Various theoretical and empirical studies of firm and market organization with emphasis on the pricing, advertising, investment and locational behaviour of firms in imperfectly competitive markets.

Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4302 [0.5 credit]

Competition and Regulatory Policy

Public policies relating to competition and regulation. Topics may include: Ramsey pricing, peak-load pricing, cross-subsidization, access pricing (ECPR), multi-part pricing and price discrimination, predatory and targeted pricing, vertical restrictions, traditional regulation (including rate-of-return regulation), incentive regulation (including price caps), and the political economy of regulation. Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4360 [0.5 credit]

Labour Economics

The application of price theory to the labour market. Topics include models of labour supply and labour demand, human capital and the economics of education, and unions and their impact on the labour market. Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher, and ECON 3210 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4404 [0.5 credit]

Public Economics: Taxation

A discussion of the theory of taxation and an examination of empirical attempts to quantify the theory. Some topics of current interest, such as the redistribution of income in Canada and tax reform, are examined.

Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4407 [0.5 credit] Project Evaluation

Techniques and problems in the evaluation of public and private projects. Examination of alternative approaches to public decision-making including cost-benefit analysis, cost-effectiveness analysis, and multiple-objective frameworks. Case studies of projects in various areas such as natural resources, the environment, human resources, public services, and transportation.

Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher and ECON 3210 (or equivalent), or STAT 2605 or STAT 3502 with a grade of C- or higher. Lectures three hours a week.

ECON 4460 [0.5 credit]

Health Economics

Economic analysis of the organization, financing, and utilization of health-care services. Topics include supply and demand of health care, the impact of private and social health insurance on demand, and policy issues in the provision of health care in Canada.

Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher, and ECON 3210 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4507 [0.5 credit]

The Economics of Development

An examination of some theoretical approaches to the economics of development, together with analysis of some economic policy issues of a largely internal character, such as intersectoral investment allocation, income distribution, unemployment, and investment in human development. Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher and ECON 3102 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4508 [0.5 credit]

International Aspects of Economic Development

An analysis of the international economic policy problems of development in Asia, Africa and Latin America, focusing on international trade, direct foreign investment, technological transfer, regional integration, debt and development financing, and international migration. Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher and ECON 3102 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4601 [0.5 credit]

International Trade Theory and Policy

International trade theory and its implications for economic policy. Topics such as determinants of trade and specialization, gains from trade and commercial policy, international factor mobility, growth and development. Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4602 [0.5 credit]

International Monetary Theory and Policy

International monetary theory and its implications for economic policy. Topics such as sources of disequilibrium and adjustment in the balance of payments under fixed versus flexible exchange rates, international capital movements, and international monetary reform.

Prerequisite(s): ECON 3102 (or equivalent) with a grade of

Prerequisite(s): ECON 3102 (or equivalent) with a grade of C- or higher.

ECON 4700 [0.5 credit]

Measurement Economics

National accounting and index numbers. Topics may include: the measurement of output and income, capital and depreciation, productivity, employment and unemployment, poverty and inequality, household production, pollution and resource depletion, and the balance of payments; price indexes; standard-of-living indexes; and international comparisons.

Prerequisite(s): ECON 3020 (or equivalent) with a grade of C- or higher, ECON 3102 (or equivalent) with a grade of Cor higher, and ECON 3210 (or equivalent) with a grade of C- or higher.

Lectures three hours a week.

ECON 4706 [0.5 credit]

Econometrics I

An introduction to econometric theory and analysis of the classical normal linear regression model. Topics include estimation methods, hypothesis testing, multicollinearity, indicator variables, heteroscedasticity, and an introduction to time-series methods.

Prerequisite(s): ECON 2210 (or equivalent) with a grade of C+ or higher, and ECON 3210 (or equivalent) with a grade of C+ or higher.

Lectures three hours a week, tutorials one and a half hours a week.

ECON 4707 [0.5 credit]

Econometrics II

An extension of ECON 4706. Topics include model specification, diagnostic checks, qualitative and limited dependent variables, panel data, and simultaneous equations models.

Prerequisite(s): ECON 4706 with a grade of C+ or higher, or STAT 3503 with a grade of C+ or higher. Lectures three hours a week.

ECON 4708 [0.5 credit]

Economic Data Science - Analytics

An introduction to methods of statistical and machine learning analytics for economic analysis. Tools relevant for both small and large data sets will be covered. Topics may include approaches to classification, dimension reduction strategies, and prediction models and tools.

Includes: Experiential Learning Activity

Prerequisite(s): ECON 2708 with a grade of C+ or higher; and ECON 3210 (or equivalent) with a grade of C+ or higher.

Lectures three hours a week.

ECON 4709 [0.5 credit]

Economic Data Science - Applications

Application of data science and machine learning methods to real-world economic problems. Students will apply their data science knowledge in hands-on projects to answer topical research questions. This course has a strong practical focus.

Includes: Experiential Learning Activity Prerequisite(s): ECON 4708 with a grade of C+ or higher. Lectures three hours a week.

ECON 4713 [0.5 credit]

Time-Series Econometrics

An introduction to the basic concepts and tools of timeseries econometrics. Topics include stationary and nonstationary time series, identification, estimation and forecasting, unit root testing, cointegration analysis, errorcorrection models and ARCH models, together with relevant economic applications.

Precludes additional credit for STAT 4603.

Prerequisite(s): ECON 4706 with a grade of C- or higher. or STAT 3503 with a grade of C- or higher.

Lectures three hours a week.

ECON 4880 [0.5 credit] **Special Topics in Economics**

Advanced topics of interest to upper-year Economics students. Topics may vary from year to year and are announced in advance of the registration period.

Includes: Experiential Learning Activity

Prerequisite(s): ECON 3020 (or equivalent) with a grade of C+ or higher; ECON 3102 (or equivalent) with a grade of C+ or higher; and ECON 3706 or ECON 4706, which may be taken concurrently with ECON 4880 or may be waived by permission of the Department.

Lectures and/or seminars three hours a week.

ECON 4903 [0.5 credit]

Tutorial in Economics

An additional tutorial in economics may be taken subsequent to, or concurrently with ECON 4905. Prerequisite(s): permission of the Department.

ECON 4904 [0.5 credit]

Tutorial in Economics

An additional tutorial in economics may be taken subsequent to, or concurrently with, ECON 4905. Prerequisite(s): permission of the Department.

ECON 4905 [0.5 credit] Honours Capstone Seminar

The development of individual research projects in suitable economics topic areas with the exchange of results at each stage through in-class discussions and written and oral reports and culminating in a major research paper by each course registrant.

Includes: Experiential Learning Activity

Presequisite(s): ECON 2900 with a grade of C+ or high

Prerequisite(s): ECON 2900 with a grade of C+ or higher, ECON 3900 with a grade of C+ or higher, and registration in an Honours Economics program.

Seminars three hours a week.

ECON 4908 [1.0 credit] Honours Essay

Students taking Honours in Economics or Applied Economics may write an Honours essay during their final year. This essay counts for one credit. Students work under an individual faculty adviser.

Includes: Experiential Learning Activity
Prerequisite(s): permission of the Department.

ECON 4990 [0.5 credit] Research and Writing in Economics

Development of fundamental research and writing skills pertinent to the discipline of economics. Writing summary reviews of economics texts of increasing sophistication; writing up empirical and/or theoretical results of increasing complexity.

Prerequisite(s): registration in the Post-Baccalaureate Diploma in Economics program and/or permission of the Department.

Seminars three hours a week, tutorials one and a half hours a week.

Engineering

This section presents the requirements for programs in:

- Aerospace Engineering Bachelor of Engineering Stream A: Aerodynamics, Propulsion and Vehicle Performance
- Aerospace Engineering Bachelor of Engineering Stream B: Aerospace Structures, Systems and Vehicle Design
- Aerospace Engineering Bachelor of Engineering Stream C: Aerospace Electronics and Systems
- Aerospace Engineering Bachelor of Engineering Stream D: Space Systems Design
- Architectural Conservation and Sustainability Engineering - Bachelor of Engineering
- Biomedical and Electrical Engineering Bachelor of Engineering
- Biomedical and Mechanical Engineering Bachelor of Engineering
- Civil Engineering Bachelor of Engineering

- Communications Engineering Bachelor of Engineering
- Computer Systems Engineering Bachelor of Engineering
- Electrical Engineering Bachelor of Engineering
- Engineering Physics Bachelor of Engineering
- Environmental Engineering Bachelor of Engineering
- Mechanical Engineering Bachelor of Engineering
- Mechatronics Engineering Bachelor of Engineering
- · Software Engineering Bachelor of Engineering
- Software Engineering Stream A: Artificial Intelligence Bachelor of Engineering
- Sustainable and Renewable Energy Stream A: Smart Technologies for Power Generation and Distribution Bachelor of Engineering
- Sustainable and Renewable Energy Stream B: Efficient Energy Generation and Conversion Bachelor of Engineering

Program Requirements

Course Categories for Engineering Programs

The following categories of courses are used in defining the programs.

Basic Science Electives

Courses in this classification must be chosen from among those listed as acceptable for the current academic year. The list is published annually on the engineering academic support website: carleton.ca/engineering/uas. The list will change from year to year and only courses on the list valid in the year the course is taken, or courses for which formal approval of the Faculty has been obtained can be used as credit toward an engineering degree. Courses not on the list may be used to fulfill a Basic Science elective requirement with the permission of the Faculty of Engineering and Design and provided all other specified course requirements are met. Note that access to courses on the list is not guaranteed and may depend on space availability and the satisfaction of other requirements including, for example, course prerequisites.

Complementary Studies Electives

Courses in this classification must be chosen from among those listed as acceptable for the current academic year. The list is published annually on the engineering academic support website: carleton.ca/engineering/uas. The list will change from year to year and only courses on the list valid in the year the course is taken, or courses for which formal approval of the Faculty has been obtained can be used as credit toward an engineering degree. English as a Second Language courses are not acceptable for use as Complementary Studies electives in any engineering program. Courses not on the list may be used to fulfill a Complementary Studies elective requirement with the permission of the Faculty of Engineering and Design and provided all other specified course requirements are met. Registration in CUOL or online course sections is not acceptable. Note that access to courses on the list is not guaranteed and may depend on space availability and the

satisfaction of other requirements including, for example, course prerequisites.

Computer Science Electives for Software Engineering

The list of computer science (COMP) electives for software engineering degree is published annually on the engineering academic support website: carleton.ca/ engineering/uas. The list will change from year to year and only courses on the list valid in the year the course is taken, or courses for which formal approval of the Faculty has been obtained, can be used as credit toward the Software Engineering degree.

Aerospace Engineering Bachelor of Engineering

Students in Aerospace Engineering must satisfy the requirements for one of the following streams:

Aerospace Engineering - Bachelor of Engineering Stream A: Aerodynamics, Propulsion and Vehicle Performance (21.0 credits)

First Year

1.	a) 4.0 credits in:		4.0

Regulations

The regulations presented in this section apply to all Bachelor of Engineering programs.

Academic Continuation Evaluation

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see Section 3.2 Academic Progression, in the *Academic Regulations of the University*), with the following additions and amendments:

- 1. In Engineering programs, all credits are included in the Major CGPA, making it identical to the Overall CGPA.
- 2. Students who are not assigned the status *Eligible* to *Continue* (EC) or *Academic Warning* (AW) will be required to leave the degree with either the status *Continue in Alternate* (CA) or *Dismissed from Program* (DP).

Graduation

Students in Engineering programs are covered by the common University regulations regarding graduation, with the following additions and amendments.

- Students entering an Engineering program with Advanced Standing will receive transfer credit for at most ten of the credits required for their program.
- To be eligible for graduation, the most recent grade in every course used to meet the requirements of the Bachelor of Engineering degree must be a passing grade.

Course Load

Regulations regarding Course Load and Overload can be found in the Academic Regulations of the University section of this Calendar. The normal course load in Engineering is defined as the number of credits required in the student's program for the current year status of the students. Since the programs in Engineering require more than 20.0 credits in total, the normal course load is more than 5.0 credits in some years of the program. Registration in more than this number of credits constitutes an overload.

Co-operative Education Programs

All Engineering programs are available with or without participation in the Co-operative Education option.

Year Status Prerequisites

Year Status in Engineering is used in some course prerequisites to limit access to only those students who have sufficient preparation. In particular, students will not have access to second, third or fourth year engineering, science or mathematics courses until they have achieved second year status. Similarly, to take some specific engineering, science and mathematics courses in third or fourth year, that year status must be achieved. For additional information on prerequisites, see the individual course descriptions.

2nd year status: Students may not continue into 2000-level (or higher) engineering courses unless all the following requirements are met:

- Successful completion of all ECOR 1040 series or ECOR 1030 series of courses with a minimum grade of C-:
- Successful completion of MATH 1004, MATH 1104, CHEM 1101 (or CHEM 1001 and CHEM 1002), and PHYS 1004 (or PHYS 1001 and PHYS 1002):
- Successful completion of all English as a Second Language Requirements, and any additional requirements as determined in the admission process.

Students may not continue into 3000-level (or higher) engineering courses until they complete all first-year requirements (including ECOR 1055, ECOR 1056, and ECOR 1057).

3rd year status: Students may not take courses with third-year status in Engineering as a prerequisite until successful completion of all first-year requirements and at least 4.0 credits from the second-year requirements of their current program.

4th year status: Students may not take courses with fourth-year status in Engineering as a prerequisite until successful completion of all second-year requirements and at least 3.5 credits from the third-year requirements of their current program.

Time Limit

The Bachelor of Engineering degree must be completed within eight calendar years of initial registration. Students who do not complete their program requirements within this limit will be given the status *Continue in Alternate* (CA).

Academic Appeals

The Engineering Committee on Admission and Studies handles all academic appeals.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic

performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

Bachelor of Engineering: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.Eng program;
- Successfully completed 5.0 or more credits with an Overall CGPA of at least 8.00. It is strongly recommended that students complete all second-year Engineering requirements prior to entering their first work term;
- 3. An Overall CGPA of at least 8.00 must be maintained in order to remain eligible for the Co-op Program.

B.Eng students must successfully complete four (4) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

• Bachelor of Engineering (B. Eng.)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include four prerequisite 4U courses: Advanced Functions, Chemistry, Physics, and one of Calculus and Vectors (recommended), or Biology, or Earth and Space Science. Although it is not an admission requirement, at least one 4U course in either English or French is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Successful applicants will have individual academic subjects, completed with grades of Cor higher, evaluated for academic standing, provided the academic work has been completed at another university or degree-granting college, or in another degree program at Carleton University.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Engineering degree:
- be eligible for work in Canada (for off-campus work placements).

Meeting the above entrance requirements only establishes eligibility for admission to the program. Enrolment in the co-op option may be limited at the discretion of the department.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements

for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Aerospace Engineering (AERO) Courses AERO 2001 [0.5 credit]

Aerospace Engineering Graphical Design

Engineering drawing techniques; fits and tolerances; working drawings; fasteners. Elementary descriptive geometry; true length, true view, and intersection of geometric entities; developments. Aerospace-specific CAD (Computer-Aided Design) assignments including production of detail and assembly drawings from actual aerospace physical models.

Includes: Experiential Learning Activity

Also listed as MAAE 2001.

Prerequisite(s): Second-year status in Engineering. Lectures and tutorials two hours a week, laboratory four hours a week.

AERO 3002 [0.5 credit] Aerospace Design and Practice

Design approach and phases. Design integration. Influence of mission and other requirements on vehicle configuration. Trade-off studies, sizing and configuration layout. Flight vehicle loads, velocity-load factor diagram. Structural design: overall philosophy, role in design process, methods. Basic orbital mechanics; launch vehicle sizing.

Includes: Experiential Learning Activity

Prerequisite(s): AERO 2001 and third-year status in

Engineering.

Lectures three hours a week, problem analysis three hours a week.

AERO 3101 [0.5 credit] Lightweight Structures

Structural concepts; theory of elasticity; bending, torsion and shear in thin-walled beams having single or multi-cell sections; work and energy principles; deformation and force analysis of advanced structures, including stiffened thin-wall panels; finite element methods. Stability and buckling of thin-walled structures.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 3202.

Lectures three hours a week; problem analysis one hour a week.

AERO 3240 [0.5 credit] Orbital Mechanics

Review of translational kinematics and dynamics. Keplerian two-body problem: Kepler's laws, orbital elements, orbit determination. Orbital perturbations: oblateness of the Earth, atmospheric drag. Orbital maneuvers and interplanetary flights. Advanced topics. Prerequisite(s): MAAE 2101.

Lectures three hours per week, tutorial one hour per week.

AERO 3700 [0.5 credit]

Aerospace Materials

Properties, behaviour and manufacturing methods for metals, polymers and ceramics used in aerospace applications. Specialty alloys for gas turbines. Properties and manufacture of aerospace composites. Behaviour of materials in space.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 2700.

Lectures three hours a week; problem analysis one hour a

AERO 3841 [0.5 credit] Spacecraft Design I

Design of spacecraft and spacecraft subsystems with emphasis on mission requirements and current design methods: spacecraft configuration, payload, structural, attitude control, thermal, power, and other related subsystems. Spacecraft integration and testing.

Includes: Experiential Learning Activity

Prerequisite(s): AERO 3240.

Lectures three hours a week, tutorials or laboratories three hours per week.

AERO 4003 [0.5 credit] Aerospace Systems Design

Stress and deflection analysis; fatigue, safe life, damage tolerant design. Propulsion systems integration; landing gear; control and other subsystems. Mechanical component design. Airworthiness regulations and certification procedures. Weight and cost estimation and control. System reliability. Design studies of aircraft or spacecraft components.

Includes: Experiential Learning Activity

Prerequisite(s): AERO 3002 and fourth-year status in Engineering.

Lectures three hours a week, problem analysis three hours a week.

AERO 4009 [0.5 credit]

Aviation Management and Certification

Product development, quality control. Strategic organizational analysis and design. Airworthiness, type certification and planning, delegation of authority, airplane flight manual. Aerospace system design and safety. Prerequisite(s): fourth-year status in Engineering or permission of the department. Lectures three hours per week.

AERO 4300 [0.5 credit]

Acoustics and Noise Control

Behaviour of compressible fluids, sound waves and properties of sound sources; measurement of sound; human perception of sound; prediction methods based on energy considerations; sound propagation in realistic environments: outdoors, rooms, ducts; absorption and transmission loss, noise control; case studies.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 3004 and (MAAE 3300 or

MECH 3310) and fourth-year status in Engineering or by

permission of department. Lectures three hours a week.

AERO 4302 [0.5 credit]

Aerodynamics and Heat Transfer

Differential equations of motion. Viscous and inviscid regions. Potential flow: superposition; thin airfoils; finite wings; compressibility corrections. Viscous flow: thin shear layer approximation; laminar layers; transition; turbulence modeling. Convective heat transfer: free versus forced convection; energy and energy integral equations; turbulent diffusion.

Includes: Experiential Learning Activity Prerequisite(s): MAAE 3300 or MECH 3310.

Lectures three hours a week, problem analysis two hours

a week.

AERO 4304 [0.5 credit]

Computational Fluid Dynamics

Governing equations of fluid motion (full & simplified). Discretization based on finite difference, finite volume, and finite element methods. Explicit and implicit integration schemes. Numerical stability. Numerical solutions of the Navier-Stokes equations: RANS, LES and DNS. Turbulence modeling. Programming-based assignments (convection/diffusion).

Prerequisite(s): (MAAE 3300 or MECH 3310), AERO 4302 recommended and fourth-year status in Engineering or by permission of the department.

Lectures three hours a week.

AERO 4306 [0.5 credit] Aerospace Vehicle Performance

Morphology of aircraft and spacecraft. Performance analysis of fixed wing aircraft: drag estimation, propulsion, take-off, climb and landing, endurance, payload/range, manoeuvres; operational economics. Performance analysis of rotor craft: rotor-blade motion, hovering and vertical ascent, forward flight, and autorotation. Rocket propulsion; escape velocity; orbital dynamics. Prerequisite(s): (MAAE 3300 or MECH 3310) and fourth-

vear status in Engineering.

Lectures three hours a week.

AERO 4308 [0.5 credit] Aircraft Stability and Control

Static stability and control: equilibrium requirements; longitudinal stability requirements; neutral points; manoeuvring flight; control forces and control requirements: lateral static stability certification requirements. Dynamic stability: axis systems; governing equations; phugoid and short period modes; lateral dynamic modes. Closed-loop control. Prerequisite(s): Fourth-year status in Engineering. Lectures three hours a week.

AERO 4402 [0.5 credit] Aerospace Propulsion

Propulsion requirements, effects of Mach Number. altitude, and application; basic propeller theory; propeller, turboshaft, turbojet, turbofan and rocket; cycle analysis and optimization for gas turbine power plant; inter-relations between thermodynamic, aerodynamic and mechanical designs; rocket propulsion; selection of aeroengines. Precludes additional credit for MECH 4401. Prerequisite(s): MAAE 2400, (MAAE 3300 or MECH 3310), and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

AERO 4442 [0.5 credit]

Transatmospheric and Spacecraft Propulsion

Planetary/interplanetary environments and effects. Launch and spacecraft propulsion: liquid/solid/hybrid rockets, ram/scramjets, combined cycle engines, electrothermal, electromagnetic, electrostatic, nuclear, and propellantless propulsion. Trajectory analysis, multistaging, separation dynamics. Advanced engine concepts.

Prerequisite(s): MAAE 2400, (MAAE 3300 OR MECH 3310) and fourth-year status in Engineering. Lectures three hours a week.

AERO 4446 [0.5 credit]

Heat Transfer for Aerospace Applications

Fundamentals of heat transfer with emphasis on aerospace systems design. Conduction, convection and radiation modes of heat transfer. Radiation exchange between surfaces and view factors. Radiation in spacecraft thermal control. High speed flight and reentry heating.

Precludes additional credit for MECH 4406. Prerequisite(s): MAAE 2400 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering. Lectures three hours a week.

AERO 4504 [0.5 credit] Avionics Systems

RF engineering concepts. Aviation communication systems. Relative and absolute navigation; landing systems. Radar systems; weather radar. Aircraft systems integration; databus standards; electrical systems; power generation and distribution. Safety critical software. Electromagnetic compatibility and interference. Regulations and certification of avionic systems. Includes: Experiential Learning Activity Precludes additional credit for ELEC 4504.

Prerequisite(s): 4th year status in Engineering. Not open

Prerequisite(s): 4th year status in Engineering. Not open to students in Electrical Engineering, Computer Systems Engineering, Engineering Physics or Communications Engineering.

Lectures three hours a week.

AERO 4540 [0.5 credit] Spacecraft Attitude Dynamics and Control

Rigid body dynamics. The dynamic behavior of spacecraft. Environmental torques. The design of attitude control systems. Gravity gradient, spin, and dual spin stabilization. Attitude manoeuvres. The design of automatic control systems. Impacts of attitude stabilization techniques on mission performance.

Prerequisite(s): AERO 3240 and MAAE 3500 and fourthyear status in Engineering.

Lectures three hours a week.

AERO 4602 [0.5 credit] Introductory Aeroelasticity

Review of structural behaviour of lifting surface elements; structural dynamics, Laplace Transforms, dynamic stability; modal analysis; flutter, Theodorsen's theory; flutter of a typical section; wing flutter, T-tail flutter, propeller whirl flutter; gust response; buffeting, limit cycle flutter.

Prerequisite(s): (MAAE 3300 or MECH 3310) and SYSC 3600 and fourth-year status in Engineering. Lectures three hours a week.

AERO 4607 [0.5 credit]

Rotorcraft Aerodynamics and Performance

Rotorcraft history and fundamentals. Momentum theory: hover, axial climb and descent, autorotation, forward flight, momentum theory for coaxial and tandem rotors. Blade element analysis. Rotor airfoil aerodynamics. Rotor blade dynamics and trim. Helicopter performance, height-velocity curves, conceptual design. High-speed rotorcraft. Prerequisite(s): MAAE 3004 and (MAAE 3300 or MECH 3310) and fourth-year status in Engineering or by permission of the department. Lectures three hours per week.

AERO 4608 [0.5 credit] Composite Materials

Reinforcing mechanisms in composite materials; material properties. Strength and elastic constants of unidirectional composites; failure criteria. Analysis of laminated plates; bending and eigenvalue problems. Environmental effects and durability. Damage tolerance. Design of composite structures.

Prerequisite(s): MAAE 2202 and fourth-year status in Engineering.

Lectures three hours a week.

AERO 4609 [0.5 credit] Joining of Materials

Design for joining: base material and component geometry. Selection of joining method and filler material; Adhesive bonding; Soldering; Brazing; Diffusion bonding; Resistance welding; Fusion welding (GTAW, EB, laser and plasma arc); Friction welding; NDE. Emphasis on Aerospace materials and applications.

Prerequisite(s): MAAE 2700 and fourth-year status in Engineering or by permission of the department. Lectures three hours per week.

AERO 4842 [0.5 credit] Spacecraft Design II

System view of spacecraft. Requirements definition. Spacecraft payloads (remote sensing, imaging systems, astronomy instrumentation etc.). Exploration missions. Implications for systems and missions. Space system design case studies.

Precludes additional credit for AERO 4802 (no longer offered).

Prerequisite(s): AERO 3841 and fourth-year status in Engineering.

Lectures three hours a week.

Civil Engineering (CIVE) Courses CIVE 2004 [0.5 credit] GIS, Surveying, CAD and BIM

Engineering geometry and spatial graphics. Fundamentals of surveys. Digital surveying tools; total station, GPS. Computer-Aided Drafting (CAD). Geographic Information Systems (GIS). Spatial referencing. Building Information Modelling (BIM). Integrated design using digital tools. Field exercises using software to process and evaluate spatial data.

Includes: Experiential Learning Activity
Prerequisite(s): Second-year status in Engineering or
(GEOM 1004 for students in BSc in Geomatics).
Lectures three hours a week, problem analysis and
laboratories three hours a week.

CIVE 2005 [0.5 credit] Architectural Technology 2

Technical issues involved in architectural design of buildings from ancient times to the present.

Technological innovation and materials related to structural developments, and the organization and design of structures. Basic concepts of calculus, equilibrium, and mechanics of materials.

Precludes additional credit for ARCH 2222. Not eligible for use for Bachelor of Engineering degree requirements. Prerequisite(s): ARCC 2202.

Lectures three hours a week, laboratory three hours a week.

CIVE 2101 [0.5 credit] Engineering Mechanics

Virtual work. Friction. Relative motion of particles. Kinematics of a rigid body: translation, rotation; general plane motion; absolute and relative motion. Kinetics of a rigid body: equations of motion; work-energy; impulse-momentum; conservation of momentum and energy. Conservative forces and potential energy. Precludes additional credit for MAAE 2101.

Prerequisite(s): MATH 1004, MATH 1104 and secondyear status in Engineering.

Lectures three hours a week, problem analysis three hours a week.

CIVE 2200 [0.5 credit] Mechanics of Solids I

Stress and strain. Stress-strain relationship: Hooke's law. Torsion of circular shafts. Bending moment and shear force distribution. Flexural stresses. Deflection. Shear stress in beams. Stresses in thin- walled cylinders. Transformation of 2D stress and strain: Mohr's circle. Buckling of columns.

Includes: Experiential Learning Activity Precludes additional credit for MAAE 2202.

Prerequisite(s): MATH 1004 and second-year status in Engineering for B.Eng.

Engineening for B.Eng.

Lectures three hours a week, problem analysis and laboratory three hours a week.

CIVE 2700 [0.5 credit] Civil Engineering Materials

Introduction to material science. Structure of atoms. Crystallography. Crystal Imperfections. Characteristics, behaviour and use of Civil Engineering materials: steel, concrete, asphalt, wood, polymers, composites. Specifications. Physical, chemical and mechanical properties. Quality control and material tests. Fatigue. Corrosion. Applications in construction and rehabilitation of structures.

Includes: Experiential Learning Activity
Precludes additional credit for MAAE 2700.

Prerequisite(s): Second year status for students in an

Engineering program.

Lectures three hours a week, problem analysis and laboratory three hours a week.

CIVE 3202 [0.5 credit] Mechanics of Solids II

Shear flow. Definition of shear centre, Saint Venant and warping torsional constants. Behaviour, governing differential equations and solutions for torsion, beam-columns, lateral torsional buckling of doubly symmetric beams, axially loaded doubly symmetric, singly symmetric and asymmetric columns. Failure criterion, fatigue and fracture.

Includes: Experiential Learning Activity
Precludes additional credit for MAAE 3202.

Prerequisite(s): CIVE 2200.

Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

CIVE 3203 [0.5 credit] Introduction to Structural Analysis

Concepts and assumptions for structural analysis: framed structures; joints; supports; compatibility and equilibrium; stability and determinacy; generalized forces and displacements. Principle of Virtual Work: unknown force calculations; influence lines. Complementary Virtual Work: displacement calculations, indeterminate analysis. Introduction to the Stiffness Method of Analysis. Prerequisite(s): CIVE 2200 and MATH 1004. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3204 [0.5 credit] Introduction to Structural Design

Building systems and structural form. Design Philosophy and design process. Limit states design. National Building Code of Canada. Determination of dead, live, snow, wind, and earthquake loads.

Prerequisite(s): CIVE 2200.

CIVE 3205 [0.5 credit]

Design of Structural Steel Components

Introduction to CAN/CSA - S16, design and behaviour concepts; shear lag, block shear, local plate buckling, lateral torsional buckling, instantaneous centre, inelastic strength and stability. Design of tension members, axially loaded columns, beams, beam-columns, simple bolted and welded connections.

Prerequisite(s): CIVE 2200 and CIVE 2700. Recommended prerequisite: CIVE 3204. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3206 [0.5 credit]

Design of Reinforced Concrete Components

Introduction to CAN/CSA - A23.3; design and behaviour concepts; flexural analysis at service loads; shear, bond, Whitney stress block, under, over reinforced behaviour, ultimate strength. Flexural design of singly reinforced, doubly reinforced T-beams, one-way slabs. Shear design for beams. One-way, two-way slab systems, columns. Prerequisite(s): CIVE 2200 and CIVE 2700. Recommended prerequisite: CIVE 3204.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3207 [0.5 credit]

Historic Site Recording and Assessment

Methods of heritage documentation including hand recording, photography, rectified photography, total station, gps, photogrammetry, and laser scanning. Non-destructive testing techniques; environmental assessment tools for determining air quality and energy efficiency. Multidisciplinary teams for all project work. Includes: Experiential Learning Activity

Also listed as ACSE 3207, ARCH 3881.

Precludes additional credit for ARCN 4100.

Prerequisite(s): third-year status in B.Eng. in Architectural Conservation and Sustainability Engineering.

Lectures three hours a week, lab or field work two hours a week.

CIVE 3208 [0.5 credit] Geotechnical Mechanics

Soil composition and soil classification. Soil properties, compaction, seepage and permeability. Concepts of pore water pressure, capillary pressure and hydraulic head. Principle of effective stress, stress-deformation and strength characteristics of soils, consolidation, stress distribution with soils, and settlement. Laboratory testing. Includes: Experiential Learning Activity Also listed as ERTH 4107.

Prerequisite(s): third-year status in Engineering, or permission of the department. Additional recommended background: ERTH 2404 or equivalent.

Lectures three hours a week, laboratory three hours alternate weeks.

CIVE 3209 [0.5 credit] Building Science

Building envelope design and analysis; applied heat transfer and moisture transport; solar radiation; hygrothermal modelling; control of rain, air, vapour, and heat; materials for wall, window, curtain wall, roof, and foundation systems; building envelope retrofit case studies; building code; envelope construction.

Includes: Experiential Learning Activity

Also listed as ACSE 3209.

Prerequisite(s): MAAE 2400 and third-year status in B. Eng. Civil Engineering.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3210 [0.5 credit] Geotechnical Engineering

Strength of soils, steady state seepage, flownets and piping. Stress distribution in soils. Earth pressures: at rest, active and passive. Design of flexible and rigid retaining structures. Stability of excavations, slopes and embankments. Settlement of foundations. Bearing capacity of footings.

Also listed as CIVE 4208. Prerequisite(s): CIVE 3208.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3304 [0.5 credit]

Transportation Engineering and Planning

Transportation and the socio-economic environment; modal and intermodal systems and components; vehicle motion, human factors, considerations for different modes of travel; sight distance requirements; fundamentals of traffic flow theory; transportation planning and travel demand; environmental impacts; traffic safety.

Precludes additional credit for GEOG 4304.

Prerequisite(s): third-year status in Engineering, or pormission of the Department.

permission of the Department.

Lectures three hours a week problem analysis three

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 3305 [0.5 credit] Highway Engineering

Road functional classification, human factors of road design; geometric design; traffic engineering; highway capacity and level of service; highway materials; frost action; pavement mix design; structural design of rigid and flexible pavements; maintenance and rehabilitation.

Also listed as CIVE 4209.

Prerequisite(s): CIVE 3304 or permission of the Department.

CIVE 3407 [0.5 credit] Municipal Engineering

Introduction to fundamentals of municipal engineering. Water quality: physical, chemical and biological parameters. Water treatment: softening mixing, flocculation, sedimentation, filtration, disinfection, fluoridation. Biological processes. Wastewater treatment: primary, secondary and tertiary treatment. Sludge disposal and wastewater reuse. Solid waste management. Also listed as CIVE 4407.

Prerequisite(s): third-year status in Engineering.
Lectures three hours a week, problem analysis one and a half hours a week

CIVE 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity
Precludes additional credit for ACSE 3999.

CIVE 4200 [0.5 credit] Matrix Analysis of Framed Structures

Review of basic structural concepts. Betti's law and applications. Matrix flexibility method, flexibility influence coefficients. Development of stiffness influence coefficients. Stiffness method of analysis: beams; plane trusses and frames; space trusses and frames. Introduction to the finite element method.

Prerequisite(s): CIVE 3203.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4201 [0.5 credit]

Finite Element Methods in Civil Engineering

Introduction to the theory and application of finite element methods. The relationship with virtual work, Rayleigh-Ritz, system of linear equations, polynomial interpolation, numerical integration, and theory of elasticity is explored. Isoparametric formulations of structural and plane elements are examined. Geotechnical and nonlinear problems are introduced.

Prerequisite(s): fourth-year status in engineering. Also offered at the graduate level, with different requirements, as CIVE 5103, for which additional credit is precluded.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4202 [0.5 credit] Wood Engineering

Structural design in timber. Properties, anatomy of wood, wood products, factors affecting strength and behaviour, strength evaluation and testing. Design of columns, beams and beam-columns. Design of trusses, frames, glulam structures, plywood components, formwork, foundations, connections and connectors. Inspection, maintenance and repair.

Prerequisite(s): CIVE 2200, CIVE 2700 and third-year status in B.Eng.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4204 [0.5 credit] Pavement Design

Pavement design methods, flexible pavement materials and mix designs, stresses and strains in flexible pavements; fatigue and rutting design considerations; traffic loading and design loads; design of flexible pavements using AASHTO, M-E and AI methods; rigid pavement designs, design of overlays. Includes: Experiential Learning Activity

Prerequisite(s): Fourth year status and CIVE 4209. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4205 [0.5 credit] Traffic Engineering

Introduction to principles of traffic engineering.
Traffic operation concepts. Travel modes and modal characteristics. Traffic stream characteristics and queuing theory. Capacity and level of service analysis of roads and intersections.

Includes: Experiential Learning Activity
Prerequisite(s): Fourth year status in engineering; and
(CIVE 4209 or CIVE 3305).

Also offered at the graduate level, with different requirements, as CIVE 5305, for which additional credit is precluded.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4208 [0.5 credit] Geotechnical Engineering

Strength of soils, steady state seepage, flownets and piping. Stress distribution in soils. Earth pressures: at rest, active and passive. Design of flexible and rigid retaining structures. Stability of excavations, slopes and embankments. Settlement of foundations. Bearing capacity of footings.

Also listed as CIVE 3210. Prerequisite(s): CIVE 3208.

CIVE 4209 [0.5 credit] Highway Engineering

Road functional classification, human factors of road design; geometric design; traffic engineering; highway capacity and level of service; highway materials; frost action; pavement mix design; structural design of rigid and flexible pavements; maintenance and rehabilitation.

Also listed as CIVE 3305.

Prerequisite(s): CIVE 3304 or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4301 [0.5 credit] Foundation Engineering

A critical study of the theories in soil mechanics and their application to the solution of geotechnical engineering problems. Field investigations, laboratory and field testing, shallow foundations, special footings, mat foundations, pile foundations and excavations. Discussion of new methods and current research.

Prerequisite(s): CIVE 4208.

Lectures three hours a week, laboratory three hours alternate weeks.

CIVE 4302 [0.5 credit]

Reinforced and Prestressed Concrete Design

Reinforced concrete shear and torsion design. Twoway slab design by Direct Design and Equivalent Frame Method. Behaviour and design of slender reinforced concrete columns. Prestressed concrete concepts; flexural analysis and design; shear design; anchorage zone design; deflection and prestress loss determination. Prerequisite(s): CIVE 3203 and CIVE 3206. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4303 [0.5 credit] Urban Systems

A systematic approach to urbanism; Sustainability in urban systems; Urban sprawl; Urban form; Urban theory, Population projections; Zoning; Integration of urban infrastructure components (waste, electricity water, transportation and buildings); Analysis of issues in Canadian urban areas; The future of cities.

Prerequisite(s): fourth-year status in Engineering, secondyear standing in B.A.S. (Urbanism), or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4307 [0.5 credit] Municipal Hydraulics

Fluid flow fundamentals. Hydraulics of pipe systems. Open channel flow. Prediction of sanitary and storm sewage, flow rates. Design of water distribution systems, culverts, sanitary and storm sewers. Pumps and measuring devices. Hydraulic and flow control structures. Prerequisite(s): MAAE 2300.

Lectures three hours a week, problem analysis one and a half hours a week.

CIVE 4308 [0.5 credit]

Behaviour and Design of Steel Structures

Behaviour and design of open web steel joists, steel and composite decks, composite beams and columns, stud girders, and plate girders. Design of moment connections, base plates and anchor bolts, and bracing connections. Stability of rigid and braced frames. Design for lateral load effects.

Prerequisite(s): CIVE 3205 and fourth-year status in Engineering.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4400 [0.5 credit] Construction/Project Management

Systems approach to project planning and control. Analysis of alternative network planning methods: CPM, precedence and PERT; planning procedure; computer techniques and estimating; physical, economic and financial feasibility; implementation feedback and control; case studies.

Prerequisite(s): fourth-year status in Engineering. Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4403 [0.5 credit] Masonry Design

Introduction to structural design in masonry. Properties of masonry materials and assemblages. Behaviour and design of beams, walls and columns. Selected topics including veneer wall systems, differential movement, workmanship, specifications, inspection, maintenance and repair. Lowrise and highrise building design. Prerequisite(s): CIVE 3204, CIVE 3206 and fourth-year status in Engineering or permission of the Department. Also offered at the graduate level, with different requirements, as CIVE 5200, for which additional credit is precluded.

CIVE 4407 [0.5 credit] Municipal Engineering

Introduction to fundamentals of municipal engineering. Water quality: physical, chemical and biological parameters. Water treatment: softening mixing, flocculation, sedimentation, filtration, disinfection, fluoridation. Biological processes. Wastewater treatment: primary, secondary and tertiary treatment. Sludge disposal and wastewater reuse. Solid waste management. Also listed as CIVE 3407.

Prerequisite(s): third-year status in Engineering. Lectures three hours a week, problem analysis one and a half hours a week

CIVE 4500 [0.5 credit]

Computer Methods in Civil Engineering Advanced software development for Civil Engineering

applications. Examples may be chosen from surveying, transportation, geotechnical and/or structural engineering. Software technologies include object-oriented programming, data base management, Internet-based applications and graphical user interfaces. Prerequisite(s): Fourth-year status in Engineering. Also offered at the graduate level, with different requirements, as CIVE 5602, for which additional credit is precluded.

Lectures three hours a week, problem analysis three hours alternate weeks.

CIVE 4601 [0.5 credit]

Building Pathology and Rehabilitation

Deterioration mechanisms for concrete, timber, steel and masonry structures. Identification of design deficiencies; criteria for selection and design of rehabilitation systems. Design techniques to reduce deterioration in new construction and historical structures.

Includes: Experiential Learning Activity Also listed as ACSE 4601, ARCN 4200.

Prerequisite(s): CIVE 3207 and fourth-year status in B.Eng. in Architectural Conservation and Sustainability Engineering.

Lectures three hours a week, lab/field work two hours a week

CIVE 4614 [0.5 credit] Building Fire Safety

Understanding fire-structure interaction and the concepts of fire severity and resistance; behaviour of steel, concrete, and timber buildings exposed to fires; compartment fire dynamics; correlations and computer models to predict fire dynamics; fire retardants; laboratory-scale fire experiments; performance-based approach for building fire safety design.

Prerequisite(s): MAAE 2400 and fourth-year status in Engineering, or permission of the Department. Lectures three hours a week, problem analysis and laboratories one and one-half hours per week.

CIVE 4907 [1.0 credit] Engineering Research Project

A research project in engineering analysis, design or development carried out by individual students or small teams, for an opportunity to develop initiative, self-reliance, creative ability and engineering judgment and is normally intended for students with high CGPAs and an interest in graduate studies.

Includes: Experiential Learning Activity
Precludes additional credit for ACSE 4907, ACSE 4917,
CIVE 4917.

Prerequisite(s): fourth-year status in Engineering and permission of the department.

CIVE 4917 [0.5 credit] Undergraduate Directed Study

Student carries out a study, analysis, and solution of an engineering problem which results in a written final report. Carried out under close supervision of a faculty member. Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student.

Includes: Experiential Learning Activity
Precludes additional credit for ACSE 4907, ACSE 4917,
CIVE 4907.

Prerequisite(s): permission of the Department and completion of, or concurrent registration in, CIVE 4918. Self study.

CIVE 4918 [1.0 credit] Design Project

Teams of students develop professional level experience through a design project that incorporates fundamentals acquired in previous mathematics, science, engineering, and complementary studies courses. A final report and oral presentations are required.

Includes: Experiential Learning Activity
Precludes additional credit for ACSE 4918, ENVE 4918.
Prerequisite(s): ECOR 3800 and fourth-year status
in Engineering. Certain projects may have additional requirements.

Lectures two hours alternate weeks, problem analysis three hours a week.

Electronics (ELEC) Courses

ELEC 2501 [0.5 credit]

Circuits and Signals

Properties of signals. Basic circuit elements: voltage and current sources. Kirchhoff's laws, linearity, superposition. Thevenin and Norton's theorems. Circuit simplification. AC steady-state analysis: impedance, admittance, phasors, frequency response. Transient response of RL and RC circuits: form of response, initial and final conditions. RLC circuits: resonance.

Includes: Experiential Learning Activity Precludes additional credit for ELEC 3605.

Prerequisite(s): MATH 1005 (may be taken concurrently) and (PHYS 1004 or PHYS 1002), and second-year status in Engineering.

Lectures three hours a week, laboratory and problem analysis three hours a week.

ELEC 2507 [0.5 credit] Electronics I

Qualitative semiconductor physics, leading to the diode equation. Diode applications. Operational amplifiers and their application in feedback configurations including active filters. Introduction to bipolar transistors and MOSFETs, analysis of biasing circuits. Transistor applications including small signal amplifiers.

Includes: Experiential Learning Activity

Precludes additional credit for OSS 2006, PLT 2006 (no longer offered).

Prerequisite(s): MATH 1005, ELEC 2501, and secondyear status in Engineering.

Lectures three hours a week, laboratory and problem analysis three hours a week.

ELEC 2602 [0.5 credit] Electric Machines and Power

Modeling and analysis of basic electric power systems. Single-phase and three-phase circuits: real and reactive power, per-phase analysis, power factor correction. Electro-mechanical energy conversion: operation, characteristics and analysis of transformers, DC-, induction-, and synchronous electric machines. Motor and generator operation.

Includes: Experiential Learning Activity

Prerequisite(s): PHYS 1004 and ELEC 2501, and secondyear status in Engineering.

Lectures 3 hours per week. Laboratory and problem analysis 3 hours per week alternate weeks.

ELEC 2607 [0.5 credit]

Switching Circuits

Boolean algebra, gate, combinatorial circuits. DeMorgan notation, sum-of-product and product-of-sum forms. Logic arrays, PLAs and PALs. Flip-flops, latches, sequential circuits, state graphs and state minimization. Counters and controllers. Hazards. Asynchronous sequential circuits, race free assignment, realization.

Includes: Experiential Learning Activity Precludes additional credit for SYSC 2310.

Prerequisite(s): PHYS 1004 or PHYS 1002 and secondyear status in Engineering.

Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 3105 [0.5 credit] Electromagnetic Fields

Vector calculus: gradient, divergence, curl, integration of vector fields. Electrostatics, magnetostatics. Boundary conditions. Poisson's and Laplace's equations: method of images, separation of variables, iterative method. Electric and magnetic properties of matter. Magnetic circuits. Lorentz force. Motional emf, electromagnetic induction. Maxwell's equations.

Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005, MATH 2004, and
(PHYS 1004 or PHYS 1002), and second-year status in
Engineering.

Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 3500 [0.5 credit] Digital Electronics

Digital circuit design using verilog and logic synthesis, the electronic properties of logic gates, electrical interfacing between logic families, asynchronous to synchronous interfacing, clock distribution and timing, VLSI design options. Students implement substantial circuits with field-

Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2507 and ELEC 2607.
Lectures three hours a week, laboratory three hours a week.

ELEC 3508 [0.5 credit] Power Electronics

programmable gate arrays.

Power semiconductor devices: Thyristor, GTO, IGBT, SiC, GaN. Converter circuits: controlled AC to DC rectifiers, choppers, DC to AC inverters, AC voltage controllers. Protection of conversion circuits. Applications to high-efficiency control of electric machines and electromechanical energy conversion devices.

Includes: Experiential Learning Activity
Prerequisite(s): ELEC 2507 and ELEC 2602.
Lectures three hours per week, laboratories/problem analysis three hours per week.

ELEC 3509 [0.5 credit]

Electronics II

Introduction to semiconductor devices and ICs. DC, AC and switching properties of BJTs. Linear amplifiers; bandwidth considerations; two-port analysis. Large signal amplifiers; power amplifiers; transformerless circuits. Feedback and operational amplifiers; gain, sensitivity, distortion and stability. Filter design. Oscillators.

Includes: Experiential Learning Activity

Precludes additional credit for: ELEC 3509 may not be taken for credit by students in the Biomedical and Electrical Engineering or Biomedical and Mechanical Engineering programs.

Prerequisite(s): ELEC 2507.

Lectures three hours a week, laboratory three hours a

ELEC 3602 [0.5 credit] Electrical Power Systems

The electric power system. Components: power transformers and connections, transmission lines. Analysis: balanced and unbalanced three-phase systems, symmetrical components, load flow, FACTS. Operation: frequency and voltage control, steady state and transient stability, fault protection. Distribution systems: utility, residential, commercial. Electrical safety: code, grounding/bonding.

Also listed as ELEC 4602. Prerequisite(s): ELEC 2602.

Lectures three hours a week, problem analysis two hours a week.

ELEC 3605 [0.5 credit] Electrical Engineering

DC circuits: elements, sources, analysis. Single phase AC circuits: phasors, RLC circuits, real and reactive power, impedance, network analysis, three phase systems. Power transformers. DC motors: operation and characteristics. AC motors: single phase and three phase. Precludes additional credit for ELEC 2501. Prerequisite(s): MATH 1005 and (PHYS 1004 or PHYS 1002), and second-year status in Engineering. Lectures three hours a week, problem analysis 1.5 hours

ELEC 3907 [0.5 credit] Engineering Project

Student teams work on open-ended projects based on previously acquired knowledge. Lectures are devoted to discussing project-related issues and student presentations. A project proposal, a series of project reports, and oral presentations, and a comprehensive final report are required.

Includes: Experiential Learning Activity

Prerequisite(s): ELEC 2507, ELEC 2607, third year status in Engineering, and enrolment in the Electrical Engineering or Engineering Physics program.

Lecture two hours per week, laboratory six hours per week.

ELEC 3908 [0.5 credit] Physical Electronics

Fundamentals of device physics and operation of the pn junction, bipolar transistor and MOSFET. Basic integrated circuit processing and application to diodes, BJTs and MOSFETs. Correlation between processing, structure, operation and modeling. Consideration of parasitic and small-geometry effects, reliability and process variation. Includes: Experiential Learning Activity

Precludes additional credit for ELEC 4705.

Prerequisite(s): ELEC 2507.

Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 3909 [0.5 credit] Electromagnetic Waves

Maxwell's equations and EM wave solutions. Polarization. Poynting vector. EM waves in dielectrics and conductors; skin depth. Reflection and refraction. Standing waves. Fresnel relations, Brewster angle. Transmission lines. Line termination, basic impedance matching and transformation. Smith charts. Introduction to guided waves; slab waveguide.

Includes: Experiential Learning Activity
Precludes additional credit for PHYS 3308.
Prerequisite(s): ELEC 3105 or permission of the
Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

ELEC 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

a week.

ELEC 4502 [0.5 credit]

Microwave Circuits

Introduction to microwave semiconductor devices, microwave passive components, microwave integrated circuit technology, and microwave circuit measurements. Basic network theory and scattering matrix description of circuits. Design of matching networks, filters, amplifiers and oscillators at microwave frequencies.

Includes: Experiential Learning Activity

Prerequisite(s): ELEC 4503; may be taken concurrently. Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4503 [0.5 credit]

Radio Frequency Lines and Antennas

Introduction to distributed circuits, travelling and standing waves, reflection coefficient, SWR, impedance transformation, Smith charts. Introduction to transmission lines; coaxial, rectangular waveguide, resonators, optical fibers. Introduction to antennas; gain, directivity, effective area. Introduction to linear arrays.

Includes: Experiential Learning Activity

Prerequisite(s): ELEC 3909.

Lectures three hours a week, laboratory three hours

alternate weeks.

ELEC 4504 [0.5 credit] Avionics Systems

Electromagnetic spectrum. Air data sensing, display. Communications systems. Navigation and landing systems; ground-based, inertial and satellite systems. Airborne radar. Guidance, control for aircraft, autopilots; stability augmentation; active control; sensor requirements; display techniques. Aircraft power systems. Safety systems. Vehicle/systems integration, certification. Precludes additional credit for AERO 4504.

Prerequisite(s): fourth-year status in Engineering. Not open to students in Electrical Engineering, Computer Systems Engineering, Engineering Physics or Communications Engineering.

Lecture three hours a week.

ELEC 4505 [0.5 credit] Telecommunication Circuits

A course of study of the commonly used circuit components in modern telecommunication systems. Both analog and digital systems are included. The design of the hardware is emphasized. Examples are drawn from broadcasting, telephony and satellite systems. Includes: Experiential Learning Activity Prerequisite(s): ELEC 3509 and (SYSC 3501 or

Prerequisite(s): ELEC 3509 and (SYSC 3501 or SYSC 3503).

Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4506 [0.5 credit]

Computer-Aided Design of Circuits and Systems

Basic principles of Computer-Aided Design tools used for analysis and design of communication circuits and systems. Frequency and time-domain analysis. Noise and distortion analysis. Transmission line effects. Sensitivity analysis and circuit performance optimization. Digital simulation.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Engineering.
Lectures three hours a week, laboratory three hours
alternate weeks.

ELEC 4509 [0.5 credit] Communication Links

Thermal noise, intermodulation, 1dB compression, dynamic-range, SNR, noise-figure, noise temperature, antenna gain, EIRP, G/T. Wireless: Earth's bulge, Fresnel clearance, path-loss, rainfall, receiver threshold, multipath, diversity. Fiber: loss, dispersion, lasers, PIN detectors. Satellite: GEO, link calculations, FDMA, TDMA, satellite tracking, spherical trigonometry, antenna pointing, LEO. Prerequisite(s): fourth-year status in Engineering or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

ELEC 4600 [0.5 credit] Radar and Navigation

Surveillance radar: radar equation, minimum detectable signal, pulse integration, cross-section fluctuations, PRF, range ambiguities, staggered PRF. MTI radars: coherent operation, delay Line cancellers, FFT. Radio navigation: lines of position, NDB, VOR, DME, ILS. GPS: orbits, pseudo-ranges, position determination, GDOP, ionosphere. Geoide, coordinate frames.

Prerequisite(s): fourth-year status in Engineering or permission of the Department.

Lectures three hours a week, problem analysis 3 hours alternate weeks.

ELEC 4601 [0.5 credit] Microprocessor Systems

Interfacing aspects in microprocessor systems.

Microprocessors and bus structures, internal architecture, instruction set and pin functions. Memory interfacing, input-output, interrupts, direct memory accesses, special processors and multiprocessor systems.

Includes: Experiential Learning Activity

Precludes additional credit for COMP 3006 (no longer offered), SYSC 3320, SYSC 3601.

Prerequisite(s): ELEC 2607 and one of SYSC 2003 or SYSC 3003 (no longer offered) or SYSC 3006 or permission of the Department.

Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4602 [0.5 credit]

Electrical Power Systems

The electric power system. Components: power transformers and connections, transmission lines. Analysis: balanced and unbalanced three-phase systems, symmetrical components, load flow, FACTS. Operation: frequency and voltage control, steady state and transient stability, fault protection. Distribution systems: utility, residential, commercial. Electrical safety: code, grounding/ bonding.

Also listed as ELEC 3602. Prerequisite(s): ELEC 2602.

Lectures three hours a week, problem analysis two hours a week.

ELEC 4609 [0.5 credit]

Integrated Circuit Design and Fabrication

Introduction to nMOS IC design: static logic gates, noise margin, transmission gates, factors influencing switching speed, dynamic logic, input protection, output buffers, circuit simulation with SPICE. Laboratory work includes design and layout of a simple nMOS IC that is fabricated and returned for testing.

Includes: Experiential Learning Activity Prerequisite(s): ELEC 3500 or ELEC 3908. Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4700 [0.5 credit]

The Physics and Modeling of Advanced Devices and **Technologies**

Fabrication, operation and modeling of advanced devices for information technology. Topics: physics of materials, quantum mechanics of solids, optical transitions, physical analysis and models for state-of-the-art electronic/optical technologies and materials. Technologies: MOS and III-V based transistors, solid-state optical devices, MEMS and nano-technology based devices.

Prerequisite(s): ELEC 3908.

Lectures three hours a week, problem analysis two hours alternate weeks.

ELEC 4702 [0.5 credit]

Fiber Optic Communications

Fundamentals of optoelectronics with application to fiber optic communications. Optical fibre: modes, losses, dispersion, splices, coupling to sources. Optical sources: LEDs, laser diodes. Optical detectors: photoconductor, pin and avalanche photodiodes. Optical receiver design. Fiber optic communications systems: intensity modulation/direct detection; coherent homodyne or heterodyne detection. Includes: Experiential Learning Activity

Prerequisite(s): ELEC 3908 and ELEC 3909. Lectures three hours a week, laboratory three hours alternate weeks.

ELEC 4703 [0.5 credit]

Solar Cells

Semiconductor band structure, photogeneration, the solar spectrum. Detailed analysis of monocrystalline silicon solar cells. Solar cells based on thin film materials: amorphous silicon. III-V materials, organics, titania-dve cells. Cells for concentrator systems. Photovoltaic power systems. Solar cells for building envelopes.

Includes: Experiential Learning Activity

Prerequisite(s): ELEC 2501 and ELEC 2507 and fourthyear status in Sustainable and Renewable Energy Engineering, or ELEC 2501 and ELEC 2507 and fourthyear status in Engineering with permission of the instructor.

Lectures three hours per week, laboratories/problem analysis three hours alternate weeks.

ELEC 4704 [0.5 credit]

Nanoscale Technology and Devices

Engineering at the nanoscale. Quantum confinement and the effect of scale. Analysis tools: microscopy. spectroscopy. Fabrication: thin films, nanoparticles, nanotubes, graphene, organics. Structures and properties: quantum wells, nanocrystals, nanostructuring. Applications and devices: electronics, optoelectronics, photonics. Includes: Experiential Learning Activity Prerequisite(s): ELEC 3908, ELEC 3909. Lectures three hours a week, problem analysis 1.5 hours a week.

ELEC 4705 [0.5 credit]

Electronic Materials, Devices and Transmission Media

Review of fundamental quantum mechanics, tunneling, quantization, solid-state theory, conductors, semiconductors, superconductors, insulators, and optical properties. Devices used in modern high speed electronic and communication systems: transistors, lasers, photodiodes, fiber optics, Josephson junctions. Nanotechnology and quantum applications.

Prerequisite(s): ELEC 3908. Lectures three hours a week.

ELEC 4706 [0.5 credit]

High-Speed Electronics: Circuits and Systems

Challenges faced in designing high-speed electronic circuits and systems. Fundamentals of high-speed Tx/ Rx architectures including: timing and HDL, PLL/DLL, Tx drivers, interface to photonic components, channel modelling, Rx channel, choice of modulation, equalization, clock and data recovery. VHDL hardware and CAD software laboratories.

Includes: Experiential Learning Activity

Prerequisite(s): ELEC 3500.

Lectures three hours a week, laboratory three hours a week.

ELEC 4707 [0.5 credit]

Analog Integrated Electronics

Emphasis on integration of analog signal processing techniques in monolithic IC technology. Continuous active filter design. MOS IC technology. OP amp design. Basic sampled data concepts; Z-transform analysis, switched capacitor filters. Noise aspects. Bipolar technology: radio frequency IC design.

Includes: Experiential Learning Activity

Prerequisite(s): ELEC 3509.

Lectures three hours a week, laboratory and problem

analysis three hours alternate weeks.

ELEC 4708 [0.5 credit]

Advanced Digital Integrated Circuit Design

Advanced Verilog, test benches. VLSI design based on CMOS technology, characteristics of CMOS logic circuits, cell libraries, building blocks, structured design, testing, Computer-Aided Design tools. Laboratory emphasis on design synthesis from Verilog.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year status in Engineering and

ELEC 3500 or permission of the Department.

Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4709 [0.5 credit] Integrated Sensors

Overview of sensor technologies with emphasis on devices suitable for integration with silicon integrated circuits. Sensor design and fabrication principles including signal conditioning; discussion of automotive, biomedical, and other instrumentation applications.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year status in Engineering. Lectures three hours a week, laboratory and problem

analysis three hours alternate weeks.

ELEC 4906 [0.5 credit] Special Topics

At the discretion of the Engineering Faculty Board, a course dealing with selected advanced topics of interest to students in Biomedical and Electrical, Communications, Computer Systems, Electrical and Software Engineering and Engineering Physics may be offered.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year status in Engineering. Lectures three hours a week, laboratory and problem analysis three hours alternate weeks.

ELEC 4907 [1.0 credit] Engineering Project

Student teams develop professional-level experience by applying, honing, integrating, and extending previously acquired knowledge in a major design project. Lectures are devoted to discussing project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.

Includes: Experiential Learning Activity

Prerequisite(s): (ELEC 3907 or SYSC 3010) and fourth-

year status in Engineering.

ELEC 4908 [1.0 credit] Engineering Physics Project

Student teams develop professional-level experience by applying, honing, integrating, and extending previously acquired knowledge in a major design project approved for Engineering Physics. Lectures devoted to discussing project-related issues and student presentations. A project proposal, interim report, oral presentations, and comprehensive final report are required.

Includes: Experiential Learning Activity

Prerequisite(s): Fourth-year status in Engineering. Certain projects may have additional prerequisites or corequisites.

Engineering Core (ECOR) Courses ECOR 1010 [0.5 credit] Introduction to Engineering

Technology, society and the environment. Graphical design communication: sketching, graphical projections; CAD. Managing data: statistical methods; spreadsheets. Design analysis: matrix programming software; symbolic computer algebra systems. Design process: proposals; reports; presentations; reporting software.

Includes: Experiential Learning Activity

Precludes additional credit for ECOR 1000 (no longer offered), ECOR 1034, ECOR 1047, ECOR 1054. Lectures four hours per week, laboratories two hours per week.

ECOR 1031 [0.5 credit]

Programming and Data Management

Software development as an engineering discipline, modern programming language. Syntax and semantics. Tracing and visualizing program execution. Style and documentation. Testing and debugging. Binary number system. Container data types for data management. Introduction to designing and implementing numerical algorithms. Modules. Data files. Incremental, iterative development.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 1005, COMP 1405,
ECOR 1041, ECOR 1042, ECOR 1051, ECOR 1606,
SYSC 1005.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1032 [0.5 credit] Circuits and Mechatronics

Electrical circuit fundamentals: resistance, capacitance, inductance, voltage and current sources, Ohm's law, nodal analysis, mesh analysis, source transformation, superposition. Components for mechatronics: filters, operational amplifiers, digital logic gates and combinatorial circuits, analog to digital converters, sensors, actuators, simple control schemes. Project in microcontrollerembedded mechatronic system:.

Includes: Experiential Learning Activity
Precludes additional credit for ECOR 1043, ECOR 1044, and ECOR 1052.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1033 [0.5 credit]

Statics

Force vectors, Dot product. Forces components and resultants. Particle equilibrium. Moments. Cross product. 2D Truss analysis. Centre of gravity and centroids. Rigid body equilibrium. 2D Frames and machines. Internal loads at a point.

Includes: Experiential Learning Activity
Precludes additional credit for ECOR 1045, ECOR 1046,
ECOR 1053, ECOR 1101.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1034 [0.5 credit]

Dynamics

Kinematics and Kinetics of a particle. Position velocity and acceleration using cartesian path and polar coordinates. Force and Acceleration. Mechanical work and energy conservation of energy. Principle of impulse and momentum, conservation of momentum. Systems of particles. Harmonic motion. Design Project on Projectile motion.

Includes: Experiential Learning Activity
Precludes additional credit for ECOR 1047, ECOR 1048,
ECOR 1054, ECOR 1101, ECOR 1010.
Prerequisite(s): This course may not be taken
concurrently with ESLA 1300 or ESLA 1500.
Lectures three hours per week, laboratories three hours
per week.

ECOR 1041 [0.25 credit]

Computation and Programming

Software development as an engineering discipline, using a modern programming language. Language syntax and semantics. Tracing and visualizing program execution. Program style and documentation. Testing and debugging tools and techniques. Binary number system to represent data in a computer.

Precludes additional credit for COMP 1005, COMP 1405, ECOR 1051, ECOR 1606, SYSC 1005, ECOR 1031. Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1042 [0.25 credit] Data Management

Software development using container data types (sequences, sets, maps) for data management. Modules. Data files. Incremental, iterative development of programs. Introduction to designing and implementing numerical algorithms.

Precludes additional credit for COMP 1005, COMP 1405, ECOR 1051, ECOR 1606, SYSC 1005, ECOR 1031. Prerequisite(s): ECOR 1041 with a minimum grade of C- and MATH 1004 (may be taken concurrently). This course may not be taken concurrently with ESLA 1300 or ESLA 1500.

Lectures three hours per week, laboratories three hours per week.

ECOR 1043 [0.25 credit]

Circuits

Electrical Quantities (Voltage, Charge, Current, Power). Conservation of charge and energy. Mathematical models of simple devices. Elementary circuit theory for passive elements. Thévenin's and superposition theorem. Signal filtering and amplification. Time and frequency domain. Circuit design and simulation.

Precludes additional credit for ECOR 1052, ECOR 1032. Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1044 [0.25 credit]

Mechatronics

Mechatronics applications. Analog to digital signal conversion. Control systems and PID controllers. Input devices, including sensors. Data collection and processing. Output devices, including displays, actuators, and motors. Project design and economics. Environmental Impact of mechatronics engineering. System failures and failsafe design.

Precludes additional credit for ECOR 1052, ECOR 1032. Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Recommended background: ECOR 1041 and ECOR 1043.

Lectures three hours per week, laboratories three hours per week.

ECOR 1045 [0.25 credit]

Statics

Cartesian vector representation of forces. Components of forces. Particle equilibrium and free body diagrams. Moments and cross product. Centre of gravity and centroids. Rigid body equilibrium.

Precludes additional credit for ECOR 1053, ECOR 1101,

Precludes additional credit for ECOR 1053, ECOR 1101, ECOR 1033.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1046 [0.25 credit]

Mechanics

2D truss analysis (method of joints/sections). Normal stress/strain and shear stress/strain. 2D frames and machines. Internal loads - normal, shear and moment at a point. Shear and moment diagrams.

Precludes additional credit for ECOR 1053, ECOR 1033.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.

Recommended background: ECOR 1045.

Lectures three hours per week, laboratories three hours per week.

ECOR 1047 [0.25 credit]

Visual Communication

Graphs and sketches, flow charts, block diagrams. Visual presentation, projection and perspectives of objects. 3D sketching. Free hand drawing. Reading engineering drawings and schematics. Introduction to scaling, dimensioning and tolerancing. Introduction to CAD.

Precludes additional credit for ECOR 1054, ECOR 1010, ECOR 1034.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1048 [0.25 credit]

Dynamics

Kinematics and kinetics of a particle. Principle of work and energy. Conservation of energy, conservative forces, potential energy. Principles of impulse and momentum, conservation of momentum for a system of particles. Precludes additional credit for ECOR 1054, ECOR 1101, ECOR 1034.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Recommended background: ECOR 1045. Lectures three hours per week, laboratories three hours per week.

ECOR 1051 [0.5 credit]

Fundamentals of Engineering I

Software development as an engineering discipline, using a modern programming language. Tracing and visualization of program execution. Testing and debugging. Data management: digital representation of numbers; numerical algorithms; storing data in files; container data types: sequences, sets, maps. Includes: Experiential Learning Activity
Precludes additional credit for COMP 1005, COMP 1405, ECOR 1031, ECOR 1041, ECOR 1042, ECOR 1606, SYSC 1005.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours per week.

ECOR 1052 [0.5 credit]

Fundamentals of Engineering II

Electrical Quantities. Conservation of mass and energy. Mathematical models of simple devices. Elementary circuit theory for passive elements. Signal filtering and amplification. Time and frequency domain. Circuit design and simulation. Digital and analog signals. Mechatronics applications. Output devices. System failures and failsafe design.

Includes: Experiential Learning Activity

Precludes additional credit for ECOR 1032, ECOR 1043,

ECOR 1044.

Prerequisite(s): ECOR 1051 (may be taken concurrently). Lectures three hours per week, laboratories three hours per week.

ECOR 1053 [0.5 credit]

Fundamentals of Engineering III

Components of forces. Particle equilibrium and free body diagrams. Moments and cross product. Centre of gravity and centroids. Rigid body equilibrium. 2D Truss analysis (method of joints/sections). Normal stress/strain and Shear stress/strain. 2D frames and machines.

Includes: Experiential Learning Activity

Precludes additional credit for ECOR 1045, ECOR 1046,

ECOR 1033, ECOR 1101.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500. Lectures three hours per week, laboratories three hours

per week.

ECOR 1054 [0.5 credit]

Fundamentals of Engineering IV

Engineering drawings and schematics. Graphs and sketches, flow charts, block diagrams. Computer#assisted design. Kinematics/Kinetics of a particle. Principles of work and energy. The Engineering Profession and Act. Organization and time management. Project management. Business, entrepreneurship and intellectual property. Includes: Experiential Learning Activity

Precludes additional credit for ECOR 1010, ECOR 1034,

ECOR 1047, ECOR 1048.

Prerequisite(s): ECOR 1053 (may be taken concurrently). Lectures three hours per week, laboratories three hours per week.

ECOR 1055 [0.0 credit]

Introduction to Engineering Disciplines I

Overview of professional activities oriented to the student's discipline of study: Architectural Conservation and Sustainability. Civil and Environmental. Aerospace and Mechanical. Electrical. Engineering Physics. Computer Systems, Communications and Software. Biomedical (Electrical and Mechanical). Sustainable and Renewable Energy. Graded SAT/UNS.

Prerequisite(s): This course may not be taken concurrently with ESLA 1300 or ESLA 1500.

Lectures 1.5 hours per week.

ECOR 1056 [0.0 credit]

Introduction to Engineering Disciplines II

Selected lectures designed to provide students with exposure to the breadth of Engineering disciplines. Graded SAT/UNS.

Online course.

ECOR 1057 [0.0 credit] Engineering Profession

Professional Engineers Act. Engineering documentation. History of the profession. Engineering practice: system life cycle, practice within the discipline, designing with others. Health and safety. Engineering Ethics, Equity and Diversity. Introduction to engineering law: Business, Entrepreneurship and Intellectual Property. Graded SAT/UNS.

Online course

ECOR 1101 [0.5 credit]

Mechanics I

Introduction to mechanics. Scalars and vectors. Concurrent forces: resultant and components. Statics of particles. Moments and couples. Force system resultants. Rigid body equilibrium. Frames and machines. Internal forces. Kinematics and kinetics of particles. Conservation theorems: work-energy; impulse-momentum. Centroids and centres of gravity.

Includes: Experiential Learning Activity

Precludes additional credit for ECOR 1033, ECOR 1034,

ECOR 1045, ECOR 1048, ECOR 1053.

Prerequisite(s): MATH 1004 and MATH 1104.

Lectures three hours a week, tutorials and problem

analysis three hours a week.

ECOR 1606 [0.5 credit]

Problem Solving and Computers

Introduction to engineering problem solving. Defining and modeling problems, designing algorithmic solutions, using procedural programming, selection and iteration constructs, functions, arrays, converting algorithms to a program, testing and debugging. Program style, documentation, reliability. Applications to engineering problems; may include numerical methods, sorting and searching.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 1005, SYSC 1100
(no longer offered), SYSC 1102 (no longer offered),
COMP 1005, COMP 1405, ECOR 1031, ECOR 1041,
ECOR 1042, ECOR 1051.

Lectures three hours a week, laboratory three hours a week.

ECOR 2050 [0.5 credit]

Design and Analysis of Engineering Experiments

Statistics and the design of engineering experiments. Basic exploratory data analysis. Central limit theorem. Hypothesis testing: t-test, chi-square test, type-I and type-II errors, multiple-comparison problem. Statistical bias. Design of experiments: randomization, blocking and replication, randomized blocking designs, factorial design. Statistical software packages.

Includes: Experiential Learning Activity
Prerequisite(s): 2nd Year Status in Engineering.
Lectures three hours a week, problem analysis and laboratory three hours a week.

