	History of Ethics
PHIL 2103 [0.5]	Philosophy of Human Rights
PHIL 2106 [0.5]	Information Ethics
PHIL 2120 [0.5]	Philosophy of Technology
PHIL 2201 [0.5]	Introduction to Marxist Philosophy
PHIL 2306 [0.5]	Philosophy and Feminism
PHIL 2307 [0.5]	Gender and Philosophy
PHIL 2320 [0.5]	Children, Literature, and Philosophy
PHIL 2330 [0.5]	Happiness, Well-being, and the Good Life
PHIL 2340 [0.5]	Philosophy and Popular Culture
PHIL 2380 [0.5]	Introduction to Environmental Ethics
PHIL 2401 [0.5]	Ethics of Artificial Intelligence
PHIL 2408 [0.5]	Bioethics
PHIL 2601 [0.5]	Philosophy of Religion
PHIL 2807 [0.5]	Philosophy of Art
PHIL 2901 [0.5]	Truth and Propaganda

Special Topics in Global Philosophical Traditions
Philosophy of Law: The Logic of Law
Contemporary Ethical Theory
Topics in History of Social and Political Philosophy
Topics in Contemporary Social and Political Philosophy
Philosophy, Ethics, and Public Affairs
Philosophy, Economics, and Public Policy
Environments, Technology and Values
Topics in Aesthetics
Philosophy of Emotions
and World (LMW)
Issues in Theoretical Philosophy
Philosophy of Technology
Introduction to the Philosophy of Science
Children, Literature, and Philosophy
Philosophy and Popular Culture
Philosophy of the Paranormal
Introduction to Philosophy of Mind
Language and Communication
Introduction to Philosophical Logic
Personal Identity and the Self
Moral Psychology
Philosophy of Religion
Truth and Propaganda
19th Century Philosophy
Special Topics in Global Philosophical Traditions
The Roots of Analytic Philosophy
Epistemology
Metaphysics

Philosophy Courses Open to First-Year Students

PHIL 3301 [0.5] PHIL 3306 [0.5]

PHIL 3501 [0.5]

PHIL 3502 [0.5]

PHIL 3503 [0.5]

PHIL 3504 [0.5]

PHIL 3506 [0.5]

PHIL 3530 [0.5]

PHIL 3540 [0.5]

Please note that not all of these courses are offered each year.

Symbolic Logic

Mind and Action

and Ethical Issues

Philosophy of Language

Philosophy of Emotions

Pragmatics

Semantics

•	
PHIL 1000 [0.5]	Introductory Philosophy: Fields, Figures and Problems
PHIL 1100 [1.0]	Looking at Philosophy
PHIL 1200 [0.5]	The Meaning of Life

Issues in the Philosophy of Science

Philosophy of Cognitive Science

Artificial Intelligence: Philosophical

PHIL 1301 [0.5]	Mind, World, and Knowledge
PHIL 1500 [1.0]	Contemporary Moral, Social and Religious Issues
PHIL 1550 [0.5]	Introduction to Ethics and Social Issues
PHIL 1610 [0.5]	Great Philosophical Ideas, Part 1
PHIL 1620 [0.5]	Great Philosophical Ideas, Part 2
PHIL 1700 [0.5]	Philosophy of Love and Sex
PHIL 2001 [0.5]	Introduction to Logic
PHIL 2003 [0.5]	Critical Thinking
PHIL 2330 [0.5]	Happiness, Well-being, and the Good Life
PHIL 2340 [0.5]	Philosophy and Popular Culture

Mention : Français (4.0 credits)

Students in the Philosophy B.A. or the Philosophy B.A. Honours program may qualify for the notation *Mention*: Français by fulfiling the requirements outlined below. Those wishing to pursue this option should consult with the Department's Undergraduate Supervisor, whose approval is required for all courses under *Mention*: Français.

Philosophy courses presented in fulfilment of *Mention:* Français requirements can double as courses to satisfy the Philosophy B.A. or the Philosophy B.A. Honours requirements.

To graduate with the notation *Mention : Français*, Philosophy students must include in their program the following:

1. 1.0 credit in French language chosen in consultation with the French Department to perfect the student's French language skills.

1.0 credit taught in French at Carleton and concerned with the study of the heritage and culture of French Canada

,	3. 1.0 credit from:		1.	0
	PHIL 3901 [0.5]	Independent Study		
	PHIL 3902 [0.5]	Independent Study

PHIL 4906 [0.5]	Tutorial	

in French, supervised by a member of the Department of Philosophy, or earned in a Philosophy seminar or seminars at the 4000-level taught in French at another university and acceptable to the Philosophy Department. Students must, in addition, satisfy the Honours requirement of 2.0 Carleton credits at the 4000-or 5000-level in Philosophy (1.0 for Combined Honours).

5. Combined Honours students must meet the Mention : Francais requirements of both Honours disciplines.

Total Credits

40

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

1.0

1.0

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- Environmental Studies
- Human Rights
- Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System.

Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required.

Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Philosophy (PHIL) Courses

PHIL 1000 [0.5 credit]

Introductory Philosophy: Fields, Figures and Problems

What is metaphysics? Who was Socrates? What is Freedom? This introduction sketches many branches of philosophy and the important problems associated with each. It introduces great philosophers, present and past, and traces enduring philosophical themes.

Precludes additional credit for FYSM 1208 (no longer offered), FYSM 1211, PHIL 1100. This course is not suitable for students with previous formal study of philosophy.

PHIL 1100 [1.0 credit] Looking at Philosophy

Introduction to philosophy: the nature of logical thinking; the existence of God; the objectivity of values; the meaning of life; free will, determinism and responsibility; the relation between mind and body; immortality; the possibility of knowledge. This course is not intended for Majors.

Precludes additional credit for FYSM 1208 (no longer offered), FYSM 1211 and PHIL 1000. Lectures three hours a week.

PHIL 1200 [0.5 credit] The Meaning of Life

An introduction to concerns expressed by the perennial philosophical question, "What is the meaning of life?" Students will be familiarized with the major philosophical approaches to life's meaning through a consideration of various contemporary and late modern works in the philosophy of life.

Lectures three hours a week.

PHIL 1301 [0.5 credit] Mind, World, and Knowledge

Introduction to a variety of philosophical works, including contemporary, on such topics as: the nature of being, the mental, the external, consciousness, perception, experience, meaning, truth, the nature of knowledge, scientific understanding, and how language and thought represent the world.

Precludes additional credit for PHIL 1006 (no longer offered), PHIL 1501 (no longer offered). Lectures three hours per week.

PHIL 1500 [1.0 credit]

Contemporary Moral, Social and Religious Issues

Moral theories, atheism or theism, feminism, and free will. Moral arguments concerning abortion, affirmative action, racism, human rights, children's rights, world hunger, capital punishment, euthanasia, censorship, pornography, legal paternalism, animal rights and environmental protection.

Precludes additional credit for FYSM 1209 and PHIL 1550.

Lectures three hours a week.

PHIL 1550 [0.5 credit] Introduction to Ethics and Social Issues

An introduction to understanding, assessing, and formulating ethical arguments concerning controversial issues. Particular issues studied may include, world hunger, capital punishment, terrorism, euthanasia, abortion, pornography and hate speech, animal rights, the environment, and topics in theories of race, gender and disability.

Precludes additional credit for FYSM 1212 and PHIL 1500.

Lectures three hours a week.

PHIL 1610 [0.5 credit] Great Philosophical Ideas, Part 1

Major figures and developments in philosophy from the early Greeks to the year 1400. Descriptive and comparative approach, providing an understanding of the place of philosophers in the history of thought. Appreciation of critical reasoning is included for comprehending philosophical developments. Precludes additional credit for FYSM 1300, PHIL 1600. Lectures three hours a week.

PHIL 1620 [0.5 credit] Great Philosophical Ideas, Part 2

Major figures and developments in philosophy after the year 1400. Descriptive and comparative approach, providing an understanding of the place of philosophers in the history of thought. Appreciation of critical reasoning is included for comprehending philosophical developments. Precludes additional credit for FYSM 1300, PHIL 1600. Lectures three hours a week.

PHIL 1700 [0.5 credit] Philosophy of Love and Sex

A survey of philosophical classics, on themes of romantic love, self-love, altruistic love, sexuality, eroticism and the passion/reason dichotomy, from Plato's Symposium to Foucault's History of Sexuality; and an examination of related contemporary issues in light of these perspectives. Lectures three hours a week.

PHIL 2001 [0.5 credit] Introduction to Logic

An introduction to the techniques and philosophical implications of formal logic with emphasis on translation of expressions into symbolic form, testing for logical correctness, the formulation and application of rules of inference, and the relation between logic and language. Open to first-year students.

Lectures three hours a week. Tutorials may be offered in selected terms.

PHIL 2003 [0.5 credit] Critical Thinking

Assessment of reasoning and the development of cogent patterns of thinking. Reference to formal logic is minimal. Practice in criticizing examples of reasoning and in formulating one's own reasons correctly and clearly. Open to first-year students.

Lectures three hours a week.

PHIL 2005 [1.0 credit]

Ancient Philosophy: The Search for Wisdom

An exploration of ancient philosophy as a search for wisdom and happiness from its Presocratic beginnings in Greece to its development in the Hellenistic world and Imperial Rome. Emphasis on philosophy as a contemplative activity and as a way of life. Also listed as CLCV 2105.

Precludes additional credit for PHIL 2006, CLCV 2006, PHIL 2007, CLCV 2007 (no longer offered). Prerequisite(s): 0.5 credit in PHIL, or second-year standing.

Lectures three hours a week.

PHIL 2010 [0.5 credit] Issues in Theoretical Philosophy

Issues drawn from epistemology, metaphysics, philosophy of mind, philosophy of language, and related fields will be examined through careful study of significant philosophical texts after 1900, along with some ensuing debates. Prerequisite(s): enrolment in Honours or Combined Honours Philosophy programs, or in philosophy, Ethics, and Public Affairs, or permission of the Department. Lectures and discussion three hours a week.

PHIL 2020 [0.5 credit] Issues in Practical Philosophy

Issues drawn from ethics, social and political philosophy, and related fields will be examined through careful study of significant philosophical texts, along with some ensuing debates.

Includes: Experiential Learning Activity
Prerequisite(s): enrolment in Honours or Combined
Honours Philosophy programs, or in philosophy, Ethics,
and Public Affairs, or permission of the Department.
Lectures and discussion three hours a week.

PHIL 2101 [0.5 credit] History of Ethics

An introduction to ethical theories through a study of some of the major figures in moral philosophy, such as Aristotle, Hume, Kant and Mill.

Prerequisite(s): 0.5 credit in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2103 [0.5 credit] Philosophy of Human Rights

Philosophical introduction to human rights sources, concepts, justifications, consequences, and challenges to them. Evolution of selected human rights as a) demands made in political struggles; b) declarations supported by moral or political principles and arguments; c) codes ratified and implemented by governments and international organizations.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2106 [0.5 credit] Information Ethics

An exploration of ethical issues that arise in the Age of Information. Topics to be discussed may include technology, surveillance and privacy, social media and privacy, social media and cognitive bias, bias in algorithms, AI ethics, intellectual property, and freedom of expression and assembly.

Precludes additional credit for PHIL 2104 (no longer offered).

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2120 [0.5 credit] Philosophy of Technology

Philosophical investigations of the nature of technology and the influence it has on our relationships with others, the natural world, and ourselves. Key themes may include the relation between technology and science and the role of technology in personal identity, social justice, and wellbeing.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2201 [0.5 credit]

Introduction to Marxist Philosophy

The evolution of Marx's social and political views in the setting of 18 th - and 19 th - century anarchism, liberalism and conservatism. Themes of humanism, freedom, rights, the state, democracy, alienation, and inequality, primarily as they develop into the theory of historical materialism. Precludes additional credit for PHIL 2200.

Prerequisite(s): 0.5 credit in philosophy or permission of the Department.

Lectures three hours a week.

PHIL 2202 [0.5 credit] Topics in Marxist Philosophy

The dialectical materialism of Marx, Engels, and Lenin is compared with traditional materialist, idealist, and mechanist philosophy. Marxist views on issues such as equality, ethical objectivity, human well-being, matter and mind, the existence of God, knowledge versus skepticism, freedom of the will, and justice.

Precludes additional credit for PHIL 2200.

Prerequisite(s): PHIL 2201 or 0.5 credit in the history of philosophy at the 2000-level or above.

Lectures three hours a week.

PHIL 2301 [0.5 credit]

Introduction to the Philosophy of Science

Philosophical issues arising out of the attempt to understand the world scientifically. Topics may include: scientific methodology, revolution, observation, explanation, causation, induction, reduction, the difference between natural and social scientific understanding, realism, instrumentalism, constructivism.

Prerequisite(s): a course in philosophy or second-year standing.

PHIL 2306 [0.5 credit] Philosophy and Feminism

A study of philosophical issues arising from feminism. The course includes discussions of the historical roots of feminism, the role of reason and emotion, key concepts such as oppression, sexism, equality and difference, feminism and philosophies of race and of disability, and selected moral/political issues.

Prerequisite(s): 0.5 credit in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2307 [0.5 credit] Gender and Philosophy

Topics may include gender and sex in the history of philosophy, intersections between the politics and theories of gender, sexuality, and race, the place of the body in philosophical theory, the influence of gender and sex on science/social science, and queer/trans issues and politics.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2320 [0.5 credit] Children, Literature, and Philosophy

An exploration of issues at the nexus of philosophy, children's literature, and childhood studies. Topics may include an examination of children's books and young adult literature through a philosophical lens, as well as a critical examination of the "philosophy with children" movement.

Includes: Experiential Learning Activity

Prerequisite(s): 0.5 credit in philosophy or second-year standing in a philosophy program, or permission of the department.

Lectures three hours a week.

PHIL 2330 [0.5 credit]

Happiness, Well-being, and the Good Life

A philosophical exploration of what makes a good human life. Topics may include the role of happiness, well-being, and flourishing in a good life, the relations between these aspects, and the extent to which they depend on luck and social considerations.

Lectures three hours a week.

PHIL 2340 [0.5 credit] Philosophy and Popular Culture

Philosophy is all around us, it permeates culture. This course explores philosophical questions through the lens of popular culture. The material used may include films, shows, music, novels, video games, advertising, comic books, and so on.

Lectures three hours a week.

PHIL 2380 [0.5 credit] Introduction to Environmental Ethics

Major questions in environmental ethics: How should human beings view their relationship to the rest of nature? Is responsible stewardship of the environment compatible with current technology? Must future generations be protected? Do animals, other life forms, endangered species, ecosystems and/or the biosphere have value/rights?.

Precludes additional credit for PHIL 1804. Lectures three hours a week.

PHIL 2401 [0.5 credit]

Ethics of Artificial Intelligence

Al and robotic technologies raise pressing ethical issues. Topics discussed may include big data and privacy, the 'black box' problem and bias, human-Al interaction, automation and responsibility, Al codes of ethics, the moral status of Al, and potential risks to humanity posed by superintelligence.

Prerequisite(s): 0.5 credit in PHIL, or second year standing.

Lecture three hours a week.

PHIL 2405 [0.5 credit] Philosophy of the Paranormal

Examination of claims, concepts, theories and methods in parapsychology. Their scientific character and the relation of paranormal phenomena to philosophical issues such as survival of death, human nature, time, space, causality and perception.

Prerequisite(s): 0.5 credit in philosophy or permission of the Department.

Lectures three hours a week.

PHIL 2408 [0.5 credit] Bioethics

Ethical and political issues in medicine, public health, biotechnology, and the life sciences. Topics may include reproductive ethics, research on human subjects, animal research and treatment, justice and health care, physician-patient relationships, death and the end of life, and genetic engineering.

Precludes additional credit for PHIL 3408.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week. Tutorials may be offered in selected terms.

PHIL 2501 [0.5 credit]

Introduction to Philosophy of Mind

An introduction to major philosophical issues concerning human cognition. Topics may include: the relation of mind to body, knowledge of other minds, the relation of mental states to personhood and personal identity, mental illness, consciousness, intentionality, action, mental realism. Precludes additional credit for PHIL 2502.

Prerequisite(s): a course in philosophy or second-year standing.

PHIL 2504 [0.5 credit]

Language and Communication

Some of the central topics in the study of language and communication as pursued by linguists and philosophers. The nature of meaning; the connections between language, communication and cognition; language as a social activity.

Also listed as COMS 2504, LING 2504.

Precludes additional credit for COMM 2800, LALS 2504, LALS 2800 and PHIL 2800.

Prerequisite(s): second-year standing.

Lectures three hours a week.

PHIL 2520 [0.5 credit]

Introduction to Philosophical Logic

An introduction to features of rational thinking activity, its expression, and its relation to the world, focusing on such topics as predication, truth, negation, necessity, entailment, logical form, or quantification.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2540 [0.5 credit]

Personal Identity and the Self

Philosophical perspectives on personal identity, the self, and the underlying issue of the relationship of the mind to the body. Both philosophical and psychological concepts of identity are discussed, as are related issues such as memory, introspection, and self-knowledge.

Precludes additional credit for PHIL 2502.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2550 [0.5 credit] Moral Psychology

An examination of psychological underpinnings of morality, focusing on studies at the intersection of philosophy, psychiatry, and psychology.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 2601 [0.5 credit] Philosophy of Religion

A study of philosophical issues arising from religion. Topics may include: arguments for and against the existence of God, religious experience, death and the afterlife, miracles, God and evil, the relationship between religion and science, and the relationship between religion and ethics.

Also listed as RELI 2738.

Prerequisite(s): a course in philosophy or second-year standing.

PHIL 2700 [0.5 credit] **Asian Philosophy**

An examination of South Asian and East Asian philosophical texts, from the period of the Upanishads and early Buddhism in India to modern philosophical movements. Historical sources may include Hindu. Buddhist, Jain, Confucian or Taoist texts, with a focus on metaphysical, epistemological or ethical themes.

Prerequisite(s): second-year standing.

Lectures three hours a week. May be offered as an online course in selected terms.

PHIL 2807 [0.5 credit] Philosophy of Art

Philosophical approaches to the study of art. Topics such as: the nature of art and artistic value; representation and symbolism in art; art and artifice; art and the emotions; art, culture and ideology; post-structuralism and art; theories of creativity; relationship between artworks and audiences. Also listed as ARTH 2807.

Lecture three hours a week.

PHIL 2901 [0.5 credit] Truth and Propaganda

Ancient and modern techniques of persuasion from analytical, ethical and jurisprudential perspectives. Objectivity and bias, advertising and public relations ethics, the viability of democracy in the light of pressures on and within the modern mass media.

Precludes additional credit for PHIL 2900 (no longer offered).

Prerequisite(s): 0.5 credit in PHIL or second-year standing.

Lectures three hours per week.

PHIL 3000 [0.5 credit] **Topics in Ancient Philosophy**

A study of philosophers, texts, problems and issues in ancient philosophy, generally with a focus on Plato and Aristotle.

Also listed as CLCV 3011.

Prerequisite(s): 0.5 credit in philosophy and second-year standing, or permission of the department.

Lectures three hours a week.

PHIL 3001 [0.5 credit] Early Greek Philosophy

A study of the pre-Socratic Greek philosophers and of the Sophists and Socrates.

Also listed as CLCV 3001.

Prerequisite(s): CLCV 2105 or PHIL 2005 or permission

of the Department.

Lectures three hours a week.

PHIL 3002 [0.5 credit] 17th Century Philosophy

European philosophy of the 17 th century. Representative works of writers such as Francis Bacon, Descartes, Spinoza, Leibniz, and Locke.

Prerequisite(s): 0.5 credit in philosophy and second-year standing in a philosophy program, or permission of the department.

Lectures three hours a week.

PHIL 3003 [0.5 credit] 18th Century Philosophy

European philosophy of the 18 th century. Representative works of writers such as Berkeley, Hume, and Kant. Prerequisite(s): 0.5 credit in philosophy and second-year standing in a philosophy program, or permission of the department.

Lectures three hours a week.

PHIL 3005 [0.5 credit] 19th Century Philosophy

European philosophy in the 19 th century. May include Hegel, Marx, Schopenhauer, Kierkegaard, Nietzsche, Mill. Precludes additional credit for PHIL 3007.

Prerequisite(s): 0.5 credit in philosophy and second-year standing in a philosophy program, or permission of the Department.

Lectures three hours a week.

PHIL 3009 [0.5 credit] Topics in European Philosophy

A study of philosophers, texts, problems and issues in any period of European philosophy.

Prerequisite(s): 0.5 credit in philosophy or second-year standing.

Lectures three hours a week.

PHIL 3010 [0.5 credit]

Special Topics in Global Philosophical Traditions

A study of philosophers, texts, and doctrines beyond the Western tradition. Traditions covered will vary but may include Asian, African, Muslim or Indigenous philosophy, possibly with critical comparison to Western counterparts. Precludes additional credit for PHIL 2004.

Prerequisite(s): 0.5 credit in philosophy or second-year standing.

PHIL 3102 [0.5 credit]

Philosophy of Law: The Logic of Law

Legal reasoning and analysis of concepts of particular significance to the law, including justice, rights and duties, liability, punishment, ownership and possession.

Also listed as LAWS 3102.

Prerequisite(s): 0.5 credit in philosophy or permission of the Department.

Lectures three hours a week.

PHIL 3104 [0.5 credit]

The Roots of Analytic Philosophy

In the context of the work of such writers as Frege and Bradley, a discussion of early philosophical works of Russell, Moore and Wittgenstein. In addition some early representatives of positivism and pragmatism may be examined.

Prerequisite(s): 0.5 credit in philosophy and second-year standing in a philosophy program, or permission of the department.

Lectures and seminar three hours a week.

PHIL 3140 [0.5 credit] Epistemology

Fundamental issues concerning the relation between evidence, rationality, and knowledge. Topics may include: skepticism, the nature of belief, the structure of justification, the relative contributions of reason and sense experience to knowledge, innate knowledge, the problem of induction, and the knowledge of other minds. Precludes additional credit for PHIL 2300.

Prerequisite(s): 0.5 credit in philosophy and third-year standing in a philosophy program or permission of the department.

PHIL 3150 [0.5 credit] Metaphysics

Philosophical issues concerning the fundamental nature of being. Topics may include: time and temporality, space, substance, universals/particulars, identity, causation, freedom/determinism, the nature of norms.

Precludes additional credit for PHIL 2302.

Prerequisite(s): 0.5 credit in philosophy and third-year standing in a philosophy program, or permission of the department.

PHIL 3301 [0.5 credit]

Issues in the Philosophy of Science

Selected topic(s) in the philosophy of science, such as its relationship to values, or in the philosophy of a particular science (such as philosophy of mathematics, philosophy of physics, philosophy of biology, and philosophy of the social sciences).

Prerequisite(s): PHIL 2301 or permission of the department.

Lectures three hours a week.

PHIL 3306 [0.5 credit] Symbolic Logic

A review of the basic techniques of propositional and predicate logic. Natural deduction and consistency trees. Soundness and completeness. Alternative semantics. Extensions to basic logic: identity, modal logic with possible world semantics, three valued systems, deontic logic.

Precludes additional credit for PHIL 3305.

Prerequisite(s): PHIL 2001 or permission of the Department.

Lectures three hours a week.

PHIL 3320 [0.5 credit] Contemporary Ethical Theory

Critical study of modern ethical theories, their views on the nature of morality and the justification of moral claims. Topics may include utilitarianism, libertarianism, communitarianism, egoism, neo-Kantianism, virtue ethics, social contract ethics, feminist ethics, and moral rights. Precludes additional credit for PHIL 2102.

Prerequisite(s): PHIL 2020 or PHIL 2101 or permission of the department.

Lectures three hours a week.

PHIL 3330 [0.5 credit]

Topics in History of Social and Political Philosophy

A critical examination of selected topics and perspectives in the history of social and political philosophy. Precludes additional credit for PHIL 3300.

Prerequisite(s): a course in philosophy or second-year standing.

Lectures three hours a week.

PHIL 3340 [0.5 credit]

Topics in Contemporary Social and Political Philosophy

A critical examination of some contemporary approaches to topics in social and political philosophy, such as liberalism, feminism, contractarianism, Marxism, libertarianism, and communitarianism.

Precludes additional credit for PHIL 3300.

Prerequisite(s): a course in philosophy or second-year standing.

PHIL 3350 [0.5 credit]

Philosophy, Ethics, and Public Affairs

Advanced study of a set of public policy issues, a particular theory or group of theories, or a particular philosopher, concerning philosophical and ethical aspects of public affairs.

Prerequisite(s): third-year standing or permission of the department.

Lectures three hours a week.

PHIL 3360 [0.5 credit]

Philosophy, Economics, and Public Policy

The course explores issues at the intersection of philosophy and economics, with a special focus on socially and politically relevant issues. Topics may include: efficiency, cooperation, equity and distributive justice, commodification and the moral limits of markets.

Prerequisite(s): third-year standing or permission of the department.

Lectures three hours a week.

PHIL 3380 [0.5 credit]

Environments, Technology and Values

Advanced treatment of ethical issues concerning technologies and environments, including: sustainable development, women and the environment, biological diversity, intrinsic or natural value or rights of nonhumans, humans' relation to the rest of the natural world, obligations to future generations, liberty versus equality. Precludes additional credit for PHIL 2804. Prerequisite(s): PHIL 1804 or PHIL 2380 and third-year

Prerequisite(s): PHIL 1804 or PHIL 2380 and third-year standing, or permission of the Department.

Lectures three hours a week.

PHIL 3450 [0.5 credit] Topics in Aesthetics

Topics may include theories of aesthetic norms and valuation from ancient Greece onward, or applications of aesthetic theory to various genres of art.

Precludes additional credit for PHIL 2400, PHIL 3400, PHIL 3401, and PHIL 3402.

Prerequisite(s): At least 0.5 credit in philosophy, or HUMS 1000, or ARTH 2807, or permission of the Department.

Seminar two hours a week.

PHIL 3501 [0.5 credit]

Philosophy of Cognitive Science

Philosophical issues arising from cognitive science. Topics may include: the proper methodology for studying the mind, the very possibility of a "science of mind", the computer model of the mind and reactions to it. Prerequisite(s): PHIL 2501 or PHIL 2502 or second-year standing in Cognitive Science, or permission of the department.

PHIL 3502 [0.5 credit] Mind and Action

Philosophical thought concerning the relation between mentality and agency. Topics may include: the relation between belief, desire, and behaviour; rationality and normativity; representing and doing; subjectivity and intersubjectivity; physical and psychological laws; mental causation. Authors may include: Wittgenstein, Heidegger, Ryle, Sellars, Anscombe, Davidson, Taylor, McDowell. Prerequisite(s): PHIL 2501 or PHIL 2502, or permission of the Department.

PHIL 3503 [0.5 credit] Artificial Intelligence: Philosophical and Ethical Issues

Topics examined through the lens of philosophy and cognitive science may include humans' obligations towards AI, sentient AI, implications of AI for models of cognition, designing ethical AI systems, implications of using AI in healthcare, and social inequality and job displacement related to AI.

Also listed as CGSC 3603.

Prerequisite(s): CGSC 2001 or PHIL 2501 and third-year standing in Cognitive Science or Philosophy. Seminar 3 hours per week.

PHIL 3504 [0.5 credit] Pragmatics

The study of language use in its conversational and cultural contexts. Topics include: conversational implicature; deixis; the semantics-pragmatics boundary; speaker's reference; speech acts. May include crosscultural pragmatics.

Also listed as LING 3504.

Precludes additional credit for LALS 2800 [1.0], LALS 3504, MCOM 2800 [1.0], MCOM 3504 and PHIL 2800 [1.0].

Prerequisite(s): third-year standing, and one of FYSM 1206, LALS 1000, LALS 1001, LING 1001, PHIL 2001, PHIL/LALS/LING/COMM/MCOM 2504 or LALS/ LING 3505/PHIL 3506; or permission of the Department of Philosophy or School of Linguistics and Applied Language Studies.

PHIL 3506 [0.5 credit] Semantics

Study of language meaning. Lexical meaning and meanings of larger linguistic expressions, including nominal units, verbal units, and sentences. Meaning relationships between utterances. Relationship between linguistic meaning (semantics) and contextual meaning (pragmatics). Basic formal treatments of semantics. Also listed as LING 3505.

Precludes additional credit for LALS 3505.
Prerequisite(s): third-year standing, and one of LALS 1000, LALS 1001, LING 1001, PHIL 2001, PHIL/LALS/LING/COMM/MCOM 2504 or PHIL/LALS/LING 3504; or permission of the Department of Philosophy or School of Linguistics and Applied Language Studies.

PHIL 3530 [0.5 credit] Philosophy of Language

Lectures three hours a week.

An intensive introduction to philosophy of language. Topics may include meaning, reference and truth, speech acts, the nature of concepts, language learning, metaphor, compositionality, context-sensitivity.

Prerequisite(s): third-year standing, and one of FYSM 1206, LALS 1000, LALS 1001, LING 1001, PHIL 2001, PHIL/LALS/LING/COMM/MCOM 2504 or LALS/LING 3505/PHIL 3506; or permission of the department.

Lectures three hours a week.

PHIL 3540 [0.5 credit] Philosophy of Emotions

Emotions are central to human experience and widely studied in philosophy and science. In order to better understand them and their role in our lives, this course explores philosophical questions about emotions as they arise in philosophy of mind and cognitive science, ethics, and aesthetics.

Prerequisite(s): PHIL 2501, or permission of the department.

Lectures three hours a week.

PHIL 3901 [0.5 credit] Independent Study

Essays and/or examinations based on a list of readings provided by the instructor.

Prerequisite(s): normally restricted to students with at least 3.0 credits in philosophy and with high standing in philosophy courses and permission of the Department.

PHIL 3902 [0.5 credit] Independent Study

Essays and/or examinations based on a list of readings provided by the instructor.

Prerequisite(s): normally restricted to students with at least 3.0 credits in philosophy and with high standing in philosophy courses and permission of the Department.

PHIL 3903 [0.5 credit] Independent Study

Essays and/or examinations based on a list of readings provided by the instructor.

Prerequisite(s): normally restricted to students with at least 3.0 credits in philosophy and with high standing in philosophy courses and permission of the Department.

PHIL 3906 [0.5 credit] Independent Study

Essays and/or examinations based on a bibliography constructed by the student in consultation with the instructor.

Prerequisite(s): normally restricted to students with at least 3.0 credits in philosophy and with high standing in philosophy courses and permission of the Department.

PHIL 3907 [0.5 credit] Independent Study

Essays and/or examinations based on a bibliography constructed by the student in consultation with the instructor.

Prerequisite(s): normally restricted to students with at least 3.0 credits in philosophy and with high standing in philosophy courses and permission of the Department.

PHIL 3908 [0.5 credit] Independent Study

Essays and/or examinations based on a bibliography constructed by the student in consultation with the instructor.

Prerequisite(s): normally restricted to students with at least 3.0 credits in philosophy and with high standing in philosophy courses and permission of the Department.

PHIL 4003 [0.5 credit]

Seminar in philosophy Before the Modern Period

Detailed study of selected philosophers or issues in philosophy before the modern period.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5600, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4004 [0.5 credit]

Seminar in philosophy Before the Modern Period

Detailed study of selected philosophers or issues in philosophy before the modern period.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5600, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4005 [0.5 credit] Seminar in Modern Philosophy

Detailed study of selected philosophers or issues in modern philosophy.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5600, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4006 [0.5 credit] Seminar in Modern Philosophy

Detailed study of selected philosophers or issues in modern philosophy.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5600, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4007 [0.5 credit]

Seminar in Contemporary Philosophy

Detailed study of selected philosophers or issues in contemporary philosophy.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5500, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4008 [0.5 credit]

Seminar in Contemporary Philosophy

Detailed study of selected philosophers or issues in contemporary philosophy.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5500, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4055 [0.5 credit]

Lexical Semantics

Study of the meaning of words. Topics may include lexical decomposition, meaning variation, lexical relations, and lexical aspect.

Also listed as LING 4510.

Precludes additional credit for LING 4055 (no longer offered).

Prerequisite(s): LING 3505 or PHIL 3506.
Also offered at the graduate level, with different requirements, as LING 5510 and PHIL 5660, for which additional credit is precluded.
Seminars three hours a week.

PHIL 4100 [0.5 credit]

Special Topic

Detailed study of a special topic in philosophy. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5000, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4210 [0.5 credit]

Seminar in Philosophy of Language or Linguistics

Detailed study of selected issues or the work of selected philosophers in philosophy of language or on philosophical topics in linguistics.

Prerequisite(s): eligibility for fourth year standing in a Philosophy Honours programme or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5200, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4220 [0.5 credit]

Seminar in philosophy of Mind or Cognition

Detailed study of selected issues or the work of selected philosophers in philosophy of mind or philosophical aspects of cognition.

Prerequisite(s): eligibility for fourth year standing in a Philosophy Honours programme or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5200, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4230 [0.5 credit]

Seminar in Metaphysics, Epistemology, or Philosophy of Science

Detailed study of selected issues or the work of selected philosophers in metaphysics, epistemology, or philosophy of science.

Prerequisite(s): eligibility for fourth year standing in a Philosophy Honours programme or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5250, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4300 [0.5 credit]

Seminar in Ethical Theory or Meta-Ethics

Detailed study of selected issues pertaining to ethical theory or issues of meta-ethics such as realism, relativism, moral knowledge.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5300, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4320 [0.5 credit]

Seminar in Ethics or Moral Philosophy

Detailed study of selected issues in ethics or moral philosophy.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5350, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4330 [0.5 credit]

Seminar in Social or Political Philosophy

Detailed study of selected issues in social or political philosophy.

Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Also offered at the graduate level, with different requirements, as PHIL 5350, for which additional credit is precluded.

Seminar three hours a week.

PHIL 4403 [0.5 credit] Special Topic in Applied Ethics

Detailed study of a special topic in applied ethics. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4404 [0.5 credit]

Special Topic in Applied Ethics

Detailed study of a special topic in applied ethics. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4405 [0.5 credit]

Special Topic in Aesthetics or Philosophy of Art

Detailed study of a special issue or a single author in aesthetics and/or philosophy of art.

Prerequisite(s): eligibility for fourth-year standing in philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4406 [0.5 credit]

Special Topic in Aesthetics or Philosophy of Art

Detailed study of a special issue or a single author in aesthetics and/or philosophy of art.

Prerequisite(s): eligibility for fourth-year standing in philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4407 [0.5 credit]

Special Topic in Philosophy of Law

Detailed study of a special topic in philosophy of law. Also listed as LAWS 4103.

Prerequisite(s): eligibility for fourth-year standing in a Law or Philosophy Honours program or permission of either Department.

Seminars three hours a week.

PHIL 4408 [0.5 credit]

Special Topic in Philosophy of Law

Detailed study of a special topic in philosophy of law. Also listed as LAWS 4104.

Prerequisite(s): eligibility for fourth-year standing in a Law or Philosophy Honours program or permission of either Department.

Seminars three hours a week.

PHIL 4503 [0.5 credit]

Special Topic in Philosophy of Computing

Detailed study of a special topic in philosophy of computing.

Prerequisite(s): eligibility for fourth-year standing in philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4504 [0.5 credit]

Special Topic in Philosophy of Computing

Detailed study of a special topic in philosophy of computing.

Prerequisite(s): eligibility for fourth-year standing in philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4505 [0.5 credit]

Formal Semantics

Advanced topics in compositional semantics and its interfaces. Topics may include: logic, semantic types, lambda calculus, intentional contexts, possible world semantics, interfaces with syntax and pragmatics quantification, anaphora, presupposition, implicatures, scope and binding, and model theory.

Also listed as LING 4505.

Precludes additional credit for LALS 4507 (no longer offered).

Prerequisite(s): LALS 3505 or LING 3505 or PHIL 3506 or permission of the Department of Philosophy or School of Linguistics and Language Studies.

Seminars three hours a week.

PHIL 4603 [0.5 credit]

Special Topic in Feminist Philosophy

Detailed study of a special topic in feminist philosophy. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4604 [0.5 credit]

Special Topic in Feminist Philosophy

Detailed study of a special topic in feminist philosophy. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4606 [0.5 credit]

Special Topic in Continental Philosophy

Prerequisite(s): eligibility for fourth-year standing in philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4607 [0.5 credit]

Special Topic in Continental Philosophy

Prerequisite(s): eligibility for fourth-year standing in philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4701 [0.5 credit]

Special Topic in Logic

Detailed study of a special topic in Logic. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4702 [0.5 credit] Special Topic in Logic

Detailed study of a special topic in Logic. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4703 [0.5 credit] Special Topic in Philosophical Logic

Detailed study of a special topic in Philosophical Logic. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4704 [0.5 credit]

Special Topic in Philosophical Logic

Detailed study of a special topic in Philosophical Logic. Prerequisite(s): eligibility for fourth-year standing in a Philosophy Honours program or permission of the Department.

Seminar two hours a week.

PHIL 4900 [1.0 credit]

Tutorial

Prerequisite(s): permission of the Department. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration.

PHIL 4901 [0.5 credit] Tutorial

Prerequisite(s): permission of the Department. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration.

PHIL 4902 [0.5 credit] Tutorial

Prerequisite(s): permission of the Department. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration.

PHIL 4903 [0.5 credit]

Tutorial

Prerequisite(s): permission of the Department. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration.

PHIL 4904 [0.5 credit]

Tutorial

Prerequisite(s): permission of the Department. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration.

PHIL 4906 [0.5 credit]

Tutorial

Prerequisite(s): permission of the Department. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration.

Physics

This section presents the requirements for programs in:

- · Physics (Astrophysics Stream) B.Sc. Honours
- · Physics (Experimental Stream) B.Sc. Honours
- · Physics (Theory Stream) B.Sc. Honours
- · Physics B.Sc. Major
- · Physics B.Sc.
- · Applied Physics B.Sc. Honours
- Mathematics and Physics B.Sc. Double Honours
- Biology and Physics B.Sc. Combined Honours
- Chemistry and Physics B.Sc. Combined Honours
- · Minor in Physics

The Department of Physics also offers the program: Engineering Physics - B.Eng. Consult the Engineering program section for details about this program.

Program Requirements

Course Categories for Physics

The program descriptions below make use of the following course categories, which are defined in the B.Sc. Regulations section.

- Approved Courses Outside the Faculties of Science and Engineering and Design
- Free Elective

Physics (Astrophysics Stream) B.Sc. Honours (20.0 credits)

A. Credits Included in the Major CGPA (11.0 credits)

1.	1.0 credit from:		1.0
	PHYS 1001 [0.5] & PHYS 1002 [0.5]	Foundations of Physics I Foundations of Physics II	
	PHYS 1003 [0.5] & PHYS 1004 [0.5]	Introductory Mechanics and Thermodynamics Introductory Electromagnetism and Wave Motion	
	PHYS 1007 [0.5] & PHYS 1008 [0.5]	Elementary University Physics I Elementary University Physics II (with an average grade of B- or higher)	
2	3.0 credits in:		3.0

	PHYS 2007 [0.5]	Second Year Physics Laboratory:			or

Minor in Physics (4.0 credits)

The Minor in Physics is available to students registered in degree programs other than those offered by the

Department of Physics. Careful attention must be paid to prerequisites.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Physics.

Requirements

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 1. 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 1. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or,
- 2. 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree.

The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Biochemistry	
BIOC 2200 [0.5]	Cellular Biochemistry
BIOC 4001 [0.5]	Methods in Biochemistry
BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering
Biology	
BIOL 1103 [0.5]	Foundations of Biology I
BIOL 1104 [0.5]	Foundations of Biology II
BIOL 2001 [0.5]	Animals: Form and Function
BIOL 2002 [0.5]	Plants: Form and Function
BIOL 2104 [0.5]	Introductory Genetics
BIOL 2200 [0.5]	Cellular Biochemistry
BIOL 2600 [0.5]	Ecology
Chemistry

GEOG 4108 [0.5]	Permafrost

Science Psychology Courses

PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
PSYC 2002 [0.5]	Introduction to Statistics in Psychology
PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development
PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives

CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402 and ERTH 2403 only as free

electives. Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

BIOL 4810 [0.5] Education Research in Undergraduate Science

CHEM 1003 [0.5] The Chemistry of Food, Health and Drugs

CHEM 1004 [0.5]	Drugs and the Human Body		
CHEM 1007 [0.5]	Chemistry of Art and Artifacts		
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years		
ERTH 2415 [0.5]	Natural Disasters		
ISCI 1001 [0.5]	Introduction to the Environment		
ISCI 2000 [0.5]	Natural Laws		
ISCI 2002 [0.5]	Human Impacts on the Environment		
PHYS 1901 [0.5]	Planetary Astronomy		
PHYS 1902 [0.5]	From our Star to the Cosmos		
PHYS 1905 [0.5]	Physics Behind Everyday Life		
PHYS 2903 [0.5]	Physics Towards the Future		
Prohibited Courses			

The following courses are not acceptable for credit in any B.Sc. program:

COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I
MATH 1402 [0.5]	Elementary Mathematics for Economics II

all 0000-level courses

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- · Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.Sc. Honours Physics, Applied Physics: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to the following:

- Registered as a full-time student in the B.Sc. Honours Physics or Applied Physics program;
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 6.50 and a Major CGPA of at least 8.00. These CGPAs must be maintained throughout the duration of the degree.

B.Sc. Honours Physics and Applied Physics students must successfully complete three (3) work terms to obtain the Co-op Designation.

Co-op Work Term Course: PHYS 3999 Work/Study Pattern:

Year 1		Year 2		Year 3		Year 4		Year 5	
Term	Pattern

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

- Bachelor of Mathematics (B. Math.) (Honours)
- Bachelor of Mathematics (B.Math.)

Admission Requirements

B.Math Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions, and Calculus and Vectors.

The overall admission cut-off average and/or the prerequisite course average may be considerably higher than the stated minimum requirements for admission to the combined B.Math./M.Sc. in Mathematics or Statistics.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

B.Math

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions, and Calculus and Vectors.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op Option Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Mathematics Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market (and thus the availability of co-op placement) may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- B.Sc. (Honours)
- · B.Sc. (Major)
- B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics,

Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Physics (PHYS) Courses

PHYS 1001 [0.5 credit] Foundations of Physics I

This calculus-based course on classical mechanics covers kinematics, dynamics, gravitation, and oscillatory motion. This is a specialist course for students intending to take further courses in physics.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1002, BIT 1203,
PHYS 1003, PHYS 1007, PHYS 1107.

Prerequisite(s): Grade 12 Mathematics: Advanced Functions and Grade 12 Mathematics: Calculus and Vectors or equivalent, plus one of MATH 1004 or MATH 1002 or MATH 1052 (the MATH course may be taken concurrently); or permission of the Physics Department. Grade 12 Physics is strongly recommended.

Lectures three hours a week, laboratory or tutorial three hours a week.

PHYS 1002 [0.5 credit] Foundations of Physics II

An introduction to electricity, magnetism, electromagnetic fields, and wave motion. This is a specialist course for students intending to take further courses in physics. Includes: Experiential Learning Activity
Precludes additional credit for BIT 1003 (no longer offered), BIT 1007, BIT 1204, PHYS 1004, PHYS 1008, PHYS 1108.

Prerequisite(s): PHYS 1001, or PHYS 1003, or PHYS 1007 with a grade of B-; MATH 1004 or MATH 1002 (may be taken concurrently) or MATH 2052 (may be taken concurrently); or permission of the Department. Lectures three hours a week, laboratory or tutorial three hours a week.

PHYS 1003 [0.5 credit]

Introductory Mechanics and Thermodynamics

Mechanics, gravitation, oscillations, and thermodynamics. The application of calculus to solve problems in these areas of physics is introduced. This course is intended for students in the physical sciences and engineering. Includes: Experiential Learning Activity

Precludes additional credit for BIT 1002, BIT 1203, PHYS 1001, PHYS 1007, PHYS 1107.

Prerequisite(s): Grade 12 Physics or equivalent, plus Grade 12 Mathematics: Advanced Functions or equivalent, plus one of MATH 1004 or MATH 1002 or MATH 1052 (the MATH course may be taken concurrently). Note that Grade 12 Mathematics: Calculus and Vectors is strongly recommended.

Lectures three hours a week, laboratory or tutorial three hours a week.

PHYS 1004 [0.5 credit]

Introductory Electromagnetism and Wave Motion

This calculus-based course introduces potential energy, work, electricity, magnetism, oscillations and waves. Includes: Experiential Learning Activity

Precludes additional credit for BIT 1003 (no longer offered), BIT 1007, BIT 1204, PHYS 1002, PHYS 1008, PHYS 1108.

Prerequisite(s): MATH 1004, ECOR 1101 or ECOR 1053 or (ECOR 1045 and ECOR 1048) or (ECOR 1033 and ECOR 1034)(the ECOR courses may be taken concurrently) or PHYS 1001 or PHYS 1003 or PHYS 1007 (a grade of at least B- is required for PHYS 1007), or permission of the Department.

Lectures three hours a week, laboratory or tutorial three hours a week.

PHYS 1007 [0.5 credit] Elementary University Physics I

Mechanics, properties of matter, thermodynamics. Applications chosen in part from the life sciences. For students who lack the prerequisites for PHYS 1001 or PHYS 1003, or who do not intend to take upper-year courses in physics.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1002, BIT 1203,
PHYS 1001, PHYS 1003, PHYS 1107.

Prerequisite(s): (i) Grade 12 Mathematics: Advanced Functions or equivalent, or MATH 0107 (may be taken concurrently); or (ii) Grade 12 Mathematics: Calculus and Vectors or equivalent, or MATH 1007 (may be taken concurrently; or (iii) permission of the Physics Department.

Lectures three hours a week, laboratory or tutorial three hours per week.

PHYS 1008 [0.5 credit]

Elementary University Physics II

Electricity and magnetism, DC and AC circuits, wave motion and light. Elements of modern physics. Applications chosen in part from the life sciences. Includes: Experiential Learning Activity Precludes additional credit for BIT 1003 (no longer offered), BIT 1007, BIT 1204, PHYS 1002, PHYS 1004, PHYS 1108.

Prerequisite(s): PHYS 1001 or PHYS 1003 or PHYS 1007.

Lectures three hours a week, laboratory or tutorial three hours per week.

PHYS 1107 [0.5 credit] Introductory University Physics I

Mechanics, properties of matter, thermodynamics. Applications chosen in part from the life sciences. For students who lack the prerequisites for PHYS 1001 or PHYS 1003, or who do not intend to take upper-year courses in physics.

Precludes additional credit for BIT 1002, BIT 1203, PHYS 1001, PHYS 1003, PHYS 1007.

Prerequisite(s): (i) Grade 12 Mathematics: Advanced Functions or equivalent, or MATH 0107 (may be taken concurrently); or (ii) Grade 12 Mathematics: Calculus and Vectors or equivalent, or MATH 1007(may be taken concurrently; or (iii) permission of the Physics Department.

Lectures three hours a week.

PHYS 1108 [0.5 credit] Introductory University Physics II

Electricity and magnetism, DC and AC circuits, wave motion and light. Elements of modern physics. Applications chosen in part from the life sciences. Precludes additional credit for BIT 1003 (no longer offered), BIT 1007, BIT 1204, PHYS 1002, PHYS 1004, PHYS 1008.

Prerequisite(s): PHYS 1001 or PHYS 1003 or PHYS 1007 or PHYS 1107.

Lectures three hours a week.

PHYS 1901 [0.5 credit] Planetary Astronomy

Description of the known stellar, galactic and extragalactic systems together with the instruments used to study them. Modern ideas concerning the structure, origin and evolution of our own planet. Formation of the Moon -Earth system. Study of the planets in our solar system. Precludes additional credit for PHYS 2203. Lectures two and one-half hours a week.

PHYS 1902 [0.5 credit]

From our Star to the Cosmos

Starting with the Sun, the course studies its composition and source of power, then compares our Sun with the other stars in the galaxy and beyond. Modern ideas concerning the structure, origin and evolution of the universe, pulsars and supernovae are examined. Precludes additional credit for PHYS 2203. Lectures two and one-half hours a week.

PHYS 1905 [0.5 credit] Physics Behind Everyday Life

Examination of the physics behind everyday life. Topics may include transportation, sports, weather and climate, electricity, and sustainable energy. No science background is required. Faculty of Science students may only take this course as a free elective.

Includes: Experiential Learning Activity Online Course.

PHYS 2004 [0.5 credit] Modern Physics for Engineers

Introduction to aspects of modern physics relevant to engineering. Thermal radiation. Concepts of relativistic kinematics. Wave-particle duality. Photoelectric effect, Compton scattering. Bohr theory of the hydrogen atom. Optical and x-ray spectra, lasers. Nuclear physics and applications.

Precludes additional credit for PHYS 2604 and PHYS 2605.

Prerequisite(s): PHYS 1002 or PHYS 1004 or PHYS 1008 with a grade of B- or better, plus MATH 1004 and MATH 1104 or equivalent. Restricted to B.Eng. students not in the Engineering Physics program. Students in programs other than B.Eng. must obtain permission of the Department.

Lectures three hours a week.

PHYS 2007 [0.5 credit] Second Year Physics Laboratory: Selected Experiments and Seminars

Students complete a number of experiments selected from classical physics and geometric optics, modern physics, etc. Seminars on relevant experimental topics will be included. Includes: Experiential Learning Activity. Includes: Experiential Learning Activity

Prerequisite(s): PHYS 1002, or PHYS 1004 (PHYS 1008 is also acceptable provided a minimum average grade of B- is presented).

Six hours a week.

PHYS 2101 [0.5 credit] Mechanics and Properties of Matter

Equations of motion for a single particle. Harmonic oscillation. Noninertial reference frames. Orbits in a central force field. Motion of systems of particles and of rigid bodies. Introduction to special relativity. Laboratory experiments in classical mechanics and properties of matter.

Includes: Experiential Learning Activity
Prerequisite(s): PHYS 1001 and PHYS 1002, or
PHYS 1003 and PHYS 1004, alternatively PHYS 1007
and PHYS 1008 with an overall average of B- or better;
MATH 1004 and MATH 1104, or MATH 1002 and MATH

Lectures three hours a week, laboratory three hours a week, tutorials (optional) once a week.

PHYS 2202 [0.5 credit] Wave Motion and Optics

Geometrical optics. Types of waves, vibrating string and the classical wave equation. General solutions for traveling waves. Superposition and interference, coherence, wave packets, waves in 2 and 3 dimensions. Propagation of electromagnetic waves. Light and physical optics, oscillator model for dispersion, diffraction, polarization, and refraction.

Includes: Experiential Learning Activity
Prerequisite(s): PHYS 1001 and PHYS 1002, or
PHYS 1003 and PHYS 1004 (PHYS 1007 and PHYS 1008
are also acceptable provided a minimum average grade
of B- is presented); plus MATH 1104 or MATH 1102 or
MATH 2152, and MATH 2004 or MATH 2000 (MATH 2000
may be taken concurrently).

Lectures three hours a week, laboratory three hours a week.

PHYS 2203 [0.5 credit] Astronomy

The observational basis of astronomy. The history of astronomy, properties of light, solar system observations and stellar astronomy.

Precludes additional credit for PHYS 1901 and PHYS 1902.

Prerequisite(s): PHYS 1002 or PHYS 1004 or permission of the department. PHYS 1008 with a grade of B- or better may also be used if MATH 1004 or MATH 1007 or MATH 1002 or MATH 2052 have been successfully completed. Lectures three hours a week.

PHYS 2212 [0.5 credit]

Wave Mechanics and Thermodynamics

Types of waves and the classical wave equation, wave functions in 2 and 3 dimensions, reflection and refraction, superposition of waves, polarization, interference, diffraction, coherence, wave packets. Temperature and thermodynamic equilibrium, heat, work and first law of thermodynamics, entropy and second law of thermodynamics.

Prerequisite(s): PHYS 1001 and PHYS 1002, or PHYS 1003 and PHYS 1004 (PHYS 1007 and PHYS 1008 are also acceptable provided a minimum average grade of B- is presented); plus MATH 1004 and MATH 1104 or MATH 1102 or MATH 2152, and MATH 2004 or MATH 2000 (MATH 2000 or MATH 2004 may be taken concurrently).

Lectures three hours a week

PHYS 2305 [0.5 credit] Electricity and Magnetism

Electrostatic field and potential, Gauss' law. Properties of conductors. Magnetic effects from currents. Motion of charges in electric and magnetic fields. Energy in electric and magnetic fields. Electromagnetic induction. Maxwell's equations in vacuum using vector differential and integral calculus.

Prerequisite(s): PHYS 1001, PHYS 1002, or PHYS 1003 and PHYS 1004, alternatively PHYS 1007 and PHYS 1008 with an overall grade of B- or higher; MATH 2004 or MATH 2000 (MATH 2000 may be taken concurrently). Lectures three hours a week.

PHYS 2306 [0.5 credit]

week.

Physics of Electrical and Electronic Measurements I

D.C. and A.C. circuit theory. Resonant circuits. Basic measuring devices, the oscilloscope; impedances, bandwidth, noise; vacuum tubes, transistors, useful approximations for circuit design; feedback, amplifiers, oscillators; operational circuits; digital circuits. Lectures emphasize the physical basis of instrument design. Laboratory emphasizes modern digital instrumentation. Includes: Experiential Learning Activity Prerequisite(s): PHYS 1001, PHYS 1002 or PHYS 1003 and PHYS 1004, alternatively PHYS 1007 and PHYS 1008 with an overall grade of B- or better. Lectures three hours a week, laboratory three hours a

PHYS 2401 [0.5 credit]

Thermal Physics

Introduction to thermodynamics and statistical mechanics. Temperature and thermodynamic equilibrium. Work, internal energy and heat; first law. Kinetic theory of gases. Basic probability theory. Microscopic states and entropy. Absolute temperature, reversibility and the second law of thermodynamics. Thermodynamic processes and applications.

Prerequisite(s): PHYS 1001 and PHYS 1002, or PHYS 1003 and PHYS 1004, (PHYS 1007 and PHYS 1008 are also acceptable provided a minimum average grade of B-); plus MATH 1004 and MATH 1104 or MATH 1002 (no longer offered) and MATH 1102 (no longer offered), or MATH 2052 and MATH 2152. Lectures three hours a week.

PHYS 2604 [0.5 credit] Modern Physics I

The course is designed to provide a logical transition from classical to modern physics. Special relativity. Rutherford scattering, atomic models. Thermal radiation. Photoelectric effect, Compton scattering. Bohr theory of the hydrogen atom. Atomic energy states, optical spectra, lasers. X-rays. Radioactivity. Quantum Mechanics. Includes: Experiential Learning Activity Precludes additional credit for PHYS 2004 and PHYS 2605.

Prerequisite(s): PHYS 1001 and PHYS 1002, or PHYS 1003 and PHYS 1004 (PHYS 1007 and PHYS 1008 are also acceptable provided a minimum average grade of B- is presented); plus MATH 1004 and MATH 1104, or MATH 1002 (no longer offered) and MATH 1102 (no longer offered) or MATH 2052 and MATH 2152.

Lectures three hours a week, laboratory three hours a week

PHYS 2605 [0.5 credit] Modern Physics I

The course is designed to provide a logical transition from classical to modern physics. Special relativity. Rutherford scattering, atomic models. Thermal radiation. Photoelectric effect, Compton scattering. Bohr theory of the hydrogen atom. Atomic energy states, optical spectra, lasers. X-rays. Radioactivity.

Precludes additional credit for PHYS 2004 and PHYS 2604.

Prerequisite(s): PHYS 1001 and PHYS 1002, or PHYS 1003 and PHYS 1004 (PHYS 1007 and PHYS 1008 are also acceptable provided a minimum average grade of B- is presented); plus MATH 1004 and MATH 1104, or MATH 1002 (no longer offered) and MATH 1102 (no longer offered) or MATH 2052 and MATH 2152. Lecture 3 hours per week.

PHYS 2801 [0.5 credit]

Computational Methods in Physics

Introduction to computational methods in physics. Software platforms and programming languages. Data formats and structures, histograms, and data visualization. Probability distributions, fitting/parameter estimation. function minimization. Interpretation and treatment of uncertainties. Introduction to machine learning and classification.

Prerequisite(s): PHYS 1001 or PHYS 1003 or PHYS 1007, and COMP 1005.

Lectures three hours a week.

PHYS 2903 [0.5 credit]

Physics Towards the Future

From classical phenomena to aspects of modern physics and recent advances. Topics may include light and colour, music and sound, cell phones, the galaxy and beyond. No science background is required. Faculty of Science students may only take this course as a free elective. Includes: Experiential Learning Activity Prerequisite(s): second-year standing. Online course.

PHYS 3007 [0.5 credit]

Third Year Physics Laboratory: Selected Experiments and Seminars

Students complete a small number of experiments selected from modern optics, holography, atomic physics, nuclear spectroscopy, radiation, etc. An exercise on literature searches and student seminars on experimental and numerical methods are included.

Includes: Experiential Learning Activity Precludes additional credit for PHYS 3008, PHYS 3009. Prerequisite(s): PHYS 2007, or PHYS 2202 and PHYS 2604, or permission of the Department. Six hours a week.

PHYS 3008 [0.5 credit]

Third Year Physics Laboratory: Selected Experiments and Workshop

Students complete a small number of experiments selected from modern optics, holography, atomic physics, nuclear spectroscopy, radiation, etc. Instruction on instrumentation building techniques will be given. Includes: Experiential Learning Activity Precludes additional credit for PHYS 3007, PHYS 3009. Prerequisite(s): PHYS 2007, or PHYS 2202 and PHYS 2604, or permission of the department. Six hours a week.

PHYS 3009 [0.5 credit]

Third Year Physics Laboratory: Selected Experiments and Seminars with Observational Astronomy

Students complete a small number of experiments selected from astronomy, astrophysics, modern optics, holography, atomic physics, nuclear spectroscopy. radiation, etc. At least one astronomy/astrophysics related experiment is required. An exercise on literature searches and student seminars on experimental and numerical methods are included.

Includes: Experiential Learning Activity Precludes additional credit for PHYS 3007, PHYS 3008. Prerequisite(s): PHYS 2007, or PHYS 2202 and PHYS 2604, and PHYS 2203, or permission of the Department. Six hours a week.

PHYS 3207 [0.5 credit] **Topics in Biophysics**

Introduction to biophysics. Random motion of molecules and diffusion: viscosity and the circulatory system: laws of thermodynamics and physical forces responsible for chemical reactions, molecular self-assembly and recognition; enzyme kinetics and molecular machines; nerve impulse and its propagation.

Prerequisite(s): PHYS 2212, or PHYS 2604, or permission of the Department.

Lectures three hours a week, tutorial or seminar one hour a week.

PHYS 3308 [0.5 credit] Electromagnetism

Electrostatics feld and magnetostatics in the presence of matter. Solving Laplace's and Poisson's equations. Multipole expansions. Vector potential. Faraday's laws of induction; Maxwell's equations in matter. Waves in vacuum and dielectric media, guided waves. Precludes additional credit for ELEC 3909. Prerequisite(s): PHYS 2305, MATH 2004 or MATH 2008,

and MATH 3705, or permission of the Department. Lectures three hours a week.

PHYS 3402 [0.5 credit] **Heat and Thermodynamics**

Zeroth, First, Second and Third Laws of Thermodynamics; enthalpy, Helmholtz and Gibbs functions and the Maxwell relations; phase transitions; thermodynamics of magnetism; cryogenics cooling by Joule-Thompson effect, adiabatic expansion of a gas, adiabatic demagnetization, helium dilution refrigeration; black body radiation; negative temperatures. Prerequisite(s): PHYS 2101 and PHYS 2305, MATH 2007, MATH 2008, MATH 2107 and MATH 2401 or permission of the Department. Lectures three hours a week.

PHYS 3606 [0.5 credit] Modern Physics II

Elements of condensed matter physics, semiconductors, superconductivity. Elements of nuclear physics, fission, fusion, power generation. Introduction to particle physics. Ionizing radiation: production, interactions, detection. Medical physics: radiation biophysics, cancer therapy, imaging.

Includes: Experiential Learning Activity Also listed as PHYS 3608.

Prerequisite(s): PHYS 2007 and PHYS 2605, or PHYS 2604, and PHYS 3701, or permission of the Department.

Lectures three hours a week, laboratory two hours a week

PHYS 3608 [0.5 credit] Modern Applied Physics

Elements of condensed matter physics, semiconductors, superconductivity. Modern optics. Elements of nuclear physics, fission, fusion, power generation. Ionizing radiation: production, interactions, detection. Medical physics: radiation biophysics, cancer therapy, imaging. Includes: Experiential Learning Activity Also listed as PHYS 3606.

Prerequisite(s): PHYS 2007 and PHYS 2605, or PHYS 2604, and PHYS 3701, or permission of the Department.

Lectures three hours a week, laboratory three hours a week.

PHYS 3701 [0.5 credit] Elements of Quantum Mechanics

Analysis of interference experiments with waves and particles; fundamental concepts of quantum mechanics, Schrödinger equation; angular momentum, atomic beams; hydrogen atom; atomic and molecular spectroscopy; Pauli principle; simple applications in the physics of elementary particles.

Precludes additional credit for PHYS 3705.

Prerequisite(s): PHYS 2605 or PHYS 2604, MATH 2000

[1.0] (may be taken concurrently), or MATH 2004 or

MATH 2008, and MATH 3705 (may be taken concurrently),
or permission of the Department.

Lectures three hours a week.

PHYS 3705 [0.5 credit] Introduction to Quantum Systems

This course is aimed at Computer Science and other students interested in developing a foundational understanding of quantum systems. Topics include: postulates of quantum mechanics, Hilbert space and observables, qubits, 2 state systems, entanglement, Schrodinger equation, 1D potentials, tunnelling, EPR paradox.

Precludes additional credit for PHYS 3701.

Prerequisite(s): (MATH 1004 or MATH 1007) and (MATH 1104 or MATH 1107).

Lectures three hours a week

PHYS 3801 [0.5 credit] Classical Mechanics

Introduction to Lagrangian and Hamiltonian mechanics: Poisson brackets, tensors and dyadics; rigid body rotations: introductory fluid mechanics coupled systems and normal coordinates; relativistic dynamics.

Prerequisite(s): PHYS 2101, PHYS 2202, PHYS 2305, MATH 2007, MATH 2008, MATH 2107, MATH 2401 or permission of the Department.

Lectures three hours a week.

PHYS 3802 [0.5 credit] Advanced Dynamics

Equations of motion for a single particle. Oscillatory Motion. Lagrangian and Hamiltonian formulations of mechanics. Central force motion. Motion of systems of particles and of rigid bodies.

Prerequisite(s): PHYS 2305 and MATH 2004, or permission of the Department. Lectures three hours a week.

PHYS 3807 [0.5 credit] Mathematical Physics I

Boundary Value problems involving curvilinear coordinates; spherical harmonics, Bessel functions, Green's functions. Functions of a complex variable: analytic functions, contour integration, residue calculus. Precludes additional credit for MATH 3007 or MATH 3057. Prerequisite(s): ELEC 2501 or PHYS 2305, MATH 2004, MATH 3705 or permission of the Department. Lectures three hours a week, tutorial one hour a week.

PHYS 3808 [0.5 credit] Mathematical Physics II

Solution of second-order total differential equations by Frobenius' method. Sturm-Liouville theory. Special functions: Legendre, Bessel. Hermite, Laguerre and associated functions. Partial differential equations: method of separation of variables, eigenfunctions and eigenvalues and eigenfunction expansions. Green's function techniques for solving inhomogeneous partial differential equations.

Precludes additional credit for MATH 3004, MATH 3008, MATH 3705, and PHYS 3806.

Prerequisite(s): PHYS 3807 or MATH 3007 or permission of the Department.

Lectures three hours a week.

PHYS 3999 [0.0 credit] Co-operative Work Term Report

Provides practical experience for students enrolled in the Co-operative option. Students must receive satisfactory evaluations from their work term employer. Written and oral reports will be required. Graded as Sat or Uns. Includes: Experiential Learning Activity

Prerequisite(s): registration in the Physics Co-operative education option and permission of the Department.

PHYS 4007 [0.5 credit]

Fourth-Year Physics Laboratory: Selected Experiments and Seminars

Students complete a small number of experiments selected from modern optics, holography, atomic physics, nuclear spectroscopy, radiation, etc. An exercise on literature searches and student seminars on experimental and numerical methods are included.

Includes: Experiential Learning Activity
Prerequisite(s): PHYS 3606 (or PHYS 3608) and
registration in the Engineering Physics program.
Laboratory, six hours a week.

PHYS 4008 [0.5 credit] Fourth-Year Physics Laboratory: Selected Experiments and Workshop

Students complete a small number of experiments selected from modern optics, holography, atomic physics, nuclear spectroscopy, radiation, etc. Instruction on instrumentation building techniques will be given. Includes: Experiential Learning Activity Prerequisite(s): PHYS 3007.

Six hours a week.

PHYS 4201 [0.5 credit]

Astrophysics

Stellar evolution, including stellar modeling, main sequence stars, red giants and the end states of stars such as neutron stars and black holes. Galactic structure and dynamics. Neutrino astrophysics.

Prerequisite(s): PHYS 3701, PHYS 3606 or PHYS 3608, and PHYS 2401 or PHYS 4409, or permission of the Department. (PHYS 3606 or PHYS 3608 and PHYS 4409 may be taken concurrently).

Also offered at the graduate level, with different requirements, as PHYS 5401, for which additional credit is precluded.

Lectures three hours a week.

PHYS 4202 [0.5 credit] Cosmology

Observational evidence for the Big Bang. Cosmological space-time, expansion dynamics and contents of the universe. Physical processes in the expanding universe, inflation, nucleosynthesis, the cosmic microwave background, dark matter, and dark energy. Prerequisite(s): PHYS 3701, PHYS 3606 or PHYS 3608, and PHYS 2401 or PHYS 4409, or permission of the Department. (PHYS 3606 or PHYS 3608 and PHYS 4409 may be taken concurrently).

Also offered at the graduate level, with different requirements, as PHYS 5402, for which additional credit is precluded.

Lectures three hours per week.

PHYS 4203 [0.5 credit]

Physical Applications of Fourier Analysis

Fourier transform, convolution. Sampling theorem. Applications to imaging: descriptors of spatial resolution, filtering. Correlation, noise power. Discrete Fourier transform, FFT. Filtering of noisy signals. Image reconstruction in computed tomography and magnetic resonance. Laplace transform. Integral transforms, application to boundary value problems. Prerequisite(s): MATH 3705, or permission of the

Department.

Also offered at the graduate level, with different requirements, as PHYS 5313, for which additional credit is precluded.

PHYS 4208 [0.5 credit] Modern Optics

Electromagnetic wave propagation; reflection, refraction; Gaussian beams, guided waves. Laser theory: stimulated emission, cavity optics, modes, gain and bandwidth; atomic and molecular lasers. Mode locking, Q switching. Diffraction theory, coherence, Fourier optics, holography, laser applications. Optical communication systems, nonlinear effects: devices, fibre sensors, integrated optics. Prerequisite(s): PHYS 2212 or PHYS 2202, PHYS 3606 (or PHYS 3608), and PHYS 3308 or permission of the Department.

Also offered at the graduate level, with different requirements, as PHYS 5318, for which additional credit is precluded.

Lectures three hours a week.

PHYS 4307 [0.5 credit] Electromagnetic Radiation

Electromagnetic wave propagation in a vacuum, dielectrics, conductors, and ionized gases, reflection, refraction, polarization at the plane boundary between two media; waveguide and transmission line propagation; dipole and quadrupole radiation fields; antenna systems. Electromagnetic mass, radiation pressure. Tensor notation, transformation of the electromagnetic fields. Prerequisite(s): PHYS 3308, PHYS 3801, PHYS 3807 and PHYS 3808 (except for Mathematics and Physics Double Honours students), or permission of the Department. Lectures three hours a week.

PHYS 4407 [0.5 credit] Statistical Physics

Equilibrium statistical mechanics and its relation to thermodynamics. Maxwell-Boltzmann, Bose-Einstein and Fermi-Dirac statistics are derived, and applied in appropriate physical situations. Fluctuations. Kinetics and transport processes, including the Boltzmann transport equation and some of its applications.

Prerequisite(s): PHYS 3402, PHYS 2602 or PHYS 3601, PHYS 3701 or PHYS 3602, PHYS 4707 (may be taken concurrently); or permission of the Department. Lectures three hours a week.

PHYS 4409 [0.5 credit]

Thermodynamics and Statistical Physics

The three Laws of Thermodynamics, enthalpy, Helmholtz and Gibbs functions. Equilibrium statistical mechanics and its relation to thermodynamics. Maxwell-Boltzmann, Bose-Einstein and Fermi-Dirac statistics.

Precludes additional credit for PHYS 3402 and PHYS 4407.

Prerequisite(s): PHYS 3701 (may be taken concurrently), MATH 2004 and MATH 3705, or permission of the Department.

PHYS 4508 [0.5 credit] Solid State Physics

An introduction to solid state physics. Topics include crystal structure, phonons and lattice vibrations, conductors, semiconductors, insulators and superconductivity.

Prerequisite(s): PHYS 3606 or PHYS 3608, and PHYS 3701, or permission of the Department. Lectures three hours a week.

PHYS 4602 [0.5 credit]

Physics of Elementary Particles

Standard Model. Properties of leptons, quarks, hadrons. Fundamental interactions: photon, gluons, W/Z bosons. Higgs boson. Conservation laws, invariance principles, quantum numbers. Decay rates and scattering cross-sections. Quantum electrodynamics and chromodynamics. Resonances. Weak interactions, CKM matrix, parity and CP violation. Neutrino masses and oscillations. Future directions.

Prerequisite(s): PHYS 4707 or permission of the Department.

Also offered at the graduate level, with different requirements, as PHYS 5602, for which additional credit is precluded.

Lectures three hours a week.

PHYS 4608 [0.5 credit] Nuclear Physics

Ground state properties of nuclei. Nuclear models, binding energy, properties of excited nuclei. Alpha, beta and gamma decay. Passage of radiation through matter, detectors. Nuclear reactions, cross sections, fission, fusion. Elements of neutron physics.

Prerequisite(s): PHYS 3606 or PHYS 3608 or permission of the Department.

Lectures three hours a week.

PHYS 4707 [0.5 credit]

Introduction to Quantum Mechanics I

The basic interpretative postulates of quantum mechanics; applications of wave mechanics and operator methods to various quantum mechanical systems; quantum mechanical treatment of angular momentum. Prerequisite(s): PHYS 3701 and PHYS 3807 or equivalent, or permission of the Department.

Lectures three hours a week.

PHYS 4708 [0.5 credit]

Introduction to Quantum Mechanics II

Scattering theory and application; bound state problems; approximation methods.

Prerequisite(s): PHYS 4707 or permission of the Department.

PHYS 4804 [0.5 credit]

Introduction to General Relativity

Special relativity using tensor analysis. Curved spacetime with physics applications which may include the solar system, stars, black holes and gravitational waves. Introduction to differential geometry and Einstein's field equations.

Prerequisite(s): PHYS 3802 or equivalent, or permission of the Department.

Also offered at the graduate level, with different requirements, as PHYS 5804, for which additional credit is precluded.

Lectures three hours a week.

PHYS 4807 [0.5 credit]

Statistical Data Analysis Techniques for Physics

Computational methods used in analysis of experimental data. Introduction to probability and random variables. Monte Carlo methods for simulation of random processes. Statistical methods for parameter estimation and hypothesis tests. Confidence intervals. Multivariate data classification. Unfolding methods. Examples primarily from particle and medical physics.

Prerequisite(s): third year standing in a physics program and an ability to program in Python, Java, C or C++, and permission of the Department.

Also offered at the graduate level, with different requirements, as PHYS 5002, for which additional credit is precluded.

Lectures three hours a week.

PHYS 4901 [0.5 credit] Special Topics in Physics

Each year, at the direction of the Department, a course on a special topic may be offered.

Prerequisite(s): permission of the Department.

PHYS 4907 [0.5 credit] Fourth-Year Project

Advanced projects of an experimental or theoretical nature with an orientation towards research. A written midterm progress report is required and also a written and oral report at the conclusion of the project.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in an Honours Physics program or equivalent, and permission of the Department.

Project. Fall term only.

PHYS 4908 [0.5 credit] Fourth-Year Project

Advanced projects of an experimental or theoretical nature with an orientation towards research. A written midterm progress report is required and also a written and oral report at the conclusion of the project.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in an Honours Physics program or equivalent, and permission of the Department.

Project. Winter term only.

PHYS 4909 [1.0 credit] Fourth-Year Project

Advanced projects of an experimental or theoretical nature with an orientation towards research. A written midterm progress report is required and also a written and oral report at the conclusion of the project.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in an Honours Physics program or equivalent, and permission of the Department.

Project

Political Science

This section presents the requirements for programs in:

- · Political Science B.A. Honours
- Political Science B.A. Combined Honours
- · Political Science B.A.
- Concentration in Canadian Politics and Public Policy
- Concentration in International Relations and World Politics
- · Concentration in Power and Political Ideas
- Specialization in Global Politics B.G.In.S. Honours
- Stream in Global Politics B.G.In.S.
- · Minor in Political Science
- Washington Center Internship Program

Program Requirements

Course Categories

The following categories of Political Science courses are used in the program descriptions:

Canadian Politics and Public Policy

	PSCI 2002 [0.5]	Canadian Politics and Society
	PSCI 2003 [0.5]	Institutions and Power in Canadian Politics
	PSCI 2401 [0.5]	Public Affairs Analysis

4000-level Seminar

All courses in the range PSCI 4003 [0.5] to PSCI 4908 [1.0]

Departmental Language Requirement

The Department of Political Science requires Honours students to demonstrate basic proficiency in at least one language other than English, normally French. Honours students are required to demonstrate such proficiency, normally through the completion of 1.0 credit at the 1000level or higher in one language offered at Carleton.

For students who consider that they already have proficiency in French, the Department of Political Science conducts a French language examination twice a year, in November and February. For students who consider themselves proficient in a second language other than French, arrangements may be made to examine the student in that language, depending on faculty resource availability. Departmental language examinations may not be repeated in case of failure. Students whose high school transcript shows the primary language of instruction to be other than English may apply to have the examination requirement waived. For students in the Canadian concentration, French must be used to satisfy the language requirement.

Political Science B.A. Honours (20.0 credits)

A Credits Included in the Major CGPA (10.0 credits)

A. Credits included in	in the Major CGPA (10.0 credits)	
1. 1.0 credit in:		1.0
PSCI 1100 [0.5] & PSCI 1200 [0.5]	Democracy in Theory and Practice Politics in the World

6. 2.0 credits at the 4 either:	1000-level which may be satisfied by	2.0
2.0 credits in 4000-	level PSCI seminars	

Total Credits	20.0
10. Departmental language requirement must be met	
C. Additional Requirements	
9. 2.0 credits in free electives	2.0
8. 8.0 credits in electives not in PSCI	8.0
B. Credits Not Included in the Major CGPA (10.0 credits)	
7. 2.0 credits in PSCI at the 3000-level or above or in IPAF 4900 (with permission of the department)	2.0
PSCI 4908 Honours Research Essay (with a grade of B- or better) [1.0] and 1.0 credit in 4000-level PSCI seminars	
or	

Notes

- 1. At least 1.0 credit in 4000-level seminars must be completed at Carleton University.
- 2. Item 5: candidates with fourth-year Honours standing in Political Science and a Major CGPA of 9.00 or better may present an Honours Research Essay PSCI 4908 [1.0] on some topic involving independent investigation; they may be examined orally on this essay and must receive a grade of B- or better in this course. PSCI 4908 [1.0] must be taken at Carleton University. Students who wish to present an Honours Research Essay must identify a faculty supervisor and require permission of the Supervisor of Undergraduate Studies. Students who do not write an Honours Research Essay are required to complete 1.0 credit in Political Science in the form of one or more 4000-level seminars.

Political Science

•			0.0
7.	2.0 credits in free	electives	2.0
To	otal Credits		15.0

Concentrations

The concentrations described below are open to all students in Political Science programs. The maximum number of Political Science credits that can be counted towards the degree is 12.0 credits for the Political Science B.A. Honours program, 8.0 for the Political Science B.A. program and 9.0 for the Political Science B.A. Combined Honours program. Concentrations are open to students in the Political Science B.A. program, though it may be difficult to meet the requirements of the Concentrations within the 15.0 credits required for the degree, so that courses extra to the primary degree may have to be taken.

Minor in Political Science (4.0 credits)

The Minor in Political Science is not available to students enrolled in the B.A. Honours programs in Global Politics or the B.G.In.S. Specialization or Stream in Global Politics.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Political Science.

Requirements:

Washington Center Internship Program (2.5 credits)

The Washington Center Internship Program is open to Honours or Combined Honours Political Science students in the third year or the first term of fourth year. Admission is open to students with at least a 9.5 GPA in Political Science. Successful completion of the program satisfies the requirements for one term of full-time study (2.5 credits). Students spend one term (fall, winter or summer) in Washington D.C. They serve four days a week as an intern in Washington D.C. and also take two seminar courses offered by faculty of The Washington Center. The normal 2.5 credit course load for participants in the programme is:

Total Credits		2.5
PSCI 4906 [0.5]	Washington Center Seminar II	0.5
PSCI 4905 [0.5]	Washington Center Seminar I	0.5
PSCI 3905 [1.5]	Washington Center Internship	1.5

Full information on the program and application forms can be obtained from the Department of Political Science.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits,

which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS,

ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option,

please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position:
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team:
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours Political Science: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to the following:

- 1. Registered as a full-time student in the B.A. Honours Political Science program;
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 9.00. This CGPA must be maintained throughout the duration of the degree.

B.A. Honours Political Science students must successfully complete three (3) work terms to obtain the Co-op Designation.

Co-op Work Term course: PSCI 3999 Work/Study Pattern:

Year 1		Year 2		Year 3		Year 4		Year 5

Winter	S	Winter	S	Winter	S	Winter	W	Winter	
Summer		Summer	W	Summer	W	Summer	S		

Legend S: Study W: Work

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Direct Admission to the First Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European, Russian, and Eurasian Studies, French, Geography, Geography with a Concentration in Physical Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above:
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Political Science (PSCI) Courses

PSCI 1100 [0.5 credit]

Democracy in Theory and Practice

Introduction to modern political ideas such as liberty, equality, the rule of law, representation, participation (including gender aspects), the impact of these ideas on political and policy making institutions in Canada; other countries may be examined. Basic research and academic writing skills.

Precludes additional credit for PSCI 1000 (no longer offered), PSCI 1001 (no longer offered), and PSCI 1003 (no longer offered).

Lectures two hours a week, tutorials one hour a week.

PSCI 1200 [0.5 credit] Politics in the World

Compares politics in selected states and world regions, including political institutions and cultures, development, public policy making, and gender. Global issues and international relations among states, international organizations, and other actors. Basic research and academic writing skills.

Precludes additional credit for PSCI 1000 (no longer offered), PSCI 1002, GPOL 1000 (no longer offered) and GPOL 1500 (no longer offered).

Lectures two hours a week, tutorials one hour a week.

PSCI 1500 [0.5 credit] Technology, Nature, Power

Social media, self-driving cars, genetic manipulation: technology is transforming both the human experience and the natural world. This course explores interactions among technological change, the evolution of social and political order, and the transformation of the environment (for example, with climate change).

Lectures two hours a week.

PSCI 1501 [0.5 credit] **Politics of Migration**

Introduction to concepts and theories that help explain the complex phenomenon of human migration, including the social and political relevance of different types of migration to Canada and in other regions and the political responses to migration and mobility today.

Lectures two hours a week, tutorials one hour a week.

PSCI 2002 [0.5 credit] Canadian Politics and Society

An examination of the cultural, social, and economic context of Canadian politics, including interest groups and social movements, regionalism, language, ethnicity, and gender.

Prerequisite(s): second-year standing. Lectures two hours a week, tutorials one hour a week.

PSCI 2003 [0.5 credit]

Institutions and Power in Canadian Politics

An examination of Canadian political institutions, including federalism, Parliament, the constitution, political parties and the electoral system.

Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2101 [0.5 credit]

Comparative Politics of the Global North

Domestic politics in states of the Global North. Comparison of political and economic regimes, political institutions, actors, political processes and cultures, and patterns of public policy making.

Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2102 [0.5 credit]

Comparative Politics of the Global South

Introduction to domestic politics in post-colonial and developing states of the Global South. Topics may include nationalism, authoritarianism, economic development, revolution, democratization, and the politics of gender, religion, and ethnicity.

Includes: Experiential Learning Activity Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2200 [0.5 credit] Introduction to U.S. Politics

An examination of several important aspects of the U.S. political system, including separation of powers, checks and balances, and federalism.

Includes: Experiential Learning Activity Prerequisite(s): second-year standing.

Lectures two hours a week, tutorial one hour a week.

PSCI 2301 [0.5 credit] History of Political Thought I

Study of the foundations of democracy, law, and political regimes, within a broader reflection on virtue and the good life in Western classical political thought. Course may include texts by Sophocles, Thucydides, Plato, Aristotle, Augustine, Aquinas, de Pizan, and others.

Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2302 [0.5 credit] History of Political Thought II

Study of the emergence, transformations, uses, and meanings of modern political concepts such as liberty, legitimacy, equality, rights, sovereignty, authority, and the state through the interpretation of Western political thinkers such as Machiavelli, Hobbes, Locke, Rousseau, Hume, Wollstonecraft, Marx, Mill and others. Prerequisite(s): PSCI 2301 or permission of the department.

Lectures two hours a week, tutorials one hour a week.

PSCI 2401 [0.5 credit] Public Affairs Analysis

Introduction to central concepts and processes involved in public affairs. Exploration of public issues, policy approaches and decision-making structures using theoretical, empirical and applied approaches. Precludes additional credit for PSCI 2400 (no longer offered).

Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2500 [0.5 credit] Gender and Politics

Introduction to gender and politics of diversity, including how feminist activism and organizing finds expression in the political process and structures of representation such as political parties, legislatures and the state.

Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2601 [0.5 credit]

International Relations: Global Politics

Introduction to theories, concepts and issues in global politics. Topics may include conflict and intervention, peace and security, international institutions, norms and ethics, human rights, gender, culture, and globalization. Precludes additional credit for GPOL 1000 (no longer offered), GPOL 1500 (no longer offered). Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2602 [0.5 credit]

International Relations: Global Political Economy

Introduction to the international political economy. Topics may include contemporary changes in the global political economy, multinational corporations, foreign economic policy, global and regional economic institutions, environmental issues, international development and relations between rich and poor countries.

Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2701 [0.5 credit]

How to Do Research in Political Science

This course focuses on key elements of the research process, including how to ask questions and find answers using ethically informed research design. Students learn to develop a research proposal, and how to critically analyze and write evidence-informed arguments.

Prerequisite(s): second-year standing.

Lectures two hours a week, tutorials one hour a week.

PSCI 2702 [0.5 credit]

A Statistical Toolkit for Political Scientists

The interpretation and application of statistical techniques for data analysis in the study of politics.

Includes: Experiential Learning Activity

Precludes additional credit for ENST 2006, GEOG 2006. Prerequisite(s): PSCI 2701 or permission of the

Department.

Lectures two hours a week, tutorials one hour a week.

PSCI 3004 [0.5 credit]

Political Parties and Elections in Canada

The evolution of the party system, the growth of major and minor party movements and the electoral process in Canada.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3005 [0.5 credit]

Ontario Government and Politics

A survey of the political process and political institutions in Ontario.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3006 [0.5 credit]

Social Power in Canadian Politics

The role of social forces in the Canadian political process, including interest groups, social movements, elites and classes.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3007 [0.5 credit] Constitutional Politics in Canada

The politics of the Canadian constitution. Particular attention to historical and contemporary constitutional reform.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3013 [0.5 credit]

Indigenous Politics of Turtle Island

Indigenous lived experience in North America, understanding that Indigenous people are active political agents influencing policies and narratives. The course is organized around case studies focused on the social determinants of health, such as income, housing, and social inclusion.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3100 [0.5 credit]

Politics of Development in Africa

The historical background of African independence, and contemporary struggle for democracy and economic development in Africa.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3101 [0.5 credit]

Conflict and Security in Africa

African conflict and security dynamics, analyzing civil war, communal disputes, and political violence. Topics include state fragility, climate change's impact, human rights, gender dimensions in peacebuilding, along with regional and international responses to conflict and insecurity. Prerequisite(s): third-year standing.

Lectures three hours a week.

PSCI 3102 [0.5 credit] Politics of Development of China

The evolving structures and processes of government in (greater) China with particular emphasis on politics in the People's Republic of China and secondary emphasis on

Taiwan and Hong Kong.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3103 [0.5 credit]

State, Society and Economy in Northeast Asia

The relationship between government structures, society and the economy in Northeast Asia with particular emphasis on Japan and Korea.

Prerequisite(s): third-year standing.

Lectures three hours a week.

PSCI 3104 [1.0 credit] Politics in Cent/Eastern Euro

PSCI 3105 [0.5 credit]

Imperialism and Decolonization

Ideologies and practices of European/Western efforts to control Asia, Africa, and Latin America and resistance to them. Topics include the complexities of imperial control and colonial relationships, race and racism, economic impacts, and decolonization.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3107 [0.5 credit]

The Causes of War

Alternate theories of the causes of war. Such alternate perspectives as biological, social and comparative historical approaches, including the results of peace research activities of the past two decades.

Prerequisite(s): Third-year standing and PSCI 2601.

Lectures three hours a week.

PSCI 3108 [0.5 credit] Politics of Popular Culture

Examines political themes in popular culture. Cultural media may include film, literature, television, music, cartoons/comics, and the news media. Political themes may include war, ethnicity, nationalism, revolution, citizenship, gender and sexuality.

Prerequisite(s): third-year standing.

Lectures three hours a week.

PSCI 3109 [0.5 credit]

The Politics of Law and Morality

Politics of moral regulation in Canada, the United States and other jurisdictions. The treatment in law and public policy of such human rights issues as: capital punishment, sexual orientation, euthanasia, abortion, new reproductive technologies, racial discrimination, religious and equality rights.

Prerequisite(s): third-year standing and one of PSCI 2002, PSCI 2003 or PSCI 2101.

Lectures three hours a week.

PSCI 3110 [0.5 credit] China in the Global South

China's role in the Global South, analyzing its impact in Africa, the Middle East, Asia, and Latin America through theoretically nuanced and empirically informed comparative analyses as well as the role of local and global responses.

Prerequisite(s): Third-year standing. Lectures three hours a week.