ECOR 2606 [0.5 credit] Numerical Methods

Numerical algorithms and tools for engineering and problem solving. Sources of error and error propagation, solution of systems of linear equations, curve fitting, polynomial interpolation and splines, numerical differentiation and integration, root finding, solution of differential equations. Software tools.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 2606 (no longer offered).

Prerequisite(s): MATH 1005 and (ECOR 1606 or SYSC 1005) and (ECOR 1010 or ELEC 1908). Lectures three hours a week, laboratory one hour a week.

ECOR 2995 [0.0 credit] Engineering Portfolio

Students will be asked to reflect on their skills, strengths and weaknesses as preparation for the professional practice course. Engineering students must submit samples of their writing and communications (including, for example, laboratory reports and professional memos). Online

ECOR 3800 [0.5 credit] Engineering Economics

Introduction to engineering economics; cash flow calculations; methods of comparison of alternatives; structural analysis; replacement analysis; public projects; depreciation and income tax; effects of inflation; sensitivity analysis; break-even analysis; decision making under risk and uncertainty.

Prerequisite(s): third-year status in Engineering or (second-year status in Engineering and permission of the department).

Lectures three hours a week.

ECOR 4907 [1.0 credit]

Multidisciplinary Engineering Project

Student teams develop professional-level experience by applying, honing, integrating, and extending previously acquired knowledge in an approved major multidisciplinary engineering design project. Lectures devoted to discussing project-related issues and student presentations. A project proposal, interim report, oral presentations, and comprehensive final report are required.

Includes: Experiential Learning Activity
Precludes additional credit for ACSE 4918, CIVE 4918,
ELEC 4907, ELEC 4908, ENVE 4918, MAAE 4907,
SREE 4907, SYSC 4907, SYSC 4917, SYSC 4927, SYSC 4937.

Prerequisite(s): (ECOR 3800 or SYSC 4106), fourth-year status in Engineering and Permission of the faculty.

ECOR 4995 [0.5 credit] Professional Practice

Presentations by faculty and external lecturers on the Professional Engineers Act, professional ethics and responsibilities, practice within the discipline and its relationship with other disciplines and to society, health and safety, environmental stewardship, principles and practice of sustainable development. Communication skills are emphasized.

Precludes additional credit for MAAE 4905, CIVE 4905, SYSC 3905 or ELEC 3905 (all no longer offered). Prerequisite(s): ECOR 2995 and fourth-year status in Engineering.

Lectures three hours a week.

Environmental Engineering (ENVE) Courses ENVE 1001 [0.5 credit]

Architecture and the Environment

Impacts of the environment on architecture; deterioration, freeze/thaw, solar heat, air pollution, moisture; Impacts of architecture on the environment; ecologic footprint, energy consumption, air quality, waste generation; designing with the environment; renewable energy, effective siting and landscape, passive solar energy, natural lighting, energy efficiency.

Also listed as ACSE 2001, ARCH 1222.

Lectures three hours a week, problem analysis one and a half hours a week.

ENVE 2001 [0.5 credit]

Process Analysis for Environmental Engineering

Material and energy balances for reacting and nonreacting systems. Applications in mining, metallurgy, pulp and paper, power generation, energy utilization. Emissions to the environment per unit product or service generated. Introduction to life cycle analysis, comparative products and processes.

Prerequisite(s): CHEM 1002 or CHEM 1101 or equivalent, and MAAE 2400 (may be taken concurrently), and second-year status in Engineering.

Lectures two hours a week, problem analysis three hours a week.

ENVE 2002 [0.5 credit] Microbiology

The biology of the Bacteria, Archaea, Viruses and Protozoans, from the fundamentals of cell chemistry, molecular biology, structure and function, to their involvement in ecological and industrial processes and human disease.

Also listed as BIOL 2303.

Prerequisite(s): BIOL 1103 or CHEM 1002 or CHEM 1101 or equivalent.

Lectures three hours a week.

ENVE 3001 [0.5 credit] Water Treatment Principles and Design

Theoretical aspects of unit operations for water treatment with design applications. Topics include water characteristics and contaminants, coagulation, flocculation, sedimentation, filtration, adsorption, ion exchange, membrane processes, disinfection and disinfection by-products, and management of water treatment residuals. Laboratory procedures: settling operations, filtration, aeration, and adsorption.

Includes: Experiential Learning Activity

Prerequisite(s): ENVE 3002.

Lectures three hours a week, problem analysis one hour a week, laboratory three hours alternate weeks.

ENVE 3002 [0.5 credit]

Environmental Engineering Systems Modeling

Engineered systems for pollution abatement; chemical reaction engineering; reaction kinetics and rate data analysis; design and modeling of reactors; single and multiple reactions; ideal and nonideal reactors; single and multi-parameter models; biochemical reaction engineering; process control. Laboratory procedures: reactor systems performance: Batch, CSTR and PFR.

Includes: Experiential Learning Activity

Prerequisite(s): CHEM 1002 or CHEM 1101, MATH 2004 (or concurrent), and second-year status in Engineering. Additional recommended background: ENVE 2001. Lectures three hours a week, problem analysis 2 hours a week, laboratory 1.5 hours alternate weeks.

ENVE 3003 [0.5 credit] Water Resources Engineering

A quantitative analysis of natural water systems and the development of these systems as a resource. Components of the hydrologic cycle. Quantitative analysis of stream flow. Probability concepts in water resources. Reservoir design and operation. Hydraulic properties and availability of groundwater. Storm water management. Also listed as GEOG 4103.

Prerequisite(s): third-year status in Engineering. Lectures three hours a week, problem analysis one hour a week.

ENVE 3004 [0.5 credit] Contaminant and Pollutant Transport in the Environment

Physical phenomenon governing the transport of contaminants in the environment: diffusion, advection, dispersion, sorption, interphase transfer. Derivation and application of transport equations in air, surface and groundwater pollution; analytical and numerical solutions. Equilibrium partitioning of contaminants among air, water, sediment, and biota.

Prerequisite(s): CHEM 1002 or CHEM 1101 or equivalent; ENVE 3002.

Lectures three hours a week, problem analysis one hour a week

ENVE 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

ENVE 4002 [0.5 credit]

Environmental Geotechnical Engineering

Landfill design; hydrogeologic principles, water budget, landfill liners, geosynthetics, landfill covers, quality control/quality assurance, clay leachate interaction, composite liner design and leak detection. Landfill operation, maintenance and monitoring. Case studies of landfill design and performance. Geotechnical design of environmental control and containment systems. Prerequisite(s): ENVE 3004, CIVE 3208.

Also offered at the graduate level, with different requirements, as ENVE 5201/EVG 7201, for which additional credit is precluded.

Lectures three hours a week, problem analysis one hour a week

ENVE 4003 [0.5 credit]

Air Pollution and Emissions Control

Air pollutants, classification, sources, and effects. Ambient air quality objectives and monitoring. Pollutant formation mechanisms in combustion. Major pollutant categories and control methods. Indoor air quality. Laboratory procedures: emissions from boilers and IC engines, particulate size distribution and control, IAQ parameters.

Includes: Experiential Learning Activity
Prerequisite(s): MAAE 2400 and fourth-year status in
Engineering or permission of the department.
Also offered at the graduate level, with different
requirements, as ENVE 5101/EVG 7101, for which
additional credit is precluded.

Lectures three hours a week, problem analysis one hour a week, laboratory three hours alternate weeks.

ENVE 4005 [0.5 credit]

Wastewater Treatment Principles and Design

Theoretical aspects of unit operations and processes for wastewater treatment with design applications. Topics include wastewater characteristics, flow rates, primary treatment, chemical unit processes, biological treatment processes, advanced wastewater treatment, disinfection, biosolids treatment and disposal. Laboratory procedures: activated sludge, anaerobic growth, chemical precipitation, disinfection.

Includes: Experiential Learning Activity
Prerequisite(s): ENVE 3001, ENVE 3002.
Also offered at the graduate level, with different requirements, as ENVE 5008, for which additional credit is precluded.

Lectures three hours a week, problem analysis one hour a week, laboratory three hours alternate weeks.

ENVE 4006 [0.5 credit] Contaminant Hydrogeology

Theory of flow through porous media. Site investigation: geology, hydrology and chemistry. Contaminant transport. Unsaturated and multiphase flow. Numerical modeling. Site remediation and remediation technologies. Prerequisite(s): ENVE 3004 and MAAE 2300. Additional recommended background: ENVE 3003.

Also offered at the graduate level, with different requirements, as ENVE 5301/EVG 7301, for which additional credit is precluded.

Lectures three hours a week, problem analysis one and a half hours a week.

ENVE 4101 [0.5 credit]

Waste Management

Municipal, hazardous, and mine waste management. Waste composition and potential impacts, collection and transport, recycling and reuse, biological and thermal treatments, isolation. Integrated waste management planning.

Prerequisite(s): ENVE 3001, ENVE 3002 and ENVE 3004.

Also offered at the graduate level, with different requirements, as ENVE 5203/EVG 5203, for which additional credit is precluded.

Lectures three hours a week, problem analysis one hour a week.

ENVE 4104 [0.5 credit]

Environmental Planning and Impact Assessment

Canada and U.S. environmental regulations. Framework for Environmental Impact Assessment, survey techniques for impact assessment and EIA review process. Case studies of selected engineering projects. Environmental planning, management of residuals and environmental standards. Risk assessment, policy development and decision-making. Fault-tree analysis.

Includes: Experiential Learning Activity Prerequisite(s): ENVE 3004 and fourth-year status in Engineering.

ENVE 4105 [0.5 credit] Green Building Design

Concepts, calculations, modeling; design of green buildings and their components; sustainable sites and landscaping; passive design; building envelope; building materials; daylighting; heating, cooling, and ventilation; building-integrated renewable energy systems; indoor environmental quality; overview of building standards and codes.

Also listed as ACSE 3105.

Prerequisite(s): Third-year status in B.Eng. in Architectural Conservation and Sustainability Engineering, Civil Engineering, or Environmental Engineering or fourth-year standing in B.A.S. concentration in Conservation and Sustainability.

Lectures three hours a week, problem analysis one and a half hours per week.

ENVE 4106 [0.5 credit] Indoor Environmental Quality

Indoor environmental quality (air quality, thermal, visual, and acoustic comfort); physical and chemical parameters for characterization. Types and sources of indoor air pollution and discomfort; measurement techniques. Heating, ventilation, air conditioning, lighting practices and issues. Modelling of and design for indoor environmental quality.

Also listed as ACSE 4106.

Prerequisite(s): fourth year status in B.Eng. Architectural Conservation and Sustainability Engineering or B.Eng. Environmental Engineering or fourth year standing in B.A.S. concentration in Conservation and Sustainability. Also offered at the graduate level, with different requirements, as ENVE 5104, for which additional credit is precluded.

Lectures three hours a week, laboratory three hours alternate weeks.

ENVE 4107 [0.5 credit] Building Services Engineering

This course provides details on how buildings are designed and operated. The materials provide foundational knowledge to understand building services: mechanical, electrical, plumbing systems with associated controls.

Also listed as ACSE 4107.

Prerequisite(s): CIVE 3209 and ENVE 4105. Lecture three hours per week, problem analysis three hours every other week.

ENVE 4200 [0.5 credit] Climate Change and Engineering

Survey of the physical science of climate change, impacts on the built environment, and climate adaptation in engineering. Greenhouse gases, global warming, paleoclimatology, and Earth system responses. Climate change impacts on structural, water, transportation, and energy systems. Climate vulnerability assessment, examples of design adaptation.

Prerequisite(s): Fourth-year status in Engineering. Also offered at the graduate level, with different requirements, as ENVE 5200, for which additional credit is precluded.

Lecture three hours per week, problem analysis three hours every other week.

ENVE 4907 [1.0 credit] Engineering Research Project

A research project in engineering analysis, design or development carried out by individual students or small teams, for an opportunity to develop initiative, self-reliance, creative ability and engineering judgment and is normally intended for students with high CGPAs and an interest in graduate studies.

Includes: Experiential Learning Activity
Precludes additional credit for ENVE 4917.
Prerequisite(s): fourth-year status in Engineering and permission of the department.

ENVE 4917 [0.5 credit] Undergraduate Directed Study

Student carries out a study, analysis, and solution of an engineering problem which results in a written final report. Carried out under close supervision of a faculty member. Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student.

Includes: Experiential Learning Activity
Precludes additional credit for ENVE 4907.
Prerequisite(s): permission of the Department and completion of, or concurrent registration in, ENVE 4918.
Self study.

ENVE 4918 [1.0 credit] Design Project

Teams of students develop professional level experience through a design project that incorporates fundamentals acquired in previous mathematics, science, engineering, and complementary studies courses. A final report and oral presentations are required.

Includes: Experiential Learning Activity

Precludes additional credit for ACSE 4918, CIVE 4918. Prerequisite(s): ECOR 3800 and fourth-year Status in Engineering. Certain projects may have additional requirements.

Lectures two hours alternate weeks, problem analysis three hours a week.

Mechanical Engineering (MECH) Courses MECH 3002 [0.5 credit] Machine Design and Practice

The design of mechanical machine elements is studied from theoretical and practical points of view. Topics covered include: design factors, fatigue, and discrete machine elements. Problem analysis emphasizes the application to practical mechanical engineering problems. Includes: Experiential Learning Activity Prerequisite(s): MAAE 2001 and MAAE 3202. Lectures three hours a week, problem analysis three hours a week.

MECH 3310 [0.5 credit] Biofluid Mechanics

Applications of fundamental fluid mechanics to human circulatory and respiratory systems. Basic viscous flow theory including: blood flow in the heart and large arteries, air flow in extra-thoracic (nose-mouth throat) airways and lungs.

Includes: Experiential Learning Activity
Prerequisite(s): MATH 2004 and MAAE 2300.
Lectures three hours per week, laboratories or tutorials

three hours per week.

MECH 3700 [0.5 credit] Principles of Manufacturing

Manufacturing processes, materials. Casting: solidification and heat flow theory, defect formation, casting design. Metal forming: elementary plasticity theory, plastic failure criteria, force and work calculations. Bulk and sheet forming. Joining: heat flow and defect formation, residual stresses. Machining theory and methods. Hardening: diffusion, wear resistance.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 2700.

Lectures three hours a week, problem analysis and laboratories three hours a week on alternate weeks.

MECH 3710 [0.5 credit] Biomaterials

Materials used in biomedical applications: metals, polymers, ceramics and composites. Material response and degradation. Properties of biologic materials; bone, cartilage, soft tissue. Materials selection for biocompatibility.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 2700.

Lectures three hours per week, laboratories and problem analysis three hours per week.

MECH 4003 [0.5 credit] Mechanical Systems Design

Design of mechanical systems: establishing design criteria, conceptual design, design economics, value analysis, synthesis and optimization. Mechanical elements/systems: gear and flexible drive systems, fluid power systems. These elements are utilized in group design projects.

Includes: Experiential Learning Activity

Prerequisite(s): MECH 3002 and fourth-year status in

Engineering.

Lectures three hours a week, problem analysis three hours a week.

MECH 4006 [0.5 credit] Vehicle Engineering I

The course emphasizes the engineering and design principles of road transport vehicles. Topics to be covered include: performance characteristics, handling behaviour and ride quality of road vehicles.

Prerequisite(s): MAAE 3004 and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

MECH 4007 [0.5 credit] Vehicle Engineering II

Engineering and design principles of off-road vehicles and air cushion technology. Topics include: mechanics of vehicle-terrain interaction - terramechanics, performance characteristics of off-road vehicles, steering of tracked vehicles, air cushion systems and their performance, applications of air cushion technology to transportation. Prerequisite(s): MAAE 3004 and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

MECH 4013 [0.5 credit] **Biomedical Device Design**

Medical Devices: the industry and its regulation. Design methodologies. Examination of specific medical devices: surgical equipment, orthopedic devices, rehabilitation engineering, life support, artificial organs. Case studies. Includes: Experiential Learning Activity Prerequisite(s): MECH 3710, MAAE 3202, and MECH 4210 and fourth-year status in Engineering. Lectures three hours per week, laboratories or tutorial three hours per week.

MECH 4101 [0.5 credit] **Mechanics of Deformable Solids**

Course extends the student's ability in design and stress analysis. Topics include: introductory continuum mechanics, theory of elasticity, stress function approach, Lamé and Mitchell problems, stress concentrations, thermoelasticity and plasticity.

Prerequisite(s): MAAE 3202 and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

MECH 4102 [0.5 credit] **Corrosion and Corrosion Control**

Introduction to corrosion. Corrosion mechanisms. Thermodynamics of corrosion. Electro-chemical kinetics of corrosion. Corrosion: types, prevention, control, testing, monitoring and inspection techniques. Corrosion in specific metals (eg. Fe, Ni, Ti and Al). Corrosion issues in specific industries: power generation and chemical processing industries.

Prerequisite(s): Fourth-year status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4103 [0.5 credit] **Fatigue and Fracture Analysis**

Elastic and elasto-plastic fracture mechanics. Fatigue design methods, fatigue crack initiation and growth Paris law and strain-life methods. Fatigue testing, scatter, mean stress effects and notches. Welded and built up structures, real load histories and corrosion fatigue. Damage tolerant design and fracture control plans.

Prerequisite(s): MAAE 3202 and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

MECH 4104 [0.5 credit] Vibration Analysis

Free and forced vibrations of one and two degree-offreedom systems. Vibration measurement and isolation. Numerical methods for multi-degree-of-freedom systems. Modal analysis techniques. Dynamic vibration absorbers. Shaft whirling. Vibration of continuous systems: bars, plates, beams and shafts. Energy methods. Holzer method.

Prerequisite(s): MAAE 3004 and fourth-year status in Engineering or by permission of the department. Lectures three hours per week.

MECH 4105 [0.5 credit]

Introduction to Nuclear Engineering

Atomic theory, nuclear physics, radioactivity, photoelectric effect, mass defect, binding energy, nuclides, neutron diffusion and moderation. Reactor theory, kinetics, control. Reactor types, reactor poisoning, xenon oscillations. Reactor materials, corrosion, fuel and fuel cycle. Nuclear medicine. Radiation protection, reactor safety fundamentals.

Prerequisite(s): Fourth-year status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4106 [0.5 credit] **Nuclear Power Plant Design**

Elements of design, basic design, and new generation of nuclear reactors. Major systems of CANDU reactor and its safety principles. Balance of Plant Systems. Licensing requirements for design (IAEA, CNSC and USNRC regulations). Analytical/computer codes in safety assessments and design.

Prerequisite(s): Fourth-year status in Engineering or by permission of the department.

Lectures three hours per week.

MECH 4107 [0.5 credit] **Internal Combustion Engines**

This course explores the design process of an internal combustion engine including: Internal Aerodynamics, Combustion, Rotating and Reciprocating Components, Structures, Control Systems, Manufacturing and Testing Methods. Students will design/optimize an engine component utilizing industry standard Ricardo Wave simulation software.

Prerequisite(s): Fourth-year status in Engineering or by permission of the department. Lecture three hours per week.

MECH 4210 [0.5 credit]

Biomechanics

The biomechanics of biological systems; muscles and movement, nerves and motor control. Measurements of motion, strain and neural signals. The hand and manipulation; locomotion and the leg.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 2101 and fourth-year status in Engineering.

Lectures three hours per week, laboratories or tutorials three hours per week.

MECH 4305 [0.5 credit] Fluid Machinery

Types of machines. Similarity: performance parameters; characteristics; cavitation. Velocity triangles. Euler equation: impulse and reaction. Radial pumps and compressors: analysis, design and operation. Axial pumps and compressors: cascade and blade-element methods; staging; off-design performance; stall and surge. Axial turbines. Current design practice.

Prerequisite(s): (MAAE 3300 or MECH 3310) and fourthyear status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4401 [0.5 credit] Power Plant Analysis

Criteria of merit; selection of power plant for transportation and power generation applications; interrelation among mechanical, thermodynamic and aerodynamic design processes; jet propulsion, turbojets and turbofans; alternative proposals for vehicular power plant; combined cycle applications.

Precludes additional credit for AERO 4402. Prerequisite(s): MAAE 2400 and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

MECH 4403 [0.5 credit] Power Generation Systems

Energy sources and resources. Basic elements of power generation. Hydro-electric, fossil-fuel, fissile-fuel power plants. Geothermal, solar and wind power plants. Economic and environmental considerations. Energy storage. Future power needs.

Precludes additional credit for SREE 4001.

Prerequisite(s): MAAE 2300 and MAAE 2400 and fourth-year status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4406 [0.5 credit]

Heat Transfer

Mechanisms of heat transfer: fundamentals and solutions. Steady and transient conduction: solution and numerical and electrical analog techniques. Convective heat transfer: free and forced convection for laminar and turbulent flows; heat exchangers. Heat transfer between black and grey surfaces, radiation shields, gas radiation, radiation interchange.

Precludes additional credit for AERO 4446.
Prerequisite(s): MAAE 2400 and (MAAE 3300,
MECH 3310, or (ENVE 3001 and permission of the
Department of Mechanical and Aerospace Engineering))
and fourth-year status in Engineering.

Lectures three hours a week. Problem analysis and laboratories three hours a week.

MECH 4407 [0.5 credit] Heating and Air Conditioning

Environmental demands for residential, commercial and industrial systems. Methods of altering and controlling environment. Air distribution. Refrigeration methods, equipment and controls. Integrated year-round air-conditioning and heating systems; heat pumps. Cooling load and air-conditioning calculations. Thermal radiation control. Component matching. System analysis and design.

Prerequisite(s): MAAE 2400 and fourth-year status in Engineering or by permission of the department. Lectures three hours a week.

MECH 4408 [0.5 credit]

Thermofluids and Energy Systems Design

Integration of fluid mechanics, thermodynamics, and heat transfer for design of energy conversion systems. Chemical kinetics and mass transfer. Efficient combustion, fuel cells and batteries. Efficient operation and design of engines, power generators, boilers, furnaces, incinerators, and co-generation systems. Emerging energy systems. Prerequisite(s): MAAE 3400 and fourth-year status in Engineering.

Lectures three hours per week.

MECH 4501 [0.5 credit] State Space Modeling and Control

Review of matrices. Geometric structure and dynamics of linear systems. Controllability and observability. Pole placement design of controllers and observers. Design of regulator and servo systems. Transmission zeros. Eigenstructure assignment. Relationship to frequency or classical control techniques. Computer solutions using MATLAB. Applications.

Precludes additional credit for SYSC 5502.

Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourthyear status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4503 [0.5 credit] An Introduction to Robotics

History of robotics and typical applications. Robotic actuators and sensors. Kinematics of manipulators, inverse kinematics, differential relationships and the Jacobian. Manipulator dynamics. Trajectory generation and path planning. Robot control and performance evaluation. Force control and compliance. Applications in manufacturing and other industries.

Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourthyear status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4604 [0.5 credit] Finite Element Methods

Finite element methodology with emphasis on applications to stress analysis, heat transfer and fluid flow using the simplest one- and two-dimensional elements. Direct equilibrium, variational and Galerkin formulations. Computer programs and practical applications. Higher order elements.

Prerequisite(s): MAAE 3202 and fourth-year status in Engineering or by permission of department. Lectures three hours a week.

MECH 4704 [0.5 credit] Integrated Manufacturing - CIMS

Overview of the topics essential to CIMS including integration of design and assembly techniques, numerical analysis, statistical process control and related production technologies within the manufacturing enterprise.

Prerequisite(s): Fourth-year status in Engineering or by permission of the department.

Also offered at the graduate level, with different requirements, as MECH 5704, for which additional credit is precluded.

Lectures three hours a week.

MECH 4705 [0.5 credit] CAD/CAM

Introduction to contemporary computer aided design and manufacturing (CAD/CAM) Topics covered include mathematical representation, solid modeling, drafting, mechanical assembly mechanism design, (CNC) machining. Current issues such as CAD data exchange standards, rapid prototyping, concurrent engineering, and design for X (DFX) are also discussed.

Prerequisite(s): (AERO 2001 or MAAE 2001) and fourthyear status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4805 [0.5 credit] Measurement and Data Systems

Experimental data, accuracy and uncertainty analysis. Analog systems. Sensors. Signal conditioning. Op-Amps, instrumentation amplifiers, charge amplifiers, filters. Digital techniques. Encoders, A/D D/A converters. Data acquisition using microcomputers. Hardware and software considerations. Interfacing. Applications to measurement of motion, strain, force/torque, pressure, fluid flow, temperature.

Precludes additional credit for ELEC 4805.

Prerequisite(s): ECOR 2050 and fourth-year status in Engineering or by permission of the department.

Lectures three hours a week.

MECH 4806 [0.5 credit] Mechatronics

Introduction to the integration of mechanical, electronic and software components to build mechatronic devices. Mechanical and electrical systems modeling, simulation and implementation. Basic automation and computer requirements. Design tools and examples of mechatronic applications.

Prerequisite(s): (MAAE 3500 or SYSC 4505) and fourthyear status in Engineering or by permission of the department.

Lectures three hours per week.

Mechanical and Aerospace Engineering (MAAE) Courses

MAAE 2001 [0.5 credit] Engineering Graphical Design

Engineering drawing techniques; fits and tolerances; working drawings; fasteners. Elementary descriptive geometry; true length, true view, and intersection of geometric entities; developments. Assignments will make extensive use of Computer-Aided Design (CAD) and will include the production of detail and assembly drawings from actual physical models.

Includes: Experiential Learning Activity Also listed as AERO 2001.

Prerequisite(s): Second-year status in Engineering. Lectures and tutorials two hours a week, laboratory four hours a week.

MAAE 2101 [0.5 credit] Engineering Dynamics

Review of kinematics and kinetics of particles: rectilinear and curvilinear motions; Newton's second law; energy and momentum methods. Kinematics and kinetics of rigid bodies: plane motion of rigid bodies; forces and accelerations; energy and momentum methods. Includes: Experiential Learning Activity
Precludes additional credit for CIVE 2101.
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, problem analysis three hours a week.

MAAE 2202 [0.5 credit] Mechanics of Solids I

Review of Principles of Statics; friction problems; Concepts of stress and strain at a point; statically determinate and indeterminate stress systems; torsion of circular sections; bending moment and shear force diagrams; stresses and deflections in bending; buckling instability.

Includes: Experiential Learning Activity
Precludes additional credit for CIVE 2200.
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, problem analysis and laboratory three hours a week.

MAAE 2203 [0.5 credit] Mechanics of Solids

Covers the essentials of solids for machine design, failure theories and stress concentrations.

Includes: Experiential Learning Activity

Prerequisite(s): second-year status in Engineering. Lectures three hours a week, laboratory three hours alternate weeks.

MAAE 2300 [0.5 credit]

Fluid Mechanics I

Fluid properties. Units. Kinematics, dynamics of fluid motion: concepts of streamline, control volume, steady and one-dimensional flows; continuity, Euler, Bernoulli, steady flow energy, momentum, moment of momentum equations; applications. Fluid statics; pressure distribution in fluid at rest; hydrostatic forces on plane and curved surfaces; buoyancy.

Includes: Experiential Learning Activity
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, laboratory and problem

analysis three hours a week.

MAAE 2400 [0.5 credit]

Thermodynamics and Heat Transfer

Basic concepts of thermodynamics: temperature, work, heat, internal energy and enthalpy. First law for closed and steady-flow open systems. Thermodynamic properties of pure substances; changes of phase; equation of state. Second law: entropy. Simple power and refrigeration cycles. Introduction to heat transfer: conduction, convection, radiation.

Includes: Experiential Learning Activity

Prerequisite(s): Second-year status in Engineering. Lectures three hours a week, laboratory and problem analysis three hours a week.

MAAE 2401 [0.5 credit]

Mechatronics Thermodynamics and Heat Transfer

Basic concepts of thermodynamics: temperature, work, heat, internal energy and enthalpy. First law for closed and steady-flow open systems. Properties of pure substances. Second law: entropy. Simple power and refrigeration cycles. Introduction to heat transfer: conduction, convection, radiation. Heat exchangers and heat sinks

Includes: Experiential Learning Activity
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, laboratory and problem analysis three hours a week.

MAAE 2700 [0.5 credit] Engineering Materials

Materials (metals, alloys, polymers) in engineering service; relationship of interatomic bonding, crystal structure and defect structure (vacancies, dislocations) to material properties; polymers, phase diagrams and alloys; microstructure control (heat treatment) and mechanical properties; material failure; corrosion.

Includes: Experiential Learning Activity
Precludes additional credit for CIVE 2700.
Prerequisite(s): Second-year status in Engineering.
Lectures three hours a week, problem analysis and laboratory three hours a week.

MAAE 3004 [0.5 credit] Dynamics of Machinery

Kinematic and dynamic analysis of mechanisms and machines. Mechanism force analysis. Static and dynamic balancing. Kinematic and dynamic analysis of cams. Free and forced vibration of single-degree-of-freedom systems. Introduction to multibody dynamics.

Includes: Experiential Learning Activity
Prerequisite(s): MAAE 2101 and MATH 1005.
Lectures three hours a week, problem analysis and laboratories two hours a week.

MAAE 3202 [0.5 credit] Mechanics of Solids II

Stress and strain transformations: torsion of non-circular sections; unsymmetric bending and shear centre; energy methods; complex stresses and criteria of yielding; elementary theory of elasticity; axisymmetric deformations.

Includes: Experiential Learning Activity
Precludes additional credit for CIVE 3202.
Prerequisite(s): MAAE 2202 and MATH 1005 (co-req).
Lectures three hours a week, problem analysis and laboratory three hours a week.

MAAE 3300 [0.5 credit]

Fluid Mechanics II

Review of control volume analysis. Dimensional analysis and similitude. Compressible flow: isentropic flow relations, flow in ducts and nozzles, effects of friction and heat transfer, normal and oblique shocks, two-dimensional isentropic expansion. Viscous flow theory: hydrodynamic lubrication and introduction to boundary layers.

Includes: Experiential Learning Activity
Prerequisite(s): MATH 2004 and MAAE 2300.
Lectures three hours a week, problem analysis and laboratory three hours a week.

MAAE 3400 [0.5 credit] Applied Thermodynamics

Gas and vapour power cycles: reheat, regeneration, combined gas/vapour cycles, cogeneration. Heat pump and refrigeration cycles: vapour compression cycles, absorption refrigeration and gas refrigeration. Mixtures of perfect gases and vapours: psychometry and combustion. Principles of turbomachinery.

Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 and MAAE 2400.
Lectures three hours a week, problem analysis and laboratories three hours a week.

MAAE 3500 [0.5 credit] Feedback Control Systems

Introduction to the linear feedback control. Analysis and design of classical control systems. Stability and the Routh-Hurwitz criteria. Time and frequency domain performance criteria, robustness and sensitivity. Root locus, Bode and Nyquist design techniques. Control system components and industrial process automation. Includes: Experiential Learning Activity

Precludes additional credit for MAAE 4500 (no longer offered), SYSC 4505.

Prerequisite(s): MATH 3705 and (SYSC 3600 or SYSC 3610).

Lectures three hours a week, problem analysis and laboratories three hours a week.

MAAE 3505 [0.5 credit] Mechatronics I

Introduction to mechatronics systems. Lectures, labs, assignments, and a semester-long project to develop a mechatronics system and program microcontrollers. Includes: Experiential Learning Activity Prerequisite(s): ELEC 3508, ELEC 4709, MAAE 3002. Lectures three hours a week, laboratory three hours a week.

MAAE 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

MAAE 4102 [0.5 credit]

Materials: Strength and Fracture

Analysis and prevention of failures in metals; plasticity analysis and plastic collapse; micro-mechanisms of fracture, conditions leading to crack growth and transition temperature effects, fracture mechanics, fatigue, environmentally assisted cracking, non-destructive evaluation and testing.

Prerequisite(s): MAAE 2202 and MAAE 2700 and fourthyear status in Engineering. Lectures three hours a week.

MAAE 4706 [0.5 credit] Mechatronics II

Advanced topics in mechatronics, including a semesterlong project to develop a fully integrated mechatronic system.

Includes: Experiential Learning Activity

Prerequisite(s): MAAE 3505.

Lectures three hours a week, laboratory three hours a week

MAAE 4902 [0.5 credit]

Special Topics: Mechanical and Aerospace Engineering

Selected advanced topics of interest to Aerospace and Mechanical Engineering students, subject to the discretion of the Faculty of Engineering and Design.

Prerequisite(s): permission of the Department.

Lecture three hours a week.

MAAE 4903 [0.5 credit]

Special Topics: Mech & Aero Eng.

At the discretion of the Faculty, a course may be offered that deals with selected advanced topics of interest to Aerospace and Mechanical Engineering students. Prerequisite(s): permission of the Department. Lecture three hours a week.

MAAE 4904 [0.5 credit]

Special Topics: Mechanical and Aerospace Engineering

Selected advanced topics of interest to Aerospace and Mechanical Engineering students, subject to the discretion of the Faculty of Engineering and Design.

Prerequisite(s): permission of department.

Lectures three hours a week.

MAAE 4906 [0.5 credit]

Special Topics: Mech and Aero Eng.

At the discretion of the Faculty, a course may be offered that deals with selected advanced topics of interest to Aerospace and Mechanical Engineering students.

Prerequisite(s): permission of the Department.

MAAE 4907 [1.0 credit] Engineering Design Project

Team project in the design of an aerospace, biomedical, mechanical, or sustainable energy system. Opportunity to develop initiative, engineering judgement, self-reliance, and creativity in a team environment. Results submitted in a comprehensive report as well as through formal oral presentations.

Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year status in engineering and
(completion of or concurrent registration in AERO 4003,
AERO 4842, MECH 4003, MECH 4013, or SREE 4001,
or permission of Department). Certain projects may have
additional prerequisites.

MAAE 4917 [0.5 credit] Undergraduate Directed Study

Study, analysis, and solution of an engineering problem. Results presented in the form of a written report. Carried out under the close supervision of a faculty member. Intended for students interested in pursuing graduate studies. Requires supervising faculty member and proposal from student.

Includes: Experiential Learning Activity
Prerequisite(s): permission of the Department and
completion of, or concurrent registration in, MAAE 4907.

Mechatronics Engineering (MECT) Courses MECT 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity
Prerequisite(s): Registration in the Co-operative
Education Option, and permission of the the Faculty of
Engineering and Design.

MECT 4907 [1.0 credit] Engineering Project

Student teams develop professional-level experience by applying previously acquired knowledge to a major design project. Project meetings discuss project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.

Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year status in Engineering. Certain
projects may have additional prerequisites.
No formal lectures

Sustainable and Renewable Energy (SREE) Courses

SREE 1000 [0.0 credit] Introduction to Sustainable Energy

The concept of energy sustainability. Energy-economy system. Global energy trends, the next 100 years. Energy reserves and resources. Primary and secondary clean energy. Energy use, efficiency and renewables. Energy and the environment/climate change. Sustainable energy choices and policies.

Prerequisite(s): registration in Sustainable and Renewable Energy Engineering.

Lectures one hour per week.

SREE 3001 [0.5 credit]

Sustainable and Renewable Energy Sources

Primary energy sources and their associated fundamental physics of conversion. Renewables: wind, large hydro, solar radiation, solar thermal. Fossil and biofuels. Nuclear. Climate science: the carbon cycle and the role of anthropogenic GHG emissions in climate warming. Terrestrial, thermodynamic and electrical limitations. Includes: Experiential Learning Activity Prerequisite(s): ENVE 2001 and MAAE 2300 and (ELEC 2602 or fourth-year status in Environmental Engineering).

Lectures three hours per week, laboratories/problem analysis one hour per week.

SREE 3002 [0.5 credit] Electrical Distribution Systems

Electricity Distribution: topology, load characteristics, load prediction, voltage regulation, power flow, power loss, capacitors, state estimation, system reliability, system protection. Distribution Automation: components and architectures, communication systems. Distributed Generation: guides and regulations, microgrids, case study.

Includes: Experiential Learning Activity
Prerequisite(s): SREE 3001 and (ELEC 2602 or
ELEC 3605).

Lectures three hours per week, laboratories three hours per week alternate weeks.

SREE 3003 [0.5 credit]

Sustainable and Renewable Electricity Generation

Power system structures; photovoltaic cell: model, current#voltage curves, maximum power point tracking, grid connection; grid connection of wind generator; DC# AC and AC#DC converter simulation and analysis; energy storage classification; battery: equivalent circuit model, charging and discharging; renewable generation; feed#in tariff program.

Includes: Experiential Learning Activity
Prerequisite(s): SREE 3001 and (ELEC 2602 or
ELEC 3605).

Lectures three hours per week, laboratories three hours per week alternate weeks.

SREE 4001 [0.5 credit] Efficient Energy Conversion

Sustainable large-scale power generation. Geothermal, solar thermal, hydrogen power plants. Thermal grids and thermal energy storage. Environmental and economic aspects of power generation. Impacts of intermittent power generation. Sizing of wind, solar PV, run-of-river hydro, and offshore power plants. Current and future energy network topologies.

Includes: Experiential Learning Activity
Precludes additional credit for MECH 4403.
Prerequisite(s): MAAE 2300, MAAE 2400 and fourth year status in Sustainable & Renewable Energy Engineering.
Lectures three hours per week, laboratories/problem analysis three hours per week.

SREE 4002 [0.5 credit]

Modelling and Analysis of Energy Systems: Risk, Reliability, and Economics

Energy technologies exist within a context of economic, policy, and behavioral choices that affect their adoption. This course will introduce engineering methods for analyzing risk, uncertainty, and system-level decision-making. We will investigate criteria that affect energy systems: reliability, resilience, economics, financing, health, and environmental impacts.

Prerequisite(s): fourth-year status in Engineering. Lectures three hours per week.

SREE 4907 [1.0 credit] Energy Engineering Project

Student teams develop professional-level experience by applying, honing, integrating and extending previously acquired knowledge in a major design project. Lectures are devoted to discussing project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.

Includes: Experiential Learning Activity
Prerequisite(s): SREE 3002 and SREE 3003, and
fourth-year status in Sustainable and Renewable Energy
Engineering. Certain projects may have additional
prerequisites or corequisites.

Systems and Computer Engineering (SYSC) Courses

Note: the Departments of Systems and Computer Engineering and Electronics offer courses in: Biomedical and Electrical Engineering, Communications Engineering, Computer Systems Engineering, Electrical Engineering, Software Engineering and Engineering Physics.

SYSC 1005 [0.5 credit] Introduction to Software Development

Software development as an engineering discipline, using a modern programming language, Language syntax. Algorithm design. Tracing and visualizing program execution. Testing and debugging. Program style, documentation, reliability. Lab projects are drawn from a variety of application domains: digital image manipulation, computer games, robotics.

Includes: Experiential Learning Activity
Precludes additional credit for ECOR 1031, ECOR 1041,
ECOR 1042, ECOR 1051, ECOR 1606, SYSC 1100 (no longer offered), COMP 1005 and COMP 1405.
Lectures three hours a week, laboratory three hours a week.

SYSC 1006 [0.5 credit] Foundations of Imperative Programming

The imperative programming paradigm: assignment and state, types and variables, static and dynamic typing. Memory management and object lifetimes: static allocation, automatic allocation in activation frames, dynamic allocation. Function argument passing. Recursion. Data structures: dynamic arrays, linked lists, hash tables. Encapsulation and information hiding. Includes: Experiential Learning Activity Also listed as SYSC 2006.

Precludes additional credit for COMP 2401, SYSC 4006.

Prerequisite(s): ECOR 1031 or (ECOR1041 and ECOR 1042), all with a minimum grade of C-. Lectures three hours a week, laboratory two hours a week.

SYSC 2001 [0.5 credit]

Computer Systems Foundations

Computer architecture and organization: CPU, cache, memory, input/output, bus structures, interrupts; computer arithmetic: integer and floating point; CPU: instruction sets, addressing modes, instruction encoding. Input/output: programmed, interrupt-driven, block-oriented. Examples from several modern processor families.

Includes: Experiential Learning Activity

Precludes additional credit for SYSC 2320, SYSC 3006. Prerequisite(s): ECOR 1606 or SYSC 1005. Additional

recommended background: SYSC 2006.

Lectures three hours a week, laboratory two hours a week.

SYSC 2003 [0.5 credit] Introductory Real-Time Systems

Principles of event-driven systems. Review of computer organization. Assemblers and linkers. Development of embedded applications. Programming external interfaces, programmable timer. Input/output methods: polling, interrupts. Real-time issues: concurrency, mutual exclusion, buffering. Introduction to concurrent processes. Includes: Experiential Learning Activity Precludes additional credit for SYSC 3006 and SYSC 3310.

Prerequisite(s): SYSC 2001 and SYSC 2006. Lectures three hours a week, laboratory two hours a week

SYSC 2004 [0.5 credit] Object-Oriented Software Development

Designing and implementing small-scale programs as communities of collaborating objects, using a dynamically-typed or statically-typed programming language. Fundamental concepts: classes, objects, encapsulation, information hiding, inheritance, polymorphism. Iterative, incremental development and test-driven development. Includes: Experiential Learning Activity Precludes additional credit for COMP 1006 and COMP 1406.

Prerequisite(s): SYSC 1006 or SYSC 2006 or permission of the department, and second-year status in Engineering. Lectures three hours a week, laboratory two hours a week.

SYSC 2006 [0.5 credit]

Foundations of Imperative Programming

The imperative programming paradigm: assignment and state, types and variables, static and dynamic typing. Memory management and object lifetimes: static allocation, automatic allocation in activation frames, dynamic allocation. Function argument passing. Recursion. Data structures: dynamic arrays, linked lists, hash tables. Encapsulation and information hiding. Includes: Experiential Learning Activity Also listed as SYSC 1006.

Precludes additional credit for COMP 2401, SYSC 4006. Prerequisite(s): Second-year status in Engineering. Lectures three hours a week, laboratory two hours a week

SYSC 2010 [0.5 credit] Programming Project

Programming, testing, and debugging of small teambased software projects that use data from sensors to display results graphically. Modern programming tools: frameworks, libraries, version control, package management, tool chains. Sensors, signal acquisition, display, and basic filtering. Introductory network programming.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3010, SYSC 3110.
Prerequisite(s): 2nd year status in Biomedical and
Electrical Engineering or Communications Engineering.
Lectures three hours a week, laboratory three hours a week.

SYSC 2100 [0.5 credit]

Algorithms and Data Structures

Thorough coverage of fundamental abstract collections: stacks, queues, lists, priority queues, dictionaries, sets, graphs. Data structures: review of arrays and linked lists; trees, heaps, hash tables. Specification, design, implementation of collections, complexity analysis of operations. Sorting algorithms.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 2402.
Prerequisite(s): (SYSC 1006 or SYSC 2006) with
a minimum grade of C-, and second-year status in
Engineering.

Lectures three hours a week, laboratory two hours a week, problem analysis one hour alternate weeks.

SYSC 2310 [0.5 credit] Introduction to Digital Systems

Number systems: binary, decimal, hexadecimal. Digital representation of information. Computer arithmetic: integer, floating point, fixed point. Boolean logic, realization as basic digital circuits. Applications: simple memory circuits, synchronous sequential circuits for computer systems. Finite state machines, state graphs, counters, adders. Asynchronous sequential circuits. Races. Includes: Experiential Learning Activity
Precludes additional credit for ELEC 2607.
Prerequisite(s): Enrolment in Computer Systems
Engineering, Communications Engineering, or Software engineering, and second-year status in Engineering. Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 2320 [0.5 credit] Introduction to Computer Organization and Architecture

Computer organization: processor, memory, input/output, system bus. Microarchitecture. Instruction set architecture. Assembly language programming: addressing modes, instruction encoding, execution. Assembler. Simple digital I/O, programmable timer. Input/output methods: polling, hardware interrupts.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 2001 and
SYSC 3006.

Prerequisite(s): SYSC 2310 or ELEC 2607, and secondyear status in Engineering.

Lectures three hours a week, laboratory three hours a week.

SYSC 2510 [0.5 credit]

Probability, Statistics and Random Processes for Engineers

Discrete and continuous random variables. Joint and conditional probabilities, independence, sums of random variables. Expectation, moments, laws of large numbers. Introduction to statistics. Stochastic processes, stationarity, additive white Gaussian noise, Poisson processes. Markov processes, transition probabilities and rates, birth death processes, introduction to queueing theory.

Includes: Experiential Learning Activity
Prerequisite(s): MATH 1004 and MATH 1104, and
second-year status in Engineering.
Lectures three hours a week, laboratory three hours
alternate weeks.

SYSC 3006 [0.5 credit] Computer Organization

Computer organization: processor, memory, input/ output, system bus. Number systems: binary, decimal, hexadecimal. Assembly language programming: representation of data, instruction encoding, execution. Devices: keyboard, programmable timer, parallel interface. Input/output methods: polling, hardware/software interrupts.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 2320.
Prerequisite(s): (SYSC 1006 or SYSC 2006) and
(SYSC 2310 or ELEC 2607).

Lectures three hours a week, laboratory three hours a week.

SYSC 3010 [0.5 credit]

Computer Systems Development Project

Development of expertise in designing, implementing and testing industrial-quality embedded systems through team projects. Applying modern programming languages, system design practices, current development processes (refactoring, iterative and incremental development) as well as current team-management tools (communication, version control) to medium-scale projects. Includes: Experiential Learning Activity
Precludes additional credit for COMP 2404, SYSC 2010, SYSC 2101 (no longer offered), and SYSC 3110.
Prerequisite(s): SYSC 2100 and either SYSC 2003 or SYSC 3310 (may be taken concurrently), and enrolment in Computer Systems Engineering.
Lectures two hours a week, laboratory three hours a week

SYSC 3020 [0.5 credit]

Introduction to Software Engineering

Introduction to software engineering principles, software development life-cycles. Modelling in software engineering. Current techniques, notations, methods, processes and tools used in software engineering. UML modelling. Introduction to software quality, software verification and validation, software testing. Includes: Experiential Learning Activity

Precludes additional credit for SYSC 3120, SYSC 4120

and COMP 3004.
Prerequisite(s): SYSC 2004.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3101 [0.5 credit] Programming Languages

Principles underlying different kinds of programming languages (procedural, functional, logic programming) and their semantics. Overview of machinery needed for language support (compilers, interpreters and run-time systems).

Includes: Experiential Learning Activity
Precludes additional credit for COMP 3007.

Prerequisite(s): SYSC 2004.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3110 [0.5 credit] Software Development Project

Development of expertise in designing, implementing and testing maintainable, reusable software through team projects. Applying modern programming languages, design patterns, frameworks, UML and modern development processes (detection of olfactible source code defects, refactoring, iterative and incremental development, version control techniques) to medium-scale projects.

Includes: Experiential Learning Activity

Precludes additional credit for COMP 2404, SYSC 2010,

SYSC 2101 and SYSC 3010.

Prerequisite(s): SYSC 2004 and SYSC 2100, and enrolment in Software Engineering.

Lectures two hours a week, laboratory three hours a week.

SYSC 3120 [0.5 credit] Software Requirements Engineering

Current techniques, notations, methods, processes and tools used in Requirements Engineering. Requirements elicitation, negotiation, modeling requirements, management, validation. Skills needed for Requirements Engineering and the many disciplines on which it draws. Requirements analysis: domain modeling, modeling object interactions; UML modeling. Introduction to software development processes.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3020 and
COMP 3004.

Prerequisite(s): SYSC 2004 and enrolment in Software Engineering.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3200 [0.5 credit] Industrial Engineering

Techniques of operations research for decision-making in complex engineering systems. Linear programming, network models, PERT, integer programming, dynamic programming, queuing systems and inventory models. Problem solving is emphasized.

Includes: Experiential Learning Activity

Precludes additional credit for BUSI 2300, ECON 4004, or MATH 3801.

Prerequisite(s): MATH 1004 and MATH 1104, and second-year status in Engineering.

Lectures three hours a week, laboratory/problem analysis one and a half hours per week.

SYSC 3203 [0.5 credit] Bioelectrical Systems

Biomedical transducers, sensors, and biomedical actuators. Amplifier designs: inverting, noninverting, differential, and bioinstrumentation. Differentiators, integrators, and rectifiers. Oscillators and timers. Filter design. Sampling and quantization. Electrical machines. Electrical safety.

Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 and (ELEC 2507 or
ELEC 3605), and enrolment in Biomedical and Electrical
Engineering or Biomedical and Mechanical Engineering,
and second-year status in Engineering.
Lectures three hours a week, laboratory three hours a
week.

SYSC 3303 [0.5 credit]

Real-Time Concurrent Systems

Principles and practice of a systems engineering approach to the development of software for real-time, concurrent, distributed systems. Designing to achieve concurrency, performance, and robustness, using visual notations. Converting designs into programs. Introduction to hard real-time systems. Team project.

Includes: Experiential Learning Activity Precludes additional credit for SYSC 3313.

Prerequisite(s): For students in the Faculty of Engineering and Design: SYSC 2004 and SYSC 4001. For students in Computer Science: COMP 2401, COMP 2402, and COMP 3000.

Lectures three hours a week, laboratory two hours a week.

SYSC 3310 [0.5 credit]

Introduction to Real-Time Systems

Principles of event-driven systems. Microcontroller organization. Development of embedded applications. Programming external interfaces, programmable timer. Input/output methods: polling, interrupts. Real-time issues: concurrency, mutual exclusion, buffering. Introduction to concurrent processes.

Includes: Experiential Learning Activity
Prerequisite(s): (SYSC 1006 or SYSC 2006) with a
minimum grade of C- and (SYSC 2320 or SYSC 3006).
Lectures three hours a week, laboratory two hours a
week.

SYSC 3313 [0.5 credit] Real-Time Embedded Systems

Principles and practice of a systems engineering approach to the development of software for real-time, concurrent, distributed systems. Designing to achieve concurrency, performance, and robustness, using modern software engineering principles. Converting designs into programs targeting embedded systems. Team project. Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3303.
Prerequisite(s): SYSC 3310 and SYSC 4001 and third-year status in Computer Systems Engineering, or permission of the Department.
Lectures three hours a week, laboratory two hours a

SYSC 3320 [0.5 credit] Computer Systems Design

week.

System on Chip based computer system design, including internal organization, direct memory access, floating-point units, HDL and FPGAs. Interfacing and high-level systems design. Input/output interfaces, including serial communication protocols.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3601 and
ELEC 4601.

Prerequisite(s): SYSC 3310 and third year status in Computer Systems Engineering, or permission of the Department.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3500 [0.5 credit] Signals and Systems

Signals: energy and power signals, discrete-time and continuous. Linear systems and convolution. Fourier Transform; complex Fourier series; signal spectral properties and bandwidth. Laplace transform and transient analysis. Transfer functions, block diagrams. Baseband and passband signals, with applications to communications systems.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3600 and
SYSC 3610.

Prerequisite(s): MATH 1005 and enrolment in Communications Engineering, and second-year status in Engineering.

Lectures three hours a week, problem analysis three hours alternate weeks.

SYSC 3501 [0.5 credit] Communication Theory

Review of signals, linear systems and Fourier theory; signal bandwidth and spectra; digital waveform coding; introduction to analog and digital modulation systems; synchronization; characterization and effects of noise; link budgets; communications media and circuits; applications to current communications systems.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3503.

Prerequisite(s): SYSC 3600 or SYSC 3610.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3503 [0.5 credit] Communication Theory II

Amplitude Modulation. Frequency Modulation.
Performance of AM and FM in noise. Communication channels, channel models, noise sources, noise models. Digital modulation: ASK, FSK, PSK. Optimal reception, probability of error on the AWGN channel. Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3501 or SYSC 4600.

Prerequisite(s): SYSC 3500 and (STAT 2605 or SYSC 2510).

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3512 [0.5 credit] Computer Communications

Layered network architectures, TCP/IP suite, circuit switching, packet switching. Physical media, data transmission, multiplexing. Data link controls, MAC protocols, random access, polling, IEEE 802 standards. Bridges, switched Ethernet, VLANs. Routing algorithms, Internet routing protocols, datagram networks, virtual circuit networks. Transport protocols.

Includes: Experiential Learning Activity Also listed as SYSC 4602.

Precludes additional credit for COMP 3203.

Prerequisite(s): ECOR 2050 or SYSC 2510 or STAT 2605 or STAT 3502 (may be taken concurrently), and third-year status in Biomedical and Electrical, Electrical, Communications, Computer Systems, Software, or Sustainable and Renewable Energy Engineering.

Lectures three hours a week, laboratory three hours alternate weeks

SYSC 3522 [0.5 credit]

Communications Software Laboratory

Project-oriented experience in the design of communication systems to meet user and system requirements. Lectures on various network architectures and layered protocols and programming; teletraffic analysis and traffic engineering; system specification and design: requirements analysis, solution alternatives, evaluation of alternative technologies, design, costing, implementation, testing.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4502, SYSC 4701.
Prerequisite(s): (SYSC 1006 or SYSC 2006) with a
minimum grade of C-, and (SYSC 3512 or SYSC 4602).
Lectures three hours a week, laboratory four hours
alternate weeks.

SYSC 3600 [0.5 credit] Systems and Simulation

Properties of linear systems. Linear dynamic models of engineering systems. Applications of the Laplace transform. Transfer functions. Block diagrams. Frequency and time response. System simulation with digital computers.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3500 or SYSC 3610.

Prerequisite(s): MATH 1005 and second-year status in Engineering.

Lectures three hours a week, laboratory three hours a week

SYSC 3601 [0.5 credit] Microprocessor Systems

Microprocessor-based system design for different microprocessor families. Microprocessors: internal organization, instruction sets, address generation, pinouts, bus cycles, signalling waveforms. Interfacing memory and I/O devices. Interrupt structures, direct memory access. Floating point coprocessors. System bus standards. Introduction to DSPs.

Includes: Experiential Learning Activity

Precludes additional credit for SYSC 3320 or ELEC 4601.

Prerequisite(s): ELEC 2607, and SYSC 2003 or permission of the department. Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 3610 [0.5 credit]

Biomedical Systems, Modeling, and Control

Properties of linear systems. Linear dynamic models of biomedical systems. Biomedical application of the Laplace transforms. Transfer functions. Block diagram. Frequency and time response. Feedback, control, and stability. Biomedical systems modeling and control. Includes: Experiential Learning Activity Precludes additional credit for SYSC 3500 or SYSC 3600.

Prerequisite(s): MATH 1005 and enrolment in Biomedical and Electrical Engineering or Biomedical and Mechanical Engineering, and second-year status in Engineering. Lectures three hours a week, laboratory three hours a week.

SYSC 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

SYSC 4001 [0.5 credit] Operating Systems

Introduction to operating system principles. Processes and threads. CPU scheduling. Managing concurrency: mutual exclusion and synchronization, deadlock and starvation. Managing memory and input/output. Concurrent programming, including interprocess communication in distributed systems.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 3000.

Prerequisite(s): (SYSC 1006 and SYSC 2006) with a minimum grade of C-.

Lectures three hours a week, laboratory three hours a week.

SYSC 4005 [0.5 credit]

Discrete Simulation/Modeling

Simulation as a problem solving tool. Random variable generation, general discrete simulation procedure: event table and statistical gathering. Analyses of simulation data: point and interval estimation. Confidence intervals. Overview of modeling, simulation, and problem solving using SIMSCRIPT, MODSIM, and other languages. Includes: Experiential Learning Activity Prerequisite(s): (ECOR 2050 or SYSC 2510 or STAT 2605 or STAT 3502) and fourth-year status in Engineering, or permission of the Department. Also offered at the graduate level, with different requirements, as SYSC 5001, for which additional credit is precluded.

Lectures three hours a week, laboratory one hour a week.

SYSC 4006 [0.5 credit] Introduction to Systems Programming

Introduction to C programming: Data types, flow control, functions, arrays, pointers, and arithmetic, logical and bitwise operators. Memory models, collections. Low-level I/O. Build pipeline (version control, make, preprocessing, compiling, linking) in Linux. Testing and debugging. Precludes additional credit for SYSC 1006, SYSC 2006. Prerequisite(s): Third-year status in Engineering, or enrollment in the M.Eng. Program in Electrical & Computer Engineering.

Lectures three hours a week.

SYSC 4101 [0.5 credit] Software Validation

Techniques for the systematic testing of software systems. Software validation and verification, software debugging, quality assurance, measurement and prediction of software reliability. Emphasis on the treatment of these topics in the context of real-time and distributed systems.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 4004.
Prerequisite(s): SYSC 3120 or SYSC 3020.
Lectures three hours a week, laboratory/problem analysis three hours a week.

SYSC 4102 [0.5 credit] Performance Engineering

Techniques based on measurements and models, for predicting and evaluating the performance of computer systems. Instrumentation. Simple queueing models and approximations. Techniques for modifying software designs to improve performance.

Includes: Experiential Learning Activity
Prerequisite(s): (ECOR 2050 or STAT 3502) and
SYSC 4001.

Also offered at the graduate level, with different requirements, as SYSC 5101, for which additional credit is precluded.

Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

SYSC 4106 [0.5 credit]

The Software Economy and Project Management

Introduction to software project management and economics; Return on software investments; Software life cycle; Work breakdown structure, scheduling and planning; Risk analysis and management; Product size and cost estimation; Earn value management; Statistical process control; Managing project team and process improvement; Bidding and contract types.

Prerequisite(s): SYSC 3120 (may be taken concurrently) and third-year status in Software Engineering or COMP 3004 and enrolment in the Bachelor of Computer Science.

Lectures three hours a week.

SYSC 4111 [0.5 credit]

Formal Methods in Software Engineering

Introduction to formal methods in software engineering with coverage of propositional and first-order logic (syntax, semantics, proof theory), formal specification languages, bounded analysis and validation, formal specification tools, and model checking with finite-state machines, temporal logic, and model checking tools.

Prerequisite(s): COMP 1805, SYSC 3120, and SYSC 4001.

Lectures three hours a week.

SYSC 4120 [0.5 credit]

Software Architecture and Design

Introduction and importance of software architectures and software system design in software engineering. Current techniques, modeling notations, methods, processes and tools used in software architecture and system design. Software architectures, architectural patterns, design patterns, software qualities, software reuse.

Includes: Experiential Learning Activity

Precludes additional credit for COMP 3004, SYSC 3020 and SYSC 4800 (no longer offered).

Prerequisite(s): SYSC 3120.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4130 [0.5 credit]

Human Computer Interaction

User-centric design, evaluation, and implementation of interactive computing systems. Topics include: designing, prototyping, implementing, and evaluating user-facing systems and interfaces; data gathering, analysis, and interpretation; persuasive design; dark patterns; accessibility; design for security and privacy. Precludes additional credit for COMP 3008. Prerequisite(s): SYSC 3020 or SYSC 3120. Lectures three hours a week, problem analysis three hours alternate weeks.

SYSC 4201 [0.5 credit]

Ethics, Research Methods and Standards for Biomedical Engineering

Ethical theories, ethical decision-making, biomedical research ethics: informed consent, confidentiality, privacy, research ethics boards; research methods: hypothesis formulation, data collection, sampling bias, experimental design, statistical literacy; regulations for design, manufacture, certification of medical devices; impact of technology and research (social, political, financial).

Includes: Experiential Learning Activity
Prerequisite(s): ECOR 2050 and third-year status in
Biomedical and Electrical Engineering or Biomedical and
Mechanical Engineering.

Lectures three hours a week, problem analysis one and a half hours per week.

SYSC 4202 [0.5 credit] Clinical Engineering

Overview of the Canadian health care system; brief examples of other countries; clinical engineering and the management of technologies in industrialized and in developing countries; safety, reliability, quality assurance; introduction to biomedical sensor technologies; applications of telemedicine; impact of technology on health care.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Biomedical and
Electrical or Biomedical and Mechanical Engineering.
Also offered at the graduate level, with different
requirements, as BIOM 5406, for which additional credit is
precluded.

Lectures three hours a week, problem analysis three hours alternate weeks.

SYSC 4203 [0.5 credit] Bioinstrumentation and Signals

Bioinstrumentation and biological signals; instrumentation systems, electrical safety, and biocompatibility; bioelectric signals; biopotential electrodes: material properties, selection; data acquisition; signal processing; biomedical imaging technologies; bioamplifier systems performance and characteristics; major physiological systems and associated measurements.

Includes: Experiential Learning Activity
Prerequisite(s): SYSC 3610 and (ELEC 3605 or
SYSC 3203) and fourth-year status in Biomedical and
Electrical Engineering or fourth-year status in Biomedical
and Mechanical Engineering.

Lectures three hours a week, laboratory/problem analysis three hours a week.

SYSC 4205 [0.5 credit]

Image Processing for Medical Applications

Two-dimensional signals, filters, and Fourier transforms. Image acquisition, sampling, quantization and representation. Image perception. Digital and film cameras. Medical imaging technologies. Image processing operations: histogram, convolution, morphological, segmentation, registration. Image compression and formats.

Includes: Experiential Learning Activity
Prerequisite(s): MATH 1005 and fourth-year status in
Engineering.

Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

SYSC 4206 [0.5 credit] Surgical Robotics

Surgical robotic system architecture, forward and inverse kinematics of articulated robot arms, force and position control, unilateral and bilateral teleoperation of surgical robots, haptics and force feedback, instrumentation, image-guided surgery, design and implementation of robotic systems for minimally invasive surgery. Includes: Experiential Learning Activity

Prerequisite(s): SYSC 3600 or SYSC 3610, and fourthyear status in Engineering.

Lectures three hours a week, laboratory three hours a week.

SYSC 4310 [0.5 credit]

Computer Systems Architecture

Evolution of computer systems architecture to improve performance, including memory hierarchy, hardware accelerators, and thread level parallelism. Advanced computer architecture topics such as instruction level parallelism, superscalar, out-of-order execution, speculative execution, multicore, many-core, heterogeneous systems, and virtualization.

Includes: Experiential Learning Activity Precludes additional credit for SYSC 4507.

Prerequisite(s): SYSC 3320, and enrolment in Computer Systems Engineering.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4320 [0.5 credit]

Case Studies in Computer Systems

Examples of several modern computer systems are presented in a computer systems context: system objectives, software and hardware components, interactions. The case studies present computer systems trends emerging in practice.

Prerequisite(s): SYSC 4310, and enrolment in Computer Systems Engineering.

Lectures three hours a week, problem analysis one hour a week.

SYSC 4405 [0.5 credit] Digital Signal Processing

Discrete time signal and system representation: time domain, z-transform, frequency domain. Sampling theorem. Digital filters: design, response, implementation, computer-aided design. Spectral analysis: the discrete Fourier transform and the FFT. Applications of digital signal processing.

Includes: Experiential Learning Activity Prerequisite(s): SYSC 3500 or SYSC 3600 or SYSC 3610.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4415 [0.5 credit] Introduction to Machine Learning

Introduction to supervised and unsupervised machine learning (ML), including deeper knowledge of several algorithms of each type. Evaluation and quantification of predictive performance of ML systems. Use of one or more ML development environments.

Precludes additional credit for COMP 3105, COMP 4105 (no longer offered).

Prerequisite(s): (ECOR 2050 or STAT 3502 or STAT 2605 or SYSC 2510), (SYSC 1006 or SYSC 2006) with a minimum grade of C-, and third-year status in Engineering.

Lectures three hours a week, problem analysis one hour a week.

SYSC 4416 [0.5 credit]

Artificial Intelligence in Engineering

Fundamental ideas and techniques underlying the design of intelligent computer systems. Topics include intelligent agents, problem solving by searching, uncertain knowledge and reasoning, introduction to machine learning, and selected AI applications. A special focus is given to engineering use cases and applications of AI. Precludes additional credit for COMP 3106. Prerequisite(s): (ECOR 2050 or STAT 3502 or STAT 2605 or SYSC 2510), (SYSC 1006 or SYSC 2006), and third-

year status in Engineering. Lectures three hours a week, laboratory/problem analysis one hour per week.

SYSC 4502 [0.5 credit] Communications Software

Communications software architectures, protocols and operating systems. Application layer protocols, APIs and socket programming. P2P algorithms, network virtualization, SDN. Reliable data transfer algorithms, FSM, MSC. Network security. Multimedia applications, RTSP, CDN, DASH, RTP, RTCP. Packet scheduling algorithms, DiffServ, IntServ, RSVP. Traffic classification, cross-layer optimization.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3522.
Prerequisite(s): (SYSC 1006 or SYSC 2006) with a
minimum grade of C-, and SYSC 4602.
Lectures three hours a week, problem analysis three
hours alternate weeks.

SYSC 4504 [0.5 credit] Fundamentals of Web Development

WWW architecture, web servers and browsers, core protocols. Web pages, their structure, interpretation and internal representation. Client-side and server-side programming. Data representation. Interfacing with databases and other server-side services. Cookies, state management, and privacy issues. Security. Web services. Includes: Experiential Learning Activity Precludes additional credit for COMP 2406. Prerequisite(s): SYSC 2004. Additional recommended background: SYSC 4602 or SYSC 3303. Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4505 [0.5 credit] Automatic Control Systems I

Review of Laplace transform techniques. Effects of feedback: frequency response, pole-zero positions. Compensation: root locus, Bode plots. State variables: formulation, solution of linear systems, examples of simple second-order non-linear systems. Discrete time systems: z-transforms. Signal reconstruction.

Includes: Experiential Learning Activity

Precludes additional credit for MAAE 3500, MAAE 4500 (no longer offered).

Prerequisite(s): MATH 2004 and (SYSC 3500 or SYSC 3600 or SYSC 3610).

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4507 [0.5 credit] Computer Systems Architecture

Evolution of computer systems architecture, influences of changing technology, techniques to improve performance, memory hierarchy, hardware accelerators. Instruction level parallelism, pipelining, vector processing, superscalar, out of order execution, speculative execution. Thread level parallelism, multi-core, many-core, heterogeneous systems. Evolution of architectures for specific application domains.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4310.
Prerequisite(s): ELEC 2607 and (SYSC 2001 or SYSC 3006).

Lectures three hours a week, laboratory/problem analysis one hour a week.

SYSC 4511 [0.5 credit] Digital Wireless Communication

Band-limited communication systems, orthogonal frequency division multiplexing; multiple-access techniques (TDMA, FDMA, CSMA, OFDMA); wireless channel models (pathloss, fading, multipath); MIMO systems and diversity; introduction to information theory (entropy, differential entropy, AMI, capacity); source coding; block codes and error detection; convolutional codes and error correction.

Includes: Experiential Learning Activity

Precludes additional credit for SYSC 4600, SYSC 4604, SYSC 4607.

Prerequisite(s): SYSC 3501 and ECOR 2050. Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4600 [0.5 credit] Digital Communications

Probability theory, signal representation. Baseband data transmission: Nyquist criterion, optimal receiver, error probability. Digital modulation, performance. Synchronization. Introduction to information theory. Error detection and correction. OFDM. Applications to current digital wired and wireless communications systems. Includes: Experiential Learning Activity

Precludes additional credit for SYSC 3503, SYSC 4511.

Precludes additional credit for SYSC 3503, SYSC 4511, SYSC 4604.

Prerequisite(s): SYSC 3501 and ECOR 2050. Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4602 [0.5 credit] Computer Communications

Layered network architectures, TCP/IP suite, circuit switching, packet switching. Physical media, data transmission, multiplexing. Data link controls, MAC protocols, random access, polling, IEEE 802 standards. Bridges, switched Ethernet, VLANs. Routing algorithms, Internet routing protocols, datagram networks, virtual circuit networks. Transport protocols.

Includes: Experiential Learning Activity Also listed as SYSC 3512.

Precludes additional credit for COMP 3203.

Prerequisite(s): ECOR 2050 or SYSC 2510 or STAT 2605 or STAT 3502 (may be taken concurrently), and third-year status in Biomedical and Electrical, Electrical, Communications, Computer Systems, Software, or Sustainable and Renewable Energy Engineering.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4604 [0.5 credit] Digital Communication Theory

Introduction to information theory, source coding and data compression, Error control coding, Trellis coded modulation, advanced topics of current interest: spread spectrum; digital wireless communications.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 4511, SYSC 4600.

Prerequisite(s): SYSC 3503.

Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4607 [0.5 credit] Wireless Communications

Wireless radio channel characterization, diversity, equalization; cellular architecture, multiple access principles, spread spectrum systems, radio resource management; examples from modern wireless systems, networks, and standards, including cellular networks, WLANs, ad hoc networks, and satellite systems. Includes: Experiential Learning Activity Precludes additional credit for SYSC 4511. Prerequisite(s): SYSC 3501 or SYSC 3503. Lectures three hours a week, laboratory three hours alternate weeks.

SYSC 4700 [0.5 credit]

Topics in Communications Networks

Contemporary and emerging topics in communications networks and technologies. Communications as a national and international infrastructure. Systems view of network architecture and management: transmission, access, interference, routing, softwarization, virtualization, security. Regulations and standards. Examples include cellular 5G/6G, Wi-Fi, terrestrial, optical, aerial, and satellite networks.

Includes: Experiential Learning Activity

Prerequisite(s): SYSC 3501 or SYSC 3503, and fourth-vear status in Engineering.

Lectures three hours a week, laboratory/problem analysis three hours alternate weeks.

SYSC 4701 [0.5 credit]

Communications Systems Lab

Project-oriented level experience in the design of communication systems to meet user requirements. Lectures on teletraffic analysis; system specification and design: requirements analysis, solution alternatives, evaluation of alternative technologies, design, costing, implementation, test.

Includes: Experiential Learning Activity
Precludes additional credit for SYSC 3522.
Prerequisite(s): SYSC 4602 and Fourth-year status in Communications Engineering or permission of the department.

Lectures two hours a week, laboratory four hours a week.

SYSC 4709 [0.5 credit] Industrial Automation

Introduction to automation and digitalization, Ladder logic, PLC, Sensors and actuators (Monitor/measurement), Ladder Diagrams, Pneumatics, Fluid Power, Pumps and Actuators, Open and closed systems, accumulators, regeneration, counterbalancing, pilot-operated systems, Coolers and heat exchangers, reservoirs, and sequencing, Hydraulic diagrams, design, control, and implementation of full systems.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year status in Engineering.
Lectures three hours a week, laboratory three hours
alternate weeks.