PSCI 3200 [0.5 credit] U.S. Constitutional Politics

The central role played by the U.S. Constitution in the country's political life, from the Framers to current controversies. Includes issues of race, class and gender. Includes: Experiential Learning Activity Prerequisite(s): third-year standing.

Lectures three hours a week.

PSCI 3203 [0.5 credit]

Government and Politics in the Middle East

The evolution and functioning of political systems in the Middle East region, with emphasis on the problems of political stability, the impact of the West, the role of Islam, and war and peace.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3204 [0.5 credit] Politics of Latin America

An overview of the evolution of Latin American political systems, including the impact of the European conquest, democratization, economic liberalization, state-civil society relations, gender politics, revolutionary movements, and relations with the United States.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3205 [0.5 credit] Mexican Politics

An introduction to the politics, society and economy of Mexico. Topics include processes of democratization and economic liberalization, human rights, the environment, the role of women, labour, and indigenous peoples, and social policy. Special emphasis on Mexico's role in the North American political economy.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing.
Lectures three hours a week.

PSCI 3206 [0.5 credit] European Democracies

A comparative examination of select controversies over democracy in specific European countries, considered within the context of 20th century historical trends, as well as contemporary political debates.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3207 [0.5 credit] Politics of the European Union

The process of European integration; the European Union and its institutions; core EU policies, challenges to the integration process (e.g. democratic legitimacy, enlargement); theories of European integration. Includes: Experiential Learning Activity Prerequisite(s): third-year standing.

Lectures three hours a week.

PSCI 3208 [0.5 credit]

Politics in Russia and Ukraine: Power and Contestation

Political development in post-Soviet Russia and Ukraine, including examination of the complicated relationship between the two states. Historical perspectives, institutional context (including federalism) and comparative insights.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3209 [0.5 credit]

Reconstruction and Transformation in Europe and Eurasia

The politics of dramatic political changes, such as revolution, secession, constitutional revision, and systemic reform. The course will include selected historical and comparative cases from Central and Eastern Europe and the former Soviet Union.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3210 [0.5 credit] Electoral Politics in the U.S.

An overview of specific aspects of U.S. electoral politics, including presidential and congressional elections, incumbency, the two-party system, campaign spending limits, the role of the media, and voter turnout. Includes: Experiential Learning Activity Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3300 [0.5 credit] Politics and Literature

A study of imaginative prose in which political ideas and/or political settings dominate. Literature as political communication, the impact of literature upon politics, the peculiar value of literature in the study of politics and its shortcomings.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3303 [0.5 credit] Feminist Political Theory

Introduction to feminist philosophical responses to sexism, taking into consideration the different waves of feminist discourse. Topics may include the concept of gender; women's diversity and its implications; 'intersectionality'; gender, capitalism and the family; and new approaches to feminist knowledge and feminist agency.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3307 [0.5 credit] Politics of Human Rights

Politics of human rights in its historical and cultural context, including: early liberal theories of natural rights; utilitarian and Marxist critiques; contemporary rights debates; different generations of rights; feminism and women's rights; cultural relativism; state sovereignty; and, problems of implementation and enforcement.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3309 [0.5 credit] Modern Ideologies

A survey of ideologies, mainly since 1900, including some of nationalism, utopian socialism, communism, fascism, populism, environmentalism and feminism.

Prerequisite(s): third-year standing.

Lectures three hours a week.

PSCI 3310 [0.5 credit] Global Indigenous Politics

An overview of regional and international Indigenous politics with case studies from the Americas, Europe, Asia, the Pacific; Africa. Topics include colonization, state formation, decolonial and postcolonial theories, Indigenous movements, the role of the United Nations, land rights, environment, self-determination, development, gender, and sexuality.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3311 [0.5 credit] History of Muslim Political Thought

A survey of political thought among Muslims, tracing the emergence and influence of juridical, philosophical and administrative approaches to politics on Muslim civilization.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3312 [0.5 credit]

Enlightenment Political Thought

Major Enlightenment thinkers and major themes of Enlightenment political thought. Topics may include reason, religion, toleration, liberty, equality, the foundations of political authority, autonomy, morals, taste, progress, history or commerce.

Prerequisite(s): third-year standing. Lecture three hours a week.

PSCI 3313 [0.5 credit]

Contemporary Approaches to Political Inquiry

Overview of debates around fundamental concepts in the social sciences and how theorists have understood them. Introduction to different paradigms and approaches, which may include positivism, Weberian ideal types, naturalism, pragmatism, social realism, critical rationalism, genealogy, structuralism, phenomenology, hermeneutics, deconstruction, and discourse analysis.

Precludes additional credit for PSCI 4308 (no longer offered), PSCI 4309 (no longer offered).

Prerequisite(s): third-year standing and (PSCI 2301 and PSCI 2302), or permission of the Department.

Lecture three hours a week

PSCI 3402 [0.5 credit] Canadian Public Policy

Policy communities and policy networks in Canada with particular attention paid to policy issues, the political environment, policy instruments, impact and outcomes. Includes: Experiential Learning Activity
Prerequisite(s): third-year standing and one of PSCI 2002.

PSCI 2003, PSCI 2401, or PAPM 2000 (no longer offered).

Lectures three hours a week.

PSCI 3405 [0.5 credit] Comparative Public Policy Analysis

The formation and impact of public policy: a variety of political systems as well as a variety of policy areas. Emphasis on developing skills for the analysis of policy formation and impact.

Prerequisite(s): Third-year standing and one of PSCI 2101, PSCI 2401, or PAPM 2001 and PAPM 2002. Lectures three hours a week.

PSCI 3406 [0.5 credit] Public Affairs and Media Strategies

The public affairs and issue management strategies of corporations, government departments, and other institutions in Canada from a comparative perspective. Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3407 [0.5 credit] Public Opinion and Public Policy

Theories about the origins and dynamics of public opinion, the ways in which public opinion influences government policy and decision-making, and how decision-makers are able to shape public opinion. Prerequisite(s): PSCI 2701 and PSCI 2702. Lectures three hours a week.

PSCI 3410 [0.5 credit]

Introduction to Political Management

Introduction to the field of political management. The institutional, legislative and ethical context in which party strategists, campaign managers, pollsters, lobbyists and civil society operate. Related administrative and communications skills.

Also listed as POLM 3000 and COMS 3100. Prerequisite(s): third-year standing. Lecture three hours a week.

PSCI 3411 [0.5 credit]

Data Analysis for Governance: Formal Approaches and Practical Realities

Finding and using data to make, manage and evaluate public policy. Emphasis is on developing data analysis skills, and using and applying substantive theories by working on projects with real-world applications.

Includes: Experiential Learning Activity
Prerequisite(s): PSCI 2701 and PSCI 2702.

Lectures, discussions, presentations; three hours a week.

PSCI 3502 [0.5 credit]

Gender and Politics: Global South

A contemporary approach to the role of gender in political systems of the South. Topics may include gender and development, human rights, social policies, globalization, state-civil society relations, political participation and citizenship.

Prerequisite(s): Third-year standing. Lectures three hours a week.

PSCI 3600 [0.5 credit] International Institutions

Origins, structure and functioning of international institutions with emphasis on the United Nations as well as regional organizations. Topics include peace and security, international aid and development, human rights and the control of global resources.

Prerequisite(s): Third-year standing and one of PSCI 2601 or PSCI 2602.

Lectures three hours a week.

PSCI 3601 [0.5 credit]

Theories of International Politics

Examination of the major theoretical approaches to the study of international politics. Topics may include realism, liberalism, Marxism, constructivism, feminism, and poststructuralism.

Prerequisite(s): Third-year standing and PSCI 2601. Lectures three hours a week.

PSCI 3603 [0.5 credit]

Strategic Thought and International Security

The ideas of classical and contemporary strategic thinkers. International security issues and concepts. Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3606 [0.5 credit] Canadian Foreign Policy

The traditions, domestic influences, objectives, capabilities, and decision-making processes, and analysis of selected contemporary issues.

Prerequisite(s): Third-year standing and one of PSCI 2002, PSCI 2003, PSCI 2601 or PSCI 2602. Lectures three hours a week.

PSCI 3607 [0.5 credit]

Canadian Defence Policy at Home and Abroad

Canadian defence policy as it pertains to Canada, North America, NORAD, the Arctic, NATO/Europe, and the Indo-Pacific.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3608 [0.5 credit] Migration Governance

Advanced introduction to the politics of human mobility and migration, including attempts by states and other actors to influence migration and mobility and emerging types of governance at the national, regional and global levels.

Prerequisite(s): third-year standing or permission of the Department.

Lecture three hours a week.

PSCI 3609 [0.5 credit] Global Politics of Food

Drawing on theories of international relations, political economy, and public policy-making, this course examines the global, national and local politics of food production and distribution. Topics include food security, free trade versus fair trade, the environmental sustainability of food systems, food sovereignty and food aid.

Prerequisite(s): third-year standing or permission of the Department.

Lecture three hours a week.

PSCI 3700 [0.5 credit]

Government and Politics of South Asia

Patterns of colonialism, evolving political regimes and issues in development and foreign policy in the countries of South Asia, including India, Pakistan, Bangladesh, Sri Lanka, and other member states of SAARC.

Prerequisite(s): Third-year standing. Lectures three hours a week.

PSCI 3702 [0.5 credit]

The Politics of Israel/Palestine

Contested dynamics in and regarding Israel and Palestine, including the development of Zionism, the Nakba, diaspora identities, human rights activism, and debates over analytical frameworks such as settler colonialism, competing nationalisms, and apartheid. Includes: Experiential Learning Activity Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3703 [0.5 credit] Governing in the Global Economy

The main approaches and policy issues in the political economy of advanced industrialized states. The relationship between state and market and the ways in which national states have responded to the pressures of governing in an increasingly interdependent global economy.

Prerequisite(s): Third-year standing and PSCI 2602. Lectures three hours a week.

PSCI 3801 [0.5 credit] Environmental Politics

Environmental issues in contemporary political argument. Topics include: environmental movements and green parties, environmental ethics and animal rights, economic approaches to environmental management, the politics of sustainable development, and the international politics of the environment.

Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3802 [0.5 credit] Globalization and Human Rights

An examination of the various dimensions and meanings of globalization and its relationship with human rights. The main emphasis will be on the implications of the emerging global economy for economic, social, political and cultural rights.

Also listed as SOCI 3027, ANTH 3027.

Prerequisite(s): Third-year standing and one of: PSCI 2601, PSCI 2602, LAWS 2105, PHIL 2103 or (ANTH 1001 and ANTH 1002), or (SOCI 1001 and SOCI 1002).

Lectures three hours a week.

PSCI 3805 [0.5 credit] Politics of Race

The meaning, sources and practice of racialism, as well as efforts to combat it, in a comparative context. Case studies will include South Africa, the United States, and Canada.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing. Lectures three hours a week.

PSCI 3809 [0.5 credit]

Selected Topics in Political Science

A lecture course on a selected contemporary topic in Political Science. Topic may vary from year to year and will be announced in advance of the registration period by the Department of Political Science. Prerequisite(s): third-year standing.

Lectures three hours a week.

PSCI 3905 [1.5 credit] **Washington Center Internship**

One-term internship at The Washington Center in D.C.; options in American politics, international affairs, and other areas. Evaluation by Washington Center faculty, but governed by Carleton University Political Science Department regulations. Graded Sat or Uns. Includes: Experiential Learning Activity Prerequisite(s): selection to The Washington Center Internship Program and one of PSCI 2200, PSCI 3200, or PSCI 3210 and permission of the department.

PSCI 3906 [1.0 credit]

Ottawa Experience Placement, Two Terms

The student placement provides an opportunity to work with an organization whose focus relates to politics over a full academic year. Students complete career-related assignments, maintain a placement log and complete a research paper related to their placement. Includes: Experiential Learning Activity Precludes additional credit for GPOL 3100 (no longer offered), PSCI 3907, the Washington Internship. Prerequisite(s): Third-year Honours standing with a minimum Political Science CGPA of 9.0 or permission of

Placement, three hours a week

PSCI 3907 [0.5 credit]

the Department.

Ottawa Experience Placement, One Term

The student placement provides an opportunity to work with an organization whose focus relates to politics over one academic term. Students complete a career-related assignment, maintain a placement log and complete a research paper related to their placement. Includes: Experiential Learning Activity

Precludes additional credit for GPOL 3100 (no longer offered), PSCI 3906, the Washington Internship. Prerequisite(s): third-year Honours standing with a minimum Political Science CGPA of 9.0 or permission of the Department.

Placement, 3 hours a week.

PSCI 3908 [0.5 credit]

Summer Field Research Course

Field course outside of the Ottawa region, potentially outside Canada, with opportunities for research and/or community engagement. A supplementary charge may apply.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing in Political Science or GPOL, or permission of the Department.

PSCI 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

PSCI 4003 [0.5 credit] Politics and the Media

The role of the mass media in the Canadian political system from a comparative perspective. Prerequisite(s): fourth-year Honours standing or permission of the Department. Seminar three hours a week.

PSCI 4004 [0.5 credit] **Sport and Politics**

A seminar on the relationship between sport and politics, topics covered may include: Canadian sport policy and public administration; sport and social inclusion with a focus on sex, gender, Indigeneity, race, and class; sport and nation-building; sport and social-protest; and, sport and international relations.

Prerequisite(s): fourth-year Honours standing or permission of the department. Seminar three hours a week.

PSCI 4005 [0.5 credit] Canadian Federalism

The evolution and contemporary operation of the Canadian federal system; the social, political, economic, and structural features underlying its operational performance, resilience in crisis, and potential for adaptation.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2003 or

Also offered at the graduate level, with different requirements, as PSCI 5101., for which additional credit is precluded.

Seminar three hours a week.

PSCI 4006 [0.5 credit]

Legislatures and Representation in Canada

The role of Parliament and of the individual M.P. in terms of policy making, party discipline, and differing conceptions of representation.

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Also offered at the graduate level, with different requirements, as PSCI 5006, for which additional credit is precluded.

Seminar three hours per week.

PSCI 4008 [0.5 credit]

National Security and Intelligence in the Modern State

The state's response to foreign espionage, alleged subversion, terrorism, and counterintelligence. Major focus on the Canadian experience, but with extensive use of materials chronicling the practices of KGB, CIA, BIS, ASIO, MOSSAD, etc.

Prerequisite(s): fourth-year Honours standing or permission of the Department.
Seminar three hours a week.

PSCI 4009 [0.5 credit] Quebec Politics

Society, culture, economy and politics in Quebec. Special attention to the politically relevant changes since 1960 and the central place of Quebec within the Canadian federation.

Prerequisite(s): fourth-year Honours standing or permission of the Department.
Seminar three hours a week.

PSCI 4010 [0.5 credit]

Executive Power in Canadian Politics

Consideration of prime ministers, premiers, cabinet ministers and senior public service leadership in Canadian politics and government.

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Also offered at the graduate level, with different requirements, as PSCI 5010, for which additional credit is precluded.

PSCI 4103 [0.5 credit] The Modern State

A survey of recent thinking about the state in western societies drawing on perspectives such as those of feminists, Marxists, Weberians, poststructuralists and others. Topics may include: the rise of the modern state, economic governance, the public sphere, citizenship, sovereignty and territoriality.

Prerequisite(s): fourth-year Honours standing or permission of the Department.
Seminar three hours a week.

PSCI 4104 [0.5 credit]

Development in the Global South - Theory and Practice

Different theoretical approaches to the concept of development in the Global South and their relevance for selected countries in Latin America, Africa and Asia. Prerequisite(s): fourth-year Honours standing or permission of the Department.

Seminar three hours a week.

PSCI 4105 [0.5 credit]

Selected Problems in Development in the Global South

Topics may include global issues of trade, finance and production, changing patterns of foreign aid, and the role of microfinance, mining, non-governmental organizations, migration, anti-poverty programs and activism in promoting development.

Prerequisite(s): fourth-year Honours standing or permission of the Department.
Seminar three hours a week.

PSCI 4107 [0.5 credit]

Political Participation in Canada

The causes and implications of political participation by individuals with special reference to Canada. Topics include citizen participation in campaign and party organizations, political protest movements, interest groups, and community associations.

Prerequisite(s): fourth-year Honours standing or permission of the Department, and one of PSCI 2002, PSCI 2003, PSCI 2101, PSCI 2102, PSCI 2700, or (PSCI 2701 and PSCI 2702).

Seminar three hours a week.

PSCI 4109 [0.5 credit] The Politics of the Canadian Charter of Rights and Freedoms

The genesis and impact of the Charter of Rights and Freedoms. Particular emphasis on the politics of aboriginal, language, and equality rights. Prerequisite(s): fourth-year Honours standing or permission of the Department. Seminar three hours a week.

PSCI 4203 [0.5 credit]

Southern Africa After Apartheid

The pathology of apartheid, the reasons for its end, and prospects for democratization and development in Southern Africa in the era of globalization.

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Also offered at the graduate level, with different requirements, as PSCI 5203, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4204 [0.5 credit] Fighting for Votes

Election campaign dynamics and election outcomes, with emphasis on the strategies and actions of voters, parties, and candidates. Attention to concepts of representation, accountability, and legitimacy.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2003, PSCI 2101, PSCI 2102, or (PSCI 2701 and PSCI 2702). Also offered at the graduate level, with different requirements, as PSCI 5204., for which additional credit is precluded.

Seminar three hours a week.

PSCI 4206 [0.5 credit]

Indigenous Activism on Turtle Island: Take that, colonialism!

Issues of governance regarding the original peoples of Canada, Mexico and the United States since the European invasion. Contemporary movements for restoration of cultural, political, socio-economic, land and self-governance rights, emphasizing domestic and international strategies.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2002, PSCI 2003, PSCI 2101, PSCI 2102, PSCI 3013, or PSCI 3205.

Also offered at the graduate level, with different requirements, as PSCI 5100., for which additional credit is precluded.

Seminar three hours a week.

PSCI 4207 [0.5 credit]

Globalization, Adjustment and Democracy in Africa

The nature of global pressures in Africa, as states go through political and economic change.

Prerequisite(s): fourth-year Honours standing or

permission of the Department. Also offered at the graduate level, with different requirements, as PSCI 5107, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4209 [0.5 credit]

Westminster Democracies: Parliaments, Parties and Elections

Examination of party and parliamentary democracy in the five principal Anglophone parliamentary democracies: Australia, Canada, Ireland, New Zealand and the United Kingdom. Consideration is given to the effects of different electoral systems and institutional arrangements on electoral politics, political participation, and party organization.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2003, PSCI 2101, or PSCI 2102.

Seminar three hours a week.

PSCI 4210 [0.5 credit]

Political Identity through Graphic Novels

Examination of the sources and dynamics of political identity through the medium of graphic novels and graphic memoirs. Themes may include collective memory, genocide, prostitution, violent conflict, civil rights, race and ethnicity, revolution, Indigenous issues, mental health, and gender and sexuality.

Prerequisite(s): fourth year standing or permission of the Department.

Seminar three hours a week.

PSCI 4211 [0.5 credit]

Op-Ed Writing and Social Media as Political Engagement

The art and craft of political opinion writing and socialmedia engagement. An examination of contemporary online activism, interpersonal and collective online dynamics, and an imparting of the skills required for persuasive and well-researched op-ed writing. Prerequisite(s): fourth-year Honours standing or permission of the Department. Seminar three hours a week.

PSCI 4302 [0.5 credit]

Political Thought in the Modern Muslim Middle East

Contemporary secular and religious responses to the challenges of modernity. Readings include writings of Arab, Turkish, and Iranian intellectuals.

Prerequisite(s): fourth-year Honours standing or permission of the Department, and one of (PSCI 2301 and PSCI 2302) or PSCI 3311.

Also offered at the graduate level, with different requirements, as PSCI 5305, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4303 [0.5 credit]

Genealogies of Politics and Governance

Examination of Foucault's genealogical method for doing critical studies of politics and governance. Topics may include governmentality, sovereignty, biopolitics, neoliberalism, citizenship, and colonialism. Includes: Experiential Learning Activity Prerequisite(s): fourth-year Honours standing or permission of the Department. Also offered at the graduate level, with different requirements, as PSCI 5303 and SOCI 5407, for which additional credit is precluded. Seminar three hours a week.

PSCI 4311 [0.5 credit]

Political Theories of Democracy and Empire

An exploration of how ancient and modern conceptions of empire differ and how the pursuit of empire abroad can undermine good government at home.

Prerequisite(s): Fourth-year Honours standing and (PSCI 2301 and PSCI 2302), or permission of the Department.

Seminar three hours a week.

PSCI 4315 [0.5 credit] Politics and the Study of History

An exploration of the relationship between history and politics. Will examine different forms of history and historical writing, competing conceptions of how to interpret the past, and different accounts of how history is implicated in political judgment and understanding politics. Prerequisite(s): Fourth-year Honours standing.

PSCI 4316 [0.5 credit] **Contemporary Political Theory**

Examines major currents and themes in continental political thought since the early twentieth century. These may include existentialist, Critical Theory, feminist, and poststructural approaches in relation to topics, such as crises of modernity, (post-) modern reconfigurations of power, and perspectives for democracy.

Prerequisite(s): Fourth-year Honours standing and (PSCI 2301 and PSCI 2302) or permission of the Department.

Seminar three hours a week.

PSCI 4318 [0.5 credit]

Concepts of Political Community I

Critical survey of concepts of political community, including the common good, justice, citizenship, leadership, democracy, and legitimacy, from ancient, modern, and contemporary political theory. Prerequisite(s): fourth-year Honours standing or permission of the Department. Also offered at the graduate level, with different

requirements, as PSCI 5308, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4319 [0.5 credit]

Concepts of Political Community II

A continued critical survey of concepts of political community, including the common good, justice, citizenship, statesmanship, democracy, and legitimacy, from ancient, modern, and contemporary political theory. Prerequisite(s): fourth-year Honours standing or permission of the Department.

Also offered at the graduate level, with different requirements, as PSCI 5309, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4400 [0.5 credit]

Socio-Technical Change and Public Policy Design

Joint implications of contemporary science, technology and demographics for the design of public policy. The main emphasis of the course will be general patterns of change and design relating to public policy. Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Seminar three hours a week.

PSCI 4403 [0.5 credit]

Reproductive Rights Policy in North America

The interaction between social movements, legislatures and courts in formulating reproductive rights policy in Canada, the U.S. and Mexico.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Also offered at the graduate level, with different requirements, as PSCI 5407, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4404 [0.5 credit]

The Design and Evolution of Public Institutions

An examination of the emergence, development and collapse of institutional collective action in a broad historical framework, with attention to probable future scenarios for change. Readings are taken from anthropology, economics, history and empirical political theory.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing or
permission of the Department.
Seminar three hours a week.

PSCI 4407 [0.5 credit]

Public Policy: Content and Creation

The content and creation of public policy. Focus on the explanation, prediction and design of policy. Perspectives and examples are drawn from a variety of frameworks and from both Canadian and non-Canadian contexts. Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2401, PSCI 3402, PSCI 3405, PSCI 3409, or PAPM 2001 and PAPM 2002.

Seminar three hours a week.

PSCI 4408 [0.5 credit]

Public Affairs Management and Analysis

Theories and practice in the management of public affairs, including the environment and administration of the public sector, public opinion, and public communications. Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing or permission of the Department.
Seminars three hours a week.

PSCI 4500 [0.5 credit] Gender and Globalization

How globalization affects women's involvement in politics and how they organize to conceptualize and pursue gender justice in official politics; grass roots projects and cultural transformations; ideology; stand-alone movements; and mixed-sex movements like nationalism and democratization.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2101, PSCI 2102, PSCI 2601, PSCI 2602, PSCI 2500, PSCI 3500, PSCI 3502.

Seminars three hours a week.

PSCI 4501 [0.5 credit]

Politics of Identity in Europe and the Russian Area

The relationships between political transformation, identity-building, ethnicity, and gender politics in post-communist states, considered in comparison with select countries in Central and/or Western Europe.

Includes: Experiential Learning Activity

Also listed as EURR 4205.

Prerequisite(s): Fourth-year Honours standing or permission of the Department and one of PSCI 2101, PSCI 2102, PSCI 2500, PSCI 3208, PSCI 3209, PSCI 3500. PSCI 3502.

Seminar three hours a week.

PSCI 4502 [0.5 credit]

Post-Soviet States and Societies

The relationship between social forces and state structures at both the national and local levels in the USSR and the post-communist states.

Also listed as EURR 4002.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 3208, PSCI 3209.

Seminar three hours a week.

PSCI 4503 [0.5 credit] Politics of Central Eurasia

Examination of the Caucasus and Central Asia, from Chechnya to former Soviet republics of the region, Afghanistan and Chinese Turkestan. Interests of Russia, China, and the United States. Emphasis on underdevelopment, oil and gas, terrorism, Islam. Includes: Experiential Learning Activity Also listed as EURR 4207.

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Seminar three hours a week.

PSCI 4504 [0.5 credit]

Politics of the Caucasus and Caspian Basin

Examination of the South Caucasus (Azerbaijan, Georgia, Armenia), the Russian-held North Caucasus, including Chechnya, and relations with Iran. Emphasis on state and society, oil and gas, transregional communications, interests of western powers, ethnic relations.

Includes: Experiential Learning Activity

Also listed as EURR 4209.

Prerequisite(s): fourth-year Honours standing or permission of the Department.
Seminar three hours a week.

PSCI 4505 [0.5 credit]

Transitions to Democracy

A comparative analysis of processes of democratization. Diverse theoretical approaches to understanding the timing, causes, nature, and limitations of democratization. Examples from Europe and Russia, Latin America, Africa, and Asia.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2102, PSCI 3100, PSCI 3204, PSCI 3208, PSCI 3209, PSCI 3500. PSCI 3502.

Seminar three hours a week.

PSCI 4506 [0.5 credit]

Women, Power and Political Representation

An examination of women's participation in contemporary electoral politics, including as voters, legislators, and political leaders. Specific attention is given to research on intersectionality.

Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year Honours standing or
permission of the Department.
Seminar three hours a week.

PSCI 4507 [0.5 credit] The Balkans since 1989

Selected topics in Balkan politics and society since the collapse of communism in 1989, focusing on the democratic transition and the EU accession process. The legacies of communist rule, democratization and the many national questions that still exist in the region.

Also listed as EURR 4102. Prerequisite(s): fourth year Honours standing or permission of the Department.

Seminar three hours a week.

PSCI 4601 [0.5 credit]

Foreign Policies of Soviet Successor States

The foreign policies of the USSR and of Russia and selected other successor states, with special emphasis on the search for a new security order.

Also listed as EURR 4208.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2102, PSCI 2601, PSCI 2602, PSCI 3107, PSCI 3208, PSCI 3209, PSCI 3600, PSCI 3603, PSCI 3703. Seminar three hours a week.

PSCI 4603 [0.5 credit]

Analysis of International Political Economy

Various theoretical approaches to the study of the international political economy, with a focus on historical development and changing international structures. Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2602, PSCI 3600, or PSCI 3703.

Seminar three hours a week.

PSCI 4604 [0.5 credit]

Selected Problems in International Political Economy

Contemporary problems and issues in the international political economy, with particular attention given to advanced industrial countries.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2602, PSCI 3600, or PSCI 3703.

Seminar three hours a week.

PSCI 4605 [0.5 credit]

Gender in International Relations

Analysis of feminist approaches to international relations. Substantive issues include the role of women in war and militarization, the gender dimensions of global political economy and gender issues in international development. Prerequisite(s): Fourth-year Honours standing or permission of the Department and one of PSCI 2601, PSCI 2602, PSCI 3500, PSCI 3303 or PSCI 3502. Seminars three hours a week.

PSCI 4606 [0.5 credit] American Foreign Policy

The sources, trends and conflicting interpretations of the international roles of the United States since World War II. Foreign policy machinery and processes assessed in terms of the relative importance of perceptions, ideology, self-interest, and domestic and foreign pressures. Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2101, PSCI 2601, PSCI 2602, PSCI 3200, PSCI 3603, PSCI 3703.

Seminar three hours a week.

PSCI 4607 [0.5 credit] Politics of North America

A seminar examining the evolving relationship between Canada, the United States and Mexico, including political, economic, social, environmental and defence aspects. Includes: Experiential Learning Activity Precludes additional credit for PSCI 5607. Prerequisite(s): fourth-year Honours standing or permission of the Department. Seminar three hours a week.

PSCI 4608 [0.5 credit]

European Integration and European Security

A seminar focusing on issues related to the formation of supra-national decision-making structures in Europe. Includes: Experiential Learning Activity

Also listed as EURR 4104.

Prerequisite(s): fourth-year Honours standing or permission of the department.

Also offered at the graduate level, with different requirements, as PSCI 5608, and as EURR 4104/5104, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4609 [0.5 credit]

Selected Topics in European Integration Studies

A seminar focusing on selected topics related to European integration in the post-World War II period. Also listed as EURR 4106.

Prerequisite(s): fourth-year Honours standing or permission of the department. Seminar three hours a week.

PSCI 4610 [0.5 credit]

Politics of Migration Management

Seminar course that critically engages with innovative policies and instruments under the umbrella of 'migration management', and the proliferation of actors (states, international organizations. NGOs, private companies etc) involved in shaping and contributing to migration governance.

Prerequisite(s): fourth-year Honours standing or permission of the department. Seminar three hours a week.

PSCI 4611 [0.5 credit]

Africa's International Relations

Africa's international relations, analyzing interactions between states, the continent and the world, and Africa's diaspora considering history, theories, and current issues. Topics include diplomacy, security, political economy, and global governance. Includes: Experiential Learning Activity.

Includes: Experiential Learning Activity Prerequisite(s): Fourth-year Honours standing. Also offered at the graduate level, with different requirements, as PSCI 5600., for which additional credit is precluded.

Seminars three hours a week.

PSCI 4699 [0.5 credit]

Capstone Seminar in Global Politics

Advanced seminar on a topic in global or comparative politics, applying theories and knowledge gained in previous courses in the Global Politics Specialization. Prerequisite(s): fourth-year standing in BGInS Global Politics Specialization.

PSCI 4701 [0.5 credit]

Intermediate Polimetrics for Micro Data

Research designs and statistical techniques primarily used in analyzing survey data. Selected topics may vary from year to year. Students doing Honours papers based on micro data are advised to take this course. Includes: Experiential Learning Activity Prerequisite(s): PSCI 2700 or (PSCI 2701 and PSCI 2702), or permission of the Department. Also offered at the graduate level, with different requirements, as PSCI 5701, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4702 [0.5 credit]

Intermediate Research Methods for Applied Political Science

Applied methods for policy, politics and public affairs. Primarily quantitative, but may have qualitative elements. Includes: Experiential Learning Activity Prerequisite(s): PSCI 2700 or (PSCI 2701 and PSCI 2702), or permission of the Department. Also offered at the graduate level, with different requirements, as PSCI 5702, for which additional credit is precluded.

Seminar three hours a week.

PSCI 4800 [0.5 credit]

Advanced International Relations Theory

Close reading and analysis of theoretical research in the academic discipline of International Relations; may include analysis of methodology, normative and critical theory, and key theoretical concepts such as anarchy, sovereignty, power, inequality, coloniality, security, gender. Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2601. PSCI 2602, PSCI 3601. Seminar three hours a week.

PSCI 4801 [0.5 credit]

Selected Problems in Global Politics

The application of international relations theories to specific global problems, both historical and contemporary. Selected issues may focus on one or more of conflict analysis, terrorism, the environment, migration, globalization and global civil society. Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2601,

PSCI 2602, PSCI 3107, PSCI 3600, PSCI 3601, PSCI 3603, and PSCI 3703.

Seminar three hours a week.

PSCI 4803 [0.5 credit]

Foreign Policies of Major East Asian Powers

The foreign policies of the East Asian powers, with special attention to China and Japan; an analysis of the domestic sources of policy, capabilities, interests, decision-making processes and foreign relations.

Prerequisite(s): Fourth-year Honours standing or permission of the Department, and one of PSCI 2102. PSCI 2601, PSCI 2602, PSCI 3102, or PSCI 3103. Seminar three hours a week.

PSCI 4805 [0.5 credit]

Global Money Rules

An exploration of the organization of the global monetary and financial system. Issues covered include the relationship between global finance and the state, the politics of world money, and the problems associated with regulating internationally-active financial institutions. Includes: Experiential Learning Activity

Prerequisite(s): Fourth-year Honours standing and one of PSCI 2602, PSCI 3600, or PSCI 3703, or permission of the Department.

Also offered at the graduate level, with different requirements, as PSCI 5802, for which additional credit is precluded.

Seminars three hours a week.

PSCI 4806 [0.5 credit] NATO and World Order

NATO as a political and military alliance. NATO and 21st century threats. Security roles for the E.U. Broader translatlantic security issues.

Prerequisite(s): Fourth-year Honours standing and one of PSCI 2601, PSCI 3603, or PSCI 3607, or permission of the Department.

Also offered at the graduate level, with different requirements, as PSCI 5803., for which additional credit is precluded.

Seminars three hours a week.

PSCI 4807 [0.5 credit]

Politics of Citizenship and Migration

How flows of people -- migrants, temporary workers and refugees -- challenge state sovereignty, citizenship and belonging. Emphasis on role of the state, supranational structures and international organizations in migration and mobility.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing or
permission of the Department.
Seminar three hours a week.

PSCI 4808 [0.5 credit]

Global Environmental Politics

Global politics of transboundary environmental issues such as biodiversity protection, climate change and desertification. The perspectives, actors, institutions and economic relationships affecting international policy responses to these issues.

Prerequisite(s): fourth-year Honours standing or permission of the Department, and one of PSCI 2401, PSCI 2601, PSCI 2602, or PSCI 3801. Seminar three hours a week.

PSCI 4809 [0.5 credit]

Honours Seminar on a Selected Topic in Political Science

A seminar on a selected contemporary topic in Political Science. Topic may vary from year to year and will be announced in advance of the registration period by the Department of Political Science.

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Seminar three hours a week.

PSCI 4811 [0.5 credit]

International Security and Terrorism

Conventional approaches to international security; international security in the post-Cold War era; theories and debates on terrorism, its causes and types, and its impact on contemporary global security.

Prerequisite(s): fourth-year Honours standing or

permission of the Department.

Seminar three hours a week.

PSCI 4817 [0.5 credit]

International Politics of Forced Migration

The relationship between international politics and the causes, consequences and responses to forced migration, internal displacement and refugees. Seminars and case studies are used to examine the evolution of the global refugee regime and the challenges it faces today. Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing or permission of the Department.

Seminar three hours a week.

PSCI 4819 [0.5 credit]

Latin America and the World

Latin America's changing relations with states, international institutions and non-state actors in the Global North and South. Topics may include security, South-South cooperation, trade, investment and transnational migration and drug trafficking.

Also listed as LACS 4819.

Prerequisite(s): fourth year standing or permission from the Department.

Seminar three hours a week.

PSCI 4901 [0.5 credit] Tutorial in a Selected Field

Tutorials or reading courses on selected topics in which seminars are not available.

Prerequisite(s): permission of the Department and agreement of an instructor.

Tutorial hours arranged.

PSCI 4902 [0.5 credit] Tutorial in a Selected Field

Tutorials or reading courses on selected topics in which seminars are not available.

Prerequisite(s): permission of the Department and agreement of an instructor.

Tutorial hours arranged.

PSCI 4905 [0.5 credit] Washington Center Seminar I

A seminar offered by The Washington Center, governed by Carleton regulations, and co-ordinated by Carleton's Department of Political Science.

Includes: Experiential Learning Activity

Prerequisite(s): selection to The Washington Center Internship Program and one of PSCI 2200, PSCI 3200, or PSCI 3210.

Seminar three hours a week.

PSCI 4906 [0.5 credit]

Washington Center Seminar II

A seminar offered by The Washington Center, governed by Carleton regulations, and co-ordinated by Carleton's Department of Political Science.

Includes: Experiential Learning Activity

Prerequisite(s): selection to The Washington Center Internship Program and one of PSCI 2200, PSCI 3200, or PSCI 3210.

Seminar three hours a week.

PSCI 4908 [1.0 credit] Honours Research Essay

Individual research project resulting in a major essay, completed under the supervision of a faculty member and evaluated by both the supervisor and an appointed reader. Students are responsible for locating a faculty member willing to supervise the essay. Departmental regulations apply.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in Political
Science with a Political Science CGPA of 9.00 or better, or
permission of the Supervisor of Undergraduate Studies.

	IOL, CHEM, COMP, ERTH, ISCI, STAT, PHYS or TSES		
10. Sufficient free electives to make 20.0 credits total for the program			

Notes:

Total Credits

- All students in B.A. Combined Honours Psychology must complete an Honours Project in either Psychology or the other discipline.
- Students who choose to complete PSYC 4908 or PSYC 4910 to meet Item 7 must also complete Items 2 and 6.

20.0

3. For Item 7 above, please consult with an advisor in the Department of Psychology for acceptable alternatives to PSYC 4910 and PSYC 4908. If Item 8 is completed in the other discipline, Items 2 and 6 above may be replaced by credits from the other discipline with the permission of the Department of Psychology. In this case, replacement credits in Psychology must be completed so that a minimum of 7.0 credits in Psychology is presented at graduation.

Concentration in Cognitive Psychology (3.5 credits)

This concentration is open to all students in the B.A. Honours Psychology, B.Sc. Honours Psychology, and the B.A. Combined Honours program. Only one concentration may be taken in a Psychology program. A maximum of 12.0 credits may be counted towards a B.A. or B.Sc. Honours Psychology degree.

- 4. If PSYC 4907, PSYC 4908, PSYC 4909 or PSYC 4910 are presented in partial fulfillment of Item 2 above, the focus of the thesis or project must be consistent with the theme of the concentration.

Stream in Mental Health and Well-Being (2.5 credits)

The stream in Mental Health and Well-Being has limited enrollment and is restricted to students registered in the B.A. Honours Psychology program or B.Sc. Honours Psychology program with a concentration who have attained fourth-year standing, have a Major CGPA of 10.0 or above, and Departmental approval.

Students enrolled in the stream must satisfy the requirements for the Bachelor of Arts or Bachelor of Science in Psychology while satisfying the credit requirement for the concentration and the stream through appropriate choice of courses.

Students in the Concentration in Health Psychology must complete 1.0 credit from the list of concentration courses in consultation with the Department in addition to PSYC 3302 and PSYC 3604. Students in the Concentration in Social/Personality Psychology must complete 0.5 credit from the list of concentration courses in consultation with the Department in addition to PSYC 3302.

Requirements

1. 2.5 credits in:		2.5

Minor in Human Resources and Management for B.A. Honours Psychology (5.0 credits)

Only students pursuing Bachelor of Arts Honours with a Major in Psychology who have completed at least 4.0 credits toward their degrees with a minimum overall CGPA of 7.00 may be admitted to Minor in Human Resources and Management. Students must successfully complete PSYC 2801 prior to entry in to the Minor, with a minimum grade of B+. PSYC 3801 must be successfully completed prior to taking any of the 4000-level BUSI courses listed in the Minor. Enrolment is limited.

Students who are required to leave the Minor due to a low Minor CGPA may not return to the Minor at any subsequent date.

Students are required to present a Minor CGPA of 6.50 or higher at graduation in order to be awarded a Minor in Human Resources and Management for B.A. Honours Psychology.

4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Minor in Forensic Psychology (4.0 credits)

Open to all undergraduate students in programs other than Psychology and Criminology and Criminal Justice with Concentration in Psychology.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Forensic Psychology.

Requirements:

1. 2.0 credits in:		2.0
PSYC 1001 [0.5]	Introduction to Psychology I	

Total Credits		4.0
4. The remaining requiand degree must be sa	irements of the major discipline(s) atisfied.	
PSYC 3604 [0.5]	Clinical Psychology and Mental Illness	
PSYC 3404 [0.5]	Police Psychology	
PSYC 3403 [0.5]	Addiction	
3. 1.0 credits from:		1.0
PSYC 3402 [0.5]	Criminal Behaviour	
PSYC 2400 [0.5]	Introduction to Forensic Psychology	
2. 1.0 credits in:		1.0
PSYC 2002 [0.5]	Introduction to Statistics in Psychology	
PSYC 2001 [0.5]	Introduction to Research Methods in Psychology	
PSYC 1002 [0.5]	Introduction to Psychology II	

Minor in Health Psychology (4.0 credits)

Open to all undergraduate students in programs other than Psychology.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Health Psychology.

Requirements:

rtoquiremento.		
1. 2.0 credits in:		2.0
PSYC 1001 [0.5]	Introduction to Psychology I	
PSYC 1002 [0.5]	Introduction to Psychology II	
PSYC 2001 [0.5]	Introduction to Research Methods in Psychology	
PSYC 2002 [0.5]	Introduction to Statistics in Psychology	
2. 1.5 credits in:		1.5
PSYC 2301 [0.5]	Introduction to Health Psychology	
PSYC 3302 [0.5]	Positive Psychology	
PSYC 3604 [0.5]	Clinical Psychology and Mental Illness	
3. 0.5 credit from:		0.5
PSYC 3301 [0.5]	Sport and Performance Psychology	
PSYC 3305 [0.5]	Psychology of Climate Change	
PSYC 3403 [0.5]	Addiction	
PSYC 3405 [0.5]	Psychology of Motivation and Emotion	
4. The remaining requi	irements of the major discipline(s) atisfied.	

Total Credits Minor in Social Psychology and Personality (4.0

Open to all undergraduate students in programs other than Psychology.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Social Psychology and Personality.

Requirements:

Minor in Psychology

Open to all undergraduate students in programs other than Psychology and Criminology and Criminal Justice with a concentration in Psychology.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Psychology.

Requirements

1. 1.0 credit in: PSYC 1001 [0.5]	Introduction to Psychology I	1.0
PSYC 1002 [0.5]	Introduction to Psychology II	
2. 1.0 credit in:		1.0
PSYC 2001 [0.5]	Introduction to Research Methods in Psychology	
PSYC 2002 [0.5]	Introduction to Statistics in Psychology	
3. 2.0 credits in PSY	C at the 2000-level or above	2.0
4. The remaining requand degree must be sa	irements of the major discipline(s) atisfied.	
Total Credits		4.0

Certificate in Multidisciplinary Studies in Mental Health and Well-Being (5.0 credits)

May be taken following successful completion of any college diploma (with a minimum grade of B) or any undergraduate degree. May also be taken concurrently with any degree except for Psychology with the Stream in Mental Health and Well-Being. Students who hold a degree in Psychology may be required to take additional credits to fulfill the certificate residency requirement; see Section 2.2.2 Minimum Number of Residency Credits.

Requirements

1. 1.0 credit in:		1.0
PSYC 1001 [0.5]	Introduction to Psychology I	
PSYC 1002 [0.5]	Introduction to Psychology II

Total Credits 5.0

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in

the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention: français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;

- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or,
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Biochemistry				
BIOC 2200 [0.5]	Cellular Biochemistry			
BIOC 4001 [0.5]	Methods in Biochemistry			
BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering			
Biology				
BIOL 1103 [0.5]	Foundations of Biology I			
BIOL 1104 [0.5]	Foundations of Biology II

Science Psychology Courses

PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
PSYC 2002 [0.5]	Introduction to Statistics in Psychology
PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development
PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives

CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use

ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

BIOL 4810 [0.5] Education Research in Undergraduate Science

CHEM 1003 [0.5] The Chemistry of Food, Health and Drugs

CHEM 1004 [0.5]	Drugs and the Human Body				
CHEM 1007 [0.5]	Chemistry of Art and Artifacts				
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years				
ERTH 2415 [0.5]	Natural Disasters				
ISCI 1001 [0.5]	Introduction to the Environment				
ISCI 2000 [0.5]	Natural Laws				
ISCI 2002 [0.5]	Human Impacts on the Environment				
PHYS 1901 [0.5]	Planetary Astronomy				
PHYS 1902 [0.5]	From our Star to the Cosmos				
PHYS 1905 [0.5]	Physics Behind Everyday Life				
PHYS 2903 [0.5]	Physics Towards the Future				
Prohibited Courses					

The following courses are not acceptable for credit in any B.Sc. program:

COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I
MATH 1402 [0.5]	Elementary Mathematics for Economics II

all 0000-level courses

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- · Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours Psychology or B.Sc. Honours Psychology: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000.

In addition to the following:

- Registered as a full-time student in the B.A. Honours Psychology program or the B.Sc. Honours Psychology program;
- 2. Obtained third-year standing;
- Successfully completed, by the start-date of the first work term, PSYC 2001 and PSYC 2002;
- Obtained an Overall CGPA of at least 9.50 and a Major CGPA of at least 9.50. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours and B.Sc. Honours Psychology students must successfully complete three (3) work terms to obtain the Co-op Designation.

Work Term Report Course: PSYC 3999 Work/Study Pattern:

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also

require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Direct Admission to the First Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European, Russian, and Eurasian Studies, French, Geography, Geography with a Concentration in Physical Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not quaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- · B.Sc. (Honours)
- B.Sc. (Major)
- B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Direct Admission to the First Year of the Co-op Option Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Admission Requirements

To be eligible for admission to the Certificate in Multidisciplinary Studies in Mental Health and Well-Being, applicants must:

- · have successfully completed any undergraduate degree; or
- · have successfully completed any college diploma with a minimum grade of B; or
- be currently enrolled and Eligible to Continue, and meeting the CGPA thresholds defined in Section 3.1.9 of the Academic Regulations of the University, in any degree offered at Carleton.

Note: Students who are currently enrolled in, or have graduated from, a degree in Psychology with the Stream in Mental Health and Well-Being are not eligible for this program. Students who hold a degree in Psychology may be required to take additional credits to fulfill the certificate residency requirement; see Section 2.2.2 of the *Academic Regulations of the University*, Minimum Number of Residency Credits.

Psychology (PSYC) Courses

PSYC 1001 [0.5 credit]

Introduction to Psychology I

A survey of topics associated with psychology's role as a natural science, including neuroscience, cognition, and learning.

Precludes additional credit for PSYC 1000. Lecture three hours a week.

PSYC 1002 [0.5 credit] Introduction to Psychology II

A survey of topics associated with psychology's role as a social science, including social psychology, personality, clinical psychology, and mental health.

Precludes additional credit for PSYC 1000.

Prerequisite(s): PSYC 1001. Lecture three hours a week.

PSYC 2001 [0.5 credit]

Introduction to Research Methods in Psychology

A general introduction to research methodologies employed within contemporary psychology. Topics covered include research designs (experimental, quasi-experimental) and techniques (observations, surveys), basic descriptive statistics, and how to interpret and report research findings.

Precludes additional credit for NEUR 2001 and PSYC 2000 (no longer offered).

Prerequisite(s): PSYC 1001 and PSYC 1002.

Lecture three hours a week. May include laboratories.

PSYC 2002 [0.5 credit]

Introduction to Statistics in Psychology

A general introduction to statistical techniques employed within contemporary psychology. Topics include basic data analysis using descriptive and inferential statistics (t-tests, ANOVA, correlation, chi-square).

Precludes additional credit for NEUR 2002.

Prerequisite(s): PSYC 2001.

Lecture three hours a week. May include laboratories.

PSYC 2100 [0.5 credit] Introduction to Social Psychology

Introduction to social psychology, including a survey of theories, issues, methods, and findings. This course will explore how social situations may influence people's thoughts, feelings, and behaviours. Topics may include social cognition, self-knowledge, persuasion, interpersonal attraction, aggression, and prosocial behaviour. Precludes additional credit for SOCI 2150. Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours a week.

PSYC 2301 [0.5 credit] Introduction to Health Psychology

Introduction to health psychology, including a survey of theories, issues, methods, and findings. Using a multidisciplinary approach, topics may include the reciprocal interactions among physical health and illness, and psychological factors, including emotional well-being, coping and appraisal processes.

Precludes additional credit for PSYC 3406.
Prerequisite(s): PSYC 1001 and PSYC 1002.
Lectures three hours a week.

PSYC 2307 [0.5 credit] Human Neuropsychology I

Introduction to study of brain-behaviour relationships, including a survey of theories, issues, methods, and findings. Topics may include basic anatomy and physiology of the human nervous system, including sensory and motor functions. Neural basis of language, perception, emotion, learning, memory, decision making and social cognition.

Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours a week.

PSYC 2400 [0.5 credit] Introduction to Forensic Psychology

Introduction to forensic psychology, including a survey of theories, issues, methods, and findings. Topics covered may include development of offending, eyewitness testimony, victim studies, risk assessment, offender rehabilitation, offender classification, and police studies. Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours a week.

PSYC 2500 [0.5 credit]

Foundations of Developmental Psychology

Introduction to developmental psychology, including a survey of theories, issues, methods, and findings. Topics may include biological underpinnings and genetics, as well as selected aspects of language, cognitive, moral, emotional, and social development.

Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours a week.

PSYC 2600 [0.5 credit]

Introduction to the Study of Personality

Introduction to the study of personality, including a survey of theories, issues, methods, and findings. Explores the factors that contribute to people's personality and influence how they interact with others. Topics may include traits, motives, the self, physiology, the unconscious, relationships, stress and coping.

Prerequisite(s): PSYC 1001 and PSYC 1002.

Lectures three hours a week.

PSYC 2700 [0.5 credit] Introduction to Cognitive Psychology

Introduction to cognitive processes, including a survey of theories, issues, methods and findings. Topics covered may include pattern recognition, attention, imagery, learning (animal and human), memory, language, and thinking.

Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours a week.

PSYC 2801 [0.5 credit] Organizational Psychology I

Introduction to the study of organizational psychology, including a survey of theories, issues, methods, and findings. Examines individual and group behaviour in organizational settings. Topics may include understanding work-related attitudes, behaviour, motivation, and stress, personnel selection, personality in the workplace, organizational justice, and leadership.

Precludes additional credit for PSYC 3105, PSYC 3803 (no longer offered).

Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours per week.

PSYC 3000 [1.0 credit]

Design and Analysis in Psychological Research

Techniques in data analysis, probability, sampling distributions, and procedures of estimation. Topics include classical, Bayesian, and distribution free approaches to hypothesis testing, linear regression and curve fitting, and analysis of variance methods in experimental design. Techniques are applied with appropriate statistical software (e.g., SPSS, Excel).

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing, PSYC 2001, and

PSYC 2002.

Lectures and tutorial four hours a week.

PSYC 3001 [0.5 credit] Psychological Testing

An introduction to theory and issues pertaining to psychological tests. Topics include the creation, assessment, scoring, and interpretation of results across different testing formats (questionnaires, surveys, structured interviews, performance-based measurements). Classical and modern techniques will be incorporated. Students will apply psychological testing theory through assignments.

Prerequisite(s): PSYC 2001 and PSYC 2002. Lectures three hours a week.

PSYC 3100 [1.0 credit]

Social Psychology (Honours Seminar)

An introduction to theory and research in social psychology. Activities include reading and assessing the appropriate literature, designing studies and experiments, conducting data analyses, and producing APA style reports. Research ethics and graduate studies are also addressed. Taught in preparation of fourth year thesis. Includes: Experiential Learning Activity Prerequisite(s): PSYC 2001, PSYC 2002, PSYC 2100, third-year Honours standing in Psychology with a CGPA of 9.0 or higher in the major and permission of the Department.

Seminars and laboratories six hours a week.

PSYC 3104 [0.5 credit]

Intergroup Relations: The Psychology of Conflict and Violence

In-depth coverage of the social psychology of relations within and between large societal groups. Topics may include social identity, stereotyping, prejudice, and intergroup emotions, with emphasis on their role in promoting conflict and paths to pro-social intergroup relations.

Also listed as SOWK 3103.

Precludes additional credit for PSYC 3103 (no longer offered).

Prerequisite(s): PSYC 2100. Lectures three hours per week.

PSYC 3106 [0.5 credit]

Close Relationships

A consideration of relationship science, with a focus on social psychological theory and empirical approaches to the study of close relationships such as dating and marital relationships, and friendships. Topics may include relationship initiation, relationship maintenance, and coping with the dissolution of relationships.

Prerequisite(s): PSYC 2100. Lectures three hours per week.

PSYC 3300 [1.0 credit]

Health (Honours Seminar)

An applied introduction to theory and research in health psychology. Activities include reading and assessing the appropriate literature, designing studies and experiments, conducting data analyses, and producing APA style reports. Research ethics and graduate studies are also addressed. Taught in preparation of fourth year thesis. Includes: Experiential Learning Activity

Prerequisite(s): PSYC 2001, PSYC 2002, PSYC 2301, third-year Honours standing in Psychology with a CGPA of 9.0 or higher in the major and permission of the Department.

Seminars and laboratories six hours a week.

PSYC 3301 [0.5 credit] Sport and Performance Psychology

How psychological processes influence outcomes across sport and performance environments. Topics may include self-confidence, goal-setting, arousal regulation, imagery, group dynamics, burnout, injury recovery, and how person and situational factors affect the pursuit of excellence. Prerequisite(s): one of PSYC 2100, PSYC 2301, PSYC 2500, PSYC 2600.

Lectures three hours a week.

PSYC 3302 [0.5 credit] Positive Psychology

A review of theoretical, historical, and empirical scholarship in positive psychology. Drawing widely across traditional sub-disciplines, content focuses on human strengths, well-being, resilience, and virtue to understand internal, external, and developmental contributors to health and happiness.

Prerequisite(s): one of PSYC 2100, PSYC 2301, PSYC 2500, PSYC 2600.

Lectures three hours a week.

PSYC 3305 [0.5 credit] Psychology of Climate Change

An examination of the role that psychological research plays in understanding people's feelings, thoughts, and behaviour in relation to climate change and its associated problems. Strategies and interventions that help people cope with climate change and promote eco-friendly behaviour will also be discussed.

Precludes additional credit for PSYC 4335 (no longer offered).

Prerequisite(s): 0.5 credit in PSYC at the 2000-level. Lecture or seminars three hours a week.

PSYC 3307 [0.5 credit] Human Neuropsychology II

Cortical metabolism and research methods for assessment of cortical function, neuropsychological testing in the context of neurological, psychiatric and cognitive disorders caused by nervous system damage or genetic anomaly.

Precludes additional credit for PSYC 3207 (no longer offered).

Prerequisite(s): PSYC 2307. Lectures three hours a week.

PSYC 3400 [1.0 credit]

Forensic Psychology (Honours Seminar)

An applied introduction to theory and research in forensic psychology. Activities include reading and assessing the appropriate literature, designing studies and experiments, conducting data analyses, and producing APA style reports. Research ethics and graduate studies are also addressed. Taught in preparation of fourth year thesis. Includes: Experiential Learning Activity Prerequisite(s): PSYC 2001, PSYC 2002, PSYC 2400, third-year Honours standing in Psychology with a CGPA of 9.0 or higher in the major and permission of the Department.

Seminars and laboratories six hours a week.

PSYC 3402 [0.5 credit] Criminal Behaviour

A review of theoretical and empirical research in the study of criminal behaviour. Examination of offender assessment and classification, prevalence and types of offenders, and effectiveness of offender treatment including understanding specific populations of offenders such as Indigenous offenders, women offenders and violent offenders.

Prerequisite(s): PSYC 2400. Lectures three hours a week.

PSYC 3403 [0.5 credit] Addiction

Neurobiological and social bases of drug and behavioural addictions. Contemporary theoretical approaches to addiction; approaches to current prevention and treatment.

Prerequisite(s): one of PSYC 2301, PSYC 2307, PSYC 2400.

Lectures three hours a week.

PSYC 3404 [0.5 credit] Police Psychology

Critical examination of theory and empirical research in the area of police psychology. Topics covered may include police culture, police selection, police suicide, police personality, stress debriefing, fitness evaluations, police training, crisis negotiations, and investigative techniques. Precludes additional credit for PSYC 4402 (no longer offered).

Prerequisite(s): PSYC 2400. Lectures three hours per week.

PSYC 3405 [0.5 credit] Psychology of Motivation and Emotion

This course will explore motivational and emotional factors involved in human behaviour emphasizing various perspectives, theories, and research pertaining to physiological, cognitive, and social needs. Topics may include what factors motivates people, how motivation changes over time, and how one person can motivate another individual.

Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours a week.

PSYC 3500 [1.0 credit]

Developmental Psychology (Honours Seminar)

An introduction to theory and research in developmental psychology. Activities include reading and assessing the appropriate literature, designing studies and experiments, conducting data analyses, and producing APA style reports. Research ethics and graduate studies are also addressed. Taught in preparation of fourth year thesis. Includes: Experiential Learning Activity

Prerequisite(s): PSYC 2001, PSYC 2002, PSYC 2500, third-year Honours standing in Psychology with a CGPA of 9.0 or higher in the major and permission of the Department.

Seminars and laboratories six hours a week.

PSYC 3505 [0.5 credit] Exceptional Children

An overview of childhood exceptionalities including intellectual differences, communication disorders, sensory and physical impairments, developmental and behavioural problems.

Prerequisite(s): PSYC 2500. Lectures three hours a week.

PSYC 3506 [0.5 credit] Cognitive Development

Human cognitive development is examined with a focus on memory, thinking and language through the life span. Topics may include perceptual and language development, emergent literacy, development of strategies and development of reading and arithmetic skills. Prerequisite(s): PSYC 2500 or PSYC 2700. Lectures three hours a week.

PSYC 3507 [0.5 credit] Social Development

Development of the individual with a focus on social cognition and social behaviour. Topics may include the role of temperament in development, parental roles, siblings and peers in social/emotional development, development of prosocial and aggressive behaviour, moral development and development of self and other understanding.

Prerequisite(s): PSYC 2500. Lectures three hours a week.

PSYC 3508 [0.5 credit] Child Language

Milestones associated with the development of grammatical, pragmatic and metalinguistic competence from birth to about age ten, and the relative contributions of the environment, cognitive development and inborn knowledge to this development.

Includes: Experiential Learning Activity

Also listed as LING 3603.

Precludes additional credit for LALS 2603 (no longer offered).

Prerequisite(s): LING 1001 and second-year standing, or permission of the instructor. Lectures three hours per week.

PSYC 3509 [0.5 credit] Adolescence and Emerging Adulthood

The physical, cognitive, social and moral development of adolescents and emerging adults in multiple contexts including family, peers, media and culture. Major theories and contemporary issues and concerns.

Prerequisite(s): PSYC 2500. Lectures three hours a week.

PSYC 3511 [0.5 credit] Psychology of Aging

An introduction to the psychology of aging, including applying the lifespan approach to theories, issues, and methods used to study the aging process. Behavioral and neurobiological aspects of healthy aging and dementia. Other topics may include sensory processes, personality, interpersonal relationships, bereavement, and mental health.

Prerequisite(s): One of PSYC 2500, PSYC 2307, or PSYC 2700.

Lectures three hours a week.

PSYC 3600 [1.0 credit] Personality (Honours Seminar)

An introduction to theory and research in personality psychology. Activities include reading and assessing the appropriate literature, designing studies and experiments, conducting data analyses, and producing APA style reports. Research ethics and graduate studies are also addressed. Taught in preparation of fourth year thesis. Includes: Experiential Learning Activity

Prerequisite(s): PSYC 2001, PSYC 2002, PSYC 2600, third-year Honours standing in Psychology with a CGPA of 9.0 or higher in the major and permission of the Department.

Seminars and laboratories six hours a week.

PSYC 3603 [0.5 credit] Psychology of Women

An examination of theories and research regarding the similarities and differences in women's and men's psychological processes. Psychological issues relevant to women (e.g., women's health concerns, women's sexuality, violence toward women and children) will be examined as well as feminist and traditional research methods.

Prerequisite(s): one of PSYC 2100, PSYC 2500, PSYC 2600.

Lectures three hours a week.

PSYC 3604 [0.5 credit]

Clinical Psychology and Mental Illness

History of the concept of mental illness. Theory and selected research dealing with the nature and etiology of mental illness.

Prerequisite(s): PSYC 2301, PSYC 2500 or PSYC 2600. Lectures three hours a week.

PSYC 3700 [1.0 credit] Cognition (Honours Seminar)

An introduction to theory and research in cognitive psychology. Activities include reading and assessing the appropriate literature, designing studies and experiments, conducting data analyses, and producing APA style reports. Research ethics and graduate studies are also addressed. Taught in preparation of fourth year thesis. Includes: Experiential Learning Activity

Prerequisite(s): PSYC 2001, PSYC 2002, PSYC 2700, third-year Honours standing in Psychology with a CGPA of 9.0 or higher in the major and permission of the Department.

Seminars and laboratories six hours a week.

PSYC 3702 [0.5 credit] Perception

Introduction to theory, research methods and principles associated with the study of perceptual processes. Examples of how perceptual principles can be applied to solve problems in communications, transportation, medicine, industrial design, manufacturing, marketing, food and beverage industries (flavoring, blending, and scenting, etc.).

Precludes additional credit for NEUR 3202. Prerequisite(s): PSYC 1001 and PSYC 1002. Lectures three hours a week.

PSYC 3709 [0.5 credit]

Language Processing and the Brain

Introduction to adult language processing and neurolinguistics. Psychological processes underlying speech production and perception, word recognition and sentence processing. Biological foundation and neuro-cognitive mechanisms of language. Experimental techniques and methodologies of current psycholinguistic studies.

Includes: Experiential Learning Activity Also listed as LING 3601.

Precludes additional credit for LALS 2601 and LALS 3601 (no longer offered).

Prerequisite(s): LALS 1000 or LALS 1001 or LING 1001 or PSYC 2700 and second-year standing, or permission of the instructor.

Lectures three hours a week.

PSYC 3710 [0.5 credit] Introduction to Human Factors

Theoretical foundation, philosophy and practical application of techniques for analyzing from a psychological perspective how people interact with designed environments. A major goal is to determine how these environments should be designed to suit human capabilities.

Precludes additional credit for PSYC 2800 (no longer offered).

Prerequisite(s): PSYC 2001 and PSYC 2002. Lecture three hours a week.

PSYC 3801 [0.5 credit] Organizational Psychology II

Advanced coverage of the current theory and practices in Organizational Psychology. Selected topics may include workplace socialization, job attitudes, deviant work behaviours, leadership, teams and group dynamics, work-related stress and health, and organizational change and development.

Prerequisite(s): PSYC 2801. Lectures three hours per week.

PSYC 3802 [0.5 credit]

Transition to Career

Within the context of an active learning environment, examines traditional and current models in career psychology. Topics may include the concepts of change and transitions, self-assessments, vocational psychology, and workplace onboarding. Students will examine their personal and professional transition from university to the work world.

Includes: Experiential Learning Activity Prerequisite(s): third or fourth year standing in Psychology.

Lectures three hours a week.

PSYC 3901 [0.5 credit] **Practicum in Psychology**

Experiential learning in psychology via field placement. Students pursue personal learning outcomes focused on the application of psychology within the community. Assignments promote ongoing reflection and the sharing of what has been learned with colleagues. Includes: Experiential Learning Activity Prerequisite(s): Third- or fourth-year standing in Psychology with a CGPA of 7.0 or higher in the major and permission of the Department.

PSYC 3902 [0.5 credit] Practicum in Psychology

Experiential learning in psychology via field placement. Students pursue personal learning outcomes focused on the application of psychology within the community. Assignments promote ongoing reflection and the sharing of what has been learned with colleagues.

Includes: Experiential Learning Activity Prerequisite(s): Third- or fourth-year standing in Psychology with a CGPA of 7.0 or higher in the major and permission of the Department.

PSYC 3905 [1.0 credit] Practicum in Psychology

Experiential learning in psychology via field placement. Students pursue personal learning outcomes focused on the application of psychology within the community. Assignments promote ongoing reflection and the sharing of what has been learned with colleagues. Includes: Experiential Learning Activity Prerequisite(s): Third- or fourth-year standing in Psychology with a CGPA of 7.0 or higher in the major and permission of the Department.

PSYC 3999 [0.0 credit] **Co-operative Work Term**

Co-operative Work Term. Includes: Experiential Learning Activity Work Term.

PSYC 4001 [0.5 credit] Special Topics in Psychology

Each section of PSYC 4001 deals with a different topic. Topics change yearly. Students may register in more than one section of PSYC 4001 but can register in each section only once.

Prerequisite(s): each section will have its own. Lectures or seminars three hours a week.

PSYC 4003 [0.5 credit] Origins of Modern Psychology

An overview of the evolution of psychology, with an emphasis on psychology as a specialized area of knowledge and practice in the late-nineteenth and twentieth centuries. Topics covered may include the history of a particular period, content area, or cultural context.

Precludes additional credit for PSYC 2003. Prerequisite(s): third or fourth-year standing in a Psychology Honours program. Lectures or seminars three hours per week.

PSYC 4100 [0.5 credit] **Advanced Topics in Social Psychology**

In-depth exploration of theoretical and empirical issues related to selected topics in Social psychology. The specific content for this course will vary from year to year. Prerequisite(s): fourth-year standing and PSYC 2100. Lectures or seminars three hours a week.

PSYC 4235 [0.5 credit] Psychology of Climate Change

An examination of the role that psychological research plays in understanding people's feelings, thoughts, and behaviour in relation to climate change and its associated problems. Strategies and interventions that help people cope with climate change and promote eco-friendly behaviour will also be discussed.

Prerequisite(s): third or fourth-year standing and one PSYC at the 2000-level.

Lectures or seminars three hours a week.

PSYC 4301 [0.5 credit] Advanced Topics in Health Psychology

In-depth exploration of theoretical and empirical issues related to selected topics in health psychology. The specific content for this course will vary from year to year. Prerequisite(s): fourth-year standing and PSYC 2301. Lectures or seminars three hours a week.

PSYC 4330 [1.0 credit]

Community Mental Health and Well-Being

An examination of theory, research, and the practice of approaches to support peers and their well-being. Students will apply the concepts learned during the seminars in field placements.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in
Psychology, Mental Health and Well-Being Stream.
Seminar three hours per week.

PSYC 4333 [0.5 credit]

Clinical Psychology: Assessment and Intervention

An advanced seminar on clinical psychology and mental health. Students will learn about frequently used treatment modalities and common factors across treatments. Research methodology and recent advances dealing with a variety of common mental disorders will also be reviewed and discussed.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in
Psychology and PSYC 3604.

Lecture or seminar three hours per week.

PSYC 4400 [0.5 credit] Advanced Topics in Forensic Psychology

In-depth exploration of theoretical and empirical issues related to selected topics in Forensic psychology. The specific content for this course will vary from year to year. Prerequisite(s): fourth-year standing and PSYC 2400. Lectures or seminars three hours a week.

PSYC 4403 [0.5 credit] Gender and Crime

This course explores the role of gender in understanding, preventing, and treating adult and youthful criminal conduct. The course operates from a psychological and developmental perspective seeking to examine individual differences in female perpetrated criminal conduct across the life span.

Prerequisite(s): fourth-year standing and PSYC 3402. Lectures or seminars three hours a week.

PSYC 4404 [0.5 credit] Sex Offenders

Theory and research concerning the etiology and maintenance of sexual offending; assessment, treatment, and management of sex offenders. Introduction to fundamental issues and controversies in the area. Prerequisite(s): third- or fourth-year standing, PSYC 2400, and PSYC 3402.

Lectures or seminars three hours a week.

PSYC 4410 [0.5 credit] Children and the Law

This course will explore psychological factors affecting child witnesses and victims as they interact within the criminal justice system. The course will survey the intersection of psychology and law within the areas of eyewitness memory, police procedures, and the criminal justice system.

Prerequisite(s): fourth-year standing, and PSYC 2400 or PSYC 2500.

Lectures or seminars three hours a week.

PSYC 4411 [1.0 credit] Cold Case Investigations

Forensic science, criminal justice, psychology, and investigative techniques equip students with knowledge and practical skills required to tackle unsolved crimes. Expert academics and practitioners will present in the first semester, and in the second semester students actively participate in solving an unsolved cold case.

Includes: Experiential Learning Activity Precludes additional credit for None.

Prerequisite(s): Major CGPA of 10.0 (A-) in Psychology; Fourth-Year Standing.

Also offered at the graduate level, with different requirements, as PSYC 5029., for which additional credit is precluded.

Lectures and Experimental Learning Activity.

PSYC 4500 [0.5 credit]

Advanced Topics in Developmental Psychology

In-depth exploration of theoretical and empirical issues related to selected topics in developmental psychology. The specific content for this course will vary from year to year.

Prerequisite(s): fourth-year standing, and one of PSYC 3500, PSYC 3505, PSYC 3506, PSYC 3507, PSYC 3509.

Lectures or seminars three hours a week.

PSYC 4600 [0.5 credit]

Advanced Topics in Personality Psychology

In-depth exploration of theoretical and empirical issues related to selected topics in personality psychology. The specific content for this course will vary from year to year. Prerequisite(s): fourth-year standing and PSYC 2600. Lectures or seminars three hours a week.

PSYC 4700 [0.5 credit]

Advanced Topics in Cognitive Psychology

In-depth exploration of theoretical and empirical issues related to selected topics in cognitive psychology. The specific content for this course will vary from year to year. Prerequisite(s): fourth-year standing, and PSYC 2700. Lectures or seminars three hours a week.

PSYC 4801 [0.5 credit]

Occupational Health Psychology

The application of psychological knowledge to enhance employee physical and mental health, safety and wellbeing, and more broadly, to enrich organizational life. Students will be able to learn and analyze critically the relevant methodological, theoretical, and empirical Occupational Health Psychology literature.

Prerequisite(s): third or fourth-year standing and one of PSYC 2100, PSYC 2301, PSYC 2801.

Lectures or seminars three hours a week.

PSYC 4802 [0.5 credit]

Advanced Topics in Organizational Psychology

In-depth exploration of theoretical and empirical issues related to selected topics in organizational psychology. The specific content for this course will vary from year to year.

Prerequisite(s): fourth-year standing and PSYC 2801. Lectures or seminars three hours a week.

PSYC 4900 [0.5 credit] Independent Study

A reading or research course for selected students who wish to investigate a particular topic of interest. Normally, students may not include more than one credit of independent study in their total program. Includes: Experiential Learning Activity Prerequisite(s): third- or fourth-year standing in Psychology and permission of the Department. Mentored work.

PSYC 4902 [0.5 credit] Independent Study

A reading or research course for selected students who wish to investigate a particular topic of interest. Normally, students may not include more than one credit of independent study in their total program. Includes: Experiential Learning Activity Prerequisite(s): third- or fourth-year standing in Psychology and permission of the Department. Mentored work.

PSYC 4907 [1.0 credit]

Thesis for B.Sc. with Honours in Psychology

A thesis supervised by a Faculty Adviser. Students review the appropriate literature, contribute to the design of a study or experiment, conduct data analyses, and produce an APA style written report. Students may also present a research poster at the Psychology Undergraduate Research Event.

Includes: Experiential Learning Activity
Precludes additional credit for PSYC 4906 (no longer offered).

Prerequisite(s): fourth-year Honours standing in Psychology with a major CGPA of 10.0, PSYC 3000; one of PSYC 3100, PSYC 3300, PSYC 3400, PSYC 3500, PSYC 3600, PSYC 3700 or PSYC 3805; and permission of the Department.

Lectures during the fall term given by the course instructor and mentored work arranged by the Faculty Adviser.

PSYC 4908 [1.0 credit]

Thesis for B.A. with Honours in Psychology

A thesis supervised by a Faculty Adviser. Students review the appropriate literature, contribute to the design of a study or experiment, conduct data analyses, and produce an APA style written report. Students may also present a research poster at the Psychology Undergraduate Research Event.

Includes: Experiential Learning Activity
Precludes additional credit for PSYC 4905 (no longer offered).

Prerequisite(s): fourth-year Honours standing in Psychology with a major CGPA of 10.0, PSYC 3000; one of PSYC 3100, PSYC 3300, PSYC 3400, PSYC 3500, PSYC 3600, PSYC 3700, PSYC 3805; and permission of the Department.

Lectures during the fall term given by the course instructor and mentored work arranged by the Faculty Adviser.

PSYC 4909 [1.0 credit]

Project for B.Sc. with Honours in Psychology

Within an active learning environment, students develop oral presentations and written documents that may include annotated bibliographies, essays, and presentation slides. They must also present a research poster at the Psychology Undergraduate Research Event. Students select an area of psychological research of interest to them.

Includes: Experiential Learning Activity
Precludes additional credit for PSYC 4906 (no longer offered), PSYC 4907, and PSYC 4908.
Prerequisite(s): fourth-year standing in B.Sc. (Honours) in Psychology, and PSYC 3000.

Seminars three hours a week.

PSYC 4910 [1.0 credit] Project for B.A. with Honours in Psychology

Within an active learning environment, students develop oral presentations and written documents that may include annotated bibliographies, essays, and presentation slides. They must also present a research poster at the Psychology Undergraduate Research Event. Students select an area of psychological research of interest to them.

Includes: Experiential Learning Activity
Precludes additional credit for PSYC 4905 (no longer
offered), PSYC 4907 and PSYC 4908.
Prerequisite(s): fourth-year standing in B.A (Honours) in
Psychology, and PSYC 3000.
Seminars three hours a week.

Public Affairs and Policy Management

This section presents the requirements for programs in:

- Specialization in Communication and Policy Studies (Communication Technologies and Regulation) B.P.A.P.M. Honours
- Specialization in Communication and Policy Studies (Strategic Public Opinion) B.P.A.P.M. Honours
- Specialization in Development Policy Studies (Global Economic Relations) B.P.A.P.M. Honours
- Specialization in Development Policy Studies (Rights and Human Development) B.P.A.P.M. Honours
- Specialization in Development Policy Studies (Indigenous Policy) B.P.A.P.M Honours
- Specialization in International Policy Studies (International Relations and Conflict) B.P.A.P.M. Honours
- Specialization in International Policy Studies (Security and Intelligence) B.P.A.P.M. Honours
- Specialization in Public Policy and Administration (Economic Policy) B.P.A.P.M. Honours
- Specialization in Public Policy and Administration (Environmental and Sustainable Energy Policy)
 B.P.A.P.M. Honours
- Specialization in Public Policy and Administration (Social Policy) B.P.A.P.M. Honours
- Specialization in Public Policy and Administration (Indigenous Policy) B.P.A.P.M Honours

Graduate Pathways

Accelerated pathways or advanced standing with transfer of credits to graduate programs at Carleton University may be available to eligible BPAPM students. Please consult the Graduate Calendar for the pathway requirements for the MA degree in International Affairs offered by the Norman Paterson School of International Affairs, the MPPA degree offered by the School of Public Policy and Administration, the MPM degree offered by the Clayton H. Riddell Graduate Program in Political Management,

and the MA degree in European, Russian and Eurasion Studies.

Program Requirements

Language Requirement for B.P.A.P.M.

Prior to graduation, students must satisfy a language proficiency requirement in one of the following ways:

- successful completion of an approved French language credit (FREN 1100);
- 2. successful completion of the DELF B1 exam;
- placement at a demonstrated competency level equivalent to satisfactory completion of FREN 1100 following a self-assessment questionnaire and interview administered by the Department of French (for students who already possess demonstrated capacity in French).

Students should note that they will be required to use one of their elective credits if they choose to satisfy the language requirement through an approved French language credit. Students registering in the Specialization in International Studies should note the additional language requirement.

Bachelor of Public Affairs and Policy Management (B.P.A.P.M. Honours)

Before the second year of study, students in this program must register in one of the specializations listed below.

Specialization in Communication and Policy Studies (Communication Technologies and Regulation)

B.P.A.P.M. Honours (20.0 credits)

Specialization in Communication and Policy Studies (Strategic Public Opinion) B.P.A.P.M. Honours (20.0 credits)

A. Credits Included in the Major (10.0 credits)

Regulations

In addition to the requirements listed here, students must satisfy the University regulations (see the *Academic Regulations of the University* section of this Calendar.) Students should consult the College when planning their program and selecting courses.

Graduation

Following are the minimum CGPA requirements for B.P.A.P.M. (Honours) graduation:

Overall CGPA: 6.50 Major CGPA: 6.50

Academic Continuation Evaluation for Bachelor of Public Affairs and Policy Management

Students in the B.P.A.P.M. (Honours) follow the standard Academic Continuation Evaluation (ACE) regulations governing Honours programs described in Section 3.2 of the *Academic Regulations of the University*, with the following additions and amendments:

- Students are Eligible to Continue (EC) if they have an Overall CGPA of at least 6.50 and a Major CGPA of at least 6.50.
- Students with less than 6.50 in either the Overall or Major CGPA, but who have an Overall CGPA of at least 1.00, will be placed on *Academic Warning* (AW). Students with an Overall CGPA of less than 1.00 will be *Dismissed from Program* (DP).
- Students on Academic Warning (AW) who do not achieve a Term GPA of 6.50 as well as a minimum Term GPA of 6.50 in any courses taken within the Major will be required to withdraw from the program.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study.

Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work

term. Students cannot end their degree on a work

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search:
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- 5. Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

Bachelor of Public Affairs and Policy Management: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.PAPM Honours program;
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 9.00. This CGPA must be maintained throughout the duration of the degree.

B.PAPM Honours students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow

the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

• B.P.A.P.M. (Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses.

Advanced Standing

Applications for admission with advanced standing to the program will be assessed on their merits. Normally, offers are made to students with an overall CGPA of 9.00 (B+) or higher.

Advanced standing will be granted only for those courses deemed appropriate to the program. Students will not receive credit for courses graded below C-.

Co-op Option

Direct Admission to the first year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and/or prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the B.P.A.P.M. (Honours) program;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Public Affairs and Policy Management (PAPM) Courses

PAPM 1001 [0.5 credit]

Policy: Analysis, Implementation, and Evaluation

The processes of policy-making, implementation and evaluation. Forces that shape policy deliberations and alternative tools for managing policy action and policy evaluation. Theoretical approaches to understanding the origins of policy, and methods by which programs are designed and assessed.

Includes: Experiential Learning Activity Precludes additional credit for PAPM 2000.

Lecture two hours a week, discussion one hour per week.

PAPM 2001 [0.5 credit]

Foundations of Public Policy: Political Thought

Theoretical, philosophical and ethical foundations for the study of public affairs and policy management. Drawing from classic and contemporary texts in political philosophy and theory, students consider issues relating to the nature of democracy, civic society and social organizations, the public, public affairs, public interest.

Precludes additional credit for PAPM 1000.

Prerequisite(s): PAPM 1001, PSCI 2003, and second-year standing.

Lecture two hours a week, discussion one hour a week.

PAPM 2002 [0.5 credit]

Foundations of Public Policy: Economic Thought

An examination of the history of economic thought, the context in which it developed, and its influence on public policy, from ancient to classical, neoclassical, and Keynesian approaches. Will also include a discussion of critical approaches such as Marxist, feminist, racial capitalist thought.

Precludes additional credit for PAPM 1000.

Prerequisite(s): PAPM 1001, PSCI 2003, and second-year standing.

Lecture two hours a week, discussion one hour a week.

PAPM 3000 [0.5 credit] Policy Research

An examination of the research strategies and techniques relevant to policy analysis and evaluation. Using the case study method, the role of research and research organizations in the policy process is discussed. The issue of ethical dilemmas in policy research is also considered. Includes: Experiential Learning Activity Prerequisite(s): PSCI 2701 and PSCI 2702, or COMM 2001, or ECON 2201 and ECON 2202 and Good Standing in the Bachelor of Public Affairs and Policy Management

Lecture and discussion three hours a week.

PAPM 3999 [0.0 credit] **Co-operative Work Term**

Includes: Experiential Learning Activity

PAPM 4000 [0.5 credit] Capstone Seminar in Public Affairs and Policy Management

Policy workshop focusing on the application of public affairs analysis to develop problem solving and research skills. Seminar is policy-focused and organized by area of Specialization in the program. Students, working in small groups, examine concrete policy problems, actual or simulated, in specific institutional contexts. Includes: Experiential Learning Activity Prerequisite(s): PAPM 3000 and Good Standing in

the Bachelor of Public Affairs and Policy Management program.

Seminar three hours a week.

PAPM 4099 [0.5 credit] **Policy Seminar**

Students address a specific policy problem or problems, in interaction with local, national or international policy experts or practitioners. Emphasis on policy analysis, research, and communication skills.

Includes: Experiential Learning Activity

Prerequisite(s): PAPM 3000. Seminar three hours per week.

PAPM 4100 [0.5 credit] Special Topics in Public Affairs and Policy

Management

Analysis of selected issues in public affairs and policy management not ordinarily treated in the regular course program. The choice of topics will vary from year to year. Students should consult with the College regarding the topic offered.

Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in the B.P.A.P.M. program or permission of the Kroeger College. Seminar three hours per week.

PAPM 4908 [1.0 credit] Honours Research Essay

Individual research project resulting in a major essay, completed under the supervision of a faculty member and evaluated by both the supervisor and an appointed reader. Students are responsible for locating a faculty member willing to supervise the essay. Departmental regulations apply.

Includes: Experiential Learning Activity
Prerequisite(s): PAPM 3000 and fourth-year standing in
the Bachelor of Public Affairs and Policy Management
program with a Major CGPA or 9.0 or better, or
permission of the Director of the Public Affairs and Policy
Management program.

Minor in Religion (4.0 credits)

Open to all undergraduate degree students not in Religion programs.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Religion.

Requirements

Total Credits

1. 1.0 credit in RELI at the 1000-level or higher or HUMS 1000 (1.0 credit)	1.0
2. 1.0 credit in RELI at the 2000-level or higher	1.0
3. 1.0 credit in RELI at the 3000-level or higher	1.0

4. 1.0 credit in RFI I

5. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

1.0

Post-Baccalaureate Diploma in Religion (4.0 credits)

Admission to this program requires the permission of the Religion program. Normally, students would be required to have completed an undergraduate degree with a minimum B average or higher to be admitted. Applications will be reviewed on a case-by-case basis.

1. 1.0 credit in Theory		1.0
RELI 3741 [0.5]	Classical Approaches to Religion	
RELI 4741 [0.5]	Contemporary Issues in the Study of Religion	
2. 1.0 credit in Traditions and Contexts		
a. 0.5 credit in: Judaism, Christianity, and Islam		0.5
RELI 2110 [0.5]	Judaism	
RELI 2200 [0.5]	Christianity	
RELI 2310 [0.5]	Islam	
b. 0.5 credit in: Indigenous Religions, Hinduism, Buddhism, and Religions of China		0.5
RELI 2410 [0.5]	Buddhism	
RELI 2510 [0.5]	Hinduism	
RELI 2600 [0.5]	Religions of China	
RELI 2800 [0.5]	Indigenous Traditions	
4. 1.0 credit in RELI at the 3000-level or above		1.0
5. 1.0 credit in RELI at the 4000-level		1.0
	at the 4000-level	1.0

Requests for alternative course choices may be granted at the discretion of the Religion Undergraduate Supervisor. In addition, 0.5 credit of coursework may be taken outside the department, with the approval of the Religion Undergraduate Supervisor.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

15.0

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies,

Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and

4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite

averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Religion (RELI) Courses

Language courses RELI 1010 [1.0] Elementary Language Tutorial, RELI 2010 [1.0] Intermediate Language Tutorial and RELI 3010 [1.0] Advanced Language Tutorial are intended for students specializing in a particular religious tradition. They are offered according to the availability of members of the Discipline. Courses taken at the 2000level or above will be mainly independent study under the supervision of a member of the Discipline. Students interested in taking these courses should consult the Coordinator.

RELI 1010 [1.0 credit]

Elementary Language Tutorial

Elementary study of the language required for studying a religious tradition.

Precludes additional credit for RELI 1902 (no longer

Prerequisite(s): Major/Minor in Religion or permission of the department.

Tutorial two hours a week.

RELI 1710 [0.5 credit]

Judaism, Christianity, Islam

A survey of the history, beliefs and practices of these major religious traditions.

Includes: Experiential Learning Activity

Precludes additional credit for RELI 1000 (no longer offered).

Lecture three hours a week.

RELI 1712 [0.5 credit]

Religions of South and East Asia

A survey of the history, beliefs, and practices of South and East Asian religious traditions, including Hinduism, Buddhism, Jainism, Sikhism, Daoism, Confucianism, and

Precludes additional credit for RELI 1715 (no longer offered), RELI 1716 (no longer offered).

Lecture three hours per week.

RELI 1731 [0.5 credit] **Religion and Culture**

Interpreting how religion is represented and expressed by great works of literature, film, art, music, and popular culture. Topics include myth and ritual, community and identity, body and sexuality, sacred space, creativity and imagination.

Precludes additional credit for RELI 1205 (no longer offered), RELI 1206 (no longer offered), RELI 1402 (no longer offered), and RELI 2002 (no longer offered). Lecture three hours a week.

RELI 1741 [0.5 credit]

Global Religions: Identity and Community

An introduction to major issues in the study of religion in global contexts, drawing on historical and contemporary examples.

Lecture three hours a week.

RELI 2010 [1.0 credit]

Intermediate Language Tutorial

Intermediate study of the language required for studying a religious tradition. Restricted to students registered in a Religion program.

Precludes additional credit for RELI 2902 (no longer offered).

Prerequisite(s): RELI 1902 (no longer offered) or RELI 1010 or permission of the department. Tutorial two hours a week.

RELI 2110 [0.5 credit]

Judaism

The history of Judaism and the Jewish people from the Second Temple until the present day. The organization, basic beliefs, social and ethical practices of the Jews and Judaism.

Precludes additional credit for RELI 1008 (no longer offered) and RELI 2508 (no longer offered). Lecture three hours a week.

RELI 2121 [0.5 credit]

Hebrew Bible

An introduction to the foundational text for Abrahamic religions that places its various literary genres, theologies, myths and histories within a larger ancient Near Eastern context. All texts in English translation.

Precludes additional credit for RELI 3505C taught in 2007-2008.

Lecture three hours a week.

RELI 2200 [0.5 credit] Christianity

An introduction to the history, beliefs, traditions, practices, and diversity of Christianity from its beginnings to the present day.

Lecture three hours per week.

RELI 2220 [0.5 credit]

Early Christianity

Introduction to the critical study of the writings of the New Testament with discussion of their Hellenistic and Jewish background, the historical Jesus, Paul and his letters, and historical and sociological explanations for the rise of the early church and interpretation of its writings.

Precludes additional credit for RELI 1003 (no longer offered), RELI 1200 (no longer offered) and RELI 2207 (no longer offered).

Lecture three hours a week.

RELI 2230 [0.5 credit] Global Christianity

Survey of recent and current Christian movements around the world, both by region and thematically, with emphasis on institutions and networks that connect Christian communities across national boundaries. Special consideration is given to the cultural and political capacities of such Christian communities and networks. Lecture three hours a week.

RELI 2310 [0.5 credit]

Islam

The study of Muslim religious tradition and investigation of its organization, basic beliefs, social and ethical principles and practices.

Precludes additional credit for RELI 1009 (no longer offered) and RELI 2509 (no longer offered).

Lecture three hours a week.

RELI 2330 [0.5 credit]

The Qur'an

An examination of the Qur'an's content, form, style, central themes, canonization, and classical and contemporary interpretive traditions. All texts are in English.

Prerequisite(s): second-year standing or approval from the department.

Lecture three hours a week.

RELI 2410 [0.5 credit]

Buddhism

Basic beliefs and practices of the Buddhist tradition and a brief survey of its development and transformations in India, Sri Lanka, Southeast Asia, Tibet, China and Japan. Lecture three hours a week.

RELI 2510 [0.5 credit]

Hinduism

Basic beliefs, practices, and social structures of the Hindu tradition as reflected in Hindu scriptures, myths and symbols, and philosophical schools.

Lecture three hours a week.

RELI 2535 [0.5 credit]

Religion and Gender

An exploration of issues related to gender and religion in historical and contemporary contexts.

Lectures three hours a week.

RELI 2600 [0.5 credit] Religions of China

Survey of the origins, development, and diffusion of Chinese religious traditions, including Confucianism, Daoism, Chinese Buddhism and popular religion(s). Includes: Experiential Learning Activity Lecture three hours a week.

RELI 2710 [1.0 credit]

Maccabees to Muhammad

The early history, literature and ideas of Judaism, Christianity and Islam from 200 BCE to 750 CE. Precludes additional credit for RELI 2208 (no longer offered).

Prerequisite(s): restricted to students in the Bachelor of Humanities & Religion program or by approval of the department.

Lecture three hours per week.

RELI 2711 [0.5 credit]

Love and Its Myths

An exploration of love as expressed in religious literatures and religious practices.

Lectures three hours a week.

RELI 2712 [0.5 credit] Religious Diversity of Canada

An historical survey emphasizing the interactions of various religious traditions in Canada, including indigenous religions, Christian missionary and colonial traditions, immigrant and global diaspora religions. Precludes additional credit for RELI 2307 Section A (2007-2008).

Lectures three hours a week.

RELI 2713 [0.5 credit]

Mystical and Contemplative Traditions

An historical and functional study of mystical experiences in their religious contexts, relying on examples from selected traditions such as the Christian, Buddhist, Hindu, Jewish and Muslim.

Precludes additional credit for RELI 2300 (no longer offered).

Lecture three hours a week.

RELI 2720 [0.5 credit]

Indigenous Religions of Canada

Religions of Inuit, First Nations and Métis peoples, past and present. Considerations include concepts of tradition, syncretism and "creative ritual." Primary sources may include textual, visual and oral materials. Course may include fieldwork, as well as in-class presentations by community elders.

Includes: Experiential Learning Activity Lecture three hours a week.

RELI 2732 [0.5 credit] Death and Afterlife

The meaning of death and afterlife in some religious traditions and secular philosophies with emphasis on the Hindu teaching of the immortal soul; the Hebraic idea of collective survival; the Christian doctrine of resurrection of the body; the Buddhist conception of no-soul and nirvana. Precludes additional credit for RELI 2308 (no longer offered).

Lecture three hours a week.

RELI 2735 [0.5 credit] Greek Religion

A study of religion in ancient Greece.

Also listed as CLCV 2103.

Precludes additional credit for CLCV 2102 (no longer offered), RELI 2734 (no longer offered), RELI 2102 (no longer offered).

Lecture three hours a week.

RELI 2736 [0.5 credit] Religion and Society

Cross-cultural survey of religious institutions, focusing on theories and methodologies in the study of religion. Topics may include myth, totemism, cults, ritual, belief systems, altered states of consciousness, new religious and/or new age movements and the relationship of religion with other social institutions and processes.

Includes: Experiential Learning Activity Also listed as ANTH 2550.

Lectures and workshop three hours a week.

RELI 2737 [0.5 credit]

Roman Religion

A study of religion in ancient Rome.

Also listed as CLCV 2104.

Precludes additional credit for CLCV 2102 (no longer offered) and RELI 2734 (no longer offered) and RELI 2102 (no longer offered).

Lecture three hours a week.

RELI 2738 [0.5 credit] Philosophy of Religion

A study of philosophical issues arising from religion. Topics may include: arguments for and against the existence of God, religious experience, death and the afterlife, miracles, God and evil, the relationship between religion and science, and the relationship between religion and ethics.

Also listed as PHIL 2601.

Prerequisite(s): a course in philosophy or second-year standing.

Lecture three hours a week.

RELI 2741 [0.5 credit]

Big Questions in Religious Studies

In this Inquiry course, students will be introduced to a specific topic in Religious Studies (e.g., ritual, narrative, space) and develop a research project related to it. Focus on fostering intellectual curiosity and developing practical skills of reading, writing and research fundamentals. Precludes additional credit for RELI 2002 (no longer offered), RELI 1205 (no longer offered), and RELI 1402 (no longer offered).

Seminar three hours per week.

RELI 2800 [0.5 credit] Indigenous Traditions

This course illuminates a recent category of "World Religions" by examining cases from all five continents, as well as in diaspora (e.g., Brazilian Candomblé, Roma/ Sinti religion). Considerations include the study of minority religions, religion in oral cultures, myth & ritual studies, colonialism, globalization.

Precludes additional credit for RELI 1720 (no longer offered).

Lecture three hours per week.

RELI 2810 [0.5 credit]

Special Topics in Religion and Popular Culture

Examination of interactions between religion and popular culture in the form of music, film, video games, literature, and other media. Topic and focus will vary year to year; please check departmental website for information. May be repeated for credit when the topic changes.

Includes: Experiential Learning Activity Lecture three hours per week.

RELI 2811 [0.5 credit]

Religions and the Environment

Attitudes in the major world religions to nature and the environment and recent responses by religious traditions to ecological degradation and crisis. Includes examination of religious sensibilities expressed in environmentalism. Precludes additional credit for RELI 3710 (no longer offered).

Lecture three hours per week.

RELI 2840 [0.5 credit]

Topics in Religion

Content of this course may vary from year to year. Please check departmental website for information on the topic. Precludes additional credit for repeated topics. Lecture three hours a week.

RELI 3000 [0.5 credit] Religion and Public Life

This course examines some aspects of the intersection between religion(s) and public life, broadly construed, including social, economic, political, institutional aspects, either in the contemporary world or focused on a particular historical period.

Seminar three hours per week.

RELI 3010 [1.0 credit]

Advanced Language Tutorial

Advanced study of the language required for studying a religious tradition.

Precludes additional credit for RELI 3902 (no longer offered).

Prerequisite(s): RELI 2902 (no longer offered) or RELI 2010 or permission of the department. Tutorial two hours a week.

RELI 3101 [0.5 credit]

Special Topics in Religions and the Body

Discussion of the embodiment of religious ideas in life, law, and practice, for example in food consumption, gender ideologies, sexuality, adornment, and death rituals. Topic will vary year to year; please check departmental website for information. May be repeated for credit when the topic changes.

Precludes additional credit for RELI 3130 (no longer offered), RELI 3131 (no longer offered), RELI 3331 (no longer offered), RELI 3734 (no longer offered). Lecture three hours a week.

RELI 3140 [0.5 credit]

The Holocaust: Historical and Religious Dimensions

Introduction to the historical and religious dimensions of the Holocaust. The foundations, perpetration and consequences of the Nazi Final Solution through primary sources including survivor testimony will be examined. Also listed as HIST 3714.

Prerequisite(s): third-year standing or permission of the department.

Lecture three hours a week.

RELI 3142 [0.5 credit]

Antisemitism, Then and Now

An examination of the long history of antisemitism to understand how historical forms of antisemitism have endured into the present and evolved over time. A variety of texts, images, media representations, and oral histories will be explored using methodologies from history and religious studies.

Also listed as HIST 3122.

Prerequisite(s): Third Year Standing.

Lectures three hours a week.

RELI 3220 [0.5 credit] Reformation Europe

A history of the Protestant and Catholic Reformations of the sixteenth century, with emphasis on the theological disputes of the protagonists and the impact of these disputes on the social, political and cultural developments of the era.

Also listed as HIST 3708.

Precludes additional credit for RELI 3708 (no longer offered).

Prerequisite(s): 0.5 credit at the 2000-level in HIST or third-year standing.

Lecture three hours a week.

RELI 3230 [0.5 credit]

Jesus of Nazareth

A study of the historical records of the life of Jesus, the methods used to interpret them, and the resulting images of Jesus.

Prerequisite(s): RELI 2220 or permission of the department.

Lectures three hours a week.

RELI 3231 [0.5 credit]

Paul of Tarsus

The social, religious, and historical context of Paul, the communities he founded, and the letters he wrote to them.

Prerequisite(s): RELI 2220 or permission of the department.

Lecture three hours a week.

RELI 3232 [0.5 credit] Christian Discipline

An historical survey of key Christian thought and practices at the individual and collective level. Topics may include self-discipline, body discipline, monastic discipline, church discipline and social discipline.

Precludes additional credit for RELI 3302 Section "A" taught in 2007-2008.

Prerequisite(s): third-year standing or permission of the department.

RELI 3250 [0.5 credit]

Evangelical Christianity in Social-Historical Perspective

The development of some protestant Christianities in relation to material factors, such as colonialism, industrial or consumer capitalism, imperialism, and in relation to major ideological trends, such as nationalism, economic or political liberalism and atheism.

Lecture three hours a week.

RELI 3301 [0.5 credit]

Music, Religion, and Spiritual Practices

Through various case studies, this course considers the role music plays in selected religions and spiritual practices.

Also listed as MUSI 3301.

Prerequisite(s): second-year standing.

Seminars three hours a week.

RELI 3330 [0.5 credit]

Sufism

An introduction to the main practical and theoretical dimensions of Islam's mystical tradition as seen through the life and work of its key representatives.

Prerequisite(s): second year standing or permission of the department.

Lecture three hours a week.

RELI 3333 [0.5 credit]

Topics in Magic, Witchcraft, and the Occult

Studies in issues related to magic, witchcraft and/or the occult in various historical, religious, and cultural contexts. Includes: Experiential Learning Activity

Prerequisite(s): third-year standing, or permission of the department.

Lectures 3 hours a week.

RELI 3340 [0.5 credit]

The Life and Image of Muhammad

Overview of the life and teaching of the Prophet Muhammad, and the most salient motifs and features of Muslim devotion to him.

Prerequisite(s): RELI 1710 or RELI 2310 or permission of the department.

Lecture three hours a week.

RELI 3360 [0.5 credit]

Special Topics in Islamic Texts & Narratives

A focus on post-Qur'anic Islamic literature and interpretive traditions (e.g. tafsir, hadith); texts and topics will vary from year to year; please check departmental website for information. May be repeated for credit when the topic changes.

Prerequisite(s): RELI 2310 or RELI 2330.

Lecture three hours per week.

RELI 3420 [0.5 credit]

Early Buddhism

An exploration of the development of early Buddhist philosophy, psychology, religious texts, and practices. Precludes additional credit for RELI 3215(no longer offered).

Prerequisite(s): RELI 2106 (no longer offered), second year standing or permission of the department. Lectures three hours a week.

RELI 3422 [0.5 credit] Buddhism Beyond India

This course explores a variety of topics associated with the development and transmission of Mahayana Buddhism throughout Asia, including scripture and narrative, ritual and practice, and art and architecture. Precludes additional credit for RELI 3217(no longer offered).

Prerequisite(s): RELI 2106 (no longer offered) or permission of the department.

Lecture three hours a week.

RELI 3520 [0.5 credit]

Early Hinduism

A historical survey of Hinduism from the Vedic era to the development of devotional Hinduism. Vedic religion and developments in early Hindu Philosophy and sectarian Hinduism.

Prerequisite(s): Second year standing. Lecture three hours a week.

RELI 3522 [0.5 credit]

Modern Hinduism

A survey of major developments in Hinduism since the period of colonial British rule. The development of "reform" Hinduism in the 18th and 19th centuries, and the emergence of Hindu nationalist movements in the 20th century.

Precludes additional credit for RELI 3007 (no longer offered).

Lecture three hours a week.

RELI 3722 [0.5 credit] Religion and Violence

This course examines "religious violence" from past and present, from the large (state violence) to the small (self-harm), and in between (communal violence, intimate partner violence), and asks why only some violence is commonly deemed religious and only some religion is commonly deemed violent.

Prerequisite(s): third-year standing or permission of the department.

Lecture three hours a week.

RELI 3732 [0.5 credit] Studies in Greek Art

A study of period or theme in the art and archaeology of Ancient Greece. Topics may vary from year to year. Also listed as ARTH 3102, CLCV 3306.

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat. Lecture three hours a week.

RELI 3733 [0.5 credit] Studies in Roman Art

A study of a period or theme in the art and archaeology of the ancient Romans. Topics may vary from year to year. Also listed as ARTH 3105, CLCV 3307.

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat. Lecture three hours a week.

RELI 3741 [0.5 credit] Classical Approaches to Religion

Examination of reflection on the nature and origin of religion from the ancient world up to key figures and founders of the discipline of the systematic, critical, and scientific study of religion in the nineteenth and early twentieth century.

Prerequisite(s): second-year standing. Lecture three hours per week.

RELI 3840 [0.5 credit] Special Topics in Religion

Content of this course may vary from year to year. Please check departmental website for information on the topic. Precludes additional credit for Permission of the unit is required to repeat this course.

Lecture three hours a week.

RELI 3850 [0.5 credit] Topics in the Study of Religion Abroad

This travel course explores religion in its historical and/or contemporary contexts in a particular geographic locale. Travel destinations, religious traditions studied, course content, and themes vary from year to year. Prerequisite(s): third year standing and 1.0 credit of study in the area related to the year's topic religion, and permission of the department. Permission of the department is required to repeat this course. Hours to be arranged. Costs associated with the course are borne by the student.

RELI 4602 [0.5 credit]

Is Religious Freedom a Human Right?

Legal, theoretical, and theological interconnections between religion and human rights. Evaluation of concepts including religious freedom, secularism, public sphere, accommodation and neutrality. Examination of religion and culture, interdependence of legal and religious perspectives, boundaries of religion and state, and religious compulsion. Use of case studies. Also listed as HRSJ 4602, LAWS 4602.

Prerequisite(s): LAWS 2908, LAWS 3602, and fourth-year Honours standing.

Seminar three hours a week.

RELI 4741 [0.5 credit]

Contemporary Issues in the Study of Religion

This course engages with the real world implications of late twentieth and twenty-first century scholarship on religion with a focus on applied learning and developing employable skills that facilitate transition from academia to a career. Highly recommended for students considering graduate school.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing or permission of the department.

Seminar three hours per week.

RELI 4840 [0.5 credit]

Tutorial

A tutorial on a topic in religious studies. Contents of the tutorial to be arranged with the supervising faculty member.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the Honours B.A.
Religion program and permission of the department.

RELI 4850 [0.5 credit] Seminar in the Study of Religion

Content of this course may vary from year to year. Please consult the departmental website for information on the topic

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the Honours B.A.
Religion program, or permission of the department.
Also offered at the graduate level, with different requirements, as RELI 5850, for which additional credit is precluded.

Seminar three hours a week.

RELI 4860 [0.5 credit]

Religion and Public Life: Community-Engaged Learning

Critical reflection on the theme of religion and public life as evidenced in today's Ottawa. Experiential learning via a 30-hour placement, contextualized through readings and in-class sessions (in weeks 3, 6, 12), and culminating in a reflective final project.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in BA Honours or BA Combined Honours Religion program, and 10.0 Major CGPA, and 1.0 credit in the area in which the practicum will take place, and permission of the Department. Field placement with weekly synchronous check-ins.

RELI 4990 [1.0 credit] Honours Research Essay

Honours research paper (approx. 40 pages) is due on the last day of winter term classes. Written proposal due to the Proposal Board on the first day of fall term classes. Please consult department document for full requirements and information.

Includes: Experiential Learning Activity
Precludes additional credit for RELI 4908 (no longer offered) and RELI 4909 (no longer offered).
Prerequisite(s): fourth-year standing in the Honours B.A. Religion program and permission of the department.

Russian (Minor)

This section presents the requirements for programs in:

Minor in Russian

Minor in Russian (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Russian.

Requirements:

•	
1. 3.0 credits in RUSS	3.0
2. 1.0 credit in RUSS at the 3000-level or higher	1.0
3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language.	

and degree must be satisfied.

Total Credits

4. The remaining requirements of the major discipline(s)

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered

following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

Regulations

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Russian (RUSS) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

RUSS 1010 [0.5 credit] First-Year Russian I

For students with no knowledge of Russian. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for RUSS 1110. Four hours a week.

RUSS 1020 [0.5 credit]

First-Year Russian II

Continuation of first-year Russian. Oral skills, reading and writing. Compulsory attendance.

Precludes additional credit for RUSS 1110.

Prerequisite(s): grade of C or higher in RUSS 1010, or permission of the School.

Four hours a week.

RUSS 1110 [1.0 credit]

Intensive First-Year Russian

For students with no knowledge of Russian. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for RUSS 1010 and RUSS 1020.

Eight hours a week (one term).

RUSS 2010 [0.5 credit] Second-Year Russian I

Further study of Russian to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Prerequisite(s): grade of C or higher in RUSS 1020 or RUSS 1110, or permission of the School. Four hours a week.

RUSS 2020 [0.5 credit] Second-Year Russian II

Continuation of second-year Russian. Further study of Russian to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Prerequisite(s): grade of C or higher in RUSS 2010, or permission of the School.

Four hours a week.

RUSS 3010 [0.5 credit] Third-Year Russian I

Further study of Russian to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for RUSS 3015 and RUSS 3025.

Prerequisite(s): grade of C or higher in RUSS 2020, or permission of the School.

Three hours a week.

RUSS 3015 [0.5 credit] Russian for Heritage Speakers I

For students who have attained Russian language proficiency in informal settings or who completed elementary school in a Russian speaking country. The course builds literacy skills, formalizes grammar awareness, and develops writing and reading language skills in a formal academic setting.

Precludes additional credit for all 1000 through 3000 level Russian courses, with the exception of RUSS 3025. Prerequisite(s): Permission of the School. Online.

RUSS 3020 [0.5 credit] Third-Year Russian II

Continuation of third-year Russian. Progress toward a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance. Precludes additional credit for RUSS 3015 and RUSS 3025.

Prerequisite(s): grade of C or higher in RUSS 3010, or permission of the School.

Three hours a week.

RUSS 3025 [0.5 credit] Russian for Heritage Speakers II

Further study of Russian to enhance students' literacy skills and formalize grammar awareness in a formal academic setting. Emphasis on the use of formal and academic language in oral and written form; further development of writing and reading skills.

Precludes additional credit for all 1000 through 3000 level Russian courses, with the exception of RUSS 3015.

Prerequisite(s): grade of C or higher in RUSS 3015, or

permission of the School. Online.

RUSS 4010 [0.5 credit] Fourth-Year Russian I

Advanced spoken and written Russian with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Prerequisite(s): grade of C or higher in RUSS 3020, RUSS 3025, or permission of the School.

Three hours a week.

RUSS 4020 [0.5 credit] Fourth-Year Russian II

Continuation of fourth-year Russian. Advanced spoken and written Russian with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Prerequisite(s): grade of C or higher in RUSS 4010, or permission of the School.

Three hours a week.

RUSS 4115 [0.5 credit] Russian for Social Studies

Russian language skills for translation of modern history and social science texts from Russian into English, with an emphasis on syntax. Compulsory attendance.

Includes: Experiential Learning Activity

Precludes additional credit for Russian translation offered under EURR 4901.

Prerequisite(s): permission of the School. Not open to students with native-like Russian proficiency. Three hours a week.

RUSS 4120 [0.5 credit] Russian for Research

Russian language skills for conducting research in modern history and social sciences, with an emphasis on practice and theory of translation from Russian into English. Compulsory attendance.

Includes: Experiential Learning Activity

Precludes additional credit for Russian translation offered under EURR 4902 (no longer offered).

Prerequisite(s): grade of C in RUSS 4115, or permission of the School. Not open to students with native-like Russian proficiency.

Three hours a week.

RUSS 4900 [1.0 credit] **Independent Study**

Research in a topic in Russian language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity Prerequisite(s): third- or fourth-year standing and enrolment in the Minor in Russian, grade of C or higher in

RUSS 3020 or equivalent, or permission of the School.

RUSS 4901 [0.5 credit] **Independent Study**

Research in a topic in Russian language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity Prerequisite(s): third- or fourth-year standing and enrolment in the Minor in Russian, grade of C or higher in RUSS 3020, or equivalent, or permission of the School.

Sexuality Studies (Minor)

This section presents the requirements for programs in:

· Minor in Sexuality Studies

Program Requirements

Minor in Sexuality Studies (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Sexuality Studies.

Requirements

1. 1.0 credit from:		1.0
FYSM 1402 [1.0]	Issues in Feminist Social Transformation	
WGST 1808 [1.0]	Introduction to Feminist Social Transformation	
2. 0.5 credit in:		0.5
SXST 2101 [0.5]	Sexuality Studies: A Critical Introduction	

Total Credits	4.0
5. The remaining requirements of the major discipline(s) and degree must be satisfied	
4. 1.5 credits in SXST or Approved Sexuality Studies Electives at the 3000-level or higher	1.5
3. 1.0 credit in SXST or Approved Sexuality Studies Electives at the 2000-level or higher	1.0

Notes:

1. Other courses may be substituted for the credits specified in items three and four, when material on sexuality is central to the course. Such substitutions must be individually approved by the Feminist Institute of Social Transformation. Students are encouraged to consult course descriptions of Special Topics courses.

Approved Sexuality Studies Electives

Note: access to these courses is not guaranteed, and may depend on space availability and the satisfaction of other requirements such as course prerequisites.

Regulations

In addition to the requirements listed here, students must satisfy:

 the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Sexuality Studies (SXST) Courses

SXST 2101 [0.5 credit]

Sexuality Studies: A Critical Introduction

While sexuality is often considered the most private and 'natural' of personal concerns, it is saturated with issues of social power, historical change, and public politics. This course offers a critical introduction to interdisciplinary studies of sexuality, focusing on history, theory, and cultural practice.

Includes: Experiential Learning Activity

Precludes additional credit for DIST 2101 (no longer offered).

Prerequisite(s): second-year standing or permission of the Institute.

Lectures and discussion groups three hours a week.

SXST 2102 [0.5 credit] Sexuality, Gender, and Security

Historical and contemporary analysis of surveillance, security, and regulation of sexuality, race, class, and gender. Students will critically examine how 'subversives' were created through discourse and administrative logics such as policy and law.

Includes: Experiential Learning Activity

Also listed as HUMR 2102.

Prerequisite(s): second year standing.

Lectures and discussions three hours a week.

SXST 2301 [0.5 credit]

Human Rights and Sexualities

An examination of human rights discourses, sexualities, and gender identities from an intersectional approach. Also listed as HRSJ 2301.

Prerequisite(s): second-year standing.

Lectures and discussion groups three hours a week.

SXST 3103 [0.5 credit] **Sexuality and Disability**

Exploration of ways that embodied categories of sex and gender, as well as desire are mediated through mainstream and alternative discourses of disability. Topics may include: crip theory, mental health issues, and LGBTQ sexualities.

Prerequisite(s): third-year standing or permission of the Institute.

Lecture three hours a week.

SXST 3104 [0.5 credit]

Transnational Sexualities

Students analyze sex, gender and sexuality as power relations within, and between nation-states comprising the Global North and South, as well as new knowledge created through national border crossings. Topics may include: Orientialism, colonialization, and diasporic identities.

Prerequisite(s): third-year standing and SXST 2101. Lecture three hours a week.

SXST 3106 [0.5 credit] Queer(ing) Archives

Examination of the archival turn in historical and theoretical perspective with an emphasis on sexuality. race, and gender as subjectivities in queer, trans, and colonial archives.

Also listed as HIST 3102.

Prerequisite(s): third-year standing.

Seminar three hours a week.

SXST 3812 [0.5 credit]

Interdisciplinary Topics in Sexuality Studies

An interdisciplinary analysis of one or more topics in sexuality studies. The topics of this course will vary year to year and are announced in advance of registration. Includes: Experiential Learning Activity

Prerequisite(s): Third year standing and SXST 2101 OR permission of the Institute of Women's and Gender Studies.

Lecture three hours per week. This course is repeatable as long as each topic is different.

SXST 4101 [0.5 credit]

Interdisciplinary Studies of Sexuality

A study of selected issues in sexuality studies considered from an interdisciplinary perspective. The course may focus on any one, or combination of, sexuality studies in relation to history, theory, and/or cultural practice. Includes: Experiential Learning Activity Precludes additional credit for DIST 4101 (no longer offered).

Prerequisite(s): SXST 2101 and fourth-year standing. Seminar three hours a week.

SXST 4102 [0.5 credit]

Queer Theory

A critical approach to gender and sexuality by engaging in key debates and texts in the field of gueer theory and studies.

Prerequisite(s): SXST 2101 and fourth-year standing. Also offered at the graduate level, with different requirements, as WGST 5102, for which additional credit

Seminar three hours a week.

SXST 4103 [0.5 credit]

Politics of Kink

This seminar analyzes critically the existence and regulation of non-normative sexual attitudes, behaviours and practices. Topics may include: non-monogamy, sadomasochism, pornography.

Prerequisite(s): fourth-year standing. Seminar three hours a week.

SXST 4104 [0.5 credit]

Sexuality and Political Economy

An interdisciplinary and intersectional approach to issues in the area of Sexuality Studies focusing on socioeconomic relations (e.g. class location, consumption) and the ways they mediate sex, gender, and sexual subject formation and governance. SXST 4101.

Includes: Experiential Learning Activity Prerequisite(s): fourth year standing.

Seminar three hours a week.

SXST 4105 [0.5 credit]

Queer Ecologies

Students engage with debates within sexuality studies and transgender studies regarding the interwoven relationships between gender, race, indigeneity, desire, bodies and ecological politics. Topics may include: climate change, gendered and sexualized landscapes, and speciesism.

Prerequisite(s): fourth-year standing or by permission of the department.

Seminar three hours a week.

SXST 4106 [0.5 credit]

Queer Aesthetics: Affect, Cultural Production, Sexuality

Critical examination of affective economies made in and through LGBTQ cultural production. Drawing from feminist, queer, trans and queer of colour critique, students will consider how queer affect, sentiment and emotions uniquely circulate in art and aesthetic objects.

Prerequisite(s): fourth-year standing or permission of the Institute.

Seminar three hours a week.

Spanish (Minor)

This section presents the requirements for programs in:

· Minor in Spanish

Minor in Spanish (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Spanish.

Requirements:

1 20 gradita in CDAN

Total Credits	4.
The remaining requirements of the major discipline(s) and degree must be satisfied	
3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language	
2. 1.0 credit in SPAN at the 3000-level or higher	1.0
1. 3.0 Cledits III SPAN	٥.١

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

Regulations

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Spanish (SPAN) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

SPAN 1010 [0.5 credit] First-Year Spanish I

For students with no knowledge of Spanish. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for SPAN 1110. Four hours a week.

SPAN 1020 [0.5 credit] First-Year Spanish II

Continuation of first-year Spanish. Oral skills, reading and writing. Compulsory attendance.

Precludes additional credit for SPAN 1110.

Prerequisite(s): grade of C or higher in SPAN 1010, or permission of the School.

Four hours a week.

SPAN 1110 [1.0 credit] Intensive First-Year Spanish

For students with no knowledge of Spanish. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for SPAN 1010 or SPAN 1020. Eight hours a week (one term).

SPAN 2010 [0.5 credit] Second-Year Spanish I

Further study of Spanish to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Precludes additional credit for SPAN 2110. Prerequisite(s): grade of C or higher in SPAN 1020, SPAN 1110, or permission of the School. Four hours a week.

SPAN 2020 [0.5 credit] Second-Year Spanish II

Continuation of second-year Spanish. Further study of Spanish to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for SPAN 2110.

Prerequisite(s): grade of C or higher in SPAN 2010, or permission of the School.

Four hours a week.

SPAN 2110 [1.0 credit] Intensive Second-Year Spanish

Further study of Spanish to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Precludes additional credit for SPAN 2010, SPAN 2020. Prerequisite(s): grade of C or higher in SPAN 1020, SPAN 1110, or permission of the School. Eight hours a week (one term).

SPAN 3010 [0.5 credit] Third-Year Spanish I

Continuation of the study of Spanish to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for SPAN 3110.

Prerequisite(s): grade of C or higher in SPAN 2020, SPAN 2110, or permission of the School.

Three hours a week.

SPAN 3020 [0.5 credit] Third-Year Spanish II

Continuation of third-year Spanish. Progress toward a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance. Precludes additional credit for SPAN 3110. Prerequisite(s): grade of C or higher in SPAN 3010 or permission of the School.

Three hours a week.

SPAN 3110 [1.0 credit] Intensive Third-Year Spanish

Continuation of the study of Spanish to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for SPAN 3010, SPAN 3020. Prerequisite(s): grade of C or higher in SPAN 2020, SPAN 2110, or permission of the School. Six hours a week (one term).

SPAN 3220 [0.5 credit]

Introduction to Spanish Linguistics

Introduction to principles of linguistic analysis, illustrated through Spanish. Sound systems, word structures and sentence structures of Spanish. Basic principles of language variation and change, as evidenced in the development of Spanish. Linguistic aspects of bilingualism as manifested in Spanish/English bilinguals.

Prerequisite(s): SPAN 3020 or SPAN 3110 or permission of the School.

Three hours a week.

SPAN 4010 [0.5 credit] Fourth-Year Spanish I

Advanced spoken and written Spanish with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Precludes additional credit for SPAN 4110, SPAN 4015, SPAN 4025.

Prerequisite(s): grade of C or higher in SPAN 3020, SPAN 3110, or permission of the School. Three hours a week.

SPAN 4015 [0.5 credit]

Spanish for Heritage Speakers I

For students who have attained Spanish language proficiency in informal settings. This course formalizes grammar awareness, enhances literacy skills, and develops existing language abilities in a formal academic setting.

Precludes additional credit for all SPAN courses numbered 4110 and below, except SPAN 4025.

Prerequisite(s): permission of the School. Online.

SPAN 4020 [0.5 credit] Fourth-Year Spanish II

Continuation of fourth-year Spanish. Advanced spoken and written Spanish with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Precludes additional credit for SPAN 4110, SPAN 4015, SPAN 4025.

Prerequisite(s): grade of C or higher in SPAN 4010, or permission of the School.

. Three hours a week.

SPAN 4025 [0.5 credit]

Spanish for Heritage Speakers II

For students who have started to develop existing Spanish language abilities in a formal academic setting. This course enhances students' written expression while building on advanced knowledge of Spanish grammar and vocabulary.

Precludes additional credit for all SPAN courses numbered 4110 and below, with the exception of SPAN 4015. Prerequisite(s): SPAN 4015 or permission of the School. Online.

SPAN 4110 [1.0 credit]

Intensive Fourth-Year Spanish

Advanced spoken and written Spanish with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Includes: Experiential Learning Activity Precludes additional credit for SPAN 4010 and SPAN 4020.

Prerequisite(s): grade of C or higher in SPAN 3020, SPAN 3110, or permission of the School.

Six hours a week (one term).

SPAN 4215 [0.5 credit] Spanish for Specific Purposes

Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Includes: Experiential Learning Activity
Prerequisite(s): grade of C or higher in SPAN 4020 or
SPAN 4110, or permission of the School.

Three hours a week.

SPAN 4320 [0.5 credit] Topics in Spanish Linguistics

Selected topic in Spanish linguistics.
Includes: Experiential Learning Activity
Prerequisite(s): LING 1001 or SPAN 3220, and grade of
C or higher in SPAN 4020 or SPAN 4110, or permission of
the School.

Three hours a week.

SPAN 4380 [0.5 credit]

Topics in Spanish-speaking Cultures

Selected topics in Spanish-speaking cultures and societies. Development of advanced language skills. Includes: Experiential Learning Activity Prerequisite(s): grade of C or higher in SPAN 4020 or SPAN 4110, or permission of the School. Three hours per week.

SPAN 4900 [1.0 credit] Independent Study

Research in a topic in Spanish language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the
Minor in Spanish, grade of C or higher in SPAN 4020 or
SPAN 4110 or equivalent, or permission of the School.

SPAN 4901 [0.5 credit] Independent Study

Research in a topic in Spanish language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the
Minor in Spanish, grade of C or higher in SPAN 4020 or
SPAN 4110 or equivalent, or permission of the School.

Social Work

This section presents the requirements for programs in:

· Bachelor of Social Work B.S.W. Honours

Senate Policy on Social Work Professional Suitability

Students in the Bachelor of Social Work (Honours) are expected to conform to the Canadian Association of Social Workers (CASW) Code of Ethics and the Ontario College of Social Workers and Social Service Workers (OCSWSSW) Code of Ethics and Standards of Practice. Students who violate these codes of ethics may be required, in accordance with the Senate Policy on Social Work Professional Suitability, to withdraw from the program.

Work Experience and Credit for Practicum I (SOWK 3600, SOWK 3601, SOWK 3602)

On admission to the B.S.W. (Honours) program, students who have four or more years of human service work experience may apply to the B.S.W. Field Coordinator for waiver of the 2.0 credit requirement for SOWK 3600 [2.0], SOWK 3601 [2.0]or SOWK 3602 [2.0].

If successful, they will be granted 1.0 elective credit in Social Work and will be required to take 1.0 additional elective credit in Social Work in lieu of SOWK 3600 [2.0], SOWK 3601 [2.0] or SOWK 3602 [2.0]. Full documentation of work experience and references are required. Applications must be received by September 1 of each year.

Regulations

In addition to the program requirements described here, students in the Bachelor of Social Work (Honours) must satisfy the University regulations, including:

 the graduation requirements for Honours programs, as described in Section 3.4.6 of the Academic Regulations of the University.

Students should consult with the School of Social Work when planning their programs and selecting courses.

Senate Policy on Social Work Professional Suitability

Students in the Bachelor of Social Work (Honours) are expected to conform to the Canadian Association of Social Workers (CASW) Code of Ethics and the Ontario College of Social Workers and Social Service Workers (OCSWSSW) Code of Ethics and Standards of Practice. Students who violate these codes of ethics may be required, in accordance with the Senate Policy on Social Work Professional Suitability, to withdraw from the program.

Academic Continuation Evaluation for Bachelor of Social Work (Honours)

Students in the B.S.W. (Honours) follow the continuation requirements for Honours programs, as described in Section 3.2.6 of the *Academic Regulations of the University*, with the following addition:

 Students with 15.5 or more program credits completed, but who have a Major CGPA less than 6.00, will be required to leave the B.S.W. program with the decision Required to Withdraw for Two Terms (WT).

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

• B.S.W. (Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. Although it is not an admission requirement, a 4U course in English is strongly recommended.

Preference will be given to applicants with human service work experience, which may be met by employment and/or volunteer experience. Applicants will be asked to complete a supplementary application that will assist in the evaluation of their suitability for the program. Detailed information about the supplementary application can be found at admissions.carleton.ca.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level, and will be considered for transfer into the B.S.W. program when spaces are available. Students who have completed an undergraduate degree are normally admitted into the program with third-year standing. Applicants will be asked to complete a supplementary application that will assist in the evaluation of their suitability for the program. Detailed information about the supplementary application can be found at admissions.carleton.ca.

Community College Applicants

Pathway agreements between the School of Social Work at Carleton University and several community colleges have been negotiated to facilitate the application of their graduates in their human or social service worker programs to Carleton's Bachelor of Social Work degree. Detailed information about these agreements can be found on the Admissions website: admissions.carleton.ca.

Social Work (SOWK) Courses

SOWK 1001 [0.5 credit]

Introduction to Social Welfare

Explores definitions of social welfare and the structure of the Canadian welfare state; evolution and devolution of the welfare state in Canada; social welfare and its relationship to social work, social change, and social justice. Lecture three hours a week.

SOWK 1002 [0.5 credit] Introduction to Social Work

Introduction to the profession of social work; evolution of the social work profession in Canada; social work knowledge, values and skills. Explores professional and regulatory social work bodies and international linkages. Lectures three hours a week.

SOWK 2001 [0.5 credit] Structural Analysis and Social Work

Evolution of structural social work, theories and critiques of structural social work and contemporary issues and challenges.

Prerequisite(s): SOWK 1001 and SOWK 1002. For Bachelor of Social Work students only. Lecture three hours a week.

SOWK 2005 [0.5 credit] Values and Ethics for Social Work

Focuses on knowledge and skills for ethical decision-making in social work; understanding social work values and ethics, accountability and the professional use of self. Includes: Experiential Learning Activity
Prerequisite(s): SOWK 1001 and SOWK 1002. For Bachelor of Social Work students only.
Lecture three hours a week.

SOWK 2100 [0.5 credit]

The Political Economy of the Social Welfare State

Political economic theories as lenses for structural analysis of social problems and policies affecting social work practice in Canada.

Prerequisite(s): SOWK 1001 and SOWK 1002 or permission of the School of Social Work. Lecture three hours a week.

SOWK 2202 [0.5 credit]

Introduction to Social Work Practice with Individuals and Families

Understand and develop skills required for working with individuals and families; active listening; use of self: engagement: rapport-building: interviewing and interventions; empathy; interpersonal and professional collaboration; supervision.

Includes: Experiential Learning Activity Prerequisite(s): SOWK 1001 and SOWK 1002. For

Bachelor of Social Work students only.

Lecture three hours a week.

SOWK 2203 [0.5 credit]

Introduction to Social Work Practice with Groups and Communities

Introduces students to theory and practice skills for group work and community work; structural social work with groups and communities.

Prerequisite(s): SOWK 1001 and SOWK 1002. For Bachelor of Social Work students only.

Lecture three hours a week.

SOWK 2301 [0.5 credit] Working with Children and Youth

Preventative and protective social work intervention with children and youth. Issues addressed include child neglect, abuse and violence in the context of family; organizational mandate and social political contexts. Programs and services for children and youth. Lecture three hours a week.

SOWK 3001 [0.5 credit]

Introduction to Research Methods in Social Work

Research methods used in social work: research paradigms; quantitative and qualitative analysis in social work and social welfare; stages in conducting research. Prerequisite(s): third-year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 3002 [0.5 credit]

Introduction to Statistical Analysis in Social Work

Fundamentals of statistical analysis; descriptive and inferential statistics and their use in social work research. Statistical tests including Chi-Square, t-tests, correlations and simple linear regressions.

Prerequisite(s): third-year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 3100 [0.5 credit]

Social Policy and Administration

Understanding the welfare state and social policy in Canada; exploring issues in administration including program design and implementation; understanding and developing skills in policy-making and policy analysis. Canadian focus; recognition of the distinctiveness of social policy in Quebec.

Prerequisite(s): SOWK 2100 and third-year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 3206 [0.5 credit]

Community Development and Social Change in an International Context

Introduction to theories, models and methods of community organizing as a strategy for social change in an international context.

Prerequisite(s): SOWK 1001 and SOWK 1002; or PAPM 1001 and PSCI 2003, or permission of the School of Social Work.

Lecture three hours a week.

SOWK 3207 [0.5 credit]

Human Rights Practice in Civil Society

Examines the advocacy role and capacity of organizations in civil society to increase popular participation in promoting and protecting human rights; includes transnational and national non-governmental organizations, grassroots movements, community organizations, and virtual or Internet-based organizations. Prerequisite(s): SOWK 1001 and SOWK 1002 or PAPM 1000 or HRSJ 1001 or permission of the School of Social Work.

Lecture three hours a week.

SOWK 3400 [0.5 credit] Special Topics in Social Work

Theory, policy or direct practice topics not covered in the regular course program. Choice of topics varies from year to year.

Prerequisite(s): SOWK 1001 and SOWK 1002 or permission of the School of Social Work. Lecture three hours a week.

SOWK 3600 [2.0 credits]

Practicum I

Focus on integrating theory and practice in an approved community setting supervised by a field supervisor. Graded SAT/UNS.

Includes: Experiential Learning Activity

Precludes additional credit for SOWK 3601, SOWK 3602. Prerequisite(s): SOWK 2001, SOWK 2005, SOWK 2100, SOWK 2202, SOWK 2203, and permission of the School of Social Work. Student must be Eligible to Continue (EC) in the BSW program and have a 6.00 CGPA in the Social Work major, including in the term of application.

352 hours in the practicum setting over the fall and winter terms and compulsory practicum seminars.

SOWK 3601 [2.0 credits] Practicum I

Focus on integrating theory and practice in an approved community setting supervised by a field supervisor. Graded SAT/UNS.

Includes: Experiential Learning Activity

Precludes additional credit for SOWK 3600, SOWK 3602. Prerequisite(s): Third-year standing upon admission into the BSW program, SOWK 2001, SOWK 2005, SOWK 2100, SOWK 2202, SOWK 2203, and permission of the School of Social Work. Student must be Eligible to Continue (EC) and have a 6.00 CGPA in the Social Work major, including in the term of application, and must be newly admitted into the BSW program.

352 hours in the practicum setting over the winter term and compulsory practicum seminars.

SOWK 3602 [2.0 credits] Practicum I

Focus on integrating theory and practice in an approved community setting supervised by a field supervisor. Limited enrolment subject to discretion of Practicum

Coordinator. Graded as SAT/UNS.

Includes: Experiential Learning Activity Precludes additional credit for SOWK 3601, SOWK 3600. Prerequisite(s): SOWK 2001, SOWK 2005, SOWK 2100, SOWK 2202, SOWK 2203, and permission of the School of Social Work. Student must be Eligible to Continue (EC) in the BSW program and have a 6.00 CGPA in the Social Work major, including in the term of application. 352 hours in the practicum setting in the fall term and

compulsory practicum seminars.

SOWK 3804 [0.5 credit]

Law of the Family

Legal framework surrounding the family and family relationships in Canadian society. Topics include marriage and cohabitation, matrimonial support, custody and access, and dissolution of marriage. State interventions through law; law and change in family structures; equality issues; dispute resolution processes.

Also listed as LAWS 3804.

Prerequisite(s): LAWS 2201 and LAWS 2202.

Lectures three hours a week.

SOWK 4000 [0.5 credit]

Social Work and Indigenous Peoples

Social work in partnership with Indigenous peoples in Canada; impact of the past on current relationships; rebuilding through dialogue and respect; understanding Indigenous social work.

Prerequisite(s): third-year standing in Bachelor of Social Work.

Lecture three hours each week.

SOWK 4001 [0.5 credit]

Advanced theory, methods, techniques, and skills for direct social work practice with individuals and families; individual and family assessments, treatment planning, intervention skills, and evaluation.

Includes: Experiential Learning Activity

Prerequisite(s): SOWK 2202 and fourth-year standing in

the Bachelor of Social Work. Seminar three hours a week.

SOWK 4002 [0.5 credit]

Advanced Social Work Practice with Groups

Advanced theory, methods, techniques, and skills for social work with groups; knowledge of group work and various group formats; and social work interventions in group process.

Prerequisite(s): SOWK 2203 and fourth-year standing in the Bachelor of Social Work.

Seminar three hours a week.

SOWK 4003 [0.5 credit]

Advanced Social Work Practice with Communities

Advanced theory, methods, techniques and skills for engaging in community-based practice. Politics and challenges of social work community organizing and strategies and skills for community work.

Prerequisite(s): SOWK 2203 and fourth-year standing in the Bachelor of Social Work.

Seminar three hours a week.

SOWK 4004 [0.5 credit]

Social Policy Development and Practice

Social policy development processes in government and non-governmental agencies; refining skills in evaluating and critiquing processes of policy formation; role of lobbying and social activism.

Prerequisite(s): SOWK 3100 and fourth-year standing in the Bachelor of Social Work.

Seminar three hours a week.

SOWK 4103 [0.5 credit]

Practice and Policy in Immigration

History of immigration policies in Canada; direct practice with immigrants and refugees; diaspora, settlement and integration issues; immigrants and refugee women; intergenerational family relations; resources and community organizing.

Prerequisite(s): third-year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 4204 [0.5 credit] Social Work and Aging

Social perspectives on aging with focus on models of practice that contribute to the independence of elderly people. Social programs and policies, such as social insurance, social services, housing, public health and health care. Social, psychological and political issues related to independence in later life.

Prerequisite(s): third-year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 4209 [0.5 credit]

Special Topics in Direct Social Work Practice

Theory and knowledge development of direct practice topics not in the regular course program. Topics may vary from year to year.

Prerequisite(s): third year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 4210 [0.5 credit]

Special Topics in Direct Social Work Practice

Theory and knowledge development of direct practice topics not in the regular course program. Topics may vary from year to year.

Prerequisite(s): third-year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 4211 [0.5 credit]

Special Topics in Social Policy

Theory and knowledge development of social policy topics not in the regular course program. Topics may vary from year to year.

Prerequisite(s): SOWK 3100 and third year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 4213 [0.5 credit]

Special Topics in Social Work

Theory and knowledge development of a combination of practice and policy topics not in the regular course program. Topics may vary from year to year.

Prerequisite(s): third-year standing or permission of the School of Social Work.

Lecture three hours a week.

SOWK 4300 [0.5 credit]

Social Work and Persons with Disabilities

Social work theory and practice with persons with disabilities. Structural analysis of theory, models, policies and practices; disability rights; critical analysis of medical model and ableism.

Prerequisite(s): fourth-year standing in the Bachelor of Social Work.

Lecture three hours a week.

SOWK 4301 [0.5 credit]

Racialization and Social Work

Social work and racialization; racism and consequences; critical analysis of cultural formations, difference, and identities; critical examination of whiteness and privilege. Prerequisite(s): fourth-year standing in the Bachelor of Social Work.

Lecture three hours a week.

SOWK 4302 [0.5 credit]

Poverty and Social Welfare Policy

Social work analysis of theories of poverty and economic inequality; labour force participation; poverty and wealth and income distribution in Canada and international comparisons; Canadian social policies and poverty. Prerequisite(s): fourth-year standing in the Bachelor of Social Work.

Lecture three hours a week.

SOWK 4303 [0.5 credit] Gender and Sexuality

Social work and social, political, institutional and economic relations shaping everyday experiences of gender and sexuality and implications for contemporary social work.

Prerequisite(s): fourth-year standing in the Bachelor of Social Work.

SOWK 4600 [2.0 credits]

Practicum II

Development, application, testing and integration of knowledge, theory and skills in practice with individuals, families, groups and communities, in research or in social administration and policy. Graded SAT/UNS.

Includes: Experiential Learning Activity

Precludes additional credit for SOWK 4601, SOWK 4602. Prerequisite(s): third-year standing in the BSW program; SOWK 2001, SOWK 2005, SOWK 2100, SOWK 2202, SOWK 2203, SOWK 3100; SOWK 3600 or 3601 or 3602, and permission of the School of Social Work. Student must be Eligible to Continue (EC) in the BSW program and have a 6.00 CGPA in the Social Work major, including in the term of application.

352 hours in the practicum setting in the fall or summer term and compulsory practicum seminars.

SOWK 4601 [1.0 credit]

Practicum IIA

Development, application, testing, and integration of knowledge, theory and skills in practice with individuals, families, groups and communities, in research or social administration and policy. Part-time practicum must be taken consecutively with SOWK 4602. Graded SAT/UNS. Includes: Experiential Learning Activity Precludes additional credit for SOWK 4600.

Prerequisite(s): third-year standing in the BSW program; SOWK 2001, SOWK 2005, SOWK 2100, SOWK 2202, SOWK 2203, SOWK 3100; SOWK 3600 or 3601 or 3602, and permission of the School of Social Work. Student must be Eligible to Continue (EC) in the BSW program and have a 6.00 CGPA in the Social Work major, including in

176 hours in the practicum setting and compulsory practicum seminars.

SOWK 4602 [1.0 credit] Practicum IIB

the term of application.

Development, application, testing, and integration of knowledge, theory and skills in practice with individuals, families, groups and communities, in research or social administration and policy. Part-time practicum must be taken consecutively with SOWK 4601. Graded SAT/UNS. Includes: Experiential Learning Activity

Precludes additional credit for SOWK 4600.

Prerequisite(s): third-year standing in the BSW program; SOWK 2001, SOWK 2005, SOWK 2100, SOWK 2202, SOWK 2203, SOWK 3100; SOWK 3600 or 3601 or 3602, SOWK 4601 and permission of the School of Social Work. Student must be Eligible to Continue (EC) in the BSW program and have a 6.00 CGPA in the Social Work major, including in the term of application.

176 hours in the practicum setting.

SOWK 4702 [0.5 credit]

Special topic in Criminal Justice and Social Policy

Selected topic in criminal justice and social policy. Topics announced in advance. Part of the Summer School in Criminal Justice and Social Policy and offered by the Department of Sociology.

Also listed as LAWS 4702, SOCI 4702.

Prerequisite(s): fourth-year Honours standing or permission of the School of Social Work.

SOWK 4908 [1.0 credit]

Honours Essay

Research essay under supervision of accredited faculty member. Project may be in the form of case study, historical study or other form that meets the approval of faculty advisor.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of Social Work and permission of the School of Social Work.

Sociology

This section presents the requirements for programs in:

- Sociology B.A. Honours
- Sociology B.A. Combined Honours
- Sociology B.A.
- · Stream in Social Justice
- Specialization in Global Inequalities and Social Change B.G.In.S. Honours
- Stream in Global Inequalities and Social Change B.G.In.S.
- · Minor in Community Engagement
- · Minor in Sociology

5. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Minor in Sociology (4.0 credits)

Open to all undergraduate degree students in programs other than Sociology, the B.A. in Criminology and Criminal Justice with a concentration in Sociology, or the B.G.In.S. Stream/Specialization in Global Inequalities and Social Change. Students in any Anthropology major should select courses carefully if they wish to use courses from the major in their minor Sociology. Such students should always consult the department.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Sociology.

Requirements

1.	1.0 credit from:		1.0			
	SOCI 1001 [0.5] & SOCI 1002 [0.5]	Introduction to Sociology I Introduction to Sociology II				
	SOCI 1003 [1.0]	Introduction to Sociological Perspectives				
2.	1.0 credit in:		1.0			
	Methods: SOCI 2000 plus one of SOCI 2001 or SOCI 3000					
	or					
	Theory: SOCI 2005	[1.0]				
3.	3. 2.0 credits in SOCI at the 2000-level or higher					
	4. The remaining requirements of the major discipline(s) and degree must be satisfied					
To	Total Credits 4.0					

Regulations

First Year Courses

Students may receive credit for SOCI 1001 and SOCI 1002, or SOCI 1003. Only one of these credits will be included in the Major CGPA. The other will count against the total number of credits in sociology and/or anthropology.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult

the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health

Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention: français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- 3. Declining more than one job offer during the job search;
- Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours Sociology: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.A. Honours Sociology program;
- 2. Obtained third-year standing;
- Successfully completed, by the start-date of the first work term, SOCI 2000 and SOCI 2001 or SOCI 3000;
- Obtained an Overall CGPA of at least 7.00 and a Major CGPA of at least 8.00. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours Sociology students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view

the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A.

(Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French,

Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Direct Admission to the First Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European, Russian, and Eurasian Studies, French, Geography, Geography with a Concentration in Physical Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Sociology (SOCI) Courses

SOCI 1001 [0.5 credit]

Introduction to Sociology I

Introduction to the discipline of sociology; theory, methods, history; key thinkers, concepts and disciplinary subfields in sociology; issues and problems in contemporary society. Emphasis on the everyday world of lived experience and social relations. Topics may include class, gender, sexuality, racialization, culture, social interaction.

Includes: Experiential Learning Activity Precludes additional credit for SOCI 1003. Lectures/discussion groups three hours a week.

SOCI 1002 [0.5 credit]

Introduction to Sociology II

This course will further explore and expand upon the key thinkers, concepts and disciplinary subfields in sociology. The focus of analysis will shift from the everyday world to social institutions and structural processes. Topics may include globalization, education, media, health, social movements, colonialism, urbanization.

Includes: Experiential Learning Activity

Precludes additional credit for SOCI 1003, SOCI 1005.

Prerequisite(s): SOCI 1001.

Lectures/discussion groups three hours a week.

SOCI 1003 [1.0 credit]

Introduction to Sociological Perspectives

Introduction to the discipline of sociology; theory, methods and history; key thinkers, concepts and disciplinary subfields in sociology; issues and problems in contemporary society.

Precludes additional credit for SOCI 1001 and SOCI 1002.

Lectures/discussion groups three hours a week.

SOCI 1005 [0.5 credit]

Sociology for Bachelor of Commerce Students

The origins of sociology, why sociology matters, and how it is practiced. Concepts such as class, race, ethnicity, gender, sexual orientation, work, organization, and social movements help students develop their sociological 'eve' for thinking critically about society and their place within it. Precludes additional credit for SOCI 1002.

Prerequisite(s): restricted to B.Com. students. Lecture three hours a week.

SOCI 2000 [0.5 credit]

Foundations of Sociological Inquiry

Introduction to sociological inquiry through the study of sociological approaches to knowledge, the relationship of theory to methods, introduction to different methodological traditions including their epistemological foundations, value and limitations. Students will acquire foundational academic skills.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours per week.

SOCI 2001 [0.5 credit]

Introduction to Qualitative Research Methods

Introduction to theory and practice of qualitative research methods involving human participants: research design; ethics; data analysis; data generation methods. Methods may include: qualitative interviewing, ethnography, oral history, focus groups, observation. Additional topics may include: historical development/debates in qualitative research/kev historical studies.

Includes: Experiential Learning Activity

Prerequisite(s): SOCI 2000.

Lectures/discussion groups or labs three hours a week.

SOCI 2005 [1.0 credit]

Histories of Sociological Thought

Traces theoretical traditions in sociological thought, situating traditions within historical, social and intellectual contexts. At least four of the following will be covered: orientalism, imperialism, colonialism; capitalism, social organization, rationalization; subject formation, identity; self and the everyday; work and leisure; and, social change and revolution.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2010 [0.5 credit]

Critical Approaches to Economic Inequality

Theoretical and empirical examination of economic inequalities in Canada. Topics may include the experience of economic marginalization, how economic inequality is reproduced, how economic inequalities intersect with other forces, such as gender and racialized inequality, and struggles to transform the economic organisation of society.

Includes: Experiential Learning Activity Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002. Lectures/discussion groups three hours a week.

SOCI 2020 [0.5 credit] Race and Ethnicity

Introduction to some of the recent theoretical literature and research on the issues of race, racism and ethnicity. Concepts, controversies and definitions dealing with race and ethnicity from the Canadian context and internationally.

Also listed as ANTH 2020.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002. Lectures/discussion groups three hours a week.

SOCI 2030 [0.5 credit] Work, Industry and Occupations

An analysis of work practices and settings in societies. Topics of interest include the development of industrial and postindustrial societies; the experience of work, the structuring of work in organizations and in the society; conflict, resistance and labour relations, and the impact of new technologies.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2035 [0.5 credit] Technology, Culture and Society

Introduction to the principal theories and methods used by Science and Technology Studies (STS) scholars to examine the social and cultural shaping of technology. The substantive focus of the course is on the design, development, production, diffusion, consumption and use of technology.

Also listed as DIGH 2035.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002. Lectures/discussion groups three hours a week.

SOCI 2040 [0.5 credit] Food, Culture and Society

The sociological analysis of food and eating. The relationship between food and identity; the development of social movements organized around food; and more generally, on practices relating to the production, preparation, and consumption of food.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2043 [0.5 credit] Sociology of the Family

How do we conceptualize the family? How has family changed over history? What are the diverse realities of families today? This course examines different family forms, relations and dynamics, emphasizing the relationship between family and larger social forces, such as gender, immigration or class.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2045 [0.5 credit] Gender and Society

How gender and gender relations play out in everyday lives, and how people resist, reproduce, or reinforce gender norms. Considers how gender shapes experiences of family, school, work, media, relationships, bodies, violence, etc. Canadian and global cases are examined. Includes: Experiential Learning Activity Prerequisite(s): SOCI 1001 and SOCI 1002. or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002. Lectures/discussion groups three hours a week.

SOCI 2050 [0.5 credit] Sociology of Health

Critical approaches to understanding health, illness and healthcare and how social, cultural, political and economic factors affect our health, our experiences with illness, and our encounters with healthcare systems.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2060 [0.5 credit]

Girlhood in Contemporary Contexts: Anthropological and Sociological Perspectives

Drawing on anthropological and sociological approaches, students will explore girls' lives in diverse cultural, political, economic, and social contexts. Topics may include: movement and migration, education, media, imaging and humanitarianism, consumerism, agency and activism, health, and violence.

Also listed as ANTH 2060.

Prerequisite(s): second year standing or permission of the

Two hour lecture plus one hour tutorial per week.

SOCI 2080 [0.5 credit]

Humans/Animals: the More-than-Human in Social Research

Examination of relationships between humans and animals in the sociological and broader social studies canon, including: multispecies ethnography, the role of the 'more than human' in Indigenous legal orders, posthumanist and STS theory, relationships between humans and animals and other non-human entities in the Anthropocene.

Also listed as ANTH 2080.

Lecture/discussion groups three hours per week.

SOCI 2150 [0.5 credit] Social Psychology

Theoretical and empirical consideration of society and the individual. Topics include the public realm, situations, roles and interpersonal relations. Beliefs, attitudes, interests and opinions, leadership and decision making, conformity, coercion and compromise may be also examined. Precludes additional credit for PSYC 2100. Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002. Lectures/discussion groups three hours a week.

SOCI 2160 [0.5 credit]

War and Society

Sociological theory and research on large-scale conflict. How society and culture shape warfare through processes of socialization, bureaucratization, and ideological representation. Social impacts of war in terms of gender, race and ethnicity, class relations, and cultural values. Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2170 [0.5 credit]

Foundations in Social Justice

Introduction to the study of social justice and the theorization of social justice sociology. Critical examination of resistance to oppression, social movements and solidarity both in Canada and transnationally. Exploration of the relationship between the university and community-based action.

Includes: Experiential Learning Activity
Prerequisite(s): SOCI 1001 and SOCI 1002, or
SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.
Lectures/discussion groups three hours a week.

SOCI 2180 [0.5 credit]

Foundations in Community Engagement

Study of theoretical debates and practical applications relating to community engagement with a focus on Canadian examples. Exploration of the contested and complex meanings of community engagement in and between diverse communities, public institutions, non-profit sector and private enterprise with an emphasis on social justice.

Includes: Experiential Learning Activity

Also listed as ANTH 2180.

 $\label{eq:condition} \mbox{Prerequisite(s): Second year standing or permission of}$

instructor.

Lecture, discussion and project work three hours a week.

SOCI 2445 [0.5 credit] Sociology of Deviance

The construction of deviant behaviour and the consequences of such construction for both deviant and conforming persons. Emphasis upon deviance as a normal and necessary result of the socio-cultural processes resulting from, and affecting the activities of a viable society.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2450 [0.5 credit] Crime and Society

Social reactions to crime, criminalization processes, and the criminal justice system, and their intersection with power relations and social inequalities.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2702 [0.5 credit] Power and Social Change

An investigation of power and culture, with a focus on how ordinary people contribute to social change. Topics may include activism, leisure, consumption, identity, fashion, sexuality, tourism, health, pollution and work.

Includes: Experiential Learning Activity
Prerequisite(s): SOCI 1001 and SOCI 1002, or
SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.
Lectures/discussion groups three hours a week.

SOCI 2705 [0.5 credit]

Popular Culture in the Digital Age

An examination of various approaches to analyzing digital media and their role in the production and consumption of contemporary cultural forms and practices. Students will reflect upon their use of digital media and the influence they have on their lives and popular culture, more generally.

Also listed as DIGH 2705.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002. Lectures/discussion groups three hours a week.

SOCI 2810 [0.5 credit]

Special Topics in Sociology

Special topics in sociology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2820 [0.5 credit]

Special Topics in Sociology

Special topics in sociology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002.

Lectures/discussion groups three hours a week.

SOCI 2910 [0.5 credit]

Course-Related Tutorials in Sociology

Consult the Department for information.

SOCI 2920 [0.5 credit]

Course-Related Tutorials in Sociology

Consult the Department for information.

SOCI 3000 [0.5 credit]

Descriptive Statistics in Social Research

The conceptual foundations of descriptive statistics and applications of these statistics using software (SPSS or Stata) to analyze and interpret social science data. Topics include frequency distributions, graphs, measures of central tendency and dispersion, measures of association, bivariate regression, and introduction to multivariate statistics.

Includes: Experiential Learning Activity

Prerequisite(s): SOCI 2000 and third-year standing. Lectures/computer labs three hours a week.

SOCI 3002 [0.5 credit]

Inferential Statistics in Social Research

Inferential statistics and hypotheses testing used in social science research. Topics may include relationship between samples and population, methods of sample selection, central limit theorem, confidence levels and confidence intervals, overview of selected hypothesis tests, multivariate data analysis and multiple regression analysis.

Includes: Experiential Learning Activity

Prerequisite(s): SOCI 3000 or CRCJ 3001 and third-year

standing.

Lectures/computer labs three hours a week.

SOCI 3004 [0.5 credit]

Qualitative Research: Approaches and Strategies

Specialized examination of select strategies or approaches to qualitative research. Topics may include: advanced application of research design involving human participants; historical research methods; textual/document-based research; visual sociologies; critical methodologies (such as feminist or decolonizing methods).

Includes: Experiential Learning Activity
Prerequisite(s): SOCI 2001 and third-year standing.
Lectures/computer labs three hours per week.

SOCI 3006 [0.5 credit]

Thinking the Social: Theories and Approaches

Examination of a select sociological tradition or thinker, or theoretically intensive study of a sociological area. Consult the department for topics offered.

Precludes additional credit for SOCI 3005 (no longer offered).

Prerequisite(s): SOCI 2005 and third-year standing. Lectures/discussion groups three hours a week.

SOCI 3010 [0.5 credit]

Power, Oppression and Resistance

What makes inequalities so persistent? Theoretical and empirical examination of the intersection of social inequalities in Canada and globally, including class, gender, race and ethnicity and age; study of resistance to structures and cultures of inequalities.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

SOCI 3019 [0.5 credit]

Sociology of International Migration

This course draws from global and interdisciplinary theoretical perspectives to examine primarily though not exclusively Canadian immigration policy and the socio-historical forces shaping policy, migration patterns, permanent, temporary and circular migration, the experiences of immigrants, refugees and migrants; and diasporic and transnational communities and identities. Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours per week.

SOCI 3020 [0.5 credit] Studies in Race and Ethnicity

Race, racism and ethnicity in Canada and internationally. Critical perspectives on race and ethnicity, which intersect with other social relations. Racism, Eurocentrism, Orientalism, nationalism, colonialism, international migration, citizenship, and diasporic cultures. Also listed as ANTH 3020.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3027 [0.5 credit] Globalization and Human Rights

Examination of the various dimensions and meanings of globalization and its relationship with human rights, with emphasis on the implications of the emerging global economy for economic, social, political and cultural rights. Also listed as ANTH 3027, PSCI 3802.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3030 [0.5 credit]

Studies in Work, Industry and Occupations: Authority and Expertise

The nature and place of expert knowledge in societies. The development of the practices and organization of the professions and their relation to social stratification, the state, patriarchy and gender; the systematic development of knowledge in societies.

Includes: Experiential Learning Activity
Prerequisite(s): SOCI 1001 and SOCI 1002, or
SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and thirdyear standing.

Lecture three hours a week.

SOCI 3035 [0.5 credit]

Science, Culture and Society: Social Studies of Science

Principal theories and methods used by Science and Technology Studies scholars to examine the social construction of scientific knowledge. Topics may include the demarcation of science from non-science, the relationship between experts and laypersons, and the study of scientific controversies.

Also listed as ANTH 3035.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3038 [0.5 credit] Studies in Urban Sociology

Issues related to people and the urban environment, including the historical process of urbanization, rural-urban transition, the diffusion of urban values and life styles, contemporary urban problems such as urban renewal, pollution and the pressures of the urban environment on social institutions.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3040 [0.5 credit] Studies in the Sociology of Gender

Sociological and feminist perspectives; applied understandings of gender, gender relations; women's and men's lives in contemporary Canadian society and in historical and cross-cultural terms. Multiple intersections between gender, race, ethnicity, class and sexuality. Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3044 [0.5 credit] Sociology of Sex and Sexuality

Key concepts of sex, sexuality, gender, eroticism and pleasure. The history of sex and sexuality. The regulation of sexual relations and practices. Social movements relating to sexuality, gender identities and sexual equality. Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

SOCI 3045 [0.5 credit]

Children and Childhood in a Globalized World

A socio-historical and cross-cultural exploration of constructions, deconstructions, and the experience of childhood in Canada and internationally. Compulsory schooling, child labour, protection and regulation in law, the commodification and equalization of childhood, children's social movements, and the emergence of children's rights discourses.

Also listed as ANTH 3045.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3050 [0.5 credit] Studies in the Sociology of Health

Current theory and research on health, disease and social responses to health issues. Topics include population differences incidence and prevalence of morbidity and mortality, access to care and government health policy. Focus upon cultural definitions of health and their consequences for health promotion practices. Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3055 [0.5 credit] Studies in Addictions

Survey of alcohol and other drug use in cross-cultural and sub-group perspectives. Relationships between culture, social structure and patterns of use of psychoactive substances. Topics may include: substance use and the life cycle; gender and psychoactive substances; problem and non-problem use.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3056 [0.5 credit] Women and Health

Women's health issues and how they relate to social, political and economic factors. The intersection of gender, ethnicity, class, sexual orientation and able-bodiedness with women's health.

Includes: Experiential Learning Activity
Prerequisite(s): SOCI 1001 and SOCI 1002, or
SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and thirdyear standing.

Seminar 3 hours per week.

SOCI 3060 [0.5 credit] Critical Disability Studies

Course engages contemporary disability theory, culture, and activism to consider bodily difference and its relation to the workings of power and social control, accessibility, normalization, ableism, and medicalization. Students will gain an understanding of the contemporary debates, theories, and methodologies of critical disability studies. Also listed as DBST 3060.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lectures three hours a week.

SOCI 3150 [0.5 credit] Sociology of Rightwing Populism

This course will make sense of Trumpism and other rightwing populisms by interrogating their sociological backgrounds and histories. Students will learn to recognize the systems and structures that make populist leaders possible, and how trends in North America relate to far-right movements elsewhere.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3160 [0.5 credit] Political Violence

Sociological examination of political violence. Theoretical analysis of violence as social action that is historically situated and shaped by cultural and economic forces; the relationship between political violence and identity, nation/nationalism, modernity and globalisation.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third year standing.

Lectures three hours a week.

SOCI 3170 [0.5 credit] Social Justice in Action

Current debates in social justice theory and practice. The course includes substantial engagement with community actors, including activists and advocates as guest speakers. Students will be exposed to social justice principles applied in the community through a variety of approaches.

Includes: Experiential Learning Activity
Prerequisite(s): SOCI 1001 and SOCI 1002, or
SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and thirdyear standing.

SOCI 3210 [0.5 credit]

Special Topics in Sociology

Special topics in sociology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3220 [0.5 credit] **Special Topics in Sociology**

Special topics in sociology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3300 [0.5 credit]

Studies in the Sociology of Education

Critical analysis of selected work in educational sociology. Topics may include sociological theories of education, school ethnography, contemporary educational policy and practice. Note: Topic will vary in keeping with the interests of students and instructor.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3410 [0.5 credit]

Studies in Criminal Justice

Developments in criminal justice are examined in the context of broader social issues. Particular emphasis will be placed on contemporary developments in criminal justice institutions, programs and practices.

Includes: Experiential Learning Activity Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and thirdyear standing.

Lecture three hours a week.

SOCI 3420 [0.5 credit]

Studies in Gender and Criminal Justice

An overview of current issues related to women as both perpetrators and victims of crime and the Canadian criminal justice system's response to them. Topics may include woman abuse, sexual assault, and federally sentenced women.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3430 [0.5 credit]

Studies in Collective Action and Social Movements

What is a social movement? How do sociologists distinguish between social movements and revolutions? What factors influence social movement development? What do they look like? Theoretical and empirical study of the relationship between social movements and social change.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3480 [0.5 credit] Law and Social Regulation

A study of sociological theories of law as well as the nature of legal institutions. Impacts of legal regulation on various social institutions and on processes of social debate and conflict.

Precludes additional credit for LAWS 3106 (no longer

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and thirdyear standing.

Lecture three hours a week.

SOCI 3570 [0.5 credit]

Studies in Art, Culture and Society

Aesthetic practices and institutions. Production and reception of diverse art forms (visual, musical, corporeal, etc.) in various sociocultural contexts. Institutions dedicated to supporting such practices (e.g., museums, theatres, festivals, rituals) are examined through a range of theoretical perspectives.

Also listed as ANTH 3570.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0]; or ANTH 1001, or ANTH 1002, and thirdyear standing.

Lecture three hours a week.

SOCI 3710 [0.5 credit]

Introduction to Cultural Studies

Research and theory in the interdisciplinary area of Cultural Studies. Contemporary cultural change in the advanced industrialized societies and its impact on everyday life.

Includes: Experiential Learning Activity Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0]; or ANTH 1001, or ANTH 1002, and thirdyear standing.

SOCI 3805 [0.5 credit] Studies in Population

Historical and current debates on population growth. Historical declines in fertility and mortality from an international perspective. Contemporary demographic issues such as low fertility, longevity revolution, population aging, inequalities in health, migration and refugees. Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0]; or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

SOCI 3910 [0.5 credit]

Course-Related Tutorials in Sociology

Consult the Department for information, as departmental permission is required.

SOCI 3920 [0.5 credit]

Course-Related Tutorials in Sociology

Consult the Department for information, as departmental permission is required.

SOCI 3950 [0.5 credit]

Practicum Placement in Sociology

This course provides students with the opportunity to apply academic skills and knowledge while working within a sociology-related organization. Placements are organized with support from a co-ordinator. Includes: Experiential Learning Activity

Alex Paralles ANTH 0050

Also listed as ANTH 3950.

Prerequisite(s): third-year standing in Sociology with a GPA of 9.00 or higher and permission of the course instructor. [Students who do not meet the GPA requirement will be considered on a case-by-case basis.]. Placement six to eight hours a week.

SOCI 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

SOCI 4002 [0.5 credit]

Advanced Studies in Sociological Theory

Close study of the works of an author, tendency, or school of thought in theoretical sociology. Topic will vary in keeping with interests of the students and instructor. Prerequisite(s): SOCI 3006 and fourth-year standing. Seminar three hours a week.

SOCI 4003 [0.5 credit]

Advanced Studies in Qualitative Research

In-depth study into selected issues in qualitative research design, implementation and data analysis. Topics covered may include participant observation, ethnomethodology, ethnography, grounded theory, discourse analysis, narrative analysis, textual analysis, and document analysis. Intersections between epistemologies and methodologies.

Prerequisite(s): SOCI 3004 and fourth-year standing. Seminar three hours a week.

SOCI 4009 [0.5 credit]

Advanced Studies in Quantitative Research

Study of specific quantitative methodological issues. Focus may be on one or two of the following topics: quantitative research design, sampling techniques, survey research methods and various statistical research methods including OLS and logistic regression. Prerequisite(s): SOCI 3002 and fourth-year standing. Seminar/lab three hours a week.

SOCI 4020 [0.5 credit]

Advanced Studies in Race and Ethnicity

Selected topics in race and ethnicity in an international context. Specific topics will vary according to instructors' research interests.

Also listed as ANTH 4020.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4039 [0.5 credit]

Women in Contemporary Middle East Societies

Socio-economic, political and cultural realities of Middle Eastern women with focus on their lived experiences, voices and stories. Focus on women in Palestine/Israel with consideration of other Middle Eastern women. Prerequisite(s): fourth-year standing. Seminar three hours a week.

SOCI 4040 [0.5 credit]

Feminist Sociology of Intersectionality

Theoretical and empirical examination of gender relations and gendered inequality with emphasis on the complex intersection of gender with race, ethnicity, religion, class, sexuality, (dis)ability and other relations of power in feminist scholarship, social justice movements, law and policy.

Prerequisite(s): fourth-year standing. Seminar three hours a week.

SOCI 4043 [0.5 credit]

Families in the 21st Century

Examination of contemporary family forms including single-parent-, blended/step-, LGBTQ- and common-law families. Topics may include theoretical perspectives; reproductive technologies; globalization; migration; interracial families; cohabitation; separation/divorce; motherhood/fatherhood; childcare/domestic labour; children/youth; intergenerational relations; social class/poverty; family policies and family law.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4050 [0.5 credit]

Ethical Issues in Health and Healthcare

A study of the diverse ethical frameworks that inform and interrogate health, healthcare, and biomedicine. Potential topics include: history of bioethics; critical bioethics; ethics of care; health inequities; Indigenous healthcare; human enhancement; novel genetic technologies; ageing; vaccine politics.

Also listed as ANTH 4050.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4160 [0.5 credit]

War, Terrorism and State Terrorism

Critical theoretical and empirical analysis of violent political conflict. Examination of transformations and continuities of war, terrorism and state terrorism; modalities of political violence, such as torture or disappearance; responses to violent conflict; and the representation and construction of political violence. Prerequisite(s): fourth-year standing. Seminar three hours a week.

SOCI 4170 [0.5 credit] Community-Engaged Sociology

Students will apply their sociological education working with community organizations in small teams to research issues and advocate for positive social change. Each team's project will include public education, sociological analysis and creating a tangible product for the partner organization.

Includes: Experiential Learning Activity

permission from the instructor of SOCI 4170.

Lectures, discussion and project work three hours a week.

SOCI 4171 [0.5 credit]

Community Engagement Capstone

Students in the capstone will reflect on their engagement experiences and advance their critical understanding of community through a series of in-class activities and readings. Students will produce a public-facing artifact (e.g., blog, podcast, video) related to their experiences, potentially in collaboration with community partners.

Includes: Experiential Learning Activity

Also listed as ANTH 4171.

Prerequisite(s): SOCI 2180 and fourth year standing or permission of the instructor.

Lecture, discussion and project work three hours a week.

SOCI 4200 [0.5 credit]

War, Security and Citizenship

Critical theoretical and multidisciplinary examination of violent conflict, security and citizenship. How wars produce a variety of abject and new subjects, create and reproduce citizenship hierarchies, and expand and contract citizenship entitlements.

Also listed as ANTH 4200.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4410 [0.5 credit]

Advanced Studies in Criminology

Crime, criminal justice, social processes relating to the implementation of criminal justice policy, or other aspects of criminality and deviance.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4480 [0.5 credit]

Advanced Studies in the Sociology of Law

Contemporary debates about the role of law in society focusing on the potential and limits of law as a vehicle of social transformation.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4700 [0.5 credit]

Honours Capstone Seminar

Students carry out a small-scale research project to hone transferable skills acquired over the course of the degree programme.

Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4702 [0.5 credit]

Special Topic in Criminal Justice and Social Policy

Examination of a selected topic in criminal justice and social policy. Topics to be announced. Also listed as LAWS 4702, SOWK 4702. Prerequisite(s): fourth-year standing.

Seminars three hours a week.

SOCI 4730 [0.5 credit]

Colonialism and Post-Colonialism

Comparative ethnographic and historical approaches to colonialism including topics such as the formation of colonial regimes, colonial governmentality, servile labour systems, missionization, anti-colonial resistance, cultural hybridization and post-colonial memory. Exploration of debates over the relation between colonialism and the production of social scientific knowledge.

Also listed as ANTH 4730.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4810 [0.5 credit] **Advanced Studies in Social Policy**

An examination of sociological research and social intervention

Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing. Seminar three hours a week.

SOCI 4850 [0.5 credit] **Contemporary Problems in Sociology**

Selected problems in sociology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4860 [0.5 credit]

Contemporary Problems in Sociology

Selected problems in sociology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

SOCI 4900 [1.0 credit]

Honours Thesis

An independent research project under the supervision of a faculty member. Seminar supports students through each stage of the research process: development of a research question, designing the project, crafting a proposal, carrying out data generation and analysis, and writing the final thesis.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Sociology B.A. Honours with a CGPA of 9.00 or higher in the Major or by permission of the instructor. Students are strongly encouraged to locate a faculty member to supervise their Honours Thesis prior to the start of this course. Seminars on a bi-weekly basis (three hours).

SOCI 4910 [0.5 credit] Tutorial in Sociology

Consult the Department for information.

SOCI 4920 [0.5 credit] Tutorial in Sociology

Consult the Department for information.

Technology, Society, Environment Studies (Minor)

This section presents the requirements for programs in:

· Minor in Technology, Society, Environment Studies (TSE)

Program Requirements

Minor in Technology, Society, Environment Studies (TSE) (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Technology, Society, Environment Studies.

Requirements

1.	1.0 credit in:		1.0
	ENSC 2001 [0.5]	Earth Resources and Natural Hazards: Environmental Impacts	
	ISCI 2002 [0.5]	Human Impacts on the Environment	
2.	1.0 credit in:		1.0
	TSES 3001 [0.5]	Technology-Society Interactions	
	TSES 3002 [0.5]	Energy and Sustainability	
3.	1.0 credit from:		1.0
	ISCI 1001 [0.5] & ISCI 2000 [0.5]	Introduction to the Environment Natural Laws	
	TSES 2305 [1.0]	Ancient Science and Technology	
	CLCV 2305 [1.0]	Ancient Science and Technology	
4.	1.0 credit from:		1.0
	TSES 4001 [0.5]	Technology and Society: Risk	
	TSES 4002 [0.5]	Technology and Society: Forecasting	

	TSES 4003 [0.5]	Technology and Society: Innovation	
	TSES 4005 [0.5]	Information Technology and Society	
	TSES 4006 [0.5]	Technology and Society: Work	
	TSES 4007 [0.5]	Product Life Cycle Analysis	
	TSES 4008 [0.5]	Environmentally Harmonious Lifestyles	
	TSES 4009 [0.5]	Special Topics	
	TSES 4010 [0.5]	Special Topics	
	TSES 4011 [0.5]	Technology and Society: Development	
	TSES 4012 [0.5]	Science and Fiction: Creating Tomorrow	
	TSES 4014 [0.5]	Technology-Society: Time	
5	5. The remaining requirements of the major discipline(s)		

5. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Note: This Minor is designed for all degree students. There are no requirements for OAC Science credits or University level credits in Natural Sciences. Students with one or more OAC and/or university credits in science can replace ISCI 1001 and ISCI 2000 with TSES 2305, and/or additional half-credit 4000-level TSE courses. Students who have taken courses equivalent to ENSC 2001 and/or ISCI 2002 can also replace all or part of requirement 1 with 4000-level TSE courses. Any substitution requires permission of the Chair of TSE.

Regulations

In addition to the requirements listed here, students must satisfy:

 the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Technology, Society, Environment (TSES) Courses

TSES 2006 [0.5 credit] Ecology and Culture

Cultural adaptations to the environment are set within globalization processes. New symbolic, historical and political ecologies arise out of the hubris of classical models. The advocacy role of applied ecological anthropology and the consequences of Western cultures' adaptive capacities will be examined.

Prerequisite(s): second year standing or equivalent. Lectures three hours a week.

TSES 2305 [1.0 credit] Ancient Science and Technology

Development of science and technology in the ancient world and their practical application. The craftsman and artisan in society; the attitude of intellectuals to science and manual labour. Effects of the institution of slavery. Suitable for students with no previous knowledge of Greece or Rome.

Also listed as CLCV 2305.

Prerequisite(s): second-year standing or equivalent. Lectures two hours a week.

TSES 3001 [0.5 credit]

Technology-Society Interactions

Ethical issues in introducing technology; historical review of technology and human development; effects on society of medical and communications technologies; automation and its effects on society, especially work; impact of technology on international affairs, especially through multinational enterprises. Guest lectures. Includes: Experiential Learning Activity

Precludes additional credit for TSES 3000 and

TSES 3500.

Prerequisite(s): at least second-year standing. Lectures and workshops three hours per week.

TSES 3002 [0.5 credit] Energy and Sustainability

History of energy use by humans; utilization of renewable energy sources; energy and agriculture; energy and mineral resources; options for electricity generation; nuclear energy; risks of accidents in large systems, e.g. nuclear plants, hydroelectric dams. Guest lectures. Includes: Experiential Learning Activity Precludes additional credit for TSES 3000 and TSES 3500.

Prerequisite(s): at least second-year standing. Lectures and workshops three hours per week.

TSES 3500 [0.5 credit] Interactions in Industrial Society

Ethical issues involving technology; effects on society of automation, medical and communications technologies; technology and international affairs; energy use by humans; renewable energy sources; energy in agriculture and mineral extraction; electricity generation; nuclear energy; accidents in large systems, e.g. nuclear plants and hydroelectric dams.

Precludes additional credit for TSES 3001, TSES 3002 and TSES 3000.

Prerequisite(s): at least second-year standing. Lectures three hours per week for both terms.

TSES 4001 [0.5 credit] Technology and Society: Risk

Examines the complex practice of evaluating technology's impact on society and the environment; risk analysis; cost-benefit analysis; technology regulation; retrospective project assessment; necessary aspects of assessment and assessment examples. Guest lecturers. Includes: Experiential Learning Activity

Prerequisite(s): third-year standing or equivalent. Lectures and workshops three hours a week.

TSES 4002 [0.5 credit]

Technology and Society: Forecasting

Methods used for forecasting technological and social change; technological and social change portrayed in literature; science fiction factors involved in such change. Guest lecturers.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing or equivalent. Lectures and workshops three hours a week.

TSES 4003 [0.5 credit]

Technology and Society: Innovation

Technological and social innovation, especially in Canada: historical examples; the relation of innovation to economic development; analysis of the steps involved: effect on employment; impediments and incentives. Guest lecturers.

Prerequisite(s): third-year standing or equivalent. Lectures and seminars three hours a week.

TSES 4005 [0.5 credit]

Information Technology and Society

Investigation of the human and social impacts of electronic information and communication on our working, educational, and personal lives from various disciplinary perspectives; problem issues and competing values in the creation, manipulation, dissemination, and control of information are identified; resolution initiatives encouraged. Guest lecturers.

Prerequisite(s): third-year standing or equivalent. Lectures and seminars three hours a week.

TSES 4006 [0.5 credit]

Technology and Society: Work

Explores the relationship between technology, employment and the individual; work organizations; employment restructuring; rural/urban split; the impact of information technologies; demographic impacts and globalization; Canadian issues and public policy explored. Guest lecturers.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing or equivalent. Lectures and workshops three hours a week.

TSES 4007 [0.5 credit] **Product Life Cycle Analysis**

Life cycle analysis of products and processes, from resource extraction through design and use to waste management or recycling; social and environmental implications of product design and use; how we value material objects and the environment; consumerism; evolution of design. Guest lectures. Includes: Experiential Learning Activity Prerequisite(s): third-year standing or equivalent. Lectures and workshops three hours a week.

TSES 4008 [0.5 credit]

Environmentally Harmonious Lifestyles

Brief history of humans as part of the ecosystem; religious and ethical views; current degree of ecosystem disturbance by industrial society; innovations in products and services furthering the sustainability of the ecosystem, emphasis on the Canadian context. Guest lecturers and a major project.

Prerequisite(s): third-year standing or equivalent. Lectures and seminars three hours a week.

TSES 4009 [0.5 credit]

Special Topics

Reading course for students who wish to investigate a particular topic relevant to TSES.

Prerequisite(s): third-year standing or equivalent and permission of the Chair of TSE.

TSES 4010 [0.5 credit]

Special Topics

Specific topics of current interest. Topics may vary from year to year.

Prerequisite(s): third-year standing or equivalent. Lectures three hours a week.

TSES 4011 [0.5 credit]

Technology and Society: Development

Created in collaboration with Engineers Without Borders Carleton, the course explores appropriate ways of meeting technological needs of communities. Uses Canadian and African case studies to examine how capacity building has a greater impact than simple delivery of technological goods.

Prerequisite(s): third-year standing or equivalent. Lectures three hours a week.

TSES 4012 [0.5 credit]

Science and Fiction: Creating Tomorrow

Scenarios are used to speculate about the planned future. Science fiction and speculative fiction project ideas about imagined futures. Using readings from scenarios, speculative fiction and science fiction the course explores the mutual shaping of fiction, science and technology. Prerequisite(s): third-year standing or equivalent.

TSES 4014 [0.5 credit] Technology-Society: Time

Time is a universal human experience, but it presents some profound mysteries. It governs our behaviour on personal, societal and cultural levels. This course will bring together experts from physics, sociology, philosophy, biology, literature and psychology to illuminate our understanding.

Prerequisite(s): third-year standing or equivalent. Lectures three hours a week.

Undeclared

Undeclared Program Bachelor of Arts (Honours), Bachelor of Science (Honours)

Students can find it difficult to decide which thematic or discipline-specific program they want to take for their academic studies. The Undeclared program typically enables students to begin their studies with a broad set of topics to help them narrow their focus and transition into a thematic or discipline-specific program. The recommended course patterns for students are outlined below. Students are expected to apply to enter a thematic or discipline-specific program upon or before completing 3.5 credits, and can meet with an academic advisor at the Academic Advising Centre who will offer support in making this decision

First-year Course Selection for B.A. (Honours) Undeclared Students

To give themselves the greatest range of choices and transition to a more specific program, Undeclared B.A. students should consider the following guidelines in selecting their initial courses.

Undeclared B.A. students should register in:

- 1. A B.A. First-year seminar (FYSM);
- 2. Courses in at least three different disciplines leading to programs within the Faculty of Arts and Social Sciences or the Faculty of Public Affairs.

First-year Course Selection for B.Sc. (Honours) Undeclared Students

To give themselves the greatest range of choices and transition to a more specific program, Undeclared B.Sc. students should conform to the following guidelines in selecting their initial courses. Some Science majors have specific math prerequisites which may differ from those listed below. Students must contact sciundecadvising@carleton.ca for support in course selection and major selection.