SYSC 4805 [0.5 credit] Computer Systems Design Lab

Project-oriented experience in the design of embedded computer systems. Lectures will discuss practical aspects related to the design and development of embedded systems, starting from sensor data acquisition and processing to decision systems, testing and embedded-system based project management, with practical application examples.

Includes: Experiential Learning Activity

Prerequisite(s): SYSC 3310 and enrolment in Computer

Systems Engineering.

Lectures two hours a week, laboratory four hours a week.

SYSC 4806 [0.5 credit] Software Engineering Lab

Applying the full spectrum of engineering and programming knowledge acquired in the program through team projects in the laboratory. Practice in doing presentations and reviews. Lectures will discuss software engineering issues as they relate to the projects, from a mature point of view.

Includes: Experiential Learning Activity

Prerequisite(s): COMP 3005, SYSC 3110, and enrolment in Software Engineering, or permission of the department. Lectures two hours a week, laboratory four hours a week.

SYSC 4810 [0.5 credit]

Introduction to Network and Software Security

Fundamental concepts, terminologies, and theories of computer security; principles underlying common security controls; various types of threats and attacks on networks and software systems, how they work, and controls for dealing with them; security risk assessment and management; legal and ethical aspects of computer security.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 4108, CSEC 3108.
Prerequisite(s): fourth-year status in Communications,
Computer Systems or Software Engineering.
Lectures three hours a week, problem analysis one and a
half hours a week.

SYSC 4906 [0.5 credit] Special Topics

At the discretion of the Department, a course dealing with selected advanced topics of interest to students in Biomedical and Electrical, Communications, Computer Systems, Electrical, Software Engineering, and Engineering Physics may be offered.

Prerequisite(s): permission of the Department.

SYSC 4907 [1.0 credit] Engineering Project

Student teams develop professional-level experience by applying previously acquired knowledge to a major design project. Lectures discuss project-related issues and student presentations. A project proposal, interim report, oral presentations, and a comprehensive final report are required.

Includes: Experiential Learning Activity
Prerequisite(s): Fourth-year status in Engineering. Certain
projects may have additional prerequisites.

SYSC 4918 [0.5 credit] Undergraduate Directed Study

Study, analysis, and solution of an engineering problem. Results presented in the form of a written report. Carried out under the close supervision of a faculty member. Intended for students interested in pursuing independent studies. Requires supervising faculty member and proposal from student.

Includes: Experiential Learning Activity
Prerequisite(s): Permission of the department and
completion of, or concurrent registration in, one of
SYSC 4907, ELEC 4907, or ECOR 4907.
Directed study.

English

This section presents the requirements for programs in:

- English B.A. Honours
- English with Concentration in Creative Writing B.A. Honours
- English with Concentration in Drama Studies B.A. Honours
- English B.A. Combined Honours
- · English B.A.
- Specialization in Global Literatures B. G. In. S. Honours
- Stream in Global Literatures B.G.In.S.
- Minor in Drama Studies
- Minor in English Language and Literature

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities,

English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention: français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position:
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours English: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.A. Honours English program;
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 9.00 and a Major CGPA of at least 9.00. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours English students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only. and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

English (ENGL) Courses

ENGL 1002 [0.5 credit] Writing and Language I

The first half of an introduction to the principles, styles, and structures of effective writing, including essay writing. Course offered only in Nunavut as part of Certificate in Nunavut Public Service Studies Program.

A course dealing with techniques of characterization, principles of ensemble performance, scene analysis for actors and directors, styles of performance.

Includes: Experiential Learning Activity

Precludes additional credit for ENGL 2001 (no longer

offered).

Prerequisite(s): ENGL 2104 or permission of the

Department.

Workshop three hours a week.

ENGL 3905 [0.5 credit] Topics in Performance

A study of selected elements of performance. Topics will vary but may include such areas as the theory and practice of comic timing on stage or movement on stage space.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing or permission of the department.

Lecture and workshop three hours a week.

ENGL 3906 [0.5 credit] Writing Popular Fiction

An intermediate workshop in creative writing that focuses on the development of writing skills specific to the crafting of narratives in such genres as Speculative Fiction, Young Adult Fiction, and Historical Fiction.

Includes: Experiential Learning Activity

Prerequisite(s): a grade of B+ or higher in one of: ENGL 2901, ENGL 2903, ENGL 2915; or departmental permission

Workshop three hours a week.

ENGL 3908 [0.5 credit]

Research and Theory in Academic Writing

Study of contemporary research and theory (1970s to present) on academic writing in elementary, secondary and post-secondary school, with emphasis on writing in university. Consideration of what academic writing entails, how writing fosters learning, and how instruction can help students develop their writing abilities.

Includes: Experiential Learning Activity

Also listed as ALDS 3401.

Prerequisite(s): third-year standing or permission of the instructor.

Lectures three hours a week.

ENGL 3909 [0.5 credit]

Research and Theory in Workplace Writing

Study of contemporary research and theory (1980s to present) in writing in workplace settings. Consideration of how writing is used in accomplishing work, how novices learn to write effectively, and what the implications are for pedagogy.

Includes: Experiential Learning Activity

Also listed as ALDS 3402.

Prerequisite(s): third-year standing or permission of the instructor

ENGL 3910 [0.5 credit]

From English Degree to Career

This experiential-learning course prepares students in English for their transition into the workplace. Project-based activities (including readings and research) and guest speakers will teach students to identify, develop, and apply the skills and knowledge gained from a degree in English studies.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in an English Major

program or permission of the department. Lectures and workshops three hours a week.

ENGL 3911 [0.5 credit]

Cultural Studies

This course explores cultural expression across diverse media, theorizing culture as a form of struggle that shapes material conditions, fuels knowledge production, and informs lived experience.

Prerequisite(s): third-year standing or permission of the department.

Lectures three hours a week.

ENGL 3915 [0.5 credit]

Special Topics in WritingAn intermediate workshop that

An intermediate workshop that involves regular creative writing assignments and practical criticism based on this work. Topics will vary. Yearly special topics can be found at carleton.ca/english/.

Includes: Experiential Learning Activity
Prerequisite(s): a grade of B+ or higher in one of:
ENGL 2901, ENGL 2903, ENGL 2915; or departmental permission.

Workshop three hours a week.

ENGL 3916 [0.5 credit] Spoken Word Poetry Workshop

This intermediate-level workshop-based course explores traditions of spoken word poetry while requiring students to create and perform their own spoken word poems.

Includes: Experiential Learning Activity

Also listed as AFRI 3916.

Prerequisite(s): a grade of B+ or higher in one of: ENGL 2901, ENGL 2903, ENGL 2915; or departmental permission.

Workshops three hours a week.

ENGL 3920 [0.5 credit]

Literary Ecological Fieldwork

This interdisciplinary, experiential fieldwork course brings together literature, culture, and ecology studies. At least 50% of class periods will be devoted to short field work excursions in the Ottawa region. These excursions will be complemented by classroom discussion time. Field trip fees will apply.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing or permission of the department.

Field work and lectures three hours a week.

ENGL 3930 [0.5 credit]

Topics in Decolonization and Migration II

An intermediate study of literature, culture, and research in the context of topics such as empire and decolonization, diaspora, migration and globalization, race, and ethnicity. Themes, authors, and geographical and temporal focus will vary.

Prerequisite(s): Third-year standing or permission of the department.

Lectures three hours a week.

ENGL 3940 [0.5 credit] Studies in Diaspora Lit.

A study of diaspora literatures and cultures.

Prerequisite(s): third-year standing or permission of the department.

Lectures three hours a week.

ENGL 3960 [0.5 credit]

Studies in Indigenous Literature

A study of Indigenous literatures and cultures.

Prerequisite(s): third-year standing or permission of the department.

Lectures three hours a week.

ENGL 3965 [0.5 credit] Intro to Postcolonial Theory

A survey of major concepts and key figures in postcolonial theory.

Prerequisite(s): third-year standing or permission of the department.

Lectures three hours a week.

ENGL 3972 [0.5 credit]

Studies in Postcolonial Literature

A study of postcolonial literatures and cultures. Topics may vary from year to year.

Prerequisite(s): third-year standing or permission of the department.

ENGL 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

ENGL 4001 [0.5 credit] Studies in Poetry

A study of a selected topic in poetry.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4003 [0.5 credit] Studies in the Novel

A study of a selected topic in the novel.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4004 [0.5 credit]

Writing and Knowledge-Making in the Professions

The role of writing in constructing knowledge in the professions, as viewed from contemporary socio-cultural perspectives. Consideration of how the goals, values, and assumptions of different professions shape their writing in distinctive ways and what implications this holds for theory, research, and practice.

Includes: Experiential Learning Activity

Also listed as ALDS 4404.

Prerequisite(s): third-year standing or permission of the

instructor.

Seminars three hours a week.

ENGL 4005 [0.5 credit] Studies in Literary Theory

Study of a selected topic in literary theory and criticism. Precludes additional credit for ENGL 4000 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4105 [0.5 credit]

Old English

Studies in Old English literature and its cultural and historical contexts. Instruction in grammar to facilitate reading knowledge of the Old English language.

Also listed as LING 4805.

Precludes additional credit for ENGL 3102 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4115 [0.5 credit] Culture and the Text

Topics will vary from year to year.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4125 [0.5 credit]

Digital Culture and the Text I

A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year. Also listed as DIGH 4002.

Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the Department.

Seminar or lecture three hours a week.

ENGL 4135 [0.5 credit] Studies in Publishing

Topics will vary from year to year.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4139 [0.5 credit]

Editing a Literary Magazine

In this experiential learning course students will work collaboratively to design, edit, produce, and publicize issues of a Carleton University literary magazine in digital and/or print formats.

Includes: Experiential Learning Activity

Prerequisite(s): Fourth-year standing or permission of the Department.

Workshop three hours a week.

ENGL 4145 [0.5 credit] Digital Culture and the Text II

A study of new developments in digital media and culture, and how they affect our understanding of literary modes, genres and textuality, including notions of authorship and reading strategies. Topics will vary from year to year. Also listed as DIGH 4003.

Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the Department.

Seminar or lecture three hours a week.

ENGL 4155 [0.5 credit]

Studies in Digital Humanities

A study of current issues and debates in the Digital Humanities.

Also listed as DIGH 4001.

Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the English Department.

Seminar or lecture three hours a week.

ENGL 4208 [0.5 credit]

Studies in Medieval Literature

A study of a selected topic in Medieval literature; requires previous experience reading medieval English.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4301 [0.5 credit]

Studies in Renaissance Literature

A study of a selected topic in Renaissance literature. Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4401 [0.5 credit]

Studies in 18th-Century Literature

A study of a selected topic in Restoration or 18th-century literature.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4404 [0.5 credit]

Digital Humanities Workshop

This workshop will provide students with the opportunity to complete an individual or collaborative capstone project in the Digital Humanities.

Includes: Experiential Learning Activity

Also listed as DIGH 4004.

Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the English Department.

Workshop three hours a week.

ENGL 4405 [0.5 credit]

Digital Humanities Practicum

Practical experience gained by working on projects under the supervision of the staff of a participating public- or private-sector institution or organization, including a final written assignment or equivalent project. A maximum of 1.0 practicum credit may be applied towards degree requirements.

Includes: Experiential Learning Activity

Also listed as DIGH 4005.

Prerequisite(s): ENGL 2401 and fourth-year standing, or permission of the English Department.

Practicum.

ENGL 4500 [0.5 credit] Studies in Romanticism

A study of a selected topic, 1770-1830.

Precludes additional credit for ENGL 4407 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4515 [0.5 credit]

Teaching Writing in School and the Workplace

Introduction to approaches for teaching writing in elementary and secondary school, in university, and in the workplace, with a focus on socio-cultural theories of language and learning. Discussion of applications of these approaches to classroom and workplace teaching.

Includes: Experiential Learning Activity

Also listed as ALDS 4405.

Prerequisite(s): third-year standing, or permission of the instructor.

Seminar three hours a week.

ENGL 4550 [0.5 credit]

Studies in Victorian Literature

A study of a selected topic in 19th-century British literature, 1830-1900.

Precludes additional credit for ENGL 4501 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4600 [0.5 credit]

The Great Russian Novel

A study of masterpieces of the Russian tradition, to be selected from among works by writers such as Tolstoy, Dostoevsky, Gogol, Turgenev, Bely, Bulgakov, and Nabokov. All novels will be read in English translation. Also listed as EURR 4103.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4601 [0.5 credit]

Studies in Contemporary Poetry

A comparative and transnational approach to 20th- and 21st -century poetry.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4605 [0.5 credit]

Theatre Production Seminar

This course offers students advanced engagement with the theory and application of theatrical crafts and includes participation in a writing, acting, or technical capacity on a class production.

Includes: Experiential Learning Activity

Prerequisite(s): ENGL 3904 or permission of the department.

Seminar three hours a week.

ENGL 4607 [0.5 credit]

Studies in 20th- and 21st-century Literature

A study of a selected topic in literature of the 20th and 21st century.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4609 [0.5 credit] Global Stages and Theories

An advanced study of dramatic texts from transnational, postcolonial, or European contexts. This course will offer sustained attention to specific theatre traditions, theatrical practice, and interpretation of texts. Topics and points of emphasis vary from year to year.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4708 [0.5 credit]

Studies in American Literature I

A study of a selected topic in American literature.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4709 [0.5 credit]

Studies in American Literature II

A study of a selected topic in American literature.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4802 [0.5 credit]

Race, Ethnicity and Canadian Lit.

A study of Canadian literature that engages with notions of race and ethnicity.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4806 [0.5 credit]

Studies in Canadian Literature I

A study of a selected topic in Canadian literature.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4807 [0.5 credit]

Studies in Canadian Literature II

A study of a selected topic in Canadian literature.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4908 [1.0 credit] Independent Study

Independent research and writing, under the supervision of English faculty, requiring an essay of approximately 10,000 words. A written proposal outlining the project must be submitted to the undergraduate supervisor by July 31. Includes: Experiential Learning Activity Prerequisite(s): fourth-year Honours standing in English with a CGPA of 10.0 in English courses, and permission of the undergraduate supervisor.

ENGL 4909 [0.5 credit]

Writing and Knowledge-Making in the Disciplines

The role of writing in constructing knowledge in academic disciplines, as viewed from contemporary socio-cultural perspectives. Consideration of how the goals, values, and assumptions of different disciplines shape their writing in distinctive ways and what implications this holds for pedagogy.

Includes: Experiential Learning Activity

Also listed as ALDS 4403.

Precludes additional credit for LALS 5406 (no longer offered) or ALDS 5602 (no longer offered) or LALS 5602 (no longer offered).

Prerequisite(s): third-year standing or permission of the instructor.

Lectures three hours a week.

ENGL 4910 [0.5 credit]

Independent Creative Writing Project

Independent creative writing, supervised by a Departmental faculty member, resulting in a poetry manuscript (10-15 poems), a one-act play, a 10,000-word novella, or two short stories. A proposal, coordinated with the faculty supervisor, must be submitted to the Undergraduate Supervisor by July 31.

Includes: Experiential Learning Activity

Prerequisite(s): completion of required credits for the Creative Writing Concentration, fourth-year Honours standing in English with a CGPA of 10.00 in English courses, and permission of the Undergraduate Supervisor in conjunction with the faculty supervisor.

ENGL 4915 [0.5 credit] Advanced Writing Workshop

An advanced workshop involving regular assignments in creative writing and practical criticism based on this work. Topics will vary.

Includes: Experiential Learning Activity

Prerequisite(s): a grade of B+ or higher in one of: ENGL 3902, ENGL 3903, ENGL 3906, ENGL 3915,

ENGL 3916: or departmental permission.

Workshop three hours a week.

ENGL 4947 [0.5 credit]

Issues in Diaspora Literature

A study of a selected topic in diaspora literature and culture.

Precludes additional credit for ENGL 4907 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4950 [0.5 credit]

Topics in Postcolonial and Diaspora Lit. and Theory

A study of a selected topic in postcolonial and/or diaspora literatures and theories. Themes, authors, and geographical and temporal focus will vary.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4960 [0.5 credit] Indigenous Literatures I

A study of the literatures produced by Indigenous storytellers and writers, with a focus on the oral tradition and life writing.

Precludes additional credit for ENGL 4808 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4961 [0.5 credit] Indigenous Literatures II

A study of the contemporary period of Indigenous literature, examining the historical and mythic influences on the literature.

Precludes additional credit for ENGL 4808 and ENGL 4809 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4975 [0.5 credit] Issues in Postcolonial Theory

A study of a selected issue in postcolonial and/or diaspora theory.

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

ENGL 4976 [0.5 credit] Issues in Postcolonial Literature

A study of a selected topic in postcolonial literature and culture.

Precludes additional credit for ENGL 4906 (no longer offered).

Prerequisite(s): fourth-year standing or permission of the department.

Seminar or lecture three hours a week.

Environmental and Climate Humanities (Minor)

This section presents the requirements for programs in:

· Minor in Environmental and Climate Humanities

Minor in Environmental and Climate Humanities (4.0 credits)

This minor is open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Environmental and Climate Humanities.

Requirements:

Environmental Science

Total Credits

This section presents the requirements for programs in:

4.0

- Environmental Science B.Sc. Honours
- Environmental Science with Concentration in Chemistry B.Sc. Honours
- Environmental Science with Concentration in Earth Sciences B.Sc. Honours
- Environmental Science with Concentration in Ecology, Biodiversity and Conservation B.Sc. Honours
- Environmental Science with Concentration in Geomatics B.Sc. Honours
- Environmental Science B.Sc. Major

Program Requirements

Course Categories

The Environmental Science program description makes use of the following course categories:

Approved Courses Outside the Faculties of Science and Engineering and Design (approved by the Environmental Science Institute)

Approved Environmental Science Electives (approved by the Environmental Science Institute)

Free Electives (see Academic Regulations for the B.Sc.)

Approved Science for Environmental Science

Courses approved by the Institute of Environmental Science include the following that comply with the Academic Regulations for the B.Sc.:

Biochemistry
Biology
Chemistry
Computer Science
Earth Science
Environmental Science
Geography
Geomatics
Mathematics and Statistics
Physics

Prohibited and Restricted Courses

Technology, Society, Environment Studes (TSES) courses are not accepted as Science Continuation courses in these programs, but may be used as Approved Environmental Science Specialization courses or as free electives.

Environmental Science B.Sc. Honours (20.0 credits)

		Journey Through Billions of Years				
10. 0.5 credit in: 0.5						
	PHIL 2380 [0.5]	Introduction to Environmental Ethics				

11. 1.5 credits in approved courses outside the faculties of Science and Engineering and Design (may include ISAP 1000)			
12. 4.5 credits in free electives.			
Total Credits	20.0		

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits: or.
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element

or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Biochemistry	
BIOC 2200 [0.5]	Cellular Biochemistry
BIOC 4001 [0.5]	Methods in Biochemistry
BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering
Biology	
BIOL 1103 [0.5]	Foundations of Biology I
BIOL 1104 [0.5]	Foundations of Biology II
BIOL 2001 [0.5]	Animals: Form and Function
BIOL 2002 [0.5]	Plants: Form and Function
BIOL 2104 [0.5]	Introductory Genetics
BIOL 2200 [0.5]	Cellular Biochemistry
BIOL 2600 [0.5]	Ecology
Chemistry	
CHEM 1001 [0.5]	General Chemistry I
CHEM 1002 [0.5]	General Chemistry II
CHEM 2103 [0.5]	Physical Chemistry I
CHEM 2203 [0.5]	Organic Chemistry I
CHEM 2204 [0.5]	Organic Chemistry II
CHEM 2302 [0.5]	Analytical Chemistry I
CHEM 2303 [0.5]	Analytical Chemistry II
CHEM 2800 [0.5]	Foundations for Environmental Chemistry
Earth Sciences	
ERTH 1002 [0.5]	The Earth and Life Odyssey: A Journey Through Billions of Years
ERTH 2102 [0.5]	Mineralogy to Petrology
ERTH 2404 [0.5]	Engineering Geoscience
ERTH 2802 [0.5]	Field Geology I
ERTH 3111 [0.5]	Vertebrate Evolution: Mammals, Reptiles, and Birds
ERTH 3112 [0.5]	Vertebrate Evolution: Fish and Amphibians
ERTH 3204 [0.5]	Mineral Deposits
ERTH 3205 [0.5]	Physical Hydrogeology
Food Sciences	

FOOD 3001 [0.5]	Food Chemistry
FOOD 3002 [0.5]	Food Analysis
FOOD 3005 [0.5]	Food Microbiology
Geography	
GEOG 1010 [0.5]	Global Environmental Systems
GEOG 3108 [0.5]	Soil Properties
Neuroscience	
NEUR 3206 [0.5]	Sensory and Motor Neuroscience
NEUR 3207 [0.5]	Systems Neuroscience
NEUR 4600 [0.5]	Advanced Lab in Neuroanatomy
Physics	
PHYS 1001 [0.5]	Foundations of Physics I
PHYS 1002 [0.5]	Foundations of Physics II
PHYS 1003 [0.5]	Introductory Mechanics and Thermodynamics
PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II
PHYS 2202 [0.5]	Wave Motion and Optics
PHYS 2604 [0.5]	Modern Physics I
PHYS 3007 [0.5]	Third Year Physics Laboratory: Selected Experiments and Seminars
PHYS 3606 [0.5]	Modern Physics II
PHYS 3608 [0.5]	Modern Applied Physics

Course Categories for B.Sc. Programs

Science Geography Courses

S	Science Geography Courses				
	GEOG 1010 [0.5]	Global Environmental Systems			
	GEOG 2006 [0.5]	Introduction to Quantitative Research			
	GEOG 2013 [0.5]	Weather and Water			
	GEOG 2014 [0.5]	The Earth's Surface			
	GEOG 3003 [0.5]	Quantitative Geography			
	GEOG 3010 [0.5]	Field Methods in Physical Geography			
	GEOG 3102 [0.5]	Geomorphology

	GEOG 4005 [0.5]	Directed Studies in Geography			
	GEOG 4013 [0.5]	Cold Region Hydrology			
	GEOG 4017 [0.5]	Global Biogeochemical Cycles			
	GEOG 4101 [0.5]	Two Million Years of Environmental Change			
	GEOG 4103 [0.5]	Water Resources Engineering			
	GEOG 4104 [0.5]	Microclimatology			
	GEOG 4108 [0.5]	Permafrost			
Science Psychology Courses					
	PSYC 2001 [0.5]	Introduction to Research Methods			

PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
PSYC 2002 [0.5]	Introduction to Statistics in Psychology

PSYC 2700 [0.5]	Introduction to Cognitive Psychology
PSYC 3000 [1.0]	Design and Analysis in Psychological Research
PSYC 3506 [0.5]	Cognitive Development
PSYC 3700 [1.0]	Cognition (Honours Seminar)
PSYC 3702 [0.5]	Perception
PSYC 2307 [0.5]	Human Neuropsychology I
PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering
ENSC 2001
FOOD (Food Science and Nutrition)
GEOM (Geomatics)
HLTH (Health Science)
ISAP (Interdisciplinary Science Practice)
MATH (Mathematics)
NEUR (Neuroscience)
PHYS (Physics) except PHYS 1901, PHYS 1902, PHYS 1905, PHYS 2903
Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B Sc. Program

	B.SC. Program	
	BIOL 4810 [0.5]	Education Research in Undergraduate Science
	CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
	CHEM 1004 [0.5]	Drugs and the Human Body
	CHEM 1007 [0.5]	Chemistry of Art and Artifacts
	ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
	ERTH 2415 [0.5]	Natural Disasters
	ISCI 1001 [0.5]	Introduction to the Environment
	ISCI 2000 [0.5]	Natural Laws
	ISCI 2002 [0.5]	Human Impacts on the Environment
	PHYS 1901 [0.5]	Planetary Astronomy
	PHYS 1902 [0.5]	From our Star to the Cosmos
	PHYS 1905 [0.5]	Physics Behind Everyday Life
	PHYS 2903 [0.5]	Physics Towards the Future
_		

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I
MATH 1402 [0.5]	Elementary Mathematics for Economics II

all 0000-level courses

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All

email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or

withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- 3. Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- 5. Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.Sc. Environmental Science: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.Sc. Honours Environmental Science program;
- 2. Successfully completed 5.0 or more credits;
- 3. Obtained an Overall CGPA of at least 6.50 and a Major CGPA of at least 8.00. These CGPAs must be maintained throughout the duration of the degree.

B.Sc. Honours Environmental Science students must successfully complete three (3) work terms to obtain the Co-op Designation.

Work Term Course: ENSC 3999 Work/Study Pattern:

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- B.Sc. (Honours)
- · B.Sc. (Major)
- B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational

Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The

prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Environmental Science (ENSC) Courses

ENSC 1500 [0.5 credit]

Environmental Science Seminar

The purpose and nature of the program; society's view on the natural and human-modified environment; major environmental issues and their scientific aspects; preparation and presentation of paper and seminars. Includes: Experiential Learning Activity Prerequisite(s): enrolment in the Environmental Science program.

Lectures, seminars and workshops four hours a week.

ENSC 2000 [0.5 credit] Environmental Science Field Methods

A field-based course introducing students to practical methods in environmental science. Topics will include earth sciences, geography, biology, and chemistry related aspects of environmental sciences and will focus on quantitative techniques to assess environmental impacts and management. A supplementary fee will apply. Includes: Experiential Learning Activity

Prerequisite(s): ERTH 1002 and BIOL 1004 or BIOL 1104, CHEM 1001 and CHEM 1002 and permission of the

Field trips, lectures and workshops, seven hours per week (delivered on a single day and on up to two mandatory weekend trips).

ENSC 2001 [0.5 credit]

Earth Resources and Natural Hazards: Environmental Impacts

Environmental impact of mineral, energy and water resource exploitation and impact of hazardous Earth processes such as volcanic eruptions, earthquakes and others: their prediction and mitigation.

Lectures three hours per week.

ENSC 2002 [0.5 credit]

Methods and Analysis in Environmental Science

Study and application of qualitative and quantitative techniques in environmental science, including study design, data collection and assembly, database manipulation, data analysis, and critically evaluating scientific information.

Includes: Experiential Learning Activity
Prerequisite(s): STAT 2507 or permission from the
Institute.

Lectures and seminars three hours a week.

ENSC 3000 [0.5 credit]

Environmental Science and Management: Theory and Practice

Theoretical and practical perspectives related to environmental science and management; Emphasis on real-world problems associated with human activities and development of solutions in natural and built environments; Hands-on experience with environmental monitoring and restoration. A supplementary fee will apply.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in Environmental
Science or permission of the Institute.
Field trips, lectures and workshops, 7 hours per week
(delivered on a single day).

ENSC 3002 [0.5 credit] Applied Data Analysis

Data analysis strategies to tackle real-world, wicked problems. Includes a hands-on applied environmental data science project with a variety of partners. Topics include: obtaining and working with data, exploring causal relationships, data ethics, communicating data, and moving from data to information to action. Includes: Experiential Learning Activity Also listed as ISAP 3001.

Prerequisite(s): STAT 2507.

Lecture three hours per week.

ENSC 3106 [0.5 credit]

Aquatic Science and Management

Fundamentals of aquatic science. The physical, chemical, and biotic aspects of lake, river, and estuary systems including human impacts, management and conservation. Includes: Experiential Learning Activity
Also listed as GEOG 3106.

Prerequisite(s): third-year standing and a second year science or engineering course. lectures, three hours per week

ENSC 3509 [0.5 credit]

Group Research in Environmental Science

Major project relating to an issue involving environmental science; effective methods of team research and presentation of group work. May include field work during class time or on weekends.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing in the Honours
Environmental Science program or permission of the
Institute.

Lectures, seminars and workshops three hours a week.

ENSC 3700 [0.5 credit]

Topics in Environmental Science

Specific topics of current interest. Topics may vary from year to year.

Prerequisite(s): Third year standing in the Environmental Science program or permission of the Institute.

ENSC 3906 [0.5 credit]

Project Planning for Environmental Research

Independent or group study on the fundamentals of scientific investigation, which may include use of literature, learning of research techniques, and development of a research proposal, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work. Includes: Experiential Learning Activity Prerequisite(s): Good standing in third year Environmental Science and permission of the Institute.

ENSC 3999 [0.0 credit] Co-operative Work Term

Practical experience for students enrolled in the Cooperative Option. To receive course credit a student must receive satisfactory evaluations from their work term employer. Written reports describing the work term project will be required. Graded Sat or Uns. Includes: Experiential Learning Activity Prerequisite(s): registration in the Environmental Science Co-operative Option and permission of the Institute. Fourmonth work term.

ENSC 4001 [0.5 credit] Environmental Science Practicum

Experience working in the environmental science sector, applying academic training to practical environmental issues. Graded Sat/Uns.
Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Environmental Science program. practicum

ENSC 4002 [0.5 credit] Environmental Decisions

The regulatory and scientific aspects of environmental management decisions, including risk analysis and mitigation, managing chronic and acute environmental impacts, and conservation of species and landscapes. Students will use real-world case studies to learn traditional and cutting-edge decision-making tools. Includes: Experiential Learning Activity Prerequisite(s): third-year standing in any B.Sc. program or permission of the Institute. Workshops three hours per week.

ENSC 4003 [0.5 credit] Food Systems and the Environment

This course explores issues of food systems and their sustainability. We will discuss aspects of food systems, including production, distribution, consumption, waste management, and their impact on communities and the environment.

Includes: Experiential Learning Activity
Prerequisite(s): third year standing in B.Sc. or B.HSc.
program or permission of the Institute.
Lecture three hours per week.

ENSC 4005 [0.5 credit]

Environmental Solutions and Sustainability Science

Focus on conceptualization and application of different knowledges and knowledge systems to complex, interdisciplinary real-world problems through an environmental lens. Development of skills and mindset needed to generate creative solutions that will be embraced by diverse publics and decision makers. Includes: Experiential Learning Activity Precludes additional credit for ENSC 4700A if taken in Winter term 2021 or Winter term 2022. Prerequisite(s): Third year standing in B.Sc. programs

Prerequisite(s): Third year standing in B.Sc. programs in Environmental Science, Interdisciplinary Science and Practice, Earth Science, Biology, and Geography and B.A. programs in Biology and Geography, or permission of the Institute.

Lecture, seminar, or workshops three hours a week.

ENSC 4700 [0.5 credit] Topics in Environmental Science

Prerequisite(s): third-year standing in the Environmental Science program or permission of the Institute. Lectures and discussion three hours a week.

ENSC 4901 [0.5 credit] Directed Projects

Independent or group study, for fourth-year students to explore a particular project, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work. Includes: Experiential Learning Activity Prerequisite(s): permission of the Institute. Students normally may not offer more than 1.0 credit of Directed Special Studies in their program.

ENSC 4906 [1.0 credit] Honours Research Project

An independent investigation into an aspect of environmental science supervised by a member of the faculty. Approval of the topic and the research schedule must be obtained from the project supervisor and the course coordinator before the last date for registration. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in the Honours Environmental Science program, a major CGPA 8.0 and permission of the Institute. independent study

ENSC 4909 [1.0 credit]

Translational Approach to Indigenous Community Wellness

This course involves co-developing an Indigenous community-led process or product that addresses a current and specific mental health issue. Involves working in interdisciplinary groups with a community partner. Includes: Experiential Learning Activity. Includes: Experiential Learning Activity Also listed as ISAP 4909, MPAD 4906, NEUR 4906. Precludes additional credit for ENSC 4906, ISAP 4906, ISAP 4907, ISAP 4908, NEUR 4905, NEUR 4907, NEUR 4908.

Prerequisite(s): Fourth-year standing with a minimum Major CGPA of 10.0 in the Honours Environmental Science program and permission of the instructor. Seminars or workshops three hours a week. A field trip to the partner community is typically required.

Environmental Studies

This section presents the requirements for programs in:

- Environmental and Climate Change Studies B.A. Honours
- · Environmental Studies B.A.
- · Minor in Environmental Studies

Program Requirements

Approved Environmental Studies Electives

Please note that the Approved Electives below may have prerequisite requirements or could be cross-listed.

Students should consult with the Department when planning their program and selecting courses. Some of the Environmental Studies Approved Electives have prerequisites, which are not explicitly included in the

program. Students should plan to obtain all necessary prerequisites or waivers for courses selected for this program.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies,

Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : français* requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search:
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- 5. Continuing a job search after accepting a co-op position;

- 6. Dismissal from a work term by the co-op employer;
- Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours Environmental Studies: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to the following:

- Registered as a full-time student in the B.A. Honours Environmental Studies program;
- 2. Obtained third-year standing;
- Successfully completed, by the start-date of the first work term, ENST 2005, ENST 2006, and ENST 3900;
- Obtained an Overall CGPA of at least 9.50 and a Major CGPA of at least 9.50. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours Environmental Studies students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or

supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op OptionCo-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French,

Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Environmental Studies (ENST) Courses

ENST 1000 [0.5 credit]

Introduction to Environmental and Climate Change Studies

A critical introduction to the scholarly field of environmental studies, with an emphasis on society-environment entanglements. It is designed to engage with environmental and climate change issues. Possible themes include population, scarcity, institutions, commons, risks, hazards, markets, political economy, and the social construction of nature.

Precludes additional credit for FYSM 1100 and ENST 1001 (no longer offered).

Lecture two hours and workshops/tutorials one hour weekly.

ENST 1020 [0.5 credit]

People, Places and Environments

Introduction to human geography. Examination of relationships between people, communities, society and the natural environment at local to global scales. Population change, cultural patterns, and historical, economic, political and environmental forces, including climate change, that shape human activity and experiences from place to place.

Includes: Experiential Learning Activity

Also listed as GEOG 1020.

Lectures two hours a week and tutorial one hour a week.

ENST 2000 [0.5 credit] Environmental Justice

Contemporary and foundational theories, practice and praxis of environmental justice in Canadian and comparative settings. Combine and communicate about aspects of the physical, built and social environments to understand how uneven conditions develop. Strategies and ideas to move towards greater equity and good environmental relationships.

Prerequisite(s): second-year standing in the Environmental Studies program or permission of the Department. Lecture two hours a week, discussion one hour a week.

ENST 2001 [0.5 credit]

Sustainable Futures: Environmental Challenges and Solutions

Individual and collective responses to pressing environmental problems, such as climate change. Innovative ways in which the environment can be protected and restored, taking into consideration socioeconomic, political and cultural factors. Topics include environmental lifestyles, sustainable communities, food systems, environmental design, and political activism.

Includes: Experiential Learning Activity
Prerequisite(s): second-year standing in the
Environmental Studies program or permission of the
Department.

Lectures, seminars and field work three hours a week.

ENST 2005 [0.5 credit] Introduction to Qualitative Research

Introduction to the research process, from generating questions through to reporting results. Topics include intensive and extensive research approaches; the use of surveys, interviews and other data collection methods; the analysis of qualitative information; and the ethical dimensions of doing research with people and communities.

Includes: Experiential Learning Activity Also listed as GEOG 2005.

Prerequisite(s): 1.0 credit in GEOG or ENST at the 1000-level and second-year standing, or permission of the Department.

Lectures two hours a week, workshop two hours a week.

ENST 2006 [0.5 credit]

Introduction to Quantitative Research

Introduction to solving problems using descriptive and inferential statistical methods. Graphical and numerical tools to describe distributions. Probability, sampling and estimates, and hypothesis testing. Fundamentals of spatial statistics and analysis.

Includes: Experiential Learning Activity

Also listed as GEOG 2006.

Precludes additional credit for BIT 2000, BIT 2009, BIT 2100 (no longer offered), BIT 2300 (no longer offered), DATA 1517, ECON 2210, NEUR 2002, PSCI 2702, STAT 2507, STAT 2601, STAT 2606.

Lectures two hours a week, laboratory two hours a week.

ENST 2500 [0.5 credit]

Climate Change: Social Science Perspectives

An introduction to climate change as a political, economic and socio-cultural phenomenon, including the political-economic and world-historical causes of anthropogenic greenhouse gas emissions; variations in impact and vulnerability; climate justice and other political movements; global mitigation and adaptation strategies; and proposals for radical systemic change.

Includes: Experiential Learning Activity

Also listed as GEOG 2500.

Prerequisite(s): second-year standing or permission of the department.

Lectures two hours a week, discussion groups one hour a week.

ENST 3000 [0.5 credit] Nature, Environment and Society

Overview of social science perspectives analyzing the relationship of nature and society. Examination of environmental problems, responses, and potential solutions through the study of concepts, theories, and research drawn from a range of scholarly approaches to environmental and climate change studies.

Includes: Experiential Learning Activity

 $\label{pre-equisite} Pre-equisite(s): third-year standing in Environmental \\$

Studies or permission of the department. Lecture and discussion three hours a week.

ENST 3022 [0.5 credit]

Environmental and Natural Resources

Exploration of complexity, dynamics, uncertainty and equity issues underpinning environmental and resource issues; review and appraisal of selected contemporary methods to assess and manage environmental and natural resources.

Includes: Experiential Learning Activity

Also listed as GEOG 3022.

Prerequisite(s): third-year standing in Geography or Environmental Studies or BGInS Specialization/Stream in Globalization and Environment or permission of the Department.

Lecture three hours a week.

ENST 3500 [0.5 credit]

Climate Justice and Action: Organizing for a Just, Equitable and Sustainable World

Exploration of how communities and movements fight the climate crisis and build alternative futures. It combines critical theory with hands-on learning to examine the collective actions and organizing strategies through which social movements tackle the systemic factors shaping climate change and its uneven impacts.

Prerequisite(s): third-year standing or permission of the department.

Lecture three hours a week.

ENST 3900 [0.5 credit] Honours Field Course

Field research, with a focus on data collection methods, analysis and presentation of findings. Design and conduct research that links the human and biophysical environment. Topics may change from year to year. Includes: Experiential Learning Activity

Also listed as GEOG 3000.

Precludes additional credit for ENST 2900 (no longer offered).

Prerequisite(s): GEOG 2005/ ENST 2005 and GEOG 2006/ ENST 2006, third-year Honours standing in Environmental Studies, Geomatics, or Geography, or permission of the Department.

Normally consists of a multi-day field excursion in the Ottawa region. A supplementary charge may apply. Consult the department regarding course details.

ENST 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

ENST 4000 [0.5 credit]

Environmental and Climate Change Studies Seminar

An advanced seminar designed to provide a capstone experience that builds upon and applies the analytical skills and interdisciplinary knowledge acquired in the Environmental Studies program. Topics vary year to year and by course section (see departmental website). Includes: Experiential Learning Activity Prerequisite(s): Registration is restricted to students eligible for fourth-year standing in the B.A. (Environmental Studies) Honours program.

ENST 4001 [0.5 credit] Environmental Studies Practicum I

Seminar three hours per week.

Students apply their knowledge and research skills and gain experience through field placements in government, the private sector, non-government organisations and with community organisations in the environmental field. Includes: Experiential Learning Activity

Prerequisite(s): registration is restricted to students eligible for fourth-year standing in the B.A. (Environmental Studies) Honours program, and permission of the Environmental Studies Co-ordinator.

ENST 4002 [0.5 credit]

Environmental Studies Practicum II

Students apply their knowledge and research skills and gain experience through field placements in government, the private sector, non-government organisations and with community organisations in the environmental field. Includes: Experiential Learning Activity

Prerequisite(s): restricted to students in the fourth year

Prerequisite(s): restricted to students in the fourth year of the Environmental Studies Honours program, and permission of the Environmental Studies Co-ordinator.

ENST 4004 [0.5 credit]

Environmental Impact Assessment

Principles, scope and purpose of environmental impact assessment, from conceptual and methodological points of view; range of environmental issues, with emphasis on Canadian case studies.

Includes: Experiential Learning Activity

Also listed as GEOG 4004.

Prerequisite(s): GEOG 3022 or ENST 3022, and fourthyear Honours standing in Geography or Environmental Studies or Environmental Science, or permission of the Department.

Lectures and seminars three hours per week.

ENST 4005 [0.5 credit]

Directed Studies in Environmental Studies

Students pursue their interest in a selected theme in environmental studies on a tutorial basis with a faculty member.

Prerequisite(s): permission of the Department.

ENST 4006 [0.5 credit] Environmental Policy Analysis

Critical examination of the creation, implementation and effectiveness of government policies related to environmental issues. Emphasis on perspectives, actors, institutions and social and economic relationships affecting policy responses to these issues, and on tools for analyzing the implications of specific policy choices. Prerequisite(s): fourth-year Honours standing in Environmental Studies, Geography, or permission of the Department.

Seminar three hours per week.

ENST 4007 [0.5 credit]

Special Topics in Geography and Environmental Studies

Selected topics in geography and/or environmental studies.

Also listed as GEOG 4007.

Precludes additional credit for GEOG 4006 (no longer offered).

Prerequisite(s): fourth-year Honours standing in the Department or permission of the Department. Seminar three hours per week.

ENST 4022 [0.5 credit]

Seminar in People, Resources, and Environmental Change

A selected topic or field of inquiry concerning natural resource use and environmental change.

Also listed as GEOG 4022.

Prerequisite(s): GEOG 3022 or ENST 3022 and fourthyear Honours standing in Geography or Environmental Studies or BGInS Specialization in Globalization and Environment, or permission of the Department. Seminar three hours per week.

ENST 4050 [0.5 credit]

Environmental and Geographic Education

Selected theoretical and applied issues concerning environmental and geographic education.

Also listed as GEOG 4050.

Prerequisite(s): Third-year honours standing in Geography or Environmental Studies, or permission of the Department.

Seminar three hours per week.

ENST 4400 [0.5 credit]

Field Studies

Field observation and methodology in a selected region, special topic or contemporary problem; on an individual or group basis.

Includes: Experiential Learning Activity

Also listed as GEOG 4000.

Prerequisite(s): third-year Honours standing and permission of the Department.

Hours to be arranged.

ENST 4450 [0.5 credit] Community-Engaged Research

Working in partnership with local organizations, students apply their geographical knowledge to conduct community-engaged research. Student projects will generate outputs for community partners. Research topics vary year to year.

Includes: Experiential Learning Activity

Also listed as GEOG 4450.

Prerequisite(s): fourth-year standing, or permission of the

department.

Lectures, discussion and project work three hours a week.

ENST 4906 [1.0 credit] Honours Research Project

An independent investigation into a select aspect of environmental studies, supervised by a faculty member. Possible outcomes might include: workshops, audiovisual productions, lay publications, and field projects accompanied by an essay demonstrating the student's capacity to critically reflect on the research project. Includes: Experiential Learning Activity Precludes additional credit for GEOG 4904/GEOM 4904 (no longer offered), GEOG 4909, GEOM 4909, GEOG 4906, GEOM 4906, and ENST 4907. Prerequisite(s): fourth-year Honours standing in Environmental Studies, a minimum CGPA of 9.00 in the major or permission of the Department, and an approved research topic and adviser.

ENST 4907 [1.0 credit] Honours Research Essay

Interdisciplinary research essay on an environmental issue, carried out in consultation with a faculty supervisor. The student must consult with the undergraduate student advisor in selecting a project and a supervisor. Includes: Experiential Learning Activity Precludes additional credit for ENST 4906, GEOG 4909, GEOM 4909, GEOG 4904/GEOM 4904 (no longer offered), GEOG 4906 and GEOM 4906. Prerequisite(s): fourth-year Honours standing in Environmental Studies, a minimum CGPA of 9.00 in the major or permission of the Department, and an approved research topic and adviser. Hours to be arranged with faculty adviser.

European and Russian Studies

This section presents the requirements for programs in:

- European and Russian Studies B.A. Honours
- European and Russian Studies B.A. Combined Honours
- European and Russian Studies B.A.
- Specialization in Europe and Russia in the World B.G.In.S. Honours

- Stream in Europe and Russia in the World B.G.In.S.
- Minor in European and Russian Studies

Program Requirements

EURUS Language Requirement

All candidates in the European and Russian Studies B.A., B.A. Honours and B.A. Combined Honours programs are required to demonstrate proficiency in a major regional language. Language proficiency is defined as the completion of an intermediate level of university language instruction (two years, 2.0 Carleton credits). Students who wish to count a relevant regional language that is not taught at Carleton should consult with and request approval from the Undergraduate Supervisor.

Students in the Bachelor of Global and International Studies Specialization or Stream Europe and Russia in the World must complete the BGInS Language requirement in an approved regional language of Europe, Russia, and Eurasia. See the BGInS Language Requirement for details.

Students are encouraged to continue with language instruction beyond the intermediate level required for the Institute Language Requirement. Advanced-level regional language courses may be counted towards EURUS degree requirements (see specific program requirements for details).

This Institute Language requirement may be fulfilled in one of three ways:

- Completion of one of the following courses (or equivalent): FREN 1100; FREN 1110; GERM 2020; GERM 2110; ITAL 2020; ITAL 2110; PORT 2110; RUSS 2020; SPAN 2020; SPAN 2110.
 Courses at other institutions may also be used to meet the language requirement as long as they are accepted by the Department of French or the School of Linguistics and Language Studies as being equivalent to or at a higher level than the courses listed above. For languages not taught at Carleton, an intermediate level is equal to two full years (2.0 Carleton credit) of university-level language instruction.
- Certification by the unit offering the relevant language or the Institute that the student has attained a level of language proficiency equivalent to completion of one of the courses above. Proficiency may be demonstrated through documentation.
- Secondary School Language of Instruction: Students
 whose secondary school transcripts show that their
 primary language of instruction in secondary school
 was a relevant regional language other than English
 may be exempted from the language requirement.
 Subject to approval of the Undergraduate Supervisor.

European and Russian Studies B.A. Honours (20.0 credits)

2. 0.5 credit from: M	odern History category	0.5
3. 0.5 credit from: Politics and Economics category		0.5
 2.0 credit from: Approved Courses in European, Russian, and Eurasian Studies. May include EURR courses not used to fulfill another requirement. 		2.0
5. The remaining requirements of the major discipline(s) and degree must be satisfied.		
Total Credits		4.0

Note: See the "Approved Courses in European, Russian, and Eurasian Studies" section of the calendar for a list of courses that fulfill specific categories indicated in the requirements above.

Approved Courses in European, Russian, and Eurasian Studies

This list includes categories of approved courses that fulfill specific program requirements for all undergraduate programs in the Institute of European, Russian, and Eurasian Studies (EURUS). Students are advised that some courses may have prerequisites that must be met in order to register for a particular course.

Modern History

HIST 1003 [0.5]	Empire, War, and Revolution in Europe, 1850-1939

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All

email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or

withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- Failure to attend all interviews for positions to which the student has applied;
- 3. Declining more than one job offer during the job search:
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours European and Russian Studies: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- Registered as a full-time student in the B.A. Honours European and Russian Studies program;
- 2. Successfully completed 5.0 or more credits;
- Successfully completed, by the start-date of the first work term, EURR 2010;
- 4. Obtained an Overall CGPA of at least 8.00 and a Major CGPA of at least 9.00. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours European and Russian Studies students must successfully complete three (3) work terms to obtain the Co-op Designation.

Co-op Work Term Course: EURR 3999

Work/Study Pattern:

Year 1		Year 2		Year 3		Year 4		Year 5	
Term	Pattern								
Fall	S	Fall	S	Fall	W	Fall	S	Fall	S
Winter	S	Winter	S	Winter	S	Winter	W	Winter	S
Summer		Summer		Summer	W	Summer	W		

Legend S: Study W: Work

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing

will be granted only for those courses that are determined to be appropriate.

European and Russian Studies (EURR) Courses EURR 1001 [0.5 credit]

Introduction to European and Russian Studies

An introduction to the study of Europe and Russia, including aspects of the histories, societies, cultures, and politics of the region.

Includes: Experiential Learning Activity Lectures/groups three hours a week.

EURR 2010 [0.5 credit]

European, Russian and Eurasian Politics, Society and International Affairs

An interdisciplinary examination of the domestic issues facing the countries of Europe, Russia and Eurasia and the position of these countries in a global context, including geopolitical, economic, security and human dimensions.

Precludes additional credit for EURR 2001 (no longer offered), EURR 2002 (no longer offered).

Prerequisite(s): second year standing.

Lecture and discussion three hours a week.

EURR 3010 [0.5 credit] Europe, Russia and Eurasia Beyond Borders: Literature and Culture

An exploration of the cultural borders and boundaries of contemporary Europe, Russia and Eurasia. Using literary and visual texts, the course explores issues such as migration, cultural and political borders and their transcendence, cultural responses to authoritarianism, the Cold War and its afterlives, and memory.

Also listed as ENGL 3020. Precludes additional credit for EURR 3001 (no longer offered), EURR 3002 (no longer offered).

Prerequisite(s): second year standing. Lecture and discussion three hours a week.

EURR 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity
Prerequisite(s): registration in the B.A. European
and Russian Studies (Honours) Co-operative option,
completion of the Co-op preparation classes offered by the
Co-op Office and permission of the Institute.

EURR 4002 [0.5 credit]

Post-Soviet States and Societies

The relationship between social forces and state structures at both the national and local levels in the USSR and the post-Soviet states.

Also listed as PSCI 4502.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5002, PSCI 5110, for which additional credit is precluded.

Seminar three hours a week.

EURR 4008 [0.5 credit]

Nationalism in Russia and Eurasia

Ethnic basis of nationalism in the region. Ethnic politics and trends.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5008, for which additional credit is precluded.

Seminar three hours a week.

EURR 4100 [0.5 credit]

Nation-Building in Central and Eastern Europe

Processes of nation building in the region examined in terms of a particular country, or set of countries. Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5100, for which additional credit is precluded.

Seminar three hours a week.

EURR 4101 [0.5 credit]

The Balkans in Transition - 1918 to 1989

The seminar uses the concept of transition to understand the Balkan encounter with modernity and Europe. Key periods to be examined include the interwar era and the period of communist rule, with an emphasis on political, social and economic themes.

Also listed as HIST 4605.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Seminar three hours a week.

EURR 4102 [0.5 credit] The Balkans since 1989

Selected topics in Balkan politics and society since the collapse of communism in 1989, focusing on the democratic transition and the EU accession process. The legacies of communist rule, democratization and the many national questions that still exist in the region.

Also listed as PSCI 4507.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Seminar three hours a week.

EURR 4103 [0.5 credit] The Great Russian Novel

A study of masterpieces of prose fiction from the Golden Age of Russian literature. Readings will be chosen from writers such as Turgenev, Tolstoy, Dostoevsky, Gogol, and/or others. All texts will be studied in English translation.

Also listed as ENGL 4600.

Prerequisite(s): Third-year standing.

Lecture three hours a week.

EURR 4104 [0.5 credit]

European Integration and European Security

Issues related to the formation of supra-national decisionmaking structures in Europe.

Includes: Experiential Learning Activity

Also listed as PSCI 4608.

Prerequisite(s): fourth-year Honours standing or

permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5104, for which additional credit is precluded.

Seminar three hours a week.

EURR 4106 [0.5 credit]

Selected Topics in European Integration Studies

Selected topics related to European integration in the post-World War II period.

Also listed as PSCI 4609.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Seminar three hours a week.

EURR 4107 [0.5 credit]

Russia's Regional and Global Ambitions

Domestic conditions in Russia from 2000 to the present and the framing of Russia's foreign policy and strategic objectives towards the former Soviet republics and other key global actors, including the United States, the European Union, NATO and China.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5107, for which additional credit is precluded.

Seminar three hours a week.

EURR 4201 [0.5 credit]

Special Topics in European Studies

A seminar focusing on selected topics related to Europe. Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Seminar three hours a week.

EURR 4202 [0.5 credit]

Special Topics in Russian and Eurasian Studies

A seminar focusing on selected topics related to Russia and neighbouring countries.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5202, for which additional credit is precluded.

Seminar three hours a week.

EURR 4204 [0.5 credit]

Central Europe, Past and Present

Evolution and current status of Central Europe from periods of foreign control in the late nineteenth and twentieth centuries to independent statehood, with emphasis on national accommodations and conflicts. Also listed as HIST 4604.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5204, for which additional credit is precluded.

Seminar three hours a week.

EURR 4205 [0.5 credit]

Politics of Identity in Europe and the Russian Area

The relationships between political transformation, identity-building, ethnicity, and gender politics in postcommunist states, considered in comparison with select countries in Central and/or Western Europe.

Includes: Experiential Learning Activity

Also listed as PSCI 4501.

Prerequisite(s): Fourth-year Honours standing or permission of the Department and one of PSCI 2101, PSCI 2102, PSCI 2500, PSCI 3208, PSCI 3209, PSCI 3500. PSCI 3502.

Seminar three hours a week.

EURR 4206 [0.5 credit] Internship and Applied Policy Skills

A seminar accompanying an unpaid internship placement to develop workplace and applied policy skills. Relating applied experience to academic literature. Writing skills for an applied policy setting. Internship placement: 12 days over I2 weeks.

Includes: Experiential Learning Activity Prerequisite(s): open only to fourth-year EURUS B.A. Honours students with a minimum B+ average and placement in an internship position in the same semester or in the previous semester (based on a competitive application process).

Also offered at the graduate level, with different requirements, as EURR 5301, for which additional credit is precluded.

Seminar: six three-hour seminar sessions.

EURR 4207 [0.5 credit] **Politics of Central Eurasia**

Examination of the Caucasus and Central Asia, from Chechnya to former Soviet republics of the region, Afghanistan and Chinese Turkestan. Interests of Russia, China, and the United States. Emphasis on underdevelopment, oil and gas, terrorism, Islam. Includes: Experiential Learning Activity Also listed as PSCI 4503.

Prerequisite(s): fourth year Honours standing or permission of the Institute.

Seminar three hours a week.

EURR 4208 [0.5 credit]

Foreign Policies of Soviet Successor States

The foreign policies of the USSR and of Russia and selected other successor states, with special emphasis on the search for a new security order.

Also listed as PSCI 4601.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Seminar three hours a week.

EURR 4209 [0.5 credit]

Politics of the Caucasus and Caspian Basin

Examination of the South Caucasus (Azerbaijan, Georgia, Armenia), the Russian-held North Caucasus, including Chechnya, and relations with Iran. Emphasis on state and society, oil and gas, transregional communications. interests of western powers, ethnic relations.

Includes: Experiential Learning Activity

Also listed as PSCI 4504.

Prerequisite(s): fourth-year Honours standing or

permission of the Institute. Seminar three hours a week.

EURR 4302 [0.5 credit] **EU Summer Study Abroad**

This course is open only to students in approved summer study options in Europe, particularly the EU Study Tour. Includes: Experiential Learning Activity Prerequisite(s): approval of the Institute. Also offered at the graduate level, with different requirements, as EURR 5302, for which additional credit is precluded.

EURR 4303 [0.5 credit]

Contemporary Europe: From Postwar to the European

History of contemporary Europe from 1945 to present covering both eastern and western halves of the continent and including social, cultural, political, and economic dimensions.

Includes: Experiential Learning Activity

Also listed as HIST 4606.

Prerequisite(s): fourth-year Honours standing or

permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5303, for which additional credit is precluded.

Seminar three hours a week.

EURR 4304 [0.5 credit]

Europe and International Migration

Europe's role in international migration. Topics to be discussed may include migration and mobility as both assets and challenges for sending, transit, and destination countries, changing geographies of migration, inclusion and exclusion, political mobilization, and responses of European states and other actors.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing or

permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5304, for which additional credit is precluded.

Seminar three hours a week.

EURR 4305 [0.5 credit]

Imperial Russia and the Russian Revolution

Examination of the expansion and downfall of tsarist Russia from the eighteenth century to the revolutionary era and the establishment of Bolshevik rule. Topics include the relationship between the monarchy and subject peoples, social and economic change, and daily life.

Includes: Experiential Learning Activity

Also listed as HIST 4607.

Precludes additional credit for EURR 4203. Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5305, for which additional credit is precluded.

Seminar three hours a week.

EURR 4306 [0.5 credit]

The Soviet Union: Power and Culture

Examination of the rise of the Soviet Union to a global power and subsequent tensions that promoted its collapse. The course will analyze Stalinism, the Second World War, the Thaw, and Brezhnev and Gorbachev eras through the lens of the USSR's citizens.

Includes: Experiential Learning Activity

Also listed as HIST 4608.

Precludes additional credit for EURR 4203.

Prerequisite(s): fourth-year Honours standing or permission of the Institute.

Also offered at the graduate level, with different requirements, as EURR 5306, for which additional credit is precluded.

Seminar three hours a week.

EURR 4704 [0.5 credit]

The Business Environment in Europe

The economic, political, legal, and cultural environment for doing business in the European Union and other regions in Europe. Patterns of foreign trade and investment, market characteristics, science and technology, regulation and European integration, and business culture.

Also listed as BUSI 4704.

Precludes additional credit for EURR 4006 (no longer offered), BUSI 4604 (no longer offered).

Prerequisite(s): third-year standing.

Seminar three hours a week.

EURR 4901 [0.5 credit]

Tutorial in European and Russian Studies

Tutorials or reading courses on selected topics may be arranged with the permission of the Institute and agreement of the instructor.

Prerequisite(s): permission of the Institute.

EURR 4908 [1.0 credit]

Honours Essay

Individual research project resulting in a major essay, completed under the supervision of a faculty member and evaluated by the supervisor and a second reader. Students should consult with the Supervisor of Undergraduate Studies regarding the topic and supervisor. Institute's Honours Essay guidelines apply.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing, a CGPA of 9.00 or higher in courses qualifying for credit in European and Russian Studies, and permission of the Institute.

Film Studies

This section presents the requirements for programs in:

- · Film Studies B.A. Honours
- · Film Studies B.A. Combined Honours
- · Film Studies B.A.
- · Minor in Film Studies
- Post-Baccalaureate Diploma in Film Studies

Program Requirements

Film Studies

B.A. Honours (20.0 credits)

A. Credits Included in the Major CGPA (9.0 credits)

Total Credits		20.0

Post-Baccalaureate Diploma in Film Studies (4.0 credits)

Admission to this program requires the permission of the Film Studies program. Normally, students would be required to have completed an undergraduate degree with a minimum B average or higher to be admitted. Applications will be reviewed on a case-by-case basis.

Requirements:

1. 2.0 credits in:		2.0
FILM 2001 [0.5]	Film Theory and Analysis I	
FILM 2002 [0.5]	Film Theory and Analysis II	
FILM 2606 [0.5]	History of World Cinema I	
FILM 2607 [0.5]	History of World Cinema II	
2. 1.0 credit in Film S	Studies electives at the 3000-level	1.0
3. 1.0 credit in Film S	Studies electives at the 4000-level	1.0
Total Credits		

With the approval of the Film Studies undergraduate supervisor, 0.5 credit may be taken outside the department.

B.A. Regulations

0.5

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention: français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : français* requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Regulations

Post-Baccalaureate Diploma

In addition to the requirements presented here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

Definition

A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:

- qualify a candidate for consideration for entry into a master's program, or
- bring a candidate who already possesses a bachelor's degree up to a level of a bachelor's degree of 20.0 credits or more in another discipline, or
- provide a candidate who already possesses a twentycredit bachelor's degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas, or
- provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

Program Requirements

- A post-baccalaureate diploma is normally constituted of a minimum of 3.0 credits to a maximum of 5.0 credits of advanced undergraduate courses.
- A minimum of 3.0 residency credits counting toward the post-baccalaureate diploma.

English as a Second Language Requirement

In addition to the program requirements, completion of English as a Second Language (ESLA) courses may be required from the following sequence: ESLA 1300, ESLA 1500, ESLA 1900. No credits from this sequence will be counted toward the post-baccalaureate diploma.

Continuation

All post-baccalaureate diploma students are expected to complete their diploma requirements within two calendar years after the date of initial registration. After this period student may be withdrawn.

Graduation

- A candidate for a post-baccalaureate diploma must have an overall CGPA of at least 6.5 to graduate.
- A candidate for a post-baccalaureate diploma must obtain a grade of C- or higher in each course taken in fulfillment of the program requirements.
- Students should consult with the Department, School or Institute when planning their diploma and selecting courses.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific

course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Film Studies (FILM) Courses

FILM 1101 [0.5 credit]

Introduction to Film Studies

Introduction to the study of film that emphasizes problems and methods of film analysis through the study of various types of films. Topics relating to the filmmaker, film genre, and film history are covered through a focus on questions of style and technique.

Precludes additional credit for FILM 1120, FILM 1000 (no longer offered), and FYSM 1510.

Lecture and screening three hours a week, discussion one hour a week.

FILM 1120 [0.5 credit] Seminar in Film Studies

A seminar in the study of film that emphasizes problems and methods of film analysis through the study of a variety of types of films.

Precludes additional credit for FILM 1101, FILM 1000 (no longer offered) and FYSM 1510.

Prerequisite(s): enrolment in a Film Studies major. Lecture and screening three hours a week, discussion one hour a week.

FILM 2001 [0.5 credit]

Film Theory and Analysis I

Introduction to major film theories and analytical practices. The objective of this course is to familiarize students with the main theories and methods of analysis that have been developed for the study of film.

Precludes additional credit for FILM 2000 (no longer offered).

Prerequisite(s): FILM 1101 or FILM 1120 and second-year standing; or permission of the Discipline.

Lecture and screening three hours a week, seminar one hour a week.

FILM 2002 [0.5 credit] Film Theory and Analysis II

Building on the skills acquired in FILM 2001, this course considers specific debates in film theory, and provides students with advanced methods for film analysis.

Precludes additional credit for FILM 2000 (no longer

offered).
Prerequisite(s): FILM 1101 or FILM 1120, and FILM 2001, and second-year standing; or permission of the Discipline. Lecture and screening three hours a week, seminar one

FILM 2101 [0.5 credit] The Film Industry

hour a week.

The organization of the production, distribution and exhibition practices of various film industries. May include an examination of the relationship between a national film industry and its television industry.

Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

FILM 2106 [0.5 credit]

The Documentary

An examination of the work of individual filmmakers, of documentary styles and of organizations and institutions in the context of the history of documentary film making, including documentaries made for television. Non-fiction films other than documentaries may be considered. Also listed as JOUR 2106.

Precludes additional credit for FILM 2105 (no longer offered), JOUR 2105 (no longer offered).

Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2201 [0.5 credit]

National Cinema

This course examines the film production of specific countries in order to determine the themes, the styles, and the character of a national cinema.

Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2202 [0.5 credit]

Japanese Cinema

Various practices and movements in the history of Japanese cinema, ranging from the silent era to the current digital age.

Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2203 [0.5 credit] Scandinavian Cinema

The development of cinema culture and film production in the Scandinavian countries, from the golden age of Scandinavian silent cinema to contemporary Nordic noir. Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2204 [0.5 credit]

Indigenous Cinema and Media

A critical examination of films and other audiovisual media created by Indigenous artists, such as independent films, genre films, documentaries, web series, installations, and video games.

Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Department.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2206 [0.5 credit]

Canadian Cinema

A critical examination of Canadian cinema and media and how it relates to other aspects of Canadian culture. Precludes additional credit for FILM 2207 (no longer offered), FILM 2208 (no longer offered), FILM 2209 (no longer offered).

Prerequisite(s): FILM 1101 or FILM 1120 or second-year standing; or permission of the Discipline.

Lecture and screening three hours a week, seminar one hour a week.

FILM 2401 [0.5 credit]

Authorship in Film and Media

A detailed study of the themes, the characteristic style, development and influence of one or more directors. Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2601 [0.5 credit]

Film Genres

This course examines questions of generic form, drawing examples from world cinema.

Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2606 [0.5 credit] History of World Cinema I

Historical survey of world cinema primarily from 1895 to 1945, examining the forms, structures and stylistic conventions of various periods and nations.

Also listed as ENGL 2600.

Precludes additional credit for FILM 2608 and ENGL 2608 (no longer offered).

Prerequisite(s): FILM 1101 or FILM 1120, and secondyear standing, or permission of the discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 2607 [0.5 credit]

History of World Cinema II

Historical survey of world cinema primarily since 1945, examining the forms, structures and stylistic conventions of various periods and nations.

Also listed as ENGL 2601.

Precludes additional credit for FILM 2608 and ENGL 2608 (no longer offered).

Prerequisite(s): FILM 2606 or ENGL 2600 or permission of the discipline.

FILM 2801 [0.5 credit] Film and Media Practice I

Introduction to the basic principles of film and media practice. Emphasis may change from year to year, focusing alternately on narrative, experimental, animation or documentary techniques. This course is intended for Film Studies majors only.

Includes: Experiential Learning Activity
Prerequisite(s): FILM 1101 or FILM 1120.
Lecture/workshops four hours a week.

FILM 2809 [0.5 credit] The Video Game

Introduction to the video game as a popular media form, an emerging aesthetic, and a social and cultural practice. Topics include: history of video games; game form; game industry; narrative; art and design; interactivity; theories of play.

Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3105 [0.5 credit]

Questions of Documentary Practice

Theoretical implications of documentary film and documentary television practice.
Also listed as JOUR 3105.

Prerequisite(s): 1.0 credit in FILM at the 2000-level and third-year standing, or permission of the Discipline. Lecture and screening three hours a week, lecture one hour a week.

FILM 3206 [0.5 credit]

Special Topics in American Cinema

Studies in various aspects of American cinema with emphasis on historical and critical issues. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3209 [0.5 credit]

Special Topics in Canadian Cinema

Studies in various aspects of Canadian cinema. The course offerings may change from year to year. Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3301 [0.5 credit]

Special Topics in Cinema, Gender, and Sexuality

A study of special topics in gender and cinema with emphasis on critical and historical questions. The course offerings may change from year to year.

Prerequisite(s): 1.0 credit in FILM at the 2000-level and third-year standing, or permission of the Discipline. Lecture and screening three hours a week, lecture one hour a week.

FILM 3402 [0.5 credit]

Film Music

The use of music in film, from the silent era to the present day. Techniques, styles and theory of film music through the examination of selected scenes.

Also listed as MUSI 3402.

Lectures three hours a week, screening two hours a week

FILM 3506 [0.5 credit]

Special Topics in Film Theory

Building on the skills acquired in FILM 2000, this course provides a critical study of advanced film theories. The course offerings may change from year to year. Topics may include aesthetics, ideological criticism, film and philosophy, and theories of technology and historiography. Precludes additional credit for FILM 3505 (no longer offered).

Prerequisite(s): FILM 2001 and FILM 2002 and third-year standing; or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3601 [0.5 credit]

Contemporary Québec Cinema

Critical reflection on notable filmmakers, formal and thematic trends, dominant social and political issues, and diverse cultural perspectives in Québec cinema during the 21stcentury, including the film movement known as the Québec New Wave (Renouveau du cinéma québécois). French language ability not required.

Prerequisite(s): 1.0 credit in FILM and third-year standing or permission of the Discipline.

FILM 3608 [0.5 credit]

Special Topics in Film History

Special studies of aspects of the history of world cinema. The course offerings may change from year to year. Topics may include the examination of film movements, styles and genres, and/or comparative study of national, regional and/or world-wide trends.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3609 [0.5 credit]

African Cinema

Major figures and movements in African cinema around such categories as the colonial, the anti-colonial, the postcolonial, the diasporic, the continental, race, Afrofuturism, and world cinema, interrogating in the process the very category of "African cinema".

Also listed as AFRI 3609.

Prerequisite(s): 1.0 credit in FILM and third year standing or permission of instructor.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3701 [0.5 credit]

Special Topics in Animation, Video, and Experimental Film

A study of special topics in animation, video or experimental film. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3800 [0.5 credit]

Film/Video Archival or Curatorial Practice

Consideration of topics in film/video archival or curatorial practice, including questions related to cultural policy, exhibition, conservation, and interrelationship of media. Students are expected to bear all travel and other costs arising from required visits to local facilities.

Includes: Experiential Learning Activity
Precludes additional credit for FILM 4800 (no longer offered).

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3801 [0.5 credit] Film and Media Practice II

Practical and conceptual approaches to film studies from the point of view of film and media practice. Emphasis may change from year to year, focusing alternately on narrative, experimental, animation or documentary techniques.

Includes: Experiential Learning Activity
Prerequisite(s): FILM 2001 and FILM 2801.
Lecture/workshops four hours a week.

FILM 3808 [0.5 credit] Cinema and Technology

The technological development of cinema. Topics may include advances in sound and colour processes, digital effects, exhibition technologies and new media. Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3809 [0.5 credit] Analyzing Digital Media

History, aesthetics, and theories of digital media and culture. Key concepts in digital media studies, including: digital cinema, interactive documentaries, viral videos, web series, emerging immersive platforms.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3810 [0.5 credit] Sound in Film and Media

Questions related to sound in film and media such as: how is sound used to create narratives and emotions? How does sound affect our experience of actual and fictional worlds?.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

FILM 3901 [0.5 credit]

Special Topics in Film Studies

Special topics and issues not ordinarily treated in the third-year course program. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 2000 level, and third-year standing, or permission of the Discipline.

FILM 3902 [0.5 credit] Screenwriting Workshop

An intermediate workshop involving regular assignments in writing for film.

Includes: Experiential Learning Activity

Also listed as ENGL 3902.

Prerequisite(s): a grade of B+ or higher in one of: ENGL 2901, ENGL 2903, ENGL 2915; or departmental permission.

Workshop three hours a week.

FILM 4001 [0.5 credit]

Research and Critical Methodologies

Study of various methodologies for critical, theoretical and historical research in film studies.

Precludes additional credit for FILM 4000 (no longer offered).

Prerequisite(s): FILM 2002, 1.0 credit in FILM at the 3000-level, and fourth-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture two hours a week.

FILM 4002 [0.5 credit]

Special Topics in Moving Image Culture

Special aspects of the audio-visual cultures of the late nineteenth and twentieth centuries. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 3000 level, and fourth-year standing, or permission of the Discipline.

Seminar three hours a week.

FILM 4201 [0.5 credit]

Special Topics in National Cinemas

A study of a special topic in national cinema. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 3000 level, and fourth-year standing, or permission of the Discipline.

Lecture and screening three hours a week, seminar two hours a week.

FILM 4203 [0.5 credit]

Film Festivals and World Cinema

Theoretical and critical study of the film festival as a phenomenon shaping our understanding of film culture, institutions, history and forms. Issues examined may include festivals as sites of cultural legitimation; as spectacle; their political economy; curation/programming; case studies of film festivals around the world. Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 3000 level, and fourth-year standing, or permission of the Discipline.

Lecture and screening three hours a week, seminar two hours a week.