Undeclared B.Sc. students should register in:

1. 2.0 credits in Experimental Science				
2. 1.0 credit in Mathematics				
3. 1.0 credit in Mathematics, Experimental Science or Computer Science				
4. 1.0 credit chosen from:				
ISAP 1000 [0.5]	Seminar in Science			

and/or approved courses outside the faculties of Science and Engineering and Design

Total Credits 5.0

Course Categories

Experimental Science Courses

•	
Biology	
BIOL 1103 [0.5]	Foundations of Biology I
BIOL 1104 [0.5]	Foundations of Biology II
Chemistry	
CHEM 1001 [0.5]	General Chemistry I
CHEM 1002 [0.5]	General Chemistry II
Earth Sciences	
ERTH 1002 [0.5]	The Earth and Life Odyssey: A Journey Through Billions of Years
Physics	
PHYS 1001 [0.5]	Foundations of Physics I
PHYS 1002 [0.5]	Foundations of Physics II
PHYS 1003 [0.5]	Introductory Mechanics and Thermodynamics
PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II

Appropriate Mathematics Courses				
Calculus				
MATH 1007 [0.5]	Elementary Calculus I			
Algebra				
MATH 1107 [0.5]	Linear Algebra I			
Statistics				
STAT 2507 [0.5]	Introduction to Statistical Modeling I			

Appropriate Computer Science Courses

COMP 1005 [0.5]	Introduction to Computer Science I
COMP 1006 [0.5]	Introduction to Computer Science II

Approved Courses Outside the Faculties of Science and Engineering and Design

Approved courses outside the faculties of Science and Engineering and Design are specified in the Bachelor of Science regulations.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and

B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS,

ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention : français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : français* requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or, 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Approved Experimental edicines educate		
Biochemistry		
BIOC 2200 [0.5]	Cellular Biochemistry	
BIOC 4001 [0.5]	Methods in Biochemistry	
BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering	
Biology		
BIOL 1103 [0.5]	Foundations of Biology I	
BIOL 1104 [0.5]	Foundations of Biology II	
BIOL 2001 [0.5]	Animals: Form and Function	
BIOL 2002 [0.5]	Plants: Form and Function	
BIOL 2104 [0.5]	Introductory Genetics	
BIOL 2200 [0.5]	Cellular Biochemistry	
BIOL 2600 [0.5]	Ecology	
Chemistry

NEUR 3207 [0.5]	Systems Neuroscience
NEUR 4600 [0.5]	Advanced Lab in Neuroanatomy
Physics	
PHYS 1001 [0.5]	Foundations of Physics I
PHYS 1002 [0.5]	Foundations of Physics II
PHYS 1003 [0.5]	Introductory Mechanics and Thermodynamics
PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II
PHYS 2202 [0.5]	Wave Motion and Optics
PHYS 2604 [0.5]	Modern Physics I
PHYS 3007 [0.5]	Third Year Physics Laboratory: Selected Experiments and Seminars
PHYS 3606 [0.5]	Modern Physics II
PHYS 3608 [0.5]	Modern Applied Physics
Course Categori	es for B.Sc. Programs

Course Categories for B.Sc. Programs

Science Geography Courses

GEOG 1010 [0.5]	Global Environmental Systems
GEOG 2006 [0.5]	Introduction to Quantitative Research
GEOG 2013 [0.5]	Weather and Water
GEOG 2014 [0.5]	The Earth's Surface
GEOG 3003 [0.5]	Quantitative Geography
GEOG 3010 [0.5]	Field Methods in Physical Geography
GEOG 3102 [0.5]	Geomorphology

	GEOG 3103 [0.5]	Watershed Hydrology
	GEOG 3104 [0.5]	Principles of Biogeography
	GEOG 3105 [0.5]	Climate and Atmospheric Change
	GEOG 3106 [0.5]	Aquatic Science and Management
	GEOG 3108 [0.5]	Soil Properties
	GEOG 4000 [0.5]	Field Studies
	GEOG 4005 [0.5]	Directed Studies in Geography
	GEOG 4013 [0.5]	Cold Region Hydrology
	GEOG 4017 [0.5]	Global Biogeochemical Cycles
	GEOG 4101 [0.5]	Two Million Years of Environmental Change
	GEOG 4103 [0.5]	Water Resources Engineering
	GEOG 4104 [0.5]	Microclimatology
	GEOG 4108 [0.5]	Permafrost
_		

Science Psychology Courses

PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
PSYC 2002 [0.5]	Introduction to Statistics in Psychology
PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development
PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001 ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use

ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

BIOL 4810 [0.5]	Education Research in
	Undergraduate Science

	CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
	CHEM 1004 [0.5]	Drugs and the Human Body
	CHEM 1007 [0.5]	Chemistry of Art and Artifacts
	ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
	ERTH 2415 [0.5]	Natural Disasters
	ISCI 1001 [0.5]	Introduction to the Environment
	ISCI 2000 [0.5]	Natural Laws
	ISCI 2002 [0.5]	Human Impacts on the Environment
	PHYS 1901 [0.5]	Planetary Astronomy
	PHYS 1902 [0.5]	From our Star to the Cosmos
	PHYS 1905 [0.5]	Physics Behind Everyday Life
	PHYS 2903 [0.5]	Physics Towards the Future
Pı	ohibited Courses	
The following courses are not acceptable for credit in any B.Sc. program:		
	COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students

	Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I
MATH 1402 [0.5]	Elementary Mathematics for Economics II

all 0000-level courses

Women's and Gender Studies

This section presents the requirements for programs in:

- · Women's and Gender Studies B.A. Honours
- Women's and Gender Studies B.A. Combined Honours
- · Women's and Gender Studies B.A.
- Specialization in Global Genders and Sexualities B.G.In.S. Honours
- · Stream in Global Genders and Sexualities B.G.In.S.
- · Minor in Women's and Gender Studies

Program Requirements

Women's and Gender Studies B.A. Honours (20.0 credits)

Students must successfully complete at least 0.5 credit in each of the four areas (CRST, DBST, SXST, WGST) to fulfill the program requirements for the Women's and Gender Studies B.A. Honours.

A. Credits included in the Major CGPA (9.0 credits)

1. 1.0 credit from:		1.0
FYSM 1402 [1.0]	Issues in Feminist Social Transformation	
WGST 1808 [1.0]	Introduction to Feminist Social Transformation	
2. 0.5 credit in:		0.5
WGST 2801 [0.5]	Activism, Feminisms, and Social Justice	
3. 0.5 credit from:		0.5

Te	otal Credits		20.0
9.	3.0 credits in free	electives	3.0
8.	8. 8.0 credits not in WGST		8.0
B. Credits not included in the Major CGPA (11.0 credits)			
7. 2.5 credits from WGST, SXST, DBST, CRST or WGST Approved Electives		2.5	
	1.0 credit from W0 000-level	GST, SXST, DBST, or CRST at the	1.0
	3.0 credits from W 000- or 4000-level	/GST, SXST, DBST, or CRST at the	3.0
	WGST 3001 [0.5]	Theory and Research in Feminist Social Transformation	
4.	0.5 credit in:		0.5
	SXST 2101 [0.5]	Sexuality Studies: A Critical Introduction	
	DBST 2001 [0.5]	Introduction to Disability Studies	
	CRST 2001 [0.5]	Introduction to Critical Race Studies	

Women's and Gender Studies **B.A. Combined Honours (20.0 credits)**

Students must successfully complete at least 0.5 credit in each of the four areas (CRST, DBST, SXST, and WGST) to fulfill the program requirements for the Women's and Gender Studies B.A. Combined Honours.

A. Credits Included in the Women's and Gender Studies Major CGPA (7.0 credits)

	(110 0100)	
1. 1.0 credit from:		1.0
FYSM 1402 [1.0]	Issues in Feminist Social Transformation	
WGST 1808 [1.0]	Introduction to Feminist Social Transformation	
2. 0.5 credit in:		0.5
WGST 2801 [0.5]	Activism, Feminisms, and Social Justice	
3. 0.5 credit from:		0.5
CRST 2001 [0.5]	Introduction to Critical Race Studies	
DBST 2001 [0.5]	Introduction to Disability Studies	
SXST 2101 [0.5]	Sexuality Studies: A Critical Introduction	
4. 0.5 credit in:		0.5
WGST 3001 [0.5]	Theory and Research in Feminist Social Transformation	
5. 1.5 credit from W 2000- or 3000-level	GST, SXST, DBST or CRST at the	1.5
6. 2.0 credits from WGST, SXST, DBST, CRST or WGST-approved Electives at the 2000- or 3000-level		2.0
7. 0.5 credit from WGST, SXST, DBST, or CRST at the 4000-level		0.5
8. 0.5 credit from WGST, SXST, DBST, CRST or WGST-approved Electives at the 4000-level		0.5
B. Additional Requir	rements (13.0 credits)	13.0
9. The requirements for Combined Honours in the other discipline must be met		
10. Sufficient electives the degree	s to make a total of 20.0 credits for	
Total Credits		20.0

Women's and Gender Studies **B.A.** (15.0 credits)

Students must successfully complete at least 0.5 credit in each of the four areas (CRST, DBST, SXST, WGST) to fulfill the program requirements for the Women's and Gender Studies B.A.

A. Credits Included in the Major CGPA (6.0 credits)

	1.0
Issues in Feminist Social Transformation	
Introduction to Feminist Social Transformation	
	0.5
Activism, Feminisms, and Social Justice

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information

Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op OptionCo-op is available for the following Majors in the B.A.
(Honours) degree: Anthropology, English, Environmental

Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Women's and Gender Studies (WGST) Courses WGST 1808 [1.0 credit]

Introduction to Feminist Social Transformation

Overview of intersectional feminist debates as well as historical and contemporary theoretical traditions in gender and sexuality studies, critical race studies, and disability studies. Topics include the social construction of femininity, masculinity, and other identifications; Indigenous, decolonial, and transnational feminisms. Includes: Experiential Learning Activity Precludes additional credit for FYSM 1402. Lectures and discussion three hours a week.

WGST 2800 [0.5 credit] Intersectional Identities

Critical examination of the multiple intersections between gender, as a relation of power and social identity, as these intersect with (neo)colonialism, racism, poverty, ableism and heterosexism in a globalized world.

Includes: Experiential Learning Activity
Prerequisite(s): one of WGST 1808, HRSJ 1001,
FYSM 1402, or permission of the Institute of Women's and
Gender Studies

Lectures and discussion three hours a week.

WGST 2801 [0.5 credit]

Activism, Feminisms, and Social Justice

A comparative, interdisciplinary examination of feminist activism in the modern era. A range of perspectives and materials are used to examine the objectives, scope, and impact of feminists' efforts to effect social and political change in different historical, cultural, and national settings.

Includes: Experiential Learning Activity Prerequisite(s): second-year standing. Lectures and discussion three hours a week.

WGST 2803 [0.5 credit]

Body Matters: The Politics of Bodies

Introduction to feminist studies of globalization and politics of bodies. Globalization of ideas, cultures, economics and politics, movement of bodies, bodies as spaces for disrupting norms of sex, gender, race, class, ability, sexuality, embodiment and embodied resistance in a globalized world.

Prerequisite(s): second-vear standing. Lectures and discussion three hours a week.

WGST 2810 [0.5 credit]

Sex For Sale

Explores feminist perspectives on the sex industry, critically analyzing various legal approaches to regulation and the social meanings assigned to sex work.

Includes: Experiential Learning Activity

Prerequisite(s): Second year standing and WGST 1808 or FYSM 1402.

Lecture and discussion three hours per week.

WGST 2811 [0.5 credit]

Masculinities

Theoretical, experiential, cultural and policy issues around masculinities studies. The complexities of masculinities; the intersections of feminist and masculinity studies. Topics may include hegemonic, racialized, homosexual, and Other(ed) masculinities. Feminist theories and transnational perspectives frame course content and discussions.

Prerequisite(s): second-year standing. Lectures and discussion three hours a week.

WGST 2812 [0.5 credit]

Selected Topics in Women's and Gender Studies

An interdisciplinary analysis of one or more topics in women's and gender studies.

Includes: Experiential Learning Activity Prerequisite(s): second-year standing.

Lectures and discussion three hours a week. This course

is repeatable when the topic changes.

WGST 2814 [0.5 credit]

Gender, Sexuality and Cultural Production

How gender and cultural (re)production (literature, visual/ performing arts, social media) and consumption articulate, circulate, and transform each other within economic, political, and social contexts. Emphasis on role, object, processes, and representations.

Prerequisite(s): second-year standing. Lectures and discussion three hours a week.

WGST 3001 [0.5 credit]

Theory and Research in Feminist Social **Transformation**

Interdisciplinary and intersectional approach introducing students to contemporary feminist. Indigenous. decolonial, and transnational theories, issues, conflicts, methodologies, and critiques of prevailing approaches to the construction of knowledge. Themes include, feminist epistemology, ontology, knowledge, and ethics in feminist research.

Includes: Experiential Learning Activity Precludes additional credit for WGST 3809 (no longer

offered), WGST 3810 (no longer offered).

Prerequisite(s): Third-year standing and 1.0 credit in

WGST or permission of the Institute.

Lecture three hours a week.

WGST 3803 [0.5 credit]

Feminisms and Transnationalism

Feminist analyses of the diversity of transnational experiences around rights, health, education, motherhood, fathering, work, social media and technological change, among others. Topics may include: migration, environment, wars/conflicts, neocolonialism, diaspora, human trafficking, refugee issues and displaced populations.

Prerequisite(s): third-year standing, and 1.0 credit in WGST; or permission of the Institute.

WGST 3806 [0.5 credit] **Girlhoods**

The emerging discipline of girlhood studies; social and cultural constructions of girlhood and categories of difference. Topics may include the commercialization of girlhood, popular culture and girls, negotiating identities, violence, sexualities, agency and activism in a globalizing

Prerequisite(s): third-year standing and 1.0 credit in WGST or permission of the Institute. Lecture three hours a week.

WGST 3807 [0.5 credit]

Gendered Violence

Theories, concepts and contexts of the complex manifestations of gendered violence in the lives of women, men and children globally.

Precludes additional credit for WGST 3005 Section "A", if taken in Winter 2012 and WGST 3005 Section "A" if taken in Fall 2009.

Prerequisite(s): third-year standing and 1.0 credit in WGST or permission of the Institute.

Lecture three hours a week.

WGST 3812 [0.5 credit]

Selected Topics in Women's and Gender Studies

An interdisciplinary analysis of one or more topics in women's and gender studies.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing and 1.0 credit in

WGST.

Lecture three hours a week.

WGST 4003 [0.5 credit] Traversing Feminisms

Interdisciplinary overview of key historical concepts and issues in Women's and Gender Studies in areas of theory, epistemology, and research design. This course is designed for students pursuing research/studies in WGST, DBST, CRST, and/or SXST who have not taken any courses in our institute.

Includes: Experiential Learning Activity
Prerequisite(s): permission of the Institute.
Also offered at the graduate level, with different
requirements, as WGST 5003, for which additional credit
is precluded.

Seminar three hours a week.

WGST 4060 [0.5 credit] African Feminisms

African feminisms as theoretical interventions and as political practice, and as diverse forms. Gender as a marker of power: status, hierarchy, social capability, and as a system of distribution of resources, responsibilities and solidarities.

Includes: Experiential Learning Activity

Also listed as AFRI 4060.

Prerequisite(s): Fourth year standing and WGST 1808 or

FYSM 1402 OR permission of the Institute.

Seminar three hours per week.

WGST 4302 [0.5 credit] Transgender Human Rights

Critical analyses of human rights through an examination of transgender subjectivities. The systemic erasure of trans people within society and the struggles of some activists to normalize trans identities.

Also listed as HRSJ 4302.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

WGST 4800 [0.5 credit]

Women's and Gender Studies Practicum

Experience in research through a combination of classroom seminars and a field placement. Each project will be negotiated individually as a contract between the student, instructor and institutional partner.

Includes: Experiential Learning Activity

Precludes additional credit for WGST 4903 (no longer offered).

Prerequisite(s): Fourth year standing and WGST 3001 with a minimum 6.5 CGPA in B.A. Hons. Women's and Gender Studies program or permission of the Institute. Also offered at the graduate level, with different requirements, as WGST 5920, for which additional credit is precluded.

WGST 4801 [1.0 credit]

Women's and Gender Studies Practicum

Experience in applied feminisms through a combination of classroom seminars and internship. Each project will be negotiated individually as a contract between the student, instructor and institutional partner. Students must complete both the in-class and the internship portion of the course. Includes: Experiential Learning Activity

Precludes additional credit for WGST 4800, WGST 4903 and WGST 4904 (no longer offered).

Prerequisite(s): Fourth year standing and WGST 3001 with a minimum 6.5 CGPA in B.A. Hons. Women's and Gender Studies program or permission of the Institute. Also offered at the graduate level, with different requirements, as WGST 5920, for which additional credit is precluded.

This full-credit course is offered intensively in one term.

WGST 4811 [1.0 credit]

Honours Research Project in Women's and Gender Studies

Students will undertake a major research project on some aspect of women's and gender studies under the supervision of a faculty member.

Includes: Experiential Learning Activity

Prerequisite(s): A major CGPA of at least 11.00, plus WGST 3809 and WGST 3810 OR WGST 3001 and fourth-year standing in B.A. Hons. Women's and Gender Studies program, or permission of the Institute.

WGST 4812 [0.5 credit]

Selected Topics in Women's and Gender Studies

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing and 1.0 credit in Women's and Gender Studies or permission of the

Institute of Women's and Gender Studies.

Seminar three hours a week. This course is repeatable when the topic changes.

WGST 4814 [0.5 credit] Independent Study

Reading or research course supervised by a faculty member. Written proposal approved by the supervisor must be submitted before last day of course changes. Normally, only 0.5 credit of independent study may be counted in the program.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in a Women's and Gender Studies program or permission of the Institute.

Summer session: some of the courses listed in this Calendar are offered during the summer. Hours and scheduling for summer session courses will differ significantly from those reported in the fall/winter Calendar. To determine the scheduling and hours for summer session classes, consult the class schedule at central.carleton.ca

Not all courses listed are offered in a given year. For an up-to-date statement of course offerings for the current session and to determine the term of offering, consult the class schedule at central.carleton.ca

Aerospace Engineering (AERO)

Aerospace Engineering (AERO) Courses AERO 2001 [0.5 credit]

Aerospace Engineering Graphical Design

Engineering drawing techniques; fits and tolerances; working drawings; fasteners. Elementary descriptive geometry; true length, true view, and intersection of geometric entities; developments. Aerospace-specific CAD (Computer-Aided Design) assignments including production of detail and assembly drawings from actual aerospace physical models.

Includes: Experiential Learning Activity

Also listed as MAAE 2001.

Prerequisite(s): Second-year status in Engineering. Lectures and tutorials two hours a week, laboratory four hours a week.

AERO 3002 [0.5 credit]

Aerospace Design and Practice

Design approach and phases. Design integration. Influence of mission and other requirements on vehicle configuration. Trade-off studies, sizing and configuration layout. Flight vehicle loads, velocity-load factor diagram. Structural design: overall philosophy, role in design process, methods. Basic orbital mechanics; launch vehicle sizing.

Includes: Experiential Learning Activity

Prerequisite(s): AERO 2001 and third-year status in

Engineering.

Lectures three hours a week, problem analysis three hours a week.

AERO 3101 [0.5 credit] Lightweight Structures

Structural concepts; theory of elasticity; bending, torsion and shear in thin-walled beams having single or multi-cell sections; work and energy principles; deformation and force analysis of advanced structures, including stiffened thin-wall panels; finite element methods. Stability and buckling of thin-walled structures.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 3202.

Lectures three hours a week; problem analysis one hour a week

AERO 3240 [0.5 credit] Orbital Mechanics

Review of translational kinematics and dynamics. Keplerian two-body problem: Kepler's laws, orbital elements, orbit determination. Orbital perturbations: oblateness of the Earth, atmospheric drag. Orbital maneuvers and interplanetary flights. Advanced topics. Prerequisite(s): MAAE 2101.

Lectures three hours per week, tutorial one hour per week.

AERO 3700 [0.5 credit] Aerospace Materials

Properties, behaviour and manufacturing methods for metals, polymers and ceramics used in aerospace applications. Specialty alloys for gas turbines. Properties and manufacture of aerospace composites. Behaviour of materials in space.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 2700.

Lectures three hours a week; problem analysis one hour a week

AERO 3841 [0.5 credit] Spacecraft Design I

Design of spacecraft and spacecraft subsystems with emphasis on mission requirements and current design methods: spacecraft configuration, payload, structural, attitude control, thermal, power, and other related subsystems. Spacecraft integration and testing. Includes: Experiential Learning Activity Prerequisite(s): AERO 3240.

Lectures three hours a week, tutorials or laboratories three hours per week.

AERO 4003 [0.5 credit] Aerospace Systems Design

Stress and deflection analysis; fatigue, safe life, damage tolerant design. Propulsion systems integration; landing gear; control and other subsystems. Mechanical component design. Airworthiness regulations and certification procedures. Weight and cost estimation and control. System reliability. Design studies of aircraft or spacecraft components.

Includes: Experiential Learning Activity

Prerequisite(s): AERO 3002 and fourth-year status in

Engineering.

Lectures three hours a week, problem analysis three hours a week.

AERO 4009 [0.5 credit]

Aviation Management and Certification

Product development, quality control. Strategic organizational analysis and design. Airworthiness, type certification and planning, delegation of authority, airplane flight manual. Aerospace system design and safety. Prerequisite(s): fourth-year status in Engineering or permission of the department. Lectures three hours per week.

Lectures three nours per week

AERO 4300 [0.5 credit] Acoustics and Noise Control

Behaviour of compressible fluids, sound waves and properties of sound sources; measurement of sound; human perception of sound; prediction methods based on energy considerations; sound propagation in realistic environments: outdoors, rooms, ducts; absorption and transmission loss, noise control; case studies. Includes: Experiential Learning Activity
Prerequisite(s): MAAE 3004 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering or by

permission of department.
Lectures three hours a week.

AERO 4302 [0.5 credit]

Aerodynamics and Heat Transfer

Differential equations of motion. Viscous and inviscid regions. Potential flow: superposition; thin airfoils; finite wings; compressibility corrections. Viscous flow: thin shear layer approximation; laminar layers; transition; turbulence modeling. Convective heat transfer: free versus forced convection; energy and energy integral equations; turbulent diffusion.

Includes: Experiential Learning Activity
Prerequisite(s): MAAE 3300 or MECH 3310.
Lectures three hours a week, problem analysis two hours a week.

AERO 4304 [0.5 credit] Computational Fluid Dynamics

Governing equations of fluid motion (full & simplified). Discretization based on finite difference, finite volume, and finite element methods. Explicit and implicit integration schemes. Numerical stability. Numerical solutions of the Navier-Stokes equations: RANS, LES and DNS. Turbulence modeling. Programming-based assignments (convection/diffusion).

Prerequisite(s): (MAAE 3300 or MECH 3310), AERO 4302 recommended and fourth-year status in Engineering or by permission of the department.

Lectures three hours a week.

AERO 4306 [0.5 credit] Aerospace Vehicle Performance

Morphology of aircraft and spacecraft. Performance analysis of fixed wing aircraft: drag estimation, propulsion, take-off, climb and landing, endurance, payload/range, manoeuvres; operational economics. Performance analysis of rotor craft: rotor-blade motion, hovering and vertical ascent, forward flight, and autorotation. Rocket propulsion; escape velocity; orbital dynamics. Prerequisite(s): (MAAE 3300 or MECH 3310) and fourth-year status in Engineering. Lectures three hours a week.

AERO 4308 [0.5 credit] Aircraft Stability and Control

Static stability and control: equilibrium requirements; longitudinal stability requirements; neutral points; manoeuvring flight; control forces and control requirements; lateral static stability certification requirements. Dynamic stability: axis systems; governing equations; phugoid and short period modes; lateral dynamic modes. Closed-loop control. Prerequisite(s): Fourth-year status in Engineering. Lectures three hours a week.

AERO 4402 [0.5 credit] Aerospace Propulsion

Propulsion requirements, effects of Mach Number, altitude, and application; basic propeller theory; propeller, turboshaft, turbojet, turbofan and rocket; cycle analysis and optimization for gas turbine power plant; inter-relations between thermodynamic, aerodynamic and mechanical designs; rocket propulsion; selection of aeroengines. Precludes additional credit for MECH 4401. Prerequisite(s): MAAE 2400, (MAAE 3300 or MECH 3310), and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

AERO 4442 [0.5 credit]

Transatmospheric and Spacecraft Propulsion

Planetary/interplanetary environments and effects. Launch and spacecraft propulsion: liquid/solid/hybrid rockets, ram/scramjets, combined cycle engines, electrothermal, electromagnetic, electrostatic, nuclear, and propellantless propulsion. Trajectory analysis, multistaging, separation dynamics. Advanced engine concepts.

Prerequisite(s): MAAE 2400, (MAAE 3300 OR MECH 3310) and fourth-year status in Engineering. Lectures three hours a week.

AERO 4446 [0.5 credit]

Heat Transfer for Aerospace Applications

Fundamentals of heat transfer with emphasis on aerospace systems design. Conduction, convection and radiation modes of heat transfer. Radiation exchange between surfaces and view factors. Radiation in spacecraft thermal control. High speed flight and reentry heating.

Precludes additional credit for MECH 4406. Prerequisite(s): MAAE 2400 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering. Lectures three hours a week.

AERO 4504 [0.5 credit] Avionics Systems

RF engineering concepts. Aviation communication systems. Relative and absolute navigation; landing systems. Radar systems; weather radar. Aircraft systems integration; databus standards; electrical systems; power generation and distribution. Safety critical software. Electromagnetic compatibility and interference. Regulations and certification of avionic systems. Includes: Experiential Learning Activity Precludes additional credit for ELEC 4504. Prerequisite(s): 4th year status in Engineering. Not open to students in Electrical Engineering, Computer Systems Engineering, Engineering Physics or Communications Engineering.

Lectures three hours a week.

AERO 4540 [0.5 credit]

Spacecraft Attitude Dynamics and Control

Rigid body dynamics. The dynamic behavior of spacecraft. Environmental torques. The design of attitude control systems. Gravity gradient, spin, and dual spin stabilization. Attitude manoeuvres. The design of automatic control systems. Impacts of attitude stabilization techniques on mission performance.

Prerequisite(s): AERO 3240 and MAAE 3500 and fourth-year status in Engineering.

Lectures three hours a week.

AERO 4602 [0.5 credit] Introductory Aeroelasticity

Review of structural behaviour of lifting surface elements; structural dynamics, Laplace Transforms, dynamic stability; modal analysis; flutter, Theodorsen's theory; flutter of a typical section; wing flutter, T-tail flutter, propeller whirl flutter; gust response; buffeting, limit cycle flutter.

Prerequisite(s): (MAAE 3300 or MECH 3310) and SYSC 3600 and fourth-year status in Engineering. Lectures three hours a week.

AERO 4607 [0.5 credit]

Rotorcraft Aerodynamics and Performance

Rotorcraft history and fundamentals. Momentum theory: hover, axial climb and descent, autorotation, forward flight, momentum theory for coaxial and tandem rotors. Blade element analysis. Rotor airfoil aerodynamics. Rotor blade dynamics and trim. Helicopter performance, height-velocity curves, conceptual design. High-speed rotorcraft. Prerequisite(s): MAAE 3004 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering or by permission of the department.

Lectures three hours per week.

AERO 4608 [0.5 credit] Composite Materials

Reinforcing mechanisms in composite materials; material properties. Strength and elastic constants of unidirectional composites; failure criteria. Analysis of laminated plates; bending and eigenvalue problems. Environmental effects and durability. Damage tolerance. Design of composite structures.

Prerequisite(s): MAAE 2202 and fourth-year status in Engineering.

Lectures three hours a week.

AERO 4609 [0.5 credit] Joining of Materials

Design for joining: base material and component geometry. Selection of joining method and filler material; Adhesive bonding; Soldering; Brazing; Diffusion bonding; Resistance welding; Fusion welding (GTAW, EB, laser and plasma arc); Friction welding; NDE. Emphasis on Aerospace materials and applications.

Prerequisite(s): MAAE 2700 and fourth-year status in Engineering or by permission of the department. Lectures three hours per week.

AERO 4842 [0.5 credit] Spacecraft Design II

System view of spacecraft. Requirements definition. Spacecraft payloads (remote sensing, imaging systems, astronomy instrumentation etc.). Exploration missions. Implications for systems and missions. Space system design case studies.

Precludes additional credit for AERO 4802 (no longer offered).

Prerequisite(s): AERO 3841 and fourth-year status in Engineering.

Lectures three hours a week.

African Studies (AFRI)

African Studies (AFRI) Courses

AFRI 1001 [0.5 credit]

Introduction to African Studies I

Introduction to African studies, including history, geography, literature, and the arts.

Lecture three hours per week, or two-hour lecture and one hour discussion group per week.

AFRI 1002 [0.5 credit] Introduction to African Studies II

Introduction to contemporary political, economic, and social dimensions of Africa.

Lecture three hours per week.

AFRI 2002 [0.5 credit] The Horn of Africa

The economic, social and political challenges facing the Horn of Africa, placing them in historical and global context. These countries may be discussed: Djibouti, Eritrea, Ethiopia, Somalia, Sudan, South Sudan. Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies. Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 2003 [0.5 credit] The Great Lakes Region of Africa

The economic, social and political challenges facing the Great Lake Regions of Africa, including the 1994 Rwanda genocide and its aftermath. These countries may be discussed: Burundi, Democratic Republic of Congo, Kenya, Rwanda, Tanzania, Uganda.

Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.

Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 2004 [0.5 credit] North Africa

The economic, social and political challenges facing Egypt and the Maghreb countries of North Africa, including the "Arab Spring". These countries may be discussed: Algeria, Egypt, Libya, Morocco, Mauritania, Tunisia, Western Sahara.

Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies. Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 2005 [0.5 credit] West Africa

The economic, social and political challenges facing countries of West Africa, including domestic issues and regional relations. These countries may be discussed: Benin, Burkina Faso, Cape Verde, Cote d'Ivoire, Gambia, Ghana, Guinea, Guinea Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone, Togo.

Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.

Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 2006 [0.5 credit] Southern Africa

The economic, social and political challenges facing the countries of southern Africa, including the legacies of apartheid. These countries may be discussed: Angola, Botswana, Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, Seychelles, South Africa, Swaziland, Tanzania, Zambia, Zimbabwe.

Prerequisite(s): AFRI 1001 or AFRI 1002 or FYSM 1901 or permission of the Institute of African Studies.

Lecture three hours a week, or two-hour lecture and one-hour discussion group per week.

AFRI 3001 [0.5 credit]

Globalization and Popular Culture in Africa

This course examines new popular life-worlds in Africa. Though potentially "elusive" to conceptualize, this course shows how these forms of popular culture are related to the role of youth culture and social media in an age of globalization and democratization.

Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Lecture three hours a week.

AFRI 3002 [0.5 credit]

Regions in Africa: Cultures, Society, Politics

Using dominant linguistic borderlines that have shaped much of the African experience in the last century, this course will look at themes cutting across culture, geography, society and politics in francophone, anglophone, lusophone and arabophone Africa. Precludes additional credit for AFRI 2001 (no longer offered).

Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Lecture three hours a week.

AFRI 3003 [0.5 credit]

African Social and Political Thought

The African communitarian tradition. Contemporary African social and political thought, situated in their broad historical contexts.

Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Lecture three hours a week.

AFRI 3004 [0.5 credit] The African City

Historical emergence and contemporary issues of the African city.

Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Lecture three hours a week.

AFRI 3005 [0.5 credit]

African Migrations and Diasporas

Movements of African peoples, from the slave trade era to the present. African diaspora communities around the world and their relationship with Africa.

Prerequisite(s): third year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Lecture three hours a week.

AFRI 3007 [0.5 credit]

Special Topics in African Studies

A special topic related to African Studies, through one or more disciplinary lenses. Course content will vary from year to year.

Prerequisite(s): a 2000-level AFRI course or third-year standing and 1.0 credit in AFRI.

Lectures three hours a week.

AFRI 3100 [0.5 credit]

African Studies Abroad: Selected Topics

Based at one of Carleton's partner universities in Africa, course will include lectures, seminars, guest speakers, field visits and group research projects to examine a topic in African studies, as selected by the instructor. Topic and location may change annually.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing and approval by the Director of the Institute of African Studies.

AFRI 3200 [0.5 credit]

Thematic Topic

A special topic that takes a thematic approach to African Studies. Course content will vary from year to year. Prerequisite(s): a 2000-level AFRI course or third-year standing and 1.0 credit in AFRI.

Lectures three hours a week.

AFRI 3609 [0.5 credit]

African Cinema

Major moments, debates, figures and movements in African cinema around such categories as the colonial, the anti-colonial, the postcolonial, the national, the continental, the diasporic, the global, race, Afro-futurism, and world cinema, interrogating in the process the very category of "African cinema.".

Also listed as FILM 3609.

Prerequisite(s): 1.0 credit in FILM and third year standing or permission of instructor.

Lecture and screening three hours a week, lecture one hour a week.

AFRI 3900 [0.5 credit]

Placement

Placement for one term with an African focus.
Includes: Experiential Learning Activity
Prerequisite(s): permission of the Institute of African

Studies.

AFRI 3916 [0.5 credit]

Spoken Word Poetry Workshop

This intermediate-level workshop-based course explores traditions of spoken words poetry while requiring students to create and perform their own spoken word poems. Includes: Experiential Learning Activity

Also listed as ENGL 3916.

Prerequisite(s): a grade of B+ or higher in one of: ENGL 2901, ENGL 2903, ENGL 2915; or departmental permission.

Workshops three hours a week.

AFRI 4000 [0.5 credit]

Advanced Topics in African Studies

Seminar examining a specialized topic in African studies. The topic will vary from year to year.

Prerequisite(s): fourth-year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Seminar three hours per week.

AFRI 4003 [0.5 credit]

History of 'The African Child'

Students will analyze the history of the figure of 'the African child' using a range of visual, sources from colonial officials, anthropologists, historians, advertisers, charity and development workers, and African children themselves.

Includes: Experiential Learning Activity Also listed as CHST 4003.

Precludes additional credit for CHST 4001 if taken in 2014-15.

Prerequisite(s): fourth-year standing. Seminar three hours a week.

AFRI 4005 [0.5 credit]

Comparative Indigenous Knowledge and Entrepreneurship

Past and contemporary interconnections between Indigenous knowledge and entrepreneurship on a comparative basis. Distinguishing features of Indigenous entrepreneurship from traditional entrepreneurship such as its focus on community, connection to the land, and the role of women

Also listed as INDG 4105.

Prerequisite(s): Third-year standing. Seminar three hours a week.

AFRI 4050 [0.5 credit]

Selected Topics in African Studies

Selected topics in African studies not ordinarily treated in the regular course program. The choice of topic varies from year to year. Students should check with the institute regarding the topic offered.

Prerequisite(s): fourth-year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Also offered at the graduate level, with different requirements, as AFRI 5050, for which additional credit is precluded.

Seminar three hours per week.

AFRI 4060 [0.5 credit] **African Feminisms**

African feminisms as theoretical interventions and as political practice, and as diverse forms. Gender as a marker of power: status, hierarchy, social capability, and as a system of distribution of resources, responsibilities and solidarities.

Prerequisite(s): fourth-year standing and at least 1.0 credit in AFRI or permission of the Institute of African Studies. Also offered at the graduate level, with different requirements, as AFRI 5060, for which additional credit is precluded.

Seminar three hours per week

AFRI 4900 [0.5 credit] **Tutorial in African Studies**

A tutorial on selected topics in which seminars are not available.

Prerequisite(s): Permission of the Institute of African Studies and agreement of an instructor.

American Sign Language (ASLA)

American Sign Language (ASLA) Courses **Placement for Language Students**

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details. please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

ASLA 1010 [0.5 credit]

First-Year American Sign Language I

For students with little or no knowledge of the language or culture of deaf people. Basic communicative competence in American Sign Language. Anthropological, sociolinguistic, and sociocultural aspects of deaf culture. Compulsory attendance.

Precludes additional credit for ASLA 1110.

Four hours a week.

ASLA 1020 [0.5 credit]

First-Year American Sign Language II

Continuation of first-year American Sign Language. Basic communicative competence plus anthropological, sociolinguistic, and sociocultural aspects of deaf culture. Compulsory attendance.

Precludes additional credit for ASLA 1110.

Prerequisite(s): grade of C or higher in ASLA 1010, or permission of the School.

Four hours a week.

ASLA 1110 [1.0 credit]

Intensive First-Year American Sign Language

For students with little or no knowledge of the language or culture of deaf people. Basic communicative competence in American Sign Language. Anthropological, sociolinguistic, and sociocultural aspects of deaf culture. Compulsory attendance.

Precludes additional credit for ASLA 1010 or ASLA 1020. Eight hours a week (one term).

ASLA 2010 [0.5 credit]

Second-Year American Sign Language I

Study of American Sign Language beyond the elementary level. Study of targeted lexical and grammatical features, as well as specific conversational skills. Further exploration of the culture of deaf people. Compulsory attendance.

Precludes additional credit for ASLA 2110.
Prerequisite(s): grade of C or higher in ASLA 1020,
ASLA 1110, or permission of the School.
Four hours a week.

ASLA 2020 [0.5 credit]

Four hours a week.

Second-Year American Sign Language II

Continuation of second-year American Sign Language. Study of targeted lexical and grammatical features, as well as specific conversational skills. Further exploration of the culture of deaf people. Compulsory attendance. Precludes additional credit for ASLA 2110. Prerequisite(s): grade of C or higher in ASLA 2010, or permission of the School.

ASLA 2110 [1.0 credit]

Intensive Second-Year American Sign Language

Further study of American Sign Language to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for ASLA 2010 and ASLA 2020.

Prerequisite(s): grade of C or higher in ASLA 1020 or ASLA 1110, or permission of the School. Eight hours a week (one term).

ASLA 3010 [0.5 credit]

Third-Year American Sign Language I

Receptive and expressive mastery of grammar and lexicon of American Sign Language. Advanced conversation skills across different registers. Advanced insight into the culture of the deaf community. Compulsory attendance.

Prerequisite(s): grade of C or higher in ASLA 2020, ASLA 2110, or permission of the School. Three hours a week.

ASLA 3020 [0.5 credit]

Third-Year Advanced American Sign Language II

Continuation of third-year American Sign Language. Receptive and expressive mastery of grammar and lexicon of American Sign Language. Advanced conversation skills across different registers. Advanced insight into the culture of the deaf community. Compulsory attendance. Prerequisite(s): grade of C or higher in ASLA 3010, or permission of the School.

Three hours a week.

ASLA 4010 [0.5 credit]

Fourth-Year American Sign Language I

Focus on the development of receptive and productive skills above what is expected in everyday conversation. Skills in specific contexts such as social services, health, business and government. Compulsory attendance. Prerequisite(s): grade of C or higher in ASLA 3020, or permission of the School.

Three hours a week.

ASLA 4020 [0.5 credit]

Fourth-Year American Sign Language II

Continuation of fourth-year American Sign Language. Focus on the development of receptive and productive skills above what is expected in everyday conversation. Skills in specific contexts such as social services, health, business and government. Compulsory attendance. Prerequisite(s): grade of C or higher in ASLA 4010, or permission of the School.

Three hours a week.

ASLA 4900 [1.0 credit]

Independent Study

Research in a topic in American Sign Language or deaf culture under the supervision of a member of the School. Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in the Minor in American Sign Language, grade of C or higher in ASLA 4020 or equivalent, or permission of the School.

ASLA 4901 [0.5 credit] Independent Study

Research in a topic in American Sign Language or deaf culture under the supervision of a member of the School. Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in the Minor in American Sign Language, grade of C or higher in ASLA 4020 or equivalent, or permission of the School.

Anthropology (ANTH)

Anthropology (ANTH) Courses

ANTH 1001 [0.5 credit]

Introduction to Socio-Cultural Anthropology

What does it mean to be human? Anthropologists have approached this question by using the ethnographic method to understand the diverse ways people create shared worlds of meaning. In this course students will learn how culture shapes experience, and how ethnography describes this process.

Includes: Experiential Learning Activity
Precludes additional credit for HUMS 1005 (no longer offered).

Lectures/discussions three hours a week.

ANTH 1002 [0.5 credit] Introduction to Issues in Anthropology

This course introduces students to anthropology through in-depth consideration of selected issues facing contemporary cultures and societies. Selected issue(s) will reflect the expertise of the instructor and could include current debates related to race, gender, development, politics, economics, religion, technology, health and the environment.

Includes: Experiential Learning Activity Lectures/discussions three hours a week.

ANTH 1050 [0.5 credit]

Race, Racialization and Racism: Critical Reflections

This course explores historically grounded contemporary dynamics of race, racialization processes and racism. Learners will link their own experiences with key theoretical concepts such as settler colonialism, slavery, racial capitalism, the racial state, systemic racism, and global whiteness.

Prerequisite(s): Anthropology major or BGINS Globalization, Culture and Power Specialization. Seminar three hours a week.

ANTH 2001 [1.0 credit]

Foundations in Socio-Cultural Anthropology

Exploration of basic anthropological concepts and analytical strategies through case studies. Emphasis on socio-cultural diversity as documented by ethnographic research with attention to the role of culture in articulating gender, kinship, economic and political relations.

Includes: Experiential Learning Activity
Prerequisite(s): ANTH 1001 or ANTH 1002.
Lectures and discussions three hours a week.

ANTH 2020 [0.5 credit] Race and Ethnicity

Introduction to some of the recent theoretical literature and research on the issues of race, racism and ethnicity. Concepts, controversies and definitions dealing with race and ethnicity from the Canadian context and internationally.

Also listed as SOCI 2020.

Lectures and workshop three hours a week.

ANTH 2040 [0.5 credit] Anthropology and Gender

The study of gender in anthropology, including its theoretical, cross-cultural and ethnographic aspects. Emphasis on gender as a sociocultural process that is at once discursive and embodied, and that varies in distinct cultural, socio-historical, geopolitical, and economic contexts.

Includes: Experiential Learning Activity Lectures and workshop three hours a week.

ANTH 2060 [0.5 credit]

Girlhood in Contemporary Contexts: Anthropological and Sociological Perspectives

Drawing on anthropological and sociological approaches, students will explore girls' lives in diverse cultural, political, economic, and social contexts. Topics may include: movement and migration, education, media, imaging and humanitarianism, consumerism, agency and activism, health, and violence.

Also listed as SOCI 2060.

Prerequisite(s): second-year standing or permission of the instructor.

Two hour lecture plus one hour tutorial per week.

ANTH 2070 [0.5 credit] Psychological Anthropology

Exploration of the relative and the universal in relations between the psychological self and the cultural environment. Topics may include anthropology of psychiatric institutions and practices, the cultural relativity of emotions, the self in everyday life and ritual. Lecture/discussion groups three hours a week.

ANTH 2080 [0.5 credit]

Humans/Animals: the More-than-Human in Social Research

Examination of relationships between humans and animals in the sociological and broader social studies canon, including: multispecies ethnography, the role of the 'more than human' in Indigenous legal orders, posthumanist and STS theory, relationships between humans and animals and other non-human entities in the Anthropocene.

Also listed as SOCI 2080.

Lecture/discussion groups three hours per week.

ANTH 2180 [0.5 credit]

Foundations in Community Engagement

Study of theoretical debates and practical applications relating to community engagement with a focus on Canadian examples. Exploration of the contested and complex meanings of community engagement in and between diverse communities, public institutions, non-profit sector and private enterprise with an emphasis on social justice.

Includes: Experiential Learning Activity Also listed as SOCI 2180.

Prerequisite(s): Second year standing or permission of instructor.

Lecture, discussion and project work three hours a week.

ANTH 2500 [0.5 credit] Culture and Symbols

The representation and construction of culture through symbols. Topics may include material culture, rituals, archetypes, myths and mythmaking. Includes: Experiential Learning Activity Lectures and workshop three hours a week.

ANTH 2510 [0.5 credit] Theories of Human Nature

Critical, cross-cultural exploration of theories of human nature. Begins with a survey of western anthropological models of human consciousness and examines scientific, philosophical and religious perspectives with reference to ethnographic research on myth, religion and science produced by western and non-western cultures. Lectures and discussion three hours a week.

ANTH 2550 [0.5 credit] Religion and Society

Cross-cultural survey of religious institutions, focusing on theories and methodologies in the study of religion. Topics may include myth, totemism, cults, ritual, belief systems, altered states of consciousness, new religious and/or new age movements and the relationship of religion with other social institutions and processes.

Includes: Experiential Learning Activity

Also listed as RELI 2736.

Lectures and workshop three hours a week.

ANTH 2610 [0.5 credit]

Studies in Indigenous Peoples of North America: Current Issues in Anthropological Research

Examination of a range of issues related to particular indigenous communities and regions of North America. Topics include political, socio-economic, and cultural transformations, Aboriginal title and rights, collaborative research, and other topics relevant to indigenous communities and indigenous - non-indigenous relations. Lecture/discussion groups three hours a week.

ANTH 2620 [0.5 credit] Ethnography of sub-Saharan Africa

Examination of selected areas of contemporary sub-Saharan Africa through ethnographic research. Topics may include religion, political economy, international development, expressive cultures, colonialism/ postcolonialism, witchcraft, health, the environment, gender, race, and family relations.

Lecture and discussion groups three hours a week.

ANTH 2630 [0.5 credit] Studies in Asian Societies: Current Issues in Anthropological Research

Examination of contemporary Asia through anthropological research. Topics may include cultural practices, religion, health issues, economics, politics, history, colonialism and social change. Emphasis will vary by sub-region from year to year, e.g., focusing on South, East or Southeast Asia.

Lectures and discussion three hours a week.

ANTH 2635 [0.5 credit]

Tradition and Modernity in the Pacific

Relationships between contemporary Pacific societies and the rest of the world. Topics may include colonialism and its aftermaths, cultural revival, mining, Christianity, alternative modernities, diasporas, and indigenous media. Lecture/discussion groups three hours a week.

ANTH 2640 [0.5 credit] Latin America and the Caribbean through Ethnography

Examination of selected areas of contemporary Latin America and the Caribbean through current ethnographies. Topics may include: processes of state-formation, colonialism, political-economy, gender and sexuality, racism and racialization processes, health, urban and rural ethnography, social movements, migration and diaspora, and everyday life.

Precludes additional credit for ANTH 2650 and ANTH 2670 (no longer offered).

Lectures and discussion three hours a week.

ANTH 2645 [0.5 credit] The Postcolonial Middle East

How do people live in the Middle East? What political, historical and religious forces shape their everyday life? This class draws on essays, ethnographies, and movies to challenge the narratives of chronic violence, excessive religiosity, and prehistoric misogyny that haunt our understanding of this region.

Lecture and discussion three hours a week.

ANTH 2660 [0.5 credit] Ethnography of North Africa

Introduction to societies and cultures of North Africa. Topics may include: colonialism and postcolonialism, nationalism and the relations between minority and majoritarian groups, intersections of state and religion, ritual practices, everyday life, gender, race, class, migration and diaspora, expressive cultures and the environment.

Lectures and discussion three hours a week.

ANTH 2680 [0.5 credit]

Anthropology of "Mainstream" North America

Examination of contemporary North American society. Topics may include social class, success myths, schooling, immigration, cities, the self, television, romance, youth sub cultures; how what is seen as "mainstream" is determined.

Lectures/discussion groups three hours a week

ANTH 2690 [0.5 credit] Ethnography of a Selected Area

Ethnography of a selected area. Area to be announced. Lectures and discussion three hours a week.

ANTH 2815 [0.5 credit] Special Topics in Anthropology

Special topics in anthropology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Lecture/discussion groups three hours a week.

ANTH 2825 [0.5 credit]

Special Topics in Anthropology

Special topics in anthropology not ordinarily treated in the regular course program. The choice of topics varies from year to year. Students should check with the Department regarding the topic offered.

Lectures/discussion groups three hours a week.

ANTH 2850 [0.5 credit] Anthropology of Development

An exploration of the anthropology of international development. Topics may include racial capitalism and inequality, globalization, gender relations, global in/justice, policy-making processes, climate change, NGOs, and social movements.

Includes: Experiential Learning Activity Lectures and discussion three hours a week.

ANTH 2915 [0.5 credit]

Course-Related Tutorials in Anthropology

 $\label{lem:consult} \mbox{Consult the Department for information.}$

ANTH 2925 [0.5 credit]

Course-Related Tutorials in Anthropology

Consult the department for information.

ANTH 3005 [0.5 credit] Ethnographic Research Methods

Broad overview of methods through lectures, discussion, and hands-on activities. Research design, ethics, participant-observation, interviewing and other methods, data analysis and ethnographic writing. Prepares students to apply methodological knowledge in careers and projects undertaken for the fourth-year honours research paper and/or ethnographic field course.

Includes: Experiential Learning Activity Prerequisite(s): ANTH 2001 [1.0]. Lectures three hours a week.

ANTH 3007 [0.5 credit] History of Anthropological Theory

Analysis of the development of anthropological thought since the end of the eighteenth to the mid-twentieth century. The development of various theoretical approaches within their historical, social, intellectual and biographical contexts. The implications of these issues may be explored through ethnographies.

Prerequisite(s): ANTH 2001 [1.0]. Lectures three hours a week.

ANTH 3008 [0.5 credit]

Contemporary Theories in Anthropology

Contemporary trends in anthropological analyses. Discussion of anthropological theory in its contemporary, interdisciplinary context.

Prerequisite(s): ANTH 2001.

Lecture/discussion groups three hours per week.

ANTH 3010 [0.5 credit]

Language, Culture, and Globalization

Theoretical and methodological contributions of anthropology to the study of communicative practices in a variety of social and cultural contexts. Language practices, ideologies, and globalization as they intersect with culture, power, race, ethnicity, indigeneity, gender, nationhood and political economy.

Prerequisite(s): second-year standing or permission of the instructor.

Lecture three hours per week.

ANTH 3020 [0.5 credit] Studies in Race and Ethnicity

Race, racism and ethnicity in Canada and internationally. Critical perspectives on race and ethnicity as they intersect with other social relations. Racism, Eurocentrism, Orientalism, nationalism, colonialism, international migration, citizenship, and diasporic cultures. Also listed as SOCI 3020.

Prerequisite(s): second-year standing or permission of the instructor

Lectures three hours a week.

ANTH 3027 [0.5 credit]

Studies in Globalization and Human Rights

Examination of the various dimensions and meanings of globalization and its relationship with human rights. Main emphasis will be on the implications of the emerging global economy for economic, social, political and cultural rights.

Also listed as SOCI 3027, PSCI 3802.

Prerequisite(s): SOCI 1001 and SOCI 1002, or

SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lectures three hours a week.

ANTH 3035 [0.5 credit]

Science, Culture and Society: Social Studies of Science

Principal theories and methods used by Science and Technology Studies scholars to examine the social construction of scientific knowledge. Topics may include the demarcation of science from non-science, the relationship between experts and laypersons, and the study of scientific controversies.

Also listed as SOCI 3035.

Prerequisite(s): second-year standing or permission of the instructor.

Lecture three hours a week.

ANTH 3040 [0.5 credit] The Global Middle Class

The growing numbers of people who could be considered "middle class" are central to both "cultural" and "economic" globalization. This course examines what it means to be middle class theoretically, historically, and cross-culturally. Prerequisite(s): second-year standing or permission of the instructor.

Lecture/discussion groups three hours a week.

ANTH 3045 [0.5 credit]

Children and Childhood in a Globalized World

A socio-historical and cross-cultural exploration of constructions, deconstructions, and the experience of childhood in Canada and internationally. Compulsory schooling, child labour, protection and regulation in law, the commodification and equalization of childhood, children's social movements, and the emergence of children's rights discourses.

Also listed as SOCI 3045.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-year standing.

Lecture three hours a week.

ANTH 3215 [0.5 credit] Special Topics in Anthropology

Topics not ordinarily treated in the regular course program. The choice of topics varies from year to year. Check with the Department regarding the topic offered. Prerequisite(s): second-year standing or permission of the instructor.

Lecture three hours a week.

ANTH 3225 [0.5 credit] Special Topics in Anthropology

Topics not ordinarily treated in the regular course program. The choice of topics varies from year to year. Check with the Department regarding the topic offered. Prerequisite(s): second-year standing or permission of the instructor.

Lecture three hours a week.

ANTH 3310 [0.5 credit] Studies in Medical Anthropology

Cross-cultural study of the body, illness, healing, health and well-being. Sociocultural factors in the causation, diagnosis, management and meaning of illness. Biocultural and political-economic dimensions of ill health. Ritual and symbolic healing. Ethical concerns and public health applications of anthropology.

Prerequisite(s): second-year standing or permission of the instructor.

Lecture three hours a week.

ANTH 3340 [0.5 credit] Sport and the Body

Focusing on the social and cultural significance of sport and physical activities in a global perspective, as well as the embodied experiences of athletes and fans, this course explores issues of racialization and racism, gender and sexuality, economic inequality, colonialism, and power in sport.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or permission of the instructor.

Lecture, seminar discussion, and activities three hours a week.

ANTH 3355 [0.5 credit] Anthropology and the Environment

Environmental concerns affect everyone, unevenly. How does anthropology illuminate the cultural, social, political and ecological differentiation resulting from and constituting environmental processes? The range of responses considered may address issues of resource access and exploitation, as well as transnational transformations in the concept of nature.

Prerequisite(s): second-year standing or permission of the instructor.

Lectures three hours a week.

ANTH 3360 [0.5 credit] Jokes, Humor, Laughter

Anthropological inquiries into the phenomenon of humor. Psychoanalytic, semiotic and phenomenological perspectives are applied to ethnographic materials from a variety of cultural contexts.

Lecture/discussion groups three hours per week.

ANTH 3510 [0.5 credit]

Ritual

Cross-cultural study of ritual, religious and secular, its role in various social processes and relation to other activities. Exploration of variability of ritual and the range of theories that have been developed to account for what ritual does, including intellectualist, functionalist and performative. Prerequisite(s): second-year standing or permission of the instructor.

Lectures and discussion three hours a week.

ANTH 3550 [0.5 credit] Visual Anthropology

An introductory exploration of the relationship between anthropology and visual practices. Focus on both the analysis of visual elements and the use of visual media such as film, photography, drawing, and digital media in anthropological practice.

Prerequisite(s): second-year standing or permission of the instructor.

Lecture and discussion three hours a week.

ANTH 3570 [0.5 credit] Studies in Art, Culture and Society

Thematic investigation of genres, forms and styles of art, culture and society. Topics may include current debates on social structure and artistic creativity; ideology, cultural memory and politics, patronage and art; cross-cultural representations, taste, social mobility and art; modernism and the avant-garde.

Also listed as SOCI 3570.

Prerequisite(s): second-year standing or permission of the instructor.

Lecture three hours a week.

ANTH 3580 [0.5 credit] Anthropology of Material Culture and Museums

How diverse societies are materialized in a wide range of cultural materials from clothing, housing and memorials to more ephemeral materializations such as food, gardens, dance, ritual props and music-making. Emphasis on museum practices and the cultural politics of display. Prerequisite(s): second-year standing or permission of the instructor.

Lectures and discussion three hours a week.

ANTH 3600 [0.5 credit]

Studies in Anthropology and Indigenous Peoples

Problems in the interpretation and analysis of various forms of encounters between indigenous peoples and colonizing powers will be examined. Topics may include patterns and practices of contact, cultural syncretism, conquest, domination, relations of ruling, cultural hegemony, resistance and non-compliance.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or permission of the instructor.

Lecture three hours a week.

ANTH 3915 [0.5 credit]

Course-Related Tutorials in Anthropology

Consult the Department for information.

ANTH 3925 [0.5 credit]

Course-Related Tutorials in Anthropology

Consult the Department for information.

ANTH 3950 [0.5 credit] Practicum Placement

This course provides students with the opportunity to apply academic skills and knowledge while working within an organization in the community. Placements are organized with support from a co-ordinator.

Includes: Experiential Learning Activity

Also listed as SOCI 3950.

Precludes additional credit for ANTH 4000 (no longer offered).

Prerequisite(s): third-year standing with a GPA of 9.00 or higher and permission of the course instructor. [Or by permission of the course instructor for students who do not meet the GPA requirement.].

Placement six to eight hours a week.

ANTH 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

ANTH 4005 [0.5 credit] Health and Globalization

An anthropological examination of the health impacts of global processes, relationships, and movements. May include topics such as economic development and disease, migration and health, medical tourism, transnational reproduction, and the global circulation of bodies, organs, medical technologies, drugs, and pathogens.

Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4006 [0.5 credit]

Decolonizing Methodologies in the 21st Century: Practicing Engaged Anthropology

Examination of the breadth of critical literature on 'decolonizing methodologies' within and adjacent to anthropology in the 20th and 21st centuries. The course will equip students with an in-depth understanding of critiques of the discipline's methods and ethics while practicing an engaged anthropology.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing or permission of the

instructor.

Seminar three hours per week.

ANTH 4007 [0.5 credit] Advanced Studies in Anthropological Theory and Methods

The course examines debates in theory and methodology currently facing the discipline through a survey of leadingedge issues and approaches.

Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4020 [0.5 credit]

Advanced Studies in Race and Ethnicity

An advanced seminar that explores selected topics in race and ethnicity in an international context. Specific topics will vary according to instructors' research interests.

Also listed as SOCI 4020.

Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4036 [0.5 credit]

Special Topics in Science and Technology Studies

The course is concerned with broadening students' understanding of Science and Technology Studies (STS) by focusing on a relevant topic. Topics may vary from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4050 [0.5 credit]

Ethical Issues in Health and Healthcare

A study of the diverse ethical frameworks that inform and interrogate health, healthcare, and biomedicine. Potential topics include: history of bioethics; critical bioethics; ethics of care; health inequities; indigenous healthcare; human enhancement; novel genetic technologies; ageing; vaccine politics.

Also listed as SOCI 4050.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

ANTH 4100 [0.5 credit] Ethnographic Field Course

In this class, we explore a significant issue in our communities, learning how ethnographic methods can add new perspectives to our own experience and help us appreciate the experience of others. Students learn-through-doing their own small ethnographic projects, peer-to-peer feedback, and reflective discussion.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5101, for which additional credit is precluded.

Seminar three hours per week.

ANTH 4109 [0.5 credit] Ethnography of Gender

Ethnographic focus on topics may include: global politicaleconomy, colonialism and post-colonialism, racialization and racism, work and labour, expressive and music cultures, as well as social movements as they intersect with gender and sexualities. Topics and approaches may vary from year to year.

Prerequisite(s): third-year standing or permission of instructor.

Also offered at the graduate level, with different requirements, as ANTH 5109, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4171 [0.5 credit]

Community Engagement Capstone

Students in the capstone will reflect on their engagement experiences and advance their critical understanding of community through a series of in-class activities and readings. Students will produce a public-facing artifact (e.g., blog, podcast, video) related to their experiences, potentially in collaboration with community partners. Includes: Experiential Learning Activity

Also listed as SOCI 4171.

Prerequisite(s): ANTH 2180 and fourth year standing or permission of instructor.

Lecture, discussion and project work three hours per week.

ANTH 4200 [0.5 credit]

War, Security and Citizenship

Critical theoretical and multidisciplinary examination of violent conflict, security and citizenship. How wars produce a variety of abject and new subjects, create and reproduce citizenship hierarchies, and expand and contract citizenship entitlements.

Also listed as SOCI 4200.

Prerequisite(s): fourth year standing.

Seminar three hours a week.

ANTH 4205 [0.5 credit] Language, Place and the North

An investigation of language, places, spaces, and environment, focussing on Indigenous peoples and the Arctic and subarctic regions of Canada. Topics include critical understandings of language use, northern environments, Indigenous homelands, and the role of Indigenous languages in defining and transforming cultural and geographic space.

Prerequisite(s): fourth-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5205, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4215 [0.5 credit]

Special Topics in Anthropology

Topics not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the department regarding the topic offered. Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4225 [0.5 credit]

Special Topics in Anthropology

Topics not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the department regarding the topic offered. Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4355 [0.5 credit]

Anthropology of Natural Resources

Anthropology of natural resources. Topics may include economies, ecologies, cultural and social dynamics of fishing, forestry, lands, mining, oil, wildlife, at varying analytical scales, including a critical examination of the term "natural resource" itself.

Includes: Experiential Learning Activity

Prerequisite(s): third- year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5355, for which additional credit is precluded.

Seminars and discussions three hours a week.

ANTH 4403 [0.5 credit]

Symbolic and Semiotic Anthropology

This course looks at the role of signs and symbols in social life, including the properties of signs, the workings of symbolic systems, the construction of social reality, and role all these play in actors' practice.

Prerequisite(s): third-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5403, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4500 [0.5 credit]

Advanced Studies in Culture and Symbols

Contemporary debates in theory and methods regarding analysis of the symbolic processes.

Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4550 [0.5 credit]

Special Topics in Visual Anthropology

Anthropological approaches to the study of visual cultures, visuality, and the role of visual media in ethnography. Topics may include film, photography, illustration, comics and graphic novels, animation, visual performance, multimodal approaches, digital modes and other visual media that challenge the primacy of textual representations.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5005, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4560 [0.5 credit] Economic Anthropology

Anthropology's holistic, comparative and critical contribution to the study of livelihood. How practices and understandings of production, circulation, consumption, and property vary cross-culturally. Relevant theoretical debates including those among formalist (neo-classical), substantivist, Marxist, and interpretive approaches over the applicability of capitalist thinking.

Prerequisite(s): third-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5560, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4570 [0.5 credit] Political Anthropology

Can anthropology help us understand politics? Can ethnographic encounters help us approach political theory and political action differently? This seminar will focus on concepts (power, authority, equality) and practices (resistance, subjection, solidarity) through which anthropologists invite us to rethink the way we live together.

Prerequisite(s): third-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5570, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4590 [1.0 credit]

Capstone Seminar in Globalization, Culture, and Power

This course is dedicated to developing individual student research projects. Through seminar discussions, these student projects will benefit from an introduction to research design and methodologies, analysis and interpretation, as well as issues surrounding ethics, representation, and knowledge production. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in the BGINS Globalization, Culture and Power program with a minimum 9.0 GPA or permission of the instructor. Seminar three hours a week.

ANTH 4610 [0.5 credit] Anthropology of Indigeneity

For the purposes of this course, Indigenous cultures are cultures that have transformed through the struggles of colonized peoples to resist and redirect projects of settler nationhood. This course looks at those transformations and that resistance in a selection of social, political and economic contexts.

Prerequisite(s): third-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5208, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4620 [0.5 credit]

Special Topics in Ethnography of Contemporary Africa

Research-based seminar that explores the debates related to ethnographic research in (a) selected region(s) of Africa. Topics may include social movements, expressive cultures, religious practices, conflict, identity politics, political economy, colonialism and postcolonialism, migration and diaspora, health, race, gender, and climate change.

Prerequisite(s): third-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5209, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4730 [0.5 credit] Colonialism and Post-Colonialism

Comparative ethnographic and historical approaches to colonialism including topics such as the formation of colonial regimes, colonial governmentality, servile labour systems, missionization, anti-colonial resistance, cultural hybridization and post-colonial memory. Exploration of debates over the relation between colonialism and the production of social scientific knowledge.

Also listed as SOCI 4730.

Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4750 [0.5 credit]

Advanced Studies in Globalization and Citizenship

Selected topics on the confluence of processes of globalization, development and citizenship. Examination of debates about the meaning and impact of globalization on patterns of inequality and citizenship both internationally and within Canada, and about strategies for progressive development.

Precludes additional credit for SOCI 4750 (no longer offered).

Prerequisite(s): fourth-year standing. Seminar three hours a week.

ANTH 4780 [0.5 credit] **Anthropology of Personhood**

Exploration of anthropological approaches to personhood and diversity in constructions of the self in various sociocultural and historical contexts.

Prerequisite(s): third-year standing or permission of the instructor.

Seminar three hours a week.

ANTH 4809 [0.5 credit]

Special Topics in the Anthropology of Development

Topic varies from year to year. Students should check with the Department regarding the topic offered.

Prerequisite(s): fourth-year standing or permission of the instructor.

Also offered at the graduate level, with different requirements, as ANTH 5809, for which additional credit is precluded.

Seminar three hours a week.

ANTH 4900 [1.0 credit]

Honours Research Paper in Anthropology

This course offers Honours students the opportunity to write an original research paper in their final year of study. Supported by the HRP supervisor, students develop their projects through seminar discussion addressing issues of research design, ethics, methodology, anthropological analysis, interpretation, and representation.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing.

ANTH 4915 [0.5 credit] **Tutorial in Anthropology**

Consult the Department for information.

ANTH 4925 [0.5 credit] **Tutorial in Anthropology**

Consult the Department for information.

Applied Linguistics and Discourse Studies (ALDS)

Applied Linguistics and Discourse Studies (ALDS) Courses

ALDS 1001 [0.5 credit]

Language Matters: Introduction to ALDS

Core topics in applied linguistics and discourse studies. First and second language acquisition; sign language; language teaching and assessment; language in society; language, identity and power; discourse analysis; written language and literacy.

Lectures three hours a week.

ALDS 2201 [0.5 credit]

Analysis of Oral Language Use

Introduction to the analysis of oral language in use; distinctions between spoken and written language; theoretical and methodological approaches such as speech act theory, ethnography of communication, conversation analysis, and discourse analysis; classroom interaction; interaction in first- and second-language acquisition; analysis of spoken language corpora. Includes: Experiential Learning Activity
Prerequisite(s): ALDS 1001 or permission of the

instructor.
Lectures three hours a week.

ALDS 2202 [0.5 credit]

Analysis of Written Language Use

Introduction to the analysis of written language in use, including theoretical and methodological approaches such as rhetorical genre studies (including academic and workplace writing); adult literacy studies; text-structure analysis; discourse analysis (including critical discourse analysis); analysis of textual corpora. Includes: Experiential Learning Activity Prerequisite(s): ALDS 1001 or FYSM 1004 or COMS 1001 or permission of the instructor.

Lectures three hours a week.

ALDS 2203 [0.5 credit]

Linguistic Theory and Second-Language Learning

Critical study of linguistic theory and description applied to second-language learning; a brief consideration of similarities and differences in first- and second-language development, bilingualism and types of linguistic error and their significance.

Includes: Experiential Learning Activity Prerequisite(s): second-year standing. Lectures three hours a week.

ALDS 2204 [0.5 credit]

Strategies for Successful Writers

Strategies for successful academic and professional writing with an emphasis on audience awareness, purpose, and context of writing. Approaches to peer review and time management for enhanced writing productivity. Practice with tools for the development of academic and professional text types.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or permission of the

instructor.

Lectures three hours a week

ALDS 2604 [0.5 credit]

Communication Differences and Disabilities I

A survey course highlighting a variety of communication differences and disabilities. Specific topics vary from year to year but typically will include speech, language, fluency and hearing differences and disabilities.

Also listed as LING 2604.

Prerequisite(s): LING 1001 and second-year standing, or permission of the instructor. Lectures three hours a week.

ALDS 2704 [0.5 credit]

Bilingualism

The linguistic nature of bilingualism. The structure of bilingual societies and the relation between societal and individual bilingualism. The role of bilingualism in language education.

Includes: Experiential Learning Activity Prerequisite(s): second-year standing. Lectures three hours a week.

ALDS 2705 [0.5 credit]

Language and Power

How social conditions engender different linguistic choices. Attention to linguistic resources for expressing ideological beliefs and for maintaining and reinforcing power structures in institutional and social sites.

Includes: Experiential Learning Activity
Precludes additional credit for FYSM 1205.
Prerequisite(s): second-year standing.
Lectures three hours a week.

ALDS 3201 [0.5 credit] Intercultural Communication

Introduction to intercultural communication with an emphasis on social interaction, multimodality, and identity construction. Application of theoretical perspectives to case studies through empirical inquiry and storytelling. Specific topics include cultural identity and food, gesture and nonverbal communication, and the structure of rhetoric.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing, and one of LING 1001 or ALDS 1001, or permission of the School.
Lectures three hours a week.

ALDS 3202 [0.5 credit]

Sociolinguistics

The place of language within society; bilingual and multilingual communities; language, social mobility and social stratification; sociolinguistic factors in language change.

Also listed as LING 3702.

Precludes additional credit for ALDS 2701 (no longer offered).

Prerequisite(s): ALDS 1001 and third-year standing. Lectures three hours a week.

ALDS 3205 [0.5 credit]

English as a Global Language

The origins, development and globalization of the English language. Establishment of Standard English; spread of English in the Inner circle and in expanding circles; world Englishes; linguistic features of English varieties. English as a global language; learning and teaching English as an international language.

Includes: Experiential Learning Activity
Prerequisite(s): ALDS 1001 and LING 1001.

Seminars three hours a week.

ALDS 3301 [0.5 credit] Introduction to Deaf Studies

A critical introduction to Deaf community and culture as they relate to a social model of disability, to ethnicity, and to issues of diversity and inclusion. Discourse analysis of research and policy in education for Deaf students from early childhood and beyond.

Includes: Experiential Learning Activity

Also listed as DBST 3301.

Precludes additional credit for ALDS 3903A if taken in Winter term 2016 or Winter term 2018, and ALDS 4906A, if taken in Fall term 2016.

Prerequisite(s): third-year standing in Linguistics or Applied Linguistics and Discourse Studies or enrolment in the Minor in Disability Studies. Seminars three hours a week.

ALDS 3401 [0.5 credit]

Research and Theory in Academic Writing

Study of contemporary research and theory (1970s to present) on academic writing in elementary, secondary and post-secondary school, with emphasis on writing in university. Consideration of what academic writing entails, how writing fosters learning, and how instruction can help students develop their writing abilities.

Includes: Experiential Learning Activity

Also listed as ENGL 3908.

Prerequisite(s): third-year standing or permission of the

instructor.

Lectures three hours a week.

ALDS 3402 [0.5 credit]

Research and Theory in Workplace Writing

Study of contemporary research and theory (1980s to present) in writing in workplace settings. Consideration of how writing is used in accomplishing work, how novices learn to write effectively, and what the implications are for pedagogy.

Includes: Experiential Learning Activity

Also listed as ENGL 3909.

Prerequisite(s): third-year standing or permission of the

instructor.

Lectures three hours a week.

ALDS 3405 [0.5 credit] Second Language Writing

Theory and practice of second language (L2) writing: how people learn to write in a second language, and how L2 writing courses for specific groups of learners can be designed.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

ALDS 3414 [0.5 credit]

Introduction to Professional Writing and Editing

The fundamental skills of professional writing and editing, including writing for specific audiences, document design, revision strategies, copyediting.

Includes: Experiential Learning Activity

Also listed as ENGL 3414.

Prerequisite(s): third-year standing or permission of the

Seminars three hours a week.

ALDS 3604 [0.5 credit]

Communication Differences and Disabilities II

An in-depth examination of select topics in the field of communication differences and disabilities. An emphasis is placed on theoretical accounts of specific differences and disabilities and the cross-linguistic evidence for these accounts. Specific topics may vary from year to year. Also listed as LING 3604.

Prerequisite(s): LING 1001 and one of ALDS 2604 or LING 2604.

Lectures three hours a week.

ALDS 3701 [0.5 credit] Corpus Linguistics

Computer-assisted analysis of electronic collections of naturally occurring language. Applications in such areas as language variation, grammar, lexicology, phraseology, translation, and learner language.

Includes: Experiential Learning Activity

Also listed as LING 3701.

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

ALDS 3705 [0.5 credit] Adult Literacy

The extent and social contexts of restricted literacy in Canadian society; approaches to and debates surrounding the teaching and learning of adult literacy.

Prerequisite(s): third-year standing or permission of the instructor.

Lectures three hours a week.

ALDS 3706 [0.5 credit]

Discourse Analysis

Principles of and studies in discourse analysis, including both conversational and textual/documentary analysis. The major focus is on language use in structuring social relationships.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

ALDS 3801 [0.5 credit] Beyond the BA

Students explore personal and professional transitions from undergraduate to entering the workforce or graduate school. Topics may include self-assessments, career management skills, and networking. Both academic and practical work, featuring interaction from career specialists, graduate schools, professionals, and employed ALDS graduates.

Includes: Experiential Learning Activity

Precludes additional credit for ALDS 3903C, if taken in Winter 2019; ALDS 3903B, if taken in Fall 2020 or Fall

2021.

Prerequisite(s): Third-year standing in ALDS or LING or permission of the School.

Seminars three hours a week.

ALDS 3802 [0.5 credit]

Introduction to Forensic Linguistics

Study of language use as legal evidence and in court proceedings. Consideration of oral, written, and multimodal linguistic evidence in a variety of forensic contexts including authorship profiling, asylum seeking, plagiarism, police interviews, etc. Application of selected data analysis methods to real-world forensic linguistic data.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing or permission of

instructor.

Lectures three hours per week

ALDS 3900 [1.0 credit] Independent Study

Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Applied Linguistics and Discourse Studies. Includes: Experiential Learning Activity Prerequisite(s): permission of the instructor.

ALDS 3901 [0.5 credit] Independent Study

Research under the supervision of a member of the School. Normally available only to third- and fourth-year students in Applied Linguistics and Discourse Studies. Includes: Experiential Learning Activity Prerequisite(s): permission of the instructor.

ALDS 3903 [0.5 credit]

Special Topic in Applied Linguistics and Discourse Studies

Selected topics in Applied Linguistics and Discourse Studies not ordinarily treated in the regular course program.

Lectures three hours per week.

ALDS 4201 [0.5 credit] Language Assessment and Testing

The principles of test construction as applied to testing language proficiency, achievement and aptitude. Structural, notional, discrete point and integrative tests. Diagnostic assessment of language development, language disorders, and literacy. Students are expected to create, analyze and evaluate language tests. Includes: Experiential Learning Activity Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor.

ALDS 4203 [0.5 credit]

Lectures three hours a week.

Methods and Practice in Language Pedagogy

Integrates theory and description of language learning and teaching with practical work in one of the languages offered by the School. Requires observation in a language classroom, along with practical work facilitating in-class or language lab activities, or developing teaching materials. Includes: Experiential Learning Activity Precludes additional credit for ALDS 3803 (no longer offered).

Prerequisite(s): permission of the language instructor for the language class in which practical work will be conducted; proficiency in the language in question, as determined by either completion of the prerequisites for 4010 of that language, or assessment by the language instructor; or permission of the School. Seminars and in-class practicum.

ALDS 4206 [1.0 credit] **Practicum in Teaching ESL**

Investigates the processes of classroom learning with observation and some teaching experience in ESL classes. Normally taken concurrently with ALDS 4305 and ALDS 4306.

Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in the concurrent CTESL program, or enrolment in the post-graduate CTESL program.

ALDS 4207 [0.5 credit]

ESL Literacy

The nature of everyday literacy and literacy skills. Analyzing the structure of everyday literacy texts and demands. Issues in literacy for second-language learners. Includes: Experiential Learning Activity Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

ALDS 4208 [0.5 credit] **Languages for Specific Purposes**

An introduction to Languages for Specific Purposes - language instruction tailored to specific groups of learners, e.g. English for Science, for Business, for the Workplace, for Academic Purposes. Research and teaching methodology. Emphasis on EAP/ESP research and instruction at Carleton.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Also offered at the graduate level, with different requirements, as ALDS 5208, for which additional credit is precluded.

Lectures three hours a week.

ALDS 4209 [0.5 credit]

Teaching English as a Foreign Language: **Methodology for Global Contexts**

An introduction to the principles of teaching language in a foreign-language context; review of teaching approaches; practical examination, development and evaluation of instructional materials.

Includes: Experiential Learning Activity Prerequisite(s): ALDS 4305 and fourth-year standing in the concurrent CTESL program, enrolment in the postgraduate CTESL program, the BGInS Specialization in Teaching English in Global Contexts, or permission of the

Lectures three hours a week.

ALDS 4305 [0.5 credit]

Teaching English Language: Methodology I

Classification of classroom teaching methods and materials; adaptation of teaching materials for particular situations; creation of teaching materials; teaching techniques and strategies.

Includes: Experiential Learning Activity Precludes additional credit for ALDS 4205.

Prerequisite(s): fourth-year standing in the concurrent CTESL program, enrolment in the post-graduate CTESL program, or the BGInS Specialization in Teaching English in Global Contexts, or permission of the instructor. Seminars four hours a week.

ALDS 4306 [0.5 credit] Teaching English as a Second Language: Methodology II

Classification of classroom teaching methods and materials used in an international context; adaptation of teaching materials for particular situations; creation of teaching materials for global English language education: teaching techniques and strategies.

Includes: Experiential Learning Activity Precludes additional credit for ALDS 4205.

Prerequisite(s): ALDS 4305 and fourth-year standing in the concurrent CTESL program, enrolment in the postgraduate CTESL program, or permission of the instructor. Seminars four hours a week.

ALDS 4308 [0.5 credit] **English for Specific Purposes**

An introduction to English for Specific Purposes – English language instruction tailored to specific groups of learners (e.g., English for Academic Purposes, and English for a range of specific occupational and professional purposes). This course explores effective practices in course and materials design.

Prerequisite(s): ALDS 2203 or ALDS 4602 and third-year standing in the BGInS Honours Specialization in Teaching English in Global Contexts, or enrolment in the CTESL program, or permission of the instructor.

Seminars three hours a week.

ALDS 4403 [0.5 credit]

Writing and Knowledge-Making in the Disciplines

The role of writing in constructing knowledge in academic disciplines, as viewed from contemporary socio-cultural perspectives. Consideration of how the goals, values, and assumptions of different disciplines shape their writing in distinctive ways and what implications this holds for pedagogy.

Includes: Experiential Learning Activity Also listed as ENGL 4909. Prerequisite(s): third-year standing.

Lectures three hours a week.

ALDS 4404 [0.5 credit]

Writing and Knowledge-Making in the Professions

The role of writing in constructing knowledge in the professions, as viewed from contemporary socio-cultural perspectives. How the goals, values, and assumptions of different professions shape their writing in distinctive ways and the implications for theory, research, and practice. Includes: Experiential Learning Activity

Also listed as ENGL 4004.

Prerequisite(s): third-year standing or permission of the instructor.

Seminars three hours a week.

ALDS 4405 [0.5 credit]

Teaching Writing in School and the Workplace

Introduction to approaches for teaching writing in elementary and secondary school, in university, and in the workplace, with a focus on socio-cultural theories of language and learning. Discussion of applications of these approaches to classroom and workplace teaching.

Includes: Experiential Learning Activity

Also listed as ENGL 4515.

Prerequisite(s): third-year standing, or permission of the instructor.

ristructor.

Lectures three hours a week.

ALDS 4602 [0.5 credit] Second Language Acquisition

Current issues in second language acquisition; factors influencing success in acquiring a second or additional language, discourse and culture. Emphasis on theoretical concepts, empirical research, and practical implications for language teaching.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

ALDS 4606 [0.5 credit]

Statistics for Language Research

Application of statistical procedures to analysis of language data and to problems of measurement in experimental linguistics, applied linguistics, psycholinguistics, and related fields.

Includes: Experiential Learning Activity

Also listed as LING 4606.

Precludes additional credit for ALDS 4906/LING 4009 Section "B" if taken Winter 2015 or Winter 2016. Prerequisite(s): third-year standing in Linguistics or Applied Linguistics and Discourse Studies or Cognitive Science, or permission of the instructor.

Also offered at the graduate level, with different requirements, as ALDS 5604 and LING 5606, for which additional credit is precluded.

Seminars three hours a week.

ALDS 4709 [0.5 credit]

Systemic-Functional Linguistics

Functions of language in the exchange of meanings between people in a wide variety of communicative situations. Semantic and syntactic resources at risk in these different contexts. Interactions between language and the social context.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or Linguistics, or Journalism, or Communication Studies, or permission of the instructor. Also offered at the graduate level, with different requirements, as ALDS 5102, for which additional credit is precluded.

Lectures three hours a week.

ALDS 4801 [0.5 credit]

Major Structures of English

This course is intended to familiarize students with the structure of the English language, highlighting important contrasts between English and other languages as well as grammatical difficulties for ESL learners.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Applied Linguistics and Discourse Studies, or in Linguistics, or enrolment in the CTESL program, or permission of the instructor. Lectures three hours a week.

ALDS 4900 [1.0 credit] Independent Study

Permits fourth-year Honours students to pursue their interests in a selected area of applied linguistics and discourse studies.

Prerequisite(s): permission of the instructor.

ALDS 4901 [0.5 credit]

Independent Study

Permits fourth-year Honours students to pursue their interests in a selected area of applied linguistics and discourse studies.

Prerequisite(s): permission of the instructor.

ALDS 4906 [0.5 credit]

Special Topic in Applied Linguistics and Discourse Studies

Selected topics in applied linguistics and discourse studies. Contents of this course vary from year to year. Lectures three hours a week.

ALDS 4908 [1.0 credit]

Honours Project in Applied Linguistics and Discourse Studies

Individually designed intensive practicum or research experience. May involve (a) practicum or work study placement in writing or literacy studies, language syllabus design or test development; (b) intensive research activity in an area of Applied Linguistics and Discourse Studies. All projects include substantial written work.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in Applied Linguistics and Discourse Studies, a CGPA of 9.00 or better, or permission of the School.

Tutorial hours arranged.

Arabic (ARAB)

Arabic (ARAB) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

ARAB 1010 [0.5 credit]

First-Year Arabic I

For students with no knowledge of Arabic. Oral skills, reading and writing. Compulsory attendance. Includes: Experiential Learning Activity Precludes additional credit for ARAB 1110. Four hours a week

ARAB 1020 [0.5 credit] First-Year Arabic II

Continuation of first-year Arabic. Oral skills, reading and writing. Compulsory attendance.

Includes: Experiential Learning Activity Precludes additional credit for ARAB 1110.

Prerequisite(s): grade of C or higher in ARAB 1010, or

permission of the School.

Four hours a week

ARAB 1110 [1.0 credit] Intensive First-Year Arabic

For students with no knowledge of Arabic. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for ARAB 1010, ARAB 1020. Eight hours a week (one term).

ARAB 2110 [1.0 credit]

Intensive Second-Year Arabic

Further study of Arabic to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Prerequisite(s): grade of C or higher in ARAB 1110 or permission of the School.

Eight hours a week (one term).

ARAB 3010 [0.5 credit] Third-Year Arabic I

Further study of Arabic to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for ARAB 3015.

Prerequisite(s): grade of C or higher in ARAB 2110, or permission of the School.

Three hours a week.

ARAB 3015 [0.5 credit] Arabic for Heritage Speakers

For students who have attained Arabic proficiency in an informal setting, this course provides an opportunity to build on their existing language skills and to develop them in a formal academic setting. The course will formalize grammar awareness and enhance Arabic literacy skills. Precludes additional credit for 1000- and 2000-level Arabic courses, and for ARAB 3010.

Prerequisite(s): permission of the School.

Three hours a week.

ARAB 3020 [0.5 credit] Third-Year Arabic II

Continuation of third-year Arabic to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Prerequisite(s): grade of C or higher in ARAB 3010 or ARAB 3015, or permission of the School.

Three hours a week.

Archaeology (ARCY)

Archaeology (ARCY) Courses

ARCY 1008 [0.5 credit]

Introduction to Archaeology I

Introduction to the history, theory and practice of field archaeology. Excavations from all time periods and global regions will be discussed. Focus will be placed on excavation methods and technology, including dating, that enhance understanding of sites both on land and underwater.

Also listed as CLCV 1008.

Precludes additional credit for CLCV 2300 (no longer offered).

Lecture three hours a week

ARCY 1009 [0.5 credit] Introduction to Archaeology II

Continues the examination of various aspects of field archaeology begun in ARCY 1008 (also CLCV 1008). This course places greater focus on recent approaches to the interpretation of remains. These include environmental, cognitive and bioarchaeological approaches.

Also listed as CLCV 1009.

Precludes additional credit for CLCV 2300 (no longer offered).

Lecture three hours a week.

ARCY 3000 [0.5 credit] Archaeological Field Work I

Students will participate for a minimum of three weeks on an archaeological field project (ie. excavation or survey). They will learn archaeological documentation and the analysis, recording, and processing of finds. The field project may be anywhere in the world and any time period.

Includes: Experiential Learning Activity
Prerequisite(s): ARCY 1008 and ARCY 1009 or
CLCV 1008 and CLCV 1009 or CLCV 2300 (no longer
offered) and permission of the unit. Permission of the unit
is required to repeat this course.
Field work

ARCY 3301 [0.5 credit]

Field Work I: Greek and Roman World

Students will participate for a minimum of three weeks on an archaeological field project (ie. excavation or survey) relevant to the Greek and Roman world. They will learn archaeological documentation and the analysis, recording, and processing of finds.

Includes: Experiential Learning Activity

Also listed as CLCV 3301.

Prerequisite(s): ARCY 1008 and ARCY 1009 or CLCV 1008 and CLCV 1009 or CLCV 2300 (no longer offered) and permission of the unit. Permission of the unit is required to repeat this course.

Field work

ARCY 4000 [0.5 credit]

Field Work II: Greek and Roman World

Students participate for a minimum of three weeks in a position of responsibility (for example, as a trench supervisor or lab assistant) on an archaeological field project relevant to the Greek and Roman world. Includes: Experiential Learning Activity

Also listed as CLCV 4000.

Prerequisite(s): 0.5 credit in fieldwork at third year level and permission of the unit. Permission of the unit is required to repeat this course.

Field Work

ARCY 4100 [0.5 credit] Archaeological Field Work II

Students participate for a minimum of three weeks in a position of responsibility on an archaeological field project (eg. trench supervisor or lab assistant). The field project may be anywhere in the world and any time period. Includes: Experiential Learning Activity

Prerequisite(s): 0.5 credit in fieldwork at third year level and permission of the unit. Permission of the unit is required to repeat this course.

Field work

Architectural Conservation and Sustainability Engineering (ACSE)

Arch. Conservation and Sustainability Eng. (ACSE) Courses

ACSE 2001 [0.5 credit]

Architecture and the Environment

Impacts of the environment on architecture; deterioration, freeze/thaw, solar heat, air pollution, moisture; Impacts of architecture on the environment; ecologic footprint, energy consumption, air quality, waste generation; designing with the environment; renewable energy, effective siting and landscape, passive solar energy, natural lighting, energy efficiency.

Also listed as ENVE 1001.

Lectures three hours a week, problem analysis one and a half hours a week.

ACSE 3105 [0.5 credit] Green Building Design

Concepts, calculations, modeling; design of green buildings and their components; sustainable sites and landscaping; passive design; building envelope; building materials; daylighting; heating, cooling, and ventilation; building-integrated renewable energy systems; indoor environmental quality; overview of building standards and codes.

Also listed as ENVE 4105.

Prerequisite(s): Third-year status in B.Eng. in Architectural Conservation and Sustainability Engineering, Civil Engineering, or Environmental Engineering or fourth-year standing in B.A.S. concentration in Conservation and Sustainability.

Lectures three hours a week, problem analysis one and a half hours per week.

ACSE 3201 [0.5 credit]

Introduction to Building Performance Simulation

Modelling and simulation to support design, retrofit, rehabilitation of new and existing buildings on performance - energy, comfort, emissions; from basics of numerical modelling to parametric design techniques. Includes: Experiential Learning Activity

Prerequisite(s): Third-year status in B.Eng. Architectural Conservation and Sustainability Engineering,

Environmental Engineering or Civil Engineering, or fourthyear standing in B.A.S. concentration in Conservation and Sustainability.