FILM 4301 [0.5 credit]

Special Topics in Film and Philosophy

Special topics in philosophical approaches to the study of film, and an examination of the relations between film theory and philosophical aesthetics. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 3000 level, and fourth-year standing, or permission of the Discipline.

Also offered at the graduate level, with different requirements, as FILM 5109, for which additional credit is precluded.

Lecture and screening three hours a week, seminar two hours a week.

FILM 4401 [0.5 credit]

Special Topics in Film Authorship

A study of questions of authorship in the cinema, concentrating on one or more filmmakers. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 3000 level, and fourth-year standing, or permission of the Discipline.

Lecture and screening three hours a week, seminar two hours a week.

FILM 4501 [0.5 credit] Special Topics in Film Theory

A study of a special topics in film theory. The course offerings may change from year to year.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 3000 level, and fourth-year standing, or permission of the Discipline.

Lecture and screening three hours a week, seminar two hours a week.

FILM 4805 [0.5 credit]

Practicum in Film and Film Studies

Practical experience through working on specific projects under the supervision of staff at a museum, gallery, archive, or production company in the Ottawa area. A maximum of 0.5 credit Film Studies practica courses may be offered in fulfilment of Film Studies requirements. Graded SAT/UNS.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in Film
Studies, a CGPA of 9.00 or higher in Film Studies, and
permission of the Discipline.

FILM 4901 [0.5 credit] **Special Topic**

Selected topics in film studies not ordinarily available in the regular course program. The choice of topic or topics will vary at least every two years and will be announced well in advance of the registration period.

Prerequisite(s): FILM 1101 or FILM 1120, 1.0 credit in FILM at the 3000 level, and fourth-year standing, or permission of the Discipline.

Screening three hours a week, seminar two hours a week.

FILM 4904 [0.5 credit] Independent Study

For students who wish to study a specific topic. Proposed projects must be approved by the Program Committee. Written request outlining the project must be submitted by the first day of the term. An essay is the usual assignment.

Includes: Experiential Learning Activity Prerequisite(s): fourth-year Honours standing in Film Studies and a CGPA of 10.00 or higher in Film Studies. Unscheduled.

Food Science

This section presents the requirements for programs in:

- Food Science B.Sc. Honours
- · Minor in Food Science

Food Science

B.Sc. Honours (20.0 credits)

A. Credits Included in the Major CGPA (9.5 credits)

		(
1.	6.0 credits in:		6.0

3. 1.0 credit from:

Minor in Food Science (4.0 credits)

The Minor in Food Science is available to degree students registered in programs other than the Food Science B.Sc. Honours program. Note that there are several prerequisites in Chemistry, Biochemistry and Math that may also need to be satisfied.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Food Science.

Requirements

1.	0.5 credit in:		0.5
	FOOD 1001 [0.5]	Introduction to Food Science	
2.	0.5 credit from:		0.5
	FOOD 2001 [0.5]	Principles of Nutrition	
	FOOD 2002 [0.5]	Food Processing	
3.	3.0 credits in FOC	D at 2000-level or higher	3.0
	The remaining requind degree must be s	irements of the major discipline(s) atisfied.	
To	otal Credits		4.0

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or.
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Α	pproved Experime	ntal Science Courses
	Biochemistry	
	BIOC 2200 [0.5]	Cellular Biochemistry
	BIOC 4001 [0.5]	Methods in Biochemistry
	BIOC 4201 [0.5]	Advanced Cell Culture and Tissue Engineering
	Biology	
	BIOL 1103 [0.5]	Foundations of Biology I
	BIOL 1104 [0.5]	Foundations of Biology II
	BIOL 2001 [0.5]	Animals: Form and Function
	BIOL 2002 [0.5]	Plants: Form and Function
	BIOL 2104 [0.5]	Introductory Genetics
	BIOL 2200 [0.5]	Cellular Biochemistry
	BIOL 2600 [0.5]	Ecology
	Chemistry	
	CHEM 1001 [0.5]	General Chemistry I
	CHEM 1002 [0.5]	General Chemistry II
	CHEM 2103 [0.5]	Physical Chemistry I
	CHEM 2203 [0.5]	Organic Chemistry I

CHEM 2204 [0.5]	Organic Chemistry II
CHEM 2302 [0.5]	Analytical Chemistry I
CHEM 2303 [0.5]	Analytical Chemistry II
CHEM 2800 [0.5]	Foundations for Environmental Chemistry
Earth Sciences	
ERTH 1002 [0.5]	The Earth and Life Odyssey: A Journey Through Billions of Years
ERTH 2102 [0.5]	Mineralogy to Petrology
ERTH 2404 [0.5]	Engineering Geoscience
ERTH 2802 [0.5]	Field Geology I
ERTH 3111 [0.5]	Vertebrate Evolution: Mammals, Reptiles, and Birds
ERTH 3112 [0.5]	Vertebrate Evolution: Fish and Amphibians
ERTH 3204 [0.5]	Mineral Deposits
ERTH 3205 [0.5]	Physical Hydrogeology
Food Sciences	
FOOD 3001 [0.5]	Food Chemistry
FOOD 3002 [0.5]	Food Analysis
FOOD 3005 [0.5]	Food Microbiology
Geography	
GEOG 1010 [0.5]	Global Environmental Systems
GEOG 3108 [0.5]	Soil Properties
Neuroscience	
NEUR 3206 [0.5]	Sensory and Motor Neuroscience
NEUR 3207 [0.5]	Systems Neuroscience
NEUR 4600 [0.5]	Advanced Lab in Neuroanatomy
Physics	
PHYS 1001 [0.5]	Foundations of Physics I
PHYS 1002 [0.5]	Foundations of Physics II
PHYS 1003 [0.5]	Introductory Mechanics and Thermodynamics
PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II
PHYS 2202 [0.5]	Wave Motion and Optics
PHYS 2604 [0.5]	Modern Physics I
PHYS 3007 [0.5]	Third Year Physics Laboratory: Selected Experiments and Seminars
PHYS 3606 [0.5]	Modern Physics II
PHYS 3608 [0.5]	Modern Applied Physics

Course Categories for B.Sc. Programs

Science Geography Courses

GEOG 1010 [0.5]	Global Environmental Systems
GEOG 2006 [0.5]	Introduction to Quantitative Research
GEOG 2013 [0.5]	Weather and Water
GEOG 2014 [0.5]	The Earth's Surface
GEOG 3003 [0.5]	Quantitative Geography
GEOG 3010 [0.5]	Field Methods in Physical Geography
GEOG 3102 [0.5]	Geomorphology
GEOG 3103 [0.5]	Watershed Hydrology
GEOG 3104 [0.5]	Principles of Biogeography
GEOG 3105 [0.5]	Climate and Atmospheric Change

GEOG 3106 [0.5]	Aquatic Science and Management
GEOG 3108 [0.5]	Soil Properties
GEOG 4000 [0.5]	Field Studies
GEOG 4005 [0.5]	Directed Studies in Geography
GEOG 4013 [0.5]	Cold Region Hydrology
GEOG 4017 [0.5]	Global Biogeochemical Cycles
GEOG 4101 [0.5]	Two Million Years of Environmental Change
GEOG 4103 [0.5]	Water Resources Engineering
GEOG 4104 [0.5]	Microclimatology
GEOG 4108 [0.5]	Permafrost

Science Psychology Courses

•	olollog i cychology	
	PSYC 2001 [0.5]	Introduction to Research Methods in Psychology
	PSYC 2002 [0.5]	Introduction to Statistics in Psychology
	PSYC 2700 [0.5]	Introduction to Cognitive Psychology
	PSYC 3000 [1.0]	Design and Analysis in Psychological Research
	PSYC 3506 [0.5]	Cognitive Development
	PSYC 3700 [1.0]	Cognition (Honours Seminar)
	PSYC 3702 [0.5]	Perception
	PSYC 2307 [0.5]	Human Neuropsychology I
	PSYC 3307 [0.5]	Human Neuropsychology II

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

and CHEM 1007

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives CHEM (Chemistry) except CHEM 1003, CHEM 1004

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and

ERTH 2415. Earth Sciences students may use

ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

BIOL 4810 [0.5]	Education Research in Undergraduate Science
CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs

CHEM 1004 [0.5]	Drugs and the Human Body
CHEM 1007 [0.5]	Chemistry of Art and Artifacts
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
ERTH 2415 [0.5]	Natural Disasters
ISCI 1001 [0.5]	Introduction to the Environment
ISCI 2000 [0.5]	Natural Laws
ISCI 2002 [0.5]	Human Impacts on the Environment
PHYS 1901 [0.5]	Planetary Astronomy

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I
MATH 1402 [0.5]	Elementary Mathematics for Economics II
-II 0000 lavel accom	

all 0000-level courses

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option,

please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position:
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team:
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.Sc. Honours Food Science: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to the following:

- Registered as a full-time student in the B.Sc. Honours Food Science program;
- 2. Obtained third-year standing;
- 3. Successfully completed, by the start-date of the first work term, 1.5 credits from FOOD 3001, FOOD 3002, FOOD 3005, FOOD 3003, and FOOD 4001;
- Obtained an Overall CGPA of at least 6.50 and a Major CGPA of at least 8.00. These CGPAs must be maintained throughout the duration of the degree.

B.Sc. Honours Food Science students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also

require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- · B.Sc. (Honours)
- · B.Sc. (Major)
- · B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus

and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op Option Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Food Science (FOOD) Courses

FOOD 1001 [0.5 credit]

Introduction to Food Science

Overview of the food industry. Production, processing, product development, packaging, chemistry, analysis, microbiology. Elements risk assessment, policy making and regulation.

Lectures three hours a week.

FOOD 2001 [0.5 credit] **Principles of Nutrition**

Roles of nutrients, lipids, proteins, carbohydrates, fluids and electrolytes. Digestion, absorption, transport, energy metabolism. Disorders including diabetes, cardiovascular disease and osteoporosis. Nutrition through the life cycle. Prerequisite(s): CHEM 1002, BIOL 1103. Lectures three hours a week.

FOOD 2002 [0.5 credit]

Food Processing

Principles of major techniques used in food processing and preservation. Processing of specific food groups including cereals, oilseeds, dairy, beverages and frozen foods. Effects of processing on physico-chemical, rheological, and sensory characteristics. Role of research and development in food industry.

Prerequisite(s): FOOD 1001. Lectures three hours a week.

FOOD 2003 [0.5 credit]

Regulation of the Canadian Food Industry

Regulation of the Canadian food industry including regulators, regulatory powers, the process of enacting laws/regulation and food safety requirements. Food composition, standardization, advertising, labeling, packaging, ingredients, additives, and fortification requirements. Inspection, enforcement and compliance powers and policies.

Prerequisite(s): Second year standing. Lectures three hours per week.

FOOD 2004 [0.5 credit]

Scientific Communication in Food Science

Principles of effective scientific communication for scientific and non-scientific audiences. Applicable to laboratory reports, literature reviews, posters, presentations, and briefing notes.

Includes: Experiential Learning Activity Prerequisite(s): FOOD 1001 or second-year standing in Food Science or Chemistry. Workshop four hours a week.

FOOD 3001 [0.5 credit] **Food Chemistry**

Chemistry of the major components of foods such as proteins, lipids, carbohydrates and of the minor components such as enzymes, vitamins and various additives and their relationships to food stability and degradation.

Includes: Experiential Learning Activity Prerequisite(s): FOOD 1001, FOOD 2001, CHEM 2204, BIOC 2200.

Lectures three hours a week and laboratory three hours a

FOOD 3002 [0.5 credit] **Food Analysis**

In-depth principles and practices of food proximate analysis. Introductory concepts of food adulteration and detection. Major techniques such as chromatography, colorimetry, spectroscopy, rheology.

Includes: Experiential Learning Activity

Prerequisite(s): FOOD 3001.

Lectures three hours a week, laboratory three hours a week.

FOOD 3003 [0.5 credit] Food Packaging and Shelf Life

An introduction to the materials used for food packaging, including their chemical and physical characteristics. Interactions of these materials with food products, and their effects on shelf life of food.

Prerequisite(s): FOOD 2002. Lectures three hours a week.

FOOD 3005 [0.5 credit] Food Microbiology

Foodborne diseases, microbial growth and survival, food spoilage, food fermentation. Techniques for detecting and quantifying microorganisms in foods.

Includes: Experiential Learning Activity
Prerequisite(s): FOOD 1001, FOOD 2001, BIOL 2303.
Lectures three hours a week, laboratory three hours a week.

FOOD 3006 [0.5 credit] Upcycling and Sustainable Food Systems

Food processing and upcycling in the context of sustainable food systems. Case studies to assess social, economic, and environmental impacts of food processing and upcycling on communities and the food industry. Transdisciplinary perspectives to propose a food rescue product.

Includes: Experiential Learning Activity
Prerequisite(s): third year standing in a BSc or BHSc

Workshop 3 hours a week.

FOOD 3999 [0.0 credit] Co-operative Work Term

Provides practical experience for students enrolled in the Co-operative option. Students must receive satisfactory evaluations from their work term employer. Written and oral reports will be required. Graded as Sat or Uns. Includes: Experiential Learning Activity

Prerequisite(s): Registration in the Food Science
Co-operative Education option and permission of the Department.

Work term.

FOOD 4001 [0.5 credit] Food Quality Control

Factors affecting quality in manufacturing and processing of foods and principles of quality control and quality assurance. Sampling plans and statistical methods. Applications of physical, chemical, biological and microbiological tests in quality control. Quality systems and standards.

Prerequisite(s): FOOD 2002, FOOD 2003, and third or fourth year standing.

Also offered at the graduate level, with different requirements, as FOOD 5104, for which additional credit is precluded.

Lectures three hours a week.

FOOD 4002 [0.5 credit] Analysis of Food Contaminants

Official methods to identify food contaminants and adulterated foods. Includes agricultural chemicals, veterinary drugs, toxins, metals, and allergens. Interpretation of results in the context of current Canadian and international food safety regulations. Includes: Experiential Learning Activity
Prerequisite(s): BIOC 3101 or CHEM 3205 or CHEM 3305, and third or fourth year standing. Laboratory four hours per week, tutorial one hour a week.

FOOD 4102 [0.5 credit] Current Issues in Canadian Food Governance, Regulation and Policy

Focus on the ever-changing and evolving issues in Canadian food governance, regulation and policy. Topical food safety, governance, policies, enforcement, trade and import/export issues and developments.

Prerequisite(s): FOOD 2003, and third or fourth year standing.

Lectures three hours a week.

FOOD 4103 [0.5 credit] Food Safety Risk Assessment

The role of risk management in providing science-based approaches to solving food safety problems. Risk management models and practical applications in critical risk management. An examination of actual risk assessments. Risk communication is addressed. Prerequisite(s): BIOC 3101, and third or fourth-year standing.

Lectures three hours a week.

FOOD 4201 [0.5 credit]

Advanced Nutrition and Metabolism

Metabolism of macronutrients in the human body. Detailed catabolic and anabolic reactions of carbohydrates, lipids and proteins. Regulatory control points in healthy and diseased states. Discussion of the literature pertaining to nutrition, metabolism and chronic disease.

Prerequisite(s): FOOD 2001, BIOC 3101 and fourth year standing.

Also offered at the graduate level, with different requirements, as FOOD 5101, for which additional credit is precluded.

Lectures three hours a week.

FOOD 4202 [0.5 credit] Micronutrients and Health

Use of scientific literature to examine human metabolism of vitamins and minerals and associated diseases throughout the life cycle. Development of advanced scientific literacy skills, with an emphasis on systematic reviews.

Prerequisite(s): BIOC 2200 or BIOL 2200 and third- or fourth-year standing.

Lectures three hours a week.

FOOD 4203 [0.5 credit]

Functional Foods and Natural Health Products

Study of the bioactive components of functional foods and natural health products, for the improvement of health and nutrition. Sources and chemistry of bioactives, mechanisms of actions, process technology, efficacy and safety. Role of research and development in industry in commercialization of new products.

Prerequisite(s): BIOC 2200 or BIOL 2200 or BIOL 2201, and third or fourth year standing.

Also offered at the graduate level, with different requirements, as FOOD 5105, for which additional credit is precluded.

Lectures three hours a week.

FOOD 4905 [1.0 credit] Food Science Honours Workshop

Active learning in areas that include information literacy, critical evaluation of scientific literature, written and oral communication, evaluation and interpretation of results, statistics and data management. Emphasizes transferable skills that are most appropriate for non-research career paths.

Includes: Experiential Learning Activity
Precludes additional credit for FOOD 4907, FOOD 4908.
Prerequisite(s): Fourth-year standing in Food Science and a minimum of 1.5 credits in FOOD at the 3000 level.
Workshop three hours a week.

FOOD 4907 [1.0 credit]

Food Science Honours Essay and Research Proposal

Students conduct an independent research study using library resources, and prepare a critical review and study proposal on a topic approved by a faculty supervisor. A written report and an oral poster presentation of the work are required before a grade can be assigned.

Includes: Experiential Learning Activity

Precludes additional credit for FOOD 4905, FOOD 4908, CHEM 4907 and CHEM 4908.

Prerequisite(s): Fourth-year standing in the Food Science program, a minimum of 1.5 credits in FOOD at the 3000 level, minimum Major CGPA of 8.0, and permission of the department.

FOOD 4908 [1.0 credit]

Food Science Research Project

Students in Food Science carry out a research project under the direction of a faculty member. A written report and an oral presentation of the work are required before a grade can be assigned.

Includes: Experiential Learning Activity

Precludes additional credit for FOOD 4905, FOOD 4907, CHEM 4907 and CHEM 4908.

Prerequisite(s): Fourth-year standing in the Food Science program, a minimum of 1.5 credits in FOOD at the 3000 level, minimum Major CGPA of 8.0, and permission of the department.

Laboratory and associated work equivalent to at least eight hours per week for two terms.

Notes:

 Students exempted from courses in Item 1 must replace it with another FREN course.

French Oral Proficiency Examination

Students who wish to graduate with a French B.A. (15 credits), French B.A. Honours or French B.A. Combined Honours must pass an oral examination to demonstrate their proficiency in spoken French. The examination normally takes place during the third year for students in the 15-credit program and during the third or fourth year for students in the B.A. Honours. Students have the option of repeating the examination in future semesters.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies

· Human Rights

1.0

· Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be Eligible to Continue (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor. Concentration. or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be Eligible to Continue (EC) and is subject to any specific requirements of the intended Minor. Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the Academic Regulations of the University.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 2. 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 2. 1.0 credit devoted to the history and culture of French Canada:

3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the Mention: français requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the Academic Regulations of the University section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- Failure to attend all interviews for positions to which the student has applied;
- 3. Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours French: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.A. Honours French program;
- 2. Successfully completed 5.0 or more credits;
- 3. Successfully completed, by the start-date of the first work term, FREN 2401, FREN 2202, and FREN 2203;
- 4. Obtained an Overall CGPA of at least 8.00 and a Major CGPA of at least 9.00. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours French students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing

will be granted only for those courses that are determined to be appropriate.

French Interdisciplinary Studies (FINS) Courses

These courses are intended to meet the needs of a broad range of students who are interested in expanding their knowledge of the French-language presence in other disciplines, or in improving their passive knowledge of written and spoken French (reading and listening) with a view to applying this knowledge in other disciplines.

Some FINS courses are offered with English as the language of instruction.

French Placement for Language Students

Students who have not previously taken a course in the French Department must complete the Placement Test on Carleton Central before registering as per instructions received through their Carleton e-mail account. Students should note that they cannot go backward in a sequence of levels in language courses. Students desiring a French credit to satisfy the language requirement of their department or school should consult that department or school.

FINS 2105 [0.5 credit] French Reading I

Development of reading skills in French, especially relating to academic texts. Basic French grammar and vocabulary. Given in English. Not recommended for first-year students. No auditors. Course may be taken concurrently with FREN 1001 or FREN 1002.

Prerequisite(s): placement test on Carleton Central or permission of the Department.

Offered online, asynchronous, weekly progression.

FINS 2205 [0.5 credit] Oral Comprehension I

Training in basic comprehension of spoken French, through the study of selected and edited video and audio material. Oral documents in French; analyses, discussion, reporting and testing in English. No auditors.

Prerequisite(s): permission of the Department.

FINS 2511 [0.5 credit]

Introduction à la société et à la culture québécoises (version française)

Ce cours exclusivement en ligne permettra de découvrir et d'analyser des référents dominants de la trame historique du Québec de même que les débats entourant l'identité et le nationalisme et les relations avec le Canada anglais.

Also listed as CDNS 2510/FINS 2510 (in English), CDNS 2511.

Precludes additional credit for CDNS 2510 and FINS 2510.

Prerequisite(s): niveau de deuxième année ou permission de L'École d'études canadiennes.

Exclusivement en ligne. Équivalent d'un cours de trois heures par semaine, accessible toute la semaine.

FINS 3105 [0.5 credit] French Reading II

Reading knowledge for academic purposes. Advanced reading strategies. Individual reading in the student's specialization. Given in English. Not recommended for first-year students. No auditors. Course may be taken concurrently with FREN 1100.

Prerequisite(s): placement test on Carleton Central or FINS 2105 or permission of the Department.

Offered online, asynchronous, weekly progression.

FINS 3205 [0.5 credit] Oral Comprehension II

Advanced training and practice in the comprehension of authentic oral materials in French. Individual assignments in the student's specialization. Oral documents in French; analysis, discussion, reporting and testing in English and French. No auditors.

Prerequisite(s): FINS 2205 or permission of the Department.

FINS 3405 [0.5 credit]

French for Special or Professional Purposes I

Topics may vary from year to year. Consult the Web site. Prerequisite(s): permission of the Department.

FINS 3406 [0.5 credit]

French for Special or Professional Purposes II

Topics may vary from year to year. Consult the Web site. Prerequisite(s): permission of the Department.

FINS 3407 [0.5 credit]

French for Special or Professional Purposes III

Topics may vary from year to year. Consult the Web site. Prerequisite(s): permission of the Department.

FINS 3801 [0.5 credit] Selected Topics in French A

Students may take a third-year course offered in the Department of French while submitting course work in English. This course does not count towards any degree program in French.

Prerequisite(s): third-year standing and permission of the Department.

Hours to be determined.

FINS 4801 [0.5 credit] Selected Topics in French A

Students may take a fourth- or fifth-year special topic seminar offered in the Department of French while submitting written work in English. This course does not count towards credit in any degree program in French. Prerequisite(s): fourth-year standing or permission of the Department.

Hours to be determined.

FINS 4802 [0.5 credit] Selected Topics in French B

Students may take a fourth- or fifth-year special topic seminar offered in the Department of French while submitting written work in English. This course does not count towards credit in any degree program in French. Prerequisite(s): fourth-year standing or permission of the Department.

Hours to be determined.

French (FREN) Courses

French Placement for Language Students

Students who have not previously taken a course in the French Department must complete the Placement Test on Carleton Central before registering, as per instructions received through their Carleton e-mail account. Students should note that they cannot go backward in a sequence of levels in language courses.

Students desiring a French credit to satisfy the language requirement of their department or school should consult that department or school.

FREN 1001 [1.0 credit]

French 1

This course is designed for absolute beginners in the language. Classes use audio-visual methods, and emphasis is given to the spoken language. Introduction to reading and writing. Compulsory attendance. Limited enrolment. No auditors. Oral interaction required. Prerequisite(s): placement test on Carleton Central before registering.

Lecture three hours a week.

FREN 1002 [1.0 credit] French 2

Taught in French for students who had exposure to French but have difficulty using it in day-to-day communication. Emphasis on oral expression and comprehension; development of reading and writing skills. Presentations, interviews, cultural activities, grammar. Compulsory attendance, participation. Limited enrolment. No auditors. Oral interaction required.

Prerequisite(s): Grade of C or higher in FREN 1001 or placement test on Carleton Central before registering. Lecture three hours a week.

FREN 1050 [0.5 credit]

Le français en classe et dans le monde

The development of written and oral communication skills, as well as research and study skills, through an introduction to the diversity of the French language and francophone literatures and cultures. Conducted in French with some workshops in English.

Prerequisite(s): Grade of C or higher in FREN 1100 or FREN 1110 or placement test on Carleton Central before registering. Restricted to students in first and second year. Seminars three hours per week.

FREN 1100 [1.0 credit] French 3

Taught in French. Emphasis on speaking, listening, reading and writing skills. Oral presentations, discussions, interviews, reading of novels and magazine articles, listening activities, grammar exercises, compositions. Attendance and participation are compulsory. Limited enrolment. No auditors. Oral interaction required. Precludes additional credit for FREN 1110. Prerequisite(s): Grade of C or higher in FREN 1002 or placement test on Carleton Central before registering. Lecture three hours a week.

FREN 1110 [1.0 credit]

French 3: Writing

Taught in French. For students with high oral proficiency and low intermediate writing skills. Improvement of spelling, grammar, sentence-structure, and vocabulary. Study of the processes involved in the production of a variety of texts. Use of references. Self-correction. Limited enrolment. No auditors. Oral interaction required. Precludes additional credit for FREN 1100. Prerequisite(s): Grade of C or higher in FREN 1002 or placement test on Carleton Central before registering. Lecture three hours a week.

FREN 2100 [1.0 credit]

French 4

Taught in French. For non-francophone students. Advanced speaking, listening, reading and writing skills. Advanced level reading from various sources, including literary texts. Grammar exercises, essays, oral presentations. Attendance and participation are compulsory. Limited enrolment. No auditors. Oral interaction required.

Precludes additional credit for FREN 2110.

Prerequisite(s): Grade of C or higher in FREN 1100 or FREN 1110 or placement test on Carleton Central before

registering.

Lectures three hours a week.

FREN 2110 [1.0 credit] French 4: Writing

Taught in French. For students with intermediate French writing skills. Refinement of spelling, grammar, sentence-structure and vocabulary; accuracy and textual organization. Essay-writing. Use and referencing of various sources. Self-correction. Attendance and participation compulsory. Limited enrolment. No auditors. Oral interaction required.

Precludes additional credit for FREN 2100.

Prerequisite(s): Grade of C or higher in FREN 1100 or FREN 1110 or placement test on Carleton Central before registering.

Lectures three hours a week.

FREN 2202 [0.5 credit]

Introduction aux études littéraires: œuvres françaises et francophones

Survol historique des littératures d'expression française: principaux auteurs, grands mouvements, évolution des genres. Initiation aux méthodes et notions d'analyse littéraire.

Precludes additional credit for FREN 2201.

Prerequisite(s): FREN 1100 or FREN 1110 with a grade of C or higher or permission of the Department. This course may be taken concurrently with FREN 2100 or FREN 2110.

Cours trois heures par semaine.

FREN 2203 [0.5 credit]

Introduction aux études littéraires: œuvres québécoises et canadiennes

Survol historique des littératures d'expression française au Québec et au Canada: principaux auteurs, grands mouvements, évolution des genres. Initiation aux méthodes et notions d'analyse littéraire.

Precludes additional credit for FREN 2201.

Prerequisite(s): FREN 1100 or FREN 1110 with a grade of C or higher or permission of the Department. This course may be taken concurrently with FREN 2100 or

Cours trois heures par semaine.

FREN 2401 [1.0 credit]

FREN 2110.

Introduction à la linguistique française

Étude de la structure et du fonctionnement du système linguistique à travers l'analyse de données du français (de France et du Canada). La construction du sens, des sons au discours; code oral et écrit.

Prerequisite(s): FREN 1100 or FREN 1110 with a grade of C or higher or permission of the Department. This course may be taken concurrently with FREN 2100 or FREN 2110.

Cours trois heures par semaine.

FREN 2701 [0.5 credit]

Travaux pratiques en français oral

Travaux pratiques pour développer l'aisance et la fluidité dans l'expression orale. This course is not suitable for francophones or students returning from exchange. No auditors.

Prerequisite(s): Grade of C or higher in FREN 1100 or FREN 1110 or placement test on Carleton Central before registering.

Cours trois heures par semaine.

FREN 3050 [0.5 credit] Compétences critiques

Initiation aux techniques et pratiques de la réflexion universitaire : documentation (bibliothèque, bases de données, bibliographies critiques), lecture (analyse, synthèse et évaluation critique de textes de savoir) et réflexion (cadre théorique, méthode d'analyse, pratique du discours raisonné).

Prerequisite(s): FREN 2202, FREN 2203 and FREN 2401, or permission of the Department.

FREN 3060 [0.5 credit]

Perfectionnement de la grammaire par la pratique

Analyse et pratique réfléchie des formes de la grammaire dans le discours: Structures des phrases, marques d'accord, concordance des temps, prépositions et compléments, homonymie et homographie, faux amis et anglicismes. Développement des techniques efficaces d'autocorrection et maîtrise d'outils informatisés. Prerequisite(s): FREN 2202 and FREN 2203 or FREN 2401, or permission of the Department. Cours trois heures par semaine.

FREN 3212 [0.5 credit]

Des manuscrits aux belles-lettres : de la littérature médiévale à l'humanisme

Étude d'une sélection de textes, tirés de divers genres, permettant d'explorer les origines de la littérature française : oralité et écriture; chansons de geste; courtoisie; récits de voyages; littérature de la cour; humanisme. Différentes approches théoriques du texte littéraire

Prerequisite(s): FREN 2202 and FREN 2203 or permission of the Department.

Cours trois heures par semaine.

FREN 3213 [0.5 credit] Du Baroque aux Lumières

Étude des 17e et 18e siècles : raison et universalisme, encyclopédisme, construction et représentation de l'altérité, colonialisme et esclavagisme. Analyse d'importants développements littéraires : essai et conte philosophiques, théâtre et critique sociale, évolution du discours romanesque. Approches théoriques du texte littéraire.

Prerequisite(s): FREN 2202 and FREN 2203 or permission of the Department.

Cours trois heures par semaine.

FREN 3214 [0.5 credit]

Révolutions, avant-gardes et ruptures : du 19e siècle aux années 1950

Étude de quelques grands mouvements ayant rythmé la vie des lettres francophones : romantisme, réalisme, naturalisme, symbolisme, surréalisme, modernisme.

La littérature de la décolonisation et l'émergence de la littérature canadienne-française. Analyse des genres et de leur évolution. Approches théoriques du texte littéraire.

Prerequisite(s): FREN 2202 and FREN 2203 or permission of the Department.

Cours trois heures par semaine.

FREN 3215 [0.5 credit]

Les ères du soupçon : contemporanéités de la littérature

Études des principales orientations définissant les littératures francophones contemporaines depuis la fin de la Seconde Guerre mondiale : littérature engagée, existentialisme, nouveau roman. Littérature du Québec et du Canada français. Littératures postcoloniales, émergentes, transnationales. Approches théoriques du texte littéraire.

Prerequisite(s): FREN 2202 and FREN 2203 or permission of the Department.

Cours trois heures par semaine.

FREN 3216 [0.5 credit] Problématique littéraire

Étude approfondie d'une problématique dans le champ des études littéraires. Lectures critiques, réflexion théorique et études d'œuvres littéraires. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): FREN 2202 and FREN 2203, or permission of the Department. Cours trois heures par semaine.

FREN 3217 [0.5 credit] Oeuvre et auteur-e(s)

Étude approfondie d'un(e) auteur(e) ou groupe d'auteur(e)s et de leur œuvre. Lectures critiques, théoriques et littéraires. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes. Prerequisite(s): FREN 2202 and FREN 2203, or permission of the Department. Cours trois heures par semaine.

FREN 3218 [0.5 credit] Genre et mouvement

Étude approfondie d'un genre ou mouvement littéraire. Conditions d'émergence (contextes: historique, social, artistique, etc). Textes théoriques et manifestes. Principaux représentants. Influence (continuations, ruptures). Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): FREN 2202 and FREN 2203, or permission of the Department. Cours trois heures par semaine.

FREN 3219 [0.5 credit]

Littératures canadiennes de langue française

Étude approfondie d'un(e) auteur(e) ou groupe d'auteur(e)s canadien(ne)s et de leurs œuvres de langue française. Lectures critiques, théoriques et littéraires. Contenu variable selon les années: consulter le site web du département de français. Repeatable for credit when topic changes.

Prerequisite(s): FREN 2202 and FREN 2203 or permission of the Department.

Cours trois heures par semaine.

FREN 3251 [0.5 credit]

Introduction aux méthodes d'analyse littéraire

Présentation et application de diverses approches théoriques du texte littéraire ou étude approfondie d'une approche théorique particulière (analyses structurelles, méthodes d'interprétation, contextualisation sociohistorique, poétique, etc.).

Prerequisite(s): FREN 2202 and FREN 2203, or permission of the Department.

Cours trois heures par semaine.

FREN 3310 [0.5 credit]

Sujet choisi en français

Étude d'un thème particulier en français et études francophones. Le contenu varie selon l'année : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): one FREN course at the 2000-level, or permission of the Department.

Cours trois heures par semaine.

FREN 3411 [0.5 credit]

Phonétique et phonologie du français

Étude empirique et théorique des éléments et systèmes phonétiques et phonologiques du français. Processus segmentaux et suprasegmentaux, structures syllabiques et prosodiques. Problèmes classiques de la phonologie française.

Prerequisite(s): FREN 2401 or permission of the Department.

Cours trois heures par semaine.

FREN 3412 [0.5 credit]

Morphologie du français

Étude de la forme des unités lexicales et grammaticales du français et de leur portée signifiante. Analyse du système flexionnel du français et des mécanismes de formation des mots.

Prerequisite(s): FREN 2401 or permission of the Department.

Cours trois heures par semaine.

FREN 3413 [0.5 credit]

Syntaxe du français

Études de la structure et des composantes de la phrase: mots et syntagmes. Analyse syntaxique de la phrase simple et complexe. Modèle hiérarchique de l'organisation de la phrase.

Prerequisite(s): FREN 2401 or permission of the Department.

Cours trois heures par semaine.

FREN 3414 [0.5 credit]

Sociolinguistique du français

Le français, une réalité hétérogène. Approche variationniste, qualitative et quantitative, de l'étude du français dans ses dimensions dialectales, sociales et stylistiques. Variations intra-individuelles et entre individus. Facteurs externes de la variation interne du français. Diversités du français.

Prerequisite(s): FREN 2401 or permission of the Department.

Cours trois heures par semaine.

FREN 3415 [0.5 credit]

Histoire du français

Évolution interne de l'histoire du français et de ses influences externes. De sa naissance, présumée et réelle, à ses états actuels. Les langues contributrices. Contacts linguistiques. Dynamiques du changement linguistique. Véhicularisation et vernacularisation. Idéologies de la langue française.

Prerequisite(s): FREN 2401 or permission of the Department.

Cours trois heures par semaine.

FREN 3416 [0.5 credit]

Le français dans le monde

Présentation des variétés de français parlé dans le monde, principalement à l'extérieur du Canada. Étude des aspects historiques et sociopolitiques de la diffusion du français. Analyse des traits linguistiques propres aux variétés. Colonisation, créolisation, emprunt linguistique, variation régionale, aménagement linguistique. Prerequisite(s): FREN 2401 or permission of the Department.

Cours trois heures par semaine.

FREN 3417 [0.5 credit]

Le français au Canada

Présentation des variétés de français parlé au Canada. Étude des aspects historiques et sociopolitiques de l'implantation du français en Nouvelle-France. Variétés laurentienne et acadienne. Analyse des traits linguistiques. Enjeux sociolinguistiques. Contact des langues, bilinguisme, minorités linguistiques.

Prerequisite(s): FREN 2401 or permission of the Department.

FREN 3451 [0.5 credit]

Thème en linguistique

Étude d'un thème particulier en linguistique française. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): FREN 2401 or permission of the Department.

Cours trois heures par semaine.

FREN 3511 [0.5 credit]

Expression écrite et traduction

Perfectionnement de l'expression écrite au moyen d'un apprentissage appliqué de la traduction.

Analyses des principales interférences syntaxiques, sémantiques et discursives entre le français et l'anglais. Approfondissement des pratiques de textualisation: cohérence et cohésion, idiomatisation, registres, paraphrase, considérations stylistiques, etc. Approche privilégiant le texte pragmatique.

Prerequisite(s): one FREN course at the 2000-level, or permission of the Department.

Cours trois heures par semaine.

FREN 3701 [0.5 credit]

Français oral

Techniques avancées d'expression orale. This course is not suitable for francophones. This course is suitable for students returning from exchange. No auditors. Prerequisite(s): one FREN course at the 2000-level, or permission of the Department. Cours trois heures par semaine.

FREN 3702 [0.5 credit]

Français écrit

Techniques avancées d'expression écrite. No auditors. Prerequisite(s): one FREN course at the 2000-level, or permission of the Department.

Cours trois heures par semaine.

FREN 3900 [0.5 credit]

Apprentissage et enseignement du français langue seconde

Initiation aux études des programmes au Canada et ailleurs. Processus d'acquisition des habiletés d'expression et de compréhension. Survol des théories passées et actuelles. Appréciation et critique de pratiques pédagogiques.

Prerequisite(s): one FREN course at the 2000-level, or permission of the Department.

Cours trois heures par semaine.

FREN 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

FREN 4060 [0.5 credit]

Projet de recherche supervisé

Développement d'un projet individuel supervisé en littérature ou en linguistique, amorcé dans un cours antérieur de 4e année. Raffinement de l'expression et des idées. Présentation publique des résultats.

Prerequisite(s): fourth-year standing in the BA Honours in French, FREN 3050 and one FREN course at the 4th year level.

Unscheduled

FREN 4212 [0.5 credit]

Littératures francophones

Analyse de problématiques liées à la francophonie littéraire. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): FREN 2202, FREN 2203 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5212, for which additional credit is precluded.

Cours trois heures par semaine.

FREN 4213 [0.5 credit]

Littérature québécoise et canadienne d'expression française

Étude approfondie portant sur un ou plusieurs aspects des littératures d'expression française au Canada. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): FREN 2202, FREN 2203 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5213, for which additional credit is precluded.

Cours trois heures par semaine.

FREN 4214 [0.5 credit]

Genre et mouvement

Étude approfondie d'un thème, d'un mouvement, d'un genre dans le champ littéraire. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): FREN 2202, FREN 2203 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5214, for which additional credit is precluded.

FREN 4215 [0.5 credit]

Problématiques contemporaines

Étude de questions contemporaines dans le domaine littéraire. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Prerequisite(s): FREN 2202, FREN 2203 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5215, for which additional credit is precluded.

Cours trois heures par semaine.

FREN 4300 [0.5 credit]

Experiential Learning in French and Francophone Studies

Thème choisi en langue, littérature ou linguistique. Application des habiletés linguistiques en contexte francophone. Le thème et le lieu peut varier d'une année à l'autre, consulter le site du Département de français pour plus de détails.

Includes: Experiential Learning Activity Prerequisite(s): FREN 2202 and FREN 2203, or FREN 2401, depending on the topic, and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5501, for which additional credit is precluded.

FREN 4301 [0.5 credit]

Experiential learning: Séminaire d'été à Québec

Exploration de la ville de Québec, de sa portée historique et culturelle et de l'importance de sa littérature. Applications des habiletés linguistiques en contexte, visites, discussions et réflexions.

Includes: Experiential Learning Activity

Precludes additional credit for FREN 4300 if taken before

Prerequisite(s): FREN 2202, FREN 2203 and FREN 3050, or permission of the Department. Also offered at the graduate level, with different requirements, as FREN 5502, for which additional credit is precluded.

Cours trois heures par semaine.

FREN 4412 [0.5 credit]

Diversité du français

Études des variétés du français, dans ses dimensions spatiales. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Also listed as LING 4412.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5412 and LING 5412, for which additional credit is precluded.

Cours trois heures par semaine.

FREN 4413 [0.5 credit] Diachronie du français

Étude du français, dans ses dimensions historiques. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Also listed as LING 4413.

Prerequisite(s): FREN 2401 and FREN 3050, or

permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5413 and LING 5413, for which additional credit is precluded.

Cours trois heures par semaine.

FREN 4414 [0.5 credit]

Analyse du français

Étude du français, dans ses dimensions morphologiques, syntaxiques ou phonologiques. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Also listed as LING 4414.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the department.

Also offered at the graduate level, with different requirements, as FREN 5414 and LING 5414, for which additional credit is precluded.

Cours trois heures par semaine.

FREN 4415 [0.5 credit]

Variation du français

Étude des variations internes de la langue, dans ses dimensions orales et écrites. Contenu variable selon les années : consulter le site web du département de français. Repeatable for credit when the topic changes.

Also listed as LING 4415.

Prerequisite(s): FREN 2401 and FREN 3050, or permission of the Department.

Also offered at the graduate level, with different requirements, as FREN 5415 and LING 5415, for which additional credit is precluded.

FREN 4511 [0.5 credit]

Traduction: méthodologie et pratique

Initiation à différents principes et approches méthodologiques de la traduction. Analyse de texte appliquée à la traduction, repérage raisonné des difficultés, typologie des fautes de traduction, étude de divers procédés, documentation, terminologie et révision. Approche privilégiant une typologie textuelle variée. Prerequisite(s): FREN 3511 or permission of the Department.

Cours trois heures par semaine.

FREN 4801 [1.0 credit] **Tutorial A**

Special topics in an aspect of French studies under the supervision of a faculty member. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration. Prerequisite(s): fourth-year standing or permission of the Department.

Hours to be determined.

FREN 4802 [0.5 credit] **Tutorial B**

Special topics in an aspect of French studies under the supervision of a faculty member. Note: Students who wish to enrol in a tutorial course must consult the Undergraduate Supervisor, before registration. Prerequisite(s): fourth-year standing or permission of the Department.

Hours to be determined.

FREN 4900 [0.5 credit]

Thème choisi en apprentissage et enseignement du français langue seconde

Approfondissement de considérations théoriques et pratiques reliées à l'enseignement et l'apprentissage du français comme langue seconde. Analyse de composantes pédagogiques générales et en contexte, applications didactiques. Évaluation, critères et standards. Le contenu précis de ce cours varie selon les années. Consulter le site Web.

Prerequisite(s): fourth-year standing or permission of the Department.

Cours trois heures par semaine.

Geography

This section presents the requirements for programs in:

- · Geography B.A. Honours
- Geography with Concentration in Physical Geography B.A. Honours
- · Geography with Concentration in Urban Geography B.A. Honours
- · Geography B.A. Combined Honours
- · Geography B.A.

- Earth Sciences and Physical Geography B.Sc. **Combined Honours**
- · Physical Geography B.Sc. Honours
- Specialization in Globalization and the **Environment B.G.In.S. Honours**
- Stream in Globalization and the Environment B.G.In.S.
- · Minor in Geography
- · Minor in Physical Geography
- Minor in Urban Studies

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies,

Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or,
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University.*

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the *Academic Regulations of the University*, as well as being subject to any specific requirements of the intended Minor,

Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Biochemistry	
BIOC 2200 [0.5]	Cellular Biochemistry
BIOC 4001 [0.5]	Methods in Biochemistry
BIOC 4201 [0.5]	Advanced Cell Culture and Tissue
	Engineering
Biology	E 16 (B) 1
BIOL 1103 [0.5]	Foundations of Biology I
BIOL 1104 [0.5]	Foundations of Biology II
BIOL 2001 [0.5]	Animals: Form and Function
BIOL 2002 [0.5]	Plants: Form and Function
BIOL 2104 [0.5]	Introductory Genetics
BIOL 2200 [0.5]	Cellular Biochemistry
BIOL 2600 [0.5]	Ecology
Chemistry	
CHEM 1001 [0.5]	General Chemistry I
CHEM 1002 [0.5]	General Chemistry II
CHEM 2103 [0.5]	Physical Chemistry I
CHEM 2203 [0.5]	Organic Chemistry I
CHEM 2204 [0.5]	Organic Chemistry II
CHEM 2302 [0.5]	Analytical Chemistry I
CHEM 2303 [0.5]	Analytical Chemistry II
CHEM 2800 [0.5]	Foundations for Environmental Chemistry
Earth Sciences	
ERTH 1002 [0.5]	The Earth and Life Odyssey: A Journey Through Billions of Years
ERTH 2102 [0.5]	Mineralogy to Petrology
ERTH 2404 [0.5]	Engineering Geoscience
ERTH 2802 [0.5]	Field Geology I
ERTH 3111 [0.5]	Vertebrate Evolution: Mammals, Reptiles, and Birds
ERTH 3112 [0.5]	Vertebrate Evolution: Fish and Amphibians
ERTH 3204 [0.5]	Mineral Deposits
ERTH 3205 [0.5]	Physical Hydrogeology
Food Sciences	
FOOD 3001 [0.5]	Food Chemistry
FOOD 3002 [0.5]	Food Analysis
FOOD 3005 [0.5]	Food Microbiology
Geography	
GEOG 1010 [0.5]	Global Environmental Systems
GEOG 3108 [0.5]	Soil Properties
Neuroscience	
NEUR 3206 [0.5]	Sensory and Motor Neuroscience
NEUR 3207 [0.5]	Systems Neuroscience
NEUR 4600 [0.5]	Advanced Lab in Neuroanatomy
Physics	
PHYS 1001 [0.5]	Foundations of Physics I

PHYS 1003 [0.5]	Introductory Mechanics and Thermodynamics
PHYS 1004 [0.5]	Introductory Electromagnetism and Wave Motion
PHYS 1007 [0.5]	Elementary University Physics I
PHYS 1008 [0.5]	Elementary University Physics II
PHYS 2202 [0.5]	Wave Motion and Optics
PHYS 2604 [0.5]	Modern Physics I
PHYS 3007 [0.5]	Third Year Physics Laboratory: Selected Experiments and Seminars
PHYS 3606 [0.5]	Modern Physics II
PHYS 3608 [0.5]	Modern Applied Physics

Course Categories for B.Sc. Programs

Science Geography Courses

GEOG 1010 [0.5]	Global Environmental Systems
GEOG 2006 [0.5]	Introduction to Quantitative Research
GEOG 2013 [0.5]	Weather and Water
GEOG 2014 [0.5]	The Earth's Surface
GEOG 3003 [0.5]	Quantitative Geography
GEOG 3010 [0.5]	Field Methods in Physical Geography
GEOG 3102 [0.5]	Geomorphology
GEOG 3103 [0.5]	Watershed Hydrology
GEOG 3104 [0.5]	Principles of Biogeography
GEOG 3105 [0.5]	Climate and Atmospheric Change
GEOG 3106 [0.5]	Aquatic Science and Management
GEOG 3108 [0.5]	Soil Properties
GEOG 4000 [0.5]	Field Studies
GEOG 4005 [0.5]	Directed Studies in Geography
GEOG 4013 [0.5]	Cold Region Hydrology
GEOG 4017 [0.5]	Global Biogeochemical Cycles
GEOG 4101 [0.5]	Two Million Years of Environmental Change
GEOG 4103 [0.5]	Water Resources Engineering
GEOG 4104 [0.5]	Microclimatology
GEOG 4108 [0.5]	Permafrost

Science Psychology Courses

,	Science Psychology Courses					
	PSYC 2001 [0.5]	Introduction to Research Methods in Psychology				
	PSYC 2002 [0.5]	Introduction to Statistics in Psychology				
	PSYC 2700 [0.5]	Introduction to Cognitive Psychology				
	PSYC 3000 [1.0]	Design and Analysis in Psychological Research				
	PSYC 3506 [0.5]	Cognitive Development				
	PSYC 3700 [1.0]	Cognition (Honours Seminar)				
	PSYC 3702 [0.5]	Perception				
	PSYC 2307 [0.5]	Human Neuropsychology I				
	PSYC 3307 [0.5]	Human Neuropsychology II				

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives CHEM (Chemistry) except CHEM 1003, CHEM 1004 and CHEM 1007

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902,

PHYS 1905, PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

BIOL 4810 [0.5]	Education Research in Undergraduate Science
CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
CHEM 1004 [0.5]	Drugs and the Human Body
CHEM 1007 [0.5]	Chemistry of Art and Artifacts
ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
ERTH 2415 [0.5]	Natural Disasters
ISCI 1001 [0.5]	Introduction to the Environment
ISCI 2000 [0.5]	Natural Laws
ISCI 2002 [0.5]	Human Impacts on the Environment
PHYS 1901 [0.5]	Planetary Astronomy
PHYS 1902 [0.5]	From our Star to the Cosmos
PHYS 1905 [0.5]	Physics Behind Everyday Life
PHYS 2903 [0.5]	Physics Towards the Future

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I
MATH 1402 [0.5]	Elementary Mathematics for Economics II

all 0000-level courses

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- 5. Continuing a job search after accepting a co-op position;

- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours Geography, Geography with Concentration in Physical Geography, B.Sc. Honours Physical Geography: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- Registered as a full-time student in B.A. Honours Geography, Geography with a Concentration in Physical Geography, Geography with a Concentration in Urban Geography, or B.Sc. Honours Physical Geography;
- 2. Obtained third-year standing;
- Successfully completed, by the start-date of the first work term:
 - a. BA students: GEOG 2005, GEOG 2006 and a 0.5 credit from GEOG 3000, GEOG 3010, or GEOG 3030;
 - b. B.Sc students: GEOG 2006 and a 0.5 credit from GEOG 3000, GEOG 3010, or GEOG 3030;
- Obtained an Overall CGPA of at least 9.50 and a Major CGPA of at least 9.50. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours Geography, Geography with a Concentration in Physical Geography, Geography with a Concentration in Urban Geography, and B.Sc. Honours Physical Geography students must successfully complete three (3) work terms to obtain the Co-op Designation.

Co-op work term course: GEOG 3999 Work/Study Pattern:

Admissions Information

Admission Requirements are for the 2025-26 year only. and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than

the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Degrees

- B.Sc. (Honours)
- · B.Sc. (Major)
- B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Geography (GEOG) Courses

4000-level courses are normally restricted to students with fourth-year Honours standing. However, students with third-year standing may take 4000-level courses provided they have the necessary prerequisites, a Geography CGPA of 6.50 or better, and permission of the Department.

GEOG 1010 [0.5 credit] Global Environmental Systems

Principles, processes and interactions in the Earth's environment emphasizing the flow of energy and matter within global systems. Atmospheric and oceanic processes, earth surface processes and biogeochemical cycling. Case studies on the interaction between human activity and the natural environment.

Includes: Experiential Learning Activity Lectures three hours a week, laboratory two hours a week.

GEOG 1020 [0.5 credit] People, Places and Environments

Introduction to human geography. Examination of relationships between people, communities, society and the natural environment at local to global scales. Population change, cultural patterns, and historical, economic, political and environmental forces, including climate change, that shape human activity and experiences from place to place.

Includes: Experiential Learning Activity Also listed as ENST 1020.

Lectures two hours a week and tutorial one hour a week.

GEOG 1023 [0.5 credit]

Introduction to Cities and Urbanization

Geographies of urban experience, development, and change across an urbanizing planet. Historical and contemporary urbanization processes, patterns, and issues in and between cities and regions. The role of urbanization in producing and responding to climate change.

Includes: Experiential Learning Activity
Precludes additional credit for GEOG 2400 (no longer offered).

Lectures two hours per week and tutorials one hour per week.

GEOG 2005 [0.5 credit]

Introduction to Qualitative Research

Introduction to the research process, from generating questions to reporting results. Topics include intensive and extensive research approaches; the use of surveys, interviews and other data collection methods; the analysis of qualitative information; and the ethical dimensions of doing research with people and communities.

Includes: Experiential Learning Activity

Also listed as ENST 2005.

Prerequisite(s): 1.0 credit in GEOG or ENST at the 1000-level and second-year standing, or permission of the Department.

Lectures two hours a week, workshop two hours a week.

GEOG 2006 [0.5 credit]

Introduction to Quantitative Research

Introduction to solving problems using descriptive and inferential statistical methods. Graphical and numerical tools to describe distributions. Probability, sampling and estimates, and hypothesis testing. Fundamentals of spatial statistics and analysis.

Includes: Experiential Learning Activity

Also listed as ENST 2006.

Precludes additional credit for BIT 2000, BIT 2009, BIT 2100 (no longer offered), BIT 2300 (no longer offered), DATA 1517, ECON 2210, NEUR 2002, PSCI 2702, STAT 2507, STAT 2601, STAT 2606.

Lectures two hours a week, laboratory two hours a week.

GEOG 2013 [0.5 credit] Weather and Water

Introduction to climate, weather and the hydrological cycle. Physical properties of the atmosphere, radiation and energy balances, global circulation, atmospheric moisture and precipitation, weather systems and forecasting, mechanisms of anthropogenic climate change.

Includes: Experiential Learning Activity
Prerequisite(s): GEOG 1010 or ERTH 1002 or ISCI 1001.
Lectures three hours a week, laboratory three hours a

week.

GEOG 2014 [0.5 credit] The Earth's Surface

Introduction to geomorphology. Weathering, slope and fluvial processes within drainage basins, and glacial and periglacial processes.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 1010 or ERTH 1002 or ISCI 1001. Lectures three hours a week, laboratory three hours a week

GEOG 2020 [0.5 credit] Ecosystems of Canada

Introduction to world biomes and in-depth analysis of the characteristics and distribution of Canada's major ecosystems including the boreal forest, temperate forest, tundra, grasslands, wetlands, and aquatic environments; Current issues in ecosystem science and conservation such as climate change, agricultural management, forestry and urban ecology.

Prerequisite(s): GEOG 1010 or ERTH 1002 or ERTH 1004 or ISCI 1001.

Lectures three hours a week.

GEOG 2023 [0.5 credit]

Cities, Inequality and Urban Change

Geographical perspectives on the uneven power relationships and politics that shape urban lives and urban space. Key topics may include housing and segregation, planning for sustainable cities, urban social movements, urban inequality and changing livelihoods.

Includes: Experiential Learning Activity
Precludes additional credit for GEOG 2400 (no longer

offered).

Prerequisite(s): GEOG 1023, or second-year standing, or

permission of the department.

Lectures two hours per week and tutorials one hour per

Lectures two hours per week and tutorials one hour per week.

GEOG 2200 [0.5 credit] Global Connections

Globalization and global environmental change as linked processes. Geographical analysis of economic, cultural, political, and climate change transformations acting at global, national and local scales. Choices and constraints underlying economic, social and environmental sustainability.

Prerequisite(s): second-year standing or permission of the Department.

Lectures three hours a week.

GEOG 2300 [0.5 credit] Space, Place and Culture

Introduction to social and cultural geography, including how theories of space, place, landscape, power, and knowledge can be used to understand the geographic dimensions of social and cultural life. Topics include culture and identity, migration and transnationalism, nature, gender, sexuality, race, colonialism, consumption, and work.

Prerequisite(s): second-year standing or permission of the Department.

Lectures two hours a week, discussion one hour a week.

GEOG 2500 [0.5 credit]

Climate Change: Social Science Perspectives

An introduction to climate change as a political, economic and socio-cultural phenomenon, including the political-economic and world-historical causes of anthropogenic greenhouse gas emissions; variations in impact and vulnerability; climate justice and other political movements; global mitigation and adaptation strategies; and proposals for radical systemic change.

Includes: Experiential Learning Activity

Also listed as ENST 2500.

Prerequisite(s): second-year standing or permission of the Department.

Lectures two hours a week, discussion groups one hour a week.

GEOG 2600 [0.5 credit]

Geography Behind the Headlines

Exploration of the geographical backgrounds to selected issues of current public interest, through geography's perspective of integrating human and physical environments. Issues selected will be structured from the global through the national/regional to the local, identifying the interdependencies among the scales. Lecture three hours a week.

GEOG 3000 [0.5 credit] Honours Field Course

Field research, with a focus on data collection methods, analysis and presentation of findings. Design and conduct research that links the human and biophysical environment. Topics may change from year to year. Includes: Experiential Learning Activity Also listed as ENST 3900.

Precludes additional credit for ENST 2900 (no longer offered).

Prerequisite(s): GEOG 2005/ENST 2005 and GEOG 2006/ENST 2006, third-year Honours standing in Geography, Geomatics or Environmental Studies, or permission of the Department.

Normally consists of a multi-day field excursion in the Ottawa region. A supplementary charge may apply. Consult the department regarding course details.

GEOG 3001 [0.5 credit] Doing Qualitative Research

Theory and methods used in qualitative approaches to research in human geography; hands-on experience and discussion of beliefs and claims underlying scholarly work. Ethical and practical dilemmas confronting researchers. Gathering and interpreting qualitative information; representing knowledge.

Includes: Experiential Learning Activity
Prerequisite(s): GEOG 2005 or ENST 2005.
Lecture and discussion three hours per week.

GEOG 3003 [0.5 credit] Quantitative Geography

Quantitative methods used in geographical research: multiple correlation and regression, principal component/ factor analysis, spatial statistics, cluster analysis, and a review of other selected techniques. Computer-based analysis.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 2006 or ENST 2006 or STAT 2507

or permission of the Department.

Lecture two hours a week, laboratory two hours a week.

GEOG 3009 [0.5 credit]

Special Topics in Human Geography

Selected topics concerning human geography not usually included in regular course offerings. Topic varies from year to year. Students should check with the Department for more information.

Precludes additional credit for GEOG 2505 (no longer offered).

Prerequisite(s): GEOG 1020 or ENST 1020 and third-year standing, or permission of the Department.

Lecture three hours per week.

GEOG 3010 [0.5 credit]

Field Methods in Physical Geography

Field and laboratory approaches, methodologies and techniques in physical geography. Field projects will be undertaken to collect data for analysis, evaluation and presentation.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 2006 or ENST 2006 or STAT 2507 and GEOG 2013 or GEOG 2014 or permission of the Department.

Normally consists of a multi-day field camp, including lodging, during Fall or Winter Break, and regular classroom meetings. A supplementary charge will apply.

GEOG 3021 [0.5 credit]

Geographies of Culture and Identity

Examination of culture, identity and place over time in different contexts; how colonialism, globalization and other processes have shaped societies; geographies of identity, including gender, ethnicity, race and nationality; relationships between cultural groups and their natural surroundings and impacts of climate change.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 2300 and third-year standing, or permission of the Department.

Lecture three hours a week.

GEOG 3022 [0.5 credit]

Environmental and Natural Resources

Exploration of complexity, dynamics, uncertainty and equity issues underpinning environmental and resource issues; review and appraisal of selected contemporary methods to assess and manage environmental and natural resources.

Includes: Experiential Learning Activity

Also listed as ENST 3022.

Prerequisite(s): third-year standing in Geography or Environmental Studies or BGInS Specialization/Stream in Globalization and Environment or permission of the Department.

Lecture three hours a week.

GEOG 3023 [0.5 credit] Cities in a Global World

Introduces the study of cities as "systems of cities", the political economy of linkages between urban places located unevenly in space, and "cities as systems". Case studies of socio-cultural, political and economic relations within biophysical and built environments.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 2023 and third-year standing, or

permission of the department.

Lecture and discussion three hours a week.

GEOG 3024 [0.5 credit] Understanding Globalization

Geographical analysis of processes of globalization: theoretical frameworks, historical context and contemporary challenges.

Prerequisite(s): GEOG 2200 and third-year standing, or permission of the Department. Lecture three hours a week.

GEOG 3025 [0.5 credit] Geographies of Selected Regions

Geographical analysis of key questions facing a selected region of the world. Attention will focus on selected topics within one or more regions and their related global context.

Prerequisite(s): third-year standing in a B.A. program or BGInS Specialization/Stream in Globalization and Environment or permission of the Department. Lecture three hours a week.

GEOG 3026 [0.5 credit]

Topics in the Geography of Canada

Selected topic concerning the geography of Canada. Topic varies from year to year.

Precludes additional credit for GEOG 2505 [no longer offered].

Prerequisite(s): GEOG 1020 or ENST 1020 and secondyear standing, or permission of the Department. Lecture three hours a week.

GEOG 3030 [0.5 credit] Regional Field Excursion

Guided and independent geographic field research, with a focus on data collection methods, and analysis and presentation of findings. Consists of an excursion outside of the Ottawa region. A supplementary charge may apply. Includes: Experiential Learning Activity

Prerequisite(s): third-year Honours standing in Geography or BGInS Specialization in Globalization and Environment or permission of the Department.

A seven- to ten-day field excursion.

GEOG 3102 [0.5 credit] Geomorphology

Geomorphological agents of landscape change at the Earth's surface, emphasizing the role of water, ice and wind in erosion and deposition; use of geomorphic indicators in studies of environmental and climate change. A supplementary charge may apply.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 2014 and third-year standing, or permission of the Department.

Lectures two hours a week, laboratory two hours a week, one field excursion.

GEOG 3103 [0.5 credit] Watershed Hydrology

Principles of watershed hydrology and climate change impacts on renewable freshwater resources, emphasizing the physical mechanisms of runoff generation, groundwater flow, soil water movement, evapotranspiration and snowmelt.

Includes: Experiential Learning Activity
Prerequisite(s): GEOG 2013 or permission of the
Department.

Lectures three hours a week, laboratory two hours a week.

GEOG 3104 [0.5 credit] Principles of Biogeography

Contemporary and past controls on distribution of plants and animals at global, regional and local scales; significance of these distributions.

Includes: Experiential Learning Activity

Also listed as BIOL 3608.

Prerequisite(s): GEOG 1010 or BIOL 2600, or permission of the Department.

Lectures, laboratory, and fieldwork five hours a week.

GEOG 3105 [0.5 credit]

Climate and Atmospheric Change

The global climate system, with emphasis on global change variability over the historical and modern periods; the changing composition of the atmosphere and its impact on climate; analysis and interpretation of climatic and atmospheric data; modeling of climate systems. Includes: Experiential Learning Activity

Prerequisite(s): GEOG 2013 or permission of the Department.

Lecture two hours a week, laboratory two hours a week.

GEOG 3106 [0.5 credit]

Aquatic Science and Management

Fundamentals of aquatic science. The physical, chemical, and biotic aspects of lake, river, and estuary ecosystems in different geographic contexts. The impacts of climate and environmental changes on aquatic ecosystems and management and conservation actions to conserve and restore these ecosystems.

Includes: Experiential Learning Activity

Also listed as ENSC 3106.

Prerequisite(s): third-year standing and a second-year

science or engineering course. Lectures three hours per week.

GEOG 3108 [0.5 credit] Soil Properties

The physical, chemical and biological properties of soils and how these impact soil-water relationships, soil quality, soil fertility, soil biology and soil classification, among other topics. Examines the role of soils in food production and climate change.

Includes: Experiential Learning Activity
Prerequisite(s): GEOG 2013 or GEOG 2014 or

permission of the Department.

Lectures and laboratory five hours a week.

GEOG 3206 [0.5 credit]

Health, Environment, and Society

Explores the nexus between geography and human health, including climate change impacts on disease, mental and physical health, and inequity; relationships between colonization, modernization, identity, ideologies, and the environment; population health and health behaviour; social determinants of global health inequality and possibilities for change.

Prerequisite(s): third-year standing. Lectures three hours a week.

GEOG 3209 [0.5 credit]

Sustainability and Environment in the South

Analysis of the relationships between people and environment in selected regions in the South (Africa, Asia, Latin America). Emphasis on sustainable livelihoods and local action in relation to climate change and broader socioeconomic and political processes. Regions selected vary from year to year.

Prerequisite(s): third-year standing and ENST 2000 or ENST 2001 or GEOG 2200 or GEOG 2300 or permission of the Department.

Lecture and discussion three hours a week.

GEOG 3404 [0.5 credit]

Geographies of Economic Development

Geographical approaches to economic development and difference at local, regional, and global scales. Critical historical, cultural, social, political, economic, and environmental perspectives on 'development', including theories of the state, colonial power, development institutions, and climate change. Spatial dynamics and environmental impacts of economic activity. Prerequisite(s): GEOG 2200 or permission of the Department.

Lectures three hours a week.

GEOG 3501 [0.5 credit]

Geographies of the Canadian North

Key issues in contemporary northern Canada, including land and jurisdiction, wildlife, resource extraction, economic development, culture, geopolitics, health, and climate change. Historical geography and physical characteristics of the region.

Prerequisite(s): third-year standing or permission of the Department.

Lectures three hours a week.

GEOG 3700 [0.5 credit] Population Geography

The distributional aspects of population attributes; areal patterns of population characteristics and their spatial variations associated with differences in the nature of places; migratory movements within the framework of spatial models of interactions between locations.

Prerequisite(s): GEOG 2200 or GEOG 2300, or permission of the Department.

Lectures three hours a week.

GEOG 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

GEOG 4000 [0.5 credit]

Field Studies

Field observation and methodology in a selected region; individual or group basis.

Includes: Experiential Learning Activity

Also listed as ENST 4400.

Prerequisite(s): third-year Honours standing and

permission of the Department.

Hours to be arranged.

GEOG 4004 [0.5 credit]

Environmental Impact Assessment

Principles, scope and purpose of environmental impact assessment, from conceptual and methodological points of view; range of environmental issues, with emphasis on Canadian case studies.

Includes: Experiential Learning Activity

Also listed as ENST 4004.

Prerequisite(s): GEOG 3022 or ENST 3022, and fourthyear Honours standing in Geography or Environmental Studies or Environmental Science, or permission of the Department.

Lectures and seminars three hours a week.

GEOG 4005 [0.5 credit]

Directed Studies in Geography

Students pursue their interest in a selected theme in geography on a tutorial basis with a member of the Department.

Prerequisite(s): permission of the Department.

GEOG 4007 [0.5 credit]

Special Topics in Geography and Environmental Studies

Selected topics in geography and/or environmental studies.

Also listed as ENST 4007.

Precludes additional credit for GEOG 4006.

Prerequisite(s): fourth-year Honours standing in the Department of permission of the Department.

Seminar three hours per week.

GEOG 4013 [0.5 credit] Cold Region Hydrology

An examination of cold region hydrologic processes via experimental and observational studies emphasizing arctic, sub-arctic and northern boreal landscapes experiencing rapid climate change.

Prerequisite(s): GEOG 3103. Lecture three hours a week.

GEOG 4017 [0.5 credit]

Global Biogeochemical Cycles

Processes that control the fluxes and reservoirs of biologically active chemical constituents on land, in the atmosphere, and in the oceans. Climate change impacts on global carbon and nitrogen cycles and their feedbacks on the climate system.

Prerequisite(s): GEOG 3108 or permission of the Department.

Lectures three hours a week.

GEOG 4021 [0.5 credit]

Seminar in Culture, Identity and Place

Selected topic or field of inquiry concerning the geographic dimensions of culture, identity and place. Prerequisite(s): GEOG 3021 and fourth-year Honours standing in Geography or permission of the Department. Seminar three hours a week.

GEOG 4022 [0.5 credit]

Seminar in People, Resources and Environmental Change

A selected topic or field of inquiry concerning natural resource use and environmental change.

Also listed as ENST 4022.

Prerequisite(s): GEOG 3022 or ENST 3022 and fourthyear Honours standing in Geography or Environmental Studies or BGInS Specialization in Globalization and Environment or permission of the Department. Seminar three hours a week.

GEOG 4023 [0.5 credit]

Seminar in Special Topics on the City

A selected topic or field of inquiry concerning urban geography.

Prerequisite(s): GEOG 3023 and fourth-year Honours standing in Geography or Environmental Studies or BGInS Specialization in Globalization and Environment or permission of the Department.

Seminar three hours per week.

GEOG 4024 [0.5 credit] Seminar in Globalization

A selected issue or topic related to globalization. Prerequisite(s): GEOG 3024 and fourth-year Honours standing in Geography or BGInS Specialization in Globalization and Environment or permission of the Department.

Seminar three hours week.

GEOG 4040 [0.5 credit] **Geographic Thought**

Major intellectual issues and debates in the development of contemporary human geography, including history of geographic thought, geographic responses to social and political movements and debates, and geographic engagement with contemporary critical theory. Prerequisite(s): fourth-year Honours standing in Geography or permission of the Department. Seminar three hours per week.

GEOG 4050 [0.5 credit]

Environmental and Geographic Education

Selected theoretical and applied issues concerning environmental and geographic education.

Also listed as ENST 4050.

Prerequisite(s): third-year Honours standing in Geography or Environmental Studies, or permission of the Department.

Seminar three hours per week.

GEOG 4101 [0.5 credit]

Two Million Years of Environmental Change

Multidisciplinary scientific study of the changes in the physical environment of the Earth during the last two million years and methods of studying recent Earth history, with focus on current research.

Includes: Experiential Learning Activity

Prerequisite(s): third year standing in a B.Sc. program, or a third year Science Geography Elective or a third year ERTH course, or permission of the Department. Note: GEOG 3105 is recommended.

Lectures three hours a week.

GEOG 4103 [0.5 credit]

Water Resources Engineering

A quantitative analysis of natural water systems and the development of these systems as a resource. Components of the hydrologic cycle. Quantitative analysis of stream flow. Probability concepts in water resources. Reservoir design and operation. Availability of groundwater. Storm water management.

Also listed as ENVE 3003.

Prerequisite(s): permission of the Department. Recommended background: MAAE 2300.

Lectures three hours a week, problem analysis one hour a week.

GEOG 4104 [0.5 credit]

Microclimatology

The formation of microclimates near the Earth's surface. Discussion and demonstration of techniques used to measure and monitor microclimates. Microclimate impacts on forest, crop and animal production, hydrology, urban heat islands, and the impacts of climate change. Prerequisite(s): GEOG 2013 or permission of the Department.

Lectures three hours a week.

GEOG 4108 [0.5 credit] Permafrost

Understanding permafrost processes and phenomena and how they respond to climate change. Topics include the distribution, development, and degradation of permafrost; interactions between atmosphere, snow, and ground; the thermal and hydrologic regime of permafrost terrain; landforms in permafrost regions; geotechnical consideration in northern construction.

Prerequisite(s): GEOG 3108 or permission of the Department.

Lectures three hours a week.

GEOG 4304 [0.5 credit]

Transportation Engineering and Planning

Transportation and the socio-economic environment; modal and intermodal systems and components; vehicle motion; human factors, system and facility design; traffic flow; capacity analysis; planning methodology; environmental impacts; evaluation methods. Precludes additional credit for CIVE 3304. Prerequisite(s): third-year standing, or permission of the Department.

Lectures three hours a week, problem analysis three hours alternate weeks.

GEOG 4323 [0.5 credit]

Urban and Regional Planning

History, theories, and practice of urban planning, as well as the policies, plans, and programs developed and implemented in diverse communities. Course topics may include the integration of community development and social planning, urban design, transportation and infrastructure, and environmental management.

Includes: Experiential Learning Activity

Prerequisite(s): GEOG 3023 and fourth-year standing in Geography or Environmental Studies, or permission of the department.

Lectures three hours per week.

GEOG 4406 [0.5 credit]

Practicum I

Students apply their knowledge and research skills and gain experience through field placements in government, the private sector, non-government organisations and with community organisations in the environmental field. Includes: Experiential Learning Activity

Also listed as GEOM 4406.

Prerequisite(s): fourth-year Honours standing in Geography or Geomatics and permission of the Department.

Field placement one day a week.

GEOG 4408 [0.5 credit]

Practicum II

Students apply their knowledge and research skills and gain experience through field placements in government, the private sector, non-government organisations and with community organisations in the environmental field.

Includes: Experiential Learning Activity

Also listed as GEOM 4408.

Prerequisite(s): fourth-year Honours standing in Geography or Geomatics and permission of the Department.

Field placement of one day a week.

GEOG 4450 [0.5 credit] Community-Engaged Research

Working in partnership with local organizations, students apply their geographical knowledge to conduct community-engaged research. Student projects will generate outputs for community partners. Research topics vary year to year.

Includes: Experiential Learning Activity

Also listed as ENST 4450.

Prerequisite(s): fourth-year standing, or permission of the department.

Lectures, discussion and project work three hours a week.

GEOG 4906 [1.0 credit] **Honours Research Project**

A research project based on a modeling, laboratory or field problem. The project is supervised by a member of the department and a written thesis and poster must be submitted.

Includes: Experiential Learning Activity

Precludes additional credit for GEOG 4904/GEOM 4904 (no longer offered), GEOM 4906, GEOG 4909,

GEOM 4909, ENST 4906, and ENST 4907.

Prerequisite(s): fourth-year Honours standing in B.Sc. Geography, and an approved research topic and adviser. Hours to be arranged with faculty adviser.

GEOG 4909 [1.0 credit] **Honours Research Thesis**

Independent design and implementation of a research project leading to the submission of a research thesis. Students work with an individual faculty adviser. The subject for research is decided upon in consultation with the supervisor.

Includes: Experiential Learning Activity Precludes additional credit for GEOG 4904/GEOM 4904 (no longer offered), GEOG 4906, GEOM 4906, GEOM 4909, ENST 4906, and ENST 4907.

Prerequisite(s): fourth-year Honours standing in B.A. Geography or B.Globalization and International Studies, a minimum CGPA of 9.00 in the major or permission of the Department, and an approved research topic and adviser. Hours to be arranged with faculty adviser.

Geomatics

This section presents the requirements for programs in:

- · Geomatics B.A. Honours
- · Geomatics B.Sc. Honours
- · Minor in Geomatics

Program Requirements

Course Categories for B.Sc. Geomatics

See Academic Regulations for the Bachelor of Science Degree for a list of courses in these categories.

- · Science Continuation
- Experimental Science Electives
- · Science Faculty Electives
- · Approved Courses Outside the Faculties of Science and Engineering and Design
- · Science Geography courses

MATH 1007 [0.5]	Elementary Calculus I	
MATH 1107 [0.5]	Linear Algebra I	
9. 1.0 approved credits	in Computer Science	1.0
10. 2.0 credits in Scient	nce Continuation not in GEOM	2.0
11. 1.0 credit in Science	ce Faculty Electives	1.0
12. 0.5 credit in:		0.5
	Seminar in Science (or approved courses outside the faculties outside the faculties of Science and Engineering and Design)	
13. 1.5 credits in appr of Science and Enginee	oved courses outside the faculties ering and Design	1.5
14. 2.0 credits in free	electives	2.0
Total Credits		20.0

Minor in Geomatics (4.0 credits)

Only students pursuing undergraduate programs (except the B.A. Honours or B.Sc. Honours in Geomatics) requiring at least 20.0 credits to graduate may be admitted to the minor in Geomatics.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Geomatics.

Requirements

1.	0.5 credit in:		0.5
	GEOM 1004 [0.5]	Maps, Satellites and the Geospatial Revolution	
2.	1.0 credit from:		1.0
	GEOM 2005 [0.5]	Introduction to Geospatial Programming	
	GEOM 2007 [0.5]	Vector GIS: Points, Lines and Polygons	
	GEOM 2008 [0.5]	Raster GIS: Pixels and Grids	
3.	0.5 credit from:		0.5
	GEOG 2006 [0.5]	Introduction to Quantitative Research	
	STAT 2507 [0.5]	Introduction to Statistical Modeling I	
4.	1.5 credits from:		1.5
	GEOM 3002 [0.5]	Introduction to Remote Sensing	
	GEOG 3003 [0.5]	Quantitative Geography	
	GEOM 3005 [0.5]	Geospatial Analysis	
	GEOM 3007 [0.5]	Cartographic Theory and Design	
5.	0.5 credit from:		0.5
	GEOM 4001 [0.5]	Special Topics in Geomatics	
	GEOM 4003 [0.5]	Remote Sensing of the Environment	
	GEOM 4005 [0.5]	Directed Studies in Geomatics	
	GEOM 4008 [0.5]	Advanced Topics in Geographic Information Systems	
	GEOM 4009 [0.5]	Custom Geomatics Applications	

6. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Note: Familiarity with computers is assumed. Students with little computer experience may wish to take one of the following courses as part of their program of study:

BUSI 1402 [0.5] Introduction to Business

Information and Communication

Technologies

COMP 1001 [0.5] Introduction to Computational

Thinking for Arts and Social

Science Students

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : français* requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

B.Sc. Regulations

The regulations presented in this section apply to all Bachelor of Science programs. In addition to the

requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Breadth Requirement for the B.Sc.

Students in a Bachelor of Science program must present the following credits at graduation:

- 2.0 credits in Science Continuation courses not in the major discipline; students completing a double major are considered to have completed this requirement providing they have 2.0 credits in Science Continuation courses in each of the two majors;
- 2. 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000)

In most cases, the requirements for individual B.Sc. programs, as stated in this Calendar, contain these requirements, explicitly or implicitly.

Students admitted to B.Sc. programs by transfer from another institution must present at graduation (whether taken at Carleton or elsewhere):

- 2.0 credits in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received fewer than 10.0 transfer credits; or,
- 1.0 credit in courses outside of the faculties of Science and Engineering and Design (may include ISAP 1000) if the student received 10.0 or more transfer credits.

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program within the B.Sc. Degree

To transfer to a program within the B.Sc. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.Sc. degree must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrolment limitations, and/or specific program, program element or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be Eligible to Continue (EC) and is meeting the minimum CGPAs described in Section 3.1.9 of the Academic Regulations of the University, as well as being subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry.

Experimental Science Requirement

Students in a B.Sc. degree program must present at graduation at least two full credits of Experimental Science chosen from two different departments or institutes from the list below:

Approved Experimental Science Courses

Biochemistry	
BIOC 2200 [0.5]	Cellular Biochemistry
BIOC 4001 [0.5]	Methods in Biochemistry
BIOC 4201 [0.5]	Advanced Cell Culture and Tissue
	Engineering
Biology	
BIOL 1103 [0.5]	Foundations of Biology I
BIOL 1104 [0.5]	Foundations of Biology II
BIOL 2001 [0.5]	Animals: Form and Function
BIOL 2002 [0.5]	Plants: Form and Function
BIOL 2104 [0.5]	Introductory Genetics
BIOL 2200 [0.5]	Cellular Biochemistry

PSYC 2700 [0.5]	Introduction to Cognitive Psychology					
PSYC 3000 [1.0]	Design and Analysis in Psychological Research					
PSYC 3506 [0.5]	Cognitive Development					
PSYC 3700 [1.0]	Cognition (Honours Seminar)					
PSYC 3702 [0.5]	Perception					
PSYC 2307 [0.5]	Human Neuropsychology I					
PSYC 3307 [0.5]	Human Neuropsychology II					

Science Continuation Courses

A course at the 2000 level or above may be used as a Science Continuation credit in a B.Sc. program if it is not in the student's major discipline, and is chosen from the following:

BIOC (Biochemistry)

BIOL (Biology) Biochemistry students may use BIOL 2005 only as a free elective.

CHEM (Chemistry)

COMP (Computer Science) A maximum of two half-credits at the 1000-level in COMP, excluding COMP 1001 may be used as Science Continuation credits.

ERTH (Earth Sciences), except ERTH 2415 which may be used only as a free elective for any B.Sc. program. Students in Earth Sciences programs may use ERTH 2401, ERTH 2402, and ERTH 2403 only as free electives.

Engineering. Students wishing to register in Engineering courses must obtain the permission of the Faculty of Engineering and Design.

ENSC (Environmental Science)

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Sciences)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics), except PHYS 2903

Science Geography Courses (see list above)

Science Psychology Courses (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) except TSES 2305. Biology students may use these courses only as free electives. Integrated Science and Environmental Science students may include these courses in their programs but may not count them as part of the Science Sequence.

Science Faculty Electives

Science Faculty Electives are courses at the 1000-4000 level chosen from:

BIOC (Biochemistry)

and CHEM 1007

BIOL (Biology) Biology & Biochemistry students may use BIOL 1010 and BIOL 2005 only as free electives CHEM (Chemistry) except CHEM 1003, CHEM 1004

COMP (Computer Science) except COMP 1001

ERTH (Earth Sciences) except ERTH 1004 and ERTH 2415. Earth Sciences students may use ERTH 2401, ERTH 2402 and ERTH 2403 only as free electives.

Engineering

ENSC 2001

FOOD (Food Science and Nutrition)

GEOM (Geomatics)

HLTH (Health Science)

ISAP (Interdisciplinary Science Practice)

MATH (Mathematics)

NEUR (Neuroscience)

PHYS (Physics) except PHYS 1901, PHYS 1902, PHYS 1905. PHYS 2903

Science Geography (see list above)

Science Psychology (see list above)

STAT (Statistics)

TSES (Technology, Society, Environment) Biology students may use these courses only as free electives.

Advanced Science Faculty Electives

Advanced Science Faculty Electives are courses at the 2000-4000 level chosen from the Science Faculty Electives list above.

Approved Courses Outside the Faculties of Science and Engineering and Design (may include ISAP 1000)

All courses offered by the Faculty of Arts and Social Sciences, the Faculty of Public Affairs, and the Sprott School of Business are approved as Arts or Social Sciences courses EXCEPT FOR: All Science Geography courses (see list above), all Geomatics (GEOM) courses, all Science Psychology courses (see list above). ISAP 1000 may be used as an Approved Course Outside the Faculties of Science and Engineering and Design.

Free Electives

Any course is allowable as a Free Elective providing it is not prohibited (see below). Students are expected to comply with prerequisite requirements and enrolment restrictions for all courses as published in this Calendar.

Courses Allowable Only as Free Electives in any B.Sc. Program

	BIOL 4810 [0.5]	Education Research in Undergraduate Science
	CHEM 1003 [0.5]	The Chemistry of Food, Health and Drugs
	CHEM 1004 [0.5]	Drugs and the Human Body
	CHEM 1007 [0.5]	Chemistry of Art and Artifacts
	ERTH 1004 [0.5]	Earth's Epic Tale: A Story Across Billions of Years
	ERTH 2415 [0.5]	Natural Disasters
	ISCI 1001 [0.5]	Introduction to the Environment
	ISCI 2000 [0.5]	Natural Laws
	ISCI 2002 [0.5]	Human Impacts on the Environment
	PHYS 1901 [0.5]	Planetary Astronomy
	PHYS 1902 [0.5]	From our Star to the Cosmos
	PHYS 1905 [0.5]	Physics Behind Everyday Life
	PHYS 2903 [0.5]	Physics Towards the Future
_		

Prohibited Courses

The following courses are not acceptable for credit in any B.Sc. program:

COMP 1001 [0.5]	Introduction to Computational Thinking for Arts and Social Science Students
MATH 1009 [0.5]	Mathematics for Business
MATH 1119 [0.5]	Linear Algebra: with Applications to Business
MATH 1401 [0.5]	Elementary Mathematics for Economics I

MATH 1402 [0.5] Elementary Mathematics for Economics II

all 0000-level courses

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic

performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours, B.Sc. Honours Geomatics: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to the following:

- Registered as a full-time student in the B.A. Honours Geomatics program or the B.Sc. Honours Geomatics program;
- 2. Obtained third-year standing;
- Successfully completed, by the start-date of the first work term, GEOG 2006/ENST 2006 and a 0.5 credit from ENST 3900, GEOG 3000, GEOG 3010, or GEOG 3030;
- Obtained an Overall CGPA of at least 9.50 and a Major CGPA of at least 9.50. These CGPAs must be maintained throughout the duration of the degree.

B.A. Honours and B.Sc. Honours Geomatics students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only. and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than

the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- B.Sc. (Honours)
- · B.Sc. (Major)
- B.Sc.

Admission Requirements

B. Sc. Honours

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. For most programs including Biochemistry, Bioinformatics, Biotechnology, Chemistry, Combined Honours in Biology and Physics, Chemistry and Physics, Computational Biochemistry, Food Science, Nanoscience, Neuroscience and Biology, Neuroscience and Mental Health, and Psychology, the six 4U or M courses must include Advanced Functions, and two of Biology, Chemistry, Earth and Space Sciences, or Physics. (Calculus and Vectors is strongly recommended).

Specific Honours Admission Requirements

For the Honours programs in Earth Sciences, Environmental Science, Geomatics, Interdisciplinary Science and Practice, and Physical Geography, Calculus and Vectors may be substituted for Advanced Functions.

For the Honours programs in Physics and Applied Physics, and for double Honours in Mathematics and Physics, Calculus and Vectors is required in addition to Advanced Functions and one of 4U Physics, Chemistry, Biology, or Earth and Space Sciences. For all programs in Physics, 4U Physics is strongly recommended.

For Honours in Psychology, a 4U course in English is recommended.

For Honours in Environmental Science, a 4U course in Biology and Chemistry is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

B.Sc. Major and B.Sc.

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Calculus and Vectors, Biology, Chemistry, Earth and Space Science, or Physics (Calculus and Vectors is strongly recommended). For the B.Sc. Major in Physics, 4U Physics is strongly recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be *Eligible to Continue* (EC) in their year level. Advanced standing will be granted only for those subjects deemed appropriate for the program and stream selected.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Science Honours program;
- 3. be eligible to work in Canada (for off-campus work placements).

Note that meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Geomatics (GEOM) Courses

GEOM 1004 [0.5 credit]

Maps, Satellites and the Geospatial Revolution

Introduction to the creation and use of maps using a variety of geospatial tools to better understand and resolve physical, social and environmental problems. Overview of geomatics (cartography and map design, geographic information systems, GPS, remote sensing).

Includes: Experiential Learning Activity

Also listed as ERTH 2004.

Precludes additional credit for GEOM 2004 (no longer

offered)

Lectures and laboratory, four hours a week.

GEOM 2005 [0.5 credit]

Introduction to Geospatial Programming

Computer programming for geomatics students focusing on storage, manipulation, management, visualization and analysis of geospatial data; Essential coding concepts and best practices including variables, loops, and conditional statements; programmatic handling of raster and vector data structures; batch geoprocessing and map production; GIS tool customization.

Includes: Experiential Learning Activity Lectures and laboratory, four hours per week.

GEOM 2007 [0.5 credit]

Vector GIS: Points, Lines and Polygons

Storage, visualization, manipulation and analysis of vector geospatial data. Vector geoprocessing including buffering, overlays and topological analysis; feature classification and cartographic representation; managing coordinate reference systems for vector layers; selected applications of vector GIS such as urban planning, environmental and resource management and socio-economic mapping. Includes: Experiential Learning Activity

Prerequisite(s): GEOM 1004 or permission of the Department.

Lectures and laboratory, four hours a week.

GEOM 2008 [0.5 credit] Raster GIS: Pixels and Grids

Storage, visualization, manipulation, and analysis of gridded geospatial data; 3D visualization; digital terrain analysis; interpolation and filtering; raster geoprocessing and projections; selected topics and applications in raster GIS such as least-cost path analysis, natural hazard assessment, pollution mapping and hotspot analysis for population geography.

Includes: Experiential Learning Activity

Prerequisite(s): GEOM 1004 or permission of the

Department.

Lectures and laboratory, four hours per week.

GEOM 3002 [0.5 credit]

Introduction to Remote Sensing

Principles and methods of remote sensing; visual interpretation of air photos and satellite imagery; digital image processing, analysis and classification for thematic mapping; introduction to various active and passive remote sensing imagery types such as optical, hyperspectral, RADAR and LiDAR.

Includes: Experiential Learning Activity

permission of the Department.

Lectures two hours a week, laboratory two hours a week.

GEOM 3005 [0.5 credit] Geospatial Analysis

An advanced course in geospatial analysis theory and practice; geoprocessing; geo-visualization; geostatistics; spatial modelling; working with spatio-temporal data structures; advanced site-suitability and network analysis; intermediate GIS tool customization.

Includes: Experiential Learning Activity
Prerequisite(s): GEOM 2007 and GEOM 2008.
Lecture and laboratories five hours a week.

GEOM 3007 [0.5 credit] Cartographic Theory and Design

Principles of and issues in cartography, cartographic communication and map design; practical aspects of cartographic representation using multimedia and online/interactive mapping.

Includes: Experiential Learning Activity
Prerequisite(s): GEOM 2007 or GEOM 2008 or
permission of the Department.
Lectures and laboratory four hours a week.

GEOM 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

GEOM 4001 [0.5 credit] Special Topics in Geomatics

A seminar focusing on selected topics in geomatics including advanced theory and/or application. Includes: Experiential Learning Activity Prerequisite(s): fourth-year Honours standing in Geomatics or permission of the department. Laboratory or seminar three hours a week.

GEOM 4003 [0.5 credit]

Remote Sensing of the Environment

Advanced image enhancement; land cover classification for thematic mapping; biophysical modeling; applications in resources, environment, and urban mapping.

Includes: Experiential Learning Activity

Prerequisite(s): GEOM 3002 and Honours standing, or permission of the Department.

Lectures two hours a week, laboratory two hours a week.

GEOM 4005 [0.5 credit]

Directed Studies in Geomatics

Students pursue their interest in a selected theme in Geomatics on a tutorial basis with a member of the Department.

Prerequisite(s): permission of the Department.

GEOM 4008 [0.5 credit]

Advanced Topics in Geographic Information Systems

Advanced methods and techniques in GIS applications including: positional and attribute error analysis, multiple criteria decision making, interpolation, elevation modeling and ortho-imaging, and spatial pattern measurement.

Includes: Experiential Learning Activity

Prerequisite(s): GEOM 3005 and Honours standing. Lectures two hours a week, laboratory two hours a week.

GEOM 4009 [0.5 credit]

Custom Geomatics Applications

Development and implementation of custom geomatics applications and workflows using programming and various geoprocessing tools. Project design, application development, GIS automation and documentation. Includes: Experiential Learning Activity

Prerequisite(s): GEOM 2005 and (GEOM 3002 or GEOM 3005 or GEOM 3007), or permission of the

department.

Workshop three hours a week.

GEOM 4406 [0.5 credit]

Practicum I

Students apply their knowledge and research skills and gain experience through field placements in government, the private sector, non-government organisations and with community organisations in the environmental field.

Includes: Experiential Learning Activity

Also listed as GEOG 4406.

Prerequisite(s): fourth-year Honours standing in Geomatics or Geography and permission of the Department.

Field placement one day a week.

GEOM 4408 [0.5 credit]

Practicum II

Students apply their knowledge and research skills and gain experience through field placements in government, the private sector, non-government organisations and with community organisations in the environmental field. Includes: Experiential Learning Activity

Also listed as GEOG 4408.

Prerequisite(s): fourth-year Honours standing in Geomatics or Geography and permission of the Department.

Field placement one day a week.

GEOM 4906 [1.0 credit] Honours Research Project

Candidates for B.Sc. with Concentration in Geomatics undertake a research project within their area of specialization. The project is supervised by a member of the department and a written report must be submitted. The candidate may be examined orally on the report. Includes: Experiential Learning Activity Precludes additional credit for GEOG 4904/GEOM 4904 (no longer offered), GEOG 4906, GEOG 4909, GEOM 4909, ENST 4906, and ENST 4907. Prerequisite(s): fourth-year Honours standing in BSc Geomatics, and an approved research topic and adviser. Hours to be arranged with faculty adviser.

GEOM 4909 [1.0 credit] Honours Research Thesis

Independent design and implementation of a research project leading to the submission of a research thesis. Students work with an individual faculty adviser. The subject for research is decided upon in consultation with the supervisor.

Includes: Experiential Learning Activity Precludes additional credit for GEOG 4904 / GEOM 4904 (no longer offered), GEOG 4906, GEOM 4906, GEOG 4909, ENST 4906 and ENST 4907. Prerequisite(s): fourth-year Honours standing in B.A.

Geomatics, a minimum CGPA of 9.00 in the major or permission of the Department, and an approved research topic and adviser.

Hours to be arranged with faculty adviser.

German (Minor)

This section presents the requirements for programs in:

Minor in German

Minor in German (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in German.

Requirements:

1.	3.0 credits in GERM	3.0
2.	1.0 credit in GERM at the 3000-level or higher	1.0

- 3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language.
- 4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits

4.0

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

Regulations

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

German (GERM) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

GERM 1010 [0.5 credit] First-Year German I

For students with no knowledge of German. Oral skills, reading and writing. Compulsory attendance. Includes: Experiential Learning Activity Precludes additional credit for GERM 1110. Four hours a week.

GERM 1020 [0.5 credit]

First-Year German II

Continuation of first-year German. Oral skills, reading and writing. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for GERM 1110.

 $Prerequisite(s): grade \ of \ C \ or \ higher \ in \ GERM \ 1010, \ or$

permission of the School.

Four hours a week.

GERM 1110 [1.0 credit]

Intensive First-Year German

For students with no knowledge of German. Oral skills, reading and writing. Compulsory attendance. Includes: Experiential Learning Activity

Precludes additional credit for GERM 1010 and

GERM 1020.

Eight hours a week (one term).

GERM 2000 [0.5 credit]

Reading in German I

For students with no prior knowledge of German who would like to develop the skills to read a variety of German texts, including passages from scholarly journals, reports, online newspaper or magazine articles.

Includes: Experiential Learning Activity

Three hours a week.

GERM 2010 [0.5 credit] Second-Year German I

Further study of German to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for GERM 2110.

Prerequisite(s): grade of C or higher in GERM 1020, GERM 1110, or permission of the School.

Four hours a week.

GERM 2020 [0.5 credit] Second-Year German II

Continuation of second-year German. Further study of German to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Includes: Experiential Learning Activity

Precludes additional credit for GERM 2110.

Prerequisite(s): grade of C or higher in GERM 2010, or permission of the School.

Four hours a week.

GERM 2110 [1.0 credit]

Intensive Second-Year German

Further study of German to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Includes: Experiential Learning Activity

Precludes additional credit for GERM 2010 and

GERM 2020.

Prerequisite(s): grade of C or higher in GERM 1020, GERM 1110, or permission of the School.

Eight hours a week (one term).

GERM 3000 [0.5 credit] Reading in German II

A continuation of Reading in German I. Further development of reading skills in German. Includes: Experiential Learning Activity

Prerequisite(s): grade of C or higher in GERM 2000 or

permission of the School. Three hours a week.

GERM 3010 [0.5 credit]

Third-Year German I

Continuation of the study of German to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Includes: Experiential Learning Activity Precludes additional credit for GERM 3110.

Prerequisite(s): grade of C or higher in GERM 2020,

GERM 2110, or permission of the School.

Three hours a week

GERM 3020 [0.5 credit]

Third-Year German II

Continuation of third-year German to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for GERM 3110.

Prerequisite(s): grade of C or higher in GERM 3010, or permission of the School.

Three hours a week

GERM 3110 [1.0 credit]

Intensive Third-Year German

Continuation of the study of German to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for GERM 3010 and
GERM 3020.

Prerequisite(s): grade of C or higher in GERM 2020, GERM 2110, or permission of the School. Six hours a week (one term).

GERM 4010 [0.5 credit]

Fourth-Year German I

Advanced spoken and written German with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for GERM 4110.
Prerequisite(s): grade of C or higher in GERM 3020,
GERM 3110, or permission of the School.

Three hours a week

GERM 4020 [0.5 credit] Fourth-Year German II

Continuation of fourth-year German. Advanced spoken and written German with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance

Includes: Experiential Learning Activity
Precludes additional credit for GERM 4110.
Prerequisite(s): grade of C or higher in GERM 4010, or permission of the School.
Three hours a week

GERM 4110 [1.0 credit] Intensive Fourth-Year German

Advanced spoken and written German with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for GERM 4010 and
GERM 4020.

Prerequisite(s): grade of C or higher in GERM 3110, or permission of the School. Six hours a week (one term).

GERM 4215 [0.5 credit] German for Specific Purposes

Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Includes: Experiential Learning Activity
Prerequisite(s): grade of C or higher in GERM 4110, or permission of the School.
Three hours per week.

GERM 4380 [0.5 credit]

Topics in German-speaking Cultures

Selected topics in German-speaking cultures and societies. Development of advanced language skills. Includes: Experiential Learning Activity Prerequisite(s): grade of C or higher in GERM 4110, or permission of the School. Three hours per week.

GERM 4900 [1.0 credit] Independent Study

Research in a topic in German language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the
Minor in German, grade of C or higher in GERM 4110 or
equivalent, or permission of the School.

GERM 4901 [0.5 credit] Independent Study

Research in a topic in German language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the
Minor in German, grade of C or higher in GERM 4110 or
equivalent, or permission of the School.

Global and International Studies

This section presents the requirements for programs in:

- Specialization in Africa and Globalization B.G.In.S. Honours
- Specialization in Europe and Russia in the World B.G.In.S. Honours
- Specialization in French and Francophone Studies B.G.In.S. Honours
- Specialization in Global and Transnational History B.G.In.S. Honours
- Specialization in Global Development B.G.In.S. Honours
- Specialization in Global Genders and Sexualities B.G.In.S. Honours
- Specialization in Global Inequalities and Social Change B.G.In.S. Honours
- Specialization in Global Law and Social Justice B.G.In.S. Honours
- Specialization in Global Literatures B. G. In. S. Honours
- Specialization in Global Media and Communication B.G.In.S. Honours
- Specialization in Global Migration and Transnationalism B.G.In.S. Honours

- · Specialization in Global Politics B.G.In.S. Honours
- Specialization in Global Religions: Identity and Community B.G.In.S. Honours
- Specialization in Globalization and the Environment B.G.In.S. Honours
- Specialization in Globalization, Culture and Power B.G.In.S. Honours
- Specialization in International Economic Policy B.G.In.S. Honours
- Specialization in Latin American and Caribbean Studies B.G.In.S. Honours
- Specialization in Teaching English in Global Contexts B.G.In.S. Honours
- · Stream in Africa and Globalization B.G.In.S.
- · Stream in Europe and Russia in the World B.G.In.S.
- Stream in French and Francophone Studies B.G.In.S.
- Stream in Global and Transnational History B.G.In.S.
- · Stream in Global Development B.G.In.S.
- · Stream in Global Genders and Sexualities B.G.In.S.
- Stream in Global Inequalities and Social Change B.G.In.S.
- Stream in Global Law and Social Justice B.G.In.S.
- · Stream in Global Literatures B.G.In.S.
- Stream in Global Media and Communication B.G.In.S.
- Stream in Global Migration and Transnationalism B.G.In.S.
- Stream in Global Politics B.G.In.S.
- Stream in Global Religions: Identity and Community B.G.In.S.
- Stream in Globalization and the Environment B.G.In.S.
- Stream in Globalization, Culture and Power B.G.In.S.
- · Stream in International Economic Policy B.G.In.S.
- Stream in Latin American and Caribbean Studies B.G.In.S.
- Stream in Teaching English in Global Contexts B.G.In.S.

Program Requirements

International Experience Requirement

Prior to graduation, students in the Honours program must satisfy a requirement for international experience in ONE of the following ways:

- International exchange: successful completion of at least 0.5 credit in approved courses through an international exchange agreement managed by the International Student Services Office.
- Letter of Permission: successful completion of at least 0.5 credit in approved courses by Letter of Permission, from an international or Canadian university offering a course taught outside Canada.

- International placement: successful completion of GINS 3910 or GINS 3911 or an approved international placement offered through another unit.
- Carleton course taught abroad: successful completion of at least 0.5 credit in a Carleton course taught abroad.
- Group project: successful completion of GINS 3100 [0.5] Global & International Experiential Learning Course.

Language Requirement

Students in the BGInS programs must satisfy the language requirement. The language requirement may be satisfied in one of two ways:

1. By course work

Students who lack second language skill upon entry, or who wish to learn a new language, can satisfy the language requirement by satisfactorily completing language instruction courses in a modern language other than English up to an intermediate level. In most cases, this means completing the equivalent of two years (2.0 credits) of university-level language study. Listed below are the specific Carleton language instruction courses which satisfy the BGInS language requirement. Courses taken at other institutions may also be used to meet the language requirement, as long as they are accepted by the Department of French or the School of Linguistics and Language Studies as being equivalent to, or at a higher level than, the courses specified below.

Minimum Course Requirements for Languages

American Sign Language

ASLA 2020 [0.5] Second-Year American Sign Language II or ASLA 2110 [1.0]ntensive Second-Year American Sign Language

Arabic

ARAB 2110 [1.0] Intensive Second-Year Arabic

French

FREN 1100 [1.0] French 3

German

GERM 2020 [0.5] Second-Year German II or GERM 2110 [110] ensive Second-Year German

Italian

ITAL 2020 [0.5] Second-Year Italian II or ITAL 2110 [1.0]Intensive Second-Year Italian

Japanese

JAPA 2110 [1.0]

Mandarin Chinese

CHIN 2020 [0.5] Second-Year Mandarin Chinese II or CHIN 2110 [1.0]htensive Second-Year Mandarin Chinese

Intensive Second-Year Japanese

Portuguese

PORT 2110 [1.0] Intensive Second-Year Portuguese

Russian

RUSS 2020 [0.5] Second-Year Russian II

Spanish

SPAN 2020 [0.5] Second-Year Spanish II or SPAN 2110 [1.0] tensive Second-Year Spanish

Other Languages

LANG 2020 [0.5] Second-Year Language II or LANG 2110 [1.0]ontinuing Intensive Study of a Language or LANG 2900 [1.8]upervised Autonomous Language Learning

2. By demonstrating prior language proficiency

Students who already have intermediate or higher second language skills upon entry may be exempted from taking language courses. Students who wish to be exempted from taking language courses must apply for an exemption to the Program Director using the form available on the BGInS website. Each application will be treated on its merits, but the following general guidelines apply:

- Secondary school language of instruction: Students whose secondary school transcripts show that their primary language of instruction in secondary school was a language other than English may be exempted from taking language courses.
- French immersion: Students who have successfully completed Grade 12 French immersion or the equivalent at a Canadian high school may be exempted from taking language courses.
- Proficient speakers: Students who do not qualify under either of the first two categories, but who nonetheless consider themselves proficient speakers of a language other than English, may be exempted from having to take language courses. For languages taught at Carleton, "proficiency" means a level at least equivalent to completion of one of the designated language courses listed above. For languages not taught at Carleton, "proficiency" means a level at least equivalent to two full years of university level language study. Proficiency may be demonstrated either through documentation (e.g. certification from a recognized language testing authority) or through testing. For languages not taught at Carleton, availability of a test depends upon faculty resource availability.

Note: For students enrolled in one of the geographically-defined regional Specializations or Streams, only certain languages relevant to that region of the world may be used to satisfy the language requirement. See the program requirements in each of the regional Specializations and Streams for further details.

Specializations

Specialization in Africa and Globalization B.G.In.S. Honours (20.0 credits)

A. Credits Included in the Major CGPA (12.0 credits)

B.G.In.S. Regulations

Total Credits

The regulations presented in this section apply to all Bachelor of Global and International Studies programs.

In addition to the program requirements and requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.G.In.S degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit of FYSM and can only register in a FYSM while they have first-year standing in their B.G.In.S program.

Change of Specialization or Stream Within the **B.G.In.S Degree**

Students may change specialization or stream, or change from/to specialization or stream within the B.G.In.S. during the first or subsequent years of study if, upon entry to

15.0

the new specialization or stream, they would be in good academic standing.

Minors

Students may apply to the Registrar's Office to be admitted to a minor during their first or subsequent years of study. Acceptance into a minor is normally subject to meeting the minimum CGPA requirements described in Section 3.1.9 of the *Academic Regulations of the University*, as well as any specific requirements of the intended minor as published in the relevant Calendar entry. B.G.In.S. Honours students may take a maximum of one minor.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

Bachelor of Global and International Studies: Coop Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- Registered as a full-time student in the B.GInS Honours program;
- 2. Obtained third-year standing;
- 3. Successfully completed, by the start-date of the first work term, GINS 3010 and GINS 3020;
- Obtained an Overall CGPA of at least 9.00. This CGPA must be maintained throughout the duration of the degree.

B.GInS Honours students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- Bachelor of Global and International Studies (B.G.In.S.) (Honours)
- Bachelor of Global and International Studies (B.G.In.S.)

Admission Requirements

First Year

B.G.In.S. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*) and a FIF4U course for students applying to the Specialization in French and Francophone Studies. Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

B.G.In.S.

No direct entry; access is restricted.

Advanced Standing

B.G.In.S. (Honours)

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and stream selected.

B.G.In.S.

No direct entry. Access is restricted to students in the B.G.In.S. (Honours) program who apply to transfer.

Global and International Studies (GINS) Courses GINS 1000 [0.5 credit] Global History

Introduction to political, social, cultural, economic and military developments in global and international history. Lectures two hours a week, tutorials one hour a week.

GINS 1010 [0.5 credit]

International Law and Politics

Introduction to the evolution of the international system, including the rise of the state, sovereignty, and the challenge of international cooperation. The role of international law in addressing global issues such as human rights, security and trade.

Lectures two hours a week, tutorials one hour a week.

GINS 1020 [0.5 credit]

Ethnography, Globalization and Culture

Introduction to the intersection of globalization processes with social and cultural diversity as examined through ethnography and ethnographic methods. Topics may include cultural survival, growing economic inequality, ecological vulnerabilities, health practices, human rights, and shifting racialized, gendered, religious, ethnic, and national identities.

Lectures two hours a week, tutorials one hour a week.

GINS 1100 [0.5 credit] Global Development

Introduction to key questions and issues in development studies, taught from an inter-disciplinary perspective. Lectures two hours a week, tutorials one hour a week.

GINS 1300 [0.0 credit]

International Experience Requirement Preparation

This mandatory course introduces BGInS students to the International Experience Requirement (IER) and to the various policies and procedures associated with it. Graded SAT/UNS.

Prerequisite(s): first-year standing in BGInS. Online course.

GINS 2000 [0.5 credit] Ethics and Globalization

Introduction to global ethical issues, focusing on alternative lines of ethical argument. Topics may include poverty and unequal development, climate change, war and terrorism, reparations for colonialism and slavery, international relief services, ill effects of globalization, trafficking and forced labour, democracy and global governance.

Prerequisite(s): Second-year standing.
Lectures two hours a week, tutorials one hour a week.

GINS 2010 [0.5 credit]

Globalization and International Economic Issues

An introduction to the world economy, international trade and finance, and economic development. Social and economic implications for both rich and poor countries of lowered barriers to the international flows of goods, services, capital, labour, and information in the age of globalization.

Prerequisite(s): Second-year standing. Lectures two hours a week, tutorials one hour a week.

GINS 2020 [0.5 credit] Global Literatures

A study of the global dynamics of the contemporary literary imagination and literary production; literature as cultural practice; the politics of literary circulation; the politics of language and translation.

Prerequisite(s): Second-year standing. Lectures two hours a week, tutorials one hour a week.

GINS 3010 [0.5 credit] Global and International Theory

Advanced analysis of global and international theories from a variety of perspectives, including realism, liberalism, postmodernism, constructivism, poststructuralism, literary and critical approaches. Prerequisite(s): third-year standing in B.G.In.S. Lectures three hours a week.

GINS 3020 [0.5 credit]

Places, Boundaries, Movements and Global Environmental Change

Examination of the relationship between individual places and global social and environmental processes. The changing nature of regions, states and political boundaries in the context of political and economic globalization and international migration. Social science perspectives on climate change vulnerability, adaptation and mitigation. Prerequisite(s): third-year standing in B.G.In.S. Lectures three hours a week.

GINS 3100 [0.5 credit]

Global & International Experiential Learning Course

Students work on a project related to Global and International Experiential learning. Sessions are devoted to discussing project- related issues and student presentations. Course design may vary according to the professor's instructions. Includes: Experiential Learning Activity.

Includes: Experiential Learning Activity Prerequisite(s): third-year standing.

Discussion and project work, three hours per week.

GINS 3300 [0.5 credit]

Global and International Studies Abroad: Selected Topics

Based at a partner university around the world, and taught by a Carleton faculty member, the course will include lectures, seminars, guest speakers, field visits and group research projects to examine a topic in global and international studies. Topic and location will change annually.

Includes: Experiential Learning Activity

 $\label{pre-equisite} Pre-equisite(s): third-year standing and approval by the$

BGInS Program Director.

Three week intensive course.

GINS 3910 [0.5 credit] BGInS International Placement

Placement for six weeks with a global and international focus

Includes: Experiential Learning Activity

Precludes additional credit for GINS 3900 (no longer

offered).

Prerequisite(s): third-year standing in BGINS.

GINS 3911 [1.0 credit] BGInS International Placement

Placement for twelve weeks with a global and international focus.

Includes: Experiential Learning Activity

Precludes additional credit for GINS 3901 (no longer

offered).

Prerequisite(s): third-year standing in BGInS.

GINS 3930 [0.5 credit]

Carleton International Placement

Placement for six weeks with a global and international focus for students outside of the BGInS Program. Graded Sat/Uns.

Includes: Experiential Learning Activity

Precludes additional credit for BUSI 3701, IPAF 3900 (no longer offered).

Prerequisite(s): Third-year standing and minimum CGPA of 9.0.

Placement hours to be negotiated with on-site placement supervisor. Required assignments and due dates will be set by the course instructor at Carleton University.

GINS 3931 [1.0 credit]

Carleton International Placement

Placement for twelve weeks with a global and international focus for students outside of the BGInS Program.

Includes: Experiential Learning Activity

Precludes additional credit for BUSI 3702, IPAF 3901 (no longer offered).

Prerequisite(s): Third-year standing and minimum CGPA of 9.0.

Placement hours to be negotiated with on-site placement supervisor. Required assignments and due dates will be set by the course instructor at Carleton University.

GINS 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

GINS 4090 [0.5 credit]

Honours Seminar in Global and International Studies

Examination of key debates in global and international studies from a variety of disciplinary and interdisciplinary perspectives. Integration of knowledge from different areas of emphasis in global studies. A major research paper is required that undertakes to focus theoretical insight on practical concerns.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing in B.G.In.S. Seminar three hours a week.

GINS 4900 [0.5 credit]

Tutorial in Global and International Studies

A tutorial on selected topics in which seminars are not available.

Prerequisite(s): fourth-year Honours standing in B.G.In.S. and permission of the Program Director.

GINS 4908 [1.0 credit] **Honours Research Essay**

Individual research project resulting in a major essay, completed under the supervision of a faculty member and evaluated by both the supervisor and an appointed reader. B.G.In.S. regulations apply.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing in B.G.In.S. with a CGPA of 9.00 or higher, or permission of the Program Director.

Greek and Roman Studies

This section presents the requirements for programs in:

- · Greek and Roman Studies B.A. Honours
- Greek and Roman Studies B.A. Combined Honours
- · Greek and Roman Studies B.A.
- Minor in Archaeology
- Minor in Greek and Roman Studies

Program Requirements

Greek and Roman Studies B.A. Honours (20.0 credits)

1 10 credit in GREK or LATN

A. Credits Included in the Major CGPA (10.0 credits)

Total Credits	20.0
7. 2.0 credits in free electives.	2.0
6. 8.0 credits in electives not in Greek and Roman Studies (CLCV, GREK, LATN)	8.0
B. Credits Not Included in the Major CGPA (10.0 credits)	
5. 3.0 credits in electives in Greek and Roman Studies (CLCV, GREK, LATN, FYSM 1106)	3.0
4. 1.0 credit in 4000-level CLCV, GREK, or LATN	1.0
3. 2.0 credits in 3000-level or higher in CLCV, GREK or LATN	2.0
2. 3.0 credits in 2000-level CLCV, GREK, or LATN	3.0
I. I.O CIEUR III GREN OI LAIN	1.0

Greek and Roman Studies B.A. Combined Honours (20.0 credits)

A. Credits Included in the Major CGPA (7.0 credits)

Total Credits	20.0
7. Sufficient free electives to make 20.0 credits total for the degree.	
6. The requirements for the other discipline must be satisfied	
B. Additional Requirements (13.0 credits)	13.0
5. 1.0 credit in electives in Greek and Roman Studies (CLCV, GREK, LATN, FYSM 1106)	1.0
4. 1.0 credit in 4000-level CLCV, GREK or LATN	1.0
3. 2.0 credits from 3000-level or higher CLCV, GREK, LATN	2.0
2. 2.0 credits from 2000-level CLCV, GREK, LATN	2.0
1. 1.0 credit in GREK or LATN	1.0

Greek and Roman Studies B.A. (15.0 credits)

A. Credits Included in the Major CGPA (6.0 credits)

Total Credits	15.0
5. 3.0 credits in free electives	2.0
4. 6.0 credits in electives not in Greek and Roman Studies (CLCV, GREK, LATN)	7.0
B. Credits Not Included in the Major CGPA (9.0 credits)	
3. 1.0 credit in electives in Greek and Roman Studies (CLCV, GREK, LATN, FYSM 1106)	1.0
2. 2.0 credits in 3000-level CLCV, GREK, or LATN	2.0
1. 3.0 credits in 2000-level CLCV, GREK, or LATN	3.0

Minor in Archaeology (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Archaeology.

Requirements:

1.	1.0 credit in:		1.0
	ARCY 1008 [0.5] & ARCY 1009 [0.5]	Introduction to Archaeology I Introduction to Archaeology II	
	Or		
	CLCV 1008 [0.5] & CLCV 1009 [0.5]	Introduction to Archaeology I Introduction to Archaeology II	
	1.0 credit in ARCY vel	or approved electives at the 2000	1.0
	1.0 credit in ARCY vel	or approved electives at the 3000	1.0
4.	1.0 credit in ARCY	or approved electives at any level	1.0
5. The remaining requirements of the major discipline(s) and degree must be satisfied.			
To	Total Credits 4		

Approved Archaeology Electives

Other courses may be substituted for those specified below, when material on archaeology is central to the course. Such substitutions must be individually approved by the Greek and Roman Studies Program Coordinator.

Note: "R" designates that the course is repeatable.

Minor in Greek and Roman Studies (4.0 credits)

Open to all undergraduate degree students not in the Greek and Roman Studies programs.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Greek and Roman Studies.

Requirements

Total Credits	4.0
4. The remaining requirements of the major discipline(s) and degree must be satisfied.	
3. 2.0 credits from any level of CLCV, GREK, or LATN (may include FYSM 1106 [1.0])	2.0
2. 1.0 credit from CLCV, GREK or LATN at the 3000-level or above	1.0
1. 1.0 credit from CLCV, GREK or LATN at the 2000-level or above	1.0

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK,

HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described

in Section 3.1.9 of the Academic Regulations of the University.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : français* requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Admissions Information

Admission Requirements are for the 2025-26 year only. and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Classical Civilization (CLCV) Courses

CLCV 1002 [0.5 credit]

Survey of Greek Civilization

Introduction to the study of Greek antiquity and the discipline of Classics and its methodologies. Greek culture and society are set in their historical contexts and studied through readings from representative ancient authors (in English translation) and through the art and architecture of the period.

Precludes additional credit for CLCV 1000 (no longer offered), CLCV 1109 (no longer offered). Lecture three hours a week.

CLCV 1003 [0.5 credit]

Survey of Roman Civilization

Introduction to the study of Roman antiquity and the discipline of Classics and its methodologies. The culture and society are set in their historical context and studied through readings from representative ancient authors (in English translation) and through the art and architecture of the period.

Precludes additional credit for CLCV 1000 (no longer offered), CLCV 1109 (no longer offered). Lecture three hours a week.

CLCV 1004 [0.5 credit]

Elementary Language Tutorial I

Elementary study of an ancient language. Prerequisite(s): Permission of the unit.

Tutorial two hours a week plus out-of-class requirements.

CLCV 1005 [0.5 credit]

Elementary Language Tutorial II

Elementary study of an ancient language. Prerequisite(s): Permission of the department.

Tutorial two hours a week plus out-of-class requirements.

CLCV 1008 [0.5 credit] Introduction to Archaeology I

Introduction to the history, theory and practice of field archaeology. Excavations from all time periods and global regions will be discussed. Focus will be placed on excavation methods and technology, including dating, that enhance understanding of sites both on land and underwater.

Also listed as ARCY 1008.

Precludes additional credit for CLCV 2300 (no longer offered).

Lecture three hours a week.

CLCV 1009 [0.5 credit]

Introduction to Archaeology II

Continues the examination of various aspects of field archaeology begun in CLCV 1008. This course places greater focus on recent approaches to the interpretation of remains. These include environmental, cognitive and bioarchaeological approaches.

Also listed as ARCY 1009.

Precludes additional credit for CLCV 2300 (no longer offered).

Lecture three hours a week.

CLCV 2004 [0.5 credit]

Intermediate Language Tutorial I

Intermediate study of an ancient language.

Prerequisite(s): permission of the unit.

Tutorial two hours a week plus out-of-class requirements.

CLCV 2005 [0.5 credit]

Intermediate Language Tutorial II

Intermediate study of an ancient language.

Prerequisite(s): permission of the unit.

Tutorial two hours a week plus out-of-class requirements.

CLCV 2008 [0.5 credit] Greek and Roman Epic

An examination of the genre of epic in Greco-Roman antiquity, including a close reading of translations of Homer and Vergil.

Also listed as ENGL 2012.

Precludes additional credit for CLCV 2009 and ENGL 2009 (no longer offered).

Prerequisite(s): second year standing or permission of the unit.

Lecture three hours a week.

CLCV 2010 [0.5 credit] Greek and Roman Drama

An examination of the genres of tragedy and comedy in Greco-Roman antiquity.

Also listed as ENGL 2605.

Precludes additional credit for CLCV 2009 or ENGL 2009 (no longer offered).

Prerequisite(s): second year standing or permission of the

Lecture three hours a week.

CLCV 2100 [0.5 credit]

Scientific and Medical Terminology

Examination of Ancient Greek and Latin roots of technical terms found in the sciences, engineering, and medicine. Lecture three hours a week.

CLCV 2103 [0.5 credit]

Greek Religion

A study of religion in ancient Greece.

Also listed as RELI 2735.

Precludes additional credit for CLCV 2102 (no longer offered) and, RELI 2102 (no longer offered) RELI 2734 (no longer offered).

Lecture three hours a week.

CLCV 2104 [0.5 credit] Roman Religion

A study of religion in ancient Rome.

Also listed as RELI 2737.

Precludes additional credit for CLCV 2102 (no longer offered), RELI 2102 (no longer offered) and RELI 2734 (no longer offered).

Lecture three hours a week.

CLCV 2105 [1.0 credit]

Ancient Philosophy: The Search for Wisdom

An exploration of ancient philosophy as a search for wisdom and happiness from its Presocratic beginnings in Greece to its development in the Hellenistic world and Imperial Rome. Emphasis on philosophy as a contemplative activity and as a way of life.

Also listed as PHIL 2005.

Precludes additional credit for PHIL 2006, CLCV 2006, PHIL 2007, CLCV 2007 (no longer offered).

CLCV 2303 [0.5 credit]

Greek Art and Archaeology

The art, architecture and archaeology of ancient Greece. Vase painting, sculpture, architecture, town planning and analogous arts.

Also listed as ARTH 2102.

Precludes additional credit for CLCV 2302 (no longer offered) and ARTH 2100 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit.

Lecture three hours a week.

CLCV 2304 [0.5 credit] Roman Art and Archaeology

The art, architecture and archaeology of the ancient Romans. Vase painting, sculpture, architecture, town planning and analogous arts are studied.

Also listed as ARTH 2105.

Precludes additional credit for CLCV 2302 and ARTH 2100.

Prerequisite(s): second-year standing or permission of the unit.

CLCV 2305 [1.0 credit]

Ancient Science and Technology

The development and application of ancient science and technology in the fields of ancient engineering, machinery, metallurgy, transport, building, agriculture and Hippocratic medicine; the social position of craftsmen and artisans, the attitude of intellectuals to science and manual labour, the effects of slavery.

Also listed as TSES 2305.

Prerequisite(s): second-year standing or permission of the Department. This course is suitable for students with no previous knowledge of Greece or Rome.

Lecture three hours a week.

CLCV 2500 [0.5 credit] Classical Mythology

A study of classical mythology, emphasizing its use in Greek and Roman literature and its place in classical art and religion. There is some discussion of classical myths in terms of contemporary interpretations of myth.

Also listed as ENGL 2500.

Precludes additional credit for CLCV 2000 and ENGL 2007 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit.

Lecture three hours a week.

CLCV 2902 [0.5 credit] Origins of the Greeks

The history of ancient Greece from the Bronze Age through the Archaic period.

Also listed as HIST 2902.

Precludes additional credit for CLCV 2900 and HIST 2900.

Prerequisite(s): second-year standing or permission of unit

Lecture three hours a week.

CLCV 2903 [0.5 credit] Democracy to Alexander

The history of ancient Greece from the classical period to Alexander.

Also listed as HIST 2903.

Precludes additional credit for CLCV 2900 and HIST 2900.

Prerequisite(s): second-year standing or permission of the

Lecture three hours a week.

CLCV 2904 [0.5 credit]

Rise of the Roman Empire

The history of ancient Rome from early Rome to the end of the Republic.

Also listed as HIST 2904.

Precludes additional credit for CLCV 2901 and HIST 2901.

Prerequisite(s): second-year standing or permission of the unit.

Lecture three hours a week.

CLCV 2905 [0.5 credit] Rome of the Caesars

The history of ancient Rome from the end of the Republic to the coming of Islam.

Also listed as HIST 2905.

Precludes additional credit for CLCV 2901 (no longer offered) and HIST 2901 (no longer offered).

Prerequisite(s): second-year standing or permission of the

Lecture three hours a week.

CLCV 2906 [0.5 credit]

Studies in Classical Civilization

A study of a selected topic in ancient history, literature, languages, culture, archaeology and/or technology. Prerequisite(s): second-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3000 [0.5 credit] Topics in Ancient History

A study of a selected topic in ancient history.

Also listed as HIST 3000.

Prerequisite(s): third-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3001 [0.5 credit] Early Greek Philosophy

A study of the pre-Socratic philosophers and of the Sophists and Socrates.

Also listed as PHIL 3001.

Prerequisite(s): CLCV 2105 or PHIL 2005 or permission of the Philosophy department.

Lectures three hours a week.

CLCV 3003 [0.5 credit]

Topics in Classical Civilization

A study of a selected topic in classical civilization. Prerequisite(s): third-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3010 [0.5 credit]

The Later Roman Empire

The study of major developments - administrative, ecclesiastical, cultural and societal - of the later Roman Empire.

Also listed as HIST 3010.

Precludes additional credit for CLCV 3002 and HIST 3002.

Prerequisite(s): a 2000-level CLCV course.

Lecture three hours a week.

CLCV 3011 [0.5 credit]

Topics in Ancient Philosophy

A study of philosophers, texts, problems and issues in ancient philosophy, generally with a focus on Plato and Aristotle.

Also listed as PHIL 3000.

Prerequisite(s): 0.5 credit in PHIL and second-year standing, or permission of the Philosophy department. Lectures three hours a week.

CLCV 3201 [0.5 credit]

Studies in Greek History

Study of a period or theme in Greek History.

Also listed as HIST 3009.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3202 [0.5 credit] Studies in Roman History

Study of a period or theme in Roman History.

Also listed as HIST 3101.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3301 [0.5 credit]

Field Work I: Greek and Roman World

Students will participate for a minimum of three weeks on an archaeological field project (i.e., excavation or survey) relevant to the Greek and Roman world. They will learn archaeological documentation and the analysis, recording, and processing of finds.

Includes: Experiential Learning Activity

Also listed as ARCY 3301.

Prerequisite(s): CLCV 1008 and CLCV 1009 or CLCV 2300 and permission of the unit. Permission of the unit is required to repeat this course.

CLCV 3306 [0.5 credit] Studies in Greek Art

A study of period or theme in the art and archaeology of Ancient Greece. Topics may vary from year to year. Also listed as ARTH 3102, RELI 3732.

Precludes additional credit for RELI 3731and ARTH 3101 (no longer offered) and RELI 3306 (if taken summer 2005, summer 2006, summer 2007).

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3307 [0.5 credit] Studies in Roman Art

A study of a period or theme in the art and archaeology of the ancient Romans. Topics may vary from year to year. Also listed as ARTH 3105, RELI 3733.

Precludes additional credit for RELI 3731 and ARTH 3101(no longer offered) and RELI 3306 (if taken summer 2005, summer 2006, summer 2007).

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3400 [0.5 credit] Greek and Roman Studies Abroad

This course combines academic study in Canada with first hand examination of museum collections and sites of the ancient world, normally in Greece and Italy. Course content varies from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): 1.0 credit in Greek and Roman Studies, any level (CLCV, GREK, or LATN. Permission of the unit is required to repeat this course.

Hours to be arranged.

CLCV 3701 [0.5 credit] Studies in Greek Literature

A study of an author or topic in Greek literature. Contents of this course vary from year to year.

Also listed as ENGL 3008.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) at second year level or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 3702 [0.5 credit] Studies in Roman Literature

A study of an author or topic in Roman literature.

Also listed as ENGL 3009.

Prerequisite(s): 1.0 credit in CLCV courses (or equivalent) at second year level or permission of the unit. Permission of the unit is required to repeat this course.

Lecture three hours a week.

CLCV 4000 [0.5 credit]

Field Work II: Greek and Roman World

Students participate for a minimum of three weeks in a position of responsibility (for example, as a trench supervisor or lab assistant) on an archaeological field project relevant to the Greek and Roman world. Includes: Experiential Learning Activity

Alaa Batadaa ADOX 4000

Also listed as ARCY 4000.

Prerequisite(s): CLCV 3300 and permission of the unit. Permission of the unit is required to repeat this course. Field work

CLCV 4210 [0.5 credit]

Topics in Ancient History

Intended for Honours students in History and Classics who should normally be in the third and fourth-years.

Includes: Experiential Learning Activity

Also listed as HIST 4210.

Prerequisite(s): CLCV 2902 (HIST 2902), CLCV 2903(HIST 2903) or CLCV 2904 (HIST 2904), CLCV 2905 (HIST 2905) or CLCV 3201 or CLCV 3202 or permission of the unit.

Seminar three hours a week.

CLCV 4800 [0.5 credit]

Seminar in Greek and Roman Studies

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the Greek and
Roman Studies B.A. program, or permission of the
department.

Seminar three hours a week.

CLCV 4801 [0.5 credit]

Seminar in Greek and Roman Studies

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Greek and Roman Studies B.A. program, or permission of the department.

Seminar three hours a week.

CLCV 4900 [0.5 credit]

Directed Readings and Research

These courses consist of supervised readings and research projects in a specific area of Classical Civilization to be chosen in consultation with a faculty Supervisor who agrees to oversee a student's proposed research.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year Honours standing and permission of the unit.

Greek (GREK) Courses

GREK 1005 [0.5 credit] Introduction to Greek I

A course for beginners in ancient Greek, designed to give students a grasp of basic grammatical forms and vocabulary (with reference to English derivatives) through the reading of continuous Greek.

Includes: Experiential Learning Activity Lectures and tutorials four hours a week.

GREK 1006 [0.5 credit] Introduction to Greek II

A course for students with some previous knowledge of the language: study of grammatical forms and constructions; acquisition of reading skills. Includes: Experiential Learning Activity Prerequisite(s): GREK 1005 or equivalent. Lectures and tutorials four hours a week.

GREK 2200 [0.5 credit] Intermediate Greek I

Further study of the language; introduction to the reading of ancient Greek authors.

Includes: Experiential Learning Activity Precludes additional credit for GREK 2001. Prerequisite(s): GREK 1006 or equivalent.

Tutorials three hours a week.

GREK 2201 [0.5 credit] Intermediate Greek II

Continued study of the language: reading of selected prose and poetry by ancient Greek authors; development of translation skills.

Precludes additional credit for GREK 2001. Prerequisite(s): GREK 2200 or equivalent.

Tutorials three hours a week.

GREK 3900 [0.5 credit] Advanced Greek I

Reading and critical discussion of selections from ancient

Prerequisite(s): GREK 2200, GREK 2201 or equivalent. Tutorials three hours a week.

GREK 3901 [0.5 credit] Advanced Greek II

Reading and critical discussion of selections from ancient Greek.

Prerequisite(s): GREK 2200, GREK 2201 or equivalent. Tutorials three hours a week.

GREK 4900 [0.5 credit] **Directed Study**

GREK 4901 [0.5 credit] **Directed Study**

Latin (LATN) Courses

LATN 1005 [0.5 credit] Introduction to Latin I

A course for beginners in Latin, designed to give students a grasp of basic grammatical forms and vocabulary (with reference to English derivatives) through the reading of continuous Latin.

Includes: Experiential Learning Activity

Lectures and practice periods four hours a week.

LATN 1006 [0.5 credit] Introduction to Latin II

A course for students with some previous knowledge of the language: study of grammatical forms and constructions; acquisition of reading skills. Includes: Experiential Learning Activity Prerequisite(s): LATN 1005 or equivalent. Lectures and practice periods four hours a week.

LATN 2200 [0.5 credit] Intermediate Latin I

Further study of the language; introduction to the reading of Latin authors.

Includes: Experiential Learning Activity Precludes additional credit for LATN 2001. Prerequisite(s): LATN 1006 or equivalent.

Tutorials three hours a week.

LATN 2201 [0.5 credit] Intermediate Latin II

Continued study of the language; reading of selected prose and poetry by Latin authors; development of translation skills.

Precludes additional credit for LATN 2001. Prerequisite(s): LATN 2200 or equivalent. Tutorials three hours a week.

LATN 3900 [0.5 credit]

Advanced Latin I

Reading and critical discussion of selections from Latin poetry.

Prerequisite(s): LATN 2200, LATN 2201 or equivalent. Tutorials three hours a week.

LATN 3901 [0.5 credit] Advanced Latin II

Reading and critical discussion of selections from Latin

Prerequisite(s): LATN 2200. LATN 2201 or equivalent. Tutorials three hours a week.

LATN 4900 [0.5 credit] Directed Study

LATN 4901 [0.5 credit] Directed Study

Health Sciences

This section presents the requirements for programs in:

- Health Sciences with Concentration B.H.Sc. Honours
- Concentration in Biomedical Sciences
- Concentration in Disability and Chronic Illness
- Concentration in Environment and Health
- · Concentration in Global Health
- · Concentration in Health Throughout the Lifespan
- · Health Sciences B.H.Sc.
- Journalism with Concentration in Health Sciences B.J. Honours
- · Minor in Health Sciences

Program Requirements

1. 4.5 credits in:

Students in the B.H.Sc. Honours program choose to follow one of five concentrations. The selection must take place at admission.

Health Sciences with Concentration B.H.Sc. Honours (20.0 credits)

Before the second year of study, students in this program must register in one of the concentrations listed below.

4.5

A. Credits Included in the Major CGPA (10.0 credits)

	HLTH 1000 [0.5]	Fundamentals of Health	
	HLTH 1002 [0.5]	Health Science Communication	
	HLTH 2001 [0.5]	Health Research Methods and Skills	
	HLTH 2002 [0.5]	Molecular and Cellular Pathology	
	HLTH 2003 [0.5]	Social Determinants of Health	
	HLTH 3101 [0.5]	Global Health	
	HLTH 3201 [0.5]	Epidemiology	
	HLTH 3302 [0.5]	Immunity and Immune-Related Disorders	
	HLTH 3404 [0.5]	Psychosocial and Biological Interactions in Health	
2.	1.5 credits in:		1.5
	a) Project/Field Pla	acement pathway	
	0.5 credit from:		
	HLTH 3901 [0.5]	Emerging Issues in Health Sciences I	
	HLTH 3902 [0.5]	Emerging Issues in Health Sciences II	
	HLTH 3903 [0.5]	Emerging Issues in Health Sciences III	
	HLTH 3904 [0.5]	Emerging Issues in Health Sciences IV	
	HLTH 3905 [0.5]	Emerging Issues in Health Sciences V	

	and		
	1.0 credit from:		
	HLTH 4907 [1.0]	Capstone Course – Group Research Project	
	HLTH 4909 [1.0]	Capstone Course – Field Placement and Research Project	
	HLTH 4910 [1.0]	Honours Individual Research Thesis	
	OR		
	b) Essay pathway		
	0.5 credit in HLTH 6	elective at the 3000 level or above	
	and		
	1.0 credit in:		
	HLTH 4906 [1.0]	Capstone course – Research Essay	
		at the 3000 level or above	0.5
	3.5 credits in cond above	entration electives at the 3000 level	3.5
	Credits Not Includ edits)	ed in the Major CGPA (10.0	
	2.5 credits in:		2.5

Total Credits 20.0

Minor in Health Sciences (4.0 credits)

This minor is open to all undergraduate degree students not in the Health Sciences program. Only students pursuing undergraduate programs requiring at least 20.0 credits to graduate and who have completed at least 4.0 credits towards their degree with a minimum Overall CGPA of 8.00 may be admitted to the Minor in Health Sciences.

Students are required to present a Minor CGPA of 6.50 or higher at graduation in order to be awarded a Minor in Health Sciences.

Requirements:

Total Credits		4.0
3. The remaining requirements of the major discipline(s) and degree must be satisfied.		
2. 1.5 credits in HLT	H at the 3000-level or higher	1.5
HLTH 2020 [0.5]	Principles of Health II	
HLTH 2003 [0.5]	Social Determinants of Health	
HLTH 2002 [0.5]	Molecular and Cellular Pathology	
HLTH 2001 [0.5]	Health Research Methods and Skills	
HLTH 1001 [0.5]	Principles of Health I	
1. 2.5 credits in:		2.5

Regulations

In addition to the program requirements described here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

Students should consult with the department when planning their program and selecting courses.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- Bachelor of Health Sciences (B.H.Sc.) (Honours)
- Bachelor of Health Sciences (B.H.Sc.)

Admission Requirements

First Year

B.H.Sc. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and two of Biology, Chemistry, Earth and Space Sciences, or Physics. Calculus and Vectors is strongly recommended. A 4U course in English is recommended.

B.H.Sc.

No direct entry; access is restricted.

Advanced Standing

B.H.Sc. (Honours)

The program maintains a number of places for students who wish to transfer from Carleton or elsewhere. Normally, offers are made to students with an overall CGPA of 9.00 (B+) or higher.

B.H.Sc.

No direct entry. Access is restricted to students in the B.H.Sc. (Honours) program who apply to transfer.

Health Sciences (HLTH) Courses

HLTH 1000 [0.5 credit]

Fundamentals of Health

Introduction to what comprises a healthy body and mind, and what leads to illness and disease. Biomedical, psychosocial, and epidemiological approaches to current issues in the field of health. Policy and cultural/ environmental contexts.

Includes: Experiential Learning Activity Precludes additional credit for HLTH 1001.

Lectures three hours a week and group one hour a week.

HLTH 1001 [0.5 credit] Principles of Health I

Health and illness will be considered from an interdisciplinary perspective, including biomedical, cultural, psychosocial and environmental.

Precludes additional credit for HLTH 1000.

Lecture three hours a week.

HLTH 1002 [0.5 credit]

Health Science Communication

Introduction to using library, database and/or bioinformatics resources to develop informed verbal, nonverbal and written communication within the context of healthcare, public health and health research. Concepts in ethical scholarship, proper use of sources and plagiarism will be introduced.

Lecture three hours a week.

HLTH 2001 [0.5 credit]

Health Research Methods and Skills

An introduction to quantitative and qualitative methods and designs in health sciences research. Basic research skills will also be provided, including regulatory aspects of conducting research, information literacy skills, evaluating published research and other sources of evidence in the digital age.

Includes: Experiential Learning Activity Prerequisite(s): HLTH 1000 or HLTH 1001.

Lecture three hours a week, lab/workshop two hours a

week.

HLTH 2002 [0.5 credit]

Molecular and Cellular Pathology

Introduction to the causes, natural history, and pathophysiology of common human diseases of various organ systems. Diseases related to structural and functional changes at the molecular, cellular and organ

Includes: Experiential Learning Activity Prerequisite(s): HLTH 1000 and BIOL 1103 or HLTH 2020.

Lecture three hours a week.

HLTH 2003 [0.5 credit] Social Determinants of Health

Overview of the social determinants of health, ranging from early life experiences, poverty, social status, migration, and the physical environment. The relation between social determinants and environmental vulnerabilities, health behaviours, illness prevalence, treatment outcomes, and access to health care. Prerequisite(s): HLTH 1000 or HLTH 1001. Lecture three hours a week.

HLTH 2004 [0.5 credit] Microbiology and Virology

Introduction to the pathogenic microorganisms, including fungal, bacterial, viral and prion. Biochemical, genetic, pathological and epidemiological aspects in the human context; their interaction with host defense systems and strategies for antibiotic and vaccine development.

Includes: Experiential Learning Activity

Precludes additional credit for BIOL 2303, HLTH 2024 and HLTH 3301 (no longer offered).

Prerequisite(s): HLTH 1000 and BIOL 1103 or permission of the department.

Lecture three hours a week, and laboratory four hours a week.

HLTH 2020 [0.5 credit] Principles of Health II

An overview of the history of medicine, its relationship to society, medical and health terminology, introduction to organ systems, diseases, illnesses and their diagnoses, current events in health and medicine.

Prerequisite(s): HLTH 1001 or permission of the department.

Lecture three hours a week.

HLTH 2024 [0.5 credit] Microbiology and Virology

Introduction to pathogenic microorganisms, including fugal, bacterial, viral and prion. Biochemical, genetic, pathological and epidemiological aspects in the human context; their interaction with host defense systems and strategies for antibiotic and vaccine development. Precludes additional credit for HLTH 2004 and BIOL 2303.

Prerequisite(s): HLTH 1001 or permission of the department - Not for Health Sciences major students. Lecture

HLTH 2901 [0.5 credit] Independent Study

Independent study, open to second year and above. Students can explore a particular health-related topic in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work. Includes: Experiential Learning Activity. Includes: Experiential Learning Activity Prerequisite(s): Second year standing and above. Independent study

HLTH 3101 [0.5 credit] Global Health

Overview of issues in global health with focus on low- and middle-income countries. Key indicators and determinants of global health, implementation and evaluation of global programs, challenges of research and interventions in under served areas, and key players in addressing global health issues.

Prerequisite(s): HLTH 2001 and HLTH 2003, or permission of the department.

Lecture and seminar, three hours per week.

HLTH 3102 [0.5 credit] Indigenous Health in a Global World

The health conditions of Indigenous peoples in different regions of the world; social and biological factors that contribute to greater risk and poor health; strategies of Indigenous peoples to restore health to their peoples. Prerequisite(s): HLTH 2001 and HLTH 2003, or permission of the department.

Lecture and seminar three hours per week.

HLTH 3103 [0.5 credit]

Health Policy and Canada's Health Care System

The history of Canada's health care system. The model of financing and intergovernmental responsibilities. Current and emerging policy debates facing our health care system, and the role of scientific evidence in decision-making and policy development.

Prerequisite(s): HLTH 1000 or HLTH 1001, or permission of the department.

Lecture and seminar three hours per week.

HLTH 3104 [0.5 credit]

Regulatory Issues and Human Health

The general principles of health regulatory policies in Canada. The role of scientific evidence in developing legislation and regulations at different levels, including probable levels of risk, standards of evidence, costbenefit analysis, ethical considerations, psychosocial factors influencing risk management and compliance, and evolving technologies.

Prerequisite(s): HLTH 1000 or HLTH 1001, or permission of the department.

Lecture and seminar three hours a week.

HLTH 3201 [0.5 credit] Epidemiology

Basic concepts of epidemiologic study designs and measures; inferences that are fundamental to the identification of causes and prevalence of diseases. Specialized issues within epidemiology including gene-environment interactions and the clustering of specific disease phenotypes.

Includes: Experiential Learning Activity
Precludes additional credit for NEUR 3003.
Prerequisite(s): STAT 2507 and HLTH 2001, or
permission of the department.

Lecture three hours a week, lab/workshop two hours a week.

HLTH 3302 [0.5 credit]

Immunity and Immune-Related Disorders

Basic processes relevant to the immune system; the relationship between immune activity and functioning as related to the development of particular pathologies, such as virally-related illness, autoimmune disorders, inflammatory illnesses, and interactions with social and economic factors that promote immune-related disturbances.

Includes: Experiential Learning Activity
Prerequisite(s): HLTH 2002 and BIOL 2200 or permission of the department.

Lecture three hours a week, laboratory four hours a week. Labs require regular participation outside of the scheduled lab time

HLTH 3303 [0.5 credit]

Molecular and Cellular Pathology II

Advanced concepts in cell signaling and function, cell injury and death, tissue structure and wound healing and repair. This course will integrate genetic, biochemical and physiological mechanisms that contribute to health and disease.

Includes: Experiential Learning Activity Prerequisite(s): HLTH 2002.

Lecture three hours a week, lab four hours a week.

HLTH 3322 [0.5 credit]

Immunity and Immune Related Disorders

Basic processes relevant to the immune system; the relationship between immune activity and functioning as related to the development of particular pathologies, such as virally-related illness, autoimmune disorders, inflammatory illnesses and interactions with social and economic factors that promote immune-related disturbances. Non-Health Science Majors only. Also listed as HLTH 3302.