Lecture 3 hours per week, computer lab/problem analysis 3 hours every other week

ACSE 3207 [0.5 credit]

Historic Site Recording and Assessment

Also listed as ARCH 3881, CIVE 3207.

Methods of heritage documentation including hand recording, photography, rectified photography, total station, gps, photogrammetry, and laser scanning. Non-destructive testing techniques; environmental assessment tools for determining air quality and energy efficiency. Multidisciplinary teams for all project work. Includes: Experiential Learning Activity

Precludes additional credit for ARCN 4100.

Prerequisite(s): third-year status in B.Eng. in Architectural Conservation and Sustainability Engineering.

Lectures three hours a week, lab or field work two hours a week.

ACSE 3209 [0.5 credit] Building Science

Building envelope design and analysis; applied heat transfer and moisture transport; solar radiation; hygrothermal modelling; control of rain, air, vapour, and heat; materials for wall, window, curtain wall, roof, and foundation systems; building envelope retrofit case studies; building code; envelope construction.

Includes: Experiential Learning Activity

Also listed as CIVE 3209.

Prerequisite(s): MAAE 2400 and third-year status in B.Eng. Architectural Conservation and Sustainability Engineering.

Lectures three hours a week, lab/problem analysis three hours alternate weeks.

ACSE 3999 [0.0 credit] Co-operative Work Term

Co-operative work term.

Includes: Experiential Learning Activity Precludes additional credit for CIVE 3999.

Prerequisite(s): N/A. No formal lectures.

ACSE 4101 [0.5 credit] Introduction to Structural Assessment of Historic Masonry Buildings

History of conservation and restoration; types of historic buildings and structural components; mechanical properties and mechanics of masonry constructions; thrust line analysis; masonry buildings, structural walls, seismic damage, basic concepts, and design of masonry structures.

Includes: Experiential Learning Activity Prerequisite(s): CIVE 2200, CIVE 2700.

Lecture 3 hours per week, lab/problem analysis 3 hours every other week

ACSE 4106 [0.5 credit] Indoor Environmental Quality

Indoor environmental quality (air quality, thermal, visual, and acoustic comfort); physical and chemical parameters for characterization. Types and sources of indoor air pollution and discomfort; measurement techniques. Heating, ventilation, air conditioning, lighting practices and issues. Modelling of and design for indoor environmental quality.

Also listed as ENVE 4106.

Prerequisite(s): fourth year status in B.Eng. Architectural Conservation and Sustainability Engineering or B.Eng. Environmental Engineering or fourth year standing in B.A.S. concentration in Conservation and Sustainability. Also offered at the graduate level, with different requirements, as BLDG 5104, for which additional credit is precluded.

Lectures three hours a week, laboratory three hours alternate weeks.

ACSE 4107 [0.5 credit] Building Services Engineering

This course provides details on how buildings are designed and operated. The materials provide foundational knowledge to understand building services: mechanical, electrical, plumbing systems with associated controls.

Also listed as ENVE 4107.

Prerequisite(s): CIVE 3209 and ENVE 4105. Also offered at the graduate level, with different requirements, as BLDG 5302, for which additional credit is precluded.

Lecture three hours per week, problem analysis three hours every other week.

ACSE 4601 [0.5 credit] Building Pathology and Rehabilitation

Deterioration mechanisms for concrete, timber, steel and masonry structures. Identification of design deficiencies; criteria for selection and design of rehabilitation systems. Design techniques to reduce deterioration in new construction and historical structures.

Includes: Experiential Learning Activity Also listed as ARCN 4200, CIVE 4601.

Prerequisite(s): ACSE 3207 and fourth-year status in B.Eng. in Architectural Conservation and Sustainability Engineering.

Lectures three hours a week, lab/field work two hours a week.

ACSE 4907 [1.0 credit] Engineering Research Project

A research project in engineering analysis, design or development carried out by individual students or small teams, for an opportunity to develop initiative, self-reliance, creative ability and engineering judgment and is normally intended for students with high CGPAs and an interest in graduate studies.

Precludes additional credit for CIVE 4907, CIVE 4917 and ACSE 4917.

Prerequisite(s): fourth-year status in Engineering and permission of the department.

ACSE 4917 [0.5 credit] Undergraduate Directed Study

Student carries out a study, analysis, and solution of an engineering problem which results in a written final report. Carried out under close supervision of a faculty member. Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student.

Includes: Experiential Learning Activity
Precludes additional credit for CIVE 4907. CIVE 49

Precludes additional credit for CIVE 4907, CIVE 4917 and ACSE 4907

Prerequisite(s): permission of the Department and completion of, or concurrent registration in, ACSE 4918. No formal lectures. Self-study.

ACSE 4918 [1.0 credit] Design Project

Teams of students develop professional level experience through a design project that incorporates fundamentals acquired in previous mathematics, science, engineering, and complementary studies courses. A final report and oral presentations are required.

Includes: Experiential Learning Activity
Precludes additional credit for CIVE 4918, ENVE 4918.
Prerequisite(s): ECOR 3800 and fourth-year status in
Architectural Conservation and Sustainability Engineering.
Certain projects may have additional requirements.
Lectures two hours alternate weeks, problem analysis

three hours a week.

Architecture - Design Studios/Design Thesis/Research (ARCS)

Architecture - Studio (ARCS) Courses ARCS 2105 [1.5 credit] Studio 2

Supported by the core curriculum, focuses on small-scale building in a local context. Using analog methods, projects introduce the integration of basic structure and building systems while furthering fundamental concepts such as space, inhabitation, and materiality.(Core Course). Includes: Experiential Learning Activity
Precludes additional credit for ARCH 2111.
Prerequisite(s): ARCS 1005 and ARCS 1105.
Twelve hours studio, plus one hour lecture per week.

ARCS 2106 [1.5 credit] Studio 3

ARCH 2192.

With a focus on small to medium scale building projects, projects consider analog and digital methods to advance consideration of site, program, and the materials as the means for shaping the built environment. (Core Course). Includes: Experiential Learning Activity Precludes additional credit for ARCH 2172, ARCH 2182,

Prerequisite(s): ARCS 1005 and ARCS 1105. Twelve hours studio, plus one hour lecture per week.

ARCS 2302 [1.0 credit] **Conservation Studio 1**

Conservation methodologies will be tested and studied through design exercises and historical research on existing architectures, cities and landscapes. The emphasis on the understanding and the relation with the setting will be essential.

Includes: Experiential Learning Activity

Precludes additional credit for ARCH 2172, ARCH 2182,

ARCH 2192.

Prerequisite(s): Second-year standing in B.A.S. major Conservation and Sustainability or permission of the School.

Eight hours studio per week.

ARCS 2303 [1.0 credit]

Urbanism Studio 1: Fundamentals of Urbanism

Through readings, discussions and projects, students will examine a number of the forces that produce the built environment and explore a variety of approaches to documenting, representing, analyzing, organizing and controlling the growth, shape, density, and mix of uses associated with cities.

Includes: Experiential Learning Activity

Precludes additional credit for ARCH 2111, ARCU 2303 (no longer offered), ARCU 3501 (no longer offered). Prerequisite(s): ARCS 1005 and ARCS 1105, or permission of instructor.

Eight hours studio, plus one hour lecture per week.

ARCS 2304 [1.0 credit]

Urbanism Studio 2: Urbanism in the Core

Intensification, revitalization, gentrification, brownfield redevelopment, sustainability, development standards, form-based codes, and the larger impact of migration on urban density. Through design, students explore the ramifications of practices, policies, pressures, processes and cultural preferences on the evolving form and function of the urban core.

Includes: Experiential Learning Activity

Precludes additional credit for ARCH 2172, ARCH 2182, ARCH 2192, ARCS 3303 (no longer offered).

Prerequisite(s): ARCS 1105, and third-year standing in B.A.S. Urbanism major or permission of the School. Eight hours studio, plus one hour lecture per week.

ARCS 3105 [1.5 credit]

Studio 4

Supported by the core curriculum, focuses on a mediumscale building within a regional context. May include a small design-build. Projects further analog and digital methods. May introduce concepts like adaptive re-use while furthering the understanding of structure and building systems in a complex building.(Core Course).

Includes: Experiential Learning Activity Precludes additional credit for ARCH 3111. Prerequisite(s): ARCS 2105 and ARCS 2106.

Twelve hours studio, plus one hour lecture per week.

ARCS 3107 [1.0 credit] Studio 5

The Directed Studies Abroad (DSA) studio considers large-scale, mixed-use buildings in an international context. Design projects advance analog and digital methods to explore broader cultural and social conditions within a complex site often in conjunction with a site visit abroad. (Core Course).

Includes: Experiential Learning Activity Precludes additional credit for ARCH 3172, ARCH 3182, ARCH 3192, ARCS 3106 (no longer offered). Prerequisite(s): ARCS 2105 and ARCS 2106. Eight hours studio, plus one hour lecture per week.

ARCS 3301 [1.0 credit] **Conservation Studio 2**

Historical building projects exploring architecture as a form of cultural expression. Consideration of site, program and materials. Introduction of conservation, sustainability and adaptive re-use principles, development standards, architectural codes, using case studies in Ottawa and elsewhere. Physical, digital drawings and models to explore designs. (Core).

Includes: Experiential Learning Activity Precludes additional credit for ARCH 3111, ARCC 3301 (no longer offered).

Prerequisite(s): ARCS 2302 and third-year standing in B.A.S. Conservation and Sustainability major or permission of the School. Studio eight hours per week.

ARCS 3302 [1.0 credit] Conservation Studio 3

The role of architecture in culture, stressing site and program with respect to their historic, social and ecological implications. Synthesis of issues, methods and techniques of the conservation and sustainability curriculum. (Core Course).

Includes: Experiential Learning Activity
Precludes additional credit for ARCC 3302 (no longer offered), ARCH 3172, ARCH 3182, ARCH 3192.
Prerequisite(s): ARCS 3301 and third-year standing in B.A.S. Conservation and Sustainability major or permission of the School.
Studio eight hours per week.

ARCS 3304 [1.0 credit]

Urbanism Studio 3: Urbanism on the Periphery

Urbanization, sprawl, growth models, land consumption, containment strategies (smart growth, greenbelts, growth boundaries), edge cities, the Just City, Ecological Urbanism, and informal suburbanization in developed and developing countries. Through design, students explore the impact of practices, pressures, processes and cultural preferences on the expanding city.

Includes: Experiential Learning Activity

Precludes additional credit for ARCH 3111, ARCU 3304 (no longer offered).

Prerequisite(s): ARCS 2303 and ARCS 2304 and third-year standing in B.A.S. Urbanism major or permission of the School.

Eight hours studio, plus one hour lecture per week.

ARCS 3306 [1.0 credit] Urbanism Studio 5: Global Perspectives

Urbanization as a global phenomenom. Study of various forms of urbanization and de-urbanization in relation to economic, political and cultural forces. Through design, students explore the (trans)formation of settlements and communities outside of the North American context.

Includes: Experiential Learning Activity

Precludes additional credit for ARCH 3172, ARCH 3182, ARCH 3192, ARCS 4304 (no longer offered).

Prerequisite(s): ARCS 2303 and ARCS 2304 and thirdyear standing in B.A.S. Urbanism major or permission of the School.

Eight hours studio, plus one hour lecture per week.

ARCS 4105 [1.5 credit] Comprehensive Studio

Focussing on multi-unit housing, students from BAS majors collaborate to develop strategies for redevelopment of large urban sites. Engages urban design, site planning, programming, adaptive reuse, and community consultation. Students produce detailed designs for buildings, emphasizing building systems and envelope design. (Core Course).

Includes: Experiential Learning Activity Precludes additional credit for ARCH 4111.

Prerequisite(s): ARCS 3105 and ARCS 3107, or ARCS 3303 and ARCS 3304.

Twelve hours studio, plus one hour lecture per week.

ARCS 4107 [1.0 credit] Option Studio

Offers a range of topics for exploration. Students use analog and digital methods and techniques to culminate the undergraduate studio sequence while offering focused research-led investigation into key social, political, spatial issues. (Core Course).

Includes: Experiential Learning Activity
Precludes additional credit for ARCH 4172, ARCH 4182,
ARCH 4192, ARCS 4106 (no longer offered).
Prerequisite(s): ARCS 3105 and ARCS 3107.
Eight hours studio, plus one hour lecture per week.

Architecture - Technical (ARCC)

Architecture - Technical (ARCC) Courses

ARCC 2100 [0.5 credit]

Design and the Environment

Examines varied methods and techniques to understand the people, places, and potentials of landscapes with a focus on equity and an ethics of care for social and physical environments.

Precludes additional credit for ARCH 1222.

Prerequisite(s): Second-year standing or permission of the School.

Lecture three hours per week

ARCC 2202 [0.5 credit] Architectural Technology 1

General introduction to materials and methods of construction with focus on wood and timber frame construction. Site conditions, foundations, structure and envelope design in terms of their response to local climate: sun (light and heat) wind, moisture. (Core course). Precludes additional credit for ARCH 2221.

Prerequisite(s): permission of the School.

ARCC 2203 [0.5 credit] Architectural Technology 3

Wood frame, post and beam, steel and concrete systems and construction techniques. Structural systems and building envelope principles and practise are explored in conjunction with mechanical and electrical systems in smaller buildings. Emphasis on precedent, tradition and methodology of architectural detailing for construction. Includes: Experiential Learning Activity

Precludes additional credit for ARCH 3221.

Prerequisite(s): ARCC 2202 and third-year standing for B.A.S. students and third-year standing for students in B.Eng. Architectural Conservation and Sustainability. Lectures three hours a week.

ARCC 3202 [0.5 credit] Architectural Technology 4

Medium scale steel, concrete, and wood frame buildings as case studies to explore approaches to building science principles, building envelope design, advanced construction methods and materials, acoustics and sound control, and fire protection. Focus on sustainable design strategies and environment impact. (Core course). Precludes additional credit for ARCH 4221. Prerequisite(s): ARCC 2203 and third-year standing for B.A.S. students or ARCC 2203 and third-year standing for students in B.Eng. Architectural Conservation. Lectures three hours a week.

ARCC 4200 [0.5 credit] Structural Morphology

Interdisciplinary study of structural and developmental morphology focusing on dynamic generative design processes, integrative systems, spatial modulations and fundamental generative principles of spatial form and structure as it relates to architecture. (Workshop). Includes: Experiential Learning Activity Lectures, seminar, workshop or field work six hours a week.

ARCC 4207 [0.5 credit] Advanced Building Assessment

In-depth study of the conventions, methods, and tools used in the assessment of buildings and their sties including traditional field survey, photogrammetry, laser scanning technologies, and hybrid representations. Includes: Experiential Learning Activity

Precludes additional credit for ARCC 4900 (no longer

Prerequisite(s): enrolment in the BAS Conservation and Sustainability program and fourth-year standing. Laboratories, lectures, field trips, six hours a week.

ARCC 4500 [0.5 credit] Design Economics

Principles of building economics. Determinants and prediction of building costs. Uncertainty and investment economics. Creative cost control for buildings during schematic design, design development, construction document preparation and construction. Economic evaluation during all phases of design process; emphasis on sustainable strategies.

Precludes additional credit for ARCC 3500, ARCH 4772. Prerequisite(s): fourth-year standing in the B.A.S. program or permission of the School.

Three hours a week.

ARCC 4801 [0.5 credit] Architectural Technology

A specific aspect of architecture in the area of architectural technology. Topics vary from year to year. (Elective Course).

Prerequisite(s): permission of the School.

Architecture - Techniques (ARCN)

Architecture - Techniques (ARCN) Courses ARCN 1005 [0.5 credit]

Introduction to Drawing: Seeing Through the Hand

Fundamental concepts of line and line weight, light and shadow, perspective, contrast and composition. Exercises will include some mixed media and will introduce students to drawing as a way of translating ideas into images. Includes: Experiential Learning Activity

One hour lecture and two hours drawing/discussion.

ARCN 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

ARCN 4100 [0.5 credit] Historic Site Recording and Assessment

Methods of heritage building documentation including hand recording, photography, rectified photography, total station, gps, photogrammetry, and laser scanning. Non-destructive testing techniques; environmental assessment tools for determining air quality and energy efficiency. Multidisciplinary teams for all project work.

Includes: Experiential Learning Activity Also listed as ACSE 3207, CIVE 3207.

Precludes additional credit for ARCN 3100 (no longer offered), ARCH 3881.

Prerequisite(s): second-year standing in B.A.S. Conservation and Sustainability.

Lectures three hours a week, lab or field work two hours a week.

offered).

ARCN 4200 [0.5 credit]

Building Pathology and Rehabilitation

Deterioration mechanisms for concrete, timber, steel and masonry structures. Identification of design deficiencies; criteria for selection and design of rehabilitation systems. Design techniques to reduce deterioration in new construction and historical structures.

Includes: Experiential Learning Activity Also listed as ACSE 4601, CIVE 4601.

Prerequisite(s): ARCN 4100 and third-year standing in

B.A.S. Conservation and Sustainability.

Lectures three hours a week, lab/field work two hours a week.

Architecture - Theory/History (ARCH)

Architecture - Theory/History (ARCH) Courses ARCH 1000 [0.5 credit]

Introduction to Architecture

Architecture in the matrix of human conditions: linkages among architecture, fine arts, humanities, social sciences, physical sciences, mathematics and philosophy. Architectural ideas will be introduced through a discussion of cities, buildings and landscapes. (Core Course). Precludes additional credit for ARCH 1331. Lectures three hours a week.

ARCH 1111 [1.0 credit] Studio 1A: Land

Studio course involving land-based workshops and fieldwork to introduce orientation, siting, topography, land work, material tectonic and building foundations. Students learn drawing conventions, architectural drafting, and physical modeling, applying basic spatial norm and sequencing through the design of a small-scale building in a non-urban context.

Includes: Experiential Learning Activity
Precludes additional credit for ARCS 1005.
Prerequisite(s): Registration in the Bachelor of
Architectural Studies (BAS) program.
Studio 10 hours a week.

ARCH 1112 [1.0 credit]

Studio 1B: Fundamentals of Design

Studio course considering siting, orientation, and building design. With hybrid drawings and models, students move from spatial abstraction to inhabitation. Designing a small domestic program on an urban site, they learn basic programmatic organization, accessibility, spatial hierarchy, material selection, structural systems, and envelope design.

Includes: Experiential Learning Activity
Precludes additional credit for ARCS 1105.
Prerequisite(s): Minimum grade of C- or above in

ARCH 1111.

Studio 10 hours a week.

ARCH 1221 [0.5 credit]

Material Histories of Architecture

Historical survey of architecture and conservation through material practices, transformation, and innovation around the world. Study of thousand-year old methods, monuments, and heritage sites, following materials including clay, metals, wood, or concrete, and studying their relations to landscapes, built forms, cultures, and climate.

Precludes additional credit for ARCC 1202 (no longer offered), ARCC 3502 (no longer offered).

Prerequisite(s): Registration in the Bachelor of Architectural Studies (BAS) program.

Three hour lecture

ARCH 1222 [0.5 credit]

Design, Climate, Environment

Environmental histories following the migration of peoples, practices, and resources across territories and times to introduce buildings' climate impacts and environmental design. Consideration of construction principles, energy management, material selection, building siting, and environmental control design along larger consideration of climate and environmental justice. Precludes additional credit for ENVE 1001, ARCC 2100. Prerequisite(s): Registration in the Bachelor of Architectural Studies (BAS) program. Three hour lecture

ARCH 1331 [0.5 credit]

Introduction to Architecture

Introduction of architecture from the perspective of land and climate, examining social, cultural, and environmental relationships between peoples, places, and practices. Consideration of Indigenous land rights, topographical conditions and land formation, stratigraphy and soil composition, landmarks and foundations, placement and displacement, lived-experience and land-based practices. Precludes additional credit for ARCH 1000.

Three hour lecture

ARCH 1441 [0.5 credit] Drawing and Media

Introduction to various representational media, including orthographic drawings and alternative multimedia techniques. Historical, theoretical, and practical explorations of visual communication, moving between analogue, digital, and graphic image making processes to document, develop, and communicate sites or design projects. Includes assignments conducted in parallel with studio.

Includes: Experiential Learning Activity
Precludes additional credit for ARCN 2106 (no longer offered).

Prerequisite(s): Registration in the Bachelor of Architectural Studies (BAS) program.

Three hour lecture + three hour lab

ARCH 1442 [0.5 credit]

Digital Drawing and Modelling

Introduction to the logics of computer software for digital drawing, modeling, and visual coding. Extensive practical work using appropriate applications. Includes assignments conducted in parallel with studio, typically incorporating case study analyses.

Includes: Experiential Learning Activity

Precludes additional credit for ARCN 2105 (no longer

offered).

Prerequisite(s): Registration in the Bachelor of

Architectural Studies (BAS) program. Three hour lecture + three hour lab

ARCH 2006 [0.5 credit] Theory and History of Design

The theoretical and historical background of industrial design and design; disciplinary foundations and interdisciplinary connections; methodological aspects and economic and social contexts; contemporary scenarios in design: technological innovation and manufacturing processes. (Elective course).

Also listed as IDES 1000.

Lectures three hours a week.

ARCH 2101 [0.5 credit] **Industrial Design Analysis**

Principles of comparative product design analysis covering marketing and sales, manufacturing techniques and materials, ambiance and qualities of the object/context relationship, and design analysis from the perspective of the designer, the end-user and the environment. (Elective course).

Includes: Experiential Learning Activity

Also listed as IDES 1001.

Prerequisite(s): ARCH 2006 or IDES 1000.

Lectures three hours a week.

ARCH 2111 [1.0 credit]

Studio 2A: Fundamentals of Urbanism

Urbanism studio introducing, documenting, and analyzing forces producing urban environments. Students design a medium-scale public infrastructure project in a local urban context, foregrounding site analysis and urban design skills. Consideration given to accessibility, public realm, and to broad impact of infrastructural, environmental, and ecological systems.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 2105, ARCS 2303. Prerequisite(s): A minimum grade of C- or above in

ARCH 1111 and ARCH 1112. Studio 10 hours a week.

ARCH 2172 [1.0 credit] Studio 2B: Local (Design)

Design studio working with community with appropriate ethics training on a small to medium building project. Students use analog and digital methods to advance consideration of site, program, and materials as the means for shaping the built environment, understanding the settings, and their communities.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 2302, ARCS 2106, ARCS 2304.

Prerequisite(s): Minimum grade of C- or above in ARCH 2111 and Registration in the Bachelor of Architectural Studies (BAS) Design stream. Studio 10 hours a week.

ARCH 2182 [1.0 credit] Studio 2B: Local (C&S)

Conservation & Sustainability studio working with community with appropriate ethics training on a small to medium building projects. Students test and study conservation methodologies through design exercises and historical research on existing architectures, cities, and landscapes, with emphasis on understanding the settings and it's communities.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 2302. ARCS 2106.

ARCS 2304.

Prerequisite(s): Minimum grade of C- or above in ARCH 2111 and Registration in the Bachelor of Architectural Studies (BAS) Conservation and Sustainability stream.

Studio 10 hours a week

ARCH 2192 [1.0 credit] Studio 2B: Local (Urbanism)

Urbanism studio working with community with appropriate ethics training. Students design small scale projects exploring ramifications of practices, policies, and cultural preferences on urban cores. Consideration of intensification, revitalization, gentrification, brownfield redevelopment, development standards, form-based codes, and the larger impact of migration on urban density.

Includes: Experiential Learning Activity Precludes additional credit for ARCS 2302, ARCS 2106, ARCS 2304.

Prerequisite(s): Minimum grade of C- or above in ARCH 2111 and Registration in the Bachelor of Architectural Studies (BAS) Urbanism stream.

Studio 10 hours a week

ARCH 2221 [0.5 credit] Ecological & Regulatory Systems

Lecture-based course considering buildings' ecological and climate change impacts. Course covers how regulations, material choices, siting, and assembly methods of small-scale buildings impact energy consumption, carbon footprints, and GHG emissions. Regulatory content includes applicable codes, regulations, best practices, universal design standards and life-safety systems principles.

Includes: Experiential Learning Activity
Precludes additional credit for ARCC 2202, ARCC 5096.
Prerequisite(s): ARCH 1221 and ARCH 1222.
Also offered at the graduate level, with different requirements, as ARCH 5221., for which additional credit is precluded.

Three hour lecture + three hour lab

ARCH 2222 [0.5 credit]

Structures

Fundamental structural principles and their building design applications. Concepts of equilibrium and mechanics of materials, including stress and strain. Structural calculations and qualitative understanding of static and dynamic loads, including gravitational and lateral forces. Includes consideration of wood, masonry, concrete, and steel structural systems.

Precludes additional credit for CIVE 2005, ARCC 5097. Prerequisite(s): ARCH 2221.

Also offered at the graduate level, with different requirements, as ARCH 5222., for which additional credit is precluded.

Three hour lecture

ARCH 2300 [0.5 credit] Introduction to Modern Architecture

Architectural and urban ideals of modernism with emphasis upon the development of the avant-garde in the early twentieth century. The phenomenon of modern architecture within the broader framework of the development of western thought. (Core Course). Precludes additional credit for ARCH 2331, ARCH 3009. Prerequisite(s): B.A.S. students require ARTH 1100 or ARTH 1200 and ARTH 1101 or ARTH 1201. Lectures three hours a week.

ARCH 2331 [0.5 credit] Modernism and Global Urbanism

Thematic survey of cities, modernist ideas, projects, and movements, considering their theoretical, historical, and practical expressions in urban morphology and housing typologies, and their relation to larger societal and environmental questions, locally and globally. Acquisition of critical reading, writing, and representation skills through case-study analysis.

Precludes additional credit for ARCH 2300, ARCU 3100. Prerequisite(s): ARTH 1201.

Also offered at the graduate level, with different requirements, as ARCH 5331., for which additional credit is precluded.

Three hour lecture

ARCH 2332 [0.5 credit] Architectures in Canada

Architectures in Canada, including Indigenous settlements, practices, and relationships to the land to this day. Survey of selected buildings to consider relational, symbolic, stylistic, and technological developments. Critical analysis or styles, methods, materials, and building typologies from social, cultural, economic, and constructional perspectives.

Precludes additional credit for ARCH 4002. Prerequisite(s): ARCH 2331.

Three hour lecture

ARCH 3111 [1.0 credit] Studio 3A: Adaptive Reuse

Adaptive architecture studio critically considering buildings' adaptability in diverse communities' contexts and in relation to environmental responsibilities. Standards, principles, basic regulatory systems, and codes of conservation introduced through case-studies and the designing a medium-scale project, with focus on program analysis, detailing and material assembly. Includes: Experiential Learning Activity Precludes additional credit for ARCS 3105, ARCS 3301, ARCS 3304.

Prerequisite(s): Minimum grade of C- or above in ARCH 2111.

Studio 10 hours a week.

ARCH 3172 [1.0 credit] Studio 3B: Global (Design)

The global partnership Design studio (DSA) considers the role of design in communities, stressing site and program with respect to their historic, social, and ecological implications in a mid-scale cultural building. Synthesis and expansion of issues, methods, and techniques of the design curriculum.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 3302, ARCS 3107,

ARCS 3306.

Prerequisite(s): Minimum of a C- or above in ARCH 3111.

Studio 10 hours a week.

ARCH 3182 [1.0 credit] Studio 3B: Global (C&S)

The global partnership Conservation & Sustainability studio (DSA) considers the role of design in communities, stressing site and program with respect to their historic, social, and ecological implications in a mid-scale cultural building. Synthesis of issues, methods, and techniques of the conservation and sustainability curriculum.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 3302, ARCS 3107,

ARCS 3306.

Prerequisite(s): Minimum grade of C- or higher in ARCH 3111 and Registration in the Conservation and Sustainability stream of the Bachelor of Architectural Studies.

Studio 10 hours a week.

ARCH 3192 [1.0 credit] Studio 3B: Global (Urbanism)

The global partnership Urbanism studio (DSA) considers the role various forms of urbanization and de-urbanization in relation to economic, political, and cultural forces. Students design a mid-scale public building, synthesizing issues, methods, and techniques of the urbanism curriculum, learning about urbanization as a global phenomenon.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 3302, ARCS 3107,

ARCS 3306.

Prerequisite(s): Minimum grade of C- or above in

ARCH 3111.

Studio 10 hours a week

ARCH 3221 [0.5 credit]

Assemblies

Wood, steel, concrete, and alternate construction materials, and systems. Building envelope principles and practices explored in conjunction with mechanical and electrical systems in buildings. Emphasis on precedents, traditions, and methodology of architectural detailing for construction and adaptation. Introduction of environmental impact assessment and life-cycle analysis.

Precludes additional credit for ARCC 2203, ARCH 5223.

Prerequisite(s): ARCH 2222.

Three hour lecture

ARCH 3331 [0.5 credit]

Architectural Conservation Philosophy and Ethics

Analysis of philosophical theories and related approaches to the material transformation of buildings. Micro-histories in architectural conservation theory and practice; overview of historical and contemporary concepts in architectural conservation. Preservation, restoration, rehabilitation, reconstruction, adaptive re-use, conservation anamnesis, diagnosis.

Precludes additional credit for ARCH 4200.

Prerequisite(s): Third year standing in the Bachelor of Architectural Studies or the Bachelor of Engineering in Architectural Conservation and Sustainability Engineering. Three hour lecture

ARCH 3441 [0.5 credit]

Digital Computation and Simulation

Intermediate computer drawing and modeling with a focus on visualization, simulation, computation, and coding. Assignments conducted in parallel with studio, includes an introduction to Building Information Modeling and building documentation strategies and technologies.

Includes: Experiential Learning Activity

Prerequisite(s): ARCH 1442.

Three hour lecture + three hour lab

ARCH 3601 [0.5 credit] Architectural Discourse I

Examines ideas relevant to contemporary architectural discourses and practices focused on the development of critical thinking and communication skills situated in emerging inquiries within a longer lineage of existing architectural theory. (Core Course).

Precludes additional credit for ARCH 4771.

Prerequisite(s): Third-year standing or permission of the School.

Lecture 3 hours per week

ARCH 3881 [0.5 credit]

Historic Site Recording and Assessment

Methods of heritage building documentation including hand recording, photography, rectified photography, total station, gps, photogrammetry, and laser scanning. Non-destructive testing techniques; environmental assessment tools for determining air quality and energy efficiency. Multidisciplinary teams for all project work.

Includes: Experiential Learning Activity Also listed as ACSE 3207, CIVE 3207. Precludes additional credit for ARCN 4100.

Prerequisite(s): Second-year standing in B.A.S.

Conservation and Sustainability stream.

Lectures three hours a week, lab or field work two hours a week

ARCH 4002 [0.5 credit] Canadian Architecture

Canadian architecture from the seventeenth century to the present. Building styles, methods, construction techniques, and materials in the context of social and economic conditions of both indigenous and settlement approaches to the built environment.

Includes: Experiential Learning Activity

Also listed as ARTH 3002.

Precludes additional credit for ARCH 2332, ARCH 3002. Prerequisite(s): ARCH 2300 or permission of the School. Lectures, seminars three hours a week.

ARCH 4105 [0.5 credit] Theories of Landscape Design

Introduction to landscape architecture as the organization of outdoor space. Historical, cultural, economic and political factors as a basis for interpreting spatial organization in urban and rural areas of human settlement. Emphasis on the period from the fifteenth to the nineteenth century. (Theory/History Elective).

Precludes additional credit for ARCH 4773.

Prerequisite(s): second-year standing or above. Lectures three hours a week.

ARCH 4111 [1.0 credit] Studio 4A: Integrated

Integrated studio working in parallel with technology course to support students as they design a sustainable mixed-use housing project. Consideration of site planning, programming, regulatory systems, materials, and structures in a comprehensive building design incorporating environmental and structural systems as well as detailed envelope design.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 4105, ARCS 4301 (no longer offered).

ilo loriger offered).

Prerequisite(s): Minimum of a C- or above in ARCH 3111.

Studio 10 hours a week

ARCH 4172 [1.0 credit] Studio 4B: Option (Design)

Options of Design topics for speculative exploration in preparation for graduate studies. Projects can range in scale, and locations. Topics can variously expand upon acquired technical, historical, theoretical, or technology skills through focused research-led investigations into key spatial, material, social, or environmental issues.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 4107, ARCS 4302

(no longer offered).

Prerequisite(s): Minimum of a C- or above in ARCH 4111.

Studio 10 hours a week

ARCH 4182 [1.0 credit] Studio 4B: Option (C&S)

Options of Conservation and Sustainability topics for speculative exploration in preparation for graduate studies. Projects can range in scale, and locations. Topics can variously expand upon acquired technical, historical, theoretical, or technology skills through focused researchled investigations into key spatial, material, social, or environmental issues.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 4107, ARCS 4302

(no longer offered).

Prerequisite(s): Minimum of a C- or above in ARCH 4111.

Studio 10 hours a week

ARCH 4192 [1.0 credit] Studio 4B: Option (Urbanism)

Options of Urbanism topics for speculative exploration in preparation for graduate studies. Projects can range in scale, and locations. Topics can variously expand upon acquired technical, historical, theoretical, or technology skills through focused research-led investigations into key spatial, material, social, or environmental issues.

Includes: Experiential Learning Activity

Precludes additional credit for ARCS 4107, ARCS 4302 (no longer offered).

Prerequisite(s): Minimum of a C- or above in ARCH 4111. Studio 10 hours a week

ARCH 4200 [0.5 credit]

Architectural Conservation Philosophy and Ethics

Analysis of philosophical theories and related approaches to the material transformation of buildings. Micro-histories in architectural conservation theory and practice; overview of historical and contemporary concepts in architectural conservation. Preservation, restoration, rehabilitation, reconstruction, adaptive re-use, conservation anamnesis, diagnosis.

Precludes additional credit for ARCH 3100 (no longer offered), ARCH 3331.

Prerequisite(s): Third-year standing in B.A.S.; OR third-year status in B.Eng. (Architectural Conservation and Sustainability).

Lectures three hours a week.

ARCH 4201 [0.5 credit] History of Modern Housing

Study of housing as a function of social organization, demographics, market demand and public policy. Topics include the evolution of housing form, the role of the state, and the participation of architects in the housing marketplace in the 19th and 20th century. (Theory/History Elective).

Precludes additional credit for ARCH 4991.

Prerequisite(s): third-year standing in the B.A.S. program or permission of the School.

Lectures three hours a week.

ARCH 4206 [0.5 credit]

Recycling Architecture in Canada and Abroad

Concepts of mediating old and new architecture at the scale of the city through to the detail of the construction joint. Issues in sustainability and cultural identity illuminated by recycled architecture and adaptive reuse are explored through readings, drawings and case studies. (Theory/History Elective).

Prerequisite(s): third-year standing in the B.A.S. program or by permission of the instructor or fourth-year standing in the B.Eng. Architectural Conservation and Sustainability program.

Lectures three hours a week.

ARCH 4221 [0.5 credit] Environmental Systems

Lecture-based technology course reinforcing building science principles of environmental mediation through building envelope, structural systems, passive and active systems, material selection, MEP, daylight, and acoustic. Consideration of fire protection, life-safety, climate adaptation and mitigation through life-cycle analysis, energy, and performance assessment in integrated studio project.

Precludes additional credit for ARCC 3202.

Prerequisite(s): ARCH 3221.

Three hour lecture

ARCH 4301 [0.5 credit] Post-War Architecture

Theoretical, ideological and artistic debates that have influenced the development of world architecture since 1950. (Theory/History Elective).

Also listed as ARTH 4604.

Prerequisite(s): ARCH 2300 or ARTH 3609 or permission of the instructor.

Lecture or seminar three hours per week.

ARCH 4332 [0.5 credit]

Contemporary Theories in Architecture

Survey of cultural theories from the beginning of colonialism to this day. Considerations of how technological, socio-political, material, and ecological transformations inform architectural discourse. Students acquire research skills, considering topics such as race, gender, disability, environmental justice, Indigenous worldviews, climate, decolonization, or artificial intelligence.

Precludes additional credit for ARCH 5020, ARCH 4601. Prerequisite(s): Fourth year standing in the Bachelor of Architectural Studies program.

Also offered at the graduate level, with different requirements, as ARCH 5332., for which additional credit is precluded.

Three hour lecture

ARCH 4505 [0.5 credit] Seminar in Theory and History

History and theory of architecture. Topics will vary from year to year. Limited enrolment. (Elective Course). Prerequisite(s): fourth-year standing in the B.A.S. or B.A. (Honours) Architecture/Art History programs, or permission of the School.

Lectures three hours a week.

ARCH 4601 [0.5 credit] Architectural Discourse II

Examines ideas and methods relevant to contemporary architectural discourse with a focus on cultural diversity and global perspectives. Architectural Discourse II builds on learned skills from previous work and acts as a preparatory course for research skills necessary at the graduate level. (Core Course).

Precludes additional credit for ARCH 4332.

Prerequisite(s): ARCH 3601 and fourth-year standing or permission of the School.

ARCH 4771 [0.5 credit]

Architectural Discourse and Methods

Survey of ideas and methods relevant to contemporary architectural discourse and practices, selected to represent a broad range of approaches and perspectives. Development of critical thinking and communication skills, and introduction to design research methods along with those across humanities, sciences, and social sciences. Precludes additional credit for ARCH 3601.

Prerequisite(s): Third year standing in the Bachelor of Architectural Studies (BAS) program.

Three hour lecture

ARCH 4772 [0.5 credit] The Cost of Building

The course explores the social, environmental, and economic costs of building. Topics range from proforma exercises for individual buildings to explorations of supply chains, environmental impact of various construction materials and methods, and the social impact of development and displacement on vulnerable sites and communities.

Precludes additional credit for ARCC 4500.

Prerequisite(s): Fourth year standing in the Bachelor of Architectural Studies (BAS) program.

Three hour lecture

ARCH 4773 [0.5 credit] Designed Landscapes

Introduction to the complex nature of designed landscapes, their material, socio-political, and historical relationships, their tensions, implications, plural geographies, and cultures. Topics include cross-disciplinarity and links with other design fields, issues of climate and adaptation, urbanism and infrastructure, representation and visuality, time and place. Precludes additional credit for ARCH 4105. Prerequisite(s): Third year standing or above.

Three hour lecture

ARCH 4777 [0.5 credit] Land Ethics and Identities

Exploration of land ethics and identities in relation to social, culture, political, and economic forces, through an investigation of the built and unbuilt environments. Topics include the setting of human activities, indigenous and non-indigenous relations, indigenous knowledges, geopolitics, sovereignty, settler-colonialism, and shifting identity politics.

Three hour lecture

ARCH 4801 [0.5 credit] Special Topics

An aspect of architecture in the area of theory and history. Topics vary from year to year. (Theory/History Elective). Prerequisite(s): ARCH 2300 or permission of the School. Lectures three hours a week.

ARCH 4808 [0.5 credit] Independent Study

(Elective Course).

ARCH 4881 [0.5 credit]

Advanced Building Assessment

In-depth study of the conventions, methods, and tools used in the assessment of buildings and their sites including traditional field survey, photogrammetry, laser scanning technologies, and hybrid representations. Includes: Experiential Learning Activity
Also offered at the graduate level, with different requirements, as ARCH 5404., for which additional credit is precluded.

Three hour lecture

ARCH 4882 [0.5 credit] Topics in Conservation

Advanced seminar in conservation and sustainability. Topics may include histories and theories related to adaptive architecture, heritage considerations, and critical approaches to conservation of buildings, cities, and landscapes.

Three hour lecture

ARCH 4883 [0.5 credit] Evaluation of Existing Properties

The cultural, political, economic, and legal factors that shape our definition of and approaches to existing architecture. Processes for and implications of heritage designation, cultural value, and costs associated with restoration and ongoing preservation of heritage and other existing properties.

Includes: Experiential Learning Activity
Prerequisite(s): Fourth year standing in the Bachelor of
Architectural Studies (BAS) Conservation & Sustainability
stream.

Also offered at the graduate level, with different requirements, as ARCH 5402., for which additional credit is precluded.

Three hour lecture

ARCH 4885 [0.5 credit]

Building Pathology and Rehabilitation

Deterioration mechanisms for concrete, timber, steel and masonry structures. Identification of design deficiencies; criteria for selection and design of rehabilitation systems. Design techniques to reduce deterioration in new construction and historical structures.

Includes: Experiential Learning Activity

Also listed as ACSE 4601, CIVE 4601.

Prerequisite(s): ARCH 3881.

Lectures three hours a week, lab/field work two hours a week.

ARCH 4991 [0.5 credit] **History of Modern Housing**

Study of housing as a function of social organization, demographics, market demand and public policy. Topics include the evolution of housing form, the role of the state, and the participation of architects in the housing marketplace in the 19th and 20th century.

Precludes additional credit for ARCH 4201.

Prerequisite(s): Third year standing in the Bachelor of Architectural Studies (BAS) program.

Three hour lecture

ARCH 4992 [0.5 credit] Theories of Urbanism

Contemporary urban theory and critical scholarship that engages evolving social, political, economic and environmental perspectives, addresses multiple scales, geographic contexts, and disciplinary boundaries, and investigates the expanding array of models, tools and techniques that have contributed to various theories of

Precludes additional credit for ARCU 4300.

Prerequisite(s): Third year standing in the Bachelor of Architectural Studies (BAS) program.

Three hour lecture

ARCH 4993 [0.5 credit]

Topics in Urbanism

Advanced seminar in selected topics related to urbanism. Topics may include histories and theories related to urban systems, design, and planning.

Precludes additional credit for ARCU 4801.

Prerequisite(s): Third year standing in the Bachelor of Architectural Studies (BAS) Urbanism stream.

Three hour seminar

Architecture - Urban (ARCU)

Architecture - Urban (ARCU) Courses

ARCU 3100 [0.5 credit]

The Morphology of the City

Primary structural, spatial and formal organization and elements that characterize the morphology of cities; historical and contemporary significance for architecture and urban design. (Core).

Precludes additional credit for ARCH 2331.

Prerequisite(s): First-year standing in the B.A.S. Urbanism major, second or third-year standing in other B.A.S. majors, or permission of the School.

Lecture two hours a week and tutorial one hour a week.

ARCU 4103 [0.5 credit]

Cities

Course addresses cities such as Istanbul, Mexico City, Venice, Paris, Ottawa, Mumbai, and New Orleans. Topics presented by the instructor and guests include environmental resilience and climate change; social justice and informal settlement; smart cities and data privacy; and urban design, memory, and imagination.

Precludes additional credit for ARCU 3902 (no longer offered).

Prerequisite(s): Second-year standing or permission of the Instructor.

Lecture two hours per week and tutorial one hour per week

ARCU 4300 [0.5 credit] Theories of Urbanism

Contemporary urban theory and critical scholarship that engages evolving social, political, economic and environmental perspectives, addresses multiple scales, geographic contexts, and disciplinary boundaries, and investigates the expanding array of models, tools and techniques that have contributed to various theories of urhanism

Precludes additional credit for ARCH 4992.

Prerequisite(s): ARCU 3100.

ARCU 4700 [0.5 credit] **Urban Utopias**

Urban utopias throughout history, with emphasis on the 20th century. Garden Cities, anti-urbanism and radical decentralization, the city in the region, Italian Rationalist cities, Le Corbusier and CIAM, post-WWII New Towns (England, Scandinavia and the US), Sustainable Urbanism.

Prerequisite(s): third or fourth-year standing in B.A.S. Urbanism program or permission of the School. Lectures three hours a week.

ARCU 4801 [0.5 credit]

Topics in Urbanism

Advanced seminar in selected topics related to urbanism. Topics may include histories and theories related to urban systems, design, and planning. (Core course).

Precludes additional credit for ARCH 4993.

Prerequisite(s): third-year standing in B.A.S. (Urbanism) or permission of the Instructor.

Seminar three hours per week.

Art and Architectural History (ARTH)

Art and Architectural History (ARTH) Courses ARTH 1100 [0.5 credit]

Art and Society: Prehistory to 1300

A survey of art, architecture and artifacts from prehistory to 1300. Ways of understanding visual culture through this span of history.

Precludes additional credit for ARTH 1000.

Lectures two hours a week, tutorial one hour a week.

ARTH 1101 [0.5 credit]

Art and Society: 1300 to the Present

A survey of art, architecture and related visual forms in their expanding contexts from 1300 to the present. Ways of understanding visual culture through this span of history.

Precludes additional credit for ARTH 1000.

Lectures two hours a week, tutorial one hour a week.

ARTH 1105 [0.5 credit] Art as Visual Communication

A variety of visual material is organized topically to examine the elements of art (line, shape, value, colour, texture, space), the principles of pictorial organization, the materials and techniques of art, and recurrent tendencies in artistic styles and outlooks.

Lectures or seminars three hours a week.

ARTH 1200 [0.5 credit]

History and Theory of Architecture: Prehistory to 1500

An introduction to the history of architecture from prehistory to ca. 1500, considering technological, formal, intellectual and social developments that informed the built environment through a range of building types.

Lectures two hours a week, tutorial one hour a week.

ARTH 1201 [0.5 credit]

History and Theory of Architecture: 1500 to Present

An introduction to the history of architecture from ca. 1500 to the present, considering technological, formal, intellectual, and social developments that informed the built environment through a range of building types. Precludes additional credit for ARTH 2608 (no longer offered).

Lectures two hours a week, tutorial one hour a week.

ARTH 2002 [0.5 credit] Art in Canada

Topics may include professional and amateur artists, craftwork, art institutions, gender, nationalism, regionalism, ethnicity, race, and identity. Coverage will include artworks in local and national collections in the National Capital region.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2004 [0.5 credit]

Special Topic: Indigenous Art

Survey of an area of indigenous art history. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2007 [0.5 credit] Asian Art

Surveys Asian art from second-century China to postwar Japan. Representational strategies of court artists and artists from the capital are compared with artists on the periphery. Articulation of power in tombs, palaces and war propaganda is examined, as is the individual and the eccentric.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2009 [0.5 credit]

Art Live: Art History Workshop

Examination of techniques, materials and institutions of art history; lectures and workshops on art historical research and writing, the materials of art, professional skills; site visits to art institutions.

Includes: Experiential Learning Activity
Prerequisite(s): ARTH 1100 and ARTH 1101, or
permission of the discipline. Restricted to students
enrolled in the Art History B.A. or B.A. Honours.
Lectures or seminars three hours a week.

ARTH 2102 [0.5 credit] Greek Art and Archaeology

The art, architecture and archaeology of ancient Greece. Vase painting, sculpture, architecture, town planning and analogous arts are studied.

Also listed as CLCV 2303.

Precludes additional credit for CLCV 2302 (no longer offered), ARTH 2100 (no longer offered).

Prerequisite(s): second-year standing or permission of the Department.

ARTH 2105 [0.5 credit]

Roman Art and Archaeology

The art, architecture and archaeology of the ancient Romans. Vase painting, sculpture, architecture, town planning and analogous arts are studied.

Also listed as CLCV 2304.

Precludes additional credit for CLCV 2302 (no longer offered), ARTH 2100 (no longer offered).

Prerequisite(s): second-year standing or permission of the Department.

Lecture three hours a week.

ARTH 2106 [0.5 credit] Chinese Art and Visual Culture

A survey of Chinese art from the pre-modern era to reinventions of traditions in modern and contemporary art. Artworks in various media (ink painting, calligraphy, Buddhist sculpture, ceramics, lacquer and garden architecture) will be studied in their historical, cultural and socio-political contexts.

Prerequisite(s): second-year standing or permission of the Department.

Lecture or seminars three hours a week.

ARTH 2107 [0.5 credit] Islamic Architecture and Art

Survey of artistic movements in Islamic art and architecture in the Mediterranean, the Near East, and Central and South Asia, from the seventh century to ca. 1450. Commonalities and differences between major dynastic visual cultures will be explored.

Prerequisite(s): second-year standing or permission of the Discipline.

Lecture or seminars three hours a week.

ARTH 2108 [0.5 credit] Special Topics: Art Worlds

Survey of an area of global art history. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): second-year standing or permission of the Department.

Lectures or seminars three hours a week.

ARTH 2202 [0.5 credit] Medieval Architecture and Art

A survey of architecture and art in Europe from ca. 313-1500 C.E. Sacred, secular, and domestic works will be discussed with reference to cultural meaning, social function, structure, and form.

Precludes additional credit for ARTH 2200 and ARTH 2201.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2300 [0.5 credit]

Renaissance Art

An examination of major works of art and architecture, issues and themes in the Renaissance; emphasis on the fifteenth and sixteenth centuries, with a look at roots in the fourteenth.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2310 [0.5 credit]

Architecture of the Early Modern World [1400-1750]

An examination of architecture from the late medieval period to the 18th century with particular attention paid to architecture and design cultures within the European and Islamic worlds and their cross-cultural interactions. Precludes additional credit for ARTH 3305 (no longer offered).

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2404 [0.5 credit]

Art of the 17th and 18th Centuries

Tracing developments in 17th- and 18th-century painting, graphic art, sculpture, and architecture. Introduction to artists, art works, and issues central to the relationship between art and society.

Precludes additional credit for ARTH 2403 (no longer offered), ARTH 2405 (no longer offered) and ARTH 2406 (no longer offered).

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2502 [0.5 credit] Art of the 19th Century

Tracing developments in 19th-century painting, graphic art, sculpture, and architecture. Introduction to artists, art works, and issues central to the relationship between art and modernity.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2503 [0.5 credit]

Art in the Global Context Since 1945

Art in the global context from 1945 to present, including abstraction, Pop Art, Postmodernism, object art, performance art and installations.

Precludes additional credit for ARTH 3600 (no longer offered).

Prerequisite(s): second-year standing or higher, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2510 [0.5 credit]

Architecture of the 18th and 19th Centuries

A survey of key monuments, theories, forms and technological developments of eighteenth- and nineteenth-century architecture.

Precludes additional credit for ARTH 3809 Section "B" taken in 2014.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2600 [0.5 credit] European Art 1900-1945

Major artistic movements in Europe from about 1900 to 1945

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2601 [0.5 credit]

History and Theory of Photography

Issues, themes, movements in photography and individual photographers from the origins of the medium to the present.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2610 [0.5 credit]

Twentieth-Century Architecture

Developments in architectural form and culture through the course of the twentieth century, with emphasis on the formation and subsequent critique of the Modern Movement.

Precludes additional credit for ARTH 3609 and ARCH 3009

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2710 [0.5 credit]

Experiencing Architecture

Development of critical thinking, writing, and looking skills in connection to architecture, through a combination of site visits, workshops and classroom exercises.

Includes: Experiential Learning Activity

Prerequisite(s): ARTH 1200 and ARTH 1201 or

permission of the discipline. Restricted to students in the History and Theory of Architecture B.A. or B.A. Honours program.

Lectures or seminars three hours a week.

ARTH 2807 [0.5 credit] Philosophy of Art

Philosophical approaches to the study of art. Topics such as: the nature of art and artistic value; representation and symbolism in art; art and artifice; art and the emotions; art, culture and ideology; post-structuralism and art; theories of creativity; relationship between artworks and audiences. Also listed as PHIL 2807.

Lectures three hours a week.

ARTH 3000 [0.5 credit]

Themes in Recent and Contemporary Art in Canada

Recent and contemporary art in Canada in a variety of media, examined within its social, political, and cultural contexts. Current critical issues will be explored through works in local and national collections in the National Capital region.

Prerequisite(s): Second-year standing, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 3002 [0.5 credit] Canadian Architecture

Canadian architecture from the seventeenth century to the present day, covering both stylistic and technological developments. Building styles, methods, and materials in the context of social and economic conditions and construction techniques.

Includes: Experiential Learning Activity Also listed as ARCH 4002.

Prerequisite(s): ARTH 1100 and ARTH 1101, or ARTH 1200 and ARTH 1201, or ARCH 1002 and ARCH 1201, and second-year standing or higher, or permission of the Discipline.

ARTH 3003 [0.5 credit]

Architecture and Representation

Examination of the intersections between architecture, representations, and cultures.

Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing, or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3006 [0.5 credit]

Themes in Architecture in Canada

Thematically organized course exploring a wide chronological, geographical, and cultural range of sites and design practices in Canada. Topics may include architecture of governance, spaces of mobility, the effect of industry and economy on the designed environment, housing and shelter, tourism, and histories of design. Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.

Seminar and/or lectures three hours a week.

ARTH 3008 [0.5 credit]

Contemporary Chinese Art and Art History

Modern and contemporary art in China and beyond from the reform period in 1979 until today. Artworks will be examined in terms of their (art-)historical, discursive, socio-political, infrastructural and transcultural conditions of production and reception.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures three hours a week.

ARTH 3102 [0.5 credit] Studies in Greek Art

A study of period or theme in the art and archaeology of Ancient Greece. Topics may vary from year to year. This course is repeatable for credit when the topic changes. Also listed as CLCV 3306, RELI 3732.

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat.

Lecture three hours a week.

ARTH 3105 [0.5 credit] Studies in Roman Art

A study of a period or theme in the art and archaeology of the ancient Romans. Topics may vary from year to year. Also listed as CLCV 3307, RELI 3733.

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat. Lecture three hours a week.

ARTH 3107 [0.5 credit]

History and Methods of Architectural History

The study of the methodologies and research approaches employed by architectural historians.

Prerequisite(s): Third-year standing or higher in History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 3108 [0.5 credit] History and Methods of Art History

The study of current methodologies and research tools employed by art historians.

Precludes additional credit for ARTH 3106 (no longer offered).

Prerequisite(s): Third-year standing or higher in Art History, or permission of the Discipline.

Seminar three hours a week.

ARTH 3400 [0.5 credit] History of Printmaking

Exploration of printmaking techniques from the 16th century to the present focusing on the work of famous and lesser-known printmakers. Topics may include: printmaking genres (from fine art prints to caricature), originality versus reproduction, book illustration, the art market, posters and propaganda.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or higher, or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3501 [0.5 credit] Digital Media Production for Emerging Arts Professionals

Hands-on introduction to media productions tools, techniques and concepts for students planning careers in the arts sector or related fields. Topics may include website development, design and image editing, audio (podcasting) or video, digital photography, writing for the web and integration with other media.

Includes: Experiential Learning Activity

Prerequisite(s): Third-year standing or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3604 [0.5 credit]

Contemporary Art in the Global Context

Contemporary art in the global context. Prerequisite(s): second-year standing or higher, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 3701 [0.5 credit] Art and Architecture on Site

The study of art and/or architecture on site outside the National Capital Region, in Canada or internationally. May include a combination of study in Ottawa and on site. Locations vary. Students are expected to bear all travel and other costs arising from site visits. Includes: Experiential Learning Activity Prerequisite(s): permission of the Discipline. Applicants will normally have third-year standing with a minimum

will normally have third-year standing with a minimum of 1.0 credit in Art History or History and Theory of Architecture and a GPA of 8.0 or above.

Hours to be arranged. Locations will vary.

ARTH 3705 [0.5 credit] Selected Museum Exhibition

This seminar complements a major exhibition held at a specific museum. Students enrolled in this course are expected to bear all travel and other costs arising from required visits to the museum.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or higher or

permission of the Discipline.

Seminar and/or lectures three hours a week.

ARTH 3808 [0.5 credit]

Special Topics: Cities in Context

Architecture and designed environment of cities. Topics may include comparative studies of cities and the built world across time and geography, theories and histories of urban form and planning, and cultures of placemaking. Topics may vary from year to year.

Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.

Seminar and/or lectures three hours a week.

ARTH 3809 [0.5 credit]

Special Topics in Art and Visual Culture

Selected aspects of art history and visual culture from ancient times to the present. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): third-year standing or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3810 [0.5 credit]

Special Topics about the Designed Environment

Selected aspects of the history of the designed environment, from ancient times to the present. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3900 [0.5 credit]

Practicum in Art and Architectural History

Practical experience gained by working on specific projects under the supervision of the staff of a museum, cultural institution, public- or private-sector organization associated with art, architecture, design, or heritage. A maximum of 1.0 credit in practicum courses may be used to fulfill program requirements.

Includes: Experiential Learning Activity
Prerequisite(s): B.A. or B.A. (Honours) in Art History or
History and Theory of Architecture with third-year standing
or higher and a CGPA of 9.00 or better in ARTH courses,
and permission of the Discipline.

ARTH 4000 [0.5 credit]

Special Topics in Art in Canada

Special topics in art in Canada may vary from year to year, and will be posted on the School for Studies in Art and Culture website. Students will be exposed to works in local and national collections in the National Capital region.

Prerequisite(s): one of ARTH 2002, ARTH 2003, ARTH 3000 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 4002 [0.5 credit]

Special Topics in Architecture in Canada

Special topics about the designed environment in Canada. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the discipline.

Three hours of seminar per week, or the equivalent.

ARTH 4003 [0.5 credit] Special Topics in Contemporary Art

Critical examination of contemporary art. Topics may include socially engaged art, historiographies of contemporary art, re-inventions of traditions, gender and politics of the body, exhibition histories and infrastructures of contemporary art. Topics may vary from year to year. Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4005 [0.5 credit]

Special Topics in Contemporary Indigenous Art

This course will use critical theory to examine aspects of contemporary visual art created by the Inuit and First Peoples in North America. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2004 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4008 [0.5 credit] Special Topics in Global Art

Histories and theories of global art. Topics may include transnational theories of cultural analysis, Orientalism, Post-Colonial theory, translation theory and theories of cultural hybridity. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Precludes additional credit for ARTH 3103.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4107 [0.5 credit]

Special Topics in Islamic Architecture and Art

Topics in Islamic Architecture and Art may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2107 or ARTH 2310 and fourthyear standing in Art History or History and Theory of Architecture, or permission of the Discipline. Seminar three hours a week.

ARTH 4600 [0.5 credit]

Special Topics in Art, Architecture, and Gender

Art and/or architectural creation, reception and/or historiography through the lens of gender identities. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website. Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4602 [0.5 credit] Special Topics in the Theory and History of Photography

Relates the themes of selected theoretical texts on photography to specific examples of photographic practice. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2601 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4610 [0.5 credit]

Special Topics in Modern Architecture or Design

Topics in architecture and design of the Modern era may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2610 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4701 [0.5 credit] Art and Architecture on Site

Intensive study of art and/or architecture on site outside the National Capital region, in Canada or internationally. May include a combination of study in Ottawa and on site. Students are expected to bear all travel and other costs arising from site visits.

Includes: Experiential Learning Activity
Prerequisite(s): Permission of the Discipline. Applicants
will normally have fourth-year standing in Art History or
History and Theory of Architecture and a CGPA of 8.0 or
above.

Hours to be arranged. Locations vary.

ARTH 4705 [0.5 credit]

Seminar: Selected Museum Exhibition

Studies a major exhibition held at a specific museum. Students enrolled in this course are expected to bear all travel and other costs arising from required visits to the museum.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in Art
History or History and Theory of Architecture and
permission of the Discipline.

l ectures and/or seminar three hours a week.

ARTH 4800 [0.5 credit]

Special Topics in Architectural History

Topics in architectural history from ancient times to the present may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4806 [0.5 credit]

Special Topics in Historical Western Art

Special topics in Western art from the medieval period to the 20th century may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4809 [0.5 credit]

Topics in Art History and Criticism

Selected aspects of art history and/or criticism from ancient times to the present.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4900 [0.5 credit] Directed Readings and Research

Supervised readings and research projects. Guidelines must be obtained from the Undergraduate Supervisor prior to registration. A written project outline, approved by the supervising Art History or History and Theory of Architecture faculty member, must be submitted by the last day for course changes.

Prerequisite(s): fourth-year Honours standing in Art History or History and Theory of Architecture and permission of the Discipline.

ARTH 4909 [1.0 credit] Honours Research Project

A project resulting from independent research, supervised by Art History or History and Theory of Architecture faculty. The medium of presentation will be agreed upon between student and supervisor and may include a research paper, web-based project, or combination of dissemination activities.

Prerequisite(s): fourth-year Honours standing in Art History or History and Theory of Architecture with a minimum CGPA of 10.00 and permission of the Discipline.

Biochemistry (BIOC)

Biochemistry (BIOC) Courses

BIOC 1500 [0.5 credit]

Biochemistry in a Modern Society

Explore biochemistry's real-world applications, cuttingedge research, and transformative technologies. Learn through case studies and collaborative group work about how biochemistry revolutionizes industries, medicine, and environmental stewardship in this dynamic course.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolled in a Biochemistry program.

Workshop, three hours per week

BIOC 1900 [0.5 credit]

Demystifying Social Media Diets

The biochemistry and metabolic implications of popular diets and nutrition trends. May include Mediterranean, flexitarian, ketogenic, paleo, intermittent fasting, detox plans and more. Comparing claims to basic biochemical concepts in a social media age. Available only as a free elective for Science students.

Lecture three hours a week.

BIOC 2200 [0.5 credit] Cellular Biochemistry

Cellular functions and their interrelationships. Introduction to thermodynamics, membrane structure and function, transport mechanisms, basic metabolic pathways, energy production and utilization, communications between cells. It is strongly recommended that Biology Majors and Honours students take this course in their second year of study.

Includes: Experiential Learning Activity Also listed as BIOL 2200.

Precludes additional credit for BIOL 2201, CHEM 4401. Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), (CHEM 1006 or

CHEM 1002).

Lectures three hours a week, laboratory or tutorial four hours a week.

BIOC 2300 [0.5 credit] Physical Biochemistry

Energy of biological systems, molecular interactions, diffusion principles, introduction to protein folding, structure and thermodynamics, ligand binding and nucleic acid structures; experimental design and data management.

Precludes additional credit for CHEM 2103.

Prerequisite(s): BIOC 2200 (can be taken concurrently with BIOC 2300) and MATH 1007 and MATH 1107, and PHYS 1007 or PHYS 1003.

Lectures three hours a week, tutorials one and a half hours a week.

BIOC 2400 [0.5 credit]

Independent Research I

Students carry out a laboratory research project under the supervision of a faculty member from the Institute of Biochemistry. A research report must be submitted by the last day of classes for evaluation by the Director and Faculty supervisor.

Includes: Experiential Learning Activity

Prerequisite(s): restricted to Honours students of secondyear standing in a Biochemistry program with a GPA of 10.0 or higher in first year, and approval of the Director and a Faculty supervisor.

Laboratory research for at least three hours a week over two terms.

BIOC 2500 [0.5 credit]

Research Methods and Skills in Biochemistry

An introduction to research methods in biochemistry. Includes modern information literacy, study designs, descriptive and inferential statistics, and effective communication of research. Examples drawn from current issues in biochemistry.

Includes: Experiential Learning Activity

Prerequisite(s): 2nd year standing in a Biochemistry program.

Workshop, three hours per week.

BIOC 3101 [0.5 credit]

Unlocking Metabolism: Pathways, Enzymes, and Control

This course examines biological macromolecules as well as their chemistry, structure and function. Enzymatic reactions and their regulation, as well as carbohydrate, lipid and protein metabolism, is emphasized. Students apply knowledge of course concepts to relevant scientific problems (disease, development).

Precludes additional credit for CHEM 3401 (no longer offered), CHEM 4401.

Prerequisite(s): (BIOC 2200 or BIOL 2200), and (CHEM 2203 and CHEM 2204) or (CHEM 2207 and CHEM 2208).

Lectures three hours a week.

BIOC 3102 [0.5 credit]

Biochemical Signals and Structures: The Molecular Language of Cells

This course examines secondary metabolism, membrane composition/synthesis, cell communication, and flow of genetic information within a biological system. Emphasis is on understanding molecular structures, the reactions/ processes they facilitate, and their regulation. Students apply knowledge of course concepts to relevant scientific problems.

Prerequisite(s): BIOC 3101 and BIOL 2104. Lectures three hours a week.

BIOC 3103 [0.5 credit]

Experimental Biochemistry I: Principles and Practices

Introduction to experimental biochemistry and the theory and concepts dealt with in BIOC 3101, and BIOC 3202. Includes: Experiential Learning Activity Precludes additional credit for BIOC 3006 (no longer offered).

Prerequisite(s): BIOC 2200/BIOL 2200 and CHEM 2203. CHEM 2204 and (BIOC 2300 or CHEM 2103) are also recommended. It is highly recommended that BIOC 3101 and BIOC 3202 be taken concurrently.

Laboratory four hours a week, tutorial one hour per week.

BIOC 3104 [0.5 credit]

Experimental Biochemistry II: Research Experience

Introduction to experimental biochemistry and the theory and concepts dealt with in BIOC 3101, BIOC 3102, and BIOC 3202.

Includes: Experiential Learning Activity

Precludes additional credit for BIOC 3006 (no longer offered)

Prerequisite(s): BIOC 3103. It is highly recommended that BIOC 3102 be taken concurrently.

Laboratory four hours a week, tutorial one hour a week.

BIOC 3202 [0.5 credit]

Biophysical Techniques and Applications

Theory and applications of current biochemical/biophysical instrumentation and techniques including biophysical spectroscopy, molecular structure determination, calorimetry, and mass spectrometry. Precludes additional credit for BIOC 4002. Prerequisite(s): BIOC 2200 or permission of the Institute. Lectures three hours a week.

BIOC 3203 [0.5 credit] Biochemical Pharmacology

Biochemical principles of pharmacology, including receptor mechanisms, signal transduction,

pharmacokinetics, and pharmacodynamics. Genome-wide association studies, pharmacogenomics, and personalized medicine will also be included.

Prerequisite(s): BIOC 2200 or BIOL 2200 or BIOL 2201, or permission of the Institute.

BIOC 3400 [0.5 credit] Independent Research II

Students carry out a laboratory research project under the supervision of faculty member from the Institute of Biochemistry. A research report must be submitted by the last day of classes for evaluation by the Director and Faculty supervisor.

Includes: Experiential Learning Activity

Prerequisite(s): restricted to Honours students of thirdyear standing in a Biochemistry program with a GPA of 10.0 or higher in second year, and approval of the Director and Faculty supervisor.

Laboratory research for at least three hours a week over two terms.

BIOC 3999 [0.0 credit] **Co-operative Work Term**

Practical experience for students enrolled in the cooperative option. Students must receive a satisfactory evaluation from their work term employer; and present a written report describing their work term project. Graded Sat or Uns.

Includes: Experiential Learning Activity

Prerequisite(s): registration in the Biochemistry cooperative option and permission of the Institute.

BIOC 4001 [0.5 credit] Methods in Biochemistry

Principles and applications of modern biochemical methodology, including ultracentrifugation, electrophoresis, ELISA, EMSA, experimental planning, ligand binding kinetics, fluorescence spectroscopy, affinity purification, and in vitro translation.

Includes: Experiential Learning Activity

Prerequisite(s): BIOC 3103 and BIOC 3104 or permission

Lectures and discussion two hours, laboratory four hours a week.

BIOC 4004 [0.5 credit] **Industrial Biochemistry**

The application of biochemistry to the production of biological compounds useful in nutrition, medicine, and the food and chemical industries. General strategies for efficient production of these compounds by controlling the activities of living cells or enzymes.

Prerequisite(s): BIOC 3101 and BIOC 3102 (BIOC 3102 may be taken concurrently), or permission of the Institute. Lecture three hours a week.

BIOC 4005 [0.5 credit] **Biochemical Regulation**

Regulation at the transcriptional, translational and metabolic level; regulation of cell and subcellular organelle function and other timely topics may be included. Prerequisite(s): BIOC 3101 and BIOC 3102. Lectures three hours a week.

BIOC 4007 [0.5 credit] **Membrane Biochemistry**

Biochemical and biophysical aspects of biomembrane structure and function. Topics may include: membrane lipids and proteins, lipid polymorphism, model membranes, liposomes, membrane biogenesis, the membrane cytoskeleton, membrane trafficking, membrane fusion. exocytosis and signal transduction across membranes. Prerequisite(s): BIOC 2200 or BIOL 2201, and third-year standing.

Lectures two hours a week and workshop two hours a week.

BIOC 4009 [0.5 credit] **Biochemistry of Disease**

The biochemical basis of disease including genetic and metabolic disorders such as cancer, neurological degenerative conditions, diabetes, stroke and microbial infections.

Prerequisite(s): BIOC 2200 or BIOL 2201, and third-year standing.

Lectures three hours a week.

BIOC 4010 [0.5 credit] **Data Applications in Biochemistry**

A project-based workshop at the intersection of data and biochemistry. Students will develop skills for autonomous learning and proficiency in database selection, computational tool integration, data management, introductory programming, statistical analysis, data visualization, and effective communication of biochemically-relevant information.

Prerequisite(s): BIOC 3101 and BIOC 3102, or permission of the Institute.

Workshop three hours a week.

BIOC 4201 [0.5 credit]

Advanced Cell Culture and Tissue Engineering

Theory and application of current techniques and developments in cell culture as applied to research questions in the field of stem cells and tissue engineering. Includes: Experiential Learning Activity

Also listed as BIOL 4201.

Prerequisite(s): BIOL 3201 or permission of the Institute. Laboratory four hours per week, tutorial one hour a week.

BIOC 4203 [0.5 credit]

Secondary Metabolism and Natural Products Biochemistry

Structure, biochemical derivation and function of secondary metabolites such as toxins and antibiotics. Examples from plant, fungal and animal systems. Prerequisite(s): BIOC 2200 or BIOL 2201, and third-year standing.

Lectures three hours a week.

BIOC 4204 [0.5 credit] **Protein Biotechnology**

An advanced lecture, discussion and seminar course covering the theory, development and current techniques of protein and enzyme engineering. Topics to be discussed may also include applications in biotechnology. nanotechnology and new frontiers in basic and applied research.

Prerequisite(s): BIOC 3101 and BIOC 3202 (may be taken concurrently), or permission of the Institute.

Lectures two hours a week, workshop two hours a week.

BIOC 4207 [0.5 credit] **Bio-Organic Chemistry**

The course covers chemical and biosynthetic methods applied to the major classes of biomolecules and their derivatives, including: carbohydrates, amino acids, peptides, proteins, nucleic acids, lipids, terpenes, heterocycles and natural products. Content will focus on reactions and mechanisms that contribute to their biological activities.

Also listed as CHEM 4207.

Prerequisite(s): CHEM 3201 or permission of the Institute.

Also offered at the graduate level, with different requirements, as CHEM 5010., for which additional credit is precluded.

Lectures three hours a week.

BIOC 4708 [0.5 credit] **Principles of Toxicology**

Basic theorems of toxicology with examples of current research problems. Toxic risk is defined as the product of intensive hazard and extensive exposure. Each factor is assessed in scientific and social contexts and illustrated with many types of experimental material.

Prerequisite(s): BIOC 3101 and fourth-year standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as BIOL 6402, CHEM 5708, for which additional credit is precluded.

Lectures three hours a week.

BIOC 4901 [0.5 credit] **Directed Special Studies**

Independent or group study, open to third- and fourth-year students to explore a particular topic, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, or laboratory or field work. Prerequisite(s): permission of the Institute. Students normally may not offer more than 0.5 credit of Directed Special Studies in their program.

BIOC 4902 [0.5 credit] Special Topics in Biochemistry

Specific topics of current interest. Topics may vary from year to year.

Prerequisite(s): third or fourth-year standing in a Biochemistry program or permission of the Institute. Lecture, seminars, or workshops three hours per week.

BIOC 4907 [1.0 credit] **Honours Essay and Research Proposal**

An independent research study using library resources. The candidate will prepare a critical review of a topic and research proposal approved by a faculty adviser. Evaluation will be based on a written report and a poster presentation of the project.

Includes: Experiential Learning Activity Precludes additional credit for BIOC 4906 (no longer offered), BIOC 4908 [1.0].

Prerequisite(s): fourth-year standing in an Honours Biochemistry program and permission of the Institute.

BIOC 4908 [1.0 credit] Research Project

Students carry out a research project approved by the Director, under the supervision of a faculty member of the Institute, in either the Biology or Chemistry departments. Evaluation is based on a written thesis and poster presentation.

Includes: Experiential Learning Activity Precludes additional credit for BIOC 4906 and BIOC 4907.

Prerequisite(s): (BIOC 3103 and BIOC 3104) and (BIOC 3101 and BIOC 3102) or equivalent, and eligibility to continue in Honours Biochemistry or in Biochemistry and Biotechnology.

Biology (BIOL)

Biology (BIOL) Courses

BIOL 1010 [0.5 credit] Biotechnology and Society

A course for students interested in the science behind recent advances in biotechnology. The different ways in which biotechnology is being applied in agriculture, health care, and the environment will be examined.

Preclusion: credit will not be given if taken concurrently with or after BIOL 2200 or BIOC 2200 or BIOL 2201. Students in Biology and Biochemistry programs may only take this course as a free elective.

Lectures three hours a week.

BIOL 1103 [0.5 credit] Foundations of Biology I

A research-oriented course focusing on the scientific process of biological exploration at the cellular level. Topics include cell organization, metabolism, genetics, and reproduction.

Includes: Experiential Learning Activity
Precludes additional credit for BIOL 1003 (no longer offered).

Prerequisite(s): Ontario 4U/M in Biology (or equivalent), or Ontario 4U/M in Chemistry (or equivalent).

Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 1104 [0.5 credit] Foundations of Biology II

A research-oriented course focusing on the scientific process of biological exploration at the macroscale. Topics include evolution, diversity of life, and ecological relationships.

Includes: Experiential Learning Activity
Precludes additional credit for BIOL 1004 (no longer offered).

Prerequisite(s): Ontario 4U/M in Biology (or equivalent) or BIOL 1103.

Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 1105 [0.5 credit] Introduction to Biological Data

Formulation of biological research questions, development of hypotheses and predictions, design of experiments, collection and analysis of data, interpretation and presentation of results.

Lectures three hours a week.

BIOL 1902 [0.5 credit] Natural History

A course designed primarily for students in non-biology programs to investigate the natural history of plants and animals, and the communities in which they occur. Particular attention is paid to the Ottawa region, but appropriate examples from other locales are also included.

Lectures three hours a week.

BIOL 2001 [0.5 credit]

Animals: Form and Function

An introduction to the diverse structures of animals (both invertebrates and vertebrates) in relationship to their functions, discussed within an evolutionary framework. Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or

(BIOL 1103 and BIOL 1004) or

Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 2002 [0.5 credit] Plants: Form and Function

An introduction to the structure and development of higher plants (at cellular, morphological and organism levels) discussed in relation to their function.

Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or
(BIOL 1103 and BIOL 1104).

Lectures three hours a week, laboratory or tutorial three hours a week.

BIOL 2005 [0.5 credit] Human Biology

A course for non-specialists interested in how the human body works. Topics will include biological molecules, cells, genetics, and various organ systems. Examples will be used to connect concepts taught in the course with general knowledge of human health and disease.

Prerequisite(s): BIOL 1003 or BIOL 1103 and (CHEM 1001 and CHEM 1002). Students in Biology and Biochemistry programs may only take this course as a free elective.

Lectures three hours a week.

BIOL 2104 [0.5 credit] Introductory Genetics

Lecture/laboratory course on the mechanisms of inheritance and the nature of gene structure, composition and function, introducing both classical Mendelian genetics and modern molecular genetics. It is strongly recommended that this course be taken by Biology majors in their second year of study.

Includes: Experiential Learning Activity

Precludes additional credit for BIOL 2106 (no longer offered) and BIOL 2107. Credit for BIOL 2106 will only be

given if taken before BIOL 2104.

Prerequisite(s): (BIOL 1003 and BIOL 1004) or

(BIOL 1103 and BIOL 1104).

Lectures three hours a week, laboratory or tutorial three

hours a week.

BIOL 2107 [0.5 credit]

Fundamentals of Genetics

Mechanisms of inheritance and the nature of gene structure, composition and function, introducing both classical Mendelian genetics and modern molecular genetics.

Precludes additional credit for BIOL 2104 and BIOL 2106 (no longer offered).

Prerequisite(s): (BIOL 1003 and BIOL 1004) or

(BIOL 1103 and BIOL 1104). Lectures three hours a week.

BIOL 2200 [0.5 credit] Cellular Biochemistry

Cellular functions and their interrelationships. Introduction to thermodynamics, membrane structure and function, transport mechanisms, basic metabolic pathways, energy production and utilization, communications between cells. It is strongly recommended that Biology Majors and Honours students take this course in their second year of study.

Includes: Experiential Learning Activity

Also listed as BIOC 2200.

Precludes additional credit for BIOL 2201, CHEM 4401. Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), and (CHEM 1001 and CHEM 1002).

Lectures three hours a week, laboratory or tutorial four hours a week.

BIOL 2201 [0.5 credit] Cell Biology and Biochemistry

A study of the molecular, metabolic and structural organization of cells in relation to function. This course is recommended for students not taking upper year Biology laboratory courses for which BIOL/BIOC laboratories are prerequisites.

Precludes additional credit for BIOL 2200, BIOC 2200. Prerequisite(s): (BIOL 1003 or BIOL 1103) and (CHEM 1002 or CHEM 1006). Lectures three hours a week.

BIOL 2301 [0.5 credit] Biotechnology I

An introductory course on the science, technology, entrepreneurial skills and business considerations related to biotechnology. The course will survey broadly across the disciplines of Biology, including applications in agriculture, health, environment and industry. Includes: Experiential Learning Activity

Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104).

Lectures one and a half hours a week, workshops two hours a week.

BIOL 2303 [0.5 credit] Microbiology

The biology of the bacteria, Archaea, Viruses and Protozoans, from the fundamentals of cell chemistry, molecular biology, structure and function, to their involvement in ecological and industrial processes and human disease.

Also listed as ENVE 2002.

Precludes additional credit for HLTH 2004, HLTH 2024. Prerequisite(s): BIOL 1003 or BIOL 1103.

Lectures three hours a week.

BIOL 2600 [0.5 credit] Ecology

The scientific study of interactions of living organisms and their environment, and how these affect the distribution and abundance of life. Topics include energy transformation and flow, nutrient cycling, population and community dynamics, human impacts on ecosystems, conservation issues. Laboratory includes field and computer exercises.

Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or
(BIOL 1103 and BIOL 1104).

Lectures three hours a week, laboratory or tutorial four hours a week.

BIOL 2903 [0.5 credit]

Natural History and Ecology of Ontario

Introduction to the remarkable diversity and ecological relationships of Ontario's flora and fauna, which are explored in a habitat context.

Precludes additional credit for BIOL 1903 (no longer offered).

Prerequisite(s): BIOL 1004 or BIOL 1104 or BIOL 1902. Lectures three hours a week.

BIOL 3004 [0.5 credit] **Insect Diversity**

Introductory course dealing with the taxonomic diversity, anatomy, behavior and physiology of insects, as well as their impacts on ecosystems, agriculture and animal and human health.

Includes: Experiential Learning Activity Precludes additional credit for BIOL 4601.

Prerequisite(s): BIOL 2001. Lectures three hours a week.

BIOL 3008 [0.5 credit] **Bioinformatics**

A practical exploration in the application of information technology to biochemistry and molecular biology. Insight into biological knowledge discovery via molecular structure and function prediction, comparative genomics and biological information management.

Includes: Experiential Learning Activity

Also listed as COMP 3308.

Precludes additional credit for BIOC 3008 (no longer offered).

Prerequisite(s): BIOC 2200 or BIOL 2200, or BIOL 2201, or permission of the Department.

Lectures two hours a week, computer workshop three hours a week.

BIOL 3102 [0.5 credit] Mycology

This introductory course will cover the morphology. physiology, life cycles, evolution, ecology and biotechnology of the fungi.

Includes: Experiential Learning Activity Prerequisite(s): BIOL 2104 or BIOL 2107.

Lectures three hours a week.

BIOL 3104 [0.5 credit] **Molecular Genetics**

A lecture course dealing with modern advances in molecular genetics.

Prerequisite(s): BIOL 2104 or BIOL 2107 or permission of the Department.

Lectures three hours a week.

BIOL 3110 [0.5 credit] Origin of Life

An exploration of the main hypotheses, lines of evidence, and open questions to the origin of life. Topics include thermodynamics of life, the Oparin-Haldane hypothesis, the Miller-Urey experiment, the RNA world hypothesis, panspermia hypotheses, and a special focus on the alkaline hydrothermal vent hypothesis. Prerequisite(s): BIOL 2200 or BIOL 2201.

Lectures three hours a week.

BIOL 3111 [0.5 credit]

Vertebrate Evolution: Mammals, Reptiles, and Birds

Evolution of mammals, reptiles and birds. Emphasis on surveying amniote diversity, and the origin of key amniote transformations, as evidenced by the fossil record.

Includes: Experiential Learning Activity

Also listed as ERTH 3111.

Prerequisite(s): BIOL 2001 or permission of the department.

Lectures two hours a week and a laboratory three hours a week.

BIOL 3112 [0.5 credit]

Vertebrate Evolution: Fish and Amphibians

Evolution of fish and amphibians. Emphasis on surveying fish and amphibian diversity, and the origin of key transformations of these groups, as evidenced by the fossil record.

Includes: Experiential Learning Activity

Also listed as ERTH 3112.

Prerequisite(s): BIOL 2001 or permission of the

department.

Lectures two hours a week and a laboratory three hours a week.

BIOL 3201 [0.5 credit] Cell Biology

A lecture and laboratory course on the structure, composition, and function of eukaryotic cells.

Includes: Experiential Learning Activity

Prerequisite(s): BIOL 2104 and BIOL 2200/BIOC 2200, or

permission of the Department.

Lectures three hours a week, laboratory four hours a week.

BIOL 3202 [0.5 credit]

Principles of Developmental Biology

Introduction to the underlying principles and mechanisms governing development in multicellular animals and plants. Differentiation, growth, morphogenesis, and patterning will be examined at the organismal, cellular, and molecular levels to provide a balanced view of developmental phenomena in key model organisms.

Prerequisite(s): BIOL 2104 or BIOL 2107 and one of BIOL 2001 or BIOL 2002, or permission of the Department.

Lectures three hours a week.

BIOL 3205 [0.5 credit]

Plant Biochemistry and Physiology

A lecture and laboratory course consisting of selected topics in metabolism and physiology of plants, including photosynthesis, nutrient uptake and transport, intermediary and secondary metabolism, germination, growth and development.

Includes: Experiential Learning Activity

Prerequisite(s): BIOL 2002 and BIOL 2200/BIOC 2200, or

permission of the Department.

Lectures three hours a week, laboratory four hours a week.

BIOL 3301 [0.5 credit] Biotechnology II

An interdisciplinary course on interactions between science, invention and innovation in biotechnology. Case studies related to regional biotechnology opportunities; social and ethical issues impacting biotechnology. Includes: Experiential Learning Activity Prerequisite(s): BIOL 2301, BIOL 2104 or BIOL 2107, and BIOL 2200/BIOC 2200 or BIOL 2201, or permission of the

Lectures and laboratory/workshops three hours a week

BIOL 3303 [0.5 credit] Experimental Microbiology

Intensive training in laboratory techniques in microbiology, using bacteria and other microorganisms to demonstrate processes of cell growth, metabolism, gene expression, rapid evolution, gene transfer, microbial community dynamics and interactions with other organisms. Includes: Experiential Learning Activity Prerequisite(s): BIOL 2104, BIOL 2200/BIOC 2200 and BIOL 2303, or permission of the Department. Lecture/tutorial one and a half hours a week, laboratory four hours a week.

BIOL 3305 [0.5 credit]

Human and Comparative Physiology

The properties of physiological systems and components of humans and other animals with an emphasis on physical and chemical bases.

Includes: Experiential Learning Activity
Precludes additional credit for BIOL 3306.
Prerequisite(s): BIOL 2200/BIOC 2200 and BIOL 2001.
Lectures three hours a week, laboratory four hours a week.

BIOL 3306 [0.5 credit] Human Anatomy and Physiology

The anatomy and physiology of the neuromuscular, cardiovascular, respiratory, and excretory systems of humans with comparison to other animals. Includes: Experiential Learning Activity Precludes additional credit for BIOL 3305. Prerequisite(s): (BIOL 1003 and BIOL 1004) or (BIOL 1103 and BIOL 1104), and (CHEM 1001 and CHEM 1002), and third-year standing. Lectures three hours per week.

BIOL 3307 [0.5 credit]

Advanced Human Anatomy and Physiology

The anatomy and physiology of the endocrine, skeletal, digestive, immunological, and reproductive systems, with additional emphasis on the embryological origins of the major physiological systems.

Includes: Experiential Learning Activity
Prerequisite(s): BIOL 3305 or BIOL 3306.
Lectures three hours per week, workshop or laboratory four hours per week.

BIOL 3501 [0.5 credit] Biomechanics

Properties of muscles, tendons, bones, joints and the co-ordinated use of these structures. Human and other animal locomotion and fitness, bird flight, especially the soaring of the vulture and the albatross, and animal migration are covered in detail.

Includes: Experiential Learning Activity
Prerequisite(s): (BIOL 1003 and BIOL 1004) or
(BIOL 1103 and BIOL 1104), and third-year standing.
Lectures three hours a week, workshop two hours a
week

BIOL 3601 [0.5 credit]

Ecosystems and Environmental Change

Exploration of the unique contribution of the ecosystem approach to ecology, and of early key literature in ecosystem ecology through to current work on global environmental change.

Includes: Experiential Learning Activity Prerequisite(s): BIOL 2600.

Lectures three hours a week, laboratory four hours a week in six sessions.

BIOL 3602 [0.5 credit] Conservation Biology

The science of biology as applied to the problem of maintaining species diversity. Topics include: history of conservation biology, valuation of species, indices of biodiversity, extinction, conservation genetics, conservation planning in parks and reserves, landscape ecology and case studies of conservation problems. Includes: Experiential Learning Activity Prerequisite(s): BIOL 2600 or permission of the

Lectures three hours a week and laboratory/workshop three hours a week.

BIOL 3604 [0.5 credit] Statistics for Biologists

Department.

Introduction to the analysis of biological data. Students analyze real biological data sets in weekly laboratory sessions. Methods introduced include simple linear, polynomial, and multiple regression analysis, analysis of variance, nonparametric tests, tests of independence and logistic regression analysis.

Includes: Experiential Learning Activity
Prerequisite(s): BIOL 1105 or STAT 2507.

Lectures one and one-half hours and laboratory two and one-half hours a week.

BIOL 3605 [0.5 credit] Field Course I

An intensive study of living organisms under natural conditions. Credit is based on two weeks of full-time fieldwork with attendant assignments. Transportation and room and board costs are borne by the student. Ontario Universities Program in Field Biology; see offered modules for specific prerequisites.

Includes: Experiential Learning Activity

Also listed as NEUR 3203, for animal behaviour modules only.

Prerequisite(s): at least one course in BIOL beyond the 1000-level and written permission of the Department. Students may take both BIOL 3605 and BIOL 3606 for credit, but neither may be used to repeat a particular module.