Prerequisite(s): HLTH 2002 and BIOL 2200, or permission of the department. Not open to Health Science students. Lecture 3 hours a week.

HLTH 3401 [0.5 credit] Diseases of Childhood

Epidemiological, psychological and physiological basis for disease in childhood and adolescence. Topics will be discussed from a global and Canadian perspective and include the medicalization of these diseases.

Includes: Experiential Learning Activity

Prerequisite(s): HLTH 2002 and HLTH 2003 or permission of the department.

Lecture three hours a week.

HLTH 3402 [0.5 credit] Diseases of Aging

Aging is accompanied by increased illness related to cardiovascular, immune and neurodegenerative processes. This course assesses the fundamental mechanisms that determine these pathological conditions. Molecular mechanisms and psychosocial determinants; intervention and therapeutic strategies.

Prerequisite(s): HLTH 2002 and HLTH 2003 or permission of department.

Lecture three hours a week.

HLTH 3403 [0.5 credit] Gender and Health

The role of gender on psychosocial and biological mechanisms that alter the course of disease and treatment; health issues unique to women (e.g., reproductive and maternal health); the role of gender across cultures.

Prerequisite(s): HLTH 2002 and HLTH 2003, or permission of the department.

Lecture and seminar three hours a week.

HLTH 3404 [0.5 credit]

Psychosocial and Biological Interactions in Health

The psychosocial and biological mechanisms that interact to influence health outcomes. Cultural, political, socioeconomic, and psychological factors that can impact the biological mechanisms underlying both mental and physical health; epigenetic and genetic alterations; implications for psychosocial interventions.

Precludes additional credit for HLTH 4402 (no longer offered).

Prerequisite(s): HLTH 2002 and HLTH 2003 or permission of the department.

Lecture and seminar three hours a week.

HLTH 3503 [0.5 credit] Disability and Chronic Health Conditions

An interdisciplinary view of disability and chronic health conditions, including risk factors, prevalence, and the trajectory of such conditions. Functional impact based on life stage. Strategies for health promotion, prevention, accommodations, treatment, and rehabilitation. Prerequisite(s): HLTH 2002 and HLTH 2003 or permission of the department.

Lecture three hours a week.

HLTH 3901 [0.5 credit]

Emerging Issues in Health Sciences I

These courses enable students to develop an understanding of the current state of research and practice in Health Sciences. They provide the opportunity to bring together knowledge from other courses, and for skills development including teamwork, communication and critical thinking.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing and above in the
BHSc program, an overall CGPA of at least 8.5 and
permission of the Department of Health Sciences.
Seminars three hours a week.

HLTH 3902 [0.5 credit] Emerging Issues in Health Sciences II

These courses enable students to develop an understanding of the current state of research and practice in Health Sciences. They provide the opportunity to bring together knowledge from other courses and for skills development, including teamwork, communication and critical thinking.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing and above in the
BHSc program, an overall CGPA of at least 8.5 and
permission of the Department of Health Sciences.
Seminars three hours a week.

HLTH 3903 [0.5 credit]

Emerging Issues in Health Sciences III

These courses enable students to develop an understanding of the current state of research and practice in Health Sciences. They provide the opportunity to bring together knowledge from other courses and for skills development, including teamwork, communication and critical thinking.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing and above in the
BHSc program, an overall CGPA of at least 8.5 and
permission of the Department of Health Sciences.
Seminars three hours a week.

HLTH 3904 [0.5 credit]

Emerging Issues in Health Sciences IV

These courses enable students to develop an understanding of the current state of research and practice in Health Sciences. They provide the opportunity to bring together knowledge from other courses and for skills development, including teamwork, communication and critical thinking.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing and above in the
BHSc program, an overall CGPA of at least 8.5 and
permission of the Department of Health Sciences.
Seminars three hours a week.

HLTH 3905 [0.5 credit]

Emerging Issues in Health Sciences V

These courses enable students to develop an understanding of the current state of research and practice in Health Sciences. They provide the opportunity to bring together knowledge from other courses and for skills development, including teamwork, communication and critical thinking.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing and above in the
BHSc program, an overall CGPA of at least 8.5 and
permission of the Department of Health Sciences.
Seminars three hours a week.

HLTH 4101 [0.5 credit] Global Health Governance

Contemporary issues and debates in global health governance and effects on health monitoring and outcomes at individual and population levels. Historical patterns of global health, its regulatory framework, principal coordinating mechanisms and emerging challenges, and implications of globalization and international trade policies.

Prerequisite(s): HLTH 3101, or permission of the department.

Lecture and seminar three hours per week.

HLTH 4102 [0.5 credit] New Health Technologies

Overview of new and emerging health technologies, including medical and assistive devices, diagnostics and screening, genetics, reproduction, tissue regeneration, imaging, and health informatics. Health technology assessment methods and issues. Regulatory, ethical and social implications; considerations in the developing world.

Prerequisite(s): HLTH 1000 or HLTH 1001 and third-year standing or higher, or permission of the department. Also offered at the graduate level, with different requirements, as HLTH 5350, for which additional credit is precluded.

Lecture and seminar three hours a week.

HLTH 4201 [0.5 credit] Applied Health Statistics

Statistics concepts and procedures used in the analysis of health data; techniques commonly used to analyze data collected from different types of epidemiological and experimental study designs; how to interpret and present statistical findings.

Includes: Experiential Learning Activity

Prerequisite(s): HLTH 3201 and STAT 2507 or permission of the department.

Lecture three hours a week, lab/workshop two hours a week.

HLTH 4202 [0.5 credit]

Health Program Evaluation Tools and Methods

Introduction to concepts, principles and processes of evaluating health care programs and interventions. Methodological tools including needs assessment, project management skills, use of health information management databases. Issues in communication with stakeholders, including change management and decision making. Prerequisite(s): HLTH 2001 and STAT 2507 or permission of the department.

Lecture and seminar three hours a week.

HLTH 4301 [0.5 credit] Pandemics and Infectious Disease

Factors that influence disease processes, including viruses, bacteria, protozoa, fungi and infectious agents, how these agents come to have the effects that they do in a given individual, how they spread within and how to limit their spread.

Prerequisite(s): HLTH 2004 and HLTH 3302 or permission of the department.

Lecture three hours a week.

HLTH 4302 [0.5 credit]

Inflammatory and Endocrine Factors in Diseases

Inflammatory and hormonal processes and their relevance to disease states. Immune-related disorders, heart disease and stroke, metabolic syndrome, diabetes, psychiatric conditions, and neurodegenerative disorders. The contribution of psychosocial and genetic factors to diseases.

Prerequisite(s): HLTH 3302 or BIOL 4200 or permission of the department.

Lecture three hours a week.

HLTH 4303 [0.5 credit]

Fundamentals in Pharmacology and Toxicology

Introduction to pharmacological principles, xenobiotics and their interactions within living systems. Topics include biological mechanisms of action of xenobiotics on macromolecules, cells and their effects on various organ systems. Social, legal and governmental policies will be discussed.

Prerequisite(s): HLTH 3303 or permission of the department.

Lecture and seminar three hours a week.

HLTH 4304 [0.5 credit] **Host-Pathogen Interactions**

Advanced cellular and molecular mechanisms governing host-pathogen interactions and their contribution to disease. Exploration of immune signaling and recognition, virulence factors, antimicrobial resistance and research techniques used in this field.

Prerequisite(s): HLTH 2004 and HLTH 3302 or permission of the department.

Also offered at the graduate level, with different requirements, as HLTH 5403, for which additional credit is

Seminar three hours per week.

HLTH 4401 [0.5 credit]

Maternal and Perinatal Determinants of Health

The integrated genetic, physiologic and environmental events occurring in early life that impact pregnancy, fetal/infant development and disease risk throughout the lifecourse, with a focus on the mechanisms driving these events.

Prerequisite(s): HLTH 2003 and HLTH 3302 or permission of the department.

Lecture three hours a week.

HLTH 4502 [0.5 credit] Disabilities and Disorders Related to Sensory Nervous System

Congenital and acquired disabilities related to sensory organs and processes, including visual and hearing impairments, vestibular and balance disorders, reflex problems, and others. Interdisciplinary approach to causes, mechanisms, accessibility, accommodations and interventions.

Includes: Experiential Learning Activity

Precludes additional credit for HLTH 3501 (no longer

Prerequisite(s): Either 1) HLTH 3503 and (BIOL 2005 or BIOL 3305 or BIOL 3306), or 2) NEUR 3206, or 3) permission of the department.

Lecture three hours a week, workshop two hours a week.

HLTH 4503 [0.5 credit]

Trauma-related Disability and Impairments

Biomedical and psychosocial factors associated with trauma-related illnesses, stressors, injuries and disabilities, including traumatic brain injury, spinal cord injury, fractures, amputations, burns, post-traumatic stress disorder, and others. Short- and long-term considerations for care and rehabilitation.

Precludes additional credit for HLTH 3502 (no longer

Prerequisite(s): HLTH 3503 and (BIOL 2005 or BIOL 3305 or BIOL 3306) or permission of the department. Lecture three hours a week.

HLTH 4601 [0.5 credit]

Environmental Pollution and Health

Introduction to environmental and occupational health; detection, assessment, management and mitigation of chemical, physical and biological hazards.

Prerequisite(s): HLTH 3104 or permission of the department.

Lecture and seminar three hours a week.

HLTH 4701 [0.5 credit]

Knowledge Translation

The application of knowledge translation in the formulation of policy and the development of skills required to maximize the impact of scientific findings through real world programs and policies and communication skills for diverse audiences.

Prerequisite(s): fourth-year standing and permission of the Department of Health Science and permission of the

Also offered at the graduate level, with different requirements, as HLTH 5300, for which additional credit is precluded.

Seminar three hours a week.

HLTH 4901 [0.5 credit] Directed Studies in Health

Independent study, open to third- and fourth-year students to explore a particular health related topic, in consultation with a Faculty supervisor. May include directed reading, written assignments, tutorials, laboratory or field work. Includes: Experiential Learning Activity Prerequisite(s): third- or fourth-year standing in the B.H.Sc. program, in addition to permission of the Faculty supervisor and the Department of Health Sciences.

HLTH 4906 [1.0 credit]

Capstone course - Research Essay

Independent critical review and research proposal on a health- related topic, using library, database and/or bioinformatics resources, under the supervision of the course instructor. Seminar topics include identification and critical review of resources, development of scientific writing skills, and formulation of health science-related research.

Includes: Experiential Learning Activity
Precludes additional credit for HLTH 4907, HLTH 4908
(no longer offered), HLTH 4909, HLTH 4910.
Prerequisite(s): fourth-year standing in the B.H.Sc.
Honours and permission of the Department of Health Sciences.

Lecture/seminar three hours a week.

HLTH 4907 [1.0 credit]

Capstone Course - Group Research Project

A collaborative project on a health related topic. Students, working together as a team, will complete a research project and develop communication and research skills under the supervision of the faculty supervisor. Evaluation will be based on a written report and oral presentation. Includes: Experiential Learning Activity Precludes additional credit for HLTH 4906, HLTH 4908 (no longer offered), HLTH 4909, HLTH 4910. Prerequisite(s): fourth-year standing in the B.H.Sc. Honours program, one of HLTH 3901, HLTH 3902, HLTH 3903, HLTH 3904 or HLTH 3905, a major CGPA of at least 9.0, and permission of the Faculty supervisor and the Department of Health Sciences.

Seminars three hours a week as scheduled by the course instructor; other hours as arranged with the Faculty Adviser.

HLTH 4909 [1.0 credit]

Health Sciences.

Capstone Course – Field Placement and Research Project

Field placement providing practical experience in a health-related field. Placements may be in institutional or community settings, governmental or non-governmental organizations. Sites may vary each year. Evaluation based on a written report and an oral presentation.

Includes: Experiential Learning Activity
Precludes additional credit for HLTH 4906, HLTH 4907,

HLTH 4908 (no longer offered), HLTH 4910.

Prerequisite(s): fourth-year standing in B.H.Sc. Honours; and one of HLTH 3901, HLTH 3902, HLTH 3903, HLTH 3904 or HLTH 3905; and a minimum Overall and Major CGPA of 9.0; and permission of the Department of

Schedules may vary depending on the field placement site, but students are required to spend a minimum of eight hours per week on-site and attend required seminars as arranged by the course instructor.

HLTH 4910 [1.0 credit] Honours Individual Research Thesis

An independent health related research project under the direct supervision of a faculty member. Evaluation will be based on a written thesis and oral poster presentation (oral or poster).

Includes: Experiential Learning Activity Precludes additional credit for HLTH 4906, HLTH 4907, HLTH 4908, HLTH 4909.

Prerequisite(s): fourth-year standing in B.Sc. Honours Health Sciences, one of HLTH 3901, HLTH 3902, HLTH 3903, HLTH 3904 or HLTH 3905, a major CGPA of at least 10.0, and permission of the Faculty advisor and the Department of Health Sciences. Permission will depend, in part, on capacity, such that meeting the minimum requirements does not guarantee enrollment in this research thesis course.

History

This section presents the requirements for programs in:

- · History B.A. Honours
- · History B.A. Combined Honours
- History with Concentration in Public History B.A. Honours
- History with Concentration in Public History B.A. Combined Honours
- · History B.A.
- Minor in History
- Specialization in Global and Transnational History B.G.In.S. Honours
- Stream in Global and Transnational History B.G.In.S.

Program Requirements

Course Categories

Students admitted prior to 2023 must refer to the calendar archives and/or History departmental website for information regarding the History field requirement.

History

B.A. Honours (20.0 credits)

The requirements for this program are modified when the Honours Research Project is included.

A. Credits Included in the Major CGPA (10.0 credits)

	A. Credits included in the Major COPA (10.0 Credits)

Regulations

First Year Courses

There is a limit on the number of HIST courses permitted in a History program. To avoid having courses designated Extra to Degree (ETD), students should not exceed the following numbers of 1000-level HIST and/or FYSM courses designated with topics in history:

- B.A. Honours: 2.0 credits maximum
- B.A. Combined Honours: 1.0 credit maximum
- B.A.: 1.5 credits maximum

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

B.G.In.S. Regulations

The regulations presented in this section apply to all Bachelor of Global and International Studies programs.

In addition to the program requirements and requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.G.In.S degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit of FYSM and can only register in a FYSM while they have first-year standing in their B.G.In.S program.

Change of Specialization or Stream Within the B.G.In.S Degree

Students may change specialization or stream, or change from/to specialization or stream within the B.G.In.S. during the first or subsequent years of study if, upon entry to the new specialization or stream, they would be in good academic standing.

Minors

Students may apply to the Registrar's Office to be admitted to a minor during their first or subsequent years of study. Acceptance into a minor is normally subject to meeting the minimum CGPA requirements described in Section 3.1.9 of the *Academic Regulations of the University*, as well as any specific requirements of the intended minor as published in the relevant Calendar entry. B.G.In.S. Honours students may take a maximum of one minor.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be

reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.

 Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours History: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.A. Honours History program;
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 8.00. This CGPA must be maintained throughout the duration of the degree.

B.A. Honours History students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view

the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Direct Admission to the First Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European, Russian, and Eurasian Studies, French, Geography, Geography with a Concentration in Physical Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Degrees

- Bachelor of Global and International Studies (B.G.In.S.) (Honours)
- Bachelor of Global and International Studies (B.G.In.S.)

Admission Requirements

First Year

B.G.In.S. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*) and a FIF4U course for students applying to the Specialization in French and Francophone Studies. Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

B.G.In.S.

No direct entry; access is restricted.

Advanced Standing

B.G.In.S. (Honours)

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and stream selected.

B.G.In.S.

No direct entry. Access is restricted to students in the B.G.In.S. (Honours) program who apply to transfer.

History (HIST) Courses

Please note: not all of the following courses are offered in a given year. Consult the public class schedule at Carleton Central for the most up-to-date offerings. For further details concerning courses, see the departmental website at carleton.ca/history.

4000-level History **seminars** have limited enrolment. Priority in enrolment is given to students in History Honours and Combined Honours programs.

Topics in 4000-level History **seminars** change from year to year. Current topics are posted on the department's website at carleton.ca/history

HIST 1003 [0.5 credit]

Empire, War, and Revolution in Europe, 1850-1939

Examination of Europe from the mid-nineteenth century through the 1930s. Emphasis on how nation-building, empire, war, and revolution transformed Europe's politics, culture, society, and relationship to the world. Provides context for understanding contemporary Europe. (Field b). Precludes additional credit for HIST 1002 (no longer offered).

Lectures/groups three hours a week.

HIST 1004 [0.5 credit] Europe in War; Cold War

Examination of Europe from the Second World War through the Cold War and beyond. Topics may include wartime occupation regimes and resistance movements; the Holocaust; Cold War divisions and memory cultures; decolonization and migration; youth cultures and protest; and the collapse of communist regimes.

Precludes additional credit for HIST 1002 (no longer offered).

Lectures/groups three hours a week.

HIST 1010 [0.5 credit] History of Northern Canada

A historical introduction to northern Canada from precontact times to the present. Open only to students in the Nunavut Public Administration certificate program. (Field c).

HIST 1301 [0.5 credit]

Conflict and Change in Early Canadian History

This course explores how colonialism and conflict altered peoples, cultures, and places in what came to be called Canada from pre-contact to the first age of industrialization. Course covers subjects including imperialism, Indigenous-settler relations, slavery, migration, and government, providing context for contemporary issues.(Field c).

Precludes additional credit for HIST 1300 (no longer offered).

Lectures/groups three hours a week.

HIST 1302 [0.5 credit] Rethinking Modern Canadian History

This course explores how major political, economic, legal, social, and cultural changes shaped modern-day Canada from the late 1800s to the present. It provides context for contemporary issues, including colonialism, redress, reconciliation, race relations, migration and urbanization, globalization, technology, and the environment. (Field c). Precludes additional credit for HIST 1300 (no longer

Lectures/groups three hours a week.

HIST 1701 [0.5 credit] History of the Global South, 1400-1850

This course follows the global community from 1400 to the mid-nineteenth century exploring how global connections, movements and trends have shaped our world. Emphasis on the non-western world. (Field a or d). Precludes additional credit for HIST 1707 (no longer offered).

Lectures/groups three hours a week.

HIST 1702 [0.5 credit]

History of the Global South, 1850 to the present

This course follows the global community from the midnineteenth century to the present exploring how global connections, movements and trends have shaped our world. Emphasis on the non-western world. (Field a or d). Precludes additional credit for HIST 1707 (no longer offered).

Lectures/groups three hours a week.

HIST 1900 [0.5 credit] Topics in History

A lecture course on a special topic, theme, or period. Topic varies from year to year. (Field will depend on topic).

Lectures/groups three hours a week.

HIST 1901 [0.5 credit] History of Sport

This course critically analyzes the evolution of sport from antiquity to the present. The course examines how sport reflects and shapes political and socio-economic processes and what it tells us about class, gender, race, nationalism, imperialism, doping and the cult of celebrity. (Field e).

Lectures/groups three hours a week.

HIST 2003 [0.5 credit]

The Early Medieval World: 300-1000

The history of medieval global societies across Europe, Asia and Africa from the fourth to the tenth century as an 'Age of Experiment' – fragmenting, transforming and diversifying politics, culture and religion. Students will read a wide range of medieval sources in translation. (Field a). Precludes additional credit for HIST 2000, HIST 2001, and HIST 2002 (no longer offered).

Lectures/groups three hours a week.

HIST 2004 [0.5 credit]

The Late Medieval World: 1000-1500

The history of medieval global societies across Europe, Asia and Africa from the eleventh to the sixteenth century as an "Age of Connection" – expanding communication, co-operation and conflict. Students will read a wide range of medieval sources in translation. (Field a).

Precludes additional credit for HIST 2000, HIST 2001,

HIST 2002 (no longer offered).

Lectures/groups three hours a week.

HIST 2204 [0.5 credit] Early Modern Europe 1350-1650

A survey of the major social, political and cultural developments in continental Europe from the 14th to the 17th centuries. (Field a).

Precludes additional credit for HIST 2203 (no longer offered).

Lectures/groups three hours a week.

HIST 2206 [0.5 credit] Early Modern Europe 1600-1800

A survey of the major social, political and cultural developments in continental Europe during the 17th and 18th centuries. (Field a).

Precludes additional credit for HIST 2203 (no longer offered).

Lectures/groups three hours a week.

HIST 2301 [0.5 credit] Canadian Political History

An historical survey of political experiences in Canada. (Field c).

Precludes additional credit for HIST 2303 (no longer offered).

Lectures/groups three hours a week.

HIST 2304 [1.0 credit]

Social and Cultural History of Canada

A thematic exploration of how the spaces of home, work, and play have been historically produced, understood, and experienced in Canada. (Field c).

Lectures/groups three hours a week.

HIST 2308 [0.5 credit] Colonial Latin America

From ancient civilizations to the era of Independence, this class follows conquest, colonization and development of national identity in the countries of Latin America. (Field d).

Precludes additional credit for HIST 2307 (no longer offered).

Lectures/groups three hours a week.

HIST 2309 [0.5 credit] Modern Latin America

From the Wars of Independence until the end of the twentieth century, this class follows the emergence of Latin American nations, their economies, politics, culture and international relations. (Field d).

Precludes additional credit for HIST 2307 (no longer offered).

Lectures/groups three hours a week.

HIST 2311 [0.5 credit] Environmental History of Canada

A survey of Canadian history considering nature, landscape and geography. Topics include the history of energy regimes and climate change; Indigenous ecological knowledge; colonization and settlement; resource extraction; commodity production; environmental policies and movements.(Field c or e).

Precludes additional credit for HIST 2310 (no longer offered).

Lectures/groups three hours a week.

HIST 2312 [0.5 credit]

History of the Indian Ocean World

The Indian Ocean is one of the oldest maritime highways in the history of humanity and also an epicentre of global economy in the pre-modern world. The aim of the course is to familiarize students with the non-Western antecedents of modern global history. (Field d). Precludes additional credit for HIST 3716 (no longer offered).

Lectures/groups three hours a week.

HIST 2401 [0.5 credit]

History of the United States to 1865

A survey of United States politics and society from the American Revolution to the Civil War. (Field c). Precludes additional credit for HIST 2400 (no longer offered).

Lectures/groups three hours a week.

HIST 2402 [0.5 credit]

History of the United States from 1865

A survey of United States politics and society from Reconstruction to the era of globalization. (Field c). Precludes additional credit for HIST 2400 (no longer offered).

Lectures/groups three hours a week.

HIST 2501 [0.5 credit] **Early Modern Britain**

A survey of significant political and social developments in Britain from the 15th to the 17th century. (Field a). Precludes additional credit for HIST 2500 (no longer

Lectures/groups three hours a week.

HIST 2502 [0.5 credit]

Modern Britain & Empire Before 1914

A survey of significant political, social, economic, and cultural developments in Britain and its empire in the eighteenth and nineteenth centuries. (Field b). Includes: Experiential Learning Activity Lectures and groups three hours a week.

HIST 2506 [0.5 credit]

Introduction to Women's and Gender History

An introductory study of women's and gender history. Themes may include sexuality, masculinity, women's activism, consumer culture, religion, and reproductive rights. Geographic and temporal focus varies from year to year. (Field e).

Precludes additional credit for HIST 2504 (no longer offered).

Lectures/groups three hours a week.

HIST 2508 [0.5 credit]

War, Politics, and Society in Twentieth-Century Global France

A study of France in global context from the late 19th century to the present. Topics include the First and Second World Wars, colonialism and decolonization, the Algerian War, youth culture and protest, and memory and commemoration. (Field b).

Precludes additional credit for HIST 2505 (no longer offered).

Lectures/groups three hours a week.

HIST 2510 [0.5 credit] 19th-Century Germany

The social, cultural, and political history and impact of German nationhood. Topics include the rise of social democracy and the feminist movements, alliance and empire building, scientific racism, sexology, and the emancipation and assimilation of German Jews into the body politic. (Field b).

Precludes additional credit for HIST 2509 (no longer offered).

Lectures/groups three hours a week.

HIST 2511 [0.5 credit] 20th-Century Germany

A survey of social, cultural, and political tensions and developments in Germany from World War One to the Fall of the Berlin Wall. (Field b).

Precludes additional credit for HIST 2509 (no longer offered).

Lectures/groups three hours a week.

HIST 2512 [0.5 credit]

Modern Britain & Empire, 1914-present

A survey of significant political, social, economic, and cultural developments in Britain and empire through the long twentieth century, including decolonization, devolution, and Brexit. (Field b).

Includes: Experiential Learning Activity Lectures and groups three hours a week

HIST 2706 [0.5 credit] **Ancient and Pre-Colonial Africa**

Ancient African cultures and civilizations, the trans-Saharan trade system, and the trans-Atlantic and Indian Ocean slave trades from 600 BCE to the 19th century. (Field d).

Precludes additional credit for HIST 2705 (no longer offered).

Lectures/groups three hours a week.

HIST 2707 [0.5 credit] Modern Africa

The conquest and colonization of African polities by the European imperial powers from the late 19th century, the 20th century wars of decolonization, and the emergence of independent African nations, including their economies, politics, and culture. (Field d).

Precludes additional credit for HIST 2705 (no longer offered).

Lectures/groups three hours a week.

HIST 2710 [0.5 credit] Introduction to Caribbean History

Introduction to the history of the Caribbean that examines the indigenous populations, the role of colonialism and slavery in the construction of plantation societies, the impact of emancipation, and the social, cultural, economic, and political dynamics of the Caribbean in the postemancipation period. (Field d).

Precludes additional credit for HIST 2704 (no longer offered).

Lectures/groups three hours a week.

HIST 2804 [0.5 credit] War and Society

A thematic study of the experience of war and its consequences. Time period, region of the world, and thematic focus to be studied will vary. (field e). Precludes additional credit for HIST 2801 (no longer offered).

Lectures/groups three hours a week.

HIST 2806 [1.0 credit] History of Japan

A survey of Japanese history from the legendary beginning of the country in 660 B.C. to the end of World War Two. (Field a or d).

Lectures/groups three hours a week.

HIST 2809 [0.5 credit] The Historian's Craft

Lectures and workshops on historical methods and materials. Topics will include the discovery, evaluation, use and analysis of documents in historical context, non-documentary evidence, statistics, and bibliographical tools.

Includes: Experiential Learning Activity

Precludes additional credit for HIST 2808 [1.0 credit], no longer offered.

Prerequisite(s): open only to History majors with at least second-year standing.

Lectures/groups three hours a week.

HIST 2811 [0.5 credit]

Public History from Memory to Museums

Historical representation in the public arena and public engagement with the past, including archives, museums, films, novels, and video games. This course will involve online work, collaborative projects, and field trips. (Field e).

Includes: Experiential Learning Activity Lectures three hours a week or online.

HIST 2812 [0.5 credit]

Special Subject in Public History

A lecture course on a special topic, theme, or period in public history. Topic varies from year to year. (Field e). Lectures three hours a week.

HIST 2902 [0.5 credit] Origins of the Greeks

The history of ancient Greece from the Bronze Age through the Archaic period. (Field a).

Also listed as CLCV 2902.

Precludes additional credit for CLCV 2900, HIST 2900 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit

Lectures three hours a week.

HIST 2903 [0.5 credit] Democracy to Alexander

The history of ancient Greece from the classical period to Alexander. (Field a).

Also listed as CLCV 2903.

Precludes additional credit for CLCV 2900, HIST 2900 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit.

Lectures three hours a week.

HIST 2904 [0.5 credit] Rise of the Roman Empire

The history of ancient Rome from early Rome to the end of the Republic (Field a).

Also listed as CLCV 2904.

Precludes additional credit for CLCV 2901 and HIST 2901 (no longer offered).

Prerequisite(s): second-year standing or permission of the unit

Lectures three hours a week.

HIST 2905 [0.5 credit]

Rome of the Caesars

The history of ancient Rome from the end of the Republic to the coming of Islam. (Field a).

Also listed as CLCV 2905.

Precludes additional credit for CLCV 2901, HIST 2901 (no longer offered).

Prerequisite(s): second-year standing or permission of the

Lectures three hours a week.

Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history including at least 0.5 credit in Field d courses (Asia, Africa, the Caribbean, and Latin America).

Lectures three hours a week.

HIST 3814 [0.5 credit] Crafting Digital History

This course applies the creative use of information and media/computing technologies to address the digital cultural heritage issues of public historians, archaeologists, and anthropologists. Topics may include webscraping, data mining, designing and implementing research databases, and visual storytelling of those results. (Field e).

Includes: Experiential Learning Activity

Also listed as DIGH 3814.

Precludes additional credit for HIST 3907 Section "B" offered in winter 2015 and HIST 3907 Section "O" offered in winter 2016.

Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.

Lectures three hours a week or online.

HIST 3815 [0.5 credit] Group Practicum

A class-based group historical research project done in collaboration with an external institution under the supervision of the institution and the Department. Work includes readings, reports, and meetings. Students should be prepared to devote one full day per week to the project. (Field e).

Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in a History program and permission of the Department.

HIST 3820 [0.5 credit] Explorations in Historical Theory

Taking a specific historical topic as its focus, this course examines how historians have applied a wide range of theoretical approaches in order to understand and interpret that topic's historical significance. Topics will vary.

Prerequisite(s): HIST 2809, or permission of the unit. Lectures two hours a week and one hour discussion group.

HIST 3902 [0.5 credit] Topics in European History

A lecture course on a special topic in European history. Topic varies from year to year. (Field will depend on topic.).

Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.

Lectures three hours a week.

HIST 3903 [0.5 credit] Topics in Canadian History

A lecture course on a special topic in Canadian history. Topic varies from year to year. (Field c). Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.

Lectures three hours a week.

HIST 3904 [0.5 credit] Topics in U.S. History

A lecture course on a special topic in United States history. Topic varies from year to year. (Field c). Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history. Lectures three hours a week.

HIST 3905 [0.5 credit]

Topics in International History

A lecture course on a special topic in international political or economic history. Topic varies from year to year. (Field b).

Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history. Lectures three hours a week.

HIST 3906 [0.5 credit] Topics in World History

A lecture course on a special topic in African, Asian, Caribbean, or Latin American history. Topic varies from year to year. (Field d).

Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.

Lectures three hours a week.

HIST 3907 [0.5 credit] Transnational Topic

A lecture course on a special topic that takes a transnational approach to history. Course content will vary from year to year. (Field e).

Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.

Lectures three hours a week.

HIST 3908 [0.5 credit]

Thematic Topic

A lecture course on a special topic that takes a thematic approach to history. Course content will vary from year to year. (Field e).

Prerequisite(s): a 2000-level history course or third-year standing and 1.0 credit in history.

Lectures three hours a week.

HIST 3909 [0.5 credit] Topic in Public History

A lecture course on a special topic, theme, or period in public history. Topic varies from year to year. (Field e). Prerequisite(s): a 2000-level history course, or third-year standing and 1.0 credit in history. Lectures three hours a week.

HIST 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

HIST 4006 [1.0 credit] Seminar in Medieval History

An examination of a selected problem in the history of medieval Europe.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4007 [0.5 credit] Medieval History

Selected topic in Medieval History. The topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4100 [1.0 credit]

Seminar in Early Modern European History

A study of a selected problem in the history of Europe during the early modern period.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4101 [0.5 credit]

Early Modern European History

Selected topic in the history of Europe during the early modern period. The topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4200 [1.0 credit] Seminar in European History

Examination of a selected problem or period in the history of Continental Europe.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4201 [0.5 credit] Modern European History

Selected topic in the history of Europe. The particular topic will be specified each year it is offered. Prerequisite(s): HIST 3810 or HIST 3820, fourth-year standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4210 [0.5 credit]

Topics in Ancient History

Intended for Honours students in History and Classics who should normally be in their third- or fourth-year. Also listed as CLCV 4210.

Precludes additional credit for CLCV 4209, HIST 4209 (no longer offered).

Prerequisite(s): CLCV 2902 (HIST 2902) and CLCV 2903 (HIST 2903) or CLCV 2904 (HIST 2904) and CLCV 2905 (HIST 2905) or CLCV 3201 (HIST 3009) or CLCV 3202 (HIST 3101) or permission of the Department. Seminar three hours a week.

HIST 4302 [1.0 credit] Canada: Ideas & Culture

A seminar on ideas, culture, and society in Canada. Prerequisite(s): HIST 3810 or HIST 3820, fourth-year standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4303 [0.5 credit] Society and Culture in Canada

A 0.5 credit seminar course that examines a selected topic on ideas, culture, and society in Canada. The particular topic will be specified each year it is offered. Prerequisite(s): HIST 3810 or HIST 3820, fourth-year standing in Honours History, or permission of the Department.

Seminar three hours a week.

HIST 4304 [1.0 credit] Canada: Politics & Society

A seminar on politics and society in Canada. Prerequisite(s): HIST 3810 or HIST 3820, fourth-year standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4305 [0.5 credit]

Political History in Canada

A 0.5 credit seminar course that examines a selected topic on politics and society in Canada. The particular topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4400 [1.0 credit] Seminar in U.S. History

An examination of a selected problem or period in the history of the United States.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4401 [0.5 credit] United States History

A 0.5 credit seminar course that examines a selected topic in the history of the United States. The particular topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4500 [1.0 credit] Seminar in British History

An explanation of a selected problem or period in the history of Great Britain.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4501 [0.5 credit] British History

An explanation of a selected problem or period in the history of Great Britain.

Includes: Experiential Learning Activity

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4505 [1.0 credit]

Seminar in Women's and Gender History

A seminar on the history of women and gender. The particular approach, themes, and historical period will be specified each year.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4506 [0.5 credit]

Gender, Sexuality and Women's History

A 0.5 credit seminar course that examines a selected topic on the history of women and gender. The particular topic will be specified each year it is offered. Prerequisite(s): HIST 3810 or HIST 3820, fourth-year standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4600 [1.0 credit] Seminar in Russian History

An examination of a selected problem or period in the history of Imperial or post-Imperial Russia. Prerequisite(s): HIST 3810 or HIST 3820, fourth-

year standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4604 [0.5 credit] Central Europe, Past and Present

Evolution and current status of Central Europe from periods of foreign control in the late nineteenth and twentieth centuries to independent statehood. Particular emphasis will be placed on national accommodations and conflicts.

Also listed as EURR 4204.

Prerequisite(s): HIST 3810, fourth-year standing in Honours History or permission of the Department. Seminar three hours a week.

HIST 4605 [0.5 credit]

The Balkans in Transition – 1918 to 1989

The seminar uses the concept of transition to understand the Balkan encounter with modernity and Europe. Key periods to be examined include the interwar era and the period of communist rule, with an emphasis on political, social and economic themes.

Also listed as EURR 4101.

Prerequisite(s): Fourth-year standing and one of PSCI 3208, PSCI 3209; or permission of the Department. Seminar three hours a week.

HIST 4606 [0.5 credit]

Contemporary Europe: From Postwar to the European Union

History of contemporary Europe from 1945 to present covering both eastern and western halves of the continent and including social, cultural, political, and economic dimensions.

Includes: Experiential Learning Activity

Also listed as EURR 4303.

Prerequisite(s): HIST 3810, fourth-year standing in Honours History or permission of the Department.

Seminars three hours a week.

HIST 4607 [0.5 credit]

Imperial Russia and the Russian Revolution

Examination of the expansion and downfall of tsarist Russia from the eighteenth century to the revolutionary era and the establishment of Bolshevik rule. Topics include the relationship between the monarchy and subject peoples, social and economic change, and daily life.

Includes: Experiential Learning Activity

Also listed as EURR 4305.

Also offered at the graduate level, with different requirements, as HIST 5607, for which additional credit is precluded.

Seminar three hours a week.

HIST 4608 [0.5 credit] The Soviet Union

Examination of the rise of the Soviet Union to a global power and subsequent tensions that promoted its collapse. The course will analyze Stalinism, the Second World War, the Thaw, and Brezhnev and Gorbachev eras through the lens of the USSR's citizens.

Includes: Experiential Learning Activity

Also listed as EURR 4306.

Also offered at the graduate level, with different requirements, as HIST 5608, for which additional credit is precluded.

Seminar three hours a week.

HIST 4700 [1.0 credit] Seminar in World History

An examination of a selected problem or period in the history of Asia, Africa, the Caribbean or Latin America. Prerequisite(s): HIST 3810 or HIST 3820, fourth-year standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4701 [0.5 credit]

African History

A 0.5 credit seminar course that examines a selected topic in the history of Africa. The particular topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4702 [0.5 credit] South Asian History

A 0.5 credit seminar course that examines a selected topic in the history of South Asia. The particular topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4703 [0.5 credit] The Global South

A 0.5 credit seminar course that examines a selected topic in the history of the Global South. The particular topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4704 [0.5 credit] Caribbean and Latin American History

A 0.5 credit seminar course that examines a selected topic in Caribbean and Latin American history. The particular topic will be specified each year it is offered. Prerequisite(s): HIST 3810 or HIST 3820, fourth-year standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4705 [0.5 credit] Asian History

A 0.5 credit seminar course that examines a selected topic in the history of Asia. The particular topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4802 [1.0 credit]

Seminar in International History

An examination of a selected problem or period in the history of international relations.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4805 [1.0 credit]

Seminar on a Transnational or Thematic Topic

A seminar on a transnational or thematic topic. The particular topic will be specified each year.

Prerequisite(s): HIST 3810 or 3820, fourth-year standing in

Honours History or permission of the Department. Seminar three hours a week.

HIST 4806 [0.5 credit]

Global, Transnational, or Thematic History

Selected topic in global and transnational history or on a thematic topic in history. The topic will be specified each year it is offered.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4910 [1.0 credit] Honours Research Project

A piece of original historical research conducted independently under the supervision of a faculty member and presented as either a research paper, a documentary film, or a web-based project. Does not count toward the 4th-year seminar requirement.

Includes: Experiential Learning Activity

Precludes additional credit for HIST 4908, HIST 4909 (no longer offered).

Prerequisite(s): fourth-year Honours standing with a minimum GPA of 9.0 (B+) in History courses, a faculty supervisor, a topic and mode of presentation approved by the faculty supervisor, and permission of the Undergraduate Supervisor.

HIST 4915 [0.5 credit] Topics in History

Intended for Honours students in History. Topics will vary from year to year.

Prerequisite(s): HIST 3810 or HIST 3820, fourthyear standing in Honours History or permission of the Department.

Seminar three hours a week.

HIST 4916 [0.5 credit] Topic in Public History

Topic varies from year to year.

Prerequisite(s): HIST 3809, HIST 3810, or HIST 3820, fourth-year standing in Honours History, or permission of the Department.

Seminar three hours a week.

HIST 4917 [0.5 credit] Directed Study

Independent study of an historical topic or theme under the supervision of a faculty member. A course outline specifying readings, assignments, and name of faculty member must be submitted to the Undergraduate Supervisor during the first week of the semester. Prerequisite(s): Fourth-year standing in History, minimum History GPA of 9.0, a faculty supervisor, and permission of the Undergraduate Supervisor.

A program of supervised reading and preparation of written work in an area not covered by an existing seminar.

HIST 4920 [1.0 credit] Seminar in Public History

Topic varies from year to year.

Prerequisite(s): HIST 3809, HIST 3810, or HIST 3820, fourth-year standing Honours History, or permission of the Department.

Seminar three hours a week.

History and Theory of Architecture

This section presents the requirements for programs in:

- History and Theory of Architecture B.A. Honours
- History and Theory of Architecture B.A. Combined Honours
- · History and Theory of Architecture B.A.
- · Minor in History and Theory of Architecture
- Post-Baccalaureate Diploma in History and Theory of Architecture

With the approval of the History and Theory of Architecture undergraduate supervisor, 0.5 credit may be taken outside the department.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

4.0

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention : français

Students registered in certain B.A. programs may earn the diploma notation *Mention: français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed

below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Regulations

Post-Baccalaureate Diploma

In addition to the requirements presented here, students must satisfy the University regulations (see the Academic Regulations of the University section of this Calendar).

Definition

A post-baccalaureate diploma is defined as a stand-alone undergraduate credential intended to:

- qualify a candidate for consideration for entry into a master's program, or
- bring a candidate who already possesses a bachelor's degree up to a level of a bachelor's degree of 20.0 credits or more in another discipline, or
- provide a candidate who already possesses a twentycredit bachelor's degree in the same discipline the opportunity to bring their previous studies to current equivalents and/or to examine alternative areas, or
- provide a candidate with a professional undergraduate credential for which the prior completion of an undergraduate degree program is appropriate.

Program Requirements

- A post-baccalaureate diploma is normally constituted of a minimum of 3.0 credits to a maximum of 5.0 credits of advanced undergraduate courses.
- A minimum of 3.0 residency credits counting toward the post-baccalaureate diploma.

English as a Second Language Requirement

In addition to the program requirements, completion of English as a Second Language (ESLA) courses may be required from the following sequence: ESLA 1300, ESLA 1500, ESLA 1900. No credits from this sequence will be counted toward the post-baccalaureate diploma.

Continuation

All post-baccalaureate diploma students are expected to complete their diploma requirements within two calendar years after the date of initial registration. After this period student may be withdrawn.

Graduation

- A candidate for a post-baccalaureate diploma must have an overall CGPA of at least 6.5 to graduate.
- A candidate for a post-baccalaureate diploma must obtain a grade of C- or higher in each course taken in fulfillment of the program requirements.
- Students should consult with the Department, School or Institute when planning their diploma and selecting courses.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite

averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option

Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Art and Architectural History (ARTH) Courses ARTH 1100 [0.5 credit]

Art and Society: Prehistory to 1300

A survey of art, architecture and artifacts from prehistory to 1300. Ways of understanding visual culture through this span of history.

Precludes additional credit for ARTH 1000. Lectures two hours a week, tutorial one hour a week.

ARTH 1101 [0.5 credit]

Art and Society: 1300 to the Present

A survey of art, architecture and related visual forms in their expanding contexts from 1300 to the present. Ways of understanding visual culture through this span of history.

Precludes additional credit for ARTH 1000. Lectures two hours a week, tutorial one hour a week.

ARTH 1105 [0.5 credit] Art as Visual Communication

A variety of visual material is organized topically to examine the elements of art (line, shape, value, colour, texture, space), the principles of pictorial organization, the materials and techniques of art, and recurrent tendencies in artistic styles and outlooks.

Lectures or seminars three hours a week.

ARTH 1200 [0.5 credit]

History and Theory of Architecture: Prehistory to 1500

An introduction to the history of architecture from prehistory to ca. 1500, considering technological, formal, intellectual and social developments that informed the built environment through a range of building types. Lectures two hours a week, tutorial one hour a week.

ARTH 1201 [0.5 credit]

History and Theory of Architecture: 1500 to Present

An introduction to the history of architecture from ca. 1500 to the present, considering technological, formal, intellectual, and social developments that informed the built environment through a range of building types. Precludes additional credit for ARTH 2608 (no longer offered).

Lectures two hours a week, tutorial one hour a week.

ARTH 2002 [0.5 credit]

Art in Canada

Topics may include professional and amateur artists, craftwork, art institutions, gender, nationalism, regionalism, ethnicity, race, and identity. Coverage will include artworks in local and national collections in the National Capital region.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2004 [0.5 credit]

Special Topic: Indigenous Art

Survey of an area of indigenous art history. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2007 [0.5 credit] Asian Art

Surveys Asian art from second-century China to postwar Japan. Representational strategies of court artists and artists from the capital are compared with artists on the periphery. Articulation of power in tombs, palaces and war propaganda is examined, as is the individual and the eccentric.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2009 [0.5 credit]

Art Live: Art History Workshop

Examination of techniques, materials and institutions of art history; lectures and workshops on art historical research and writing, the materials of art, professional skills; site visits to art institutions.

Includes: Experiential Learning Activity
Prerequisite(s): ARTH 1100 and ARTH 1101, or
permission of the discipline. Restricted to students
enrolled in the Art History B.A. or B.A. Honours.
Lectures or seminars three hours a week.

ARTH 2102 [0.5 credit]

Greek Art and Archaeology

The art, architecture and archaeology of ancient Greece. Vase painting, sculpture, architecture, town planning and analogous arts are studied.

Also listed as CLCV 2303.

Precludes additional credit for CLCV 2302 (no longer offered), ARTH 2100 (no longer offered).

Prerequisite(s): second-year standing or permission of the Department.

Lecture three hours a week.

ARTH 2105 [0.5 credit]

Roman Art and Archaeology

The art, architecture and archaeology of the ancient Romans. Vase painting, sculpture, architecture, town planning and analogous arts are studied.

Also listed as CLCV 2304.

Precludes additional credit for CLCV 2302 (no longer offered), ARTH 2100 (no longer offered).

Prerequisite(s): second-year standing or permission of the Department.

Lecture three hours a week.

ARTH 2106 [0.5 credit] Chinese Art and Visual Culture

A survey of Chinese art from the pre-modern era to reinventions of traditions in modern and contemporary art. Artworks in various media (ink painting, calligraphy, Buddhist sculpture, ceramics, lacquer and garden architecture) will be studied in their historical, cultural and socio-political contexts.

Prerequisite(s): second-year standing or permission of the Department.

Lecture or seminars three hours a week.

ARTH 2107 [0.5 credit] Islamic Architecture and Art

Survey of artistic movements in Islamic art and architecture in the Mediterranean, the Near East, and Central and South Asia, from the seventh century to ca. 1450. Commonalities and differences between major dynastic visual cultures will be explored.

Prerequisite(s): second-year standing or permission of the Discipline.

Lecture or seminars three hours a week.

ARTH 2108 [0.5 credit] Special Topics: Art Worlds

Survey of an area of global art history. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): second-year standing or permission of the Department.

Lectures or seminars three hours a week.

ARTH 2202 [0.5 credit]

Medieval Architecture and Art

A survey of architecture and art in Europe from ca. 313-1500 C.E. Sacred, secular, and domestic works will be discussed with reference to cultural meaning, social function, structure, and form.

Precludes additional credit for ARTH 2200 and ARTH 2201.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2300 [0.5 credit]

Renaissance Art

An examination of major works of art and architecture, issues and themes in the Renaissance; emphasis on the fifteenth and sixteenth centuries, with a look at roots in the fourteenth.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2310 [0.5 credit]

Architecture of the Early Modern World [1400-1750]

An examination of architecture from the late medieval period to the 18th century with particular attention paid to architecture and design cultures within the European and Islamic worlds and their cross-cultural interactions. Precludes additional credit for ARTH 3305 (no longer offered).

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2404 [0.5 credit]

Art of the 17th and 18th Centuries

Tracing developments in 17th- and 18th-century painting, graphic art, sculpture, and architecture. Introduction to artists, art works, and issues central to the relationship between art and society.

Precludes additional credit for ARTH 2403 (no longer offered), ARTH 2405 (no longer offered) and ARTH 2406 (no longer offered).

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2502 [0.5 credit] Art of the 19th Century

Tracing developments in 19th-century painting, graphic art, sculpture, and architecture. Introduction to artists, art works, and issues central to the relationship between art and modernity.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2503 [0.5 credit]

Art in the Global Context Since 1945

Art in the global context from 1945 to present, including abstraction, Pop Art, Postmodernism, object art, performance art and installations.

Precludes additional credit for ARTH 3600 (no longer offered).

Prerequisite(s): second-year standing or higher, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2510 [0.5 credit]

Architecture of the 18th and 19th Centuries

A survey of key monuments, theories, forms and technological developments of eighteenth- and nineteenth-century architecture.

Precludes additional credit for ARTH 3809 Section "B" taken in 2014.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2600 [0.5 credit]

European Art 1900-1945

Major artistic movements in Europe from about 1900 to 1945.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2601 [0.5 credit]

History and Theory of Photography

Issues, themes, movements in photography and individual photographers from the origins of the medium to the present.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2610 [0.5 credit]

Twentieth-Century Architecture

Developments in architectural form and culture through the course of the twentieth century, with emphasis on the formation and subsequent critique of the Modern Movement.

Precludes additional credit for ARTH 3609 and ARCH 3009.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 2710 [0.5 credit] Experiencing Architecture

Development of critical thinking, writing, and looking skills in connection to architecture, through a combination of site visits, workshops and classroom exercises.

Includes: Experiential Learning Activity
Prerequisite(s): ARTH 1200 and ARTH 1201 or
permission of the discipline. Restricted to students in the
History and Theory of Architecture B.A. or B.A. Honours
program.

Lectures or seminars three hours a week.

ARTH 2807 [0.5 credit] Philosophy of Art

Philosophical approaches to the study of art. Topics such as: the nature of art and artistic value; representation and symbolism in art; art and artifice; art and the emotions; art, culture and ideology; post-structuralism and art; theories of creativity; relationship between artworks and audiences. Also listed as PHIL 2807.

Lectures three hours a week.

ARTH 3000 [0.5 credit]

Themes in Recent and Contemporary Art in Canada

Recent and contemporary art in Canada in a variety of media, examined within its social, political, and cultural contexts. Current critical issues will be explored through works in local and national collections in the National Capital region.

Prerequisite(s): Second-year standing, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 3002 [0.5 credit] Canadian Architecture

Canadian architecture from the seventeenth century to the present day, covering both stylistic and technological developments. Building styles, methods, and materials in the context of social and economic conditions and construction techniques.

Includes: Experiential Learning Activity Also listed as ARCH 4002.

Prerequisite(s): ARTH 1100 and ARTH 1101, or ARTH 1200 and ARTH 1201, or ARCH 1002 and ARCH 1201, and second-year standing or higher, or permission of the Discipline.

ARTH 3003 [0.5 credit]

Architecture and Representation

Examination of the intersections between architecture, representations, and cultures.

Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing, or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3006 [0.5 credit]

Themes in Architecture in Canada

Thematically organized course exploring a wide chronological, geographical, and cultural range of sites and design practices in Canada. Topics may include architecture of governance, spaces of mobility, the effect of industry and economy on the designed environment, housing and shelter, tourism, and histories of design. Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.

Seminar and/or lectures three hours a week.

ARTH 3008 [0.5 credit]

Contemporary Chinese Art and Art History

Modern and contemporary art in China and beyond from the reform period in 1979 until today. Artworks will be examined in terms of their (art-)historical, discursive, socio-political, infrastructural and transcultural conditions of production and reception.

Prerequisite(s): second-year standing or permission of the Discipline.

Lectures three hours a week.

ARTH 3102 [0.5 credit] Studies in Greek Art

A study of period or theme in the art and archaeology of Ancient Greece. Topics may vary from year to year. This course is repeatable for credit when the topic changes. Also listed as CLCV 3306, RELI 3732.

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat. Lecture three hours a week.

ARTH 3105 [0.5 credit] Studies in Roman Art

A study of a period or theme in the art and archaeology of the ancient Romans. Topics may vary from year to year. Also listed as CLCV 3307, RELI 3733.

Prerequisite(s): second-year standing or permission of the unit. Permission of the unit required to repeat. Lecture three hours a week.

ARTH 3107 [0.5 credit]

History and Methods of Architectural History

The study of the methodologies and research approaches employed by architectural historians.

Prerequisite(s): Third-year standing or higher in History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 3108 [0.5 credit] History and Methods of Art History

The study of current methodologies and research tools employed by art historians.

Precludes additional credit for ARTH 3106 (no longer offered).

Prerequisite(s): Third-year standing or higher in Art History, or permission of the Discipline.

Seminar three hours a week.

ARTH 3400 [0.5 credit] History of Printmaking

Exploration of printmaking techniques from the 16th century to the present focusing on the work of famous and lesser-known printmakers. Topics may include: printmaking genres (from fine art prints to caricature), originality versus reproduction, book illustration, the art market, posters and propaganda.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or higher, or

permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3501 [0.5 credit] Digital Media Production for Emerging Arts Professionals

Hands-on introduction to media productions tools, techniques and concepts for students planning careers in the arts sector or related fields. Topics may include website development, design and image editing, audio (podcasting) or video, digital photography, writing for the web and integration with other media.

Includes: Experiential Learning Activity

Prerequisite(s): Third-year standing or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3604 [0.5 credit]

Contemporary Art in the Global Context

Contemporary art in the global context. Prerequisite(s): second-year standing or higher, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 3701 [0.5 credit] Art and Architecture on Site

The study of art and/or architecture on site outside the National Capital Region, in Canada or internationally. May include a combination of study in Ottawa and on site. Locations vary. Students are expected to bear all travel and other costs arising from site visits. Includes: Experiential Learning Activity Prerequisite(s): permission of the Discipline. Applicants will normally have third-year standing with a minimum of 1.0 credit in Art History or History and Theory of Architecture and a GPA of 8.0 or above. Hours to be arranged. Locations will vary.

ARTH 3705 [0.5 credit] Selected Museum Exhibition

This seminar complements a major exhibition held at a specific museum. Students enrolled in this course are expected to bear all travel and other costs arising from required visits to the museum.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing or higher or

permission of the Discipline.

Seminar and/or lectures three hours a week.

ARTH 3808 [0.5 credit]

Special Topics: Cities in Context

Architecture and designed environment of cities. Topics may include comparative studies of cities and the built world across time and geography, theories and histories of urban form and planning, and cultures of placemaking. Topics may vary from year to year.

Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.

Seminar and/or lectures three hours a week.

ARTH 3809 [0.5 credit]

Special Topics in Art and Visual Culture

Selected aspects of art history and visual culture from ancient times to the present. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): third-year standing or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3810 [0.5 credit]

Special Topics about the Designed Environment

Selected aspects of the history of the designed environment, from ancient times to the present. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 1100 or ARTH 1101 or ARTH 1200 or ARTH 1201 and second-year standing or permission of the Discipline.

Lectures and/or seminars three hours a week.

ARTH 3900 [0.5 credit]

Practicum in Art and Architectural History

Practical experience gained by working on specific projects under the supervision of the staff of a museum, cultural institution, public- or private-sector organization associated with art, architecture, design, or heritage. A maximum of 1.0 credit in practicum courses may be used to fulfill program requirements.

Includes: Experiential Learning Activity
Prerequisite(s): B.A. or B.A. (Honours) in Art History or
History and Theory of Architecture with third-year standing
or higher and a CGPA of 9.00 or better in ARTH courses,
and permission of the Discipline.

ARTH 4000 [0.5 credit] Special Topics in Art in Canada

Special topics in art in Canada may vary from year to year, and will be posted on the School for Studies in Art and Culture website. Students will be exposed to works in local and national collections in the National Capital region.

Prerequisite(s): one of ARTH 2002, ARTH 2003, ARTH 3000 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Lectures or seminars three hours a week.

ARTH 4002 [0.5 credit]

Special Topics in Architecture in Canada

Special topics about the designed environment in Canada. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the discipline.

Three hours of seminar per week, or the equivalent.

ARTH 4003 [0.5 credit] Special Topics in Contemporary Art

Critical examination of contemporary art. Topics may include socially engaged art, historiographies of contemporary art, re-inventions of traditions, gender and politics of the body, exhibition histories and infrastructures of contemporary art. Topics may vary from year to year. Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4005 [0.5 credit]

Special Topics in Contemporary Indigenous Art

This course will use critical theory to examine aspects of contemporary visual art created by the Inuit and First Peoples in North America. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2004 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4008 [0.5 credit] Special Topics in Global Art

Histories and theories of global art. Topics may include transnational theories of cultural analysis, Orientalism, Post-Colonial theory, translation theory and theories of cultural hybridity. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Precludes additional credit for ARTH 3103.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4107 [0.5 credit]

Special Topics in Islamic Architecture and Art

Topics in Islamic Architecture and Art may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2107 or ARTH 2310 and fourthyear standing in Art History or History and Theory of Architecture, or permission of the Discipline. Seminar three hours a week.

ARTH 4600 [0.5 credit]

Special Topics in Art, Architecture, and Gender

Art and/or architectural creation, reception and/or historiography through the lens of gender identities. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4602 [0.5 credit]

Special Topics in the Theory and History of Photography

Relates the themes of selected theoretical texts on photography to specific examples of photographic practice. Topics may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2601 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4610 [0.5 credit]

Special Topics in Modern Architecture or Design

Topics in architecture and design of the Modern era may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): ARTH 2610 and fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4701 [0.5 credit] Art and Architecture on Site

Intensive study of art and/or architecture on site outside the National Capital region, in Canada or internationally. May include a combination of study in Ottawa and on site. Students are expected to bear all travel and other costs arising from site visits.

Includes: Experiential Learning Activity

Prerequisite(s): Permission of the Discipline. Applicants will normally have fourth-year standing in Art History or History and Theory of Architecture and a CGPA of 8.0 or above.

Hours to be arranged. Locations vary.

ARTH 4705 [0.5 credit]

Seminar: Selected Museum Exhibition

Studies a major exhibition held at a specific museum. Students enrolled in this course are expected to bear all travel and other costs arising from required visits to the museum.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year Honours standing in Art
History or History and Theory of Architecture and
permission of the Discipline.

Lectures and/or seminar three hours a week.

ARTH 4800 [0.5 credit]

Special Topics in Architectural History

Topics in architectural history from ancient times to the present may vary from year to year, and will be posted on the School for Studies in Art and Culture website. Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4806 [0.5 credit]

Special Topics in Historical Western Art

Special topics in Western art from the medieval period to the 20th century may vary from year to year, and will be posted on the School for Studies in Art and Culture website.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4809 [0.5 credit]

Topics in Art History and Criticism

Selected aspects of art history and/or criticism from ancient times to the present.

Prerequisite(s): fourth-year standing in Art History or History and Theory of Architecture, or permission of the Discipline.

Seminar three hours a week.

ARTH 4900 [0.5 credit] Directed Readings and Research

Supervised readings and research projects. Guidelines must be obtained from the Undergraduate Supervisor prior to registration. A written project outline, approved by the supervising Art History or History and Theory of Architecture faculty member, must be submitted by the last day for course changes.

Prerequisite(s): fourth-year Honours standing in Art History or History and Theory of Architecture and permission of the Discipline.

ARTH 4909 [1.0 credit] Honours Research Project

A project resulting from independent research, supervised by Art History or History and Theory of Architecture faculty. The medium of presentation will be agreed upon between student and supervisor and may include a research paper, web-based project, or combination of dissemination activities.

Prerequisite(s): fourth-year Honours standing in Art History or History and Theory of Architecture with a minimum CGPA of 10.00 and permission of the Discipline.

Human Rights and Social Justice

This section presents the requirements for programs in:

- Human Rights and Social Justice B.A. Honours
- Human Rights and Social Justice B.A. Combined Honours
- Human Rights and Law with Concentration in Transnational Law and Human Rights B.A. Combined Honours
- Human Rights and Social Justice B.A.
- Minor in Human Rights and Social Justice

Program Requirements

Human Rights and Social Justice B.A. Honours (20.0 credits)

A. Credits Included in the Major CGPA (9.0 credits)

A. Credits Included in	n the Major CGPA (9.0 credits)

Total Credits 4			

Course Categories by Thematic Group

These thematic groups only apply to students admitted to Human Rights and Social Justice before fall 2024. Students admitted in fall 2024 and beyond, and previously admitted students who have changed to the 2024-25 program requirements, will follow the thematic groups indicated on their audit. All students are recommended to consult with the department when choosing their courses.

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public

Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention : français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada:
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the

Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- 3. Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- 7. Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

B.A. Honours Human Rights and Social Justice: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000.

In addition to the following:

- 1. Registered as a full-time student in the B.A. Honours Human Rights and Social Justice program;
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 8.00. This CGPA must be maintained throughout the duration of the degree.

B.A. Honours Human Rights and Social Justice students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are

described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Human Rights and Social Justice (HRSJ) Courses

HRSJ 1101 [0.5 credit]

Introduction to Human Rights & Social Justice

Human rights and social justice from an interdisciplinary perspective. Topics include the foundations of rights, roots of inequality and oppression, Indigenous rights, structural violence based on race, gender, sexuality and ableism, State and corporate power, economic exploitation, the environment and rights, warfare, torture, and social movements.

Includes: Experiential Learning Activity
Precludes additional credit for FYSM 1104, HUMR 1001

(no longer offered).

Lecture and discussion groups/tutorials three hours a week.

HRSJ 1102 [0.5 credit]

Critical Issues in Social Justice Activism

A critical study of social justice approaches and concepts to examine political and social struggles, resistance, and activism in historical and contemporary contexts. Emphasis is placed on the connection between social justice approaches and human rights as tools in activist work

Includes: Experiential Learning Activity
Precludes additional credit for FYSM 1104.
Lectures and discussion groups/tutorials three hours a week.

HRSJ 2001 [0.5 credit]

Human Rights: Theories and Foundations

Historical overview of the theoretical and philosophical approaches underlying the human rights and social justice movements. Includes Experiential learning activity. Includes: Experiential Learning Activity

Precludes additional credit for HUMR 2001 (no longer offered).

Prerequisite(s): second-year standing. Lectures and discussion groups/tutorials three hours a week.

HRSJ 2102 [0.5 credit]

Sexuality, Gender, and Security

Historical and contemporary analysis of surveillance, security, and regulation of sexuality, race, class, and gender. Students will critically examine how 'subversives' were created through discourse and administrative logics such as policy and law.

Includes: Experiential Learning Activity

Also listed as SXST 2102.

Precludes additional credit for HUMR 2102 (no longer offered)

Prerequisite(s): second year standing or permission from the Institute.

Lectures and discussions three hours a week.

HRSJ 2202 [0.5 credit]

Power Relations and Human Rights

The study of power from a critical, transnational perspective; the impact on human rights of different forms and modalities of power, including those emanating from the state and corporations and those implicated in socioeconomic and other hierarchical relations.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 2202 (no longer

offered).

Prerequisite(s): second-year standing.

Lectures and discussion groups/tutorials three hours a week.

HRSJ 2301 [0.5 credit]

Human Rights and Sexualities

An examination of human rights discourses, sexualities, and gender identities from an intersectional approach. Also listed as SXST 2301.

Precludes additional credit for HUMR 2301 (no longer offered).

Prerequisite(s): second-year standing.

Lectures and discussion groups three hours a week.

HRSJ 2401 [0.5 credit] Political Repression

This course examines the impacts of political repression on survivors and strategies used to overcome imprisonment, torture, surveillance, migration, etc.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 2401 (no longer offered).

Prerequisite(s): second-year standing.

Lectures and discussion groups three hours a week.

HRSJ 2502 [0.5 credit]

Social and Political Movements

An exploration of historical and/or contemporary social movements that challenge and transform laws or legal regimes, cultural and educational institutions, and political regimes or governments.

Precludes additional credit for HUMR 2502 (no longer offered).

Prerequisite(s): Second-year standing.

Lectures and discussion groups three hours a week.

HRSJ 3001 [0.5 credit]

Special Topics in Human Rights and Social Justice

An advanced seminar on current topics covering human rights and social justice issues. This course features a detailed study of a special topic in any area of Human Rights & Social Justice. Topics and themes will vary from year to year.

Precludes additional credit for HUMR 3001 (no longer offered).

Prerequisite(s): third-year standing.

Lectures three hours a week.

HRSJ 3002 [0.5 credit] Right to the City

"The right to the city" as an emerging focus of advocacy and analysis in urban movements for social justice focused on the local and transnational dimensions of the "right to the city" movement.

Precludes additional credit for HUMR 3001 if taken prior to 2013-14, HUMR 3002 (no longer offered).

Prerequisite(s): third-year standing.

Lectures three hours a week.

HRSJ 3202 [0.5 credit] Human Rights and Resistance

This course problematizes human rights paradigms and critically examines the limitations of the political within liberal democracies. Bringing together theory and politics, alternative approaches to activism are explored. Topics may include struggles grounded in radical democracy, anti-capitalism, and social justice perspectives.

Precludes additional credit for HUMR 3202 (no longer offered).

Prerequisite(s): third-year standing. Lectures three hours a week.

HRSJ 3301 [0.5 credit]

Structural Racism

The forms and effects of systemic race-based human rights abuses. Topics may include racial capitalism, immigration and refugee policies and practices, antiapartheid regimes, racial profiling, the racial politics of "nationhood" and armed conflict, civil rights and resistance movements in differing cultural contexts.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 3301 (no longer

offered).

Prerequisite(s): third-year standing.

Seminar and discussion groups three hours a week.

HRSJ 3302 [0.5 credit]

Culture, Religion, and Gender Rights

The impact of cultural and religious traditions on gender, race, ethnicity and sexuality. Topics may include debates related to power dynamics, historical issues, geopolitics, and cultural relativism.

Precludes additional credit for HUMR 3302 (no longer offered).

Prerequisite(s): third-year standing. Lectures three hours a week.

HRSJ 3303 [0.5 credit] Children's Rights

This course examines children's rights from a range of historical, cultural, and global perspectives. Topics may include the rights of Indigenous children, disabled children, female, trans, non-binary, and queer children, children in armed conflict and refugees in Canada and transnational contexts.

Includes: Experiential Learning Activity

Also listed as CHST 3303.

Precludes additional credit for CHST 3901 (no longer

offered), HUMR 3303 (no longer offered). Prerequisite(s): third-year standing.

Lectures and discussion groups three hours a week.

HRSJ 3304 [0.5 credit]

Disability Rights

A critical approach to the study of disability rights that explores the intersections of disability with race, sexuality, gender, colonialism, 'health', and other discourses. Precludes additional credit for HUMR 4303 (no longer offered), HUMR 3304 (no longer offered).

Prerequisite(s): third-year standing. Lecture three hours a week.

HRSJ 3305 [0.5 credit] Anti-Black Racism

The course examines conceptual linkages between race, racism and anti-black racism and how anti-Blackness racial prejudice is rooted in Black people's experience of enslavement and colonization.

Precludes additional credit for HUMR 3305 (no longer offered).

Prerequisite(s): third-year standing. Lecture three hours a week

HRSJ 3401 [0.5 credit]

Histories of Persecution and Genocide

Case studies in persecution and/or genocide in different cultural contexts. The social, political, and legal conditions that have enabled the institutional or state-sanctioned persecution of targeted groups, and the circumstances that had an impact on their decline.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 3401 (no longer

Prerequisite(s): third-year standing. Lectures three hours a week.

HRSJ 3501 [0.5 credit]

Social, Economic and Cultural Rights

The development of social, economic and cultural rights, including rights to housing, healthcare, education and employment. Topics may include the international geopolitics of the historical tension between these rights and civil and political rights.

Precludes additional credit for HUMR 3501 (no longer offered).

Prerequisite(s): third-year standing. Lectures three hours a week.

HRSJ 3503 [0.5 credit] **Global Environmental Justice**

Overview of critical debates on environmental issues from a global social justice perspective. Topics may include corporate mining, food sovereignty, poverty, economic exploitation, Indigenous cosmologies and environmental justice, militarization and environmental degradation, privatization of water and climate change.

Precludes additional credit for HUMR 3503 (no longer

Prerequisite(s): third-year standing.

Lectures and discussion groups three hours a week.

HRSJ 3504 [0.5 credit]

Public Health and Human Rights

Through a social-scientific analysis of AIDS, this course explores HIV/AIDS as a case study for understanding the politics of public health. Students will critically interrogate the authority of science and explore avenues for democratizing biomedicine and public health policy in various national and policy contexts.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 3001 Section "A" if taken in 2013-14 and 2014-15, HUMR 3504 (no longer offered).

Prerequisite(s): third-year standing. Lectures three hours a week.

HRSJ 3999 [0.0 credit] Co-operative Work Term

Upon completion of each work term, the student must submit to the Institute of Interdisciplinary Studies a written report on the work performed. Graded SAT or UNS. Includes: Experiential Learning Activity

Prerequisite(s): Registration in the Co-operative Education Option, and permission of the Institute of Interdisciplinary Studies.

HRSJ 4201 [0.5 credit] Citizenship and Human Rights

The relationship between citizenship and human rights; how large groups of people, including non-citizens and refugees, are excluded from entitlements to rights. Why human rights rest on citizenship, and with what implications.

Precludes additional credit for HUMR 4201 (no longer offered).

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

HRSJ 4302 [0.5 credit] Transgender Human Rights

Critical analyses of human rights through an examination of transgender subjectivities. The systemic erasure of trans people within society and the struggles of some activists to normalize trans identities.

Precludes additional credit for HUMR 4302 (no longer offered).

Prerequisite(s): fourth-year standing. Seminar three hours a week.

HRSJ 4305 [0.5 credit]

Disability and Social Justice

An intersectional national/transnational approach to social justice issues such as poverty/exploitation, labour, representation, decolonization, race/racism, sexuality and gender from a critical disability studies perspective. Precludes additional credit for HUMR 4305 (no longer offered).

Prerequisite(s): fourth-year standing in Human Rights and Social Justice or Disability Studies.

Seminar three hours a week.

HRSJ 4401 [0.5 credit] Gender, Citizenship and Social Justice in a Transnational World

This seminar critically engages with transnational, gendered, classed, and racialized discursive practices of citizenship, human rights, the geopolitics of knowledge and processes of dehumanization through the lenses of decolonial social justice.

Precludes additional credit for HUMR 4401 (no longer offered).

Prerequisite(s): fourth-year standing. Seminar three hours a week.

HRSJ 4404 [0.5 credit]

Rights of Refugees and Displaced Persons

Contemporary issues concerning the rights of refugees and displaced persons, from social, political, and legal perspectives; Canadian and international dimensions of these issues.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 4404 (no longer offered).

Prerequisite(s): fourth-year standing.

Seminar and discussion groups three hours a week.

HRSJ 4405 [0.5 credit]

Digital Dis-information and Human Rights

The course examines the phenomenon of disinformation or 'fake news' in the era of digital technology, its intent and links to structures of power and oppression, and its impacts on human rights and the social justice.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 4405 (no longer offered).

Prerequisite(s): fourth-year standing. Seminar three hours a week.

HRSJ 4406 [0.5 credit]

Artificial Intelligence and Human Rights

The course sets Al's promise and impacts in terms of democratizing access to knowledge and unleashing scientific progress against vital societal risks and faultlines it generates and human rights failures and social injustices it creates, and the distribution of burdens and benefits in society.

Includes: Experiential Learning Activity Precludes additional credit for None.

Prerequisite(s): None.

Also offered at the graduate level, with different requirements, as None., for which additional credit is precluded.

Seminar

HRSJ 4409 [0.5 credit]

Counter-terrorism and Human Rights

Examines policies and strategies states and international organizations use to combat global terrorism and the challenges these initiatives pose to the international human rights regime, democratic norms, and social justice.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 4409 (no longer

offered).

Prerequisite(s): fourth-year standing.

Seminar and discussion groups three hours a week.

HRSJ 4502 [0.5 credit]

Global Indigenous Knowledges and Movements

Indigenous Peoples contributions to world knowledge through community resistance, social movements and scholarship. How processes of corporate globalization impact Indigenous Peoples lives as an ongoing process of normalizing a reconfigured modern coloniality of power. Precludes additional credit for HUMR 4502 (no longer offered).

Prerequisite(s): fourth-year standing. Seminar three hours a week.

HRSJ 4504 [0.5 credit] **Black Health**

The course examines conceptual linkages between race, racism and anti-black racism and how anti-Blackness racial prejudice is rooted in Black people's experience of enslavement and colonization.

Precludes additional credit for HUMR 4504 (no longer offered).

Prerequisite(s): fourth-year standing. Seminar three hours a week

HRSJ 4505 [0.5 credit]

Precarity in Labour and Work

This course explores how precarious employment and labour arises; the nature and forms of precariousness; how race, citizenship, gender, religion, and location impact precarity: the link between labor and social movements: and types of political and economic initiatives in response to the deepening precarity.

Precludes additional credit for HUMR 4505 (no longer offered).

Prerequisite(s): fourth-year standing.

Seminar three hours a week.

HRSJ 4602 [0.5 credit]

Is Religious Freedom a Human Right?

Legal, theoretical, and theological interconnec⊖ons between religion and human rights. Evaluation of concepts including religious freedom, secularism, public sphere, accommodaOon and neutrality.Examination of religion and culture, interdependence of legal and religious perspectives, boundaries of religion and state, and religious compulsion. Use of case studies. Also listed as LAWS 4602, RELI 4602.

Precludes additional credit for HUMR 4602 (no longer

Prerequisite(s): fourth-year standing. Seminars three hours a week.

HRSJ 4905 [0.5 credit]

Practicum Placement in Human Rights

This course provides students with the opportunity to spend one day per week (6-8 hours) working and learning at a human rights-related government, research or advocacy organization. A written report is required at the end of the placement. Graded as Sat/Uns.

Includes: Experiential Learning Activity

Precludes additional credit for HUMR 4905 (no longer offered).

Prerequisite(s): fourth-year standing in Human Rights and Social Justice or permission of the Institute. Students MUST submit an application and obtain approval before registering in the practicum.

HRSJ 4907 [0.5 credit]

Special Topic in Human Rights

This course features a detailed study of a special topic in any area of Human Rights. Topics and themes will vary from year to year.

Precludes additional credit for HUMR 4907 (no longer offered).

Prerequisite(s): fourth-year standing. Seminar three hours a week.

HRSJ 4908 [0.5 credit] **Independent Study**

Essays and/or examinations based on a bibliography constructed by the student in consultation with an

Includes: Experiential Learning Activity Precludes additional credit for HUMR 4908 (no longer

offered).

Prerequisite(s): Normally restricted to students with at least 3.0 credits of Human Rights courses with at least a CGPA of 9.0 or better in Human Rights courses and permission of the Institute.

Humanities

This section presents the requirements for programs in:

- Humanities B.Hum. Honours
- · Humanities B.Hum. Combined Honours
- Biology and Humanities B.Hum. Combined Honours

The B.Hum. Honours is available with a Study Year Abroad option. Consult the B.Hum. Honours program requirements for more information.

Program Requirements Humanities

B.Hum. Honours (20.0 credits)

1.	4.0 credits in Hum	anities Core:	4.0
	HUMS 1000 [1.0]	Foundational Myths and Histories

Note:

1. For Item 4 above, students who transfer into the B. Hum. may use up to 2.0 credits of any previously completed art and/or music courses (with the exception of advanced placement courses); students who study abroad may use up to 2.0 credits of art and/or music courses taken abroad; students enrolled in a

Combined Honours in Humanities and Art History or Humanities and Music may substitute up to 1.0 credit of music or art from their combined discipline for the respective requirement or part thereof.

B.Hum. with Minor

Students already admitted to the B.Hum may add a minor to their program in any other discipline in the University which offers a minor. Students registered in the Humanities - B.Hum. Honours who add a minor follow the requirements listed under items 6 to 8 of Humanities - B.Hum. Combined Honours instead of the requirements listed under items 6 to 7 of the Humanities - B.Hum. Honours degree.

Regulations

In addition program requirements described in this section, students must satisfy the Academic Regulations of the University, including the process of Academic Continuation Evaluation.

Students should consult the College and its website when planning their program and selecting courses.

Graduation Requirements

Bachelor of Humanities (Honours)

In addition to the graduation requirements of the University, a graduation candidate for the degree of Bachelor of Humanities (Honours) must present:

- 1. a Core Humanities CGPA of 6.50 or higher, and
- 2. an Overall CGPA of 6.50 or higher.

Bachelor of Humanities Combined Honours, Bachelor of Biology and Humanities Combined Honours
In addition to the graduation requirements of the
University, a graduation candidate for the degree of
Bachelor of Humanities (Honours) must present:

- 1. a Core Humanities CGPA of 6.50 or higher, and
- 2. in the other discipline, a major CGPA of 6.50 or higher, and
- 3. an Overall CGPA of 6.50 or higher.

Requirement for Full-Time Study

Students in the Humanities program must complete a minimum of 4.0 credits by the end of the summer session. The College may permit students to study abroad for a year while remaining registered in the program. For those students permitted to study abroad, Carleton credits commensurate to studies taken abroad will be determined by the College and awarded towards the student's degree. In exceptional circumstances (usually financial need or sickness) the College may also permit students to take a leave of absence for one year while remaining registered in the program.

Academic Continuation Evaluation for Bachelor of Humanities

Students in the Bachelor of Humanities degree follow the Academic Continuation Evaluation (ACE) regulations described in Section 3.2 of the *Academic Regulations* of the *University* with the following additions and amendments.

The Bachelor of Humanities degree defines an Overall CGPA and a Core CGPA.

HUMANITIES CORE COURSES

HUMS 1000 [1.0]	Foundational Myths and Histories
HUMS 2000 [1.0]	Reason and Revelation
HUMS 3000 [1.0]	Culture and Imagination
HUMS 4000 [1.0]	Politics, Modernity and the Common Good

At each ACE assessment, Bachelor of Humanities students are evaluated on the basis of their Overall CGPA. The Core CGPA is assessed only at the end of each winter term.

Students are *Eligible to Continue* (EC) if the Overall CGPA is at least 6.50 and the Core CGPA is at least 6.50.

A student who does not receive the status *Eligible to Continue* (EC) but who has an Overall CGPA of at least 6.00 and a Core CGPA of at least 6.00 is placed on *Academic Warning* (AW).

A student is required to leave the program with the decision *Continue in Alternate* (CA) if:

- the student was on Academic Warning (AW) and does not achieve Eligible to Continue (EC) at the next ACE assessment,
 - or
- the student has an Overall CGPA of less than 6.00 or a Core CGPA of less than 6.00 when assessed.

Transfer from B.Hum. to B.J.Hum.

A student who has completed the first year of the B.Hum. and is *Eligible to Continue* (EC) may apply to transfer into the second year of the B.J. Hum. and will be accepted at the discretion of the School of Journalism and the College of Humanities, and must normally have an overall CGPA of 10.0 (A-) or higher. Transfers into higher years will not be considered.

Academic Continuation Evaluation for Bachelor of Journalism and Humanities

Students in the Bachelor of Journalism and Humanities degree follow the Academic Continuation Evaluation (ACE) regulations described in Section 3.2 of the *Academic Regulations of the University* with the following additions and amendments.

The Bachelor of Journalism and Humanities degree defines an Overall CGPA, a Journalism Major CGPA, and a Humanities Core CGPA.

HUMANITIES CORE COURSES

HOMANTIES SORE SOCKOES		
HUMS 1000 [1.0]	Foundational Myths and Histories	
HUMS 2000 [1.0]	Reason and Revelation	
HUMS 3000 [1.0]	Culture and Imagination	
HUMS 4000 [1.0]	Politics, Modernity and the Common Good	

Whenever a student is assessed in ACE, Bachelor of Journalism and Humanities students are evaluated on the basis of their Overall CGPA. The Humanities Core CGPA is assessed only at the end of each winter term.

- 1. A student is required to leave the program if:
 - a. the student was on *Academic Warning* (AW) and does not achieve a decision of *Eligible to Continue* (*EC*) at the next Academic Continuation Evaluation;
 - b. the student's Overall CGPA is less than 1.00;
 - c. the student's Humanities Core CGPA is less than 6.00 when assessed.
- 2. Students who have completed between 5.5 and 15 credits who do not maintain an Overall CGPA of 4.00 and a Humanities Core CGPA of 6.5, but who have an Overall CGPA of at least 1.00 and a Humanities Core of at least 6.00, will be placed on *Academic Warning* (AW). Students who have completed at least 15.5 credits and who do not meet the graduation requirements of an Overall CGPA of 6.50, a Journalism Major CGPA of 6.50, and a Humanities Core CGPA of 6.50 will be required to leave the program.

See the Academic Regulations of the University section of the Calendar for additional information.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degrees

- B. Hum. (Honours)
- B. Hum. and Biology (Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The Bachelor of Humanities and Biology option must include 4U Chemistry or 4U Biology.

Note: applicants with lower averages may be asked to submit a portfolio in support of their application. For detailed information about the portfolio and whether you are required to submit one, please consult admissions.carleton.ca.

Advanced Standing

The College maintains a number of places in second and third year for students who wish to transfer from Carleton

or elsewhere. Applications will be assessed on their merits but normally an overall CGPA of 8.00 (B) or higher is required. On admission, students will not receive credit for courses graded below C-.

Transferring from the B.J.Hum. to the B.J. or B.Hum.

A student who wishes to transfer from the B.J.Hum. to the B.J. or the B.Hum. may apply through Admissions and will be accepted if, upon entry to the new program, they would be *Eligible to Continue* in the new degree program.

Humanities (HUMS) Courses

HUMS 1000 [1.0 credit]

Foundational Myths and Histories

Recurring symbols in myth, epic and ritual representing the relation between the sacred and the profane, the origin of the cosmos, the basis of community, and formative human experiences. Primary sources drawn from ancient India and China, Mesopotamia, the Hebrew Bible, and Indigenous cultures.

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lectures three hours a week and tutorials one and a half hours a week.

HUMS 1200 [0.5 credit]

Humanities and Classical Civilization

The ideas which animated ancient Greek and Roman civilization and which influenced later western cultural movements through a reading of literary, historical, and philosophical works. Authors include Homer, Herodotus, Thucydides, the Greek Tragedians, Plato, Vergil, and Cicero.

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lecture three hours a week.

HUMS 1300 [0.5 credit]

Classical Literature and Its Reception

The study of different types of ancient literature and the reception of Classical works in later periods. A focus on writing a research essay.

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lectures three hours a week.

HUMS 1500 [0.5 credit]

Introduction to the Humanities: Five Books that Changed the World

A reading-intensive course on five influential books from

Antiquity to the present day. Works may include the Bible, the Bhagavad Gita, Homer's Odyssey, Plato's Republic, Dante's Inferno, Machiavelli's The Prince, Shakespeare's Hamlet, Mary Shelley's Frankenstein, Nietzsche's Beyond Good and Evil, Marx's Communist Manifesto. Prerequisite(s): enrolment in a degree program in the Faculty of Arts and Social Sciences, or the Faculty of Public Affairs. Students enrolled in the Bhum. program are not eligible to register in this course. Lecture three hours per week.

HUMS 2000 [1.0 credit] Reason and Revelation

The origins of philosophy in ancient Greece and its pursuit in the medieval West, with special attention to knowledge, happiness, and love. Readings include works by Plato, Aristotle, Plotinus, Augustine, Boethius, Aquinas, and Dante.

Prerequisite(s): HUMS 1000 and enrolment in the Bachelor of Humanities program.

Lectures three hours a week and tutorials one and a half hours a week

HUMS 2101 [0.5 credit] Art from Antiquity to the Medieval World

A chronological and thematic survey of the Arts from the earliest times to ca. 1400.

Precludes additional credit for HUMS 4101 (no longer offered).

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lecture three hours a week.

HUMS 2102 [0.5 credit] Modern European Art 1527-2000

A chronological and thematic survey of the Arts from the sixteenth to the twenty-first century.

Precludes additional credit for HUMS 4101 (no longer offered) and HUMS 3101 (no longer offered).

Prerequisite(s): HUMS 2101 and restricted to students in the Bachelor of Humanities program.

Lectures three hours a week.

HUMS 3000 [1.0 credit] Culture and Imagination

Major forms of literary, artistic, and philosophical expression from 1500-1800. Sources drawn from renaissance humanism, reformation theology, enlightenment and romantic philosophy.

Prerequisite(s): HUMS 2000 and enrolment in the Bachelor of Humanities program.

Lectures three hours a week and tutorials one and a half hours a week.

HUMS 3102 [0.5 credit] Western Music 1000-1850

Introduction to basic theory, harmony, history and interpretation of Western music including the Medieval, Renaissance, Baroque, Classical and early Romantic periods.

Includes: Experiential Learning Activity

Precludes additional credit for HUMS 4102 (no longer offered).

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lectures three hours a week.

HUMS 3103 [0.5 credit] Western Music 1850-2000

Western music from the mid-nineteenth century to the present with emphasis on the seminal contributions of Liszt, Wagner, Mahler, Debussy, Stravinsky, Schönberg and others.

Includes: Experiential Learning Activity

Precludes additional credit for HUMS 4102 (no longer offered).

Prerequisite(s): HUMS 3102 and restricted to students in the Bachelor of Humanities program.

Lecture three hours a week.

HUMS 3200 [1.0 credit] European Literature

Major movements and works from Dante's Divine Comedy through Voltaire's Candide. Themes include the New Humanism vs. old Chivalry in the Renaissance and Baroque periods; the rise of the modern novel and drama; reason, nature, and the Enlightenment project. Also listed as ENGL 3201.

Prerequisite(s): HUMS 2000 and third-year standing in the Bachelor of Humanities program. English students should have third-year standing with a GPA of B or above. Lectures three hours a week.

HUMS 3500 [0.5 credit]

Ancient and Medieval Intellectual History

Examination of some of the major philosophical, religious, political, artistic, and/or literary ideas, works, and movements from Archaic Greece to the High Middle Ages.

Prerequisite(s): third-year standing in the Bachelor of Humanities program, or permission of the instructor. Lectures three hours a week

HUMS 3550 [0.5 credit]

Renaissance and Early Modern Intellectual History

Examination of some of the major philosophical, religious, political, artistic, and/or literary ideas, works, and movements from the Early Renaissance to 1800.

Prerequisite(s): third-year standing in the Bachelor of Humanities program, or permission of the instructor.

Lectures three hours a week.

HUMS 3800 [0.5 credit] **Humanities in Context**

Designed for students studying humanities, this travel course explores art, literature, politics, philosophy, architecture, religions, and cultures in their historical and contemporary contexts in a particular geographic locale. Travel destinations and themes vary from year to year. Includes: Experiential Learning Activity

Prerequisite(s): 2.0 credits in HUMS and permission of the department. Permission of the unit is required to repeat this course.

Hours to be arranged.

HUMS 4000 [1.0 credit]

Politics. Modernity and the Common Good

Modern and post-modern ways of thinking and doing. including revolutionary new ideas in politics, philosophy, culture, economics, and international relations. Thinkers considered include Arendt, Foucault, Hegel, Heidegger, Hobbes, Kant, Marx, Nietzsche, Polanyi, Rousseau, Said,

Includes: Experiential Learning Activity

Prerequisite(s): HUMS3000 and enrolment in the

Bachelor of Humanities program.

Lectures three hours a week and tutorials one and a half hours a week.

HUMS 4001 [0.5 credit] Directed Studies in the Humanities

A course for independent study and writing, under the supervision of a College designated faculty member. This course involves supervised readings and written essays. Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of Humanities program.

HUMS 4002 [0.5 credit] **Directed Studies in the Humanities**

A course for independent study and writing, under the supervision of a College designated faculty member. This course involves supervised readings and written essays. Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of Humanities program and Good Standing in the program.

HUMS 4103 [0.5 credit] Science in the Modern World

An introduction to the major scientific ideas of our time (such as Big Bang theory, molecular genetics, evolution, atomic structure), and the impact of technology on society (e.g. global warming, pollution, genetically modified foods, viral infections).

Includes: Experiential Learning Activity

Precludes additional credit for HUMS 4100 (no longer

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lectures three hours a week.

HUMS 4500 [0.5 credit] **Modern Intellectual History**

Examination of some of the major ideas and ideologies from 1800 to the present, including romanticism, liberalism, nationalism, symbolism, socialism, Freudianism, communism, feminism, and postmodernism. Includes: Experiential Learning Activity Precludes additional credit for HUMS 4104. Prerequisite(s): restricted to students in the Bachelor of

Humanities program. Lectures three hours a week.

HUMS 4901 [0.5 credit]

Research Seminar: Antiquity to the Middle Ages

An interdisciplinary seminar on a selected topic in the humanities from Antiquity to the Middle Ages. The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of

Humanities program.

Seminar three hours a week.

HUMS 4902 [0.5 credit]

Research Seminar: Renaissance to Enlightenment

An interdisciplinary seminar on a selected topic in the humanities from the Renaissance to the Enlightenment.

The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of

Humanities program.

Seminar three hours a week.

HUMS 4903 [0.5 credit]

Research Seminar: Romanticism to the Present

An interdisciplinary seminar on a selected topic in the humanities from Romanticism to the present. The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of

Humanities program.

Seminar three hours a week.

HUMS 4904 [0.5 credit]

Research Seminar: Non-Western Traditions

An interdisciplinary seminar on a selected topic in the humanities as expressed in aboriginal and Non-Western cultures. The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of Humanities program.

Seminar three hours a week.

Indigenous Studies

This section presents the requirements for programs in:

- · Indigenous Studies B.A. Honours
- Indigenous Studies B.A. Combined Honours
- · Indigenous Studies B.A.
- Minor in Indigenous Studies

Program Requirements

Indigenous Studies Electives

The following courses are deemed by the School of Indigenous and Canadian Studies to have significant Indigenous content, and can be included where appropriate as part of an Indigenous Studies program. Carleton courses not on this list may be applied as approved Indigenous Studies electives, but they must be approved by the Indigenous Studies Undergraduate Supervisor. Students taking courses at the University of Ottawa should consult with the Indigenous Studies Undergraduate Supervisor to gain approval for substituting them as approved Indigenous Studies electives.

African Studies

B.A. Regulations

The regulations presented below apply to all Bachelor of Arts programs. In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the Academic Regulations of the University section of this Calendar).

First-Year Seminars

B.A. degree students are strongly encouraged to include a First-Year Seminar (FYSM) during their first 4.0 credits of registration. Students are limited to 1.0 credit in FYSM and can only register in a FYSM while they have first-year standing in their B.A. program.

Breadth Requirement

Among the credits presented at graduation, students in both the B.A. and the B.A. Honours degrees and B.Co.M.S. are required to include 3.0 breadth credits, which must include 1.0 credit in three of the four breadth areas identified below. Credits that fulfil requirements in

the Major, Minor, Concentration, Specialization, or Stream may also be used to fulfil the Breadth Requirement.

Students admitted with a completed university degree are exempt from breadth requirements.

Students in the following interdisciplinary programs are exempt from the B.A. breadth requirement.

- · African Studies
- · Criminology and Criminal Justice
- · Environmental Studies
- · Human Rights
- · Human Rights and Social Justice

Breadth Area 1: Culture and Communication

American Sign Language, Art History, Art and Culture, Communication and Media Studies, Digital Humanities, English, Film Studies, French, Journalism, Media Production and Design, Music, and Languages (Arabic, English as a Second Language, German, Greek, Hebrew, Indigenous Languages, Italian, Japanese, Korean, Latin, Mandarin, Portuguese, Russian, Spanish)

Subject codes: ARAB, ARTH, ASLA, CHIN, COMS, DIGH, ENGL, ESLA, FILM, FINS, FREN, GERM, GREK, HEBR, ITAL, JAPA, JOUR, KORE, LANG, LATN, MPAD, MUSI, PORT, RUSS, SPAN

Breadth Area 2: Humanities

African Studies, Applied Linguistics and Discourse Studies, Archaeology, Canadian Studies, Child Studies, Classical Civilization, Critical Race Studies, Directed Interdisciplinary Studies, Disability Studies, Environmental and Climate Humanities, European and Russian Studies, History, Human Rights and Social Justice, Humanities, Indigenous Studies, Latin American and Caribbean Studies, Linguistics, Medieval and Early Modern Studies, Philosophy, Religion, Sexuality Studies, South Asian Studies, and Women's and Gender Studies.

Subject codes: AFRI, ALDS, ARCY, CDNS, CHST, CLCV, CRST, DBST, DIST, EACH, EURR, HIST, HRSJ, HUMR, HUMS, INDG, LACS, LING, MEMS, PHIL, RELI, SAST, SXST, WGST

Breadth Area 3: Science, Engineering, and Design

Architecture, Biology, Chemistry, Computer Science, Data Science, Earth Sciences, Engineering, Environmental Science, Food Science and Nutrition, Health Sciences, Industrial Design, Information Resource Management, Information Technology (BIT), Information Technology (ITEC), Interactive Multimedia and Design, Interdisciplinary Science and Practice, Mathematics, Neuroscience, Network Technology, Nursing, Optical Systems and Sensors, Photonics, Statistics, Physics, and Technology, Society, Environment.

Subject codes: ACSE, AERO, ARCC, ARCH, ARCN, ARCS, ARCU, BIOC, BIOL, BIT, CHEM, CIVE, COMP, CSEC, DATA, ECOR, ELEC, ENSC, ENVE, ERTH, FOOD, HLTH, IDES, IMD, IRM, ISAP, ISCI, ISCS, ISYS, ITEC, MAAE, MATH, MECH, MECT, NET, NEUR, NSCI, NURS, OSS, PHYS, PLT, SREE, STAT, SYSC, TSES

Breadth Area 4: Social Sciences

Anthropology, Business, Cognitive Science, Criminology and Criminal Justice, Economics, Environmental Studies, Geography, Geomatics, Global and International Studies, Global Politics, Interdisciplinary Public Affairs, International Affairs, Law, Migration and Diaspora Studies, Political Management, Political Science, Psychology, Public Administration, Public Affairs and Policy Management, Social Work, Sociology/Anthropology, Sociology

Subject codes: ANTH, BUSI, CGSC, CRCJ, ECON, ENST, GEOG, GEOM, GINS, GPOL, INAF, IPAF, LAWS, MGDS, PADM, PAPM, POLM, PSCI, PSYC, SOCI, SOWK

Declared and Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to a degree, but have not yet selected and been accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. Undeclared students must apply to enter a program upon or before completing 3.5 credits.

Change of Program Within the B.A. Degree

To transfer to a program within the B.A. degree, applicants must normally be *Eligible to Continue* (EC) in the new program, by meeting the CGPA thresholds described in Section 3.1.9 of the *Academic Regulations of the University*.

Applications to declare or change programs within the B.A. degree online must be made online through Carleton Central by completing a Change of Program Elements (COPE) application form within the published deadlines. Acceptance into a program, or into a program element or option, is subject to any enrollment limitations, as well as specific program, program element, or option requirements as published in the relevant Calendar entry.

Minors, Concentrations, and Specializations

Students may add a Minor, Concentration, or Specialization by completing a Change of Program Elements (COPE) application form online through Carleton Central. Acceptance into a Minor, Concentration, or Specialization normally requires that the student be *Eligible to Continue* (EC) and is subject to any specific requirements of the intended Minor, Concentration, or Specialization as published in the relevant Calendar entry and in Section 3.1.9 of the *Academic Regulations of the University*.

Mention: français

Students registered in certain B.A. programs may earn the diploma notation *Mention: français* by completing part of their program requirements in French, and by demonstrating knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details, consult the departmental program entries.

Students in a B.A. Honours program must present:

- 1. 1.0 credit in French language;
- 2. 1.0 credit devoted to the history and culture of French Canada;

- 3. 1.0 credit at the 2000- or 3000-level in the Honours discipline taken in French; and
- 4. 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. program must present:

- 1. 1.0 credit in advanced French;
- 1.0 credit devoted to the history and culture of French Canada;
- 3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : françai*s requirement in both disciplines.

Courses taught in French (Items 3 and 4, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on exchange or Letter of Permission.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also

require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admission Requirements

Degrees

- Bachelor of Arts (B.A.) (Honours)
- · Bachelor of Arts (B.A.)

First Year

For B.A. and B.A. (Honours)

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*). Applicants submitting an English language test to satisfy the requirements of the English Language Proficiency section of this Calendar may use that test to also satisfy the 4U English prerequisite requirement.

Biology

For the major in Biology in the B.A. program, in addition to the 4U English, a 4U course in Chemistry is required. Advanced Functions, and Calculus and Vectors are recommended.

Criminology and Criminal Justice

Access to the CCJ B.A. degree is limited to students already registered in the CCJ B.A. Honours who apply to transfer, and to graduates of the Algonquin College Police Foundations program.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits. Applicants must normally be Eligible to Continue in their year level, in addition to meeting the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University. Advanced standing will be granted only for those subjects assessed as being appropriate for the program and the stream selected.

Co-op Option

Direct Admission to the 1st Year of the Co-op Option Co-op is available for the following Majors in the B.A. (Honours) degree: Anthropology, English, Environmental Studies, European and Russian Studies, French, Geography, Geomatics, History, Law, Political Science, Psychology, Sociology.

Applicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in the Bachelor of Arts Honours with one of the majors listed above;
- 3. be eligible to work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option. Students should also note that hiring priority is given to Canadian citizens for co-op positions in the Public Service Commission.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Advanced Standing

B.A. and B.A. (Honours) Program

Applications for admission to the second or subsequent years will be assessed on their merits. Advanced standing will be granted only for those courses that are determined to be appropriate.

Indigenous Studies (INDG) Courses

INDG 1000 [1.0 credit]

Introduction to Indigenous Studies

Survey of historical and contemporary issues relating to Indigenous peoples in Canada. Cultural traditions and the social interactions between Indigenous and non-Indigenous societies are approached from an interdisciplinary perspective.

Precludes additional credit for INDG 1010 and INDG 1011.

Online only.

INDG 1010 [0.5 credit] Indigenous Ways of Knowing

This course centers Indigenous Creation Stories in relation to systems of power. Discussing Indigenous worldviews, knowledge making, ways of living, ecological relationships, and inter-Indigenous relations and diplomacy. Course materials are rooted in self-situated and collective understandings of Indigenous peoples. Precludes additional credit for INDG 1000. Lectures/discussion groups three hours a week.

INDG 1011 [0.5 credit]

Introduction to Indigenous-Settler Encounters

Interdisciplinary and critical engagement with the term "encounter" between various Indigenous communities and settler populations. Topic areas vary by year: introduction to Indigeneity across multiple geographies, cultural and literary practices, gender and the state, race, racialization, racism, place and space, food sovereignty, and education. Precludes additional credit for INDG 1000. Lecture/groups, three hours a week.

INDG 2011 [0.5 credit] Critical Indigenous Studies

This survey course introduces students to core concepts and analytics in Critical Indigenous Studies. Topics include land, pedagogies, relationalities, resurgence, decolonization, Indigenous feminisms and Indigiqueer Studies.

Precludes additional credit for CDNS 2100 and CDNS 2011.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lectures/groups three hours a week.

INDG 2012 [0.5 credit] Anishinaabe Ontologies

Grounded in the ontologies and place-making practices of the Anishinaabe peoples, topics may include Creation stories, migration and displacement, the clan system, worldviews, oral, written, and recorded history, treaties, knowledges, cultural production, self-governance, and diplomatic relations.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lecture/groups three hours a week.

INDG 2013 [0.5 credit] Haudenosaunee Ontologies

Grounded in the Kaienerekowa (Way of Peace), this course focuses on Haudenosaunee ontologies from the founding of the Confederacy to present. Discussion of the cultures, languages, written and recorded histories, and socio-political structures of Haudenosaunee.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lecture/groups, three hours a week.

INDG 2014 [0.5 credit] Inuit Ontologies

Grounded in the ontologies and place-making practices of the Inuit, topics may include: Creation stories, migration and displacement, kinship, worldviews; oral, written, and recorded histories; lands and waters; land claims agreements, knowledges, cultural production, self-governance, diplomatic relations.

Lectures/groups three hours a week.

INDG 2015 [0.5 credit]

Indigenous Relationalities, Kinships, and Knowledges

Overview of Indigenous peoples' temporal, spatial, and social relationalities, kinship networks, and knowledge systems. Topics may include Indigenous cosmologies, knowledges, languages, water, land, and re-framing human and non-human relationships.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lecture/groups, three hours a week.

INDG 2016 [0.5 credit]

Indigenous Resistance in Canada

Indigenous approaches to self-determination and nationhood. Topics include direct action; political organizing; land claims; rights, courts, and legal action; everyday acts of resistance such as petitioning, social media, arts-based movements, and community initiatives. Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lectures/groups three hours a week.

INDG 2017 [0.5 credit] Global Indigenous Studies

Introduction to Global Indigenous struggles, communities, resistances, and cross-border alliances. Topics may include: Canada's implication in global imperialism and environmental exploitation, specificity of race and racialization in various contexts, cisheteropatriarchy, global resistance movements, displacement, migration, and diaspora.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lectures/groups three hours a week

INDG 2020 [0.5 credit]

Indigenous Feminisms: Perspectives on Gender, Sex, and Sexualities

Indigenous articulations of gender, sex, and sexualities. This may include a focus on specific embodied roles and responsibilities within Indigenous communities, individual and collective identities, gender-based violence and resistances, and complex relationships between external and lateral systems of power and privilege.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lecture/groups, three hours a week.

INDG 2302 [0.5 credit] Land, Water, Capitalism

Examination of politics and economics of land, waters and power. Topics may include: the study of labour, migrant workers, capitalist extraction; environmental racism and health; and Indigenous dispossession and resistance. Also listed as CDNS 2302.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lectures/groups three hours a week.

INDG 2709 [0.5 credit] Indigenous Drama

A study of dramatic literatures and theatre practice from Indigenous theatre makers, including playwrights, directors and other practitioners.

Also listed as ENGL 2709.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lecture three hours per week

INDG 3001 [0.5 credit]

Indigenous Sovereignties

A gendered examination and discussion of Indigenous sovereignties. Topics will vary by year and may include: Indigenous ways of knowing, governance systems, embodied legal orders, community leadership, diplomatic relations, and struggles for self-determination. Precludes additional credit for INDG 3000 (no longer offered).

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Seminar three hours per week.

INDG 3012 [0.5 credit] Indigenous Futurity Praxis

Challenging notions of past, present, future, this course engages with media, cultural objects, and practices that imagine and enact alternate futures. Students will produce community-oriented research drawing on Indigenous knowledge making. Topics include: speculative fiction, bead work, visual art practices, and social media. Prerequisite(s): third-year standing or permission of the Indigenous Studies program.

Seminar three hours per week.

INDG 3015 [0.5 credit] Indigenous Cosmologies

This course will provide an overview of diverse Indigenous cosmologies and perspectives on land, water, atmospheres, and more-than-human beings and ethical ways of working with these knowledges. We will draw on Indigenous knowledge from nations/societies/communities around the globe.

Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Seminar three hours per week.

INDG 3018 [0.5 credit] Metis Ontologies

An exploration of the development of Metis culture and communities in the late 18th century. Metis identity will be examined within a socio-cultural context and students will learn about the significance of kinship and stories as ways of maintaining Metis culture, Nationhood and Sovereignty. Prerequisite(s): second-year standing or permission of the Indigenous Studies program.

Lecture/groups, three hours a week.

INDG 3901 [0.5 credit] Selected Topics in Indigenous Studies

Topics vary from year to year.

Prerequisite(s): second-year standing, or permission of the Indigenous Studies program.

Seminar three hours per week.

INDG 4001 [0.5 credit] Indigenous Urbanisms

This course discusses urban spaces as Indigenous places and foregrounds theories and practices of Indigenous city making. Topics may include unsettling the urban, Indigenous place-making, the built environment and infrastructures, and decolonial articulations of towns and cities.

Includes: Experiential Learning Activity
Prerequisite(s): third-year standing or permission of the
Indigenous Studies program.
Seminar three hours per week.

INDG 4005 [0.5 credit] Visual Storytelling in Indigenous Art

This course discusses urban spaces as Indigenous places and foregrounds theories and practices of Indigenous city making. Topics may include unsettling the urban, Indigenous place-making, the built environment, and infrastructures, and decolonial articulations of towns and cities.

Prerequisite(s): third-year standing or permission of the Indigenous Studies program.

Seminar three hours per week.

INDG 4011 [0.5 credit] Indigenous Representations

Students will study how Indigenous peoples have used cultural production in various forms (such as literature, film, television, visual arts, music, performance) to put forth their own visions of their peoples, worldviews, and lives.

 $\label{pre-equisite} Pre-equisite (s): third-year standing or permission of the Indigenous Studies program.$

Seminar three hours a week.

INDG 4012 [0.5 credit] Resistance and Healing in Contemporary Indigenous

This seminar offers an examination of how Indigenous artists have formulated a politicized discourse of resistance through their artistic expressions to prompt transformative and decolonizing healing within communities. This course includes readings, analysis of diverse forms of art, and critical analysis of art exhibitions. Prerequisite(s): third-year standing or permission of the Indigenous Studies program.

Seminar three hours a week.

INDG 4015 [0.5 credit] Land as a Relation

This course is offered in partnership with Kitigan Zibi Anishinabeg and reflects critical kinships enacted between Algonquin Anishinabeg, the land and non-human relatives. We spend one week in the community in an immersive environment learning about language, sovereignty, land caretaking, berry picking, and other topics.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing or permission of the Indigenous Studies program.

Fourteen-day field course.

INDG 4020 [0.5 credit]

Practicum

Students will apply their knowledge with a local organization whose mandate involves working with and/ or for Indigenous peoples. Restricted to students in the INDG major. To be arranged in consultation with the Undergraduate Supervisor.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing or permission of the Indigenous Studies program.

INDG 4105 [0.5 credit] Comparative Indigenous Knowledge and

Entrepreneurship

Past and contemporary interconnections between Indigenous knowledge and entrepreneurship on a comparative basis. Distinguishing features of Indigenous entrepreneurship from traditional entrepreneurship such as its focus on community, connection to the land, and the role of women.

Also listed as AFRI 4005.

Prerequisite(s): Third-year standing.

Seminar three hours a week.

INDG 4901 [0.5 credit] Selected Topics in Indigenous Studies

Topics vary from year to year.

Prerequisite(s): third-year standing or permission of the Indigenous Studies program.

Seminar three hours per week.

INDG 4905 [0.5 credit] Directed Studies I

An optional course normally restricted to fourth-year Honours students in Canadian Studies or Indigenous Studies and to Qualifying-year Graduate students. Includes supervised reading and written work in an Indigenous Studies area.

Prerequisite(s): fourth-year standing or permission of the Indigenous Studies program.

Industrial Design

This section presents the requirements for programs in:

- Industrial Design B.I.D.
- · Minor in Design

Notes:

- Fourth-year students are required to register in IDES 4301 and IDES 4310 in the same academic year.
- One successfully completed Industrial Design Co-op work term between the third and fourth year of study is equivalent to IDES 4400.
- 3. The electives chosen should serve to deepen the student's understanding of fields related to Industrial Design or disciplines that are relevant for industrial designers.

Minor in Design (4.0 credits)

This minor is open to all undergraduate degree students not in the Industrial Design program.

Only students pursuing undergraduate programs requiring at least 20.0 credits to graduate and who have completed at least 4.0 credits toward their degrees with a minimum overall CGPA of 7.00 may be admitted to the Minor in Design.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Design.

and degree must be satisified.

Regulations

The regulations presented in this section apply to all students in the Bachelor of Industrial Design program.

In addition to the requirements presented here, students must satisfy the University regulations common to

all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

Year Status and General Prerequisites

In the Bachelor of Industrial Design degree program, year status is defined as follows:

1st year: Admission to the program.

2nd year: Successful completion of IDES 1001, IDES 1301 and must not be deficient in any more than one of the other first year courses.

3rd year: Successful completion of of IDES 2302 and all first and second year course requirements.

4th year: Successful completion of IDES 3302 and all third year course requirements.

Prerequisites

The following broad course prerequisites specify requirements for access to upper year project courses:

- Registration in IDES 2300 Projects IIA normally requires successful completion of IDES 1001, IDES 1301 and must not be lacking in any more than one of the other first-year courses.*
- Registration in IDES 3310 Projects IIIA normally requires successful completion of all first-year and second-year core course requirements.*
- Registration in IDES 4310 [1.5] Capstone Project normally requires successful completion of all thirdyear course requirements.*
- *Special consideration and permission may be made in consultation with the School administration.

Academic Continuation Evaluation for the Bachelor of Industrial Design

Students in the Bachelor of Industrial Design degree follow the standard Academic Continuation Evaluation (ACE) regulations (see Section 3.2 of the *Academic Regulations of the University*) with the following additions and amendments.

B.I.D. students are evaluated based on their Overall CGPA, and their performance in Industrial Design Core

INDUSTRIAL DESIGN CORE COURSES

IDES 1300 [0.5]	Projects IA
IDES 1301 [0.5]	Projects IB
IDES 2300 [0.5]	Projects IIA
IDES 2302 [0.5]	Projects IIB
IDES 3302 [0.5]	Projects IIIB
IDES 3310 [0.5]	Projects IIIA
IDES 4301 [0.5]	Minor Projects

Students in the B.I.D. must achieve a minimum grade of C- in every Core course. If the student earns a grade less than C- in a Core course, they will be given permission to repeat the Core course only when their Overall CGPA meets the minimum required to be *Eligible to Continue* (EC), as described in Section 3.2.6 Minimum

CGPA Requirements of the *Academic Regulations of the University.*

- Eligible to Continue (EC) requires an Overall CGPA at or above the minimum requirements for the B.I.D. as described in Section 3.2.6 Minimum CGPA Requirements of the Academic Regulations of the University.
- 2. Students will be placed on *Academic Warning* (AW) when the Overall CGPA is lower than the minimum required for *Eligible to Continue* (EC).
- 3. Students must leave the Industrial Design program with the decision *Continue in Alternate* (CA) where any of the following conditions apply:
 - a. while on Academic Warning (AW), the student has failed to achieve the minimum required Term GPA as described in Section 3.2.4.1 Term Grade Point Average;
 - after a second attempt at a Core course, the student has not achieved a grade of at least C- in either attempt;
 - c. the student has not completed the program within seven years.

See the *Academic Regulations of the University* section of the Calendar for additional information.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position;
- 6. Dismissal from a work term by the co-op employer;
- Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

Bachelor of Industrial Design: Co-op Admission and Continuation Requirements

- Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to:

- 1. Registered as a full-time student in the B.I.D. program;
- 2. Successfully completed 5.0 or more credits;
- Obtained an Overall CGPA of at least 6.50 and an Industrial Design Core CGPA least 8.00. These CGPAs must be maintained throughout the duration of the degree.

B.I.D. students must successfully complete three (3) work terms to obtain the Co-op Designation.

Co-op Work Term Course: IDES 3999 Work-Study Pattern:

Year 1		Year 2		Year 3		Year 4		Year 5	
Term	Pattern								
Fall	S	Fall	S	Fall	S	Fall	W	Fall	S
Winter	S	Winter	S	Winter	S	Winter	W	Winter	S
Summer		Summer	W	Summer	W	Summer	W		

Legend S: Study

W: Work

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and Procedures section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

• Bachelor of Industrial Design (B.I.D.)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include Advanced Functions and Physics. Design Technology, and Visual Arts courses are recommended.

Candidates must present a portfolio of any kind of work that could demonstrate creativity and aptitude for the study of industrial design. Detailed information about the portfolio requirements can be found at admissions.carleton.ca. Attending an information session at the School is recommended.

Advanced Standing

Applications for admission beyond first year will be assessed on their merits and on space availability in the program. Advanced standing will be granted only for those courses that are determined to be appropriate.

Applicants will also be required to complete a portfolio which will assist in the evaluation of their suitability for the program. Detailed information about the portfolio requirements can be found at admissions.carleton.ca.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- 2. be registered as a full-time student in the Industrial Design program;
- 3. be eligible for work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Industrial Design (IDES) Courses

IDES 1000 [0.5 credit]

Theory and History of Design

The theoretical and historical background of industrial design and design; disciplinary foundations and interdisciplinary connections; methodological aspects and economic and social contexts; contemporary scenarios in design; technological innovation and manufacturing processes.

Also listed as ARCH 2006. Lectures three hours a week.

IDES 1001 [0.5 credit] Industrial Design Analysis

Principles of comparative product design analysis covering marketing and sales, manufacturing techniques and materials, ambiance and qualities of the object/context relationship, and design analysis from the perspective of the designer, the end-user and the environment.

Includes: Experiential Learning Activity

Also listed as ARCH 2101.

Prerequisite(s): IDES 1000 or ARCH 2006.

Lectures three hours a week.

IDES 1300 [0.5 credit] Projects IA

An introduction to the skills and processes of industrial design including drawing and sketching as an aid to design, basics of line, shape, ideation, and visualization, product drawing, presentation techniques, basic model making, studio equipment and practices, introduction to the design process.

Includes: Experiential Learning Activity
Prerequisite(s): IDES 1000 (may be taken concurrently).
Studio and lectures six hours a week.

IDES 1301 [0.5 credit] Projects IB

Aspects of industrial design theory and practice, specifically those dealing with principles of product development, fundamentals of form and colour and case studies. Students will explore the design process with emphasis on creative problem-solving techniques and visual communication in design.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 1300.

Studio and lectures six hours a week.

IDES 2101 [0.5 credit]

Design for Manufacturing A

Transformation techniques applied to manufacturing materials. Part-design requirements and cost factors for manufacturing processes. Influences and role of assembly, finishing, production tooling, and costing. Includes: Experiential Learning Activity Prerequisite(s): IDES 1001, IDES 1301. Lecture and tutorials three hours a week, laboratory three

IDES 2102 [0.5 credit] Design for Manufacturing B

Continuation of IDES 2101. Transformation techniques applied to manufacturing materials. Part-design requirements and cost factors for manufacturing processes. The influences and role of assembly, finishing, production tooling, costing are addressed.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 2101 or permission of the School of

Industrial Design.

hours a week.

Lecture and tutorials three hours a week, laboratory three hours a week.

IDES 2104 [0.5 credit] Computer Applications A

Provides industrial design students with working knowledge of design related 2D computer applications, such as graphic manipulation, illustration software, and 2D Computer-Aided Design (CAD). Labs and projects are oriented towards building a foundation in software and group work skills for studio courses.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 1301.

Lecture and tutorials three hours a week.

IDES 2105 [0.5 credit] Computer Applications B

Provides industrial design students with working knowledge of design related three-dimensional (3D) computer applications, such as solid and surface modelling computer-aided design (CAD) software. Labs and projects are oriented towards building a foundation in software and group work skills for studio courses.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 2104.

Lecture and tutorials three hours a week.

IDES 2205 [0.5 credit]

Sensory Aspects of Design for User Experience

An exploration of multi-sensory qualities derived from and designed into products to optimize product-interaction experiences. Visual, tactile, auditory, and other related sensory aspects of design and design principles that contribute to the product multi-sensory characteristics while adding meaning and emotional value.

Includes: Experiential Learning Activity

Precludes additional credit for IDES 2203 (no longer offered).

Prerequisite(s): IDES 1001 or permission of the School of Industrial Design.

Lectures and tutorials three hours a week.

IDES 2300 [0.5 credit] Projects IIA

Principles of design sketching used in the industrial design process. Topics include: sketching as a tool for problem definition; idea exploration and form development; rendering techniques and the communication of design concepts; basic physical prototyping and modeling-making techniques.

Includes: Experiential Learning Activity
Prerequisite(s): IDES 1001 and IDES 1301, or permission
of the School of Industrial Design.
Studio and lectures six hours a week.

IDES 2302 [0.5 credit] Projects IIB

Introduction to the design principles associated with adapting products to an existing product semantic. Topics covered: principles of design, product semantics, design analysis, design synthesis, design evaluation, and modeling techniques. The design project(s) explore some or all of the design principles covered in the lectures. Includes: Experiential Learning Activity

Prerequisite(s): IDES 2300 or permission of the School of

Industrial Design.

Studio and lectures six hours a week.

IDES 2600 [0.5 credit]

Human Factors/Ergonomics in Design

Foundation course in human factors/ergonomics providing an overview of physical and cognitive considerations in product design and related design fields. Anthropometrics, biomechanical considerations, cognition, social interaction, and emotional interaction are introduced in relation to supporting user experience, health and safety, performance and productivity.

Includes: Experiential Learning Activity
Prerequisite(s): PSYC 1001 and PSYC 1002, or PSYC

1000.

Lectures and discussion three hours a week.

IDES 3104 [0.5 credit] **Exhibition Design**

Exhibition design is explored through lectures, case studies, field trips and guest lectures. Students participate in exercises and apply design skills to a variety of exhibition design realms. Introduces students to the potential of the built environment for exploring a range of diverse exhibit applications.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 2302 or permission of the School of

Industrial Design.

Lectures and tutorials three hours a week.

IDES 3105 [0.5 credit]

Visual Communication and Package Design

A survey of visual communication and package design principles relevant to industrial designers. Product/brand definition and corporate identity through package design. Includes: Experiential Learning Activity

Prerequisite(s): IDES 2302 or permission of the School of

Industrial Design.

Lectures and tutorials three hours a week.

IDES 3106 [0.5 credit]

Advanced Computer Applications

Examination of complex product geometry utilizing 3D computer applications. Topics include spline, surface and solids construction, surface verification tools, and rendering tools and techniques. Workflow, robust design, reverse design techniques and 3D printing will be explored through exercises.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 2105. Third or Fourth Year standing or permission of the School of Industrial Design.

Lecture and tutorials three hours a week.

IDES 3107 [0.5 credit] **Design and Sustainability**

Explores the industrial designer's role in creating more environmentally and socially responsible products. Addresses imperatives and drivers for integrating sustainability into products. Includes: sustainable design strategies, strategies and tools, sustainable design business case, circular economy model for designed products, and case studies.

Includes: Experiential Learning Activity

Prerequisite(s): IDES IDES 2302 and Third or Fourth Year standing or permission of the School of Industrial Design. Lectures and tutorials three hours a week.

IDES 3202 [0.5 credit]

Advanced Studies in Form and Colour

Students may continue the research and study encountered in IDES 2205, IDES 2300 and IDES 2302 by doing advanced research in the phenomena of form and/ or colour and their communicative functions in products. Directed Study.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 2302 or permission of the School of

Industrial Design.

Lecture and tutorials three hours a week.

IDES 3302 [0.5 credit] **Projects IIIB**

Introduction to the principles of innovation as found in industrial design. Invention, innovation, entrepreneurship, basic mechanisms. The design project(s) explore some or all of the design principles covered in the lectures.

Includes: Experiential Learning Activity

Precludes additional credit for IDES 3301 (no longer

Prerequisite(s): IDES 3300 or IDES 3310 or permission of the School of Industrial Design.

Studio and lectures six hours a week.

IDES 3305 [0.5 credit]

Special Studies

Special Industrial Design Studies deal with specific projects, which may differ from year to year depending on the availability of specialists in a particular field or study opportunities as they present themselves.

Prerequisite(s): IDES 2302 and Third or Fourth Year standing or permission of the School of Industrial Design. Lectures, tutorials, laboratory and studio three hours a week or equivalent.

IDES 3306 [0.5 credit] **Special Studies**

Special Industrial Design Studies deal with specific projects, which may differ from year to year depending on the availability of specialists in a particular field or study opportunities as they present themselves.

Prerequisite(s): IDES 2302 and Third or Fourth Year standing or permission of the School of Industrial Design. Lectures, tutorials, laboratory and studio three hours a week or equivalent.

IDES 3310 [0.5 credit]

Projects IIIA

Introduction to the design principles associated with the evaluation and re-design of an existing product. Topics include: user/machine relationship, component packaging, and manufacturability. The design project(s) explore some or all of the design principles covered in the lectures. Includes: Experiential Learning Activity

Precludes additional credit for IDES 3300 (no longer offered).

Prerequisite(s): IDES 2302 or permission of the School of Industrial Design.

Studio and lectures six hours a week.

IDES 3502 [0.5 credit]

Contextual Nature of Products

Cultural subjects which have an influence on contemporary industrial design. The perspective of the course is anthropological: the context and cultural relevance of industrial design.

Prerequisite(s): IDES 1000 (ARCH 2006) and Third or Fourth year standing.

Lectures and tutorials three hours a week.

IDES 3601 [0.5 credit] Research for Design

Basic design research techniques to foster design exploration. Methods focus on understanding context and user experience to produce meaningful, actionable insights and design opportunities. Processes include qualitative and quantitative research, as well as creative and evaluative research with people. Teamwork and collaboration are explored.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 2600 and Third or Fourth Year

Standing.

Lectures or laboratory three hours a week.

IDES 3999 [0.0 credit] Co-operative Work Term

Includes: Experiential Learning Activity

IDES 4001 [0.5 credit] Industrial Design Seminar

Topics vary yearly and address key contemporary industrial design issues. There is a focus on writing, discussion, and debate. Students organize a seminar with design professionals and other community experts including student and professional presentations, interaction, and discussion.

Prerequisite(s): IDES 3302 or permission of the School of Industrial Design.

Seminar three hours a week.

IDES 4002 [0.5 credit] Professional Practice

The organizational aspects of consultancies and client responsibilities within the framework of corporate management. Topics include: the form of contracts for consultancy, determination of fees, legal implications, patents and copyrights. Guest lecturers.

Precludes additional credit for IDES 3503 (no longer

Prerequisite(s): IDES 3300 or IDES 3310 or permission of the School of Industrial Design.

Lectures and discussion three hours a week.

IDES 4101 [0.5 credit]

Adv. Studies in Manufacturing

Advanced manufacturing concepts and workflows are examined through a series of workshops and minor projects utilizing state-of-the-art equipment. Includes: Experiential Learning Activity

Prerequisite(s): IDES 2101 and IDES 2102. Lectures or laboratory three hours a week.

IDES 4200 [0.5 credit]

Form Organization

Using form organization as a tool to design, the definition and prescription of monolithic solids by means of an abstract system; making and verifying materialized approximations of such solids.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 2300 and IDES 2302 or permission

of the School of Industrial Design.

Lectures, tutorials and laboratory six hours a week.

IDES 4301 [0.5 credit] Minor Projects

Advanced skills-based course that enhances student experience in novel, experimental processes and techniques in design. Workshop-style activities and short projects focus on increasing skill competence and versatility in a variety of fields. Emphasis on time management and the ability to work independently.

Includes: Experiential Learning Activity

Prerequisite(s): IDES 3302 or permission of the School of Industrial Design.

Studio and lectures six hours a week.

IDES 4305 [0.5 credit] Special Studies

Like the third-year Special Industrial Design Studies, those of fourth year deal with specific projects, which may differ each year depending on the availability of specialists among the faculty of the School of Industrial Design or on particular opportunities as they present themselves. Prerequisite(s): IDES 3302 or permission of the School of Industrial Design.

Lectures, tutorials, laboratory and studio three hours a week or equivalent.

IDES 4306 [0.5 credit] Special Studies

Like the third-year Special Industrial Design Studies, those of fourth year deal with specific projects, which may differ each year depending on the availability of specialists among the faculty of the School of Industrial Design or on particular opportunities as they present themselves. Prerequisite(s): IDES 3302 or permission of the School of Industrial Design.

Lectures, tutorials, laboratory and studio three hours a week or equivalent.

IDES 4310 [1.5 credit] Capstone Project

Application of design principles in a comprehensive design project. Problem area should be product-oriented and of sufficient complexity. Normally undertaken in consultation with off-campus organizations and/or industry. Supervised by faculty and/or sessional members.

Includes: Experiential Learning Activity

Precludes additional credit for IDES 4300 (no longer offered).

Prerequisite(s): IDES 3302 or permission of the School of Industrial Design.

Studio and lectures six hours a week in Fall and twelve hours a week in Winter.

IDES 4400 [0.5 credit] Internship Field Report

Work experience related to industrial design.
Following the internship period, normally 12 weeks,
a comprehensive report describing observations and
insights will be submitted. Graded Sat or Uns.
Includes: Experiential Learning Activity
Prerequisite(s): IDES 3300 or IDES 3310 or permission of
the School of Industrial Design.
Tutorial hours arranged.

Information Technology

This section presents the requirements for programs in:

- Information Resource Management B.I.T.
- Interactive Multimedia and Design B.I.T.
- Interactive Multimedia and Design Animation & Visual Effects Stream B.I.T.
- Interactive Multimedia and Design Game Design/ Development Stream B.I.T.
- Interactive Multimedia and Design Web & User Interfaces Stream B.I.T.
- Network Technology B.I.T.
- · Optical Systems and Sensors B.I.T.

Program Requirements

Course Categories

- · Carleton University Electives
- · Algonquin college Electives

Please check the current lists of approved electives on the program web site.

Information Resource Management B.I.T. (20.0 credits)

A. Credits Included in the Major CGPA (10.0 credits)

	orcanto infordaca i	in the major oor A (10.0 oreans)	
1.	2.5 credits in:		2.5

Retention of Work (Interactive Multimedia and Design **Program Only)**

A portfolio represents a record of the student's progress and design experience over the years, and is an indispensable requirement for any future job application. A portfolio is started in first year and continues to expand until graduation. The School, therefore, requires that each student produce reproductions (on a digital storage device, e.g. flash drive) of their work at the end of each term. One copy of the work should be put in the student's portfolio and the other turned in to the instructor for retention in the School's archives. (This facilitates retrospective exhibitions of work, accreditation, publications and any future references for pedagogic purposes.) Original work is the property of the students, but the School retains the right to keep work of merit for up to four years after the date of submission. The School will make every effort to preserve the work in good condition, and will give authorship credit and take care of its proper use.

Regulations

Total Credits

The regulations presented in this section apply to all students in the Bachelor of Information Technology program.

In addition to the program requirements, students must satisfy the University regulations common to all undergraduate students including the process of Academic Continuation Evaluation (consult the *Academic Regulations of the University* section of this Calendar).

Joint Status

A student registered in the BIT degree has student status at both Algonquin College and Carleton University. At Algonquin College the student is considered to be a post-secondary student; at Carleton University, the student is considered to be a degree student. Students registered in the BIT degree have access to all student services on the Carleton University campus and selected services on the Algonquin College campus.

Academic Regulations

The academic regulations governing the B.I.T. are the academic regulations of Carleton University. These regulations are defined in full in the Academic Regulations of the University section of this Calendar and apply to B.I.T. students on both campuses. Within the context of these regulations, B.I.T. is considered to be a non-honours degree, with a defined Major CGPA, and requires 20.0 credits. Courses with the designations BIT, IMD, IRM, NET, or OSS are not normally transferable to Engineering, Computer Science, or other programs at Carleton University.

Students should note that there are significant differences between the academic regulations of Carleton University and Algonquin College, it is the regulations of Carleton University that apply in all cases as related both to course registrations and program rules.

At Carleton University, the chief examination officer of the BIT is the Dean of Engineering and Design. At

Algonquin College, grades are approved by the Dean of the respective School.

Graduation

In order to graduate with the Bachelor of Information Technology Degree and the Advanced Diploma of Technology or Advanced Diploma of Applied Arts, the student must:

- 1. satisfy all requirements for the program of study;
- 2. be recommended for graduation by Bachelor of Information Technology Academic Council;
- 3. be approved for graduation by the Senate of Carleton University;
- be approved for graduation by the Registrar of Algonquin College.

Discipline

20.0

The regulations, procedures and sanctions that apply to student discipline on either campus, both concerning Instructional Offences and Offences of Conduct are those of Carleton University and are described in the Carleton University Undergraduate Calendar. However, while students are on Algonquin's campus, they are expected to follow Algonquin's Directives regarding Student Misconduct and Use of Electronic Devices.

Co-operative Education

For more information about how to apply for the Co-op program and how the Co-op program works please visit the Co-op website.

All students participating in the Co-op program are governed by the Undergraduate Co-operative Education Policy.

Undergraduate Co-operative Education Policy Admission Requirements

Students can apply to Co-op in one of two ways: directly from high school, or after beginning a degree program at Carleton.

If a student applies to a degree program with a Co-op option from high school, their university grades will be reviewed two terms to one year prior to their first work term to ensure they meet the academic requirements after their first or second year of study. The time at which the evaluation takes place depends on the program of study. Students will automatically receive an admission decision via their Carleton email account.

Students who did not request Co-op at the time they applied to Carleton can request Co-op after they begin their university studies. To view application instructions and deadlines, please visit carleton.ca/co-op.

To be admitted to Co-op, a student must successfully complete 5.0 or more credits that count towards their degree, meet the minimum CGPA requirement(s) for the student's Co-op option, and fulfil any specified course prerequisites. To see the unique admission and continuation requirements for each Co-op option, please refer to the specific degree programs listed in the Undergraduate Calendar.

Participation Requirements

Co-op Participation Agreement

All students must adhere to the policies found within the Co-op Participation Agreement.

COOP 1000

Once a student has been admitted to the Co-op Program, they will be given access to register in COOP 1000. This zero-credit online course must be completed at least two terms prior to the student's first work term.

Communication with the Co-op Office

Students must maintain contact with the Co-op Office during their job search and while on a work term. All email communication will be conducted via the students' Carleton email account.

Employment

Although every effort is made to ensure a sufficient number of job postings for all Co-op students, no guarantee of employment can be made. The Co-op job search process is competitive, and success is dependent upon factors such as current market conditions, academic performance, skills, motivation, and level of commitment to the job search. It is the student's responsibility to apply for positions via the Co-op job board in addition to actively conducting a self-directed job search. Students who do not obtain a co-op work term are expected to continue with their academic studies. It should be noted that hiring priority for positions within the Federal Government of Canada is given to Canadian citizens.

Registration

- Students must be registered as full-time during all fall and winter study terms beginning the term in which they enroll in COOP 1000.
- Students will be registered in a Co-op Work Term course while at work. This course does not carry academic course credit, but is noted on academic transcripts.
- Students may register in a 0.5 credit during a work term, provided the course is offered during the evening or is offered asynchronously online.
- Students must have at least one term of full-time studies left to complete following their final co-op work term. Students cannot end their degree on a work term.

Work Term Assessment and Evaluation Work Term Evaluation

Employers are responsible for submitting to Carleton University final performance evaluations for their Co-op students at the end of their work terms.

Work Term Assessment

In order to successfully complete the co-op work term, students must receive a Satisfactory (SAT) grade on their Co-op Work Term Report, which they must submit at the completion of each four-month work term.

Graduation with the Co-op Designation

In order to graduate with the Co-op Designation, students must satisfy all requirements of the degree program in addition to the successful completion of three or four work terms (the number is dependent upon the student's academic program). Students found in violation of the Co-op Participation Agreement may have the Co-op Designation withheld.

Note: Participation in the co-op option will add up to one additional year for a student to complete their degree program.

Voluntary Withdrawal from the Co-op Option

Students who are currently on a co-op work term or who have already committed to a co-op work term either verbally or in writing may not leave the position and/or withdraw from the co-op option until they have completed the work term and all related requirements.

Involuntary or Required Withdrawal from the Co-op Option

Students may be removed from the Co-op Program for any of the following reasons:

- 1. Failure to achieve a grade of SAT in COOP 1000;
- 2. Failure to attend all interviews for positions to which the student has applied;
- Declining more than one job offer during the job search;
- 4. Reneging on a co-op position that the student has accepted either verbally or in writing;
- Continuing a job search after accepting a co-op position:
- 6. Dismissal from a work term by the co-op employer;
- Leaving a work term without approval from the Co-op Management Team;
- 8. Receipt of an unsatisfactory work term evaluation;
- 9. Receiving a grade of UNS on the work term report.

International Students

All international students are required to possess a Coop Work Permit issued by Immigration, Refugees and Citizenship Canada before they can begin working. The Co-operative Education Office will provide students with a letter of support to accompany their Co-op Work Permit application. Students are advised to discuss the application process and application requirements with the International Student Services Office.

Co-op Fees

All participating Co-op students are required to pay Co-op fees. For full details, please see the Co-op website.

Bachelor of Information Technology: Co-op Admission and Continuation Requirements

- · Maintain full-time status in each study term;
- Be eligible to work in Canada (for off-campus work);
- · Have successfully completed COOP 1000 .

In addition to the following:

- 1. Registered as a full-time student in the B.IT program;
- 2. Successfully completed 5.0 or more credits;
- Obtained a Major CGPA of at least 8.00. This CGPA must be maintained throughout the duration of the degree.

B.IT students must successfully complete three (3) work terms to obtain the Co-op Designation.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

Bachelor of Information Technology (B.I.T.)

The Bachelor of Information Technology is offered jointly with Algonquin College.

Admission Requirements

First Year

To be eligible for admission to the first year of the Bachelor of Information Technology, the applicant must have the Ontario Secondary School Diploma (OSSD) or equivalent, including a minimum of six 4U or M courses.

For Information Resource Management: the six 4U or M courses must include English and one of Advanced Functions or Calculus and Vectors or Mathematics of Data Management.

For Interactive Multimedia and Design: the six 4U or M courses must include Advanced Functions. In addition, candidates for BIT in Interactive Multimedia and Design must submit a portfolio of any kind of creative work as part of their application. Detailed information about the portfolio requirements can be found at admissions.carleton.ca

For Network Technology: the six 4U or M courses must include one of Advanced Functions or Calculus and Vectors or Mathematics of Data Management (Calculus and Vectors recommended).

For Optical Systems & Sensors: the six 4U or M courses must include one of Advanced Functions or Calculus and Vectors or Mathematics of Data Management (Calculus and Vectors recommended). Additionally, 4U Physics is strongly recommended.

Advanced Standing

Applications to the Bachelor of Information Technology degree will be evaluated for advanced standing on an individual basis upon admission to the program. Advanced standing will be granted only for those subjects assessed as being appropriate for the program selected. Students will not receive credit for courses graded below C-.

Co-op Option

Direct Admission to the First Year of the Co-op OptionApplicants must:

- 1. meet the required overall admission cut-off average and prerequisite course average. These averages may be higher than the stated minimum requirements;
- be registered as a full-time student in one of the programs of the Information Technology degree stated in this section:
- 3. be eligible for work in Canada (for off-campus work placements).

Meeting the above requirements only establishes eligibility for admission to the program. The prevailing job market may limit enrolment in the Co-op option.

Note: continuation requirements for students previously admitted to the co-op option and admission requirements for the co-op option after beginning the program are described in the Co-operative Education Regulations section of this Calendar.

Information Resource Management (IRM) Courses

IRM 1002 [0.5 credit]

Reference and Information Services

Introduction to the theory and techniques needed to conduct reference interviews and interpret reference queries. Students learn to select and use general reference sources such as dictionaries, encyclopedias, directories, bibliographies, periodical indexes, almanacs, and handbooks in print, and electronic formats.

Includes: Experiential Learning Activity

 $\label{eq:precedule} Prerequisite(s) \hbox{: restricted to students in the B.I.T. degree}$

program.

Lectures two hours a week, tutorial/laboratory two hours a week.

IRM 1003 [0.5 credit] Collections management

Introduction to the principals of collections management including techniques and procedures for selecting, ordering and receiving library materials, accounting, collection development and automated acquisitions. Students also learn policies and procedures required for circulation, document delivery and interlibrary loans. Includes: Experiential Learning Activity

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures two hours a week, tutorial/laboratory two hours a week.

IRM 1004 [0.5 credit] Reader's Advisory Services

Students become familiar with fiction and non-fiction materials available to various categories of clients and learn how to market them. In addition, students further develop through various assignments their researching, writing, speaking, listening and communication skills. Includes: Experiential Learning Activity

 $\label{eq:precedence} Prerequisite(s): Restricted \ to \ students \ in \ the \ B.I.T. \ degree \\ program.$

Lectures three hours a week.

IRM 1005 [0.5 credit] Web Interface Development

Combining graphics, text, audio and video to develop websites on an individual basis and in groups, using latest versions of HyperText Markup Language(HTML), Cascading Style Sheets (CSS), JavaScript and data interchange formats such as Extensible Markup Language(XML) and JavaScript Object Notation(JSON). Includes: Experiential Learning Activity

Prerequisite(s): Restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial/laboratory one hour a week.

IRM 1006 [0.5 credit]

Subject Analysis and Indexing

Students learn the basic theory of subject analysis and indexing methods used to provide access to library materials and literature. Practical instruction makes use of thesauri, as well as standard subject heading lists, such as Sears and Library of Congress.

Includes: Experiential Learning Activity

Prerequisite(s): Restricted to students in the B.I.T. degree program.

Lectures two hours a week, tutorial/laboratory two hour a

IRM 1007 [0.5 credit] Cataloguing

The catalogue is the main finding aid to the collection of the library. Students learn the basic principles and concepts of international standards used to describe library materials. In-class exercises, lectures and practical experience help students apply these cataloguing standards.

Includes: Experiential Learning Activity
Precludes additional credit for IRM 1001 (no longer offered).

Prerequisite(s): restricted to students in the B.I.T. program.

Lectures two hours a week, tutorial/laboratory two hours a week.

IRM 1008 [0.5 credit]

Introduction to Information Resource Management

Students develop understanding of the concepts of information retrieval, creation, evaluation, organization and client service. Knowledge of legal and ethical implications of information and current trends in the field is studied. Through in-class lectures and hands-on activities, students

gain an overview of the field.

Precludes additional credit for IRM 1000 (no longer offered).

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures three hours a week.

IRM 2002 [0.5 credit]

Legal and Business Information

Students develop skills in planning and executing information searches and evaluating print and electronic resources. Students learn to locate information on selected topics, compile subject-specific annotated bibliographies and instruct library clients in the use of specialized materials and databases.

Includes: Experiential Learning Activity

Prerequisite(s): IRM 1002.

Lectures two hours a week, tutorial/laboratory two hours a week.

IRM 2003 [0.5 credit]

Classification

How to interpret and apply Dewey Decimal and Library of Congress Classification systems. Also includes analysis of the subject content of materials, building notation, using tables, shelf-listing techniques and creating unique book numbers.

Includes: Experiential Learning Activity

Prerequisite(s): IRM 1006.

Lectures two hours a week, tutorial/laboratory one hour a

week.

IRM 2004 [0.5 credit]

Information Management and Digital Preservation

Essentials of information management in an organization including the life cycle management of files in paper and the electronic environment. This course will also cover contemporary issues in information management and digital preservation.

Includes: Experiential Learning Activity

Prerequisite(s): IRM 1008.

Lectures two hours a week, tutorial/laboratory one hour a

week.

IRM 2005 [0.5 credit] Advanced Cataloguing

Libraries purchase and provide access to a wide variety of print and electronic resources. Building on work done in IRM 1007, students learn to interpret international cataloguing standards to describe more complex materials. In-class exercises, lectures and practical experience help students apply these cataloguing standards.

Includes: Experiential Learning Activity

Precludes additional credit for IRM 2001 (no longer

offered).

Prerequisite(s): IRM 1007.

Lectures two hours a week, tutorial/laboratory two hours a

week.

IRM 2006 [0.5 credit]

Data Visualization

Web-based data visualization techniques and systems. Good design practices for visualization, tools for visualization of data from a variety of fields, and programming of interactive web-based visualizations focusing on JavaScript, CSS, and related libraries.

Includes: Experiential Learning Activity

Also listed as ITEC 2100.

Prerequisite(s): IRM 1005 and BIT 1400.

Lectures/labs five hours a week.

IRM 3001 [0.5 credit]

Scientific and Medical Information

Students enhance their knowledge of print and electronic reference sources in science and technology. Students learn to compile specialized subject-specific bibliographies and assignments provide training in the use of science and technology reference sources.

Includes: Experiential Learning Activity

Prerequisite(s): IRM 2002.

Lectures two hours a week, tutorial/laboratory two hours a

week.

IRM 3003 [0.5 credit]

Legal Issues in Information Resource Management

In-depth analysis and assessment of copyright and other forms of intellectual property. Legal issues related to information technology. Topics may include privacy, surveillance and monitoring, access to information, freedom of expression, Charter and human rights issues, and security.

Includes: Experiential Learning Activity

Prerequisite(s): Restricted to students in the B.I.T. degree

rogram.

Lectures three hours a week.

IRM 3004 [0.5 credit]

Project management

Identification, selection, initiation, and organization of projects. Risk assessment, budget issues, communication, project scheduling, performance monitoring and control. Emphasis on practical techniques related to the field of information management using case studies.

Includes: Experiential Learning Activity

Prerequisite(s): third year standing in the Information

resource management program.

Lectures two hours a week, tutorial/laboratory two hours a

week.

IRM 3006 [0.5 credit]

Data Analysis and Research Methodology

Introduction to the logic and design of research. Qualitative and quantitative research methodology with emphasis on the application and interpretation of statistical techniques for data analysis. May include, but are not limited to, bivariate and multivariate analysis, distribution analysis, visual data analysis, market basket analysis.

Includes: Experiential Learning Activity

Precludes additional credit for IRM 3002 (no longer

offered).

Prerequisite(s): BIT 2009 or equivalent.

Lectures three hours a week.

IRM 3007 [0.5 credit] Practicum for IRM

Students will design and complete a project related to information management under the supervision of a faculty member or librarian. This course provides the opportunity to apply knowledge gained in previous courses. Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in the Information resource management program.

Tutorial/laboratory eight hours a week.

IRM 3008 [0.5 credit] Metadata for IRM

Students develop an understanding of key metadata schema and apply standards to describe range of digital resources. The metadata schemes include focus on Dublin Core (DC) and MODS with select coverage of specialist schema. Through in-class lectures and hands-on activities, students apply metadata schemes.

Includes: Experiential Learning Activity

Precludes additional credit for IRM 3000 (no longer

offered).