All day, approximately six days a week.

BIOL 3606 [0.5 credit] Field Course II

An intensive study of living organisms under natural conditions. Credit is based on two weeks of full-time fieldwork with attendant assignments. Transportation and room and board costs are borne by the student. Ontario Universities Program in Field Biology; see offered modules for specific prerequisites.

Includes: Experiential Learning Activity
Prerequisite(s): at least one course in BIOL beyond the
1000-level and written permission of the Department.
Students may take both BIOL 3605 and BIOL 3606 for
credit, but neither can be used to repeat a particular
module.

All day, approximately six days a week.

BIOL 3608 [0.5 credit] Principles of Biogeography

Contemporary and past controls on distribution of plants and animals at global, regional and local scales; significance of these distributions.

Includes: Experiential Learning Activity

Also listed as GEOG 3104.

Prerequisite(s): BIOL 2600 or GEOG 1010 or permission

of the Department.

Lectures, laboratory, and fieldwork five hours a week.

BIOL 3609 [0.5 credit] Evolutionary Concepts

Evolution is the change in population properties across generations. Genetic variation, mutation, selection, drift, gene flow, genome evolution, speciation, development, biodiversity, fossils, and macro-evolution.

Prerequisite(s): BIOL 2104 or BIOL 2107 or permission of the instructor.

Lectures three hours a week.

BIOL 3611 [0.5 credit] Evolutionary Ecology

The term "adaptation" is meaningful only with respect to an ecological context. Ecological contexts lead to evolutionary outcomes such as diverse mating systems, ageing, sexual reproduction, sexual dimorphism, geographic variation, phenotypic plasticity, and diverse life histories.

Includes: Experiential Learning Activity Precludes additional credit for BIOL 4608.

Prerequisite(s): BIOL 2600.

Lectures three hours a week; one field trip.

BIOL 3612 [0.5 credit]

Computational Methods in Ecology and Evolution

Introduction to the development and use of computer programs to address biological problems. Topics include the development of programs to analyse ecological data, models of population dynamics, deterministic chaos, cellular automata, simulations of foraging behaviour and evolutionary computation.

Includes: Experiential Learning Activity

Prerequisite(s): BIOL 2600 or permission of the

Department.

Lectures two hours per week, workshop three hours per

week.

BIOL 3801 [0.5 credit]

Plants and Herbivores

Exploration of the chemical, physiological, ecological and evolutionary interactions that underlie the relationship between plants and their insect herbivores.

Prerequisite(s): BIOL 2001 and BIOL 2002.

Lectures/seminars three hours a week.

BIOL 3802 [0.5 credit]

Animal Behaviour

Advanced study of animal behaviour including the environmental, genetic, and neural influences on behaviour. Topics such as predator-prey interactions, mating behaviour, migration, parental care and social interactions are interpreted in an evolutionary context. Prerequisite(s): BIOL 2001 or BIOL 2600 or permission of the Department.

Lectures and workshop/tutorials three hours a week.

BIOL 3804 [0.5 credit] Social Evolution

Diversity in social behaviour from evolutionary and ecological perspectives. Topics include ecological determinants of social living, social networks, social foraging, inclusive fitness, kin selection, altruism, cooperation, and mating systems and strategies. Prerequisite(s): BIOL 2001 and BIOL 2600, or permission of the Department.

Lectures three hours a week.

BIOL 3901 [0.5 credit] Research Proposal

The development of a competitive research proposal in consultation with an advisor.

Includes: Experiential Learning Activity

Prerequisite(s): third year standing in an Honours Biology program and permission of the Department.

BIOL 3902 [0.5 credit] Special Topics in Biology I

Specific topics of current interest. Topics may vary from year to year.

Prerequisite(s): third-year standing in a Biology program or permission of the Department.

Lecture, seminars, or workshops three hours per week.

BIOL 3999 [0.0 credit]

Co-operative Work Term Report

Practical experience for students enrolled in the Cooperative Option. Students must receive satisfactory evaluations from their work term employer. Written reports describing the work term project will be required. Graded Sat or Uns.

Includes: Experiential Learning Activity

Prerequisite(s): registration in the Biology Co-operative

Option and permission of the Department.

BIOL 4007 [0.5 credit]

Evolutionary Developmental Paleobiology

This course explores the mechanistic basis of organismic evolution from genetic, morphogenetic and epigenetic perspectives, within a phylogenetic context of living and extinct vertebrates.

Includes: Experiential Learning Activity

Also listed as ERTH 4007.

Prerequisite(s): ERTH 2312 or BIOL 2001, and

BIOL 2104.

Lectures or seminars three hours per week.

BIOL 4008 [0.5 credit] Molecular Plant Development

Recent advances in plant development including molecular, biochemical, genomics, and proteomics studies.

Prerequisite(s): BIOL 2002 or permission of the Department.

Lectures three hours a week.

BIOL 4102 [0.5 credit] Molecular Ecology

The interface of molecular biology, ecology and population biology. Topics include experimental design and a survey and critique of molecular genetic methods to study ecology.

Prerequisite(s): BIOL 2600 and (BIOL 2104 or BIOL 2107) or permission of the Department.

BIOL 4103 [0.5 credit]

Population Genetics

Evolution of gene frequencies, including selection, mutation, genetic drift, inbreeding, gene flow, and population structure.

Prerequisite(s): BIOL 2104 or BIOL 2107 or permission of the Department. A course in statistics is highly recommended.

Lectures and seminars three hours a week.

BIOL 4104 [0.5 credit] Evolutionary Genetics

An overview of the molecular evidence of evolution, speciation as well as the phylogenetic analysis of biological sequence data and biometrical traits. Includes: Experiential Learning Activity Prerequisite(s): (BIOL 2001 or BIOL 2002) and (BIOL 2104 or BIOL 2107) or permission of the Department. A course in statistics is recommended. Lectures and computer lab three hours a week.

BIOL 4106 [0.5 credit]

Advances in Molecular Biology

Review of the application of high throughput approaches to research in molecular and cellular biology and biochemistry with an emphasis on gene function and human disease progression.

Prerequisite(s): BIOL 2303 and (BIOL 3104 or BIOL 3201 or BIOL 3303).

Lectures and seminars three hours a week.

BIOL 4109 [0.5 credit]

Laboratory Techniques in Molecular Genetics

This laboratory course provides practical familiarity with commonly used techniques in molecular genetics. The laboratory is suitable for students with a developing interest in problems of molecular and cellular biology and biochemistry.

Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2200/BIOC 2200 and BIOL 2303
and BIOL 3104 or permission of the Department.
Lecture/laboratory six hours a week in two sessions.

BIOL 4200 [0.5 credit]

Immunology

The organization and function of the immune system, including the anatomy of the immune system, the properties and behaviour of cells of the immune system, and the molecular and genetic bases of the immune response.

Precludes additional credit for BIOC 4200 (no longer offered).

Prerequisite(s): BIOL 3201 or permission of the Department.

Lectures three hours a week.

BIOL 4201 [0.5 credit]

Advanced Cell Culture and Tissue Engineering

Theory and application of current techniques and developments in cell culture as applied to research questions in the field of stem cells and tissue engineering. Includes: Experiential Learning Activity

Also listed as BIOC 4201.

Prerequisite(s): BIOL 3201 or permission of the Department.

Laboratory four hours per week, tutorial one hour a week. Labs require regular participation outside of the scheduled lab time to maintain cell cultures and set up or complete experiments.

BIOL 4202 [0.5 credit]

Mutagenesis and DNA Repair

A mechanistic study of mutagenesis and DNA repair. Topics include DNA structure perturbations, spontaneous and induced mutagenesis, the genetics and biochemistry of DNA repair and recombination, and the role of mutations in the development of genetic disease and cancer.

Precludes additional credit for BIOC 4202 (no longer offered).

Prerequisite(s): BIOL 3104 and BIOL 2200/BIOC 2200 or permission of the Department.

Lectures and tutorial three hours a week.

BIOL 4203 [0.5 credit] Evolution of Sex

The evolution of sex, including meiosis, syngamy, sex determination, sex chromosomes, and gender from organismal, genetic, and developmental perspectives; the origin, maintenance, function, and ubiquity of sex.

Prerequisite(s): BIOL 2104 or BIOL 2107.

Lectures three hours a week.

BIOL 4206 [0.5 credit]

Human Genetics

A survey of human genetic variation and mutation in a molecular genetics context. Topics may include molecular basis of diseases, chromosomal abnormalities, genomic imprinting, cancer genetics, genomics, gene mapping and gene therapy.

Prerequisite(s): BIOL 3104 or permission of the Department.

BIOL 4207 [0.5 credit]

Advanced Embryology & Developmental Biology

A laboratory-based exploration of techniques and recent developments in the use of model embryological systems as applied to questions of development and human health.

Includes: Experiential Learning Activity

Prerequisite(s): BIOL 3201 or BIOL 3202 or permission of the Department.

Laboratory four hours per week, tutorial one hour a week. Labs require regular participation outside of the scheduled lab time to set up or complete experiments.

BIOL 4209 [0.5 credit] **Advanced Plant Physiology**

An advanced course dealing with recent developments in selected topics of plant physiology.

Prerequisite(s): BIOL 3205 and CHEM 2203, CHEM 2204 or permission of the Department.

Lectures/discussion three hours a week.

BIOL 4300 [0.5 credit] **Applied Microbiology**

Studies of the application of microorganisms. Topics may include: microbial communities, and agricultural, pharmaceutical, industrial and health sciences.

Prerequisite(s): (BIOL 2200/BIOC 2200 or BIOL 2201), BIOL 2303 and (BIOL 3104 or BIOL 3303) or permission of the Department.

Lectures and tutorial three hours a week.

BIOL 4301 [0.5 credit] **Current Topics in Biotechnology**

Explorations of developing biotechnologies in areas such as microbial products, protein engineering, plant genetic engineering, environmental remediation, pharmaceuticals production and medical diagnostics and therapy. Prerequisite(s): BIOL 3301 or permission of the department.

Lectures and tutorials four hours a week.

BIOL 4303 [0.5 credit] Advances in Microbiology

Exploration of current microbiology including the molecular biology of infectious agents, use of model micro-organisms to study human cells and diseases, and functional genomics and proteomics. Special attention will be paid to the field's "big questions". Students will critically examine a number of research proposals.

Prerequisite(s): BIOL 2303 and (BIOL 3104 or BIOL 3303 or BIOC 3102) or permission of the Department. Lectures three hours per week.

BIOL 4304 [0.5 credit] Forensic Biology

An introduction to forensics that covers topics in molecular biology, biochemistry, genetics, population genetics and statistics as they relate to forensic biology. The course will describe the techniques used to identify body fluids and generate DNA profiles as well as the interpretation of forensic results.

Prerequisite(s): (BIOL 2104 or BIOL 2107) and (BIOL 2200/BIOC 2200 or BIOL 2201) or permission of the Department.

Lectures three hours a week.

BIOL 4306 [0.5 credit] **Animal Neurophysiology**

A course dealing with recent advances made in particular areas of animal neurophysiology.

Includes: Experiential Learning Activity Precludes additional credit for BIOL 4305.

Prerequisite(s): BIOL 3305 or BIOL 3306, or permission of the Department.

Lectures two hours a week, workshops or laboratory four hours a week.

BIOL 4309 [0.5 credit] Studies in Human Performance

Biomechanical underpinnings of human performance including the quantitative analysis of human motion in normal activities and in athletic performance. Students will learn modern motion capture methods. This course will require students to design and execute an independent project.

Includes: Experiential Learning Activity

Prerequisite(s): BIOL 3307 and fourth-year standing, or permission of the department.

Lecture three hours per week, workshop/labs three hours per week.

BIOL 4317 [0.5 credit]

Neuroethology: The Neural Basis of Animal Behaviour

Proximate mechanisms underlying animal behaviour. Focus on evolution of nervous systems in response to environmental selection pressures. Topics include: genetic and hormonal influences on behaviour (e.g. maternal care); unique sensory worlds (e.g. magnetic); various levels of neural integration, from simple reflexes to complex social behaviour.

Prerequisite(s): BIOL 3305 or BIOL 3306, or permission of the Department.

BIOL 4318 [0.5 credit]

Adaptations to Extreme Environments

Lectures, discussions and student presentations will be used to examine adaptations of animals to extreme environments (e.g. desert) or lifestyles (e.g. diving), at the physiological, biochemical and molecular levels. Emphasis on becoming familiar with the current primary literature. Prerequisite(s): BIOL 3305, or permission of the Department.

Lectures/workshops three hours a week.

BIOL 4319 [0.5 credit] Studies in Exercise Physiology

Physiological mechanisms underlying human athletic performance. Exercise physiology and cardio-respiratory activity, metabolic regulation and musculoskeletal function. Practical experience will be gained in the workshop/laboratory based experimental sessions.

Includes: Experiential Learning Activity

Prerequisite(s): BIOL 3307 and fourth-year standing, or

permission of the department.

Lectures two hours per week, workshop/labs three hours per week.

BIOL 4500 [0.5 credit] The Biology of Birds

Introduction to ornithology, the study of birds; the evolution of birds, migration, geographic variation, adaptations for flight, feeding, reproduction; extinction and preservation.

Prerequisite(s): BIOL 2001 or permission of the department.

Lectures three hours per week.

BIOL 4501 [0.5 credit] The Taxonomy of Birds

The taxonomy of birds and species identification are learned through the use of study skins in the lab. Field excursions allow first-hand study of various species. Participants must acquire a pair of binoculars and one of the recommended field guides.

Includes: Experiential Learning Activity Prerequisite(s): BIOL 2001 or permission of the department.

Laboratory/field excursions four hours per week.

BIOL 4502 [0.5 credit]

Herpetology

Herpetology is the study of amphibians and reptiles. The behaviours, physiological ecology, conservation and identification of amphibians and reptiles will be examined through lectures, seminars and hands-on activities. Includes: Experiential Learning Activity

Prerequisite(s): BIOL 2001.

Lectures or seminars three hours per week.

BIOL 4503 [0.5 credit]

Fish Ecology, Conservation and Management

Introduction to the diversity and environmental biology of the world's fishes. Applied issues in fisheries management, conservation, and aquaculture. Workshops expose students to techniques in fisheries science through hands-on demonstrations and field excursions. Includes: Experiential Learning Activity

Prerequisite(s): BIOL 2600 or permission of the Department.

Lectures/seminars two hours a week, plus labs/ workshops two hours a week.

BIOL 4504 [0.5 credit]

Ecology of Freshwater Invertebrates

Overview of the diversity and ecology of freshwater invertebrates. Aquatic invertebrates from local bodies of water will be sampled and identified in the lab. Experiments on the ecology and behaviour of model species of freshwater invertebrates will also be conducted in the lab.

Includes: Experiential Learning Activity
Prerequisite(s): BIOL 2001 and BIOL 2600.
Seminar and lab four hours a week.

BIOL 4505 [0.5 credit] Coral Reefs

Examining the diversity of life on coral reefs and their interactions across ecological scales, from the biochemistry of zooxanthellae symbiosis to landscape scale trophodynamics, reticulate evolution, and reef fisheries. Emphasis is on synthesis writing drawn from the

current primary literature.
Prerequisite(s): BIOL 2600.

Lectures/seminars three hours a week

BIOL 4506 [0.5 credit] Cactus Biology

Covers the cactus family over its entire range, including most of the western hemisphere, with discussion on their anatomy, physiology, ecology, evolution, and classification. Topics include how cacti are both typical flowering plants in some regards, and atypical in others.

Prerequisite(s): BIOL 2002.

Lectures/seminars three hours a week

BIOL 4507 [0.5 credit] **Ecological Parasitology**

Key concepts in the ecological study of parasites and pathogens, underpinned by evolutionary thinking and relevant to fundamental and applied questions of coevolution, disease ecology, epidemiology, emerging infectious diseases, environmental parasitology, evolutionary transitions, host species range, immunity, resistance, tolerance, transmission mode, and virulence. Prerequisite(s): BIOL 2600 and one of the following: BIOL 3601, BIOL 3604, BIOL 3609, BIOL 3611, BIOL 3612, BIOL 3801, BIOL 3802, BIOL 3804. Lectures or seminars 3 hours per week.

BIOL 4602 [0.5 credit]

Evolutionary Applications across Disciplines: From Medicine to Conservation

Evolutionary principles contributing to advancements across fields including medicine, agriculture, conservation, climate change, and engineering. Topics include evolution of virulence, causes of variation in human health, evolution of resistance to pesticides, interventions for recovery of species at risk, and biomimetic modeling in engineering and architecture.

Prerequisite(s): BIOL 1104 and third-year standing. Lectures/workshops three hours per week.

BIOL 4603 [0.5 credit] Insect Evolution and Biology

Major questions on the origin, evolution and adaptation of structures and physiology of terrestrial arthropods, especially insects.

Includes: Experiential Learning Activity Prerequisite(s): BIOL 3004, or permission of the Department.

Lectures two hours a week, laboratory four hours a week.

BIOL 4604 [0.5 credit] Landscape Ecology

Landscape ecology is the study of how landscape structure affects ecological processes and biodiversity. The focus of this course is on research methods and results in landscape ecology, with special emphasis on applications in forestry, agriculture, and species conservation.

Prerequisite(s): BIOL 2600 and (BIOL 3601 or BIOL 3602 or BIOL 3608) or permission of the Department. Lecture three hours a week.

BIOL 4802 [0.5 credit] Advanced Animal Behaviour

Contemporary issues in behavioural ecology. Topics may include the relevance of behavioural ecology to conservation biology, to new insights into human social behaviour, and will be selected through consultation between professor and students.

Prerequisite(s): BIOL 3802 or BIOL 3804, or permission of the Department.

Lectures or workshops three hours a week.

BIOL 4810 [0.5 credit]

Education Research in Undergraduate Science

Introduction to learning and teaching university science. The science of learning, evidence of effective teaching. and teaching methodologies. Professional ethics, constructivist learning, equity and inclusion. Discipline-Based Education Research (DBER). Students will conduct their own DBER research project.

Includes: Experiential Learning Activity

Prerequisite(s): 4th year standing, or permission of the department This course can only be used by students in programs offered by, or in conjunction with, the Faculty of Science as a free elective.

Also offered at the graduate level, with different requirements, as ISAP 5504, for which additional credit is

Seminar three hours per week, classroom-based research one hour per week.

BIOL 4901 [0.5 credit] **Directed Special Studies**

Independent or group study, open to third- and fourth-year students to explore a particular topic, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work. Prerequisite(s): permission of the Department. Students

normally may not offer more than 1.0 credit of Directed Special Studies in their program.

BIOL 4902 [0.5 credit] Special Topics in Biology II

Specific topics of current interest. Topics may vary from vear to year.

Prerequisite(s): fourth-year standing in a Biology program or permission of the Department.

Lecture, seminars, or workshops three hours per week.

BIOL 4905 [1.0 credit] Honours Workshop

Students engage in biological topics of their choosing, an evidence-based synthesis developed and presented through multiple scientific communication methods (e.g., narrative review papers, media releases, infographics, and oral and poster presentations). Evaluation is based on written syntheses, course assignments, and a year-end presentation.

Includes: Experiential Learning Activity

Precludes additional credit for BIOL 4907 and BIOL 4908.

Prerequisite(s): fourth-year standing in an Honours biology program and permission of the Department. Workshops three hours per week.

BIOL 4907 [1.0 credit]

Honours Essay and Research Proposal

An independent critical review and research proposal, using library resources, under the direct supervision of a Faculty advisor. Evaluation is based on a written report and a poster presentation.

Includes: Experiential Learning Activity

Precludes additional credit for BIOL 4905 and BIOL 4908.

Prerequisite(s): fourth-year standing in an Honours Biology program and permission of the Department.

BIOL 4908 [1.0 credit] Honours Research Thesis

An independent research project undertaken in the field and/or the laboratory, under the direct supervision of a faculty adviser. Evaluation is based on a written thesis and a poster presentation.

Includes: Experiential Learning Activity

Precludes additional credit for BIOL 4905 and BIOL 4907.

Prerequisite(s): fourth-year standing in an Honours biology program with a minimum CGPA of 8.0 in the major or permission of the Department.

Business (BUSI)

Business (BUSI) Courses

Notes:

- 1. Some Business courses are open to students in select programs only. Please refer to the current BUSI Course Priority List found at: sprott.carleton.ca/registration
- 2. B.Com. and B.I.B. students should use Business (BUSI) prefix for registering in courses that are cross-listed.
- 3. Not all courses listed are offered in a given year; consult the class schedule at central.carleton.ca for a list of current course offerings.

BUSI 1001 [0.5 credit]

Principles of Financial Accounting

Discussion of the concepts of asset valuation and income measurement underlying the preparations and interpretation of financial statements.

Precludes additional credit for BUSI 1003, BUSI 1004, BUSI 1011.

Prerequisite(s): BUSI 1800, or enrolment in Statistics with Concentration in Actuarial Science B.Math Honours. Lecture three hours a week.

BUSI 1002 [0.5 credit] Management Accounting

An introduction to the use of accounting data for the purposes of planning and control of operations. Precludes additional credit for BUSI 1003, BUSI 1005, BUSI 2008, and BUSI 2018.

Prerequisite(s): BUSI 1001, or permission of the Sprott School of Business.

Lecture three hours a week.

BUSI 1003 [0.5 credit] Survey of Accounting

Introduction to accounting information, the basic accounting cycle, and consideration of selected financial statement topics. Analysis of cost behavior and the uses and limitations of accounting information in planning, controlling and decision-making processes.

Precludes additional credit for BUSI 1001, BUSI 1002, BUSI 1004, BUSI 1005, BUSI 1011, BUSI 2008, and BUSI 2018. No credit for students in degree programs offered by the Sprott School of Business.

Lecture three hours a week.

BUSI 1004 [0.5 credit]

Financial Accounting for Business Students

Introduction to accounting for business organizations. The student will be introduced to the accounting process and the preparation and analysis of the balance sheet, income statement, and cash flow statement.

Precludes additional credit for BUSI 1001, BUSI 1003 and BUSI 1011

Prerequisite(s): BUSI 1800. Restricted to B.Com. and B.I.B. students.

Lectures three hours a week.

BUSI 1005 [0.5 credit]

Managerial Accounting for Business Students

Introduction to the development and use of accounting information within a business organization for effective management including: planning, directing, motivating, and controlling activities and behaviours.

Precludes additional credit for BUSI 1002, BUSI 1003, BUSI 2008, and BUSI 2018.

Prerequisite(s): BUSI 1004. Restricted to B.Com. and B.I.B. students.

BUSI 1011 [0.5 credit]

Financial Accounting for Business Students

Introduction to accounting for business organizations. The student will be introduced to the accounting process and the preparation and analysis of the balance sheet, income statement, and cash flow statement.

Precludes additional credit for BUSI 1001, BUSI 1003, and BUSI 1004.

Prerequisite(s): BUSI 1800. Restricted to B.Acc., B.Com., and B.I.B. students.

Lectures three hours a week.

BUSI 1401 [0.5 credit]

Foundations of Information Systems

This course helps student to understand the critical role of information systems in organizations and their impact on social and ethical issues. Covers fundamental tools and skills for the development and management of information systems and business analytics in organizations. Precludes additional credit for BUSI 2400.

Lecture three hours a week and tutorial one hour a week.

BUSI 1402 [0.5 credit]

Introduction to Business Information and **Communication Technologies**

Introduction to ICT in organizations. Topics may include spreadsheets, databases, statistical software, website design and implementation, collaboration software including wikis, blogs and social networking, GPS, m-Commerce.

Lectures three hours a week.

BUSI 1701 [0.5 credit]

Introduction to International Business

Introduction to the principles and practices of international business. Topics include the impact of culture and the political, economic, and legal systems on global strategy, international institutions, theories of cross-border trade, and the characteristics and effects of regional trade blocs. Precludes additional credit for BUSI 2701, BUSI 2703. Prerequisite(s): restricted to B.I.B. students.

Lecture three hours and tutorial one hour a week.

BUSI 1800 [0.5 credit] **Introduction to Business**

Introduction to contemporary businesses in a complex economy, their role in the society, their history. The various functions that come together to define a business will be examined. All forms of business communications emphasized.

Precludes additional credit for BIT 2001. Lectures three hours and tutorial one hour a week.

BUSI 1850 [0.5 credit] **Business Foundations I**

Introduction to competencies required for success in academic and professional business settings. Through experiential learning and self-reflective practices students will build competencies in collaboration, communication and critical thinking. Competencies will be explored through applications to the business environment and functional areas of business.

BUSI 1995 [0.0 credit] **Employability Passport I**

An introduction to the knowledge and tools required for a career in Business.

Includes: Experiential Learning Activity

Prerequisite(s): Restricted to students registered in B.

Acc., B.Com., or B.I.B.

Participation in employability events and initiatives throughout the year.

BUSI 2001 [0.5 credit] Intermediate Accounting I

An examination of accounting and reporting issues related primarily to asset valuation and revenue recognition. Precludes additional credit for BUSI 2011, BUSI 3011 and

Prerequisite(s): second-year standing, and BUSI 1011 or BUSI 1004 or BUSI 1001 (with a grade of C or higher in each).

Lecture three hours a week.

BUSI 2002 [0.5 credit] Intermediate Accounting II

An examination of accounting and reporting issues related primarily to liabilities and equities.

Precludes additional credit for BUSI 2011, BUSI 2506, BUSI 3011 and BUSI 4011.

Prerequisite(s): BUSI 2001, and BUSI 2501 or BUSI 2503 (with a grade of C or higher in each).

Lecture three hours a week.

BUSI 2005 [0.5 credit] **Income Tax Fundamentals**

A foundation course that aims to introduce the fundamental concepts of income tax laws and regulations as significant elements in the planning and decision making process of taxpayers and managers. Problems, issues and planning associated with the Income Tax Act are discussed.

Precludes additional credit for BUSI 3005, BUSI 3015 and BUSI 4015.

Prerequisite(s): BUSI 1001 or BUSI 1004 or BUSI 1011 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 2008 [0.5 credit] Management Accounting

An introduction to the use of accounting data for the purposes of planning and control of operations. Precludes additional credit for BUSI 1002, BUSI 1003, BUSI 1005, and BUSI 2018.

Prerequisite(s): BUSI 1001, or permission of the Sprott School of Business.

Lecture three hours a week.

BUSI 2011 [0.5 credit]

Intermediate Financial Reporting I

Application and measurement of routine accounting transactions related primarily to asset valuation and revenue recognition.

Precludes additional credit for BUSI 2001, BUSI 2002, and BUSI 3001.

Prerequisite(s): BUSI 1001, BUSI 1004, or BUSI 1011 (with a grade of C or better in each).

Lecture three hours a week.

BUSI 2018 [0.5 credit]

Managerial Accounting for Business Students

Introduction to the development and use of accounting information within a business organization for effective management including: planning, directing, motivating, and controlling activities and behaviours.

Precludes additional credit for BUSI 1002, BUSI 1003, BUSI 1005, and BUSI 2008.

Prerequisite(s): BUSI 1004 or BUSI 1011. Restricted to B.Acc., B.Com., and B.I.B. students.

Lecture three hours a week.

BUSI 2101 [0.5 credit] Organizational Behaviour

Models of individual and small group behaviour in organizations. Topics include motivation, communication, job design, leadership and group dynamics to provide systematic explanations of employee and managerial behaviour in organizations.

Precludes additional credit for BUSI 2121 and BUSI 3602. Prerequisite(s): second-year standing. Restricted to B.Com. students.

Lectures three hours, and tutorial one and a half hours a week.

BUSI 2121 [0.5 credit]

Introduction to Organizational Behaviour

Individual and small group behaviors in organizations and management of the same.

Precludes additional credit for BUSI 2101, BUSI 3602.

Prerequisite(s): second-year standing.

Lecture three hours a week.

BUSI 2204 [0.5 credit] Basic Marketing

Basic problems and practices in marketing. Marketing planning tools and strategies of firms.

Precludes additional credit for BIT 2002 and BUSI 2208.

Lecture three hours a week.

BUSI 2208 [0.5 credit] Introduction to Marketing

Overview of the marketing function within the firm. Introduction to key marketing concepts and principles; business environment analysis, strategic decision making (segmentation, targeting, positioning), marketing mix planning (product, price, place promotion). Analysis of marketing problems using cases and major project. Includes: Experiential Learning Activity Precludes additional credit for BUSI 2204. Prerequisite(s): BUSI 1011 (or BUSI 1004), ECON 1001 and ECON 1002 (or ECON 1000), and one of BUSI 1701, PSYC 1002, SOCI 1005. Lecture three hours a week.

BUSI 2301 [0.5 credit]

Introduction to Supply and Operations Management

Concepts, models, and managerial issues in planning, designing, operating and controlling systems across supply chains for the provision of goods and services. Emphasis on basic ideas and tools.

Precludes additional credit for BUSI 3300 (no longer offered).

Prerequisite(s): second-year standing. Restricted to selected Sprott programs. Lecture three hours a week.

BUSI 2401 [0.5 credit] Introduction to Data Analytics

This course prepares students to gather, manipulate, and clean data from a variety of sources within a programming environment. Students will be introduced to visual data exploration and the deployment of data-driven visual storytelling. Topics include: APIs, Data Science Programming, SQL, Relational/NoSQL databases, data visualization.

Prerequisite(s): BUSI 1401. Lecture three hours a week.

BUSI 2402 [0.5 credit]

Business Applications Development

Introduction to programming. Fundamentals of structured and object-oriented programming using an OO programming language. Treatment of objects, abstraction and inheritance, event-driven programming, iteration. sequence and selection. Consideration of algorithms for searching, sorting, string processing and numerical analysis. Emphasis on the development of business applications.

Precludes additional credit for COMP 1006 and COMP 1406.

Prerequisite(s): second-year standing.

Lecture three hours and tutorial one hour a week.

BUSI 2501 [0.5 credit] **Business Finance**

Basic issues and practices in finance. Survey of business firms' financing, investment, and payout decisions.

Emphasis on understanding the principles, resources, and trade-offs in the financial area of business.

Precludes additional credit for BUSI 2503, BUSI 2504 (no longer offered).

Prerequisite(s): BUSI 2018 (or BUSI 1005), and ECON 1001 and ECON 1002 (or ECOR 3800). Restricted to selected Sprott programs.

Lecture three hours and optional tutorial.

BUSI 2503 [0.5 credit] **Introduction to Finance**

Basic issues and practices in finance. Survey of business firms' financing, investment, and payout decisions.

Emphasis on understanding the principals, resources and trade-offs in the financial area of a business.

Precludes additional credit for BUSI 2504 and BUSI 2501. No credit for students in B.Com. or B.I.B.

Prerequisite(s): second-year standing.

Lecture three hours a week.

BUSI 2505 [0.5 credit] **Business Finance II**

Capital investment and financing decisions in the context of risk and return tradeoffs. Primary and derivative securities, and their role in risk management. Mergers, corporate restructuring, the theory of principal-agent relationships, and financial planning, forecasting, and control.

Prerequisite(s): BUSI 1002 or BUSI 1005, and BUSI 2504 (with a grade of C or higher in each), ECON 1001 and ECON 1002 (or ECON 1000), and MATH 1009 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 2506 [0.5 credit]

Financial Statement Analysis

Analysis and interpretation of an entity's financial statements and annual report from a user perspective. Ratio analysis is used to analyze firm performance and make forecasts of future performance.

Precludes additional credit for BUSI 2002.

Prerequisite(s): BUSI 2501 or BUSI 2504 with a grade of C or higher in each.

Lectures three hours a week.

BUSI 2601 [0.5 credit] **Business Law**

The legal system and legal ordering as they affect those engaged in business activities. Emphasis on the law of tort, law of contract, agency and bailment, business associations (partnerships/proprietorships/corporations) and real estate.

Lecture three hours a week.

BUSI 2701 [0.5 credit]

Fundamentals of International Business

Introduction to the context and operation of international business. Topics include international trade theory, trade agreements and blocs, international finance, global marketing, international human resource management and global strategy.

Precludes additional credit for BUSI 1701, BUSI 2703. Prerequisite(s): BUSI 1800.

Lecture three hours a week.

BUSI 2702 [0.5 credit]

Introduction to International Management

Applies principles of organizational behavior and organizational theory to the operations of international businesses. Introduces how culture can influence work and organizational life. Includes discussion of appropriate strategies and structures, processes in a multi-national and multi-cultural setting.

Precludes additional credit for BUSI 3602.

Prerequisite(s): Second-year standing in B.Com. or B.I.B. and BUSI 1701 or BUSI 2701.

Lectures three hours a week.

BUSI 2703 [0.5 credit]

Introduction to International Business

Introduction to contemporary businesses in a complex economy, their role in society and their history. Examination of the various functions that come together to define a business with an emphasis on all forms of business communications.

Precludes additional credit for BUSI 1701, BUSI 2701. Prerequisite(s): second-year standing. No credit for students in B.Com. or BIB.

BUSI 2750 [0.5 credit]

Intercultural Communications

In our globalized world, effective communication is essential in our personal and professional lives. This course explores fundamental skills and principles for successful intercultural interactions, cross-cultural communication, and cultural competence. This course emphasizes diverse perspectives in a global context to enhance cultural intelligence.

Prerequisite(s): second-year standing in B.I.B. and BUSI 1701.

Lectures three hours a week.

BUSI 2755 [0.5 credit] Intercultural Skills

This course explores communications across diverse cultural contexts, emphasizing understanding cultural differences, effective communication strategies, and the development of intercultural competence within organizations. Students will enhance their ability to navigate and communicate effectively in multicultural settings through theoretical frameworks, case studies, and practical exercises.

Prerequisite(s): No credit for students in B.I.B. Lectures three hours a week.

BUSI 2800 [0.5 credit] Entrepreneurship

Overview of the basics of entrepreneurship, with emphasis on idea generation and identification, team building, business models, initial strategies and feasibility. A number of organization types will be studied. Prerequisite(s): Second-year standing. Lecture three hours a week.

BUSI 2819 [0.5 credit]

Sustainability Accounting and Social Finance

This course offers different avenues for in-depth explorations in sustainability accounting, impact measurement and social finance for undergraduate students. Each module covers a special topic within responsible business, such as impact measurement, responsible finance, impact investing, responsible and ESG investing, sustainability accounting. Prerequisite(s): second-year standing. Lecture three hours a week.

BUSI 2850 [0.5 credit] Business Foundations II

An enquiry-based learning approach provides the framework for development of competencies in critical analysis, communication and collaboration. Current issues in business will guide the integration of business knowledge required to address, analyze, and recommend solutions. Students will lead the exploration and analysis of issues presented.

BUSI 3001 [0.5 credit]

Accounting for Business Combinations

Accounting problems associated with business combinations, with attention to the preparation of consolidated financial statements. Discussion may extend to financial reporting and diversified companies, reorganizations, etc. Selection of topics may vary from year to year.

Precludes additional credit for BUSI 2011, BUSI 3011 and BUSI 4011

Prerequisite(s): BUSI 2002 with a grade of C- or higher. Lecture three hours a week.

BUSI 3005 [0.5 credit]

Taxation I

Federal income tax laws and regulations and their impact on an individual's financial and business decisions. Problems, issues and planning associated with the Income Tax Act and concerned with the computation of taxable income and taxes payable by an individual are discussed. Precludes additional credit for BUSI 2005, BUSI 3015 and BUSI 4015.

Prerequisite(s): BUSI 2001 with a grade of C- or higher. Lecture three hours a week.

BUSI 3007 [0.5 credit]

Auditing I

Auditing theory, methodology and application. Precludes additional credit for BUSI 3017. Prerequisite(s): BUSI 2001. Lecture three hours a week.

BUSI 3008 [0.5 credit]

Intermediate Management Accounting and Control

The use of accounting information for cost control and performance evaluation. Emphasis is on cost accumulation systems, performance evaluation, control models and analytical tools.

Precludes additional credit for BUSI 3018 and BUSI 4018. Prerequisite(s): BUSI 1002 or BUSI 1005 or BUSI 2018 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 3011 [0.5 credit]

Intermediate Financial Reporting II

Application and measurement of routine accounting transactions related primarily to investments, liabilities and shareholders' equity.

Precludes additional credit for BUSI 2001, BUSI 2002, and BUSI 3001.

Prerequisite(s): BUSI 2011, and BUSI 2501 or BUSI 2503 (with a grade of C or better in each).
Lectures three hours a week.

BUSI 3013 [0.25 credit]

Professionalism and Perspectives in Accounting

Theories of professions, professionalism, Indigenous views and equity, diversity and inclusion (EDI) and application to accountancy.

Prerequisite(s): BUSI 2011 (with a grade of C- or better). Lectures three hours a week.

BUSI 3014 [0.25 credit]

Exploring Sustainability in Accounting

Exploration of the application of how sustainability (including Environmental, Social and Governance) plays a role in accounting.

Prerequisite(s): BUSI 2011 (with a grade of C- or better). Lectures three hours a week.

BUSI 3015 [0.5 credit]

Taxation Concepts

Application and measurement of routine taxation transactions.

Precludes additional credit for BUSI 2005 and BUSI 3005. Prerequisite(s): third-year standing, and BUSI 1001, BUSI 1004, or BUSI 1011 (with a grade of C- or better). Lectures three hours a week.

BUSI 3017 [0.5 credit]

Auditing Theory

Auditing theory, methodology and application. Precludes additional credit for BUSI 3007. Prerequisite(s): BUSI 2001 or 2011. Lecture three hours a week.

BUSI 3018 [0.5 credit]

Cost Management and Decision Making

Application and measurement of accounting information for cost control and performance evaluation.

Precludes additional credit for BUSI 3008 and BUSI 4008. Prerequisite(s): BUSI 1002, BUSI 1005, BUSI 2008, or BUSI 2018, and BUSI 2501 or BUSI 2503 (with a grade of C- or better in each).

Lecture three hours a week.

BUSI 3025 [0.25 credit] Tax Clinic 1

Hands on preparation of income tax returns through tax clinics.

Prerequisite(s): BUSI 2005 OR BUSI 3005 OR BUSI 3015 (with a grade of C- or higher in each).

BUSI 3035 [0.25 credit]

Tax Clinic 2

Supervision, training, and/or organization of income tax clinics.

Prerequisite(s): BUSI 3025 and permission of the Sprott School of Business.

BUSI 3040 [0.5 credit] **Data Analytics and Information Systems for** Accounting

Data analysis in accounting, working with and making sense of big data using various data analysis tools. Specific topics include: data collection, cleaning. analyzing, visualization, and decision making in different areas of accounting.

Includes: Experiential Learning Activity Prerequisite(s): 1. BUSI 1401 (or BUSI 2400), and BUSI 3017 or BUSI 3007 with a grade of C- or higher in each, or 2. Enrolment in the Post-Baccalaureate Diploma in Accounting, and BUSI 3017 or BUSI 3007 with a grade of C- or higher in either.

Lecture three hours a week.

BUSI 3102 [0.5 credit]

Introduction to Human Resources Management

Human Resource Management function in large formal organizations. Topics include human resources planning, recruitment, selection, performance evaluation, career development and training, compensation and benefits and the role of the professional personnel manager. Prerequisite(s): second-year standing, and one of BUSI 2101, BUSI 2121, BUSI 2702, BUSI 3602, PSYC 2801.

Lectures three hours a week.

BUSI 3103 [0.5 credit] Introduction to Organization Theory

Macro-organization theory. Structuring of organizations in a complex global economy. Effects of the external environment, technology, culture and organizational goals on the structure, processes and effectiveness of the organization.

Prerequisite(s): second-year standing, and one of BUSI 2101, BUSI 2121, BUSI 2702, PSYC 2801. Lectures three hours a week.

BUSI 3104 [0.5 credit] **Managing Individual Performance**

Managing the performance of self and others. Topics include self awareness, motivation, leadership, communication, diversity, and creativity. Extensive use is made of self-assessments and experiential learning. Prerequisite(s): BUSI 2101, BUSI 2121, BUSI 2702, or PSYC 2801 (with a grade of C or higher in each). Lecture three hours a week.

BUSI 3105 [0.5 credit]

Managing and Motivating Teams

Principles of working in and managing teams. Topics include self-awareness, team formation, team development, team dynamics, team leadership and team motivation.

Prerequisite(s): BUSI 2101, BUSI 2121, BUSI 2702, or PSYC 2801 (with a grade of C or higher in each). Lecture three hours a week.

BUSI 3106 [0.5 credit]

Managing Conflict and Negotiation

Analysis of the sources and forms of conflict and effective approaches to managing conflict. Exploration of the effectiveness of various strategies of negotiations. Prerequisite(s): BUSI 2101, BUSI 2121, BUSI 2702, or PSYC 2801 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 3119 [0.5 credit]

Business and Environmental Sustainability

Examining concepts of environmental sustainability within the business context. Exploring the complex interdependency between organizations, society and the natural environment.

Prerequisite(s): third year standing. Lecture three hours a week.

BUSI 3204 [0.5 credit] Digital Marketing

Introduction and assessment of key new marketing tools and approaches, including internet marketing, relationship marketing, direct marketing; effective adoption and implementation of these tools and approaches across industries and organizations.

Prerequisite(s): BUSI 2204 or BUSI 2208 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 3205 [0.5 credit]

Marketing Communications

Promotion as communication process and marketing tool. Integrating advertising, direct/digital marketing, interactive media, sales promotion, public relations, personal selling through strategic planning (research, budgeting, organizing, creative and media strategy), execution, and campaign evaluation. Regulatory, ethical, social issues considerations.

Prerequisite(s): BUSI 2208 or BUSI 2204 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 3207 [0.5 credit] Marketing Research

Concepts essential for understanding and conducting applied marketing research. Methods for collecting, analyzing, and interpreting data relevant to marketing decision-making. Experience in research techniques through case studies, exercises and project. Includes: Experiential Learning Activity Precludes additional credit for BUSI 3100. Prerequisite(s): BUSI 2204 or BUSI 2208 (with a grade of C or higher in each), STAT 2601 or STAT 2606 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 3208 [0.5 credit]

Business-to-Business Marketing

Theories and practice of marketing in business-tobusiness markets with emphasis on high technology businesses, including strategic marketing management, buyer behaviour and competitive analysis, sales management, new product management, and international issues.

Prerequisite(s): BUSI 2204 or BUSI 2208 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 3209 [0.5 credit] Consumer Behaviour

Introduction to the application of psychological theories and methodologies to consumer behaviour. How consumer behaviour is shaped by internal influences. Topics include perception, learning, memory, motivation, affect, personality, the self, attitudes and decision-making. Precludes additional credit for BUSI 4206 (no longer offered).

Prerequisite(s): third-year standing, and BUSI 2204 or BUSI 2208 (with a grade of C or higher in each).

Lecture three hours a week.

BUSI 3210 [0.5 credit] Personal Selling

Provides an introduction to and application of the principles of personal selling for persons pursuing any vocation, as well as those aspiring to careers in Marketing. Introduces basic concepts of professional selling including: customer analysis, communication skills, effective openings and closings, and customer relations. Prerequisite(s): BUSI 2204 or BUSI 2208 with a grade of C- or higher.

Lecture 3 hours a week.

BUSI 3301 [0.5 credit]

Global Supply Chain Management

Introduction to management of global supply chain. Topics include strategies for planning and coordinating of all activities involved in procurement, conversion, and logistics in the global environment.

Precludes additional credit for BUSI 4303 (no longer offered).

Prerequisite(s): second-year standing, and BUSI 2301 (with a grade of C or higher), and STAT 2601 or STAT 2606 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 3305 [0.5 credit]

Distribution Channels and Logistics

In-depth examination of distribution channels and logistics; roles and interrelations in the achievement of marketing mix objectives and in creating competitive advantage. Channels design and management, managing logistics, warehousing, packaging and material handling, new trends in channels and logistics.

Prerequisite(s): third-year standing, and BUSI 2301 (with a grade of C or higher), and STAT 2601 or STAT 2606 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 3309 [0.5 credit] Project Management

Identification, selection, initiation, and organization of projects; risk assessment; project scheduling, performance monitoring and control, and termination. Emphases on foundations, principles and supporting techniques. Prerequisite(s): third-year standing, and STAT 2601 or STAT 2606.

Lecture three hours a week.

BUSI 3400 [0.5 credit] Database Design

Information management, database administration, Entity-Relationship Model, database development life cycle: planning, analysis, design, implementation,

and maintenance of database management systems. Construction of a database. Introduction to SQL, distributed databases, object-oriented databases, and

data warehousing.

Precludes additional credit for COMP 3005.

Prerequisite(s): BUSI 1401 or BUSI 2400 (with a grade of C or higher in each).

Lecture three hours and tutorial one hour a week.

BUSI 3401 [0.5 credit]

Applications Development for Online Environments

Analysis, design and implementation of electronic business systems. Topics include advanced object-oriented programming, advanced SQL programming, XML, using ASP.NET, MTS and SQL Server.

Precludes additional credit for BUSI 4401 (no longer offered).

Prerequisite(s): BUSI 2402 and BUSI 3400, or COMP 3005 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 3402 [0.5 credit]

Systems Analysis and Design

Methods of analysis of computer-based information systems. The systems development life cycle, planning, analysis, design, implementation and maintenance. Structured and object-oriented methods will be used. Use of a CASE tool.

Precludes additional credit for SYSC 3100, BUSI 3403, (no longer offered) and BUSI 3404 (no longer offered). Prerequisite(s): one of BUSI 1401, BUSI 2400, COMP 2404, SYSC 2004 (with a grade of C or higher in each).

Lecture three hours and tutorials one hour a week.

BUSI 3405 [0.5 credit] Enterprise Architecture

Exploration of the significance of cross-functional business processes in the context of e-business transformation. Includes process analysis and modeling techniques. Also considers the application of enterprise resource planning systems, workflow technologies, intranets, and extranets to facilitate process flows inside and outside the organization.

Prerequisite(s): BUSI 1401 or 2400 (with a grade of C- or higher).

Lecture three hours a week.

BUSI 3406 [0.5 credit] Business Analytics Principles

Evolution of Decision Support Systems. Decision Making. Business Intelligence. Foundation of Business Analytics. Lifecycle & Best Practices. Strategy, platforms and Architecture. Data Sensemaking. Model Development. Precludes additional credit for BUSI 4406. Prerequisite(s): BUSI 2401 and STAT 2601.

Lecture 3 hours a week.

BUSI 3434 [0.5 credit]

Data Visualization

Visual representation and presentation of data to facilitate understanding. This includes visual data exploration, perception, interpretation, and communication in exploratory and declarative situations. Practical skill development using current data visualization software. Prerequisite(s): BUSI 2401, STAT 2601.

Lecture three hours a week.

BUSI 3500 [0.5 credit] Applied Corporate Finance

An examination of the major issues in corporate finance and applied financial management. Topics include: introduction to portfolio theory, the capital asset pricing model, cost of capital, capital structure and dividend policy, lease financing, capital budgeting under uncertainty, mergers and consolidations.

Precludes additional credit for ECON 4052.

Prerequisite(s): BUSI 2501 or BUSI 2505 (with a grade of C+ or higher in each), and STAT 2601 or STAT 2559, and ECON 1001 and ECON 1002, and MATH 1009 or MATH 1052 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 3502 [0.5 credit]

Investments

Procedures and methods of investment analysis. Stock and bond markets. Government regulation of securities markets. Valuation of common stocks and fixed income securities. Options, warrants, convertibles and commodities.

Precludes additional credit for ECON 4052.

Prerequisite(s): BUSI 2501 or BUSI 2505 (with a grade of C+ or higher in each), and STAT 2601 or STAT 2559, and ECON 1001 and ECON 1002, and MATH 1009 or MATH 1052 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 3512 [0.5 credit] Derivatives

Derivative instruments and their use for speculation and hedging. Analysis of different markets where instruments trade, and their characteristics. Pricing models highlighted to determine how individuals and corporations can better manage risk; exotics and newer innovations. Precludes additional credit for BUSI 4512 (no longer offered).

Prerequisite(s): BUSI 2501 or BUSI 2505 (with a grade of C+ or higher in each), and STAT 2601 or STAT 2559, and ECON 1001 and ECON 1002, and MATH 1009 or MATH 1052 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 3600 [0.5 credit] Entrepreneurial Strategies

Within the changing environment, an examination of entrepreneurial strategies related to different functional areas for new ventures and small businesses.

Prerequisite(s): BUSI 2800 with a grade of C- or higher. Lecture three hours a week.

BUSI 3602 [0.5 credit]

Designing Organizational Systems: An Overview

Key models and theories of organizational strategy, structure, processes, effectiveness, and individual and group behavior in organizations. Organizational structure, goals, and effectiveness; leadership, motivation and job design

Precludes additional credit for BUSI 2101, BUSI 2702, BUSI 2121. No credit for students in degree programs offered by the Sprott School of Business. Prerequisite(s): third-year standing in the B.P.A.P.M.

Lecture three hours a week.

program.

BUSI 3611 [0.5 credit]

Managing the Family Enterprise

How family businesses are different, what makes them different and how to effectively manage these differences. Challenges arising from the tension between family and business pressures from governance, management and succession planning perspectives.

Prerequisite(s): third year standing, and BUSI 2018 or BUSI 1005 or BUSI 1002, and one of BUSI 2101, BUSI 2121, BUSI 2702. Lecture three hours a week.

BUSI 3629 [0.5 credit] Corporate Governance and Strategy

The role of governance in organizations. Mission and vision statements, values and objectives. Shaping, implementation and evaluation of corporate strategy. Management of risk and environmental analysis. Precludes additional credit for BUSI 4609 and BUSI 4709. No credit in B. Com.

Prerequisite(s): 1) Enrolment in the Post-Baccalaureate Diploma in Accounting, or BUSI 1001 and BUSI 1002, or equivalents. or 2) Enrolment in BIB, third-year standing, and BUSI 1004 or BUSI 1011, and BUSI 1005 or BUSI 2018, and permission of the School of Business. Lecture three hours a week.

BUSI 3701 [0.5 credit]

Practicum in International Business I

Students will engage in an approved international experience, abroad or within Canada, that fosters the development of a global mindset. This experience will allow students to integrate and apply the material learned in previous International Business courses. Includes: Experiential Learning Activity

Precludes additional credit for BUSI 4719 and GINS 3930.

Prerequisite(s): Third-year standing in BIB and permission of the Sprott School of Business. **Experiential Learning Activity**

BUSI 3702 [0.5 credit]

Practicum in International Business II

Students will engage in an approved international experience, abroad or within Canada, that fosters the development of a global mindset. This experience will allow students to integrate and apply the material learned in previous International Business courses.

Includes: Experiential Learning Activity

Precludes additional credit for BUSI 4719 and GINS 3931.

Prerequisite(s): third-year standing in BIB and permission of the Sprott School of Business. Experiential learning activity

BUSI 3703 [0.5 credit]

International and Comparative Management The management of large organizations spanning

national boundaries, including domestic firms with international markets, and multinational corporations. Difficulties of maintaining communication and control in international operations in disparate cultural settings. Prerequisite(s): second-year standing, and BUSI 2101 or BUSI 2702 (with a grade of C or higher

in each).

Lecture three hours a week.

BUSI 3704 [0.5 credit]

The Environment of International Business

Theories linking environmental factors and business strategy as a basis for study of some major factors and institutions shaping international business strategy. International trade patterns, regionalization, shifts in international finance, research and development and transnational data flows.

Prerequisite(s): Third-year standing, BUSI 2701 or BUSI 2702 or BUSI 2703.

Lecture three hours a week.

BUSI 3705 [0.5 credit]

International Buyer Behaviour

Behaviour of end-consumers, business and government buyers, and investors in the international context. National, cross-national, and subnational segments and behaviour differences. Adaptation vs. standardisation strategies in the context of socio-psychological, legal, technological, international procurement rules, and other constraints and opportunities.

Prerequisite(s): third-year standing, BUSI 2204 or BUSI 2208, and BUSI 2702 or BUSI 2101.

Lecture three hours a week.

BUSI 3706 [0.5 credit]

International Business Negotiations

Introduction to theory and practice of negotiation in the international business context. Analysis of techniques of conflict resolution and improving ways to reach agreements.

Prerequisite(s): second-year standing, and BUSI 2701 or BUSI 2702 (with a grade of C- or higher

Lecture three hours a week.

BUSI 3750 [0.5 credit] Intercultural Business Experiences

Apply intercultural skills and international business strategies and/or practices through a business-focused experiential exercise.

Prerequisite(s): BUSI 2750. Restricted to B.I.B. students who are participating in the year abroad. Online course.

BUSI 3800 [0.5 credit] Sprott Student Consulting I

An introductory experiential work environment in which students interact with real clients on a project. Various types of client projects are possible depending on the company and their goals/needs. Companies may be internal (i.e. Carleton, Sprott), or external (i.e. not for profit, for profit, start-ups).

Includes: Experiential Learning Activity Prerequisite(s): Permission of the Sprott School of Business.

Lecture three hours and tutorial one hour a week.

BUSI 3810 [0.5 credit] **Business Development**

Business development, growth and expansion through financing activities and new customer acquisition. Prerequisite(s): BUSI 2800 with a grade of C- or higher. Lecture three hours a week.

BUSI 3820 [0.5 credit]

Practicum in Business Design

Students will apply entrepreneurial concepts and engage in designing an entrepreneurial project. Students will prepare in groups a business plan, including in-depth analysis and recommendations.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing, and BUSI 2800 with a grade of C- or higher.

Lecture three hours a week.

BUSI 3995 [0.0 credit] Employability Passport II

An advanced course in the knowledge and tools required for a career in Business.

Includes: Experiential Learning Activity

Prerequisite(s): BUSI 1995.

Participation in employability events and initiatives

throughout the year.

BUSI 3999 [0.0 credit] Co-operative Work Term

This course covers the deliverables associated with the co-op work term such as the site visit, work term report submission and employer evaluation.

Includes: Experiential Learning Activity

Prerequisite(s): This course is for students on a university approved co-op work term.

BUSI 4003 [0.5 credit]

Accounting: Relevance and Influence

This course focuses on the evolution and impact of accounting theory on decision making and standard setting. Students will develop an ability to critically evaluate current and proposed accounting practices and their impact on decision making within a broad conceptual framework.

Precludes additional credit for BUSI 4000 (no longer offered).

Prerequisite(s): BUSI 2002 and BUSI 2501 and STAT 2601 with a grade of C- or higher in each. Lectures three hours a week.

BUSI 4005 [0.5 credit] Taxation II

An intensive review of federal income tax laws and regulations as significant elements in the planning and decision making process of taxable Canadian corporations. Emphasis on the tax planning function of corporate management and the associated accounting and reporting aspects.

Precludes additional credit for BUSI 4015.

Prerequisite(s): BUSI 3005 with a grade of C- or higher. Lecture three hours a week.

BUSI 4008 [0.5 credit]

Management Control Systems

Focuses on understanding control systems that can be used to implement firm strategies and oversee the firm. Integrates relevant issues from other functional areas: corporate governance, strategic uses of cost management, budgeting, internal controls, and performance evaluation systems in managerial planning and control.

Precludes additional credit for BUSI 3018 and BUSI 4018. Prerequisite(s): fourth-year standing in B.Com. or B.I.B. or enrolment in the Post-Baccalaureate Diploma in Accounting with at least 2.0 credits completed in the program.

Lecture three hours a week and 1 hour tutorial.

BUSI 4011 [0.5 credit]

Advanced Financial Reporting

Application and measurement of non-routine accounting transactions.

Precludes additional credit for BUSI 2001, BUSI 2002, and BUSI 3001.

Prerequisite(s): BUSI 3011 (with a grade of C- or higher). Lectures three hours a week.

BUSI 4015 [0.5 credit]

Advanced Taxation Concepts

Application and measurement of non-routine or complex taxation transactions.

Precludes additional credit for BUSI 2005, BUSI 3005, and BUSI 4005.

Prerequisite(s): BUSI 3015 (with a grade of C+ or higher).

Lectures three hours a week

BUSI 4017 [0.5 credit] Advanced Auditing

Advanced application of audit methodology and assurance engagements.

Prerequisite(s): BUSI 3007 or BUSI 3017 (with a grade of C+ or higher).

Lectures three hours a week

BUSI 4018 [0.5 credit]

Advanced Cost Management and Decision Making

Strategic uses of cost information, budgeting and performance evaluation systems in managerial planning and control.

Precludes additional credit for BUSI 3008 and BUSI 4008. Prerequisite(s): BUSI 3018 (with a grade of C+ or higher).

Lectures three hours a week

BUSI 4020 [0.5 credit] Accounting Capstone

Integration of a variety of accounting disciplines. Experiential learning through cases and/or simulations that integrates financial reporting, managerial accounting, taxation concepts, assurance concepts, and data analytics. Accounting, taxation, and/or data analytics software may be used to enhance practical application of theoretical concepts.

Prerequisite(s): BUSI 3011, BUSI 3015, BUSI 3017, BUSI 3018, and BUSI 3040 (with a grade of C- or better in each).

Lectures three hours a week

BUSI 4104 [0.5 credit]

Strategic Human Resources Management

Systems, strategies and practices used to effectively leverage human capital in organizations. How to think strategically about managing human assets, and what must be done to successfully implement these systems, strategies and practices.

Prerequisite(s): BUSI 3102 and BUSI 3103 (with a grade of C- or higher in each).

Lecture three hours per week.

BUSI 4105 [0.5 credit] Managing Change

An overview of current thinking about change management. Topics covered include understanding the forces for and barriers to change, diagnosing the environment around change and implementing change. Prerequisite(s): third-year standing, and one of BUSI 2101, BUSI 2702, BUSI 3602, PSYC 2801 (with a grade of C- or higher in each).

Lectures three hours a week.

BUSI 4108 [0.5 credit] Organizational Learning

Contemporary training and development challenges facing individuals, organizations, and communities and the role of information technology in enhancing individual and collective skills development, capabilities, core competencies, intellectual capital and competitiveness. Prerequisite(s): BUSI 3103 or BUSI 3602 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 4111 [1.0 credit]

Training and Development

Emphasizes contingency approach to training and development; relevant to organizations of all sizes and resource capacities. Effective training and development is conceptualized as a process that integrates extensive front and back-end planning, implementation, and evaluation activities.

Prerequisite(s): third-year standing, and one of BUSI 2101, BUSI 2121, BUSI 2702 (with a grade of B- or higher in each), and permission of the Sprott School of Business.

Lecture three hours and tutorial one hour per week.

BUSI 4112 [0.5 credit] Organizational Leadership

Critical examination of theories of leadership and trends in contemporary research; discussion of practical methods for building leadership capacity.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing, and one
of BUSI 2101, BUSI 2702, BUSI 3602, PSYC 2801 (with a
grade of C- or higher in each).
Lecture and field work as needed.

BUSI 4117 [1.0 credit] Creative Thinking

Increases student skills in areas beyond technical expertise, with a focus on the importance of fluidity, risk taking, and idea generation. Emphasis on creativity as a process, with exposure to various techniques and

concepts including Design Thinking at multiple levels (individual, group, organization).
Includes: Experiential Learning Activity

Precludes additional credit for BUSI 3117B taken prior to 2020/21.

Prerequisite(s): third-year standing, and BUSI 2101 or BUSI 2702 (with a grade of C- or higher in each), and permission of the Sprott School of Business. Lecture three hours a week.

BUSI 4120 [0.5 credit]

Environmental Sustainability Management

This course involves guest lectures, class discussions and group assignments evaluating the role of business in environmental problems. The course will delve into current conundrums of the role of business models to mitigate harm and adapt to change in search for solutions to environmental issues.

Prerequisite(s): BUSI 3119 and fourth-year standing. Restricted to BCom, BIB and students registered in any of Sprott's Minor in Business offerings. Lecture three hours a week.

BUSI 4129 [0.5 credit] Managing the Arts

Challenges of managing arts organizations with emphasis on the changing environment of arts consumption and funding. Tensions arising from blending artistic and aesthetic dimensions with functional considerations when judging organizational and personal issues form a continuing theme.

Prerequisite(s): third year standing. Also offered at the graduate level, with different requirements, as MGMT 5129, for which additional credit

is precluded.

Lecture three hours a week.

BUSI 4201 [0.5 credit] Marketing Metrics

An overview of essential marketing metrics used for enhancing marketing decisions. The course consists of seven core modules: share metrics, margins and profits, pricing, product and portfolio management, sales force management, promotion profitability, and customer profitability.

Prerequisite(s): BUSI 2018 (or BUSI 1005) and BUSI 2208.

Lecture three hours a week.

BUSI 4203 [0.5 credit] Marketing In Not-for-Profit Organizations

Theories and practices of marketing in not-for-profit organizations including government. Similarities and differences between marketing in not-for-profit and for-profit organizations, and the key issues faced by marketers in developing marketing strategies in not-for-profit organizations.

Prerequisite(s): third-year standing, and BUSI 2204 or BUSI 2208 (with a grade of C or higher in each).

Lecture three hours a week.

BUSI 4205 [0.5 credit] International Marketing Strategy

The marketing function in international markets from a strategic and managerial perspective. Environments of foreign markets in relation to marketing research, international branding and positioning, and product, price, distribution, and communication strategies. International expansion methods and foreign market evaluation and selection.

Prerequisite(s): third-year standing,

and BUSI 2204 or BUSI 2208 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 4208 [0.5 credit] Marketing Management

In depth analysis and applications of the managerial aspects of marketing. Marketing strategy development and implementation theory and practice.

Prerequisite(s): third year standing, BUSI 2208, and one of BUSI 3205 or BUSI 3207 (with a grade of C or higher in each).

Lecture three hours a week.

BUSI 4209 [0.5 credit] Consumer Culture Theory

This course takes a socio-cultural perspective towards consumption and consumers. A range of interpretive research methods are used throughout the course to allow students to better understand how various cultural, social, historical, and institutional forces both shape and are shaped by consumers and consumption.

Precludes additional credit for BUSI 4206 (no longer offered).

Prerequisite(s): third year standing, and BUSI 2208 or BUSI 2204 (with a grade of C— or higher in either). Lecture three hours a week.

BUSI 4211 [0.5 credit] Sales Management

This course explores the strategic role of sales management within organizations, focusing on developing and implementing effective sales strategies, managing and motivating sales teams, and leveraging technology to optimize sales processes.

Prerequisite(s): BUSI 2204 or BUSI 2208 with a grade of C- or higher.

Lecture three hours a week.

BUSI 4219 [0.5 credit] Sustainability Marketing

An overview of the roles of marketing in a sustainable society: advancing organizations' economic success while creating positive impacts on the environment and society; promoting consumers' sustainable lifestyle; advocating institutional change to facilitate sustainable production and consumption.

Includes: Experiential Learning Activity

Prerequisite(s): 3rd year standing. Restricted to BCom, BIB and students registered in any of Sprott's Minor in Business offerings.

lecture three hours a week

BUSI 4229 [0.5 credit]

Marketing in the Arts and Culture Sectors

Advanced study of marketing within the arts and culture sectors. Facilitates sophisticated understanding of the knowledge and skills required for marketing managers to respond to changing market environments in order to bring arts and culture offerings to their target audiences. Prerequisite(s): third year standing,

and BUSI 2204 or BUSI 2208 (with a grade of C or higher in each).

Also offered at the graduate level, with different requirements, as MKTG 5229, for which additional credit is precluded.

Lecture three hours a week.

BUSI 4300 [0.5 credit]

Global Operations and Supply Chain Management

Introduction to management of global operations and supply chain. Topics include strategies for planning and coordinating of all operations and supply chain activities involved in procurement, conversion, and logistics in the global environment.

Precludes additional credit for BUSI 2301 and BUSI 3301. Prerequisite(s): STAT 2601 with a grade of C- or higher. Lectures three hours a week.

BUSI 4301 [0.5 credit]

Artificial Intelligence and Business Decision Models

This course lays the foundations of Artificial Intelligence (AI) for business decision models using two currently dominant frameworks: Machine Learning and Deep Learning. This course discusses how to profit from AI through business model innovation in business domains including accounting, finance, marketing and supply chain.

Includes: Experiential Learning Activity
Precludes additional credit for BUSI 2300, ECON 4005.
Prerequisite(s): third-year standing, BUSI 2401, and
STAT 2601.

Lecture three hours and lab one hour per week.

BUSI 4302 [0.5 credit] Management of Quality

Quality concepts and methods surrounding the definition, mapping, implementation, improvement of business processes in organizations and global supply chains. Prerequisite(s): third-year standing, BUSI 2301 (with a grade of C or higher), and STAT 2601 or STAT 2606 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 4304 [0.5 credit]

Procurement and Contracting

Core supply chain procurement processes in the private and public sectors involved in the acquisition of goods and services, including sourcing, purchasing, contracting, supplier collaboration and relationship development and management. Emphasis on concepts, principles, practices, and techniques.

Prerequisite(s): third-year standing, and BUSI 2301 (with a C grade or higher).

Lecture three hours a week.

BUSI 4308 [0.5 credit]

Simulation Modeling and Analytics

Concepts of computer simulation for predictive and prescriptive analytics through case studies, worked examples and hands-on projects. Emphasizes static simulations with spreadsheets, discrete-event, and agent-based simulations with specialized software. Input modeling, model design, experimental design, analysis of outputs.

Includes: Experiential Learning Activity Precludes additional credit for BUSI 3308.

Prerequisite(s): third-year standing; STAT 2601 or STAT

2606 with a grade of C- or higher.

Lecture two hours and tutorial two hours a week.

BUSI 4331 [0.5 credit]

Industry 4.0 Technologies and Applications

This course shows how Industry 4.0 employs the IoT and AI technologies to achieve self-thinking supply chains. It demonstrates the use of Industry 4.0 in the transformation to smart industries. Lectures, demonstrations and handson exercises allow students to design, deploy and manage custom IoT solutions.

Precludes additional credit for BUSI 4431 (no longer offered).

Prerequisite(s): third year standing, and BUSI 2301 (with a grade of C or higher).

Lecture three hours a week and lab one hour a week.

BUSI 4400 [0.5 credit]

IS Management and Strategy

Comprehensive treatment of current trends and management issues associated with information systems within organizations of local, national and international scope. Issues and techniques of information systems planning, administration, resource management and new technology adoption. Case studies are used. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing, and BUSI 1401 or BUSI 2400 (with a grade of C- or higher).

Lecture three hours a week.

BUSI 4404 [0.5 credit]

IT Infrastructure

Challenges and issues managers face in assembling the infrastructure for IT service delivery. IT Service levels, data communications, networks (LAN, MAN, WAN, wireless), internetworking, SOA, web services, SaaS, server and storage virtualization, network security, business continuity and disaster recovery.

Prerequisite(s): third-year standing, and BUSI 1401 or BUSI 2400 (with a grade of C- or or higher each). Lecture three hours a week.

BUSI 4407 [0.5 credit] Business Analytics Methods

Frameworks and quantitative methods used in predictive and prescriptive business analytics for decision-making with less risk and better outcomes. Practical applications with various analytical tools across a range of industries. Data integration; model formulation, implementation, solutions, and managerial insights.

Prerequisite(s): Third-year standing, BUSI 3406 (with a grade of C or higher), and STAT 2602.

Lecture two hours and lab two hours a week.

BUSI 4408 [0.5 credit] Social Analytics

Covers the process, tool and techniques necessary to acquire, clean and analyze text that has been generated on social platforms. Social network analysis, sentiment analysis, topic extraction, co-occurrence analysis. Prerequisite(s): third year standing, BUSI 1401 or BUSI 2400, and BUSI 2208, and STAT 2601 or STAT 2606. Restricted to students enrolled in B.Com, BIB, and the B.Econ Economic Data Science Concentration. Lecture three hours a week.

BUSI 4410 [0.5 credit] Responsible Business Analytics

Values in Technology, Data Governance, Data Anonymization and its limits, Ethical issues in HR and Talent Analytics, Disinformation, Misinformation, and Fake News, Bias & Fairness, Privacy, consent, and surveillance, Algorithm Colonialism, Legal Frameworks, The Nerd revolution.

Prerequisite(s): Fourth-year standing and BUSI 2401. Lecture 3 hours a week.

BUSI 4414 [0.5 credit] Capstone in Business Analytics

This is a capstone course for the Business Analytics concentration. The objective of this course is to be the concentration's culminating course allowing students to undertake a major BA project, while refining their knowledge by examining a set of advanced/specialized topics.

Prerequisite(s): Fourth-year standing in Business Analytics concentration/stream, and successful completion of all 3000-level courses in the Business Analytics concentration/stream requirement.

Lecture 3 hours a week.

BUSI 4500 [0.5 credit] Advanced Corporate Finance

An in-depth examination of some of the major theoretical issues in corporate finance. This course requires analyses and presentations of both articles from the finance literature and case studies.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year
standing, BUSI 3500, BUSI 3502, BUSI 3512 (with
a grade of C-or higher in each), and STAT 2602 or
STAT 2607 (with a grade of C- or higher in each).
Lecture three hours a week.

BUSI 4502 [0.5 credit] Portfolio Management

Analysis of investment requirements for individuals and institutional investors: liquidity, risk and return; portfolio design, construction, management and control; performance measurement; capital market theory. Prerequisite(s): fourth-year standing, BUSI 3500, BUSI 3502, and BUSI 3512 (with a grade of C- or higher in each), and STAT 2602 or STAT 2607 (with a grade of C- or higher). Lecture three hours a week.

BUSI 4503 [0.5 credit] Applied Portfolio Management

Participants of the Sprott Student Investment Fund will be exposed to equity research, analysis, valuation, and portfolio composition. The course allows fund members to fully understand stock selection and fund management, and expose them to the methods and techniques used by industry.

Includes: Experiential Learning Activity
Prerequisite(s): BUSI 3502 and permission of the Sprott
School of Business.
Workshops three hours a week.

BUSI 4504 [0.5 credit] International Finance

Management of corporate finance as it is affected by the requirements of international business. Issues related to international acquisitions, global investments, volatile exchange rates and hedging techniques. Role of international markets in financing corporate activity. Precludes additional credit for BUSI 3504 (no longer offered) and BUSI 3505 (no longer offered). Prerequisite(s): BUSI 2501 or BUSI 2505 with a grade of C- or higher in each.

Lecture three hours a week.

BUSI 4505 [0.5 credit]

Global Financial Markets and Institutions

Comprehensive view of the world's financial markets and institutions. The primary focus will be on the purpose and practice of financial institutions, and the specifics of the financial instruments available to the firm and investor. Prerequisite(s): BUSI 2501 or BUSI 2505 (with a grade of C+ or higher in each), and STAT 2601 or STAT 2606 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 4510 [0.5 credit] Mergers and Acquisitions

The theory and practice of mergers and acquisitions; the best ways to analyze, design and implement mergers and acquisitions transactions. A highly practical planning-based approach to managing the acquisition process will be employed.

Prerequisite(s): BUSI 3500 and BUSI 3502 (with a grade of C- or higher in each), and STAT 2602 or STAT 2607 (with a grade of C- or higher in each). Lecture three hours per week.

BUSI 4511 [0.5 credit] Fixed Income Analysis

Valuation of fixed income securities and interest rate derivatives including bonds, mortgage- and asset-based securities. Analytic tools used in bond portfolio and interest rate risk management including yield curve construction, duration and convexity, and term structure models. Prerequisite(s): BUSI 3502 and BUSI 3512 (with a grade of C- or higher in each), and STAT 2602 or STAT 2607 (with a grade of C- or higher in each). Lecture three hours a week.

BUSI 4601 [0.5 credit] Business Ethics

Use of ethical reasoning to analyze business decisions. The ethical content of these decisions. The role of ethics in business situations. Practice in ethical reasoning. Major ethical systems.

Precludes additional credit for BUSI 4705.

Prerequisite(s): fourth-year standing in B.Acc. or B.Com. Note that B.Com. concentration in International Business students require BUSI 4705.

Lectures three hours a week.

BUSI 4607 [0.5 credit]

Management of Technology and Innovation

Integration of technology and strategy; design of technological strategy; development of new business around new technology; and management of corporate research and development, including pre-competitive consortia.

Prerequisite(s): third-year standing, and BUSI 2204 or BUSI 2208 (with a grade of C- or higher in each).

Lecture three hours a week.

BUSI 4608 [0.5 credit] Canadian Business History

The place of business in Canadian society, economics and politics. The internal dynamics of Canadian business (organization, strategy, the rise of the manager), and its external implications (competition, foreign investment, business- government relations).

Also listed as HIST 3205.

Prerequisite(s): fourth-year standing in B.Com. or B.I.B. Lectures three hours a week.

BUSI 4609 [0.5 credit] Strategic Management

Analysis and evaluation of the organization's corporate and business strategies; integration and synthesis of knowledge acquired in the program by application of acquired functional skills to strategic decision making. Precludes additional credit for BUSI 3629, BUSI 4709. Prerequisite(s): At the time of registration students must have fourth-year standing in B.Acc. or B.Com., as well as successful completion of all 2000- and 3000- level courses in the Major requirement, normally completed within the last 10 years.

Lectures three hours a week.

BUSI 4704 [0.5 credit]

The Business Environment in Europe

The economic, political, legal, and cultural environment for doing business in the European Union and other regions in Europe. Patterns of foreign trade and investment, market characteristics, science and technology, regulation and European integration, and business culture.

Also listed as EURR 4704.

Precludes additional credit for EURR 4006 (no longer offered), BUSI 4604 (no longer offered).

Prerequisite(s): third-year standing.

Seminar three hours a week.

BUSI 4705 [0.5 credit]

Ethics and Cross-cultural Interaction

Perceptions and behaviors that characterize interactions among individuals from various cultural backgrounds, with emphasis on ethical issues that may arise when business crosses cultural boundaries. Various systems, both organizational and individual, for dealing with contrasting expectations are discussed.

Precludes additional credit for BUSI 4601.

Prerequisite(s): fourth-year standing in B. Com. (International Business Concentration) or B.I.B., and BUSI 2702.

Lecture three hours a week.

BUSI 4706 [0.5 credit]

International Human Resource Management

Theoretical and process issues in the recruitment, selection, training, evaluation and repatriation of personnel in multi-country organizations. Issues are examined from the perspective of organizations, expatriates and local employees of multinational firms.

Prerequisite(s): third-year standing, and BUSI 3102 or BUSI 2702.

Lecture three hours a week.

BUSI 4707 [0.5 credit] Regionalism and Globalization

Trends in globalization versus supra- and sub-national regionalism. Role of international institutions (e.g. OECD, WTO). Strategy adaptation and integration within and across trade blocs (e.g. NAFTA, EU, Mercosur, ASEAN). Strategies for sub-national markets with similarities across different countries.

Prerequisite(s): third-year standing in B.Com., B.I.B., or Minor in Business, and BUSI 2702. Lectures three hours a week.

BUSI 4708 [0.5 credit]

International Expansion and Operations

Internationalization process. Methods of international expansion including exporting, greenfield investment, acquisition, joint venture, and licensing. Theories of international market selection, investment location, and market service.

Prerequisite(s): fourth-year standing, and BUSI 2702 or BUSI 2101.

Lecture three hours a week.

BUSI 4709 [0.5 credit]

Strategic Management for International Business

Development and implementation of strategies within and across international markets. Emphasis on developing strategic perspectives that incorporate the environment, the state of the industry, and the capabilities of the firm. Integrates skills, concepts and theories learned in functional areas.

Precludes additional credit for BUSI 3629, BUSI 4609. Prerequisite(s): fourth-year standing in B.Com. (International Business Concentration) or B.I.B., and successful completion of all 2000- and 3000-level courses in the Major requirement, normally completed within the last 10 years.

Lectures three hours a week, tutorial one hour a week.

BUSI 4710 [0.5 credit] International New Ventures

Challenges facing entrepreneurs in the creation and growth of competitive knowledge-based new international ventures or 'born globals'. Identification of opportunities abroad, strategies and logistics, sourcing, international deal making and business models.

Prerequisite(s): third-year standing, and BUSI 2702. Lecture three hours a week.

BUSI 4717 [0.5 credit]

Managing Globalization in Emerging Economies

Critical examination of the managerial and institutional issues of globalization from the perspectives of emerging economies. Indigenous and international institutions' role in the evolution of a competitive and inclusive global economy and society. Discerning lessons of experience for newly globalizing societies.

Precludes additional credit for BUSI 4902 (no longer offered).

Prerequisite(s): fourth year standing in B.Com, BIB, or Minor in Business, ECON 1001 and ECON 1002 (or ECON 1000).

Lectures three hours a week.

BUSI 4719 [0.5 credit]

Practicum in International Business

Students will engage in an approved international experience, abroad or within Canada (can include SSCG), that fosters the development of a global mindset. This experience will allow students to integrate and apply the material learned in previous International Business courses.

Includes: Experiential Learning Activity

Precludes additional credit for BUSI 3701, BUSI 3702.

Prerequisite(s): third-year standing in B.Com.

International Business concentration and permission of the

Sprott School of Business.

BUSI 4729 [0.5 credit] International Strategy

Provides theoretical insights and pragmatic tools that address strategic decisions concerning cross-border business activities. Examines how the multinational firm creates competitive advantage across countries and what principles and constraints guide strategic choices in various parts of the organization.

Prerequisite(s): Fourth-year standing in B.I.B or B.Com, and successful completion of all 2000-and 3000-level courses in the Major requirement, normally completed within the last 10 years.

Lectures three hours a week, tutorial one hour a week.

BUSI 4750 [0.5 credit]

Current Topics in International Management

This course explores current and emerging issues impacting international and intercultural management. Topics will vary based on student interests and current trends. The focus will be on identifying, critically analyzing, and developing perspectives on emerging issues to prepare students for the future.

Prerequisite(s): fourth-year standing.

Lecture three hours a week.

BUSI 4800 [0.5 credit] Sprott Student Consulting II

An advanced experiential work environment in which students interact with real clients on a project. Various types of client projects are possible depending on the company and their goals/needs. Companies may be internal (i.e. Carleton, Sprott), or external (i.e. not for profit, for profit).

Includes: Experiential Learning Activity

Prerequisite(s): Permission of the Sprott School of

Business.

Also offered at the graduate level, with different requirements, as BUSI 5997, for which additional credit is precluded.

Significant industry/project/service consultancy exposure.

BUSI 4810 [0.5 credit]

Practicum in Business Creation

Students apply concepts and engage in groups to implement the design of an entrepreneurship project per their business plan developed in BUSI 3820. The projects provide opportunities for experiential learning.

Includes: Experiential Learning Activity

Prerequisite(s): BUSI 3820. Lectures three hours per week.

BUSI 4901 [0.5 credit]

Topics in Business I

A selected topics course may be offered. Topics may vary. Consult the School's website for available topics and prerequisite information. Eligibility for this course to serve as an option for specific concentrations is to be established by the School.

Prerequisite(s): Vary based on section. Please refer to sprott.carleton.ca/registration for section specific prerequisites.

Lecture three hours a week.

BUSI 4902 [0.5 credit] Topics in Business II

A selected topics course may be offered. Topics may vary. Consult the School's website for available topics and prerequisite information. Eligibility for this course to serve as an option for specific concentrations is to be established by the School.

Prerequisite(s): Vary based on section. Please refer to sprott.carleton.ca/registration for section specific prerequisites.

Lecture three hours a week.

BUSI 4904 [1.0 credit] Directed Studies I

Reading course on select topics. Students interested in pursuing this course need to contact a faculty member to discuss a proposed directed study.

Prerequisite(s): fourth-year standing in B.Com. or B.I.B. and permission of the School of Business.

BUSI 4905 [0.5 credit] Directed Studies II

Reading course on select topics. Students interested in pursuing this course need to contact a faculty member to discuss a proposed directed study.

Prerequisite(s): fourth-year standing in B.Com. or B.I.B. and permission of the School of Business.

BUSI 4906 [1.0 credit]

Research Project for Business

Provides students with opportunity to conduct research in their area of interest and present the research in an undergraduate thesis format. Conducted under the supervision of a faculty advisor from Sprott, with the specific deliverable determined by Supervisor and student, and approved by Sprott School.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in B.Com. or B.I.B.

and permission of the School of Business.

Canadian Studies (CDNS)

Canadian Studies (CDNS) Courses

CDNS 1001 [0.5 credit]

Introduction to the Study of Canada

Introduction to interdisciplinary Canadian Studies. Topics may include: Canadian, Québecois and Indigenous lenses; colonialism, migration, settlement; gender, racialization and sexuality; social movements; place, space, and nation; and political economy and culture. May include field trips.

Precludes additional credit for CDNS 1000 (no longer offered).

Lectures/groups three hours a week.

CDNS 1101 [0.5 credit]

Power, Places and Stories in/of Odawang/Ottawa

Exploration of Odawang/Ottawa as a settler-colonial border city built on unceded Algonquin territory and tensions between the national, global and local in Odawang/Ottawa. May include field trips.

Lecture/groups three hours a week.

CDNS 2000 [0.5 credit] **Debating Canada**

Exploration of debates about Canada. Topics may include: Indigenous dispossession, genocide, capitalism, resource extraction; racism; patriarchal oppression; inequality; multiculturalism; and the politics of location, language and memory.

Prerequisite(s): second-year standing or permission of the

Lectures/groups three hours a week.

CDNS 2001 [0.5 credit] Canada and Global Issues

Examination of the role of the Canadian state and other actors in addressing global issues. Topics may include: human rights; refugees and migrant workers; peacekeeping; climate change; humanitarian assistance; Indigenous rights; and global health.

Precludes additional credit for CDNS 1102 (no longer offered).

Prerequisite(s): second-year standing or permission of the School.

Lectures/groups three hours a week.

CDNS 2002 [0.5 credit]

Language, Culture, and Power

Study of the relationship between language and power. politics, identity and culture in Canada. Consideration is given to: language policies; non-official and official language minorities; and factors of region, class and social mobility.

Prerequisite(s): second-year standing or permission of the School.

Lectures/groups three hours a week.

CDNS 2210 [0.5 credit]

Introduction to the Study of Culture in Canada

Examination of key cultural myths, diverse genres, spaces, institutions, practices and critical approaches in Canada.

Prerequisite(s): second-year standing or permission of the School of Indigenous and Canadian Studies.

Lectures/groups three hours a week.

CDNS 2300 [0.5 credit]

Nationalism and Multiculturalism in Canada

Examination of nationalism, colonialism, racialization, ethnicity, multiculturalism and questions of belonging, citizenship and inequality in contemporary and historical

Prerequisite(s): second-year standing or permission of the School.

Lectures/groups three hours a week.

CDNS 2301 [0.5 credit]

Immigrants, Migrants and Diasporas

Study of historical and contemporary Canadian immigration and emigration issues. Topics may include: dynamics of diasporic communities in Canada and Québec; Canadians abroad; and issues of citizenship and belonging.

Prerequisite(s): second-year standing or permission of the School.

Lectures/groups three hours a week.

CDNS 2302 [0.5 credit] Land, Water, Capitalism

Examination of politics and economics of land, water, and power. Topics may include: the study of labour, migrant workers, capitalist extraction; environmental racism and health: and Indigenous dispossession and resistance. Also listed as INDG 2302.

Prerequisite(s): second-year standing or permission of the School.

Lectures/groups three hours a week.

CDNS 2400 [0.5 credit]

Heritage Places and Practices in Canada

An examination of heritage as the built environment, cultural landscapes, and intangible heritage. Topics may include: decolonizing memory, identity and place; heritage histories, policies, values and stakeholders; emerging issues such as climate change, mass tourism and urban development.

Prerequisite(s): second-year standing or permission of the

Lectures/groups three hours a week.

CDNS 2510 [0.5 credit] Memory and History in Québec

Pivotal moments, important debates and crises, cultural institutions and practices, the politics of history and memory, and contemporary issues in Québec. Precludes additional credit for CDNS 2511, FINS 2510 (no

longer offered), FINS 2511 (no longer offered). Prerequisite(s): second-year standing or permission of the School.

Lectures/groups three hours per week.

CDNS 3000 [0.5 credit]

Situating Research in Indigenous Studies and **Canadian Studies**

An examination of the underlying research design and methods of selected works for Indigenous Studies and for Canadian Studies in order to reflect on the political, ethical and intellectual consequences, possibilities and limitations of a variety of disciplinary and interdisciplinary research practices.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or permission of the

Seminar three hours a week.

CDNS 3020 [0.5 credit]

Practicing Research in Indigenous Studies and **Canadian Studies**

Experiential engagement with disciplinary, interdisciplinary and creative research theory and practice. Approaches may include: mixed methods: autoethnography: researchcreation; collaboration; and community-based research. Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 3400 [0.5 credit]

Feminist and Queer Canadas

An examination of the dynamics of feminist and queer social movements and activism. Topics may include: challenges to the regulation of bodies and sexualities; the normalization of patriarchal violence and inequality; access and recognition; and intersectionality. Precludes additional credit for WGST 3400 (no longer

Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 3550 [0.5 credit]

Diversity in Québec and Francophone Canada

The study of the historical, cultural, social, and political diversity of French-speaking Canada. Topics may include: Francophone diasporic communities; multiculturalism, interculturalism; (settler) colonialism; and the politics of culture and language.

Precludes additional credit for CDNS 2500, FINS 3550 (no longer offered).

Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 3560 [0.5 credit] **Black Studies in Canada**

Theories and methods of Black Studies in Canada. Topics may include: the examination of regional, national, transnational histories; structures of anti-Blackness; racial capitalism; and identities, experiences and cultures of Black Canada.

Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 3570 [0.5 credit]

Racialization and Resistance

Deconstructing the category of 'race' and understanding the experiences and impacts of racialization and systemic racism in Canada and Québec. Topics may include: inequality, exploitation, poverty, profiling, incarceration; cultures of resistance; decolonizing anti-racist movements; and anti-racism as critique and affirmation.

Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 3620 [0.5 credit] Canada-US Relations

An examination the Canada-US relationship, including contemporary policy issues that define that relationship. Topics covered may include: the economy; culture; defence; foreign policy; diplomacy; transnational struggles; and borderlands and the context of Turtle Island. Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 3700 [0.5 credit]

Constructing and Contesting Memory in Canada

An exploration of conflicts about memory and commemoration in Canada, including: monuments and heritage sites; cultural heritage and artistic expressions; the media; education; language and cultural revitalization; and the politics of memory and forgetting.

Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 3901 [0.5 credit]

Selected Topics in Canadian Studies

Study of a specific topic or area related to Canadian Studies. Topics vary from year to year.

Prerequisite(s): second-year standing or permission of the School.

Seminar three hours a week.

CDNS 4011 [0.5 credit] Activism in Odawang/Ottawa

Examination of struggles and activism in and about Ottawa/Odawang.

Prerequisite(s): third-year standing or permission of the School.

Seminar three hours a week.

CDNS 4012 [0.5 credit]

Settler Colonialism on Turtle Island

Exploration of the theories, practices, and history of settler colonialism on Turtle Island. Topics may include: racialization; settlement and migration; white supremacy; heteropatriarchy; land and Indigenous relations; and contemporary struggles and decolonization.

Prerequisite(s): third-year standing or permission of the

Seminar three hours a week.

CDNS 4020 [0.5 credit]

Injury, Memory, and Redress in Canada

Examination of the politics of redress and (re)conciliation in Canada. Topics include the ways in which historic wrongs, trauma and injury are (re)imagined and memorialized.

Prerequisite(s): third-year standing or permission of the School.

Seminar three hours a week.

CDNS 4400 [0.5 credit]

Space, Landscape and Identity in Canada

Explorations of cultural landscapes and competing constructions of space. Topics may include: settler-colonial space-making, whiteness and space, diasporic space, geographies of gender and sexuality, and different understandings of nature/culture.

Prerequisite(s): third-year standing or permission of the School.

Also offered at the graduate level, with different requirements, as CDNS 5400, for which additional credit is precluded.

Seminar three hours a week.

CDNS 4403 [0.5 credit]

Heritage Conservation and Sustainability in Canada

Theory, principles, practices and policy of heritage conservation in Canada and globally. Focus on heritage conservation and its connections with environmental, social, and economic sustainability.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing or permission of the School.

Also offered at the graduate level, with different requirements, as CDNS 5403, for which additional credit is precluded.

Seminar three hours a week.

CDNS 4500 [0.5 credit]

Global Canada

Examining Canada's place and activities on the global stage. Topics may include: Canadian multinationals; Canadian foreign policy, cultural diplomacy, and corporate globalization; advocacy for Indigenous, environmental, women's, refugees' and children's rights; racial capitalism and im/migration; security; and resistances to the global. Precludes additional credit for CDNS 3301(no longer offered).

Prerequisite(s): third-year standing or permission of the School.

Seminar three hours a week.

CDNS 4510 [0.5 credit] Special Topics in Québec Studies

Examination of a specific topic or area related to the study of Québec. Topics vary from year to year.

Precludes additional credit for CDNS 3510 (no longer offered).

Prerequisite(s): third-year standing or permission of the School.

Seminar three hours a week.

CDNS 4800 [1.0 credit] Internship Practicum

Practicum placements are available in institutional settings, primarily in the Ottawa area. Students must meet regularly with the academic evaluator and submit a final written report. A maximum of 1.0 practicum credits may be taken in fulfillment of Canadian Studies requirements. Includes: Experiential Learning Activity

Precludes additional credit for CDNS 3800, CDNS 3801, CDNS 3802 and CDNS 3803.

Prerequisite(s): permission of the School and fourth-year Honours standing in Canadian Studies.

CDNS 4801 [0.5 credit] Internship/Practicum

Practicum placements are available in institutional settings, primarily in the Ottawa area. Students must meet regularly with the academic evaluator and submit a final written report. A maximum of 1.0 practicum credits may be taken in fulfillment of Canadian Studies requirements. Includes: Experiential Learning Activity

Precludes additional credit for CDNS 3800, CDNS 3801, CDNS 3802 and CDNS 3803.

Prerequisite(s): permission of the School and fourth-year Honours standing in Canadian Studies.

CDNS 4802 [0.5 credit]

Internship/Practicum

Practicum placements are available in institutional settings, primarily in the Ottawa area. Students must meet regularly with the academic evaluator and submit a final written report. A maximum of 1.0 practicum credits may be taken in fulfillment of Canadian Studies requirements.

Includes: Experiential Learning Activity

Precludes additional credit for CDNS 3800, CDNS 3801, CDNS 3802 and CDNS 3803.

Prerequisite(s): permission of the School and fourth year Honours standing in Canadian Studies.

CDNS 4901 [0.5 credit] Selected Topics in Canadian Studies

Study of a specific topic or area related to Canadian Studies. Topics vary from year to year.

Prerequisite(s): third-year standing or permission of the School.

Seminar three hours a week.

CDNS 4902 [0.5 credit]

Selected Topics in Canadian Studies

Study of a specific topic or area related to Canadian Studies. Topics vary from year to year.

Prerequisite(s): fourth-year standing or permission of the School.

CDNS 4903 [0.5 credit] Études dirigées l

Cours facultatif offert seulement aux étudiants de quatrième année Honours en Études canadiennes (Mention : Français). Ce cours comprend des lectures dirigées et des travaux écrits dans un domaine relié aux Études canadiennes.

Prerequisite(s): Fourth-year standing or permission of the School.

CDNS 4904 [0.5 credit] Études dirigées II

Cours facultatif offert seulement aux étudiants de quatrième année Honours en Études canadiennes (Mention : Français). Ce cours comprend des lectures dirigées et des travaux écrits dans un domaine relié aux Études canadiennes.

Prerequisite(s): fourth-year standing or permission of the School.

CDNS 4905 [0.5 credit] Directed Studies I

An optional course normally restricted to fourth-year Honours students in Canadian Studies and to Qualifying-year Graduate students. Includes supervised reading and written work in a Canadian Studies area.

Prerequisite(s): Fourth-year standing or permission of the School.

CDNS 4906 [0.5 credit] Directed Studies II

An optional course normally restricted to fourth-year Honours students in Canadian Studies and to Qualifying-year graduate students. Includes supervised reading and written work in a Canadian Studies area.

Prerequisite(s): fourth-year standing or permission of the School.

CDNS 4907 [1.0 credit] Directed Studies III

An optional course normally restricted to fourth-year Honours students in Canadian Studies and to Qualifying-year graduate students. Includes supervised reading and written work in a Canadian Studies area.

Prerequisite(s): Fourth-year standing or permission of the School.

Centre for Initiatives in Education (CIED)

Centre for Initiatives in Education (CIED) Courses

CIED 0999 [0.0 credit] Academic Prep

CIED 1001 [0.5 credit] Selected Topics in Academic Discourse

Selected topics in academic discourse. Topics vary from year to year, and/or section to section, as determined by the Centre for Initiatives in Education.

Lecture three hours a week.

CIED 1200 [0.5 credit] Special Topics Seminar

The development of academic writing, reading, research and analytical skills through the examination of selected topics in the instructor's field of expertise.

Prerequisite(s): restricted to returning students in the Enriched Support Program/Indigenous Enriched Support Program.

Seminar three hours a week.

CIED 2100 [1.0 credit]

Academic Discourse: Theory and Practice

Inquiry into the theoretical nature of academic language, with emphasis on the social nature of academic writing. Incorporates practical strategies for understanding and enhancing growth in writing.

Prerequisite(s): restricted to returning students in the Enriched Support Program. Seminar three hours a week.

Chemistry (CHEM)

Chemistry (CHEM) Courses CHEM 0999 [0.0 credit] CHEM4U

CHEM 1001 [0.5 credit] General Chemistry I

Topics include atomic structure, periodic trends, structure and bonding, gas laws, intermolecular forces, equilibrium, acids and bases, and buffers. Examples relate to health, energy, materials, and the environment.

Includes: Experiential Learning Activity

Precludes additional credit for CHEM 1005 (no longer offered), CHEM 1011, CHEM 1101.

Prerequisite(s): Ontario 4U/M in Chemistry (or equivalent) strongly recommended.

Lectures and tutorial four hours a week, laboratory three hours every other week.

CHEM 1002 [0.5 credit] General Chemistry II

Topics include thermodynamics and spontaneity, kinetics, electrochemistry, organic chemistry, transition metal complexes, and green chemistry. Examples relate to health, energy, materials, and the environment.

Includes: Experiential Learning Activity

Precludes additional credit for CHEM 1006 (no longer offered), CHEM 1012.

Prerequisite(s): CHEM 1001.

Lectures and tutorial four hours a week, laboratory three hours every other week.

CHEM 1003 [0.5 credit]

The Chemistry of Food, Health and Drugs

Aspects of chemistry relating to food, food additives, drugs (illicit and beneficial) and their relation to metabolism and health. Topics may include: proteins, carbohydrates, fats, vitamins, cofactors, enzymes, steroids, electrolyte and pH balance, trace elements. Available only as a free option for Science students.

Prerequisite(s): a course in Chemistry (e.g. Ontario Grade 11)

Lectures three hours a week.

CHEM 1004 [0.5 credit] Drugs and the Human Body

No science background required. Topics include drug origins, laws, metabolism and dependence, pharmaceutical industry, over the counter medications, placebo effect, antibiotics, pain killers, stimulants, alcohol, marijuana, hallucinogens, birth control and steroids. Students in Science programs may use this course only as a free elective.

Lectures three hours a week.

CHEM 1007 [0.5 credit] Chemistry of Art and Artifacts

The chemistry of arts and artifacts created throughout the ages (Paleolithic, Neolithic, Bronze, Iron, Middle and Modern) will be examined. Basic chemical principles will be explored and reviewed when required. Students in Science programs may use this course only as a free elective.

Lectures three hours a week.

CHEM 1008 [0.5 credit] Inquiry in Chemistry Research

Students experience the journey of research in chemistry by using inquiry-based principles to answer complex societal questions. Students practice developing research questions and study designs, perform data analysis, and are introduced to scientific literacy and communication, EDI. and meta-cognition.

Includes: Experiential Learning Activity
Prerequisite(s): first year standing in Chemistry.
Workshop 3 hours a week

CHEM 1011 [0.5 credit] Enriched General Chemistry 1

This is a maths-intensive specialist course intended for chemistry majors or students planning to pursue courses in chemistry at the 3000-level and above. Topics include atomic structure, periodic trends, structure and bonding, gas laws, intermolecular forces, equilibrium, acids and bases, and buffers.

Includes: Experiential Learning Activity
Precludes additional credit for CHEM 1001, CHEM 1005
(no longer offered), CHEM 1101.

Lectures and tutorial four hours a week, laboratory three hours every other week.

CHEM 1012 [0.5 credit] Enriched General Chemistry 2

This is a maths-intensive specialist course intended for chemistry majors or students planning to pursue courses in chemistry at the 3000-level and above. Topics include thermodynamics and spontaneity, kinetics, electrochemistry, organic chemistry, transition metal complexes, and green chemistry.

Includes: Experiential Learning Activity

Precludes additional credit for CHEM 1002, CHEM 1006

(no longer offered).

Prerequisite(s): CHEM 1011.

Lectures and tutorial four hours a week, laboratory three hours every other week.

CHEM 1101 [0.5 credit] Chemistry for Engineering Students

Topics include stoichiometry, atomic and molecular structure, thermodynamics and chemical equilibrium, acid-base chemistry, carbon dioxide in water, alkalinity, precipitation, electrochemistry, kinetics and basic organic chemistry. Laboratory component emphasizes techniques and methods of basic experimental chemistry.

Includes: Experiential Learning Activity
Precludes additional credit for CHEM 1000 (no longer offered), CHEM 1001, CHEM 1005 (no longer offered),

CHEM 1011.

Prerequisite(s): Ontario 4U/M in Chemistry or equivalent. Lectures three hours a week, laboratory three hours every other week.

CHEM 2103 [0.5 credit] Physical Chemistry I

Basic principles of thermodynamics. Development of the laws of thermodynamics, enthalpy, entropy and free energy, and their applications to phase equilibria, electrochemistry, and kinetics. Brief introduction to quantum mechanics.

Includes: Experiential Learning Activity
Precludes additional credit for BIOC 2300.

Prerequisite(s): CHEM 1006 (no longer offered) with a minimum grade of B-, or CHEM 1002 or CHEM 1012, MATH 1004, MATH 1104 or MATH 1107, (PHYS 1001 and PHYS 1002) or (PHYS 1007 and PHYS 1008) or (PHYS 1003 and PHYS 1004).

Lectures three hours a week, problems one hour a week, laboratory three hours a week.

CHEM 2104 [0.5 credit] Physical Chemistry II

Further development of thermodynamic equations and their applications to mass changes, chemical potential, chemical equilibria, transport properties and advanced phase equilibria. Use of partial differentials and development of Maxwell's relations will also be covered. Includes: Experiential Learning Activity

Precludes additional credit for CHEM 3100 (no longer

offered).
Prerequisite(s): CHEM 2103 or BIOC 2300, and MATH 1005 or MATH 2007.

Lectures three hours a week, problems one hour a week, laboratory three hours a week.

CHEM 2203 [0.5 credit] Organic Chemistry I

Introduction to stereochemistry, spectroscopy and chemical reactions of alkanes, alkenes, alkynes, and alkyl halides. Reaction mechanisms and the interpretation of IR, NMR and mass spectra is explored. Training in the handling and purification of organic compounds, organic chemical reactions, and the use of infrared spectroscopy. Includes: Experiential Learning Activity
Precludes additional credit for CHEM 2207.
Prerequisite(s): CHEM 1006(no longer offered) with a minimum grade of B-, or CHEM 1002 or CHEM 1012. Lectures three hours a week and laboratory three hours a week.

CHEM 2204 [0.5 credit] Organic Chemistry II

Introduction to stereochemistry, spectroscopy, mechanisms, and chemical reactions of alcohols, ethers, epoxides, conjugated pi-systems, aromatic compounds, aldehydes, ketones, amines and carboxylic acids and their derivatives. Further training in the handling and purification of organic compounds, organic chemical reactions, and the use of infrared spectroscopy.

Includes: Experiential Learning Activity Precludes additional credit for CHEM 2208.

Prerequisite(s): CHEM 2203.

Lectures three hours a week and laboratory three hours a

CHEM 2207 [0.5 credit] Introduction to Organic Chemistry I

Introduction to stereochemistry, spectroscopy and chemical reactions of alkanes, alkenes, alkynes, and alkyl halides. Reaction mechanisms and the interpretation of IR, NMR and mass spectra is explored.

Precludes additional credit for CHEM 2203.

Prerequisite(s): CHEM 1006 (no longer offered) with a

Prerequisite(s): CHEM 1006 (no longer offered) with a minimum grade of B-, or CHEM 1002 or CHEM 1012. Lectures three hours a week.

CHEM 2208 [0.5 credit] Introduction to Organic Chemistry II

Introduction to stereochemistry, spectroscopy, mechanisms, and chemical reactions of alcohols, ethers, epoxides, conjugated pi-systems, aromatic compounds, aldehydes, ketones, amines and carboxylic acids and their derivatives.

Precludes additional credit for CHEM 2204. Prerequisite(s): CHEM 2207 or CHEM 2203. Lectures three hours a week.

CHEM 2302 [0.5 credit] Analytical Chemistry I

Introduction to quality assurance measures, calibration strategies and the fundamentals of solution-based analytical measurement processes. Qualitative and quantitative analysis using potentiometric and electrolysis techniques including ion selective electrodes, coulometry, amperometry and voltammetry. Redox, acid/base and EDTA titrations in the context of various buffer systems. Includes: Experiential Learning Activity Prerequisite(s): CHEM 1006 (no longer offered) with a minimum grade of B-, or CHEM 1002 or CHEM 1012 or CHEM 1101 and (MATH 1007 or MATH 1004). Lectures three hours a week, laboratory three hours a week.

CHEM 2303 [0.5 credit] Analytical Chemistry II

Spectrophotometric analysis using UV-Vis, fluorescence and FTIR instrumentation. Modern separation methods including CE, GC and LC. Recent techniques and applications using mass spectrometry. Applications of all of the above to real-world analysis including the advancement of environmental, biochemistry and health-related research.

Includes: Experiential Learning Activity
Prerequisite(s): CHEM 1006 (no longer offered) with a
minimum grade of B-, or CHEM 1002, or CHEM 1012, or
CHEM 1101, and (MATH 1007 or MATH 1004).
Lectures three hours a week, laboratory three hours a
week.

CHEM 2400 [0.5 credit] Independent Research I

Students carry out a laboratory research project under the supervision of a faculty member from the Department of Chemistry. A research report must be submitted by the last day of classes for evaluation by the Chair and Faculty supervisor.

Includes: Experiential Learning Activity
Prerequisite(s): restricted to Honours students having
second-year standing in a Chemistry program with an
overall CGPA of 10.0 or higher, and approval of the Chair
and a Faculty supervisor.

Laboratory research for at least three hours a week over two terms.

CHEM 2501 [0.5 credit]

Introduction to Inorganic and Bioinorganic Chemistry

The basic concepts of inorganic chemistry, including the origins of elemental properties, simple theories of bonding, intermolecular forces, main group and transition metal chemistry, coordination chemistry. Inorganic ions in biochemistry, including ion transport and storage, oxygen carriers and hydrolases, redox proteins.

Prerequisite(s): CHEM 1006 (no longer offered) with a minimum grade of B-, or CHEM 1002 or CHEM 1012. Lectures three hours a week, tutorial one hour a week.

CHEM 2800 [0.5 credit]

Foundations for Environmental Chemistry

A basis of chemistry needed to understand the environment: composition of the atmosphere and natural waters; equilibrium; surface properties; kinetics and spectroscopy; physical and chemical properties of chemicals in the environment. Limited enrolment course. Priority is given to students in Environmental Science/Engineering.

Includes: Experiential Learning Activity
Prerequisite(s): CHEM 1006 (no longer offered) with a
minimum grade of B- or CHEM 1002, or CHEM 1012, or
CHEM 1101, (MATH 1007 or MATH 1004).
Lectures three hours a week, laboratory three hours a
week.

CHEM 3101 [0.5 credit] Quantum Chemistry

Classical equations of motion, harmonic oscillator, diatomic and polyatomic molecules, molecular mechanics, quantum mechanics, Schrödinger equation and wave functions, vibrational spectra, hydrogen atom, quantum numbers, electronic spectra, bonding in small molecules. Includes: Experiential Learning Activity

Prerequisite(s): CHEM 2103 and MATH 2008.

Lectures three hours a week, tutorial one hour per week.

CHEM 3102 [0.5 credit] Methods in Computational Chemistry

Use of computers in the modeling and simulation of chemistry. Introduction to computer programming for analysis and visualization of chemical data. Calculation of chemical properties and modeling of chemical reactions using quantum chemistry.

Includes: Experiential Learning Activity
Prerequisite(s): CHEM 3101 or PHYS 3701.
Lectures and problems three hours a week.

CHEM 3107 [0.5 credit] Experimental Methods in Nanoscience

Thin film production and characterization, scanning electron microscopy, synthesis of metal nanoparticles and particle size determination, computational modeling of nanostructures.

Includes: Experiential Learning Activity Prerequisite(s): CHEM 3100. Laboratory four hours a week.

CHEM 3201 [0.5 credit] Advanced Organic Chemistry I

Instrumental methods for determining organic structures. Selected organic reactions with emphasis on mechanisms and reactive intermediates.

Prerequisite(s): CHEM 2204 or CHEM 2208. Lectures three hours a week, tutorial one and a half hours per week.

CHEM 3202 [0.5 credit]

Advanced Organic Chemistry II

Continued mechanistic survey of additional organic reactions with emphasis on synthetic usefulness and stereochemistry. Interspersed with selected topics such as instrumental methods, photochemistry, literature of organic chemistry, natural and synthetic polymers, heterocycles, terpenes and alkaloids.

Prerequisite(s): CHEM 3201 or equivalent.

Lectures three hours a week, tutorial one and a half hours per week.

CHEM 3205 [0.5 credit] Experimental Organic Chemistry

A laboratory-based course including advanced concepts and techniques in organic synthesis, structure determination, and the rates and mechanisms of reactions. Students are responsible for literature surveys, acquisition of theoretical background, and design of experimental procedures.

Includes: Experiential Learning Activity

Prerequisite(s): CHEM 2204 and CHEM 3201.

Laboratory four hours a week.

CHEM 3305 [0.5 credit]

Advanced Analytical Chemistry Laboratory

Advanced instrumentally based techniques of analysis. Emphasis on identification and quantitation of low-level contaminants in environmental matrices using chromatographic and spectroscopic methods, including sampling, cleanup, measurement and reporting of results. Includes: Experiential Learning Activity
Prerequisite(s): CHEM 2302 or CHEM 2303.
Laboratory four hours a week.

CHEM 3400 [0.5 credit] Independent Research II

Students carry out a laboratory research project supervised by a Chemistry faculty member. A research report must be submitted by the last day of classes for evaluation by the Chair and Faculty supervisor; expectations of student performance and evaluation exceed that of CHEM 2400.

Includes: Experiential Learning Activity

Prerequisite(s): restricted to Honours students having third-year standing in a Chemistry program with an overall CGPA of 10.0 or higher, and approval of the Chair and a Faculty supervisor.

Laboratory research for at least three hours a week over two terms.

CHEM 3503 [0.5 credit] Inorganic Chemistry I

Symmetry, identification of Raman and infrared active vibrations, symmetry-adapted molecular orbital theory of polyatomic molecules, electron deficient bonding, bonding in coordination complexes, solid state bonding, ionic lattices. Laboratory will introduce the student to a range of synthetic techniques and physical methods of characterization.

Includes: Experiential Learning Activity
Precludes additional credit for CHEM 3507.

Prerequisite(s): CHEM 2501.

Lectures three hours a week, tutorial one hour a week and laboratory four hours a week.

CHEM 3504 [0.5 credit] Inorganic Chemistry II

Physical properties of coordination complexes, ligand substitutions and electron transfer reaction mechanisms, organometallic chemistry: bonding, nomenclature and catalysis. Laboratory will introduce the student to a range of synthetic techniques and physical methods of characterization.

Includes: Experiential Learning Activity
Precludes additional credit for CHEM 3508.

Prerequisite(s): CHEM 3503.

Lectures three hours a week, tutorial one hour a week and laboratory four hours a week.

CHEM 3507 [0.5 credit] General Inorganic Chemistry I

Symmetry, identification of Raman and infrared active vibrations, symmetry-adapted molecular orbital theory of polyatomic molecules, electron deficient bonding, bonding in coordination complexes, solid state bonding, ionic lattices.

Precludes additional credit for CHEM 3503.

Prerequisite(s): CHEM 2501.

Lectures three hours a week, tutorial one hour a week.

CHEM 3508 [0.5 credit]

General Inorganic Chemistry II

Physical properties of coordination complexes, ligand substitutions and electron transfer reaction mechanisms, organometallic chemistry: bonding, nomenclature and catalysis.

Precludes additional credit for CHEM 3504.

Prerequisite(s): CHEM 3503 or CHEM 3507.

Lectures three hours a week, tutorial one hour a week.

CHEM 3600 [0.5 credit] Introduction to Nanotechnology

Nanoscale units, bulk vs. nanoproperties, electrons, atoms and ions, metals, band structure, electrical conduction, biosystems, molecular devices, quantum mechanics and optics, tools for measuring nanostructures. Production of nanostructures: self assembly, nanoscale crystal growth, polymerization. Applications to sensors, magnets, electronics, drug delivery. Toxicology of nanostructures.

Prerequisite(s): CHEM 3100. Lectures three hours a week.

CHEM 3700 [0.5 credit] Industrial Applications of Chemistry

Uses of chemistry in a number of industries: fertilizers, electrochemical, metallurgical, petrochemical, pulp and paper, plastics, pharmaceutical. Interaction of chemistry with economic, political, engineering, environmental, health, legal considerations. Guest lecturers. Prerequisite(s): (BIOC 2300 or CHEM 2103) and one of CHEM 2207 or CHEM 2203. Lecture three hours a week.

CHEM 3701 [0.5 credit] **Chemistry in Practice for the 21st Century**

Students explore different sectors of chemical industry; developments in sustainability; principles, analytical frameworks, and applications of green chemistry; environmental protections; and Canadian regulatory frameworks. Students investigate novel issues in industrial chemistry, build scientific literacy skills, and practice communicating scientific information to diverse audiences.

Prerequisite(s): third-year standing in a BSc or BHSc program.

Workshop three hours a week.

CHEM 3800 [0.5 credit]

The Chemistry of Environmental Pollutants

Inorganic and organic environmental pollutants: their toxicology, production, use pattern and known effects on the environment. Aspects of risk and regulation. Chemistry involved in water and sewage treatment. Prerequisite(s): CHEM 2207 or CHEM 2203 or CHEM 2800.

Lectures three hours a week.

CHEM 3999 [0.0 credit] **Co-operative Work Term**

Includes: Experiential Learning Activity

CHEM 4100 [0.5 credit]

Advanced Topics in Physical Chemistry I

Principles of Group Theory as applied to Chemistry. Point groups, character tables, symmetry orbitals, molecular orbitals, aromaticity, allowed and forbidden reactions, sandwich complexes. Selection rules in spectroscopy, molecular vibrations.

Prerequisite(s): CHEM 3102.

CHEM 4101 [0.5 credit]

Advanced Topics in Computational Chemistry

Computer simulation of materials, liquids, and biomolecules in the framework of intermolecular forces and statistical thermodynamics. Introduction to chemoinformatics and machine learning methods in chemistry.

Includes: Experiential Learning Activity Prerequisite(s): CHEM 3102.

Also offered at the graduate level, with different requirements, as CHEM 5122, for which additional credit is

Lectures 3 hours a week.

CHEM 4103 [0.5 credit]

Surface Chemistry and Nanostructures

Surface structure, thermodynamics and kinetics, specifically regarding adsorption/desorption and high vacuum models. Nanoscale structures and their formation, reactivity and characterization. Thin films, carbon nanotubes, self-assembled monolayers and supramolecular aggregates.

Prerequisite(s): CHEM 3600 and CHEM 3107. Also offered at the graduate level, with different requirements, as CHEM 5108, for which additional credit is precluded.

Lectures three hours a week.

CHEM 4104 [0.5 credit]

Physical Methods of Nanotechnology

An overview of methods used in nanotechnology. Principles of scanning probe techniques ranging from surface physics to biology. State of the art methods to create nanostructures for future applications in areas such as nanolithography, nanoelectronics, nano-optics, data storage and bio-analytical nanosystems.

Prerequisite(s): CHEM 3600 and CHEM 3107. Lectures three hours a week.

CHEM 4201 [0.5 credit]

Macromolecular Nanotechnology

Biological and synthetic macromolecules related to nanoscale phenomena. Challenges and opportunities associated with natural and synthetic polymers on the nanoscale. Molecular recognition, self-assembled nanostructures, scaffolds and templates, functional nanomaterials, amphiphilic architectures, nanocomposites, and nanomachines. Applications to sensing, biomaterials, drug delivery, and polymer based devices.

Prerequisite(s): CHEM 3600 or permission of the

Prerequisite(s): CHEM 3600 or permission of the department.

Also offered at the graduate level, with different requirements, as CHEM 5207, CHEM 5208, for which additional credit is precluded.

Lectures three hours a week.

CHEM 4202 [0.5 credit]

Advanced Topics in Organic Chemistry I

Topics include 2-dimensional 1H and 13CNMR spectroscopy and structure determination of complex organic molecules.

Prerequisite(s): CHEM 3201.

Also offered at the graduate level, with different requirements, as CHEM 5407, for which additional credit is precluded.

CHEM 4203 [0.5 credit] Synthetic Organic Chemistry

The application of reactions to the synthesis or organic molecules. Emphasis on design of synthetic sequences, new reagents, and stereoselectivity. Topics include advanced methods for synthesis and reactions of alkenes, carbonyls, and enolates, functional group interconversion, oxidation and reduction, protecting groups, rearrangements, and metal-catalyzed cross-coupling.

Prerequisite(s): CHEM 3201 and CHEM 3202. Lectures and seminars three hours a week.

CHEM 4204 [0.5 credit] Organic Polymer Chemistry

Introduction to basic principles of polymer chemistry, industrial and synthetic polymers, different types of polymerization and polymer characterization. Study of commodity plastics, engineering thermoplastics, and specialty polymers, with emphasis on their synthesis. Prerequisite(s): CHEM 3201 or equivalent. Also offered at the graduate level, with different requirements, as CHEM 5406, for which additional credit is precluded.

Lectures three hours a week.

CHEM 4205 [0.5 credit]

Reactivity and Mechanism in Organic Chemistry

The application of frontier molecular orbital theory (HOMO-LUMO interactions) to organic reactions, including thermal and photochemical cycloadditions of pi-systems (including 1,3-dipoles) and rearrangements. Reactions of radicals and carbenes; conformational analysis, stereochemical effects, and methods for the determination of reaction mechanisms.

Prerequisite(s): CHEM 3202 and CHEM 3503 (may be taken concurrently).

Lectures and seminars three hours a week.

CHEM 4206 [0.5 credit] Natural Products Chemistry

A survey of the major classes of natural products with respect to their structural elucidation, synthesis, biosynthesis and bioactivity, with emphasis on compounds that have medicinal importance.

Prerequisite(s): CHEM 3201 and CHEM 3202,. Lectures and seminars three hours a week.

CHEM 4207 [0.5 credit] Bio-Organic Chemistry

The course covers chemical and biosynthetic methods applied to the major classes of biomolecules and their derivatives, including: carbohydrates, amino acids, peptides, proteins, nucleic acids, lipids, terpenes, heterocycles and natural products. Content will focus on reactions and mechanisms that contribute to their biological activities.

Also listed as BIOC 4207.

Prerequisite(s): CHEM 3201 or permission of the department.

Also offered at the graduate level, with different requirements, as CHEM 5010., for which additional credit is precluded.

Lectures three hours a week.

CHEM 4301 [0.5 credit]

Advanced Topics in Analytical Chemistry I

Analytical chemistry of trace and ultratrace elements/ compounds. Special requirements for quantitative determination by various instrumental methods. Control of contamination and blanks. Analytical method development to improve selectivity, sensitivity and detection limit. Strength and limitations of each instrument. Optimization of all operating parameters.

Prerequisite(s): CHEM 2103 and one of CHEM 2302 or CHEM 2303.

Also offered at the graduate level, with different requirements, as CHEM 5607, for which additional credit is precluded.

Lectures and seminars three hours a week.

CHEM 4302 [0.5 credit]

Advanced Topics in Analytical Chemistry II

Solutions and separations in analytical chemistry. Stability of aqueous solutions of standards and samples. Complex formation, multi-step and competing equilibria and their application to the design of selective methods of separation and determination. Electroanalytical techniques. Electroanalytical chemistry of aqueous solutions. Phase equilibria and solvent extraction. Prerequisite(s): CHEM 2103 and one of CHEM 2302 or CHEM 2303.

Lectures and seminars three hours a week.

CHEM 4304 [0.5 credit]

Advanced Applications In Mass Spectrometry

Detailed breakdown of the physical, electrical and chemical operation of mass spectrometers. Applications in MS ranging from the analysis of small molecules to large biological macromolecules. Descriptions of the use of mass spectrometry in industry as well as commercial opportunities in the field.

Prerequisite(s): CHEM 2103 or BIOC 2300, and one of CHEM 2302 or CHEM 2303.

Also offered at the graduate level, with different requirements, as CHEM 5109, for which additional credit is precluded.

Lectures and seminars three hours a week.

CHEM 4305 [0.5 credit]

Environmental Chemistry and Toxicology

Overview of environmental chemistry and toxicology principles including chemical sources, fate, and effects in the environment. Examining organic reactions occurring in abiotic environments and biological systems, and studying aspects of toxicant disposition and biotransformation. Emphasis on contemporary problems in human health and the environment.

Prerequisite(s): CHEM 2203 or CHEM 2207, and CHEM 2800 or CHEM 2103, or BIOC 3101 or permission of the department.

Also offered at the graduate level, with different requirements, as CHEM 5606, for which additional credit is precluded.

Lectures three hours a week.

CHEM 4401 [0.5 credit] **Physical Aspects of Biochemistry**

Chemistry, structure and function of nucleic acids, proteins, carbohydrates, and lipids. Thermodynamics of biological systems, chemical mechanisms and organic transformations. Intended for Chemistry Majors. Includes: Experiential Learning Activity Precludes additional credit for BIOC 2200. BIOL 2200. BIOC 3101, CHEM 3401 (no longer offered). Prerequisite(s): CHEM 2103 and CHEM 2204. Lectures three hours a week.

CHEM 4406 [0.5 credit] **Pharmaceutical Drug Design**

Important elements of rational drug design. Ligandreceptor interactions, structure-activity relationships, molecular modeling of pharmacophores, structure and mechanism-based approaches to drug design. Enzyme inhibition in chemotherapy and design of anti-viral drugs. Includes: Experiential Learning Activity Prerequisite(s): CHEM 2103 and (CHEM 2203 or CHEM 2207), BIOC 3101 and (BIOC 3102 or BIOC 3008).

Lectures and laboratory five hours a week.

CHEM 4407 [0.5 credit]

Polymer Modeling

Polymer architectures; Flexible and rigid rod polymers; Rotational isomeric states (RIS); Molecular mechanics, Ramachandran Map, Helix parameters; internal and external parameters; regular and random coil structures; molecular dynamics; calculation of end-to-end distance, NMR chemical shifts: conformational entropy and properties.

Prerequisite(s): MATH 1107 and CHEM 2204 or permission of the department. Lectures three hours per week.

CHEM 4502 [0.5 credit] Radiochemistry

A study of nuclear stability and decay; chemical studies of nuclear phenomena. Applications of radioactivity. Prerequisite(s): CHEM 2302, CHEM 2303, and CHEM 3100, or permission of the Department.

Also offered at the graduate level, with different requirements, as CHEM 5905, for which additional credit is precluded.

Lectures and seminars three hours a week.

CHEM 4503 [0.5 credit]

Advanced Topics in Inorganic Chemistry I

A quantitave basis for ligand field theory; unreal and real wavefunctions of d-orbitals: derivation of the energies of dorbitals using variational principle, secular determinants, and ligned field operators; the effect of ligand field on free ion term symbols, wavefunction descriptions of terms symbols; applications.

Prerequisite(s): CHEM 3504 and CHEM 3101. Lectures three hours a week.

CHEM 4504 [0.5 credit]

Advanced Topics in Inorganic Chemistry II

Reactivity of inorganic coordination compounds. Thermodynamic and kinetic factors affecting reactivity. Industrial and biochemical processes catalyzed by metal coordination compounds. Experimental methodologies, data analysis and rate law evaluation used to obtain reaction mechanisms leading to improved methods of catalysis.

Prerequisite(s): CHEM 3504 or equivalent. Lectures three hours a week.

CHEM 4505 [0.5 credit]

Application of Physical Methods to Electron Transfer Chemistry

Spectroscopic techniques (i.e. UV-visible NIR, IR, EPR) and electrochemistry methods that are used to study photochemical and thermal intermolecular and intramolecular electron transfer in transition metal complexes are presented. Electron transfer theory and redox-active (non-innocent) ligands are discussed. Prerequisite(s): CHEM 3504. Lectures three hours a week.

CHEM 4700 [0.5 credit] Special Topics in Chemistry

A topic of current interest in any branch of chemistry. Only one special topics course may be presented for credit. Prerequisite(s): permission of the Department.

CHEM 4800 [0.5 credit] Atmospheric Chemistry

Properties of natural atmospheric constituents; biogeochemical cycles involving gases; chemical reactions in the atmosphere; anthropogenic atmospheric pollutants (e.g., chlorofluorocarbons, sulphur and nitrogen oxides, photochemical smog sources and effects on the biosphere. Relation between the structure of molecules and their spectral and reactive properties.

Prerequisite(s): CHEM 2103 or CHEM 2800. Lectures three hours a week.

CHEM 4907 [1.0 credit]

Honours Essay and Research Proposal

Students conduct an independent research study using library resources, and prepare a critical review and study proposal on a topic approved by a faculty supervisor. A written report and oral poster presentation of the work are required before a grade can be assigned.

Includes: Experiential Learning Activity

Precludes additional credit for CHEM 4908, FOOD 4907

and FOOD 4908.

Prerequisite(s): fourth year standing in an Honours Chemistry program and permission of the department.

CHEM 4908 [1.0 credit] Research Project and Seminar

Senior students in Honours Chemistry carry out a research project under the direction of one of the members of the Department. A written report and an oral presentation of the work are required before a grade can be assigned.

Includes: Experiential Learning Activity

Precludes additional credit for CHEM 4907, FOOD 4907 and FOOD 4908.

Prerequisite(s): any two of CHEM 3107, CHEM 3205, CHEM 3305 and CHEM 3504, and permission of the department.

Laboratory and associated work equivalent to at least eight hours a week for two terms.

Childhood and Youth Studies (CHST)

Childhood and Youth Studies (CHST) Courses CHST 1101 [0.5 credit]

Introduction to Childhood and Youth Studies

An introduction to multiple approaches to studying childhood and youth through a diverse range of historical periods and cultural contexts. Students will apply an interdisciplinary lens to explore the ways that children and youth have been discussed, researched, and understood. Precludes additional credit for CHST 1000 (no longer offered), CHST 1002 (no longer offered).

Lecture and discussion groups three hours a week.

CHST 1102 [0.5 credit] Experiential Learning in Childhood and Youth Studies

An examination of the philosophies, purposes, methods, techniques, and issues of childhood and youth studies through engagement with children and youth in campus and community settings. Students will make connections to theoretical and curriculum frameworks and current debates and perspectives.

Includes: Experiential Learning Activity
Precludes additional credit for CHST 2001 (no longer offered)

Lecture and discussion three hours a week.

CHST 2003 [0.5 credit]

Introduction to Research Methods in Childhood and **Youth Studies**

An introduction to the foundations of research involving children and youth. Students will learn research paradigms and strategies for designing and conducting research with children and young people. Ethical considerations and the involvement of children as co-researchers will be emphasized.

Precludes additional credit for CHST 2000 (no longer offered).

Prerequisite(s): second-year standing in Childhood and Youth Studies.

Lectures and discussion groups three hours a week.

CHST 2004 [0.5 credit]

Conceptualizing Adolescence in Childhood and Youth **Studies**

A comprehensive interdisciplinary overview of key issues, research, and theoretical developments in the study of childhood and youth. Students will explore the different and often conflicting conceptualizations of adolescence and examine youth theories and their implications. Prerequisite(s): second-year standing in Childhood and Youth Studies.

Lectures three hours a week.

CHST 2011 [0.5 credit] Children's Literature

Introduction to the critical study of children's literature. Also listed as ENGL 2011.

Precludes additional credit for ENGL 2006 (no longer offered).

Prerequisite(s): second-year standing or permission of the department.

Lectures three hours a week.

CHST 3002 [0.5 credit] **Special Topics in Child Studies**

Analysis of selected topics relevant to theory, research, and practice involving children and youth. The choice of topics will vary from year to year. Students should consult with the Institute regarding the topic offered.

Prerequisite(s): Third-year standing in Childhood and Youth Studies, or permission of the department. Lectures three hours a week.

CHST 3101 [0.5 credit] Advanced Research Seminar

This seminar is designed for students who wish to complete an Honours research project in their 4th year. Students will select a topic of study, investigate methodological and ethical considerations, and implement the key steps involved in designing rigorous research projects in diverse settings.

Precludes additional credit for CHST 3100 (no longer offered).

Prerequisite(s): CHST 2003 and third-year standing in Childhood and Youth Studies. Seminar three hours a week.

CHST 3103 [0.5 credit]

Critical Approaches to Child Development

A critical examination of philosophical, ideological, and discursive perspectives on childhood and youth. Students will analyze normative constructs reproduced in developmental discourses and research, particularly concerning gender, racism, disability, and oppressive practices.

Precludes additional credit for CHST 3001 (no longer offered).

Prerequisite(s): Third-year standing in Childhood and Youth Studies.

Lecture three hours a week.

CHST 3201 [0.5 credit] Children's Knowledges, Cultures, and Representations

An analysis of the ways children construct social relations through cultures and systems of representations. Students will investigate how children's knowledges and identities are constructed through their relationships with the world and develop theoretical and practical approaches for working with children from diverse cultures.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Childhood and Youth Studies.

Seminar three hours a week.

CHST 3202 [0.5 credit] Reconceptualizing Early Childhood Education and

A study of historical, contemporary, global, and local conversations about the professional field of early childhood education and care and its diverse practices and contexts. Topics may include reconciliation, anti-racist pedagogies, asset-based practices, inclusiveness, caring in context, and critical reflection.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Childhood and Youth Studies.

Care

Lecture and discussion groups three hours a week.

CHST 3203 [0.5 credit] Youth Culture and Activism

An exploration of youth cultures and participation in local, national, and global contexts. Students will examine youth engagement and advocacy, including definitions of citizenship, theories of resistance, the construction of "youth" as a social category, and the impact of technology and social media.

Prerequisite(s): Third-year standing in Childhood and Youth Studies, or permission of the department. Seminar three hours a week.

CHST 3204 [0.5 credit]

Literary Representations of Childhood and Youth

An examination of the ways in which childhood, children, and youth have been represented in creative literature (fiction, poetry, drama, and/or creative nonfiction).

Also listed as ENGL 3204.

Prerequisite(s): third-year standing, or permission of the department.

Seminar three hours a week.

CHST 3205 [0.5 credit] Race, Childhood, and Youth

An examination of historical and contemporary issues, debates, and methodologies pertaining to the studies of race, ethnicities, and racialization in childhood and youth studies. Students will also theorize the intersectionality of race, racism, racialization, racial and ethnic formations, nationalism, and colonialism in a contemporary context. Prerequisite(s): third-year standing in Childhood and Youth Studies, or permission of the department.

Seminar three hours a week.

CHST 3302 [0.5 credit] Children, Policy, and Practice

An introduction to the concepts of policy and practice and how these are influenced by history, economy, geography, and culture. Topics may include provincial, national, and international economic, social, and educational policies concerning children and youth.

Precludes additional credit for CHST 4000 (no longer offered).

Prerequisite(s): third-year standing in Childhood and Youth Studies.

Lecture three hours a week.

CHST 3303 [0.5 credit] Children's Rights

This course examines children's rights from a range of historical, cultural, and global perspectives. Topics may include the rights for Indigenous children, children with disabilities, female, trans and queer children, children in armed conflict and refugees in Canada and transnational contexts.

Also listed as HUMR 3303.

Precludes additional credit for CHST 3901 (no longer offered).

Prerequisite(s): third-year standing in Childhood and Youth Studies.

Lecture three hours a week.

CHST 3304 [0.5 credit] Disability and Childhood

Drawing on theory and research in disabled children's childhood studies, sociology of childhood, disability studies, and girlhood studies, this course examines the discursive and material constructions of disabled youth and childhood in relation to emerging neo-colonial, neo-imperialist, and neo-liberal ideologies.

Also listed as DBST 3304.

Prerequisite(s): Third-year standing in Childhood and Youth Studies or Disability Studies, or permission of the department.

Lecture three hours a week.

CHST 3305 [0.5 credit]

Childhood and Youth in Indigenous Contexts

An introduction to indigenous perspectives and contexts, both historical and contemporary, in relation to practice with Indigenous children, youth, families, and communities. Students will explore critical theory and necessary protocols for respectful entry into child and youth care practice within Indigenous contexts.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Childhood and Youth Studies or Indigenous Studies, or permission of the department.

Seminar three hours a week.

CHST 3306 [0.5 credit] Nature, Childhood and Youth

In this course, students will learn about the different ways in which human-nature relationships have been conceptualized in the interdisciplinary literature; the evidence base pointing to the power of nature as teacher of foundational life-skills; and current approaches to nature-based learning.

Precludes additional credit for CHST 3002 taken in Fall 2021, Winter or Summer 2022.

Prerequisite(s): Third-year standing in Childhood and Youth Studies, or permission of the department. Lectures three hours a week.

CHST 3501 [0.5 credit]

Sexuality, Gender and Childhood

Sexuality and gender are important aspects of identity, growth, and well-being in childhood. This course will examine how sexuality, gender identity, and gender expression are theorized, discussed, and experienced in childhood and explore historical and contemporary debates pertaining to these topics.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in Childhood and Youth Studies or Indigenous Studies, or permission of the department.

Seminar three hours a week.

CHST 3905 [0.5 credit]

Service-Learning in Community Settings

Students will learn to apply their knowledge pertaining to children and youth to a policy- or practice-oriented work environment. Students will complete a term paper and other assignments documenting gains in experiential knowledge, Graded SAT/UNS.

Includes: Experiential Learning Activity

Prerequisite(s): students with third- or fourth-year standing in Childhood and Youth Studies may apply to the Undergraduate Advisor for permission.

Field placement six hours per week in a community setting, and regular class forum.

CHST 4001 [0.5 credit]

Advanced Special Topics in Childhood and Youth Studies

In-depth analysis of theoretical, empirical, and applied topics related to children and youth in Canada and/or internationally. Topics may include poverty and social inequality, child and youth health, social media and social change. This course is repeatable when the topic

Prerequisite(s): fourth-year standing in Childhood and Youth Studies, or permission of the department. Seminar three hours a week.

CHST 4003 [0.5 credit] History of 'The African Child'

Students will analyze the history of the figure of 'the African child' using a range of visual, sources from colonial officials, anthropologists, historians, advertisers, charity and development workers, and African children themselves.

Includes: Experiential Learning Activity

Also listed as AFRI 4003.

Precludes additional credit for CHST 4001 if taken in

2014-15.

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

CHST 4004 [0.5 credit]

Theories and Epistemologies of Childhood and Youth

Explore historical and contemporary theories and epistemologies of childhood and their implications for the lived experiences of children around the world. Students will critically examine the ways that various discourses construct and perpetuate the marginalization of children across historical, political, cultural and/or educational contexts.

Prerequisite(s): third-year standing in Childhood and Youth Studies, or permission of the department.

Seminar three hours a week.

CHST 4101 [0.5 credit]

Children, Youth, and Popular Culture

A critical examination how popular culture, including consumer culture and digital media, mediates the identities, aspirations, and experiences of children and youth. Students will engage in critical dialogue about media culture and ideology and use cultural production to explore counter-narratives to problematic media representations.

Prerequisite(s): fourth-year standing in Childhood and Youth Studies, or permission of the department. Seminar three hours a week.

CHST 4102 [0.5 credit] **Queer and Trans Youth**

An examination of the ways that queer and trans youth have been conceptualized in research, media, literature, policy, and education. A range of multimedia sources will be used to explore the ways queer and trans youth are using language to render themselves intelligible. Prerequisite(s): fourth-year standing in Childhood and Youth Studies or Women's and Gender Studies, or permission of the department. Seminar three hours a week.

CHST 4205 [0.5 credit]

Childhood Education and Experience

Critical examination of the intersections of experiences of children, youth and their families within educational systems in Canada. Student will explore educational phenomena within and beyond the scope of schools in relation to a range of social justice issues.

Prerequisite(s): third-year standing in Childhood and Youth Studies, or permission of the department.

Seminar three hours a week.

CHST 4900 [0.5 credit] Independent Study

A reading or research course for students who wish to investigate a particular topic of interest within Childhood and Youth Studies. Students may not take more than one credit of Independent Study in their total program. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in Childhood and Youth Studies and IIS Co-Director approval.

Chinese (CHIN)

Chinese (CHIN) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

CHIN 1010 [0.5 credit] First-Year Mandarin Chinese I

For students with no knowledge of Mandarin. Oral skills; basic reading and writing skills. Placement test for non-literate speakers of other Chinese languages. Not open to students already literate in any Chinese language. Compulsory attendance.

Precludes additional credit for CHIN 1110.

Four hours a week.

CHIN 1020 [0.5 credit] First-Year Mandarin Chinese II

Continuation of first-year Mandarin Chinese. Oral skills; basic reading and writing skills. Compulsory attendance. Precludes additional credit for CHIN 1110.

Prerequisite(s): grade of C or higher in CHIN 1010, or permission of the School.

Four hours a week.

CHIN 1110 [1.0 credit]

Intensive First-Year Mandarin Chinese

For students with no knowledge of Mandarin Chinese. Oral skills; basic reading and writing skills. Placement test for non-literate speakers of other Chinese languages. Not open to students already literate in any Chinese language. Compulsory attendance.

Precludes additional credit for CHIN 1010 and CHIN 1020.

Eight hours a week (one term).

CHIN 2010 [0.5 credit] Second-Year Mandarin Chinese I

Further study of Mandarin Chinese to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for CHIN 2110.

Prerequisite(s): grade of C or higher in CHIN 1020 or CHIN 1110, or permission of the School.

Four hours a week.

CHIN 2020 [0.5 credit]

Second-Year Mandarin Chinese II

Continuation of second-year Mandarin Chinese. Further study of Mandarin Chinese to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for CHIN 2110. Prerequisite(s): grade of C or higher in CHIN 2010 or permission of the School. Four hours a week.

CHIN 2110 [1.0 credit]

Intensive Second-Year Mandarin Chinese

Further study of Mandarin Chinese to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for CHIN 2010 and CHIN 2020.

Prerequisite(s): grade of C or higher in CHIN 1020 or CHIN 1110, or permission of the School. Eight hours a week (one term).

CHIN 3010 [0.5 credit]

Third-Year Mandarin Chinese I

Continuation of the study of Mandarin Chinese to reach a more advanced level, including ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for CHIN 3015.

Prerequisite(s): grade of C or higher in CHIN 2020, or CHIN 2110, or permission of the School.

Three hours a week.

CHIN 3015 [0.5 credit]

Mandarin Chinese for Heritage Speakers

For students who have attained Mandarin Chinese proficiency in an informal setting, this course builds on existing language skills and develops them in a formal academic setting. The course will formalize grammar awareness and enhance Mandarin Chinese literacy skills. Compulsory attendance.

Precludes additional credit for 1000 and 2000 level CHIN courses, and also for CHIN 3010.

Prerequisite(s): permission of the School.

Three hours a week.

CHIN 3020 [0.5 credit]

Third-Year Mandarin Chinese II

Continuation of third-year Mandarin Chinese. Progress toward reaching a more advanced level, including ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance. Prerequisite(s): grade of C or higher in CHIN 3010 or

CHIN 3015, or permission of the School.

Three hours a week.

CHIN 4010 [0.5 credit]

Fourth-Year Mandarin Chinese I

Development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance. Prerequisite(s): grade of C or higher in CHIN 3020, or

Three hours a week.

permission of the School.

CHIN 4020 [0.5 credit]

Fourth-Year Mandarin Chinese II

Continuation of fourth-year Mandarin Chinese. Further development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance.

Prerequisite(s): grade of C or higher in CHIN 4010, or permission of the School.

Three hours a week.

CHIN 4210 [0.5 credit]

Functional Contemporary Mandarin Chinese I

Further study of Mandarin Chinese to reach a more advanced level, aimed at developing speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Prerequisite(s): grade of C or higher in CHIN 4020, or permission of the School.

Three hours a week.

CHIN 4220 [0.5 credit]

Functional Contemporary Mandarin Chinese II

Continuation of CHIN 4210. Further development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Prerequisite(s): grade of C or higher in CHIN 4210 or permission of the School.

Three hours a week.

CHIN 4380 [0.5 credit]

Topics in Chinese Culture and Society

Selected topics in Chinese culture and society. Repeatable once for credit when topic varies. Taught in English.

Prerequisite(s): Third-year standing in the Minor in Mandarin Chinese, or permission of the instructor. Three hours a week.

CHIN 4900 [1.0 credit] Independent Study

Research in a topic in Mandarin Chinese language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in the Minor in Mandarin Chinese, grade of C or higher in CHIN 4020 or equivalent, and permission of the School.

CHIN 4901 [0.5 credit] Independent Study

Research in a topic in Mandarin Chinese language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in the Minor in Mandarin Chinese, grade of C or higher in CHIN 4020 or equivalent, and permission of the School.

Civil Engineering (CIVE)

Civil Engineering (CIVE) Courses CIVE 2004 [0.5 credit]

$\ensuremath{\mathsf{GIS}}, \ensuremath{\mathsf{Surveying}}, \ensuremath{\mathsf{CAD}} \ensuremath{\mathsf{and}} \ensuremath{\mathsf{BIM}}$

Engineering geometry and spatial graphics. Fundamentals of surveys. Digital surveying tools; total station, GPS. Computer-Aided Drafting (CAD). Geographic Information Systems (GIS). Spatial referencing. Building Information Modelling (BIM). Integrated design using digital tools. Field exercises using software to process and evaluate spatial data.

Includes: Experiential Learning Activity
Prerequisite(s): Second-year status in Engineering or
(GEOM 1004 for students in BSc in Geomatics).
Lectures three hours a week, problem analysis and
laboratories three hours a week.

CIVE 2005 [0.5 credit] Architectural Technology 2

Technical issues involved in architectural design of buildings from ancient times to the present.

Technological innovation and materials related to structural developments, and the organization and design of structures. Basic concepts of calculus, equilibrium, and mechanics of materials.

Precludes additional credit for ARCH 2222. Not eligible for use for Bachelor of Engineering degree requirements. Prerequisite(s): ARCC 2202.

Lectures three hours a week, laboratory three hours a week.

CIVE 2101 [0.5 credit] Engineering Mechanics

Virtual work. Friction. Relative motion of particles. Kinematics of a rigid body: translation, rotation; general plane motion; absolute and relative motion. Kinetics of a rigid body: equations of motion; work-energy; impulse-momentum; conservation of momentum and energy. Conservative forces and potential energy. Precludes additional credit for MAAE 2101.

Prerequisite(s): MATH 1004, MATH 1104 and second-year status in Engineering.

Lectures three hours a week, problem analysis three hours a week.

CIVE 2200 [0.5 credit] Mechanics of Solids I

Stress and strain. Stress-strain relationship: Hooke's law. Torsion of circular shafts. Bending moment and shear force distribution. Flexural stresses. Deflection. Shear stress in beams. Stresses in thin- walled cylinders. Transformation of 2D stress and strain: Mohr's circle. Buckling of columns.

Includes: Experiential Learning Activity Precludes additional credit for MAAE 2202.

Prerequisite(s): MATH 1004 and second-year status in

Engineering for B.Eng.

Lectures three hours a week, problem analysis and laboratory three hours a week.

CIVE 2700 [0.5 credit] Civil Engineering Materials

Introduction to material science. Structure of atoms. Crystallography. Crystal Imperfections. Characteristics, behaviour and use of Civil Engineering materials: steel, concrete, asphalt, wood, polymers, composites. Specifications. Physical, chemical and mechanical properties. Quality control and material tests. Fatigue. Corrosion. Applications in construction and rehabilitation of structures.

Includes: Experiential Learning Activity Precludes additional credit for MAAE 2700.

Prerequisite(s): Second year status for students in an Engineering program.

Lectures three hours a week, problem analysis and laboratory three hours a week.

CIVE 3202 [0.5 credit] Mechanics of Solids II

Shear flow. Definition of shear centre, Saint Venant and warping torsional constants. Behaviour, governing differential equations and solutions for torsion, beam-columns, lateral torsional buckling of doubly symmetric beams, axially loaded doubly symmetric, singly symmetric and asymmetric columns. Failure criterion, fatigue and fracture.

Includes: Experiential Learning Activity Precludes additional credit for MAAE 3202.

Prerequisite(s): CIVE 2200.

Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

CIVE 3203 [0.5 credit]

Introduction to Structural Analysis

Concepts and assumptions for structural analysis: framed structures; joints; supports; compatibility and equilibrium; stability and determinacy; generalized forces and displacements. Principle of Virtual Work: unknown force calculations; influence lines. Complementary Virtual Work: displacement calculations, indeterminate analysis. Introduction to the Stiffness Method of Analysis. Prerequisite(s): CIVE 2200 and MATH 1004. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3204 [0.5 credit]

Introduction to Structural Design

Building systems and structural form. Design Philosophy and design process. Limit states design. National Building Code of Canada. Determination of dead, live, snow, wind, and earthquake loads.

Prerequisite(s): CIVE 2200.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3205 [0.5 credit]

Design of Structural Steel Components

Introduction to CAN/CSA - S16, design and behaviour concepts; shear lag, block shear, local plate buckling, lateral torsional buckling, instantaneous centre, inelastic strength and stability. Design of tension members, axially loaded columns, beams, beam-columns, simple bolted and welded connections.

Prerequisite(s): CIVE 2200 and CIVE 2700. Recommended prerequisite: CIVE 3204.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3206 [0.5 credit]

Design of Reinforced Concrete Components

Introduction to CAN/CSA - A23.3; design and behaviour concepts; flexural analysis at service loads; shear, bond, Whitney stress block, under, over reinforced behaviour, ultimate strength. Flexural design of singly reinforced, doubly reinforced T-beams, one-way slabs. Shear design for beams. One-way, two-way slab systems, columns. Prerequisite(s): CIVE 2200 and CIVE 2700. Recommended prerequisite: CIVE 3204.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3207 [0.5 credit]

Historic Site Recording and Assessment

Methods of heritage documentation including hand recording, photography, rectified photography, total station, gps, photogrammetry, and laser scanning. Non-destructive testing techniques; environmental assessment tools for determining air quality and energy efficiency. Multidisciplinary teams for all project work.

Includes: Experiential Learning Activity Also listed as ACSE 3207, ARCH 3881. Precludes additional credit for ARCN 4100.

Prerequisite(s): third-year status in B.Eng. in Architectural

Conservation and Sustainability Engineering.

Lectures three hours a week, lab or field work two hours a week.

CIVE 3208 [0.5 credit] Geotechnical Mechanics

Soil composition and soil classification. Soil properties, compaction, seepage and permeability. Concepts of pore water pressure, capillary pressure and hydraulic head. Principle of effective stress, stress-deformation and strength characteristics of soils, consolidation, stress distribution with soils, and settlement. Laboratory testing. Includes: Experiential Learning Activity Also listed as ERTH 4107.

Prerequisite(s): third-year status in Engineering, or permission of the department. Additional recommended background: ERTH 2404 or equivalent.

Lectures three hours a week, laboratory three hours alternate weeks.

CIVE 3209 [0.5 credit] Building Science

Building envelope design and analysis; applied heat transfer and moisture transport; solar radiation; hygrothermal modelling; control of rain, air, vapour, and heat; materials for wall, window, curtain wall, roof, and foundation systems; building envelope retrofit case studies; building code; envelope construction. Includes: Experiential Learning Activity

Also listed as ACSE 3209.
Prerequisite(s): MAAE 2400 and third-year status in B.
Eng. Civil Engineering.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3210 [0.5 credit] Geotechnical Engineering

Strength of soils, steady state seepage, flownets and piping. Stress distribution in soils. Earth pressures: at rest, active and passive. Design of flexible and rigid retaining structures. Stability of excavations, slopes and embankments. Settlement of foundations. Bearing capacity of footings.

Also listed as CIVE 4208. Prerequisite(s): CIVE 3208.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3304 [0.5 credit]

Transportation Engineering and Planning

Transportation and the socio-economic environment; modal and intermodal systems and components; vehicle motion, human factors, considerations for different modes of travel; sight distance requirements; fundamentals of traffic flow theory; transportation planning and travel demand; environmental impacts; traffic safety. Precludes additional credit for GEOG 4304. Prerequisite(s): third-year status in Engineering, or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3305 [0.5 credit] Highway Engineering

Road functional classification, human factors of road design; geometric design; traffic engineering; highway capacity and level of service; highway materials; frost action; pavement mix design; structural design of rigid and flexible pavements; maintenance and rehabilitation.

Also listed as CIVE 4209.

Prerequisite(s): CIVE 3304 or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3407 [0.5 credit] Municipal Engineering

Introduction to fundamentals of municipal engineering. Water quality: physical, chemical and biological parameters. Water treatment: softening mixing, flocculation, sedimentation, filtration, disinfection, fluoridation. Biological processes. Wastewater treatment: primary, secondary and tertiary treatment. Sludge disposal and wastewater reuse. Solid waste management. Also listed as CIVE 4407.

Prerequisite(s): third-year status in Engineering. Lectures three hours a week, problem analysis one and a half hours a week

CIVE 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity
Precludes additional credit for ACSE 3999.

CIVE 4200 [0.5 credit]

Matrix Analysis of Framed Structures

Review of basic structural concepts. Betti's law and applications. Matrix flexibility method, flexibility influence coefficients. Development of stiffness influence coefficients. Stiffness method of analysis: beams; plane trusses and frames; space trusses and frames. Introduction to the finite element method.

Prerequisite(s): CIVE 3203.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4201 [0.5 credit]

Finite Element Methods in Civil Engineering

Introduction to the theory and application of finite element methods. The relationship with virtual work, Rayleigh-Ritz, system of linear equations, polynomial interpolation, numerical integration, and theory of elasticity is explored. Isoparametric formulations of structural and plane elements are examined. Geotechnical and nonlinear problems are introduced.

Prerequisite(s): fourth-year status in engineering. Also offered at the graduate level, with different requirements, as CIVE 5103, for which additional credit is precluded.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4202 [0.5 credit] Wood Engineering

Structural design in timber. Properties, anatomy of wood, wood products, factors affecting strength and behaviour, strength evaluation and testing. Design of columns, beams and beam-columns. Design of trusses, frames, glulam structures, plywood components, formwork, foundations, connections and connectors. Inspection, maintenance and repair.

Prerequisite(s): CIVE 2200, CIVE 2700 and third-year status in B.Eng.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4204 [0.5 credit]

Pavement Design

Pavement design methods, flexible pavement materials and mix designs, stresses and strains in flexible pavements; fatigue and rutting design considerations; traffic loading and design loads; design of flexible pavements using AASHTO, M-E and AI methods; rigid pavement designs, design of overlays.

Includes: Experiential Learning Activity

Prerequisite(s): Fourth year status and CIVE 4209. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4205 [0.5 credit] Traffic Engineering

Introduction to principles of traffic engineering. Traffic operation concepts. Travel modes and modal characteristics. Traffic stream characteristics and queuing theory. Capacity and level of service analysis of roads and intersections.

Includes: Experiential Learning Activity Prerequisite(s): Fourth year status in engineering; and (CIVE 4209 or CIVE 3305).

Also offered at the graduate level, with different requirements, as CIVE 5305, for which additional credit is precluded.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4208 [0.5 credit] Geotechnical Engineering

Strength of soils, steady state seepage, flownets and piping. Stress distribution in soils. Earth pressures: at rest, active and passive. Design of flexible and rigid retaining structures. Stability of excavations, slopes and embankments. Settlement of foundations. Bearing capacity of footings.

Also listed as CIVE 3210. Prerequisite(s): CIVE 3208.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4209 [0.5 credit] **Highway Engineering**

Road functional classification, human factors of road design; geometric design; traffic engineering; highway capacity and level of service; highway materials; frost action; pavement mix design; structural design of rigid and flexible pavements; maintenance and rehabilitation. Also listed as CIVE 3305.

Prerequisite(s): CIVE 3304 or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4301 [0.5 credit] **Foundation Engineering**

A critical study of the theories in soil mechanics and their application to the solution of geotechnical engineering problems. Field investigations, laboratory and field testing, shallow foundations, special footings, mat foundations, pile foundations and excavations. Discussion of new methods and current research.

Prerequisite(s): CIVE 4208.

Lectures three hours a week, laboratory three hours alternate weeks.

CIVE 4302 [0.5 credit]

Reinforced and Prestressed Concrete Design

Reinforced concrete shear and torsion design. Twoway slab design by Direct Design and Equivalent Frame Method. Behaviour and design of slender reinforced concrete columns. Prestressed concrete concepts: flexural analysis and design; shear design; anchorage zone design; deflection and prestress loss determination. Prerequisite(s): CIVE 3203 and CIVE 3206. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4303 [0.5 credit] **Urban Systems**

A systematic approach to urbanism; Sustainability in urban systems; Urban sprawl; Urban form; Urban theory, Population projections; Zoning; Integration of urban infrastructure components (waste, electricity water, transportation and buildings); Analysis of issues in Canadian urban areas; The future of cities.

Prerequisite(s): fourth-year status in Engineering, secondyear standing in B.A.S. (Urbanism), or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4307 [0.5 credit] **Municipal Hydraulics**

Fluid flow fundamentals. Hydraulics of pipe systems. Open channel flow. Prediction of sanitary and storm sewage, flow rates. Design of water distribution systems, culverts, sanitary and storm sewers. Pumps and measuring devices. Hydraulic and flow control structures. Prerequisite(s): MAAE 2300.

Lectures three hours a week, problem analysis one and a half hours a week.

CIVE 4308 [0.5 credit]

Behaviour and Design of Steel Structures

Behaviour and design of open web steel joists, steel and composite decks, composite beams and columns, stud girders, and plate girders. Design of moment connections, base plates and anchor bolts, and bracing connections. Stability of rigid and braced frames. Design for lateral load effects.

Prerequisite(s): CIVE 3205 and fourth-year status in Engineering.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4400 [0.5 credit]

Construction/Project Management

Systems approach to project planning and control. Analysis of alternative network planning methods: CPM, precedence and PERT; planning procedure; computer techniques and estimating; physical, economic and financial feasibility; implementation feedback and control; case studies.

Prerequisite(s): fourth-year status in Engineering. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4403 [0.5 credit] Masonry Design

Introduction to structural design in masonry. Properties of masonry materials and assemblages. Behaviour and design of beams, walls and columns. Selected topics including veneer wall systems, differential movement, workmanship, specifications, inspection, maintenance and repair. Lowrise and highrise building design. Prerequisite(s): CIVE 3204, CIVE 3206 and fourth-year status in Engineering or permission of the Department. Also offered at the graduate level, with different

requirements, as CIVE 5200, for which additional credit is

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4407 [0.5 credit] Municipal Engineering

precluded.

Introduction to fundamentals of municipal engineering. Water quality: physical, chemical and biological parameters. Water treatment: softening mixing, flocculation, sedimentation, filtration, disinfection, fluoridation. Biological processes. Wastewater treatment: primary, secondary and tertiary treatment. Sludge disposal and wastewater reuse. Solid waste management. Also listed as CIVE 3407.

Prerequisite(s): third-year status in Engineering. Lectures three hours a week, problem analysis one and a half hours a week

CIVE 4500 [0.5 credit]

Computer Methods in Civil Engineering

Advanced software development for Civil Engineering applications. Examples may be chosen from surveying, transportation, geotechnical and/or structural engineering. Software technologies include object-oriented programming, data base management, Internet-based applications and graphical user interfaces.

Prerequisite(s): Fourth-year status in Engineering.

Also offered at the graduate level, with different requirements, as CIVE 5602, for which additional credit is precluded.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4601 [0.5 credit]

Building Pathology and Rehabilitation

Deterioration mechanisms for concrete, timber, steel and masonry structures. Identification of design deficiencies; criteria for selection and design of rehabilitation systems. Design techniques to reduce deterioration in new construction and historical structures. Includes: Experiential Learning Activity

Also listed as ACSE 4601, ARCN 4200. Prerequisite(s): CIVE 3207 and fourth-year status in B.Eng. in Architectural Conservation and Sustainability Engineering.

Lectures three hours a week, lab/field work two hours a week.

CIVE 4614 [0.5 credit] Building Fire Safety

Understanding fire-structure interaction and the concepts of fire severity and resistance; behaviour of steel, concrete, and timber buildings exposed to fires; compartment fire dynamics; correlations and computer models to predict fire dynamics; fire retardants; laboratory-scale fire experiments; performance-based approach for building fire safety design.

Prerequisite(s): MAAE 2400 and fourth-year status in Engineering, or permission of the Department. Lectures three hours a week, problem analysis and laboratories one and one-half hours per week.

CIVE 4907 [1.0 credit]

Engineering Research Project

A research project in engineering analysis, design or development carried out by individual students or small teams, for an opportunity to develop initiative, self-reliance, creative ability and engineering judgment and is normally intended for students with high CGPAs and an interest in graduate studies.

Includes: Experiential Learning Activity

Precludes additional credit for ACSE 4907, ACSE 4917, CIVE 4917.

Prerequisite(s): fourth-year status in Engineering and permission of the department.

CIVE 4917 [0.5 credit] Undergraduate Directed Study

Student carries out a study, analysis, and solution of an engineering problem which results in a written final report. Carried out under close supervision of a faculty member. Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student.

Includes: Experiential Learning Activity
Precludes additional credit for ACSE 4907, ACSE 4917,
CIVE 4907.

Prerequisite(s): permission of the Department and completion of, or concurrent registration in, CIVE 4918. Self study.

CIVE 4918 [1.0 credit]

Design Project

Teams of students develop professional level experience through a design project that incorporates fundamentals acquired in previous mathematics, science, engineering, and complementary studies courses. A final report and oral presentations are required.

Includes: Experiential Learning Activity

Precludes additional credit for ACSE 4918, ENVE 4918. Prerequisite(s): ECOR 3800 and fourth-year status in Engineering. Certain projects may have additional requirements.

Lectures two hours alternate weeks, problem analysis three hours a week.

Classical Civilization (CLCV)

Classical Civilization (CLCV) Courses

CLCV 1002 [0.5 credit]

Survey of Greek Civilization

Introduction to the study of Greek antiquity and the discipline of Classics and its methodologies. Greek culture and society are set in their historical contexts and studied through readings from representative ancient authors (in English translation) and through the art and architecture of the period.

Precludes additional credit for CLCV 1000 (no longer offered), CLCV 1109 (no longer offered). Lecture three hours a week.

CLCV 1003 [0.5 credit] Survey of Roman Civilization

Introduction to the study of Roman antiquity and the discipline of Classics and its methodologies. The culture and society are set in their historical context and studied through readings from representative ancient authors (in English translation) and through the art and architecture of the period.

Precludes additional credit for CLCV 1000 (no longer offered), CLCV 1109 (no longer offered). Lecture three hours a week.

CLCV 1004 [0.5 credit] Elementary Language Tutorial I

Elementary study of an ancient language.

Prerequisite(s): Permission of the unit.

Tutorial two hours a week plus out-of-class requirements.

CLCV 1005 [0.5 credit] Elementary Language Tutorial II

Elementary study of an ancient language.

Prerequisite(s): Permission of the department.

Tutorial two hours a week plus out-of-class requirements.

CLCV 1008 [0.5 credit] Introduction to Archaeology I

Introduction to the history, theory and practice of field archaeology. Excavations from all time periods and global regions will be discussed. Focus will be placed on excavation methods and technology, including dating, that enhance understanding of sites both on land and underwater.

Also listed as ARCY 1008.

Precludes additional credit for CLCV 2300 (no longer offered).

Lecture three hours a week.

CLCV 1009 [0.5 credit]

Introduction to Archaeology II

Continues the examination of various aspects of field archaeology begun in CLCV 1008. This course places greater focus on recent approaches to the interpretation of remains. These include environmental, cognitive and bioarchaeological approaches.

Also listed as ARCY 1009.

Precludes additional credit for CLCV 2300 (no longer offered).

Lecture three hours a week.

CLCV 2004 [0.5 credit]

Intermediate Language Tutorial I

Intermediate study of an ancient language.

Prerequisite(s): permission of the unit.

Tutorial two hours a week plus out-of-class requirements.

CLCV 2005 [0.5 credit]

Intermediate Language Tutorial II

Intermediate study of an ancient language.

Prerequisite(s): permission of the unit.

Tutorial two hours a week plus out-of-class requirements.

CLCV 2008 [0.5 credit] Greek and Roman Epic

An examination of the genre of epic in Greco-Roman antiquity, including a close reading of translations of Homer and Vergil.

Also listed as ENGL 2012.

Precludes additional credit for CLCV 2009 and ENGL 2009 (no longer offered).

Prerequisite(s): second year standing or permission of the unit.

Lecture three hours a week.

CLCV 2010 [0.5 credit] Greek and Roman Drama

An examination of the genres of tragedy and comedy in Greco-Roman antiquity.

Also listed as ENGL 2605.

Precludes additional credit for CLCV 2009 or ENGL 2009 (no longer offered).

Prerequisite(s): second year standing or permission of the unit.

Lecture three hours a week.

CLCV 2100 [0.5 credit]

Scientific and Medical Terminology

Examination of Ancient Greek and Latin roots of technical terms found in the sciences, engineering, and medicine. Lecture three hours a week.

CLCV 2103 [0.5 credit]

Greek Religion

A study of religion in ancient Greece.

Also listed as RELI 2735.

Precludes additional credit for CLCV 2102 (no longer offered) and, RELI 2102 (no longer offered) RELI 2734 (no longer offered).

Lecture three hours a week.

CLCV 2104 [0.5 credit]

Roman Religion

A study of religion in ancient Rome.

Also listed as RELI 2737.

Precludes additional credit for CLCV 2102 (no longer offered), RELI 2102 (no longer offered) and RELI 2734 (no longer offered).

Lecture three hours a week.

CLCV 2105 [1.0 credit]

Ancient Philosophy: The Search for Wisdom

An exploration of ancient philosophy as a search for wisdom and happiness from its Presocratic beginnings in Greece to its development in the Hellenistic world and Imperial Rome. Emphasis on philosophy as a contemplative activity and as a way of life.

Also listed as PHIL 2005.

Precludes additional credit for PHIL 2006, CLCV 2006, PHIL 2007, CLCV 2007 (no longer offered).

CLCV 2303 [0.5 credit]

Greek Art and Archaeology

The art, architecture and archaeology of ancient Greece. Vase painting, sculpture, architecture, town planning and analogous arts.

Also listed as ARTH 2102.

Precludes additional credit for CLCV 2302 (no longer offered) and ARTH 2100 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit.

Lecture three hours a week.

CLCV 2304 [0.5 credit] Roman Art and Archaeology

The art, architecture and archaeology of the ancient Romans. Vase painting, sculpture, architecture, town

planning and analogous arts are studied.

Also listed as ARTH 2105.

Precludes additional credit for CLCV 2302 and ARTH 2100.

Prerequisite(s): second-year standing or permission of the

CLCV 2305 [1.0 credit]

Ancient Science and Technology

The development and application of ancient science and technology in the fields of ancient engineering, machinery, metallurgy, transport, building, agriculture and Hippocratic medicine; the social position of craftsmen and artisans, the attitude of intellectuals to science and manual labour, the effects of slavery.

Also listed as TSES 2305.

Prerequisite(s): second-year standing or permission of the Department. This course is suitable for students with no previous knowledge of Greece or Rome.

Lecture three hours a week.

CLCV 2500 [0.5 credit] Classical Mythology

A study of classical mythology, emphasizing its use in Greek and Roman literature and its place in classical art and religion. There is some discussion of classical myths in terms of contemporary interpretations of myth. Also listed as ENGL 2500.

Precludes additional credit for CLCV 2000 and ENGL 2007 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit.

Lecture three hours a week.

CLCV 2902 [0.5 credit] Origins of the Greeks

The history of ancient Greece from the Bronze Age through the Archaic period.

Also listed as HIST 2902.

Precludes additional credit for CLCV 2900 and HIST 2900.

Prerequisite(s): second-year standing or permission of unit

Lecture three hours a week.

CLCV 2903 [0.5 credit] Democracy to Alexander

The history of ancient Greece from the classical period to Alexander.

Also listed as HIST 2903.

Precludes additional credit for CLCV 2900 and HIST 2900

Prerequisite(s): second-year standing or permission of the

Lecture three hours a week.

CLCV 2904 [0.5 credit]

Rise of the Roman Empire
The history of ancient Rome from early Rome to the end

of the Republic.

Also listed as HIST 2904.

Precludes additional credit for CLCV 2901 and HIST 2901.

Prerequisite(s): second-year standing or permission of the unit.

Lecture three hours a week.

CLCV 2905 [0.5 credit] Rome of the Caesars

The history of ancient Rome from the end of the Republic to the coming of Islam.

Also listed as HIST 2905.

Precludes additional credit for CLCV 2901 (no longer offered) and HIST 2901 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit.

Lecture three hours a week.

CLCV 2906 [0.5 credit]

Studies in Classical Civilization

A study of a selected topic in ancient history, literature, languages, culture, archaeology and/or technology. Prerequisite(s): second-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3000 [0.5 credit]

Topics in Ancient History

A study of a selected topic in ancient history. Also listed as HIST 3000.

Prerequisite(s): third-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3001 [0.5 credit] Early Greek Philosophy

A study of the pre-Socratic philosophers and of the Sophists and Socrates.

Also listed as PHIL 3001.

Prerequisite(s): CLCV 2105 or PHIL 2005 or permission of the Philosophy department.

Lectures three hours a week.

CLCV 3003 [0.5 credit]

Topics in Classical Civilization

A study of a selected topic in classical civilization. Prerequisite(s): third-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3010 [0.5 credit]

The Later Roman Empire

The study of major developments - administrative, ecclesiastical, cultural and societal - of the later Roman Empire.

Also listed as HIST 3010.

Precludes additional credit for CLCV 3002 and HIST 3002.

Prerequisite(s): a 2000-level CLCV course.

Lecture three hours a week.

CLCV 3011 [0.5 credit] Topics in Ancient Philosophy

A study of philosophers, texts, problems and issues in ancient philosophy, generally with a focus on Plato and Aristotle.

Also listed as PHIL 3000.

Prerequisite(s): 0.5 credit in PHIL and second-year standing, or permission of the Philosophy department. Lectures three hours a week.

CLCV 3201 [0.5 credit] Studies in Greek History

Study of a period or theme in Greek History.

Also listed as HIST 3009.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3202 [0.5 credit] Studies in Roman History

Study of a period or theme in Roman History.

Also listed as HIST 3101.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3301 [0.5 credit]

Field Work I: Greek and Roman World

Students will participate for a minimum of three weeks on an archaeological field project (i.e., excavation or survey) relevant to the Greek and Roman world. They will learn archaeological documentation and the analysis, recording, and processing of finds.

Includes: Experiential Learning Activity

Also listed as ARCY 3301.

Prerequisite(s): CLCV 1008 and CLCV 1009 or CLCV 2300 and permission of the unit. Permission of the unit is required to repeat this course.

CLCV 3306 [0.5 credit] Studies in Greek Art

A study of period or theme in the art and archaeology of Ancient Greece. Topics may vary from year to year. Also listed as ARTH 3102. RELI 3732.

Precludes additional credit for RELI 3731and ARTH 3101 (no longer offered) and RELI 3306 (if taken summer 2005, summer 2006, summer 2007).

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3307 [0.5 credit] Studies in Roman Art

A study of a period or theme in the art and archaeology of the ancient Romans. Topics may vary from year to year. Also listed as ARTH 3105, RELI 3733.

Precludes additional credit for RELI 3731 and ARTH 3101(no longer offered) and RELI 3306 (if taken summer 2005, summer 2006, summer 2007).

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3400 [0.5 credit] Greek and Roman Studies Abroad

This course combines academic study in Canada with first hand examination of museum collections and sites of the ancient world, normally in Greece and Italy. Course content varies from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): 1.0 credit in Greek and Roman Studies, any level (CLCV, GREK, or LATN. Permission of the unit is required to repeat this course.

Hours to be arranged.

CLCV 3701 [0.5 credit] Studies in Greek Literature

A study of an author or topic in Greek literature. Contents of this course vary from year to year.

Also listed as ENGL 3008.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) at second year level or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3702 [0.5 credit] Studies in Roman Literature

A study of an author or topic in Roman literature.

Also listed as ENGL 3009.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) at second year level or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 4000 [0.5 credit]

Field Work II: Greek and Roman World

Students participate for a minimum of three weeks in a position of responsibility (for example, as a trench supervisor or lab assistant) on an archaeological field project relevant to the Greek and Roman world. Includes: Experiential Learning Activity

Also listed as ARCY 4000.

Prerequisite(s): CLCV 3300 and permission of the unit. Permission of the unit is required to repeat this course. Field work

CLCV 4210 [0.5 credit] Topics in Ancient History

Intended for Honours students in History and Classics who should normally be in the third and fourth-years.

Includes: Experiential Learning Activity

Also listed as HIST 4210.

Prerequisite(s): CLCV 2902 (HIST 2902),

CLCV 2903(HIST 2903) or CLCV 2904 (HIST 2904), CLCV 2905 (HIST 2905) or CLCV 3201 or CLCV 3202 or

permission of the unit. Seminar three hours a week.

CLCV 4800 [0.5 credit]

Seminar in Greek and Roman Studies

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the Greek and
Roman Studies B.A. program, or permission of the
department.

Seminar three hours a week.

CLCV 4801 [0.5 credit]

Seminar in Greek and Roman Studies

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in

Prerequisite(s): fourth-year standing in the Greek and Roman Studies B.A. program, or permission of the

department.

Seminar three hours a week.

CLCV 4900 [0.5 credit]

Directed Readings and Research

These courses consist of supervised readings and research projects in a specific area of Classical Civilization to be chosen in consultation with a faculty Supervisor who agrees to oversee a student's proposed research. Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing and permission of the unit.

Co-operative Education (COOP)

Co-op (COOP) Courses

COOP 1000 [0.0 credit]

Co-op Preparation

This mandatory course introduces Co-op students to the Co-operative Education Program, job search, application, and interview processes while preparing students for the transition from university to a professional work environment. Graded SAT/UNSAT.

Prerequisite(s): Restricted to co-op students. Online eight-week six-module course.

Cognitive Science (CGSC)

Cognitive Science (CGSC) Courses

CGSC 1001 [0.5 credit]

Mysteries of the Mind

Challenges faced in understanding the mind, and some of the approaches cognitive science has brought to bear on them. Topics may include the nature of knowledge, how we learn, the extent to which human thinking is rational, biases in thinking, and evolutionary influences on cognition.

Lectures three hours per week.

CGSC 1005 [0.5 credit]

Computational Methods in Cognitive Science

Introduction to computational methods, with an emphasis on programming. Topics and assignments will focus on applications in cognitive science. No prior computing experience required.

Includes: Experiential Learning Activity Lecture three hours and tutorial one and a half hours a week.

CGSC 2001 [0.5 credit] Theories in Cognitive Science

An integrated background of the discipline of Cognitive Science, with an historical overview (1940's onward) and examination of the extent to which the discipline has assimilated the collective knowledge of contributing disciplines (e.g., psychology, philosophy, linguistics, artificial intelligence and neuroscience).

Prerequisite(s): second-year standing and FYSM 1607 or CGCS 1001, or permission of the Department. Lectures three hours a week.

CGSC 2002 [0.5 credit]

Methods in Cognitive Science

Selected topics in cognitive science covered from the perspectives of psychology, computer science, linguistics, philosophy, and other related disciplines. Students may be required to complete independent research projects.

Includes: Experiential Learning Activity

Prerequisite(s): CGSC 1001 or FYSM 1607, second year standing, or permission of the Department. Restricted to students enrolled in B.Cog.Sc. programs.

Seminars and tutorials six hours per week.

CGSC 3004 [0.5 credit]

Philosophy and Cognitive Science

An examination of the significance and role of philosophy in cognitive science. Topics may include: philosophical methods for studying the mind, prospects for naturalizing consciousness and intentionality, assessing competing models of the mind.

Prerequisite(s): CGSC 2001 and PHIL 2501, and third-vear standing.

Seminar three hours per week.

CGSC 3201 [0.5 credit] Cognitive Processes

An examination of research findings on cognitive processes. Topics may include attention, speech perception, memory, intelligence, reasoning, learning, working memory, reading, and mathematics.

Prerequisite(s): third-year standing, and CGSC 2001 or PSYC 2700.

Seminar three hours per week.

CGSC 3301 [0.5 credit]

Language and Cognitive Science

Issues related to language and cognitive science are examined through a detailed consideration of selected topics.

Prerequisite(s): third-year standing, and CGSC 2001. Seminar three hours per week.

CGSC 3501 [0.5 credit] Cognitive Neuroscience

Issues related to the role of cognitive neuroscience research in cognitive science are examined through a detailed consideration of selected topics.

Prerequisite(s): third-year standing and CGSC 2001. Seminar, three hours per week.

CGSC 3601 [0.5 credit]

Artificial Intelligence and Cognitive Science

An introduction to the contribution of artificial intelligence and computer modeling of cognitive processes to cognitive science.

Includes: Experiential Learning Activity
Precludes additional credit for CGSC 4001.
Prerequisite(s): third-year standing and CGSC 2002
and (CGSC 1005 or COMP 1005). Restricted to students enrolled in B.Cog.Sc. Honours.

Seminars and labs six hours per week.

CGSC 3603 [0.5 credit]

Artificial Intelligence: Philosophical and Ethical Issues

Topics examined through the lens of philosophy and cognitive science may include humans' obligations towards AI, sentient AI, implications of AI for models of cognition, designing ethical AI systems, implications of using AI in healthcare, and social inequality and job displacement related to AI.

Also listed as PHIL 3503.

Prerequisite(s): CGSC 2001 or PHIL 2501 and third-year standing in Cognitive Science or Philosophy. Seminar 3 hours per week.

CGSC 3704 [0.5 credit]

Cognitive Science and the Digital Humanities

Exploration of the roles of human and artificial cognition in the digital humanities. Topics may include virtual and augmented reality as applied to the humanities, cognitive issues in hypertext and hypermedia; linguistic and philosophical considerations in digital media, cognitive narratology, and artificial intelligence.

Also listed as DIGH 3704.

Prerequisite(s): CGSC 2001 or DIGH 2001 and third-year standing.

Seminar three hours per week.

CGSC 3908 [0.5 credit]

Honours Seminar in Cognitive Science

Major theories and empirical approaches within Cognitive Science are examined through a detailed consideration of selected topics. Students are required to complete independent research projects to prepare for their fourth-year honours theses.

Includes: Experiential Learning Activity
Precludes additional credit for CGSC 3001 (no longer offered) and CGSC 3002 (no longer offered).
Prerequisite(s): third year standing, CGSC 2001 and CGSC 2002, and enrolment in B. Cog. Sc. Honours with a CGPA in the major requirements of 8.0.
Seminars and tutorials six hours per week.

CGSC 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

CGSC 4601 [0.5 credit] Cognitive Architectures

Cognitive architectures and how to evaluate them against human data; how to create cognitive models using cognitive architectures such as ACT-R.

Prerequisite(s): third-year standing, CGSC 2001, and (CGSC 1005 or COMP 1005).

Also offered at the graduate level, with different requirements, as CGSC 5601, for which additional credit is precluded.

Seminar three hours per week, tutorial one and a half hours per week.

CGSC 4605 [0.5 credit]

Hyperdimensional Cognitive Models

Modelling cognition using artificial intelligence techniques such as reinforcement learning, vector-symbolic models, neural networks, and/or machine learning.

Prerequisite(s): third-year standing, (CGSC 1005 or COMP 1005), CGSC 2001, and CGSC 3601.

Also offered at the graduate level, with different requirements, as CGSC 5605, for which additional credit is precluded.

Seminar three hours per week, tutorial one and a half hours per week.

CGSC 4801 [0.5 credit] Independent Study

A reading or research course for selected students who wish to investigate a particular topic of interest. Normally students may not offer more than one credit of independent study in their total program (including independent study credits taken through other departments).

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing and
permission of the Department.

CGSC 4802 [0.5 credit] Independent Study

A reading or research course for selected students who wish to investigate a particular topic of interest. Normally students may not offer more than one credit of independent study in their total program (including independent study credits taken through other departments).

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing and
permission of the Department.

CGSC 4900 [0.5 credit]

Special Topics in Cognitive Science

The topic of this course will vary from year to year. Students may register in more than one section of CGSC 4900 but may register in each section only once. Prerequisite(s): each section will have its own prerequisites and permission of the department if is required.

Seminar three hours per week.

CGSC 4908 [1.0 credit] Honours Thesis

Interdisciplinary thesis. In developing a thesis, students must consult the Undergraduate Supervisor. Only the Undergraduate Supervisor can assign a supervisor or grant approval to register in this course. Faculty regulations governing Honours Research Essays and Honours Theses apply.

Includes: Experiential Learning Activity
Precludes additional credit for CGSC 4909.
Prerequisite(s): fourth year standing, CGSC 3908, and enrolment in B.Cog.Sc. Honours with a major CGPA of 8.0.

CGSC 4909 [1.0 credit] Honours Project

Interdisciplinary project. Students engage in one or more group research projects.

Includes: Experiential Learning Activity
Precludes additional credit for CGSC 4908.

Prerequisite(s): 4th year standing, enrolment in B. Cog.

Sc. Honours. Seminar

Communication and Media Studies (COMS)

Communication and Media Studies (COMS) Courses

COMS 1001 [0.5 credit] Foundations: Media History

An exploration of media history, patterns of change, and key approaches to their study.

Precludes additional credit for COMS 1000 (no longer offered).

Lecture three hours a week.

COMS 1002 [0.5 credit]

Foundations: Contemporary Communication and Media

An exploration of communication and media in relation to contemporary political, technological and cultural issues, with a focus on Canada.

Precludes additional credit for COMS 1000 (no longer offered).

Lecture three hours a week.

COMS 1003 [0.5 credit] Digital Skills for Media Studies

This course is intended to build on and reinforce digital skills and strengthen students' capacity to navigate and adapt to different digital skills requirements in courses across our B.CoMS program.

Includes: Experiential Learning Activity

Prerequisite(s): First-year standing and enrollment in Communication and Media Studies (including BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures, laboratory, and tutorial three hours a week.

COMS 1004 [0.5 credit]

Writing and Reading Skills for Media Studies

Workshop to strengthen writing skills in communication and media studies and prepare students for coursework across the B.CoMS program.

Includes: Experiential Learning Activity

Lectures two hours a week, tutorials one hour a week

COMS 2003 [0.5 credit]

Theoretical Foundations in Communication and Media Studies

The development of communication theory in the context of major social, economic and cultural periods and events. Emphasis on the central debates and traditions that have shaped and defined the field.

Precludes additional credit for COMM 2101 (no longer offered) and COMM 2100 (no longer offered).

Prerequisite(s): COMS 1001 and COMS 1002, and second-year standing in Communication and Media Studies (including BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures and discussion groups three hours a week.

COMS 2004 [0.5 credit]

Introduction to Communication Research

Introduction to the scientific method as interpreted through major traditions in Communication and Media Studies. The course addresses the relationship between theory and evidence, research design, ethics and data management.

Includes: Experiential Learning Activity
Precludes additional credit for COMM 2000 (no longer offered), COMM 2001 (no longer offered).
Prerequisite(s): COMS 1001 and COMS 1002, and second year standing in Communication and Media Studies (including BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures and discussion three hours a week.

COMS 2005 [0.5 credit] Introduction to Communication Practice

Learn to communicate ideas and arguments using different media forms and platforms. Topics may include photography, graphic design, audio, video, information design, and generative artifical intelligence tools.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing and enrolment in Communication and Media Studies, or permission of the School of Journalism and Communication.

Lecture two hours a week, lab one hour a week.

COMS 2200 [0.5 credit] Big Data and Society

How big data and small data shape society. Databases as a form of media. Topics may include: data policy and regulation, the politics and ethics of big data, data and decision-making, and data as discourse.

Includes: Experiential Learning Activity

Also listed as DIGH 2200.

Prerequisite(s): Second-year standing or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 2300 [0.5 credit]

Communication as Propaganda

How business, government, and civil society actors have used media messages to persuade, influence, and manipulate the public. The impacts of propaganda on individuals and society, the roles of different media technologies in facilitating propaganda, and public resistance to propaganda.

Prerequisite(s): Second-year standing or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 2400 [0.5 credit]

Climate Change and Communication

The class examines the role of communication in shaping the relationship of climate change, science, politics, popular culture, social movements, technology, and societal transformation.

Prerequisite(s): Second year standing or permission from the School of Journalism and Communication.

Lecture, three hours a week

COMS 2500 [0.5 credit]

Communication and Science

How expert knowledge (particularly scientific, medical, and technical) is communicated in the public realm. Topics may include scientific advances and new technologies, health risks, environmental/ climate change, and cultural/ ideological positioning of science.

Prerequisite(s): second-year standing or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 2501 [0.5 credit] Media Law

A survey of laws that affect the Canadian media including the development of freedom of expression, the Charter of Rights and Freedoms, and statutory and common-law limitations on freedoms of the press, including publication bans, libel and contempt of court.

Also listed as JOUR 2501, MPAD 2501.

Precludes additional credit for COMM 2501 (no longer offered).

Prerequisite(s): COMS 1001 or COMS 1002 or JOUR 1001 or JOUR 1002 or PAPM 1000, and secondyear standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication. Lecture three hours a week.

COMS 2504 [0.5 credit]

Language and Communication

Some of the central topics in the study of language and communication as pursued by linguists and philosophers, including the nature of meaning, the connections between language, communication and cognition, and language as a social activity.

Also listed as PHIL 2504, LING 2504.

Precludes additional credit for COMM 2504 (no longer

Prerequisite(s): second-year standing.

Lectures three hours a week.

COMS 2600 [0.5 credit]

Communication and Culture

An introduction to the major industries, institutions, regulatory frameworks and key organizations responsible for cultural production in Canada.

Prerequisite(s): Second-year standing or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 2700 [0.5 credit]

Global Media and Communication

An introduction to global media and communication, with an emphasis on debates about media power and expansion, digitalization, technology transfer, and societal implications/changes. Students will investigate historical and contemporary contexts of global and transnational communication through a variety of approaches and perspectives.

Prerequisite(s): Second-year standing or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3001 [0.5 credit]

Quantitative Research in Communication

An introduction to basic statistical methods in media and communication studies.

Includes: Experiential Learning Activity

Precludes additional credit for COMM 3001 (no longer

Prerequisite(s): COMS 2004 and third-year standing in Communication and Media Studies, or third-year standing in BPAPM- or BGInS-related specializations and streams, or permission of the School of Journalism and Communication.

Lecture and lab three hours a week.

COMS 3002 [0.5 credit]

Qualitative Research in Communication

An introduction to interpretive methods in media and communication studies.

Includes: Experiential Learning Activity

Precludes additional credit for COMM 3002 (no longer offered).

Prerequisite(s): COMS 2004 and third-year standing in Communication and Media Studies, or third-year standing in BPAPM- or BGInS-related specializations and streams, or permission of the School of Journalism and Communication.

Lectures and discussion three hours a week.

COMS 3003 [0.5 credit] Media and Crime

A critical exploration of the mediation of crime and violence in historical and contemporary contexts. Topics may include celebrity criminals, true crime media, news, photography, courtroom TV, victimhood, and vigilante justice.

Prerequisite(s): Third-year standing and enrollment in Communication and Media Studies (including BGInS related specializations and streams) or third-year standing in Criminology and Criminal Justice (BA / Honours streams), or permission of the School of Journalism and Communication.

Lecture three hours a week.

COMS 3100 [0.5 credit] Introduction to Political Management

Introduction to the field of political management. The institutional, legislative and ethical context in which party strategists, campaign managers, pollsters, lobbyists and civil society operate. Related administrative and communications skills.

Also listed as POLM 3000, PSCI 3410.

Precludes additional credit for COMM 3100 (no longer offered).

 $\label{pre-equisite} Pre-equisite (s): third-year standing.$

Lectures three hours a week.

COMS 3108 [0.5 credit]

Media Industries and the Network Society

Examines the theoretical frameworks and major issues and debates relating to media industries and institutions in Canada and internationally.

Includes: Experiential Learning Activity

Precludes additional credit for COMM 3108 (no longer offered).

Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM and BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3109 [0.5 credit]

Communication, Culture and Identity

Examines the relationship between media, communication, and identity categories. The course explores identity formation as a cultural phenomenon including questions of race, ethnicity, gender, class, and sexuality.

Precludes additional credit for COMM 3109 (no longer offered).

Prerequisite(s): third-year standing and enrollment in Communication and Media Studies (including BGInS related specializations and streams) or in the Minor in Critical Race Studies, or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3110 [0.5 credit]

Comic Books and Graphic Novels

The history, political economy, and culture of comics as a distinct medium of communication, and the relationship between comic book publishing and other cultural industries.

Prerequisite(s): Third year standing and enrollment in Communication and Media Studies or permission from the School of Journalism and Communication.

Lecture, three hours a week

COMS 3111 [0.5 credit] Racism and Digital Media

Explores the historical, social, and systemic underpinnings of racism in relation to digital media. The course considers the emergence of digital media and its impact on racism. Students will learn about several relations, from World War II computers, to Web 2.0, to activism, and more.

Prerequisite(s): Third year standing in Communication and Media Studies or permission from the School of Journalism and Communication.

Lecture, three hours a week

COMS 3302 [0.5 credit] Political Communication

Examines the relationship between various kinds of communication and political activity in a variety of contexts. Case studies will be drawn from speeches, political campaigns, and debates, using a variety of media forms, from photographs to web sites.

Includes: Experiential Learning Activity

Precludes additional credit for COMM 3302 (no longer offered).

Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3308 [0.5 credit]

Critical Studies in Advertising and Consumer Culture

A critical analysis of major constructs and basic mechanisms of advertising, social marketing and other aspects of consumer culture. The course examines the social, political-economic and cultural implications of consumer culture.

Precludes additional credit for COMM 3301 (no longer offered) and COMM 3308 (no longer offered).

Prerequisite(s): third-year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lectures and discussion groups three hours a week.

COMS 3310 [0.5 credit]

Critical Perspectives of Public Relations

A critical examination of key aspects of public relations, including histories of PR, media representations of PR, gender and public relations, and the role of PR in business, politics and civil society.

Includes: Experiential Learning Activity

Precludes additional credit for COMM 4304 (no longer offered).

Prerequisite(s): third-year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3311 [0.5 credit]

Media and Communication in Regional Contexts

Provides a historical overview of the development of media technologies, and an understanding of the place of media within the political, regulatory, and legal activities of different international regions (e.g., Europe, Asia, Africa, Latin America, etc.).

Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM and BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3400 [0.5 credit]

Ethical Controversies in Media and Communication

Explores ethical problems and controversies relating to research in media and communication. Focuses on rights and responsibilities of researchers and practitioners as relates to media consumers, producers, and professional communicators in an age when communication circulates quickly within and across borders and other boundaries. Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM and BGInS related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3401 [0.5 credit]

Communications Regulation in Canada

Examines historical and contemporary issues in the regulation of communication practices and institutions in Canada.

Precludes additional credit for COMM 3401 (no longer offered).

Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations),or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3403 [0.5 credit]

Communication, Technology and Culture

Examines the relationship between communication technology and society, including factors that contribute to changes in the collection, storage and distribution of information and their cultural implications.

Includes: Experiential Learning Activity

Precludes additional credit for COMM 3403 (no longer offered).

Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lecture three hours a week.

COMS 3404 [0.5 credit]

Music Industries

An introduction to the structure and history of the music industries.

Also listed as MUSI 3403.

Precludes additional credit for COMM 3404 (no longer offered).

Prerequisite(s): second year standing.

Lectures three hours a week.

COMS 3406 [0.5 credit] Media Audiences and Users

Examines the role of audiences in contemporary media industries. Topics include history of audience studies, ratings and the audience commodity, active audience theory, and media fandom.

Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication

Lectures three hours a week.

COMS 3407 [0.5 credit]

Comparative Media Studies

The comparative study of one or more media organizations and/or types of media content with reference to their operation, audiences, and impacts.

Also listed as JOUR 3407.

Precludes additional credit for COMM 3407 (no longer offered).

Prerequisite(s): Third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3410 [0.5 credit]

Visual Media and Communication

Examines the central importance of visual imagery in contemporary media, culture and everyday life. Draws connections between historical/contemporary explanations of 'the visual,' and how texts and technologies reflect the context and cultural values of the environments that produce them, and the challenges for regulation. Includes: Experiential Learning Activity

Prerequisite(s): third year standing in Communication and

Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3411 [0.5 credit] Media and Social Activism

Examines links between media and activism through the lens of past and present social movements and protest events. Addresses leading theories that help conceptualize various types of activist movements, with a focus on the role of media in shaping activist identity and political opportunity.

Includes: Experiential Learning Activity

Prerequisite(s): third year standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3412 [0.5 credit]

Communication and Health

The concept of health as a sociocultural phenomenon; the many ways that health issues are communicated, defined, represented, and framed.

Prerequisite(s): third year standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 3500 [0.5 credit]

Current Issues in Communication and Media Theory

Examines theoretical debates and issues facing the field of Communication and Media Studies today.

Precludes additional credit for COMM 2101, COMM 2102

Precludes additional credit for COMM 2101, COMM 2102 (no longer offered).

Prerequisite(s): COMS 2003 and third-year standing in Communication and Media Studies (including BGInS related specializations and streams), or permission of the School of Journalism and Communication.

Lectures and discussion groups three hours a week.

COMS 3600 [0.5 credit]

Communication and Community Service Learning

An experiential learning course that provides students with opportunities to engage in communication strategies and community service learning. Focuses on how methodological approaches drawn from communication and media studies scholarship can be applied to the work of community organizations.

Includes: Experiential Learning Activity

Prerequisite(s): Third year standing and enrollment in Communication and Media Studies (including BGInS related specializations and streams) or permission of the School of Journalism and Communication. Open to students in the Combined Honours program for whom COMS is their primary degree.

Workshop three hours a week.

COMS 3601 [0.5 credit]

Communication Strategies A hands-on introduction to de

A hands-on introduction to developing, designing, and executing strategic communications campaigns. Emphasis on understanding how effective communications strategies can be designed to help organizations achieve goals by making appeals to different audiences.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing and enrolment in Communication and Media Studies (including related BGInS specializations and streams), or permission of the School of Journalism and Communication.

Workshop three hours a week.

COMS 3800 [0.5 credit]

Special Topic in Communication and Media Studies

A selected topic not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the Communication and Media Studies program regarding the topic offered.

Prerequisite(s): third-year standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lecture three hours a week.

COMS 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

COMS 4001 [0.5 credit] Sport and/as Media

A critical exploration of the culture and political economy of sport including cultural norms and questions of representation in and around sports across an array of media.

Prerequisite(s): Fourth year Honours standing in Communication and Media Studies or permission from the School of Journalism and Communication.

Seminar, 3 hours a week

COMS 4002 [0.5 credit] Media Fandom

Examines media fans as audiences. Topics may include fan cultures, digital fandom, identity, and audience labour. Prerequisite(s): Fourth year Honours standing in Communication and Media Studies or permission from the School of Journalism and Communication. Recommended: COMS 3406: Media Audiences and Users.

Seminar, 3 hours a week

COMS 4004 [0.5 credit] Communication and Discourse

Examines the development of theory and methods related to discourse and its use in the analysis of images and texts.

Precludes additional credit for COMM 4004 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4305 [0.5 credit] Media and Religion

Critical examination of the ways religion mediates communicative practices, engages with media technologies, and is mediated in mainstream or popular culture. Topics may include: secularization and post-secularization; the politics of representation; religious organizations as communicative actors; fundamentalism. Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication. Lectures three hours a week.

COMS 4306 [0.5 credit]

Media and Conflict

Media representations of conflict such as war and terrorism, and how they influence the collective imagination.

Precludes additional credit for COMM 4306 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BGInS related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4311 [0.5 credit]

Environmental Communication

Examines environmental, animal, and earth observing media and pays special attention to the production of visual materials. The course explores the influence of media systems on the production, dissemination, and meaning of environmental observations and looks at sites of contemporary environmental contention.

Prerequisite(s): fourth-year Honours standing and

Prerequisite(s): fourth-year Honours standing and enrollment in Communication and Media Studies or in the Minor in Environmental and Climate Humanities, or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4312 [0.5 credit] Crisis and Risk Communication

Examines crises and risks from the perspective of communication. The course explores the role of various media in shaping risk perceptions and constructions of crisis, the politics of crisis and risk management, symbolic dimensions in crisis construction, and ethical dilemmas. Includes: Experiential Learning Activity
Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM

Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4313 [0.5 credit] Screen Studies

Issues in the past, present and future of film, television and related media. Screens are examined as media that represent and shape values and culture, as technologies that are produced and purchased, and as objects that are regulated through policy.

Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4315 [0.5 credit]

Communication and the Built Environment

How communication occurs in conjunction with the built environment, with special attention to cultural artefacts such as houses, schools, factories, prisons, office buildings, roads, parks, and the urban (and suburban) environment. Various models, theories, and philosophies of the built environment are considered.

Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4316 [0.5 credit]

Indigenous Media in Global Contexts

Overview of Indigenous global media exploring film and film festivals, television networks, media arts, and the Internet. We will discuss struggles over mediated self-representation as well as debates over what constitutes Indigenous media relating to aesthetics, community affiliation, and identity.

Includes: Experiential Learning Activity
Prerequisite(s): fourth year Honours standing in
Communication and Media Studies (including BGInS
related specializations), or permission of the School of
Journalism and Communication.

Lectures three hours a week.

Lectures three hours a week.

COMS 4317 [0.5 credit] Digital Media and Global Network Society

A critical and analytical understanding of the way digital media are reshaping society and are shaped by societal structures and forces; on the implications of digital media on various aspects of social life globally, including culture, politics, law, privacy, journalism, and collective organizing/social movements.

Includes: Experiential Learning Activity
Prerequisite(s): Fourth year Honours standing in
Communication and Media Studies (including BPAPM
and BGInS related specializations), or permission of the
School of Journalism and Communication.

5 credit] COMS 4401 [0.5 credit]

Global Internet Policy and Governance

Public interest and policy battles over critical internet resources and implications for development of the internet, citizens' rights and freedoms, the economy, and democratic culture; common carriage, privacy, security and surveillance, access, speech rights, and diversity of information sources.

Includes: Experiential Learning Activity
Precludes additional credit for COMM 4401 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM and BGInS related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4403 [0.5 credit] Digital Media Industries

Key approaches to the study of media as industries and how economics, markets and technologies intersect with social choices, politics and power to shape how decisions are made about the design, ownership, organization and control of media.

Includes: Experiential Learning Activity
Precludes additional credit for COMM 4403 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4405 [0.5 credit] The Networked Self

How notions of identity are changing as we conduct our lives through networked media and communication such as social media, online search, the Internet of Things, and wearable devices. Subjectivity, personhood, posthumanism, algorithmic control, and privacy. Includes: Experiential Learning Activity

Prerequisite(s): Fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4406 [0.5 credit]

Open Government and Communication

The contemporary open government movement; how communication can be used to improve governance and to foster a more collaborative relationship between governments and citizens. Access to information, the challenges of open data, expectations of transparency, and models of citizen engagement/consultation. Includes: Experiential Learning Activity Prerequisite(s): Fourth-year Honours standing in Communication and Media Studies (including BPAPM and BGInS related specializations), or permission of the School of Journalism and Communication.

COMS 4407 [0.5 credit]

Lectures three hours a week.

Communication and Critical Data Studies

Theoretical perspectives, ethical problems, and contemporary issues relevant to communication and data studies. Students will critically examine the rise of 'big data' and 'datafication' as socio-technical phenomena that have become a crucial part of our communication landscape.

Includes: Experiential Learning Activity Prerequisite(s): Fourth-year Honours standing in Communication and Media Studies (including BPAPM related specializations), or permission of the School of Journalism and Communication. Lectures three hours a week.

COMS 4408 [0.5 credit] **Creative Work**

Contemporary trends affecting creative work in cultural industries. How careers in the arts, culture and media are increasingly desirable as a way for individual workers to find personal fulfillment and as a means of reinvigorating post-industrial economies.

Prerequisite(s): fourth-year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4410 [0.5 credit] **Mobile Media**

Critical examination of the history, development, and expansion of mobile media and its impact on culture. connectivity, and practice; locative media practices, geocoding, wireless communication, mobile technologies, and user experience in everyday life.

Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4411 [0.5 credit]

Algorithmic Culture

The ways in which computerized algorithms engage in the traditional work of culture: the sorting, classifying, and hierarchizing of people, places, objects, and ideas to produce new habits of thought, conduct, expression, and material outcomes.

Includes: Experiential Learning Activity Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4412 [0.5 credit] **Game Studies**

Games as media. The history of gaming and mediated play in terms of technology and form, industry, labour, gender and subcultural practice.

Includes: Experiential Learning Activity Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BPAPM) related specializations), or permission of the School of Journalism and Communication. Lectures three hours a week.

COMS 4501 [0.5 credit] **Digital Media Production**

This workshop introduces practice-based tools and techniques relevant in contemporary professional communication, such as basic web development, podcasting, and digital photography. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.

Workshop three hours a week.

COMS 4502 [0.5 credit] Storytelling in the Digital Age

In this workshop students learn to write compelling stories for the digital age. They engage with examples of great storytelling across print and online platforms, from magazines and newspapers to blogs and podcasts, to gain a deeper understanding of what makes some stories stand out.

Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.

Workshop three hours a week.

COMS 4503 [0.5 credit]

Visualizing Social Media: Hashtags, keywords, & conversations

This workshop introduces a range of methods and practices in data mining and analytics. Techniques include data and text mining, data analysis (including sentiment and social network analysis), data visualization and modeling. Opportunity to work with analytics and mapping software on students' own projects.

Includes: Experiential Learning Activity

Prerequisite(s): COMS 3001 and fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and Communication.

Workshop three hours a week.

COMS 4504 [0.5 credit]

Engaging the Public: Stakeholders, participation & consultation

This workshop introduces the challenges of conceptualizing and conducting public consultations. This includes audience or participant selection, a range of consultation techniques and formats, marketing and communication, analysis, as well as an awareness of policies and regulations governing consultations. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in B.Co.M.S. Honours and permission of the School of Journalism and

Workshop three hours a week.

COMS 4505 [0.5 credit]

Communication.

Professional Writing and Speaking

In this workshop students develop skills in professional written communication, such as press releases, blogs, opeds, policy briefs, and speeches. Students will also hone their public speaking skills presenting their written work in different formats.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.Co.M.S.
Honours and permission of the School of Journalism and
Communication.

Workshop three hours a week.

COMS 4506 [0.5 credit]

Event Management and Community Partnerships

This workshop introduces the stages of event management for potential community partners. This includes conceptualization, marketing and sponsorships, production and financing, to risk management. Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in B.Co.M.S.
Honours and permission of the School of Journalism and Communication.

Workshop three hours a week.

COMS 4507 [0.5 credit]

Professional Communication Research

Students will work in a team-based environment to carry out empirical research in support of current faculty-led projects. In addition to learning advanced research techniques, students will develop project management and collaborative research skills.

Includes: Experiential Learning Activity
Precludes additional credit for COMM 4000 (no longer offered), COMM 4002 (no longer offered), COMS 4006 (no longer offered).

Prerequisite(s): COMS 3001 or COMS 3002, and fourthyear Honours standing in Communication and Media Studies (including BPAPM related specializations), and permission of the School of Journalism and Communication.

Workshop three hours a week.

COMS 4602 [0.5 credit] Children, Youth and Media

Historical and contemporary ways in which children and youth relate to the media and popular culture. Precludes additional credit for COMM 4602 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication. Lectures three hours a week.

COMS 4603 [0.5 credit]

Diaspora and Communication

The impact of various forms of diasporic communication on the shaping of contemporary national and international society.

Precludes additional credit for COMM 4603 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BGInS related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4604 [0.5 credit] Media, Gender and Sexuality

Critical examination of the intersection of media and gender, including constructions of femininity, masculinity, and other issues of sexuality.

Precludes additional credit for COMM 3601 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4605 [0.5 credit] Media, Race and Ethnicity

Critical examination of how issues of race and ethnicity intersect with contemporary media.

Precludes additional credit for COMM 3602 (no longer offered).

Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BGInS related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4606 [0.5 credit] **Global Media and Popular Culture**

Key theories and concepts that have shaped the study of global media and its impact on popular cultures around the

Prerequisite(s): fourth year Honours standing in Communication and Media Studies (including BGInS related specializations), or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4607 [0.5 credit] **Communication and Food**

Food in and as communication. Food and identity, food and culture, food environments, food systems, food politics, and food and community development. Includes: Experiential Learning Activity Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication. Lectures three hours a week.

COMS 4608 [0.5 credit] **Sound Studies**

How hearing and listening practices have changed over time, and the role of sound technology in shaping our understanding of each other, our world, and ourselves. Prerequisite(s): fourth year Honours standing in Communication and Media Studies, or permission of the School of Journalism and Communication. Lectures three hours a week.

COMS 4800 [0.5 credit]

Special Topic in Communication and Media Studies

A selected topic not ordinarily treated in the regular course program. The choice of topic varies from year to year. Check with the Communication and Media Studies program regarding the topic offered.

Prerequisite(s): fourth year Honours standing in Communication and Media Studies or permission of the School of Journalism and Communication.

Lectures three hours a week.

COMS 4908 [1.0 credit] **Honours Research Essay**

The Honours Research Essay (HRE) provides eligible students with an opportunity to complete an independent research essay under the supervision of a faculty member. The HRE must be completed over two consecutive academic terms, beginning in the fall term. Includes: Experiential Learning Activity Precludes additional credit for COMM 4908 (no longer offered).

Prerequisite(s): fourth year honours standing in Communication and Media Studies (including BGInS related specializations), with a CGPA of 10.0 or higher, or permission of the Undergraduate Supervisor. Unscheduled.

Communication Courses for Disciplines and Professions (CCDP)

Communication Courses for Disciplines and Professions (CCDP) Courses

CCDP 2004 [0.5 credit]

Communication Skills for NET

Development of competence in professional written and oral communication in relation to network design, development, and management. Focus on written documents (proposals, technical explanations, specifications, reports), and oral presentations. Includes: Experiential Learning Activity Precludes additional credit for NET 2004 (no longer offered).

Prerequisite(s): restricted to students with second-year standing in the B.I.T. degree program. Seminars three hours a week.

CCDP 2100 [0.5 credit]

Communication Skills for Engineering Students

Development of competence in professional written and oral communication in engineering. Focus on written documents (proposals, technical explanations, research reports, summaries) and oral presentations. Attendance is mandatory.

Includes: Experiential Learning Activity

Prerequisite(s): restricted to students with second-year standing in the Bachelor of Engineering program. All ESL requirements must be successfully completed; this course may not be taken concurrently with any ESLA course. Not repeatable for credit when successfully completed with a grade of C or higher.

Seminars three hours a week.

CCDP 3003 [0.5 credit]

Communication Skills for IMD

Development of competence in professional written and oral communication in the field of interactive multimedia and design. Focus on written documents (needs analyses, proposals, technical explanations, reports), and oral presentations.

Includes: Experiential Learning Activity Precludes additional credit for IMD 3003 (no longer offered).

Prerequisite(s): restricted to students with second-year standing in the B.I.T. degree program.

Seminars three hours a week.

CCDP 3006 [0.5 credit] **Communication Skills for IRM**

Development of competence in professional written and oral communication in the field of information resource management. Focus on written documents (proposals, technical explanations, infographics, reports), and oral

Includes: Experiential Learning Activity Prerequisite(s): restricted to students with second-year standing in the B.I.T. degree program. Seminars three hours a week.

CCDP 3008 [0.5 credit] Communication Skills for OSS

Development of competence in professional written and oral communication in the field of optical systems and sensors. Focus on written documents (proposals, technical explanations, reports), and oral presentations.

Includes: Experiential Learning Activity Precludes additional credit for PLT 3008 (no longer

offered).

Prerequisite(s): Restricted to students with second-year standing in the B.I.T. degree program.

Seminars three hours a week.

Computer Science (COMP)

Computer Science (COMP) Courses Notes:

1. Some of the following Computer Science courses are cross-listed from other parts of the Calendar. In every such case, only one course is actually offered and the two numbers are alternate identifiers for this single course. Students in the B.C.S. program should register in such a course under the Computer Science (COMP) number.

COMP 0999 [0.0 credit] COMP Matters

COMP 1001 [0.5 credit]

Introduction to Computational Thinking for Arts and **Social Science Students**

An introduction to computational thinking and its applications to the arts and social sciences. Students will gain computational thinking skills by exploring data representation, basic programming concepts, a selection of algorithms, and advanced usage of software packages for the arts and social sciences.

Precludes additional credit for COMP 1004 (no longer offered). This course cannot be taken for credit by students in Business, Engineering, Computer Science, Mathematics or Science.

Lectures three hours a week.

COMP 1005 [0.5 credit] Introduction to Computer Science I

Introduction to computer science and programming. Topics include: algorithm design; control structures; variables and types; linear collections; functions; debugging and testing. Special attention is given to procedural programming in a modern language. computational thinking skills, and problem decomposition. Includes: Experiential Learning Activity Also listed as COMP 1405.

Precludes additional credit for BIT 1400, CGSC 1005, ECOR 1031, ECOR 1041, ECOR 1042, ECOR 1051, ECOR 1606, ITEC 1400, ITEC 1401, SYSC 1005. Lectures three hours a week, tutorial one and a half hours a week.

COMP 1006 [0.5 credit] Introduction to Computer Science II

A second course in programming emphasizing problem solving and computational thinking in an object-oriented language. Topics include abstraction, mutable data structures, methods, inheritance, polymorphism, recursion, program efficiency, testing and debugging.

Includes: Experiential Learning Activity Also listed as COMP 1406.

Precludes additional credit for BIT 2400, BUSI 2402, ITEC 2400, ITEC 2401, SYSC 2004.

Prerequisite(s): COMP 1005 or COMP 1405.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 1008 [0.5 credit]

Math for Game Programmers

Math for building 3D games. Points, vectors, normals. Dot and cross products. Transformations and inverses in leftand right-handed systems. Uses for controlling objects, cameras, and texture manipulation. Bounding boxes. planes, frustums for collision detection and visibility, fast billboarding techniques, point and sphere sweeping. Quaternions.

Prerequisite(s): one Grade 12 university preparation mathematics course.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 1405 [0.5 credit] Introduction to Computer Science I

Introduction to computer science and programming, for computer science students. Topics include: algorithm design; control structures; variables and types; linear collections; functions; debugging and testing. Special attention is given to procedural programming in a modern language, computational thinking skills, and problem decomposition.

Includes: Experiential Learning Activity Also listed as COMP 1005.

Precludes additional credit for BIT 1400, CGSC 1005, ECOR 1031, ECOR 1041, ECOR 1042, ECOR 1051, ECOR 1606, ITEC 1400, ITEC 1401, SYSC 1005. Prerequisite(s): restricted to students registered in the B.C.S. program, B.Cyber. program, B.D.S. program, combined Honours in Computer Science and Mathematics, Honours Computer Mathematics, and Honours Computer Statistics.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 1406 [0.5 credit] **Introduction to Computer Science II**

A second course in programming for BCS students, emphasizing problem solving and computational thinking in an object-oriented language. Topics include abstraction, mutable data structures, methods, inheritance, polymorphism, recursion, program efficiency, testing and debugging.

Includes: Experiential Learning Activity Also listed as COMP 1006.

Precludes additional credit for BIT 2400, BUSI 2402,

ITEC 2400, ITEC 2401, SYSC 2004.

Prerequisite(s): COMP 1005 or COMP 1405. Restricted to students registered in the B.C.S. program, B.Cyber. program, B.D.S. program, combined Honours in Computer Science and Mathematics, Honours Computer Mathematics, and Honours Computer Statistics. Lectures three hours a week, tutorial one and a half hours

a week.

COMP 1501 [0.5 credit]

Introduction to Computer Game Design

Introduction to game design and prototyping. Topics include: formal theories of fun; the mechanics-dynamicsaesthetics framework; game economies; game balance; statistical tools for analyzing game mechanics; game settings; and storytelling. Special attention is given to the attributes of games and what makes a game fun. Includes: Experiential Learning Activity Prerequisite(s): COMP 1005 or COMP 1405. Lectures three hours a week, tutorial one and a half hours

COMP 1601 [0.5 credit]

Introduction to Mobile Application Development

Introduction to developing mobile applications using the Mac OS X platform. Topics include: the Objective-C programming language; development tools; framework API's; and the Quartz graphic system. Extensive practical experience with development for Apple mobile devices such as the iPhone.

Includes: Experiential Learning Activity Prerequisite(s): COMP 1005 or COMP 1405. Lecture/lab four hours a week.

COMP 1805 [0.5 credit] Discrete Structures I

Introduction to discrete mathematics and discrete structures. Topics include: propositional logic, predicate calculus, set theory, complexity of algorithms, mathematical reasoning and proof techniques. recurrences, induction, finite automata and graph theory. Material is illustrated through examples from computing. Includes: Experiential Learning Activity Precludes additional credit for MATH 1800. Prerequisite(s): one Grade 12 university preparation

Lectures three hours a week, tutorial one hour a week.

COMP 1910 [0.5 credit] Internship

mathematics course.

The internship exposes students to industrial software development via placement in a local enterprise. This course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): Permission of the School and registration in internship option.

COMP 1911 [0.5 credit]

Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the BCS.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 1910 and registration in internship option.

COMP 2008 [0.5 credit]

User Interaction Design and Prototyping

Introduction to the principles of interaction design, including the human-centred design process, creative ideation, requirements gathering, prototyping, ethical considerations in design, rapid usability evaluation, and iterative design in a variety of user interaction paradigms.

Includes: Experiential Learning Activity Precludes additional credit for IMD 3004.

Prerequisite(s): COMP 1006 or COMP 1406 with a minimum grade of C-.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 2108 [0.5 credit]

Applied Cryptography and Authentication

Practical aspects of cryptography. Topics include: stream and block ciphers; modes of operation; hash functions; message and user authentication; authenticated key establishment protocols; random number generation; entropy; proof of knowledge; secret sharing; key distribution; pitfalls deploying public-key encryption and digital signatures.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 3109 (no longer offered), COMP 4109 (no longer offered), CSEC 2108.
Prerequisite(s): (COMP 1006 or COMP 1406) with a minimum grade of C-, and COMP 2804.

Lectures three hours a week.

COMP 2109 [0.5 credit]

Introduction to Security and Privacy

A tour of Internet security and privacy. Societal impacts and case studies. Topics from: protection goals of stakeholders; history of public key cryptography; programming languages and security; security engineering and testing; cybercrime and malware; Internet privacy and anonymity; government surveillance; regulation; ethics; blockchain applications.

Includes: Experiential Learning Activity
Prerequisite(s): (COMP 1006 or COMP 1406) with a
minimum grade of C-, and COMP 2401 with a minimum
grade of C-.

Lectures three hours a week.

COMP 2401 [0.5 credit]

Introduction to Systems Programming

Introduction to system-level programming with fundamental OS concepts, procedures, primitive data types, user-defined types. Topics may include process management, memory management, process coordination and synchronization, inter-process communication, file systems, networking, pointers, heap and stack memory management, and system/library calls.

Includes: Experiential Learning Activity

Precludes additional credit for SYSC 1006, SYSC 2006. Prerequisite(s): (COMP 1006 or COMP 1406) with a minimum grade of C-.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 2402 [0.5 credit]

Abstract Data Types and Algorithms

Introduction to the design and implementation of abstract data types and to complexity analysis of data structures. Topics include: stacks, queues, lists, trees and graphs. Special attention is given to abstraction, interface specification and hierarchical design using an object-oriented programming language.

Precludes additional credit for SYSC 2100. Prerequisite(s): (COMP 1006 or COMP 1406) with a minimum grade of C-.

Lectures three hours a week.

COMP 2404 [0.5 credit]

Introduction to Software Engineering

Introduction to object-oriented software development, with emphasis on the design and implementation of maintainable, reusable software. Topics include abstraction, modularity, encapsulation, and an introduction to design patterns.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3010, SYSC 3110.
Prerequisite(s): COMP 2401 with a minimum grade of C-.
Lectures three hours a week, tutorial one and a half hours a week.

COMP 2406 [0.5 credit]

Fundamentals of Web Applications

Introduction to Internet application development; emphasis on computer science fundamentals of technologies underlying web applications. Topics include: scripting and functional languages, language-based virtual machines, database query languages, remote procedure calls over the Internet, and performance and security concerns in modern distributed applications.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4504.

Prerequisite(s): (COMP 1006 or COMP 1406) with a minimum grade of C-.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 2501 [0.5 credit]

Computer Game Design and Development

Introduction to the practical development of computer games and engine architecture. Topics include: vector and matrix operations; coordinate systems and transformations; physical simulation; collision detection; AI; path planning; hardware-accelerated real-time rendering. Special attention is given to implementation of real-time rendering in a low-level language.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 2401 with a minimum grade of C-, and (MATH 1104 or MATH 1107).

Lectures three hours a week, tutorial one and a half hours a week.

COMP 2601 [0.5 credit] Mobile Applications

Development of applications for mobile environments taking advantage of gesture-based input and using location and presence services. Topics include introduction to low-level network services and mobile platforms, description of architectural patterns, principles of mobile development and interaction styles for network service usage.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 1601. Lecture/lab four hours a week.

COMP 2801 [0.5 credit] Introduction to Robotics

A course on programming simulated mobile robots with various sensors such as wheel encoders, distance sensors, cameras, compasses, accelerometers, and laser range finders. Topics include: programming robot behaviour; performing position estimation; implementing algorithms related to navigation, mapping, path planning, area coverage, and localization.

Includes: Experiential Learning Activity

Precludes additional credit for COMP 1807 (no longer offered).

Prerequisite(s): (COMP 1006 or COMP 1406) with a

minimum grade of C-.

Lecture/lab four hours a week.

COMP 2804 [0.5 credit] Discrete Structures II

A second course in discrete mathematics and discrete structures. Topics include: counting, sequences and sums, discrete probability, basic statistics, recurrence relations, randomized algorithms. Material is illustrated through examples from computing.

Prerequisite(s): COMP 1805 with a minimum grade of C-, or permission of the School of Computer Science for those in Combined Honours in Computer Science and Mathematics

Lectures three hours a week.

COMP 2910 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 1911 and registration in internship option.

COMP 2911 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the BCS.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 2910 and registration in internship option.

COMP 3000 [0.5 credit]

Operating Systems

Operating system implementation course stressing fundamental issues in design and how they relate to modern computer architectures. Assignments involve the modification and extension of a multitasking operating system.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4001.

Prerequisite(s): COMP 2401 with a minimum grade of Cand COMP 2402.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 3002 [0.5 credit] Compiler Construction

The structure, organization and design of the phases of a compiler are considered: lexical translators, syntactical translators, scope handlers, type checkers, code generators and optimizers. Components of a compiler will be implemented.

Prerequisite(s): COMP 2402. Lectures three hours a week.

COMP 3004 [0.5 credit]

Object-Oriented Software Engineering

Development of object-oriented software systems: theory and practice. Topics include: Computer ethics, software development processes, requirement specification, class and scenario modeling, state modeling, UML, design patterns, traceability. Students are to complete a team project.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3020, SYSC 3120,

SYSC 4120.

Prerequisite(s): COMP 2401 with a minimum grade of C-, (COMP 2404 or SYSC 3010 or SYSC 3110) with a minimum grade of C-, and (COMP 2406 or SYSC 4504). Lectures three hours a week.

COMP 3005 [0.5 credit]

Database Management Systems

Introduces students to concepts of database management systems, database design and file structures. Topics include: entity-relationship modeling and object oriented database design, data models (relational, network and object oriented), the relational algebra, SQL, normalization theory, physical data organization, object oriented databases and OQL.

Precludes additional credit for BUSI 3400.

Prerequisite(s): COMP 1805 with a minimum grade of C-, and either COMP 2402 or (SYSC 2004 and SYSC 2100). Lectures three hours a week.

COMP 3007 [0.5 credit] Programming Paradigms

An introduction to alternative programming paradigms such as functional, constraint-based, concurrent, and logic programming.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3101.

Prerequisite(s): COMP 1805 with a minimum grade of C-, COMP 2401 with a minimum grade of C-, COMP 2402, (COMP 2404 or SYSC 3010 or SYSC 3110) and (COMP 2406 or SYSC 4504).

Lectures and tutorials three to four and a half hours a week

COMP 3008 [0.5 credit]

Software Structures for User Interfaces

Concepts and principles related to building user interfaces, and applications in implementing interfaces in "front-end" programming contexts. Topics may include: reactive programming, input and output factors, application interfaces and infrastructure, typical patterns used to implement them, and organization and management of these aspects within software.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4130.
Prerequisite(s): (COMP 2404 or SYSC 3010 or
SYSC 3110) and (COMP 2406 or SYSC 4504).

Lectures three hours a week.

COMP 3009 [0.5 credit] Computer Graphics

An overview of computer graphics covering rendering, modeling, and animation. Topics include geometric primitives and modeling; image formation algorithms such as ray tracing and the Z-buffer; lighting, shading, and texture; and introduction to physics-based animation and character animation.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 2401 with a minimum grade
of C-, COMP 2402, MATH 1007, and (MATH 1104 or
MATH 1107).

Lectures/lab four hours a week.

COMP 3105 [0.5 credit] Introduction to Machine Learning

An introduction to methods for automated learning of relationships on the basis of empirical data. Includes topics in supervised and unsupervised machine learning and deeper knowledge of specific algorithms and their applications. Evaluation and quantification of performance of ML systems. Discussion of data ethics.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 4105 (no longer

offered), SYSC 4415.

Prerequisite(s): COMP 2402 and (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 2804 and (MATH 1104 or MATH 1107).
Lectures three hours a week.

COMP 3106 [0.5 credit]

Introduction to Artificial Intelligence

Principles and tools used in Artificial Intelligence. Fundamentals of Knowledge Representation and Reinforcement Learning and Nature-Based computing. Methods for non-adversarial problem solving including non-exhaustive and heuristic-based strategies for searching the state space. Methods for adversarial problem solving, modeled as two-person and multi-person games.

Includes: Experiential Learning Activity Precludes additional credit for COMP 4106 (no longer offered), SYSC 4416.

Prerequisite(s): COMP 2402 and (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 2804.

Lectures three hours a week.

COMP 3203 [0.5 credit] Principles of Computer Networks

This is an introductory course to the field of Network Computing, Topics include: Protocol Architectures and Internetworking, Types of Networks, Communication Protocols, End-System and Network Traffic Management, Structure of Routing and Congestion Control. Includes: Experiential Learning Activity

Precludes additional credit for SYSC 3512, SYSC 4602. Prerequisite(s): COMP 2401 with a minimum grade of C-. and COMP 2402.

Lectures and tutorials three to four and a half hours a week

COMP 3301 [0.5 credit] Technical Writing for Computer Science

Technical communication for computer science majors, concentrating on writing scientific papers and technical reports. Principles of clarity and precision in writing and communication. Practical exercises and readings from recent technical publications will be used.

Includes: Experiential Learning Activity Prerequisite(s): COMP 2402 and (COMP 2404 or

SYSC 3010 or SYSC 3110). Lectures three hours a week.

COMP 3308 [0.5 credit] **Bioinformatics**

This practical interdisciplinary course will provide a broad overview of bioinformatics in which computer science and mathematics are applied to solve problems in molecular biology. Topics include gene prediction, sequence alignment, phylogeny, molecular interactions, macromolecular structure prediction and biological databases.

Includes: Experiential Learning Activity Also listed as BIOL 3008.

Precludes additional credit for BIOC 3008 (no longer offered).

Prerequisite(s): BIOC 2200 or BIOL 2200, or BIOL 2201, or permission of the Biochemistry Institute.

Lecture two hours a week, computer workshop three hours a week.

COMP 3400 [0.5 credit]

Computational Logic and Automated Reasoning

Applications of formal logic in computer science. Symbolic logics such as classical predicate calculus are used to represent domain knowledge, to model computational problems and to solve them by means of automated reasoners. Applications include artificial intelligence, software engineering, data management and hardware verification.

Prerequisite(s): COMP 2804. Lectures three hours a week.

COMP 3501 [0.5 credit]

Foundations of Game Programming and Computer Graphics

The theory and practice of 3D graphics for computer games. Topics include: vectors and quaternions; hierarchical transformations; camera and perspective; hardware-accelerated real-time rendering; texture and texture mapping; illumination; and particle systems. Additional topics may include rigid-body motion, character animation, shadows, and screen-space special effects. Includes: Experiential Learning Activity Prerequisite(s): COMP 2402 and (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 2501. Lectures three hours a week.

COMP 3801 [0.5 credit] Algorithms for Modern Data Sets

Algorithm design techniques for modern data sets arising in, for example, data mining, web analytics, epidemic spreads, search engines and social networks. Topics may include: data mining, hashing, streaming, clustering, recommendation systems, link analysis, dimensionality reduction, online, social networking, game theoretic and probabilistic algorithms.

Prerequisite(s): COMP 2804 with a minimum grade of B+. Lecture three hours a week.

COMP 3803 [0.5 credit]

Introduction to Theory of Computation

Theoretical aspects of computer science. Topics include: formal languages and automata theory, computability theory.

Precludes additional credit for COMP 2805 (no longer offered).

Prerequisite(s): COMP 2804. Lectures three hours a week.

COMP 3804 [0.5 credit]

Design and Analysis of Algorithms I

An introduction to the design and analysis of algorithms. Topics include: divide-and-conquer, dynamic programming, linear programming, greedy algorithms, graph algorithms, NP-completeness.

Also listed as MATH 3804.

Prerequisite(s): COMP 2402 and one of (COMP 2804 or MATH 3855 or MATH 3825 or COMP 3805).

Lectures and tutorials three to four and a half hours a week.

COMP 3805 [0.5 credit]

Discrete Structures and Applications (Honours)

Enumeration: inclusion and exclusion, recurrence relations, generating functions and applications. Graph theory: connectivity, planarity, Hamilton paths and Euler trails. Error-correcting codes. Designs and finite geometries. Symmetry and counting.

Also listed as MATH 3855.

Precludes additional credit for MATH 3805 (no longer offered) and MATH 3825.

Prerequisite(s): MATH 2100 or a grade of B or higher in MATH 2108 or MATH 3101.

Lectures three hours a week and one hour tutorial.

COMP 3807 [0.5 credit] Mathematical Software

Implementation of numerical methods using numerical software packages. Development of scientific and/ or operations research applications using application programming interfaces of numerical or optimization libraries. Functional programming for data analysis and machine learning. Experience working with Python, C++, or Java is essential.

Includes: Experiential Learning Activity

Also listed as MATH 3807.

Prerequisite(s): A grade of C- or higher in COMP 3806 or MATH 3806.

COMP 3910 [0.5 credit]

Internship
The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one

of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 2911 and registration in internship ontion

COMP 3911 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 3910 and registration in internship option.

COMP 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

COMP 4000 [0.5 credit] Distributed Operating Systems

An advanced course on the software infrastructure supporting large-scale cloud computing applications. Topics may include: distributed file systems, distributed databases, overlay networks, container orchestration, coordination services, security and privacy services, and large-scale Al pipelines.

Includes: Experiential Learning Activity

Prerequisite(s): (COMP 3000 or SYSC 4001) and

(COMP 3203 or SYSC 4602).

Also offered at the graduate level, with different requirements, as COMP 5102, for which additional credit is precluded.

Lectures three hours a week.

COMP 4001 [0.5 credit] **Distributed Computing**

Overview of distributed computing. Topics include: computational models, communication complexity, design and analysis of distributed algorithms and protocols, fault-tolerant protocols, synchronous computations. Applications may include: communication in data networks, control in distributed system (e.g., election, distributed mutual exclusion), manipulation of distributed data (e.g., ranking).

Includes: Experiential Learning Activity Prerequisite(s): COMP 1805 with a minimum grade of C-, COMP 2401 with a minimum grade of C-, and (COMP 2406 or SYSC 4504). Lectures three hours a week.

COMP 4002 [0.5 credit] Real-Time 3D Game Engines

The design and implementation of game engines for real-time 3D games including topics such as camera control, environmental effects, articulated models, terrain. vegetation, collision detection, particles, emitters, triggers, portals, waypoints, mirrors, and shadows. Prerequisite(s): COMP 2404 or SYSC 3010 or

Lectures three hours a week.

SYSC 3110.

COMP 4003 [0.5 credit] Transaction Processing Systems

Concepts and architectures of transaction processing systems and on-line transaction processing, with emphasis on data integration systems. Transaction properties and models, embedded-SQL, active rules, consistency maintenance, serializability, concurrency control, recovery, data integration systems and federated databases, introduction to transactions in web services and workflow systems.

Prerequisite(s): (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 3005. Lectures three hours a week.

COMP 4004 [0.5 credit] Software Quality Assurance

Prerequisite(s): COMP 3004. Lectures three hours a week.

Introduction to the theory and practice of Software Quality Assurance. Topics include: equivalence partitioning, testdriven testing, unit testing patterns, refactoring, software metrics, requirements engineering, scenario modeling and acceptance testing, model-based testing, state machine testing, software testing theory and tools. Includes: Experiential Learning Activity Precludes additional credit for SYSC 4101.

COMP 4008 [0.5 credit] **Evaluation and Research Methods for Human-Computer Interaction**

Fundamental Human-Computer Interaction (HCI) research and evaluation methods. Topics may include: HCI research methodologies, research ethics, expert evaluation, user studies, qualitative and quantitative data collection, statistical data analysis, information visualization, and specifying practical implications of findings.

Includes: Experiential Learning Activity Prerequisite(s): COMP 2008, COMP 3008, and STAT 2509 with a minimum grade of C- in each. Also offered at the graduate level, with different requirements, as HCIN 5403., for which additional credit is precluded.

Lectures three hours a week, tutorial one and a half hours a week.

COMP 4009 [0.5 credit]

Programming for Clusters and Multi-Core Processors

Introduction to parallel architectures, programming languages and algorithms for processor clusters and multicore processors. Distributed memory architectures, cluster computing, message passing parallel programming, multicore processors, shared memory parallel programming, use of thread libraries, parallel performance analysis. Prerequisite(s): COMP 2402 and (COMP 2404 or SYSC 3010 or SYSC 3110) and COMP 2804. Lectures three hours a week.

COMP 4010 [0.5 credit]

Introduction to Reinforcement Learning

Learn about designing and programming reinforcement learning agents to perform complex tasks in interactive environments. Topics include Markov decision processes, dynamic programming methods, Monte Carlo methods, temporal difference learning, prediction/control with function approximation, policy gradient, and deep reinforcement learning algorithms.

Includes: Experiential Learning Activity Prerequisite(s): COMP 2402, (COMP 2404 or SYSC 3010 or SYSC 3110), MATH 1007 and (MATH 1104 or MATH 1107), STAT 2507. Lectures three hours a week.

COMP 4102 [0.5 credit]

Computer Vision

The basic ideas and techniques of computer vision. The central theme is reconstructing 3D models from 2D images. Topics include: image formation, image feature extraction, camera models, camera calibration, structure from motion, stereo, recognition, augmented reality, image searching.

Includes: Experiential Learning Activity
Prerequisite(s): (COMP 2404 or SYSC 3010 or
SYSC 3110) and (MATH 1104 or MATH 1107).

Lectures three hours a week.

COMP 4107 [0.5 credit]

Neural Networks

An introduction to neural networks and deep learning. Theory and application of Neural Networks to problems in machine learning. Various network architectures will be discussed. Methods for improving optimization and generalization of neural networks. Neural networks for unsupervised learning.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 5206.
Prerequisite(s): (COMP 3105 or SYSC 4415) and
(MATH 1104 or MATH 1107).
Lectures three hours a week.

COMP 4108 [0.5 credit] Computer Systems Security

Information security in computer and communications systems. Topics include: design principles; operating system security and access control; web and software security; malicious software, security infrastructure; secure email; network authentication; firewalls; intrusion detection; IP security; network attacks; wireless security. Includes: Experiential Learning Activity Precludes additional credit for CSEC 3108 and SYSC 4810.

Prerequisite(s): COMP 2108 and (COMP 3000 or SYSC 4001).

Lectures three hours a week.

COMP 4111 [0.5 credit]

Data Management for Business Intelligence

Application of computational techniques to support business activities, such as decision making, business understanding, data analysis, business process automation, learning from data, producing and using datacentric business models, ontology-based data access and integration, data quality assessment and cleaning and use of contextual data.

Prerequisite(s): COMP 3005.

Also offered at the graduate level, with different requirements, as COMP 5111, for which additional credit is precluded.

Lectures three hours a week.

COMP 4114 [0.5 credit]

Quantum Computing and Information

Introduction to the ideas and principles of quantum computing and information. Review of mathematical foundations. Discussion of quantum theory, architecture, and quantum gates. Basic algorithms in quantum computing. Theoretical computer science and computation. Applications of quantum computing to cryptography. Quantum information and error correction. Precludes additional credit for MATH 4821, MATH 5821. Prerequisite(s): COMP 2804.

Prerequisite(s): COMP 2804. Lectures three hours a week

COMP 4115 [0.5 credit]

Introduction to Natural Language Processing

Introduction to the fundamental techniques and models of modern natural language processing. Topics include: word embedding, language models, machine translation, self-attention and transformer, question answering, and pretrained models.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 3105 and (MATH 1104 or

MATH 1107).

Lectures three hours a week.

COMP 4116 [0.5 credit]

Multiagent Sys

Multiagent systems is a branch of artificial intelligence that explores the interactions between multiple rational entities, where each may have access to different information and possibly conflicting priorities. This course takes an approach founded on economic game theory.

Includes: Experiential Learning Activity Prerequisite(s): COMP 3106.

COMP 4202 [0.5 credit]

Computational Aspects of Geographic Information Systems

Through recent advances in navigation systems, mobile devices, and new software such as Mapquest and Google Earth, GIS is becoming increasingly important and exciting from a CS perspective. This course lays the algorithmic foundations to understand, use and further this technology.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 3804 or MATH 3804.
Also offered at the graduate level, with different requirements, as COMP 5204, for which additional credit is precluded.

Lecture three hours a week.

COMP 4203 [0.5 credit]

Wireless Networks and Security

An introduction to wireless networks covering both networking issues and security aspects of modern wireless environments. Fundamentals of mobile LANs, ad hoc, sensor networks, secure routing, searching, clustering, multicasting, localization, mobile IP/TCP, confidentiality, key establishment, authentication, broadcasting, RFIDs, and roque attacks.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 3203 or SYSC 4602.
Lectures three hours a week.

COMP 4206 [0.5 credit] Evolving Information Networks

Convergence of social and technological networks. Interplay between information content, entities creating it and technologies supporting it. Structure and analysis of such networks, models abstracting their properties, techniques link analysis, search, mechanism design, power laws, cascading, clustering and connections with work in social sciences.

Prerequisite(s): COMP 1805, (COMP 2401 with a minimum grade of C-) and (COMP 2406 or SYSC 4504). Also offered at the graduate level, with different requirements, as COMP 5310, for which additional credit is precluded.

Lecture three hours a week.

COMP 4501 [0.5 credit]

Advanced Facilities for Real-Time Games

A practical course on the design and implementation of modern game engines and advanced facilities provided by these engines. Such facilities include systems for rendering 3D scenes; simulating physics; playing animations; game AI; and enabling multi-player games. Students will undertake a significant game development project.

Includes: Experiential Learning Activity Prerequisite(s): COMP 3501.

Lectures three hours a week.

COMP 4601 [0.5 credit]

Intelligent Web-based Information Systems

Introduction to the principles and practice of creation, delivery and analysis of multimedia content in web-based systems. Topics include analysis of webs of documents, social network analysis, recommender systems and problems of trust, reputation and influence in e-commerce systems.

Includes: Experiential Learning Activity Prerequisite(s): (COMP 2404 or SYSC 3010 or SYSC 3110) and (COMP 2406 or COMP 2601 or SYSC 4504).

Lecture/lab four hours a week.

COMP 4602 [0.5 credit] Social Networking

Introduction to virtual communities, overlay networks and social networking. Topics include architectural principles for heterogeneous social networking platforms, trust and reputation as social concepts, agent-based computing, and extraction of trends and patterns from information exchanged between community members.

Precludes additional credit for COMP 3601 (no longer

Precludes additional credit for COMP 3601 (no longer offered).

Prerequisite(s): ((COMP 2404 or SYSC 3010 or SYSC 3110) and (COMP 2406 or SYSC 4504)) or COMP 2601.

Lectures/labs four hours per week.

COMP 4701 [0.5 credit] Computing, Society, and Ethics

This course examines ethical questions raised by computing technologies - both motivated by recent developments and through the lens of fiction. Students will identify possible ethical issues in future technologies and use formal ethics frameworks to evaluate the merits and pitfalls of different solutions.

Includes: Experiential Learning Activity
Prerequisite(s): Any two of COMP 2108, COMP 3004,
COMP 3005, COMP 3008, COMP 3105, COMP 3106,
COMP 3308, COMP 3804.

Lectures three hours a week.

COMP 4803 [0.5 credit] Computable Functions

Recursive functions and computability, algorithms, Church's thesis, Turing machines, computational logic, NP-completeness.

Also listed as MATH 4803.

Prerequisite(s): MATH 2100 or COMP 3805 or permission of the School.

COMP 4804 [0.5 credit]

Design and Analysis of Algorithms II

A second course on the design and analysis of algorithms. Topics include: advanced recurrence relations, algebraic complexity, advanced graph algorithms, amortized analysis, algorithms for NP-complete problems, randomized algorithms.

Prerequisite(s): COMP 3804 or MATH 3804. Lectures three hours a week.

COMP 4805 [0.5 credit] Theory of Automata

Finite automata and regular expressions, properties of regular sets, context-free grammars, pushdown automata, deterministic context-free languages. Turing machines, the Chomsky hierarchy. Undecidability, intractable problems. Also listed as MATH 4805.

Precludes additional credit for MATH 5605.

Prerequisite(s): COMP 3805 or MATH 3106 or MATH 3158 (or MATH 3100) or permission of the School. Lectures three hours a week.

COMP 4806 [0.5 credit] Numerical Linear Algebra

Matrix computations, conditioning/stability, direct methods for linear systems, classical iterative methods: Jacobi, Gauss-Seidel; modern iterative methods, Arnoldi decomposition, GMRES and other Krylov subspace-based methods for sparse and structured matrices; numerical solution of eigenvalue problems, implementation using suitable programming language, application to differential equations/optimization problems.

Also listed as MATH 4806.

Prerequisite(s): MATH 2000, (MATH 2107 or MATH 2152), MATH 3806; or permission of the School. Lectures three hours a week.

COMP 4900 [0.5 credit] Special Topics in Computer Science

Advanced topics in Computer Science offered by members of the School of Computer Science. Prerequisite(s): permission of the School of Computer Science.

Lectures three hours a week and up to three hours of tutorials a week.

COMP 4901 [0.5 credit] Directed Studies

Independent study under the supervision of a member of the School of Computer Science, open only to students in the B.C.S. program. Students are required to obtain their supervisor's written approval prior to registration and are limited to two such courses in their program.

Prerequisite(s): permission of the School of Computer Science.

COMP 4905 [0.5 credit] Honours Project

Under the supervision of a faculty member, Honours students complete a major Computer Science project in fourth year. Permission to register is granted once an approved project proposal is submitted to the Department. See deadlines and details on the School website. Includes: Experiential Learning Activity Precludes additional credit for COMP 4906. Prerequisite(s): fourth-year standing in a B.C.S. Honours program or one of the Combined Computer Science Honours programs and permission of the School of Computer Science.

COMP 4906 [1.0 credit] Honours Thesis

Independent research under the direct supervision of a faculty advisor. Permission to register is granted once an approved thesis proposal is submitted to the School of Computer Science. Evaluation is based on a written thesis and a poster presentation.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 4905.
Prerequisite(s): fourth-year standing in a B.C.S. Honours
program with a minimum CGPA of 9.0 in the major and
permission of the School of Computer Science.

COMP 4910 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity
Prerequisite(s): COMP 3911 and registration in internship option.

COMP 4911 [0.5 credit] Internship

The internship exposes students to industrial software development via placement in a local enterprise. The course may only be taken by students participating in one of the School's industrial partnerships and can only be used as a free elective in the B.C.S.

Includes: Experiential Learning Activity Prerequisite(s): COMP 4910 and registration in internship option.

Criminology and Criminal Justice (CRCJ)

Criminology and Criminal Justice (CRCJ) Courses

CRCJ 1000 [0.5 credit]

Introduction to Criminology and Criminal Justice

Overview of the field, including the foundational approaches of criminology and criminal justice, crime as an object of study; criminal law and criminality in Canada; (neo) classical, aetiological and social reaction perspectives; alternative criminologies.

Lectures/tutorials three hours a week.

CRCJ 2100 [0.5 credit] **Criminological Theories**

Comprehensive survey of the plurality of criminological theories, from phrenology to contemporary theories concerned with issues related to crime and punishment. Students are encouraged to develop critical and reflexive thinking on various criminological issues and theories. Prerequisite(s): CRCJ 1000 and second-year standing. Lectures three hours per week.

CRCJ 2200 [0.5 credit]

Contemporary Issues in Criminology & Criminal

Survey of contemporary criminological and criminal justice issues, ranging from criminalization, crime prevention, and surveillance strategies to debates about the criminal justice system, punishment, and reintegration. Specific topics will vary from year to year.

Prerequisite(s): CRCJ 1000 and second-year standing. Lecture three hours per week.

CRCJ 2400 [0.5 credit] Justice and the Self

This course explores individualizing perspectives on cognitions, emotions and behaviours associated to the pursuit of justice, with a focus on criminalized incidents. Prerequisite(s): CRCJ 1000 and 2nd year standing in CCJ B.A. programs.

Lectures three hours per week.

CRCJ 3001 [0.5 credit]

Quantitative Methods in Criminology

Methods used conducting quantitative research. Topics include measuring and manipulating variables, reliability, validity, sampling, experimental, quasi-experimental designs and ethics.

Prerequisite(s): CRCJ 1000 and third-year standing in the B.A program in Criminology and Criminal Justice. Lectures three hours per week.

CRCJ 3002 [0.5 credit]

Qualitative Methods in Criminology

Methods used conducting qualitative research. Topics include field research, interviewing, ethnographic research, content analysis and ethics. Includes: Experiential Learning Activity Prerequisite(s): CRCJ 1000 and third-year standing in the B.A program in Criminology and Criminal Justice. Lectures three hours a week.

CRCJ 3100 [0.5 credit] Policing (in)Security

Theories and case studies addressing contemporary efforts to police the world of (in)securities. Emphasis on Canadian dynamics within these broader transformations. Prerequisite(s): CRCJ 1000, third-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute. Lecture and discussion three hours per week.

CRCJ 3110 [0.5 credit] **Policing and Public Health**

This interdisciplinary course introduces students to myriad ways in which the practices of Canadian public health authorities are intertwined with police and the criminal legal system. Students can expect interactive class activities and guest lecturers.

Includes: Experiential Learning Activity Prerequisite(s): CRCJ 1000, third-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute. Lecture and discussion three hours per week.

CRCJ 3200 [0.5 credit]

Indigeneity, Coloniality, and Crime

This course explores issues related to Indigenous peoples, the criminal justice system and community with an emphasis on Indigenous scholarship and perspectives on criminology and crime.

Prerequisite(s): CRCJ 1000, INDG 1010, or INDG 1011, third year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Lecture and discussion three hours per week.

CRCJ 3201 [0.5 credit] Special Criminological Topics

Lectures three hours per week.

The topics of this course may vary from year to year, and are announced in advance of registration. Prerequisite(s): CRCJ 1000, third-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

CRCJ 3202 [0.5 credit]

Special Criminological Topics

The topics of this course may vary from year to year, and are announced in advance of registration.

Prerequisite(s): CRCJ 1000, third-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Lectures three hours per week.

CRCJ 3400 [0.5 credit]

Mental Health and Criminalization

This course surveys contemporary research and practices related to mental health and criminalization, including critical disability studies, the carceral management of persons deemed mentally ill, and the social uses of the concept of criminal responsibility.

Prerequisite(s): CRCJ 1000 and 3rd year standing in CCJ B.A. programs.

Lectures three hours per week.

CRCJ 3410 [0.5 credit]

Special Topics in Mind and Behaviour

Special topics in Mind and Behaviour in Criminology & Criminal Justice. Topics to be announced in advance of registration each year.

Prerequisite(s): CRCJ 1000 and 3rd year standing in CCJ B.A. programs.

Lectures three hours per week.

CRCJ 3901 [1.0 credit] Practicum in Criminology I

Through a field placement in an agency setting, students are provided the opportunity to obtain practical involvement in various aspects of criminal justice. In the seminar class, discussions, presentations and assignments integrate applied, theoretical and empirical knowledge. CRCJ 3901 may not be repeated. Includes: Experiential Learning Activity Prerequisite(s): Third-year standing in a B.A. in

Criminology and Criminal Justice, with a Major CGPA of 6.50 or higher and permission of the Institute.

Field placement eight hours a week, seminar three hours a week.

CRCJ 3902 [1.0 credit] Practicum in Criminology II

Through a field placement in an agency setting, students are provided the opportunity to obtain practical involvement in various aspects of criminal justice. In the seminar class, discussions, presentations and assignments integrate applied, theoretical and empirical knowledge. CRCJ 3902 may not be repeated. Includes: Experiential Learning Activity Prerequisite(s): Third-year standing in a B.A. in Criminology and Criminal Justice, with a Major CGPA of 6.50 or higher and permission of the Institute. Field placement eight hours a week, seminar three hours a week.

CRCJ 4001 [0.5 credit]

Special Topics in Criminology

Examination of a special topic in criminology. Topics to be announced in advance of registration each year.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4002 [0.5 credit] Special Topics in Criminology

Examination of a special topic in criminology. Topics to be announced in advance of registration each year. Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute. Seminar three hours per week.

CRCJ 4100 [0.5 credit] Criminal Courts and Society

This course proposes critical examinations of the complex interactions between criminal courts and their sociohistorical environments, including the politicization of criminal legal proceedings.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4110 [0.5 credit]

Race and the Criminal Justice System in Canada

A participatory class that explores debates regarding issues of racial bias and systemic racism in the Canadian criminal justice system. Students can expect class activities, documentary viewings, and guest lecturers from the field.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4120 [0.5 credit]

Criminalization and Resistance

This course will examine societal processes tied to criminalization and how groups, peoples and communities respond through activism and social movements. It critically analyzes the impact of criminalization and explores strategies for resistance and social change. Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute. Seminar three hours per week.

CRCJ 4130 [0.5 credit] Anarchism and Abolitionism

This interactive and student-led seminar explores a range of historical and contemporary theories and practices associated with both anarchists and penal, carceral and policing abolitionists.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4200 [0.5 credit]

Policing Sex

This seminar explores the policing of consensual sexual practices, paying particular attention to the theorization of consent, harm, liberation and agency in a sexual and legal context.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4300 [0.5 credit] Social Control

Introduction to social control from early theorizations linking social control to the genesis of the self, to preoccupations with the sorting of humans and the guiding of their conducts, including contemporary engagements with moralization, penal intensification, sovereign exceptionality, and immigration control.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4400 [0.5 credit]

Emotions, Affect, and Criminology

This course examines the role of emotions and affect in processes of norm violation, criminalization, victimization, punishment, and social control. It questions the rational/emotional binary and investigates how shame, humiliation, fear, panic, pain, pleasure, disgust, empathy and revenge inform behaviour, criminalization, victimization, adjudication, and punishment.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4500 [0.5 credit] Art of (in)Justice

A participatory class that explores how social and artist movements engage with issues of justice and injustice. Features group work, some off-campus classes during course hours, quest speakers.

Includes: Experiential Learning Activity
Prerequisite(s): CRCJ 2100, fourth-year standing, and
enrollment in a B.A. or Minor in Criminology and Criminal
Justice, or by permission of the Institute.
Seminar three hours per week.

CRCJ 4600 [0.5 credit] Sociologies of Punishment

This introductory seminar on the sociology of punishment proposes an overview of theoretical perspectives animating its contemporary forms. This overview prepares the ground for a survey of contemporary scholarship and issues in the sociology of punishment.

Prerequisite(s): CRCJ 2100, fourth-year standing, and enrollment in a B.A. or Minor in Criminology and Criminal Justice, or by permission of the Institute.

Seminar three hours per week.

CRCJ 4908 [1.0 credit] Honours Thesis

A seminar during which students design and conduct an original empirical research project under the direct supervision of a faculty member from the Institute of

faculty member.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the B.A. Honours program in Criminology and Criminal Justice with a CGPA of 10.00 or better in the Major and permission of the Institute.

Criminology and Criminal Justice or any cross-appointed

Seminar three hours, bi-weekly.

CRCJ 4910 [0.5 credit]

Independent Study in Criminology and Criminal Justice

A reading or research course conducted under the supervision of a faculty advisor from Criminology and Criminal Justice, Psychology, Law or Sociology. Students may not include more than 1.0 credit of independent study in their total program.

Prerequisite(s): fourth-year standing in the B.A. Honours program in Criminology and Criminal Justice and permission of the Institute.

CRCJ 4920 [0.5 credit]

Independent Study in Criminology and Criminal Justice

A reading or research course conducted under the supervision of a faculty advisor from Criminology and Criminal Justice, Psychology, Law or Sociology. Students may not include more than 1.0 credit of independent study in their total program.

Prerequisite(s): fourth-year standing in the B.A. Honours program in Criminology and Criminal Justice and permission of the Institute.

Critical Race Studies (CRST)

Critical Race Studies (CRST) Courses

CRST 2001 [0.5 credit]

Introduction to Critical Race Studies

Foundations and central tenets of critical race theory, its interdisciplinary debates, applications, and evolutions. Historical roots of oppression, white settler-colonialism, understanding of privilege and power, social construction of race, socio-political conditions producing systemic and institutional racism, intersections with sexism, homophobia, transphobia, classism, and ableism. Includes: Experiential Learning Activity Prerequisite(s): Second year standing. Lectures and discussion three hours a week.

CRST 3812 [0.5 credit]

Interdisciplinary Topics in Critical Race Studies

An interdisciplinary analysis of one or more topics in critical race studies. The topics of this course will vary from year to year and are announced in advance of registration.

Includes: Experiential Learning Activity

Prerequisite(s): Third year standing and WGST 1808 or FYSM 1402 or permission of the Institute.

Lectures three hours per week. This course is repeatable when the topic changes.

CRST 4001 [0.5 credit]

Advanced Critical Race Studies

Interdisciplinary seminar on race, colonialism and feminisms including theories of racial and cultural difference, structures of privilege and power, and forms of resistance. Intersectional theoretical approaches to anticolonial and feminist analyses of racial subjugation, and engagements with Black, Indigenous and women of colour feminisms.

Includes: Experiential Learning Activity

Prerequisite(s): Fourth-year standing and 1.0 credit in Women's and Gender Studies or permission of the Institute

Seminar three hours per week.

Digital Humanities (DIGH)

Digital Humanities (DIGH) Courses

DIGH 2001 [0.5 credit]

Introduction to Digital Humanities

An introduction to the principal debates in and approaches to the Digital Humanities.

Also listed as ENGL 2400.

Prerequisite(s): second-year standing or permission of the College of Humanities.

Lecture three hours a week.

DIGH 2002 [0.5 credit]

Digital Humanities: Theory and Method

A multidisciplinary survey of core theories, methodologies and tools within the Digital Humanities. Assignments will include collaborative work and applied projects.

Includes: Experiential Learning Activity

Also listed as ENGL 2401.

Prerequisite(s): second-year standing or permission of the College of Humanities.

Lecture and workshop three hours a week.

DIGH 2035 [0.5 credit]

Technology, Culture and Society

Principal theories and methods used by Science and Technology Studies (STS) scholars to examine the social and cultural shaping of technology. The substantive focus of the course is on the design, development, production, diffusion, consumption and use of technology.

Also listed as SOCI 2035.

Precludes additional credit for SOCI 2400. Prerequisite(s): SOCI 1001 and SOCI 1002, or ANTH 1001 or ANTH 1002.

Lectures/discussion groups three hours a week.

DIGH 2200 [0.5 credit] Big Data and Society

How big data and small data shape society. Databases as a form of media. Topics may include: data policy and regulation, the politics and ethics of big data, data and decision-making, and data as discourse.

Includes: Experiential Learning Activity

Also listed as COMS 2200.

Prerequisite(s): second-year standing or permission from

the Digital Humanities Coordinator. Lectures three hours a week.

DIGH 2700 [0.5 credit] Special Topics in Digital Humanities

Content of this course may vary from year to year. Please check departmental website for information on the topic. Lecture 3 hours per week.

DIGH 2705 [0.5 credit] Popular Culture in the Digital Age

An examination of various approaches to analyzing digital media and their role in the production and consumption of contemporary cultural forms and practices. Students will reflect upon their use of digital media and the influence they have on their lives and popular culture, more generally.

Also listed as SOCI 2705.

Prerequisite(s): SOCI 1001 and SOCI 1002, or

ANTH 1001 or ANTH 1002.

Lectures two hours a week, discussion group one hour a week.

DIGH 3001 [0.5 credit] The Book in the Digital Age

A multidisciplinary course focused on the social, economic and political dimensions of the book in its manuscript, print and digital forms.

Also listed as ENGL 3401.

Prerequisite(s): third-year standing, or permission of the College of Humanities.

Lecture three hours a week.

DIGH 3035 [0.5 credit]

Science, Culture and Society: Social Studies of Science

Principal theories and methods used by Science and Technology Studies scholars to examine the social construction of scientific knowledge. Topics may include the demarcation of science from non-science, the relationship between experts and laypersons, and the study of scientific controversies.

Also listed as SOCI 3035, ANTH 3035.

Prerequisite(s): DIGH 2035 or SOCI 2035 and third-year standing.

Lecture three hours a week.

DIGH 3700 [0.5 credit]

Special Topics in Digital Humanities

Content of this course may vary from year to year. Please check departmental website for information on the topic. Lecture 3 hours per week.

DIGH 3704 [0.5 credit]

Cognitive Science and the Digital Humanities

Exploration of the roles of human and artificial cognition in the digital humanities. Topics may include virtual and augmented reality as applied to the humanities, cognitive issues in hypertext and hypermedia; linguistic and philosophical considerations in digital media, cognitive narratology, and artificial intelligence.

Also listed as CGSC 3704.

Prerequisite(s): CGSC 1001; CGSC 2001 or DIGH 2001; and third-year standing.

Seminar three hours per week.

DIGH 3812 [0.5 credit] Digital History

The digital representation of history, exploring the approaches, issues, and methods of working in this environment. Topics may include gaming, virtual environments, digital research tools, public digital history. (Field e).

Includes: Experiential Learning Activity

Also listed as HIST 3812.

Prerequisite(s): a 2000-level history course or third-year

standing and 1.0 credit in history. Lecture three hours a week.

DIGH 3814 [0.5 credit] Crafting Digital History

This course applies the creative use of information and media/computing technologies to address the digital cultural heritage issues of public historians, archaeologists, and anthropologists. Topics may include webscraping, data mining, designing and implementing research databases, and visual storytelling of those results. (Field e).

Includes: Experiential Learning Activity

Also listed as HIST 3814.

Prerequisite(s): a 2000-level history course or third-year

standing and 1.0 credit in history. Lectures three hours a week or online.

DIGH 4001 [0.5 credit] Studies in Digital Humanities

A study of current issues and debates in Digital Humanities.

Also listed as ENGL 4155.

Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.

Seminar or lecture three hours a week.

DIGH 4002 [0.5 credit]

Digital Culture and the Text I

A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year. Also listed as ENGL 4125.

Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.

Seminar or lecture three hours a week.

DIGH 4003 [0.5 credit] Digital Culture and the Text II

A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year. Also listed as ENGL 4145.

Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.

Seminar or lecture three hours a week.

DIGH 4004 [0.5 credit] Digital Humanities Workshop

This workshop will provide students with the opportunity to complete an individual or collaborative capstone project in the Digital Humanities.

Includes: Experiential Learning Activity

Also listed as ENGL 4404.

Prerequisite(s): DIGH 2002 and fourth-year standing, or permission of the College of Humanities.

Workshop three hours a week.

DIGH 4005 [0.5 credit] Digital Humanities Practicum

Practical experience gained by working on projects under the supervision of the staff of a participating public- or private-sector institution or organization, including a final written assignment or equivalent project. A maximum of 1.0 practicum credit may be applied towards degree requirements.

Includes: Experiential Learning Activity

Also listed as ENGL 4405.

Prerequisite(s): DIGH 2002 and fourth-year standing, or

permission of the College of Humanities.

Practicum.

Disability Studies (DBST)

Disability Studies (DBST) Courses

DBST 1001 [0.5 credit]

Introduction to Disability Studies

Challenging negative stereotypes of disability by allowing students the opportunity to explore disability through many different venues including history, theory, culture, ethics, policy and disability rights. Reframing disability from personal tragedy to issues of oppression, access, inclusion and equality.

Lectures and discussion groups three hours per week.

DBST 2001 [0.5 credit] Introduction to Disability Studies

Interdisciplinary approach to the debates and theories that challenge the normative values, knowledge sources, and cultural representations of disablement in society.

Prerequisite(s): Second-year standing. Lecture and discussion three hours a week.

DBST 3001 [0.5 credit] Disability Studies: Policy and Activism

The complex legal, policy and discursive frameworks that shape the lives of persons with disability and the history of the emergence of the disability rights movement as a scholarly and activist challenge to, and renegotiation of, those frameworks.

Includes: Experiential Learning Activity

Precludes additional credit for DBST 4001 (no longer

offered).

Prerequisite(s): third-year standing. Lecture three hours a week.

DBST 3002 [0.5 credit] Mad Studies

A critical examination of the psy-disciplines, sanist beliefs and practices, and dominant mental health discourses in Canada and globally through mad-identified people's experiences, stories, and scholarship.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing and WGST 1808 or

FYSM 1402 or permission of the Institute.

Lectures three hours per week.

DBST 3060 [0.5 credit] Critical Disability Studies

Course engages contemporary disability theory, culture, and activism to consider bodily difference and its relation to the workings of power and social control, accessibility, normalization, ableism, and medicalization. Students will gain an understanding of the contemporary debates, theories, and methodologies of critical disability studies. Also listed as SOCI 3060.

Prerequisite(s): SOCI 1001 and SOCI 1002, or SOCI 1003 [1.0], or ANTH 1001, or ANTH 1002, and third-vear standing.

Lectures three hours a week.

DBST 3301 [0.5 credit] Introduction to Deaf Studies

A critical introduction to Deaf community and culture as they relate to a social model of disability, to ethnicity, and to issues of diversity and inclusion. Discourse analysis of research and policy in education for Deaf students from early childhood and beyond.

Also listed as ALDS 3301.

Precludes additional credit for ALDS 3903A if taken in Winter term 2016 or Winter term 2018, and ALDS 4906A if taken in Fall term 2016.

Prerequisite(s): third-year standing in Linguistics or Applied Linguistics and Discourse Studies or enrolment in the Minor in Disability Studies.

Seminars three hours a week.

DBST 3304 [0.5 credit] Disability and Childhood

Drawing on theory and research in disabled children's childhood studies, sociology of childhood, disability studies, and girlhood studies, this course examines the discursive and material constructions of disabled youth and childhood in relation to emerging neo-colonial, neo-imperialist, and neo-liberal ideologies.

Also listed as CHST 3304.

Prerequisite(s): third-year standing in Childhood and Youth Studies or Disability Studies.

Lecture three hours a week.

DBST 3812 [0.5 credit]

Interdisciplinary Topics in Disability Studies

An interdisciplinary analysis of one or more topics in critical disability studies. The topics of this course will vary from year to year and are announced in advance of registration.

Includes: Experiential Learning Activity

Prerequisite(s): Third year standing and WGST 1808 or FYSM 1402 or permission of the Institute.

Lectures three hours per week. This course is repeatable when the topic changes.

DBST 3900 [0.5 credit] Independent Study

Essays, discussions, and/or examinations based on a bibliography constructed by the student in consultation with an instructor.

Prerequisite(s): third or fourth-year standing in the Disability Studies Minor and a CGPA of 9.0 or higher.

DBST 4812 [0.5 credit]

Interdisciplinary Topics in Disability Studies

An interdisciplinary analysis of one or more topics in critical disability studies.

Includes: Experiential Learning Activity

Prerequisite(s): Fourth year standing and WGST 1808 or

FYSM 1402 OR permission of the Institute.

Seminar three hours per week. This course is repeatable when the topic changes.

Earth Sciences (ERTH)

Earth Sciences (ERTH) Courses

ERTH 1002 [0.5 credit]

The Earth and Life Odyssey: A Journey Through Billions of Years

Embark on a thrilling journey through Earth's epic history! Discover the groundbreaking events and powerful forces that shaped our planet, revealing the dramatic story behind the world we live in today.

Includes: Experiential Learning Activity
Precludes additional credit for ERTH 1004, ERTH 1006
(no longer offered), ERTH 1009 (no longer offered), ERTH 1010 (no longer offered) and ERTH 1011 (no longer

Prerequisite(s): a 4U/M level in Advanced Functions and at least one of Biology, Chemistry, Earth and Space Sciences or Physics are recommended. This course is for students who are enrolled in the Faculty of Science. Lectures three hours a week, a laboratory three hours per week, and a field excursion.

ERTH 1004 [0.5 credit]

offered).

Earth's Epic Tale: A Story Across Billions of Years

Embark on a thrilling journey through Earth's epic history! Discover the groundbreaking events and powerful forces that shaped our planet, revealing the dramatic story behind the world we live in today.

Precludes additional credit for ERTH 1002, ERTH 1006 (no longer offered), ERTH 1009 (no longer offered), ERTH 1010 (no longer offered) and ERTH 1011 (no longer offered).

Prerequisite(s): a 4U/M level in Advanced Functions and at least one of Biology, Chemistry, Earth and Space Sciences or Physics are recommended. This course is for students who are not enrolled in the Faculty of Science except the Bachelor of Computer Science.

Lectures three hours a week.

ERTH 2004 [0.5 credit]

Maps, Satellites and the Geospatial Revolution

Introduction to the creation and use of maps using a variety of geospatial tools to better understand and resolve physical, social and environmental problems. Overview of geomatics (cartography and map design, geographic information systems, GPS, remote sensing).

Also listed as GEOM 1004.

Precludes additional credit for GEOM 2004 (no longer offered).

Lectures and laboratory, four hours a week.

ERTH 2012 [0.5 credit] Planet Hollywood

Earth Science concepts and content portrayed in Hollywood films are sometimes accurate but more frequently misrepresented. This course will examine popular Hollywood films to critically evaluate the Earth Science concepts and content that they present and directly compare them to the actual science.

Online modules, bi-weekly film screenings and discussions four hours per week.

ERTH 2102 [0.5 credit] Mineralogy to Petrology

Chemical, optical and crystallographic properties of common rock-forming minerals, with introduction to common mineral assemblages of igneous, sedimentary, and metamorphic rocks.

Includes: Experiential Learning Activity
Precludes additional credit for ERTH 3202 (no longer offered).

Prerequisite(s): ERTH 1002, CHEM 1001, and CHEM 1002.

Lectures two hours a week and laboratory three hours a week

ERTH 2105 [0.5 credit]

Geodynamics

The structure, composition, and rheological properties of the Earth: lithosphere, mantle and core. Plate tectonics and its relation to geophysical fields, driving mechanisms, and processes at plate boundaries and in plate interiors. Includes: Experiential Learning Activity

Precludes additional credit for ERTH 3805 (no longer offered).

Prerequisite(s): ERTH 1002 or GEOG 2013. Lectures two hours a week and a laboratory three hours a

Lectures two hours a week and a laboratory three hours a week.

ERTH 2106 [0.5 credit]

Geochemistry

This course looks at geochemical processes from deep Earth to surface environments, and the use of geochemical pathways in order to better understand the Earth's history.

Includes: Experiential Learning Activity

Precludes additional credit for ERTH 3003 (no longer offered).

Prerequisite(s): ERTH 1002, CHEM 1001 and CHEM 1002.

Lecture 1.5 hours per week, a laboratory three hours per week

ERTH 2312 [0.5 credit]

Paleontology

Introduction to macrofossil and microfossil groups, their paleoenvironmental significance, and principles of evolutionary paleoecology.

Includes: Experiential Learning Activity

Precludes additional credit for ERTH 2316, GEOL 2301 (no longer offered) and GEOL 2306 (no longer offered).

Prerequisite(s): ERTH 1002 or GEOG 2013.

Lectures two hours a week and a laboratory three hours a week.

ERTH 2314 [0.5 credit]

Sedimentation and Stratigraphy

Origin of sediments and their transport, distribution, and primary structures; processes of sediment-to-rock transformation; spatial patterns; controls of stratigraphy; methods of correlation.

Includes: Experiential Learning Activity

Precludes additional credit for ERTH 2318 (no longer offered).

Prerequisite(s): ERTH 1002 or GEOG 2013.

Lectures three hours a week and a laboratory three hours a week.

ERTH 2316 [0.5 credit]

Paleoecology

Introduction to macrofossil and microfossil groups, their paleoenvironmental significance, and principles of evolutionary paleoecology.

Precludes additional credit for ERTH 2312. Not available for credit in B.Sc. Earth Sciences programs.

Lectures two hours a week.

ERTH 2401 [0.5 credit]

Dinosaurs

A general introduction to dinosaurs, their place in evolution, their social behaviour, the Mesozoic landscape and extinction theories.

ERTH 2402 [0.5 credit]

Climate Change: An Earth Sciences Perspective

An exploration of the often dramatic climate changes that have occurred through earth history from a geological perspective, emphasizing the history of earth climates, geological causes of climate change and impact that rapid climate change has had on the biosphere.

Precludes additional credit for ERTH 2422.

Lectures three hours a week.

ERTH 2403 [0.5 credit]

Introduction to Oceanography

An environmental approach to understanding the oceans; introducing the physical and biological aspects of oceanography, marine resources and marine pollution. Lectures three hours per week.

ERTH 2404 [0.5 credit] Engineering Geoscience

Applications of the basic concepts of geology, earth materials and earth processes to practical engineering and environmental science. Topics include rock and soil mechanics, slope stability, hydrogeology, geological hazards, and site investigations. Overview of related geophysical methods.

Includes: Experiential Learning Activity
Precludes additional credit for ERTH 2414 (no longer offered), ERTH 1006 (no longer offered) and ERTH 1010 (no longer offered).