Prerequisite(s): IRM 2005.

Lectures two hours a week, tutorial/laboratory two hours a

week.

IRM 4000 [0.5 credit] Library Software

Using skills and knowledge of automated systems already developed in introductory courses, students learn the theory and receive the hands-on practice needed to use library databases. A component on choosing and comparing library software is included.

Includes: Experiential Learning Activity

Prerequisite(s): Restricted to students in the B.I.T. degree

Lectures two hours a week, tutorial/laboratory one hour a week.

IRM 4001 [0.5 credit]

Archives and Special Collections

Principles and methods used by archivists and record managers in organizing their collections for better access and retrieval. Students also learn aspects of physical bibliography, the book trade, preservation and conservation of books and how to exhibit such material. Includes: Experiential Learning Activity

Prerequisite(s): Restricted to students in the B.I.T. degree program.

Lectures three hours a week.

IRM 4002 [0.5 credit] Network Technology

Foundation knowledge for computer networks and communications. Topics include basic network design, layered communications models, IP addressing and subnets, and industry standards for networking media and protocols, with an emphasis on TCP/IP protocol suite and Ethernet environments.

Includes: Experiential Learning Activity

Lectures two hours a week, tutorial/laboratory one hour a

week.

IRM 4004 [0.5 credit]

Applied Machine Learning and Big Data Analytics

Introduction to Machine Learning and Big Data Analytics. Topics include: Association Rule Mining, Classification, Clustering, Linear and Logistic Regression, Distributed File System, Batch and Stream Data Processing, and other related. Applications on other domains such as multimedia, networks, finance, and/or business.

Includes: Experiential Learning Activity

Prerequisite(s): IRM 3006. Lectures three hours a week.

IRM 4005 [0.5 credit] Introduction to Deep Learning

Introduction to classification and regression. Optimization, vectorization, gradient descent, cost, loss and activation functions. Introduction and basics to AI, Artificial Neural Networks, forward and backward propagation, Multi Layer Perceptron, and other types of Deep Neural Network models, their applications in multimedia, networks, finance, etc.

Includes: Experiential Learning Activity

Also listed as OSS 4005.

Prerequisite(s): BIT 2009 and BIT 2400.

Lectures three hours a week.

IRM 4900 [1.0 credit] IRM Capstone Project

Student-initiated project developed in association with a project supervisor and external information resource management advisor. Project is supported by a written report, seminar discussions and final presentation. All proposals must be approved by the IRM Program Project Committee.

Includes: Experiential Learning Activity

Prerequisite(s): IRM 3004, IRM 3007 or LIB 2030 and LIB 2047 and fourth year standing in the IRM program.

Tutorial hours arranged.

Information Technology (BIT) Courses BIT 1000 [0.5 credit]

Mathematics I for NET

Tailored for students in the Network Technology program, this course covers basic concepts in functions (polynomials, exponential, logarithmic) and introduces concepts of limits, derivatives and rules of differentiation, applications of differentiation (max-min problems, curve sketching) and integration.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1100, BIT 1200,
ECON 1401, ECON 1402, MATH 1002, MATH 1004,
MATH 1007, MATH 1009, MATH 1052, MATH 1401,
MATH 1402.

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial/laboratory one hour a week.

BIT 1001 [0.5 credit] Mathematics II for NET

Tailored for students in the Network Technology program, this course covers systems of linear equations, vector space of n-tuples, subspaces and bases, matrix transformations, kernel, range, matrix algebra and determinants, inner products and orthogonality, eigenvalues, diagonalization and applications. Includes: Experiential Learning Activity
Precludes additional credit for BIT 1101, BIT 1201, ECON 1401, ECON 1402, MATH 1104, MATH 1107, MATH 1119, MATH 1152, MATH 1401, MATH 1402. Lectures three hours a week, tutorial and laboratory one hour a week.

BIT 1002 [0.5 credit] Physics for Information Technology I

An introductory course on energy, thermodynamics, sound and electromagnetic waves, optics, and modern physics. Practical skills are learned in the laboratory, which is a required part of the course.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1203, PHYS 1001,
PHYS 1003, PHYS 1007, PHYS 1107.

Prerequisite(s): BIT 1100.

Lectures three hours a week, tutorial three hours/laboratory three hours alternate weeks.

BIT 1006 [0.5 credit]

Achieving Success in Changing Environments

Students explore the possibilities ahead, assess their own aptitudes and strengths, and apply critical thinking and decision-making tools to help resolve some of the important issues in our complex society with its competing interests.

Prerequisite(s): Restricted to students in the B.I.T. degree program.

Lectures three hours a week.

BIT 1007 [0.5 credit] Physics for NET

An introductory course on energy, electrical networks (AC and DC circuits, resistance, impedance, capacitance), electrostatics (electric fields, static electricity), electromagnetism, electromagnetic waves, optics, and other topics in modern physics. Practical skills are learned in the laboratory, which is a required part of the course. Precludes additional credit for BIT 1003 (no longer offered), BIT 1204, PHYS 1002, PHYS 1004, PHYS 1008, PHYS 1108.

Prerequisite(s): BIT 1000,Restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial three hours/ laboratory three hours alternate weeks

BIT 1100 [0.5 credit] Mathematics I for IMD

Tailored for students in the Interactive Multimedia Design program, this course covers basic concepts in functions (polynomials, exponential, logarithmic) and introduces concepts of limits, derivatives and rules of differentiation, applications of differentiation (max-min problems, curve sketching) and integration.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1000, BIT 1200,
ECON 1401, ECON 1402, MATH 1002, MATH 1004,
MATH 1007, MATH 1009, MATH 1052, MATH 1401,
MATH 1402.

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial/laboratory one hour a week.

BIT 1101 [0.5 credit] Mathematics II for IMD

Tailored for students in the Interactive MultiMedia
Design program, this course covers systems of linear
equations, vector space of n-tuples, subspaces and bases,
matrix transformations, kernel, range, matrix algebra
and determinants, inner products and orthogonality,
eigenvalues, diagonalization and applications.
Includes: Experiential Learning Activity
Precludes additional credit for BIT 1001, BIT 1201,
ECON 1401, ECON 1402, MATH 1104, MATH 1107,
MATH 1119, MATH 1152, MATH 1401, MATH 1402.
Lectures three hours a week, tutorial and laboratory one
hour a week.

BIT 1200 [0.5 credit]

Calculus

Limits. Differentiation of the elementary functions, including trigonometric functions. Rules of differentiation. Applications of differentiation: max-min problems, curve sketching, approximations. Introduction to integration: definite and indefinite integrals, areas under curves, fundamental theorem of calculus.

Includes: Experiential Learning Activity

Precludes additional credit for BIT 1000, BIT 1100, MATH 1002, MATH 1004, MATH 1007, MATH 1009, MATH 1052, MATH 1401/ECON 1401, MATH 1402/ECON 1402.

Prerequisite(s): Ontario Grade 12 Mathematics: Advanced Functions; or MATH 0005 and MATH 0006; or equivalent. Restricted to students in the B.I.T. degree program. Lectures three hours a week, tutorial/laboratory one hour a week.

BIT 1201 [0.5 credit] Linear Algebra

Systems of linear equations; vector space of n-tuples, subspaces and bases; matrix transformations, kernel, range; matrix algebra and determinants. Dot product. Complex numbers (including de Moivre's Theorem, and n-th roots). Eigenvalues, diagonalization and applications. Note: MATH 1119 is not an acceptable substitute for BIT 1201.

Includes: Experiential Learning Activity
Precludes additional credit for BIT 1001, BIT 1101, MATH
1102, MATH 1104, MATH 1107, MATH 1119, MATH 1152,
MATH 1401/ECON 1401, MATH 1402/ECON 1402.
Prerequisite(s): Ontario Grade 12 Mathematics: Advanced
Functions, or MATH 0005, or equivalent, or permission
of the School. restricted to students in the B.I.T. degree
program.

Lectures three hours a week, tutorial and laboratory one hour a week.

BIT 1203 [0.5 credit] Newtonian Physics

Mechanics, properties of matter, thermodynamics.
Applications chosen in part from the life sciences.
Includes: Experiential Learning Activity
Precludes additional credit for BIT 1002, PHYS 1001,
PHYS 1003, PHYS 1007, PHYS 1107.
Prerequisite(s): (i) Grade 12 Mathematics: Advanced
Functions or equivalent; or (ii) Grade 12 Mathematics:
Calculus and Vectors or equivalent, or MATH 1007 or
BIT 1200 (may be taken concurrently); or (iii) permission of
the Department.Restricted to students in the B.I.T. degree

Lectures three hours a week, laboratory or tutorial three hours a week.

BIT 1204 [0.5 credit]

Electromagnetism & Modern Physics

Electricity and magnetism, DC and AC circuits, wave motion and light. Elements of modern physics. Applications chosen in part from the life sciences. Includes: Experiential Learning Activity Precludes additional credit for BIT 1003 (no longer offered), BIT 1007, PHYS 1002, PHYS 1004, PHYS 1008, PHYS 1108.

Prerequisite(s): BIT 1203 or PHYS 1001 or PHYS 1003 or PHYS 1007 or permission of the Department. Restricted to students in the B.I.T. degree program.

Lectures three hours a week, laboratory or tutorial three hours a week.

BIT 1400 [0.5 credit]

Introduction to Programming and Problem Solving

Introduction to basic concepts of procedural programming and algorithm design in C. Topics include: basic variables, functions, operators, program control with iteration and conditionals, I/O operations, text and file processing, structures, arrays, pointers, debugging, algorithmic thinking and pseudocode, computer architecture, operating systems, and libraries.

Includes: Experiential Learning Activity
Precludes additional credit for COMP 1005, COMP 1405,

ITEC 1400, ITEC 1401. Prerequisite(s): Restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial/laboratory three hours a week.

BIT 2000 [0.5 credit] Probability for Technology

This course covers data analysis, introduction to probability theory, some standard discrete and continuous distributions and their application to interval estimation and significance testing, computational aspects of statistics. Includes: Experiential Learning Activity

Precludes additional credit for BIT 2009, DATA 1517, ECON 2210, ENST 2006, GEOG 2006, STAT 2507, STAT 2606, STAT 3502.

Prerequisite(s): restricted to students in the BIT degree program.

Lectures three hours a week, tutorial/laboratory one hour a week.

BIT 2001 [0.5 credit] Introduction to Business

An overview of the most fundamental business functions. The management of people, human resources, marketing, accounting and finances, business law and operations.

Includes: Experiential Learning Activity
Precludes additional credit for BUSI 1800.

Prerequisite(s): restricted to students in the B.I.T. degree program

Lectures: three hours a week.

BIT 2002 [0.5 credit]

Marketing in the IT sector

Basic problems and practices in marketing. Marketing strategies, planning, packaging, branding and promotion at the level of the individual firm; distribution channels. Includes: Experiential Learning Activity

Precludes additional credit for BUSI 2204.

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures three hours a week.

BIT 2006 [0.5 credit]

Elective

Students must choose from among a list of approved Electives at Algonquin College.

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures three hours a week, or as arranged.

BIT 2008 [0.5 credit]

Multimedia Data Management

Concepts and fundamentals of database systems. Design of relational databases, normalisation, referential integrity, structured query language (SQL), server-side scripting, organisation of multimedia content, dynamic page loading, storage and compression of media, media network considerations, digital watermarking and rights management.

Includes: Experiential Learning Activity

Precludes additional credit for ITEC 2000, IMD 2000 (no longer offered), IRM 2000 (no longer offered).

Prerequisite(s): BIT 1400 and IMD 1005 or IRM 1005. Lecture three hours a week, tutorial/laboratory two hours a week.

BIT 2009 [0.5 credit] Statistics for Technology

This course covers statistical data analysis with an emphasis on hypothesis testing including parametric tests (e.g., t-tests, ANOVA) and non-parametric tests (e.g., Kruskal-Wallis, Friedman, chi-square), correlation and linear regression. Provides an introduction to probability theory and distributions (e.g. binomial, normal).

Includes: Experiential Learning Activity

Precludes additional credit for BIT 2000, DATA 1517, ECON 2210, ENST 2006, GEOG 2006, STAT 2507, STAT 2606, and STAT 3502.

Prerequisite(s): Restricted to students in the BIT degree program.

Lectures three hours a week, tutorial/laboratory one hour a week.

BIT 2010 [0.5 credit]

Differential Equations & Multivariate Calculus

Curves and surfaces. Polar, cylindrical and spherical coordinates. Partial derivatives, gradients, extrema and Lagrange multipliers. Exact differentials. Multiple integrals over rectangular and general regions. Integrals over surfaces. Line integrals. Vector differential operators. Green's Theorem, Stokes' theorem, Divergence Theorem. Applications.

Prerequisite(s): BIT 1200.

Lectures three hours a week, tutorial one hour a week.

BIT 2400 [0.5 credit] **Intermediate Programming**

Introduction to object-oriented programming and algorithm design in C++. Topics include code and data encapsulation using classes and objects, inheritance, polymorphism, object-oriented design, data and code abstraction, program efficiency, user interface objects, event-driven systems, and an introduction to linked-lists and searching.

Includes: Experiential Learning Activity

Precludes additional credit for COMP 1006, COMP 1406, ITEC 2400. ITEC 2401.

Prerequisite(s): BIT 1400. Restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial/laboratory three hours a week.

BIT 3999 [0.0 credit] **Co-operative Work Term**

Includes: Experiential Learning Activity

BIT 4000 [0.5 credit] **Directed Studies**

Independent study under the supervision of a member of the School of Information Technology, open only to students in the B.I.T. program. Students are required to obtain their supervisor's written approval prior to registration and are limited to one such course in their program.

Includes: Experiential Learning Activity

Prerequisite(s): permission of the School of Information Technology.

BIT 4001 [0.5 credit]

Special Topics in Information Technology

Topics not ordinarily treated in the regular course program due to their contemporary subject matter. The choice of topics varies from year to year.

Prerequisite(s): third-year standing in the BIT Program or permission of the department.

Lecture three hours a week.

Interactive Multimedia and Design (IMD) Courses IMD 1000 [0.5 credit]

Introduction to Interactive Multimedia Design

Introduction to interactive multimedia and design, focused on the production and processes of animation, visual fx, game design and development, web design and development, and user experience/interfaces. Topics include: mark-up languages, design process/ problem-solving tools, human-centered design, product development, ethics, and copyright and intellectual property.

Includes: Experiential Learning Activity
Precludes additional credit for ITEC 1100.

Prerequisite(s): Restricted to students in the B.I.T. degree

program.

Lecture three hours a week.

IMD 1001 [0.5 credit] Visual Communication

Visual communication techniques commonly used to draft concepts and ideas to support scripts for film, animation, HCI, and/or game development. Topics include: storyboarding, composition, vanishing point, line quality, visual timing, perspective, depth of field, body language and life drawing. A digital drawing tablet is required.

Includes: Experiential Learning Activity Prerequisite(s): IMD 1000 and IMD 1002.

Workshop three hours a week.

IMD 1002 [0.5 credit] Visual Dynamics

Fundamentals of composition with emphasis on realistic rendering. Students learn how to execute thumbnails and design comprehensives. Topics include illustration, type, colour, texture, proximity and unity, alignment, repetition and continuity, contrast, size relationships, balance, rhythm, negative space, cropping and view selection. Includes: Experiential Learning Activity

Prerequisite(s): restricted to students in the B.I.T. degree program.

Workshop three hours a week.

IMD 1004 [0.5 credit] Design Processes

Design fundamentals using industry standard software techniques and workflow are explored. Topics include: gestalt principles, grids systems, colour, texture, raster and vector image production, and typography. Students design for publication to output such as Web, print, and electronic book formats. Required digital drawing tablet.

Includes: Experiential Learning Activity

Prerequisite(s): restricted to students in the B.I.T. degree program.

Workshop three hours a week.

IMD 1005 [0.5 credit] Web Development

Introduction to Web development. Combining graphics, text, audio, and video to create Web sites; developing different, major working Web sites on an individual basis and in groups, using valid xHTML, cascading style sheets (CSS), JavaScript and XML structures.

Includes: Experiential Learning Activity Precludes additional credit for ITEC 1005.

Workshop five hours a week.

IMD 2003 [0.5 credit] Audio and Video

The creation, production and editing of audio and video for multimedia applications. Topics include single camera recording and capture techniques through to post-production editing. Emphasis is placed on production and operation skills while adhering to industry standard costs and deadlines.

Includes: Experiential Learning Activity Prerequisite(s): IMD 1000 and IMD 1002.

Workshop four hours a week.

IMD 2006 [0.5 credit]

Introduction to Game Design and Development

Basic concepts in the design and development of computer games, including: fundamentals of production cycle, genres, gameplay and game mechanics, story and character development, level design, artificial intelligence for games, game user interface, and common development tools.

Includes: Experiential Learning Activity

Prerequisite(s): BIT 2400 and second-year standing in the IMD program.

Lecture three hours a week, tutorial/laboratory two hours a week

IMD 2007 [0.5 credit] Intro to 3D Animation

Introduction to the basics of 3D computer animation. Topics include: introduction of 3D animation packages, 12 Principles of Animation, character design, character animation (walking/locomotion, motion, and poses), softbody animation (shape interpolation and facial animation), and acting for animators.

Includes: Experiential Learning Activity
Precludes additional credit for IMD 2005 (no longer offered).

Prerequisite(s): BIT 1002 and second-year standing in the IMD program.

Lecture/workshop three hours a week.

IMD 2900 [1.0 credit]

Design Studio 1

Advanced practical studio-based sessions focused on project management. Topics include: project management styles, team collaboration techniques, prototyping, project and content management, marketing, and testing/ validation. The studio emphasizes the management of web design and development projects.

Includes: Experiential Learning Activity

Prerequisite(s): second-year standing in the IMD program.

Studio/lecture eight hours a week.

IMD 3002 [0.5 credit] **3D Computer Graphics**

Technical aspects of 3D computer graphics. Homogeneous transformations, viewing pipeline, cinematography, modeling techniques (explicit and implicit), scene composition, level of detail methods, advanced lighting techniques (BRDF, IBL, subsurfacescattering), 2D/3D texturing, local/global illumination. rendering methods, and shaders.

Includes: Experiential Learning Activity

Prerequisite(s): BIT 1101, BIT 2400 and IMD 3900. Lectures three hours a week, tutorial/laboratory two hours per week.

IMD 3004 [0.5 credit]

Human Computer Interaction and Design

Introduction to concepts centered on Human-Computer Interaction from hardware and software perspectives. Topics include design principles, usability principles and engineering, solving user-centred problems, device interaction, and graphical user interface design (2D and 3D interfaces).

Includes: Experiential Learning Activity

Prerequisite(s): BIT 2009 and third-year standing in the

IMD program.

Lecture three hours a week, tutorial/laboratory two hours

a week.

IMD 3005 [0.5 credit] **Sensor-Based Interaction**

Development of interactive applications that connect the physical and virtual space. Topics include using external devices and sensor hardware, sensing objects and people, gestural input, computer vision, processing of live audio input, and networked software and devices. Includes: Experiential Learning Activity

Prerequisite(s): BIT 2400.

Lecture/ workshop four hours a week.

IMD 3006 [0.5 credit]

Software Design for Multimedia Applications

Provides students with knowledge and expertise to design and develop complex software systems and programs for common multimedia applications. Topics include: data structures, system and requirement analysis, component identification, common design patterns, and working with reusable components.

Includes: Experiential Learning Activity

Prerequisite(s): BIT 2400.

Lecture three hours a week, tutorial/laboratory two hours

IMD 3900 [1.0 credit] Design Studio 2

Intermediate practical studio sessions covering the creative aspects of 3D graphics and animation. Topics include: environment and character modeling, texturing, using bump/displacement maps, advanced materials, 3D cameras, various lighting, keyframe animation, and rendering methods.

Includes: Experiential Learning Activity

Prerequisite(s): IMD 2007 and third-year standing in the

IMD program.

Studio/lecture eight hours a week.

IMD 3901 [1.0 credit] **Design Studio 3**

Studio-based course focuses on interdisciplinary group work, and the use of reality-based/ natural-based interfaces for multiuser interaction, understanding social and environmental context in physical design, basic networking, advanced sound design, and haptic feedback.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in the IMD program,

IMD 2900 and IMD 3005.

Studio/lecture eight hours a week.

IMD 4002 [0.5 credit] **Technology and Culture**

An examination of the relationship between communication technology and society. The course examines the factors that contribute to changes in the collection, storage and distribution of information and the cultural implications of these changes.

Includes: Experiential Learning Activity

Prerequisite(s): third-year standing in the IMD program.

Seminar three hours a week.

IMD 4005 [0.5 credit]

Advanced Topics in Multimedia

Advanced topics in multimedia industry not ordinarily treated in the regular course program due to their contemporary subject matter. The choice of topics varies from year to year.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the IMD program.
Lecture three hours a week.

IMD 4006 [0.5 credit]

Advanced Game Design and Development

Provides students with knowledge and expertise to design and develop professional computer games with advanced and novel features. Topics include: game feel, game analysis techniques, prototyping & playtesting, inclusive/accessible design, interaction design, simulations in games, procedural content generation, and game research.

Includes: Experiential Learning Activity
Prerequisite(s): BIT 1100, IMD 2006 and IMD 3002.
Lecture three hours a week, tutorial/laboratory two hours a week.

IMD 4008 [0.5 credit]

Mobile User Interface Design and Development

Design, development, and evaluation of user interfaces for mobile applications. Topics include: user-centered design methods and develop mobile applications employing the various input and output capabilities available on mobiles, e.g., multi-touch, device motion/rotation, video/audio capture, vibration.

Includes: Experiential Learning Activity Prerequisite(s): IMD 3004 and IMD 3006.

Lecture three hours a week, tutorial/laboratory two hours a week.

IMD 4901 [1.5 credit] IMD Capstone Project

Student-initiated digital media project, under the supervision of a project advisor, consisting of complete end-to-end production, from design to final product. Development will be assessed via design documents, project plans, progress presentations, culminating in a final exposition in front of a panel of industry experts. Includes: Experiential Learning Activity Prerequisite(s): IMD 2900, IMD 3004, IMD 3900, IMD 3901 and fourth-year standing in the IMD program. Tutorial hours arranged.

Network Technology (NET) Courses

NET 1001 [0.5 credit]

Computer Technology Basics

Construction and function of PCs. Introduces technical concepts and terminology relating to system boards, system busses, input/output devices, memory, microprocessors and peripherals. Interaction of software and hardware; data storage; performance issues. Includes: Experiential Learning Activity Prerequisite(s): restricted to students in the B.I.T. degree

program.
Lectures two hours a week, tutorial/laboratory two hours a week.

NET 1002 [0.5 credit]

Networking Fundamentals

Foundation knowledge for computer networks and communications. Topics include basic network design, layered communications models, IP addressing and subnets, and industry standards for networking media and protocols, with an emphasis on TCP/IP protocol suite and Ethernet environments.

Includes: Experiential Learning Activity

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 1006 [0.5 credit] Routing and Switching

Introduction to routing and switching concepts including, static and dynamic routing, trunking and VLANs. Topics include configuring routers and switches and resolving common configuration and reachability issues.

Includes: Experiential Learning Activity

Prerequisite(s): NET 1002.

Lecture three hours a week, tutorial/laboratory three hours a week.

NET 2000 [0.5 credit] Intermediate Networking

Architecture, components and operations of routers and switches in Enterprise networks. Topics include configuration and troubleshooting of OSPF, including Multi-area, redundancy, NAT and troubleshooting techniques.

Includes: Experiential Learning Activity

Prerequisite(s): NET 1006.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 2007 [0.5 credit]

Basics of Transmission Systems

Introduction to the fundamentals of information transmissions systems used in physical layer of the Internet. Covers time- and frequency-domain concepts, digital and analog transmission, signal encoding, sampling, modulation, demodulation, error detection and correction. Examples: DSL, Cable modem, and wireless LAN. Includes: Experiential Learning Activity. Includes: Experiential Learning Activity Prerequisite(s): BIT 1001 and BIT 1007.

Lectures three hours a week, tutorial/laboratory three hours a week.

NET 2008 [0.5 credit] **DevOps**

Exposure to unifying software development (Dev) and software operation (Ops). Use of Python to monitor and automate network management tasks.

Prerequisite(s): BIT 2400.

Lectures three hours a week, tutorial/laboratory three hours a week.

NET 2010 [0.5 credit]

Desktop and Server Environments I

Using Linux and Windows Server, study of the basic features such as file system, system utilities, memory management, boot process troubleshooting and UI customizations. Client-Server architecture is examined with a focus on basic Server configuration and administration. Includes: Experiential Learning Activity. Includes: Experiential Learning Activity Precludes additional credit for NET 2002 (no longer offered).

Prerequisite(s): NET 1001.

Lecture two hours a week, tutorial/laboratory two hours a

NET 2011 [0.5 credit]

Desktop and Server Environments II

Using Unix and Linux Operating systems, study of the command line and network Server operating environments. Configuring Services and Protocols such as DNS, NTP, SSH, SMB, SMTP, POP3, IMAP, HTTP, and DHCP. Basic Server security using firewalls is also introduced. Includes: Experiential Learning Activity. Includes: Experiential Learning Activity

Precludes additional credit for NET 2003 (no longer offered).

Prerequisite(s): NET 2010.

Lecture two hours a week, tutorial/laboratory two hours a week.

NET 2012 [0.5 credit]

Networking Technologies and Automation

Enterprise technologies and QoS mechanisms used for networks access. Topics include virtualization, and automation concepts. Software-defined networking, controller-based architectures and how application programming interfaces (APIs) enable network automation.

Includes: Experiential Learning Activity Precludes additional credit for NET 2001 (no longer

Prerequisite(s): NET 2000.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 2013 [0.5 credit]

Computer Systems Foundations

Introduction to the design and implementation of digital circuits and microprocessors. Topics include: binary numbers and arithmetic, fundamentals of boolean algebra, combinational circuits, sequential circuits, computer architecture and organization: CPU, cache, memory, input/ output, bus structures, interrupts, computer arithmetic, CPU assembly instruction sets.

Includes: Experiential Learning Activity Precludes additional credit for NET 1004 (no longer offered). PLT 1007 (no longer offered). NET 2009 (no longer offered), PLT 2009 (no longer offered), OSS 2009. Prerequisite(s): BIT 2400.

Lectures three hours a week, tutorial/laboratory one hour a week.

NET 3000 [0.5 credit] Database Concepts and SQL

Concepts and fundamentals of relational database systems. Students learn how to design relational databases starting from a conceptual data model, following accepted logical and physical design principles. Topics include normalisation, referential integrity, SQL, DDL and SQL DML & DBC and data extraction/ filtering techniques.

Includes: Experiential Learning Activity Prerequisite(s): second-year standing in the Networking program.

Lecture two hours a week, tutorial/laboratory two hours a week.

NET 3001 [0.5 credit] Real-time Systems

Principles of event-driven systems, review of computer organization; parallel and serial interfaces; programmable timer; I/O methods; polling and interrupts. Real-time kernels. Critical design consideration: concurrency, dead lock, synchronization. Maintaining and improving system performance. Programming exercises in low and high level languages.

Includes: Experiential Learning Activity

Also listed as OSS 3001. Prerequisite(s): NET 2013.

Lectures three hours a week, tutorial/laboratory two hours

a week.

NET 3004 [0.5 credit] Data Structures

Specification and design of abstract data types and their implementation as stacks, queues, trees, tables and graphs. Common and useful examples. Parsing and finite state machines. Analysis of algorithms, recursion, re-entrance. Special focus: abstraction, interface specification and hierarchical design using object-oriented programming.

Includes: Experiential Learning Activity

Also listed as OSS 3004.

Precludes additional credit for PLT 3010 (no longer

offered).

Prerequisite(s): BIT 2400.

Lectures three hours a week, tutorial/laboratory two hours

a week.

NET 3006 [0.5 credit]

Network Management and Machine Learning

Key network management models, protocols, and standards (such as SNMP, NETCONF, NetFlow). Introduction to machine learning (topics may include decision trees, numerical computations for learning, deep feedforward networks, etc.) and its application in network management. Security issues in networking management. Includes: Experiential Learning Activity

Prerequisite(s): BIT 2000, NET 3000 and NET 3004. Lectures three hours a week, tutorial/laboratory two hours

a week.

NET 3007 [0.5 credit] Network Security

Basics of network security. Students are introduced to the goals of IT security, common threats and countermeasures including firewalls, intrusion detection and prevention systems (IDPS) and virtual private networks. Several operating environments will be studied as examples. Also includes a section on computer ethics.

Includes: Experiential Learning Activity

Prerequisite(s): NET 2012.

Lectures two hours a week, tutorial/laboratory three hours a week.

NET 3008 [0.5 credit]

Advanced Network Routing

Routing IP at the enterprise level, within and between, autonomous systems. Advanced control and optimization of routing protocols and manipulation of traffic paths with multiple routing protocols. Working knowledge of Internet reachability via BGP.

Includes: Experiential Learning Activity

Prerequisite(s): NET 2012.

Lectures three hours a week, tutorial/laboratory three

hours a week.

NET 3010 [0.5 credit] Web Programming

Architectures, protocols, and languages used to develop dynamic Web content, including Hypertext Markup and Hypertext Formatting Languages (HTML, XML, CSS), Universal Resource Identifiers (URI), and the Hypertext Transport Protocol (HTTP). JavaScript and PHP are used to model cross-platform web programming.

Includes: Experiential Learning Activity Prerequisite(s): BIT 2400, NET 3000.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 3011 [0.5 credit]

Advanced Network Switching

VLANs and inter-VLAN routing in a multilayer switched environment. Variants of STP and the use of related enhancements. Techniques for network redundancy and load balancing. Securing a switched infrastructure. Architectures and techniques for delivering converged traffic in an enterprise environment.

Includes: Experiential Learning Activity

Prerequisite(s): NET 2012.

Lectures three hours a week, tutorial/laboratory three hours a week.

NET 3012 [0.5 credit] IP Architectures and Solutions

An exploration of various deployment options that can be implemented atop an IP network core. The focus is on technologies including MPLS and Segment Routing that serve to enhance IP service delivery and connectivity leveraging the IP infrastructure. Includes Layer 2 and 3 tunneling techniques.

Includes: Experiential Learning Activity

Prerequisite(s): NET 3008.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 3900 [0.5 credit]

Wireless Networks

Design and configuration of Wi-Fi networks as used in commercial and enterprise venues. Topics include 802.11 family of protocols, wireless transmission, RF design, security methods and protocols, and system design. Topologies include campus, bridge and remote access. Includes: Experiential Learning Activity Prerequisite(s): NET 2007.

Lectures two hours a week, tutorial/laboratory three hours a week.

NET 4000 [0.5 credit]

Emerging Network Technologies

Overview of technologies, protocols and techniques related to Information Technology networking that are either in their early stage of adoption or are not yet mainstream (i.e. beta or prototype stage). Focus will vary from year to year to reflect the evolutionary nature of this domain.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in the Networking
program or permission of the instructor.

Also offered at the graduate level, with different requirements, as ITEC 5110, for which additional credit is precluded.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 4001 [0.5 credit] Network Simulation

Introduction to discrete event simulation and network modeling; fundamental stochastic models for networking; introduction to queueing theory; random numbers; analysis of simulation data; confidence intervals. Use of different software tools to plan and perform simulations.

Includes: Experiential Learning Activity

Prerequisite(s): BIT 2000.

Also offered at the graduate level, with different requirements, as ITEC 5113, for which additional credit is precluded.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 4005 [0.5 credit] Networked Applications

Architectures for computing in modern data networks that adopt the Internet architecture. Topics covered include socket programming, RPC and RMI. Client-server and peer-to-peer models. Emerging application architectures. Includes: Experiential Learning Activity
Prerequisite(s): NET 3004 and NET 3010.
Also offered at the graduate level, with different requirements, as ITEC 5114, for which additional credit is precluded.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 4007 [0.5 credit] Multimedia Networking

Audio and video compression. H.261, JPEG, MPEG and DVI. Accessing audio and video from a web server. Real Time Streaming Protocol (RTSP). Multimedia operating systems. Multimedia database. Network support for multimedia applications. Multimedia synchronization. Includes: Experiential Learning Activity Prerequisite(s): fourth-year standing in Networking program or permission of the instructor. Also offered at the graduate level, with different requirements, as ITEC 5111, for which additional credit is precluded.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 4009 [0.5 credit]

Troubleshooting IP Networks

Integrates planned maintenance and troubleshooting techniques, including, tools, applications and formalized methodologies. Study of issues in focused areas (such as routed vs. switched environments, addressing services, performance, security, VPN), culminating in problem resolution throughout a complex enterprise network. Includes: Experiential Learning Activity Prerequisite(s): NET 3011, NET 3008. Lectures three hours a week, tutorial/laboratory three hours a week.

NET 4010 [0.5 credit] Secure Mobile Networking

The concept, principle and rationale of mobile networking. Mobile network architecture, protocols, mobility management, routing and mobile TCP/IP; Security challenges, vulnerabilities and threats in mobile networks; Security defense techniques and countermeasures in mobile networks.

Includes: Experiential Learning Activity
Prerequisite(s): fourth-year standing in Networking
program or permission of the instructor.
Also offered at the graduate level, with different
requirements, as ITEC 5112, for which additional credit is
precluded.

Lectures three hours a week, tutorial/laboratory one hour a week.

NET 4011 [0.5 credit]

Advanced Topics in Network Security

Understanding classes of advanced attacks. Building secure networks. Adversarial Machine Learning. Security in clouds, virtualized networks, and IoT. Understanding impact of OS and software security issues. Security in next generation networks such as 5G.

Prerequisite(s): NET 3007.

Lectures three hours a week, tutorial/laboratory two hours a week.

NET 4012 [0.5 credit]

Cloud Computing and Virtualization

The basics of cloud computing and its driving technology behind: virtualization. Topics include how virtual machines and containers are deployed and orchestrated; how various resources and networks are virtualized and managed; hypervisor technology; virtual network management and micro-segmentation; cloud service provisioning; cloud security.

Includes: Experiential Learning Activity Prerequisite(s): NET 2013 and NET 3006.

Lectures three hours a week, tutorial/laboratory two hours

a week.

NET 4901 [1.0 credit] NET Capstone Project

This course provides the opportunity to apply knowledge gained in previous courses towards the design and implementation of a major Networking related project. Working in teams or as individuals under the direction of faculty members, students undertake projects internally or in collaboration with industry.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Networking

program.

Tutorial hours arranged.

Optical Systems and Senors (OSS) Courses OSS 1002 [0.5 credit]

Photonics and Optoelectronics Applications

Survey of the history and future of photonics. Photonics benefits and impact on technology and society. Emerging applications of photonics in industry and commercial products. The forces (business, social, political, economic, technical, and educational) that influence the development, adoption and success or failure of technologies.

Includes: Experiential Learning Activity
Precludes additional credit for PLT 1002 (no longer offered).

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures two hours a week, tutorial/laboratory two hours a week.

OSS 1003 [0.5 credit] Optics/Optical Fibers (Principles)

Principles of optics, optical fiber, waveguides and handson experience with optical components. Optical fiber manufacturing and variety of industrial applications. Topics covered include: optical sources, detectors, fiber modes and mode-coupling, couplers, multiplexers, optical amplifiers, physical layer of optical networks, dispersion and nonlinear effects management.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 1003 (no longer offered).

Prerequisite(s): OSS 1006.

Lectures two hours a week, tutorial/laboratory two hours a week

OSS 1005 [0.5 credit] Introduction to Optics

Physics of waves, optics and light propagation through lectures and lab experiments. Geometrical optics, refraction and reflection, interference, diffraction and polarization, thin lens equation, laser beams, Michelson interferometer, birefringence, and Abbe theory of imaging. Electromagnetic spectrum, quantum nature of light, photons, and photoelectric effect.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 1005 (no longer offered).

Prerequisite(s): BIT 1203, restricted to students in the B.I.T. degree program.

Lectures two hour a week, tutorial/laboratory three hours a week.

OSS 1006 [0.5 credit]

Introduction to Automation and Simulation

Introduction to basic programming in both the Matlab and Labview environments. Program development, basic structures (loops, control structures), I/O, data visualization and graphing will be covered. Students will learn to use Labview to develop basic applications and model simple physical systems with Matlab.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 1006 (no longer offered).

Prerequisite(s): restricted to students in the B.I.T. degree program.

Lectures two hour a week, tutorial/laboratory two hours a week.

OSS 2001 [0.5 credit]

Fundamentals of Light Sources

Introduction to incoherent light sources and lasers. Lasers operation, energy levels, quantum mechanics basics. Pumping/excitation, population inversion, laser cavity design, gain and loss, and characteristics of laser emission. An extensive lab manual of relevant experiments, variety of lasers, spectrometers, and detection equipment will be used.

Includes: Experiential Learning Activity Precludes additional credit for PLT 2001 (no longer offered).

Prerequisite(s): BIT 1201. Restricted to students in the BIT degree program.

Lectures two hours a week, tutorial/laboratory two hours a week.

OSS 2002 [0.5 credit]

Optical Communication Networks I

Adaptive Optical Communication Networks with 10Gb/s-200Gb/s Packet-Optical Platforms and WaveServers, OTN, flexible WaveLogic Photonics, ROADM, SONET/SDH, programmable network, optimized mapping techniques, optical carriers (OC-n/STM-m). Extensive hands-on experience using state-of-the-art Optophotonics Lab to work on OAM&P, facility/equipment, synchronization, bandwidth management, performance monitoring and other functionalities.

Includes: Experiential Learning Activity Precludes additional credit for PLT 2002 (no longer offered).

Prerequisite(s): OSS 1003.

Lectures two hours a week, tutorial/laboratory three hours a week.

OSS 2003 [0.5 credit] **Laser Systems**

Laser theory, devices and systems. Safety procedures, laser power supplies, and laser system applications. Solid state, gas, and other types of lasers. Basic material processing, micro machining, bio/medical, and military applications will be covered. Hands-on experience with advanced laser equipment in lab.

Includes: Experiential Learning Activity Precludes additional credit for PLT 2003 (no longer offered).

Prerequisite(s): OSS 2001 or PLT 2001 (no longer offered).

Lectures two hours a week, tutorial/laboratory two hours a week.

OSS 2005 [0.5 credit] Circuits and Signals

Students learn properties of electricity and measurement techniques. Topics covered include RMS, average, applied, peak-to-peak and instantaneous values. Lab experiments deal with RC and RL circuits and LC filters. RLC circuits, and series and parallel resonance are also covered.

Includes: Experiential Learning Activity Precludes additional credit for PLT 2005 (no longer offered).

Prerequisite(s): BIT 1204 or PHYS 1004 or PHYS 1002. Restricted to students in the BIT degree program. Lectures two hours a week, laboratory and problem analysis three hours a week.

OSS 2006 [0.5 credit] **Integrated Circuits**

Fundamentals of logic circuitry in digital systems are studied including basic logic gates, Boolean algebra, signal decoding, logic circuit design, flip-flop circuits. timers and counters. The proper use of semi-conductor components is demonstrated through the use of laboratory experiments.

Includes: Experiential Learning Activity Precludes additional credit for ELEC 2507, PLT 2006 (no longer offered).

Prerequisite(s): OSS 2005 or PLT 2005 (no longer offered). Restricted to students in the B.I.T. degree program.

Lectures two hours a week, laboratory and problem analysis three hours a week.

OSS 2008 [0.5 credit]

Manufacturing Photonics Components

Manufacturing techniques and methods used to produce photonics components and devices/systems. Micro assembly, adhesives, optical tests and measurement, lean manufacturing and quality control standards (Telcordia). Laboratory exposure to optical component production processes: grinding, polishing, coating, mounting, tolerance and accuracy.

Includes: Experiential Learning Activity Precludes additional credit for PLT 2008 (no longer offered).

Prerequisite(s): OSS 1002 or PLT 1002 (no longer offered). Restricted to students in the B.I.T. degree program.

Lectures two hours a week, laboratory two hours a week.

OSS 2009 [0.5 credit]

Microcontrollers for Sensing Applications

Microcontrollers study, emphasizing on their applications in sensing systems. Topics include microcontroller architecture, instruction sets, sensor interfacing, and programming techniques-Python for embedded programming; brief introduction to assembly and machine language. Students gain practical experience for real-world applications in automation and embedded systems development.

Includes: Experiential Learning Activity

Precludes additional credit for NET 1004 (no longer offered), NET 2013, PLT 1007 (no longer offered), PLT

2009 (no longer offered). Prerequisite(s): BIT 2400.

Lectures two hours a week, tutorial/laboratory two hours a

week.

OSS 2010 [0.5 credit] Signals and Systems

This course provides a solid theoretical foundation for the analysis and processing of experimental data, and real-time experimental control methods. Topics include various properties of signals and systems, convolution, the Fourier transform, sampling theorem, z-transform, spectral analysis, filter design, and system identification. Includes: Experiential Learning Activity

Precludes additional credit for PLT 2010 (no longer offered).

Prerequisite(s): BIT 1200 and BIT 1201. Restricted to students in the B.I.T. degree program.

Lectures three hours a week, tutorial one hour a week.

OSS 3000 [0.5 credit]

Optical Communication Networks II

Operation, management and maintenance of metro/long-haul optical network elements and systems. Hands-on skills using GUI, Transaction Language One (TL1), optical network management to perform: alarm provisioning, line and path protection switching, security, data communications management, optical network backup and restore, load upgrade and installation management. Includes: Experiential Learning Activity

Precludes additional credit for PLT 3000 (no longer offered).

Prerequisite(s): OSS 2002.

Lectures two hours a week, tutorial/laboratory three hours a week.

OSS 3001 [0.5 credit] Real-time Systems

Principles of event-driven systems, review of computer organization; parallel and serial interfaces; programmable timer; I/O methods; polling and interrupts. Real-time kernels. Critical design consideration: concurrency, dead lock, synchronization. Maintaining and improving system performance. Programming exercises in low and high level languages.

Includes: Experiential Learning Activity

Also listed as NET 3001.

Precludes additional credit for PLT 3002 (no longer

offered).

Prerequisite(s): OSS 2009 or PLT 2009 (no longer

offered).

Lectures three hours a week, tutorial/laboratory two hours a week.

OSS 3002 [0.5 credit]

Design of Optical Components and Systems

Optical ray-tracing for analysing systems of sources, lenses, mirrors, prisms, fibers, diffractive elements, MEMS. Zemax® fundamentals, pupils, aspherics, non-sequential tracing, aberrations, image metrics, optimization/merit functions. Applications: imaging, illumination, lasers. Trade-offs, mechanical constraints, tolerances and cost. Physical optics modeling of bean propagation. Near-field diffraction and waveguides. Includes: Experiential Learning Activity

Precludes additional credit for PLT 3004 (no longer offered).

Prerequisite(s): OSS 1003 or PLT 1003 (no longer offered).

Lectures two hours a week, tutorial/laboratory three hours a week.

OSS 3003 [0.5 credit]

Fundamentals of Electromagnetics

Review of basic vector calculus followed by an introduction to electrostatics and magnetostatics. Maxwell's equations and EM wave solutions. EM waves in dielectrics media, reflection, refraction, Fresnel relations and Brewster angle. Introduction to guided waves emphasizing slab waveguides.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 3003 (no longer

offered).

Prerequisite(s): BIT 1204 and BIT 2010. Lecture and tutorial three hours a week.

OSS 3004 [0.5 credit]

Data Structures

Specification and design of abstract data types and their implementation as stacks, queues, trees, tables and graphs. Common and useful examples. Parsing and finite state machines. Analysis of algorithms, recursion, re-entrance. Special focus: abstraction, interface specification and hierarchical design using object-oriented programming.

Includes: Experiential Learning Activity

Also listed as NET 3004.

Precludes additional credit for PLT 3010 (no longer

offered).

Prerequisite(s): BIT 2400.

Lectures three hours a week, tutorial/laboratory two hours

a week.

OSS 3009 [0.5 credit] Project Management

Identification, selection, initiation, and organization of projects. Risk assessment, budget issues, communication, project scheduling, performance monitoring and control. Emphasis on practical techniques related to the field of photonics using case studies.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 3009 (no longer offered).

Prerequisite(s): third year standing in the Optical Systems and Sensors program.

Lectures two hours a week, tutorial/laboratory two hours a week.

OSS 3012 [0.5 credit] Digital Signal Processing

Operations-related topics including: sampling/ reconstruction of continuous time signals, Fourier and Z-transforms, Discrete Fourier Transform (DFT), Fast Fourier Transform (FFT). Examination of other time and frequency domain techniques for designing and applying infinite impulse response (IIR) and finite impulse response (FIR) digital filters.

Includes: Experiential Learning Activity
Precludes additional credit for PLT 3012 (no longer offered).

Prerequisite(s): OSS 2010 or PLT 2010 (no longer

offered).

Lectures three hours a week, tutorial one hour a week.

OSS 3013 [0.5 credit]

Software Design for Optical Systems and Sensors

Provides students with knowledge and expertise to design and develop complex software systems and programs for common optical systems and sensors using Python. Topics include: system and requirement analysis, algorithms, component identification, common design patterns, and working with reusable components. Includes: Experiential Learning Activity

Precludes additional credit for PLT 3013 (no longer

offered).

Prerequisite(s): BIT 2400.

Lectures three hours a week, tutorial two hours a week.

OSS 3014 [0.5 credit]

Optical Waves, Waveguides, and Sensors

Analysis of guided-wave propagation and sensors. Topics include Maxwell's time-dependent wave equations, dielectric waveguides (slab, planar, segmented, rib, strip), optical fibres (modes, dispersion relations, propagation in dispersive media, nonlinear fibres), beam propagation methods, free space beam propagation, waveguide devices, and study of sensors technology. Includes: Experiential Learning Activity

Precludes additional credit for PLT 3014 (no longer offered).

Prerequisite(s): OSS 3003 or PLT 3003 (no longer offered).

Lectures three hours a week, tutorial two hours a week.

OSS 4001 [0.5 credit]

Optoelectronic Devices and Smart Sensor Systems

This course delves deep into advanced opto-electronics devices, sensing systems, emphasizing emerging technologies. Topics: semiconductors, semiconductor lasers, detectors, photovoltaics, fiber sensors, amplifiers, and modulation. It integrates smart sensor systems and optical sensors with algorithms for analysis in various applications. Students participate in hands-on laboratory experiences.

Includes: Experiential Learning Activity
Precludes additional credit for PLT 4001 (no longer offered)

Prerequisite(s): OSS 2009 and OSS3013.

Lectures two hours a week, tutorial/laboratory two hours a week.

OSS 4004 [0.5 credit]

Medical Imaging and Biosensors

Biological and medical photonics. Effect of light on biological systems, medical imaging, medical treatments, biological research and bio/medical applications. Laser manipulation of cells, laser surgery, and photo-therapy. Biophotonic lab experiments with scanning confocal microscopes, endoscopes, DNA scanners.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 4004 (no longer offered).

Prerequisite(s): OSS 3003 or PLT 3003 (no longer offered).

Lectures two hours a week, tutorial/laboratory two hours a week

OSS 4005 [0.5 credit]

Introduction to Deep Learning

Introduction to classification and regression. Optimization, vectorization, gradient descent, cost, loss and activation functions. Introduction and basics to AI, Artificial Neural Networks, forward and backward propagation, Multi Layer Perceptron, and other types of Deep Neural Network models, their applications in multimedia, networks, finance, etc.

Includes: Experiential Learning Activity

Also listed as IRM 4005.

Prerequisite(s): BIT 2000 and BIT 2400.

Lectures three hours a week.

OSS 4006 [0.5 credit]

Image Processing

Developing and evaluating algorithms for extracting the necessary information signals. Topics include filter design, fast transforms, adaptive filters, spectrum estimation and modeling, sensor array processing, image processing, motion estimation from images, applications in biomed, computer-aided tomography, image restoration, robotic vision, and pattern recognition.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 4006 (no longer offered).

Prerequisite(s): BIT 2400 and OSS 3012.

Lectures three hours a week, tutorial/laboratory two hours a week.

OSS 4008 [0.5 credit] Remote Sensing

Introduction to the basics of remote sensing, characteristics of remote sensors, and applications. Topics include: image acquisition and data collection, LIDAR sensors and platforms and derived digital products, imagery analysis, topographic mapping, and 3D modeling of urban infrastructure for autonomous vehicles.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 4008 (no longer offered)

Prerequisite(s): OSS 3014 or PLT 3014 (no longer offered).

Lectures three hours a week, tutorial two hours a week.

OSS 4009 [0.5 credit] Computer Vision

Introduction to topics in computer vision, including: fundamentals of image formation, camera imaging geometry, f camera models, camera calibration, structure from motion, feature detection and matching, depth and stereo, image stabilization, image classification, automated alignment, scene understanding, recognition, and image searching.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 4009 (no longer offered).

Prerequisite(s): OSS 4006 or PLT 4006 (no longer offered).

Lectures three hours a week, tutorial two hours a week.

OSS 4900 [1.0 credit] OSS Capstone Project

Research project develops students' ability to direct own learning and pursue advanced study in variety of subjects. Select topic, perform literature search, theoretical background, preliminary measurements, calculations, and design. Present findings in a preliminary thesis. Encourage writing technical papers. Research opportunities with industry and academia.

Includes: Experiential Learning Activity

Precludes additional credit for PLT 4900 (no longer offered)

Prerequisite(s): fourth-year standing.

Tutorial hours arranged.

Italian (Minor)

This section presents the requirements for programs in:

Minor in Italian

Minor in Italian (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Italian.

Requirements:

1. 3.0 credits in ITAL

3.0

2. 1.0 credit in ITAL at the 3000-level or higher

- 3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language.
- 4. The remaining requirements of the major discipline(s) and degree must be satisfied.

Total Credits 4.0

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

Regulations

In addition to the requirements listed here, students must satisfy:

 the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Italian (ITAL) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

ITAL 1010 [0.5 credit] First-Year Italian I

For students with no knowledge of Italian. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for ITAL 1110. Four hours a week.

ITAL 1020 [0.5 credit]

First-Year Italian II

1 0

Continuation of first-year Italian. Oral skills, reading and writing. Compulsory attendance.

Precludes additional credit for ITAL 1110.

Prerequisite(s): grade of C or higher in ITAL 1010, or

permission of the School. Four hours a week.

ITAL 1110 [1.0 credit]

Intensive First-Year Italian

For students with no knowledge of Italian. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for ITAL 1010 and ITAL 1020. Eight hours a week (one term).

ITAL 2010 [0.5 credit] Second-Year Italian I

Further study of Italian to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for ITAL 2110.

Prerequisite(s): grade of C or higher in ITAL 1020 or ITAL 1110, or permission of the School.

Four hours a week.

ITAL 2020 [0.5 credit] Second-Year Italian II

Four hours a week.

Continuation of second-year Italian. Further study of Italian to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for ITAL 2110.

Prerequisite(s): grade of C or higher in ITAL 2010, or permission of the School.

ITAL 2110 [1.0 credit] Intensive Second-Year Italian

Further study of Italian to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for ITAL 2010 or ITAL 2020.

Prerequisite(s): grade of C or higher in ITAL 1020, ITAL 1110, or permission of the School.

Eight hours a week (one term).

ITAL 3010 [0.5 credit]

Third-Year Italian I

Further study of Italian to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for ITAL 3110.
Prerequisite(s): grade of C or higher in ITAL 2020,
ITAL 2110, or permission of the School.
Three hours a week

ITAL 3020 [0.5 credit] Third-Year Italian II

Continuation of third-year Italian. Further study of Italian to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Includes: Experiential Learning Activity
Precludes additional credit for ITAL 3110.

Prerequisite(s): grade of C or higher in ITAL 3010 or permission of the School.

Three hours a week

ITAL 3110 [1.0 credit] Intensive Third-Year Italian

Further study of Italian to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for ITAL 3010 and ITAL 3020. Prerequisite(s): grade of C or higher in ITAL 2020 or ITAL 2110, or permission of the School.

Six hours a week (one term).

ITAL 4010 [0.5 credit] Fourth-Year Italian I

Advanced spoken and written Italian with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Includes: Experiential Learning Activity Precludes additional credit for ITAL 4110.

Prerequisite(s): grade of C or higher in ITAL 3020,

ITAL 3110 or permission from the School.

Three hours a week

ITAL 4020 [0.5 credit] Fourth-Year Italian II

Continuation of fourth-year Italian. Advanced spoken and written Italian with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Includes: Experiential Learning Activity Precludes additional credit for ITAL 4110.

Prerequisite(s): grade of C or higher in ITAL 4010 or

permission from the School.

Three hours a week

ITAL 4110 [1.0 credit] Intensive Fourth-Year Italian

Advanced spoken and written Italian with intensive practice in aural comprehension and speaking in a range of situations and contexts, in reading and in composition in a range of modes and genres. Metalinguistic study. Compulsory attendance.

Precludes additional credit for ITAL 4010 and ITAL 4020. Prerequisite(s): grade of C or higher in ITAL 3110, or permission of the School.

Six hours a week (one term).

ITAL 4900 [1.0 credit] Independent Study

Research in a topic in Italian language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the Minor in Italian, grade of C or higher in ITAL 3110 or equivalent, or permission of the School.

ITAL 4901 [0.5 credit] Independent Study

Research in a topic in Italian language, literature or linguistics under the supervision of a member of the School

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in the Minor in Italian, grade of C or higher in ITAL 3110 or equivalent, or permission of the School.

Japanese Language (Minor)

This section presents the requirements for programs in:

· Minor in Japanese Language

Minor in Japanese Language (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Japanese Language.

Requirements:

1. 3.0 credits in JAPA

Total Credits	4.0
4. The remaining requirements of the major discipline(s) and degree must be satisfied.	
3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language	
2. 1.0 credit in JAPA at the 3000-level or higher	1.0

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

Regulations

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Japanese (JAPA) Courses

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

JAPA 1010 [0.5 credit]

First-Year Japanese I

For students with no knowledge of Japanese. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for JAPA 1110. Four hours a week.

JAPA 1020 [0.5 credit] First-Year Japanese II

3.0

Continuation of first-year Japanese. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for JAPA 1110. Prerequisite(s): grade of C or higher in JAPA 1010, or permission of the School.

Four hours a week.

JAPA 1110 [1.0 credit]

Intensive First-Year Japanese

For students with no knowledge of Japanese. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for JAPA 1010 and JAPA 1020.

Eight hours a week (one term).

JAPA 2010 [0.5 credit] Second-Year Japanese I

Further study of Japanese to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Includes: Experiential Learning Activity Precludes additional credit for JAPA 2110. Prerequisite(s): grade of C or higher in JAPA 1020, JAPA 1110, or permission of the School. Four hours a week

JAPA 2020 [0.5 credit] Second-Year Japanese II

Continuation of second-year Japanese. Further study of Japanese to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Includes: Experiential Learning Activity

Precludes additional credit for JAPA 2110. Prerequisite(s): grade of C or higher in JAPA 2010 or permission of the School. Four hours a week

JAPA 2110 [1.0 credit]

Intensive Second-Year Japanese

Further study of Japanese to reach a more advanced level of ability in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Precludes additional credit for JAPA 2010 and JAPA 2020.

Prerequisite(s): grade of C or higher in JAPA 1020 or JAPA 1110, or permission of the School. Eight hours a week (one term).

JAPA 3010 [0.5 credit] Third-Year Japanese I

Further study of Japanese to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Prerequisite(s): grade of C or higher in JAPA 2110, or permission of the School.

Three hours a week.

JAPA 3011 [0.5 credit]

Reading in Japanese - Kanji I

Intended for students taking JAPA 3010 and those who want to learn kanji in depth and become proficient in reading various Japanese texts. The course is intended primarily for students who do not use Chinese characters in their first language.

Prerequisite(s): grade of C or higher in JAPA 2110 or permission of the School.

Three hours a week.

JAPA 3020 [0.5 credit] Third-Year Japanese II

Continuation of third-year Japanese to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Prerequisite(s): grade of C or higher in JAPA 3010, or permission of the School.

Three hours a week.

JAPA 3021 [0.5 credit] Reading in Japanese – Kanji II

A continuation of Reading in Japanese – Kanji I. Further development of reading skills in Japanese. Intended primarily for students who do not use Chinese characters in their first language.

Prerequisite(s): grade of C or higher in JAPA 3011 or permission of the School.

Three hours a week.

JAPA 4010 [0.5 credit] Fourth-Year Japanese I

Development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance. Prerequisite(s): grade of C or higher in JAPA 3020, or permission of the School.

Three hours a week.

JAPA 4020 [0.5 credit] Fourth-Year Japanese II

Continuation of fourth-year Japanese. Further development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance. Prerequisite(s): grade of C or higher in JAPA 4010, or permission of the School.

Three hours a week.

JAPA 4210 [0.5 credit]

Functional Contemporary Japanese I

Further study of Japanese to reach a more advanced level, aimed at developing speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Prerequisite(s): grade of C or higher in JAPA 4020 or permission of the School.

Three hours a week.

JAPA 4220 [0.5 credit]

Functional Contemporary Japanese II

Continuation of JAPA 4210. Further development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes in contexts such as the academic, business and technical domains.

Prerequisite(s): grade of C or higher in JAPA 4210 or permission of the School.

Three hours a week.

JAPA 4900 [1.0 credit] Independent Study

Research in a topic in Japanese language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing and
enrolment in the Minor in Japanese, a grade of C or higher
in JAPA 4020 or equivalent, or permission of the School.

JAPA 4901 [0.5 credit] Independent Study

Research in a topic in Japanese language, literature or linguistics under the supervision of a member of the School.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing and
enrolment in the Minor in Japanese, a grade of C or higher
in JAPA 4020 or equivalent, or permission of the School.

Bachelor of Jour	nalism	
Combined Honor		

Bachelor of Journalism students may take Combined Honours programs in which Journalism is combined with another discipline. Students may choose a Combined Honours program in Journalism and Communication and Media Studies, or from Combined Honours programs offered within the B.A. The Journalism requirements for the Combined Honours program are normally the same as those for the Bachelor of Journalism with Honours listed above. The requirements of the other discipline are the same as those listed for the B.A. Combined Honours program in that discipline. Students are advised to consult the Combined Honours entry of their second discipline in this calendar for details. Combined Honours programs in Journalism and other disciplines are available only to students registered in Journalism.

Regulations

In addition to the program requirements described here, students must satisfy the University regulations (see the *Academic Regulations of the University* section of this calendar).

Students should consult with the School when planning their program and selecting courses.

Note: students who already hold an undergraduate degree in another field are not eligible to apply for the B.J. (Honours) program. These students should consult the information on the Master of Journalism or the Master of Arts in Communication in the Graduate Calendar.

Transfer into Second Year of B.J.

The School maintains a number of places in second year for students who wish to transfer from Carleton or elsewhere. Normally, offers are made to students with an Overall CGPA equivalent to 9.00 (B+) or better.

Transfer from B.J. to B.J.Hum.

A student who has completed the first year of the B.J. program may apply to transfer into the second year of the B.J.Hum. program, and will be accepted at the discretion of the School of Journalism and the College of Humanities. Students must normally have an Overall CGPA of 9.00 (B+) or higher. Transfer into higher years will not be considered.

Progression into 2000-Level Courses

Students may not continue into 2000-level JOUR courses unless the following minimum requirements are met:

- · Successful completion of JOUR 1001
- Successful completion of JOUR 1002

Progression into 3000-Level Courses

Students may only continue into the 3000-level Journalism courses JOUR 3207, JOUR 3208, JOUR 3235, JOUR 3300 if they attain a minimum grade of C in each of the following: JOUR 2201, JOUR 2202, and JOUR 2501.

Progression into 4000-Level Courses

Students may only continue into the 4000-level Journalism production courses JOUR 4003, JOUR 4004, JOUR 4005 if they attain a minimum grade of C in each of the following: JOUR 3207, JOUR 3208, JOUR 3235, and JOUR 3300.

Graduation Requirements

In addition to the graduation requirements of the Faculty, a candidate for the degree of Bachelor of Journalism (Honours) must have:

- 1. an Overall CGPA and Major CGPA of at least 6.50,
- 2. a minimum grade of C in each of the 2000-level and above JOUR courses required in the Major;
- 3. the recommendation of the School of Journalism and Communication for graduation.

Prohibited Courses

Courses below the 1000-level may not be used for credit in Journalism programs.

Academic Continuation Evaluation for Bachelor of Journalism

Students in B.J. are Honours students.

Students in the Bachelor of Journalism follow the Academic Continuation Evaluation (ACE) regulations governing Honours programs as described in Section 3.2 of the *Academic Regulations of the University*, with the following addition:

 Students who have completed at least 15.5 credits and who do not meet the graduation requirements of an Overall CGPA of 6.50 and a Major CGPA of 6.50 will be required to leave the program with the decision *Continue in Alternate* (CA).

Academic Continuation Evaluation for Bachelor of Journalism and Humanities

Students in the Bachelor of Journalism and Humanities degree follow the Academic Continuation Evaluation (ACE) regulations described in Section 3.2 of the *Academic Regulations of the University* with the following additions and amendments.

The Bachelor of Journalism and Humanities degree defines an Overall CGPA, a Journalism Major CGPA, and a Humanities Core CGPA.

HUMANITIES CORE COURSES

HUMS 1000 [1.0]	Foundational Myths and Histories
HUMS 2000 [1.0]	Reason and Revelation
HUMS 3000 [1.0]	Culture and Imagination
HUMS 4000 [1.0]	Politics, Modernity and the
	Common Good

Whenever a student is assessed in ACE, Bachelor of Journalism and Humanities students are evaluated on the basis of their Overall CGPA. The Humanities Core CGPA is assessed only at the end of each winter term.

- 1. A student is required to leave the program if:
 - a. the student was on Academic Warning (AW) and does not achieve a decision of Eligible to Continue (EC) at the next Academic Continuation Evaluation;
 - b. the student's Overall CGPA is less than 1.00;
 - c. the student's Humanities Core CGPA is less than 6.00 when assessed.
- 2. Students who have completed between 5.5 and 15 credits who do not maintain an Overall CGPA of 4.00 and a Humanities Core CGPA of 6.5, but who have an Overall CGPA of at least 1.00 and a Humanities Core of at least 6.00, will be placed on Academic Warning (AW). Students who have completed at least 15.5 credits and who do not meet the graduation requirements of an Overall CGPA of 6.50, a Journalism Major CGPA of 6.50, and a Humanities Core CGPA of 6.50 will be required to leave the program.

See the Academic Regulations of the University section of the Calendar for additional information.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the **General Admission and Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by

program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as *recommended* are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as *recommended*, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

· B.J. (Honours)

Admission Requirements

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include 4U English. The Bachelor of Journalism with a Concentration in Health Sciences must also include one 4U Math, and either 4U Chemistry or 4U Biology.

Note: Students who already hold an undergraduate degree in another field are not eligible to apply for the B.J. (Honours) program. These students should consult the information on the Master of Journalism or the Master of Arts in Communication in the Faculty of Graduate Studies and Research Calendar.

Advanced Standing

The School also maintains a number of places in second year for students who wish to transfer from Carleton or elsewhere. Normally, offers are made to students with an overall CGPA of 9.00 (B+) or higher.

Transferring from the CJIIC

Graduates from the Certificate in Journalism in Indigenous Communities (CJIIC) are eligible for admission to the B.J. program with Advanced Standing. Normally, offers are made to students with an overall CGPA of 8.00 (B) or higher.

Transferring from the B.J.Hum. to the B.J. or B.Hum. Degree

A student who wishes to transfer from the B.J.Hum. to the B.J. or the B.Hum. may apply through Admissions, and will be accepted if, upon entry to the new program, they would be *Eligible to Continue* (EC) in the new degree program.

Admission Requirements

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include a 4U course in English (or *anglais*) with a grade of 60 percent or higher.

Students with previous post-secondary studies will be assessed on their merits. Applicants must normally meet the CGPA thresholds described in Section 3.1.9 of the Academic Regulations of the University.

Consideration will be extended to other applicants under Mature Applicant regulations (see the Mature Applicants section of this Calendar).

Note: Admission to this program is restricted to Indigenous applicants. During the application process students will be required to verify their Indigenous Identity through the policy described here: https://admissions.carleton.ca/indigenousdocuments/.

Journalism (JOUR) Courses

JOUR 1001 [0.5 credit]

Foundations: Journalism in Context

Charting evolution of journalism in the West from roots as community creator to guardian of democracy, including greatest scoops and worst misdeeds. From ancient newssharing to 21st Century digital journalism, surveying ethical, political, economic and technological contexts that shaped news media as institutions/industries.

Includes: Experiential Learning Activity
Precludes additional credit for JOUR 1102.

Prerequisite(s): Open to all programs, with priority to BJ students

Lectures and discussion three hours a week.

JOUR 1002 [0.5 credit]

Foundations: Practicing Journalism in a Diverse Society

Introduces students to concepts, issues and challenges in the contemporary Canadian media environment that shapes their professional role as practicing journalists. Also provides students with initial opportunity to practice basic writing, editing and reporting skills in preparation for professional online journalism, media or fact-driven fields. Includes: Experiential Learning Activity

Precludes additional credit for JOUR 1103.

Prerequisite(s): Registration in the BJ or BJHUM program or the minor in News Media and Information.

Lectures and discussion three hours a week.

JOUR 1004 [0.5 credit]

Special Topic

Examination of a topic in journalism not covered in depth in other courses.

Lecture two hours a week, discussion one hour a week.

JOUR 1101 [0.5 credit] Indigenous Storytelling

Storytelling is a traditional method used in Indigenous cultures that teaches cultural beliefs, values, customs, history, and ways of life. In this course, storytelling will be the foundation for experiential/holistic learning and relationship-building. You'll examine how Indigenous storytelling traditions intersect and contrast with Western iournalism.

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program.

Combination of in-person intensives and online classes.

JOUR 1102 [0.5 credit] Foundations of Journalism

This course introduces you to the context, concepts, issues and challenges in contemporary Canadian media that will shape your professional role as practicing journalist. You'll examine the state of the media, advocacy, social media and ethics, plus discuss Indigenous representation in the mainstream media.

Precludes additional credit for JOUR 1001.

Prerequisite(s): Enrolment in Certificate in Journalism in Indigenous Communities program.

Online, biweekly classes, 6 hours per week.

JOUR 1103 [0.5 credit]

Fundamentals of Journalism

Learn how to think and work like a journalist in this course. You'll receive detailed feedback, mentoring from experienced journalist-instructors and teaching assistants. You'll build skills in interviewing, writing, storytelling, editing and ethics while covering wide scope of topics in your Indigenous community.

Precludes additional credit for JOUR 1002.

Prerequisite(s): Enrolment in Certificate in Journalism in Indigenous Communities program.

Online, biweekly classes, 6 hours per week.

JOUR 1104 [0.5 credit]

Introduction to Audio Journalism

Radio is a popular media format in Indigenous communities. In this intensive workshop course, you will learn to pitch stories, report from the field, write conversationally, record voice and natural sound, edit audio files and produce compelling audio reports, radio newscasts and podcasts.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and

JOUR 1103.

In-person intensive, 3 hours per week.

JOUR 1105 [0.5 credit] Digital and Photojournalism

Further development of your digital journalism skills. Students will receive instruction in online reporting and publishing, as well as learn the fundamentals of news storytelling through smartphone photography, including how to find visually newsworthy stories, and the ethics of photojournalism in Indigenous settings.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and JOUR 1103.

Online, biweekly classes, 6 hours per week.

JOUR 1106 [0.5 credit]

Entrepreneurial Journalism

Beginning with freelancer's toolkit, you'll learn to compete in a workforce that increasingly values an entrepreneurial mindset. You'll be trained to find and sell real stories and grow your brand. You'll explore innovative ways to reach audiences, fund your career as media professional. Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and JOUR 1103.

Online, biweekly classes, 6 hours per week.

JOUR 1107 [1.0 credit]

Internships

During a two-week internship in a news or media organization, you'll have an opportunity to apply what you learned in the classroom to actual day-to-day work of reporting, writing, and producing news for an audience. Evaluations and student reflections round out the internship experience.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and JOUR 1103.

In-person intensive

JOUR 1108 [0.5 credit]

Introduction to Video Journalism

Pictures are powerful, and this is where you'll learn how to handle them. As you master visual literacy skills, you'll report, shoot and edit video stories. You'll work "live" in studio and from field, producing range of material using smartphones and DSLR cameras.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and JOUR 1103.

In-person intensive.

JOUR 2003 [0.5 credit]

Delivering Journalism: Innovators v. Imposters

Activists, imposters and innovators increasingly crowd in on traditional journalism's role of presenting reliable news and fair discussion. How is public awareness now shaped – and misshaped – and how must journalism reshape, update and defend its borders to serve communities better?.

 $\label{eq:precedent} Prerequisite(s): JOUR~1001, JOUR~1002, or permission~of~the~School~of~Journalism~and~Communication.$

Lecture and discussion three hours a week.

JOUR 2106 [0.5 credit]

The Documentary

Examination of the work of individual film makers, of documentary styles and of organizations and institutions in the context of the history of documentary film making, including documentaries made for television. Non-fiction films other than documentaries may be considered. Also listed as FILM 2106.

Precludes additional credit for JOUR 2105, FILM 2105. Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

JOUR 2201 [1.0 credit] Fundamentals of Reporting

Intro to techniques journalists use gathering information quickly, accurately and ethically, to present reports and features in clear, engaging ways. Newsroom exercises provide experience in reporting, writing, editing, using digital tools, including audio editing software, spreadsheets, digital cameras, social media and emerging web-based digital tools.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 1001 and JOUR 1002 and second year standing in the Bachelor of Journalism program. Lectures, discussion and practicum six hours a week.

JOUR 2203 [0.5 credit]

Civics for Journalists

This course offers an overview of key public institutions and civil society organizations in Canada to prepare aspiring journalists to effectively and critically engage with these actors in generating important and illuminating coverage of public affairs.

Also listed as MPAD 3002.

Prerequisite(s): JOUR 1001 and JOUR 1002 and second year standing in the BJ program or BJHUM program or the minor in News Media and Information.

Lectures and discussion three hours a week.

JOUR 2501 [0.5 credit] Media Law

A survey of laws that affect the Canadian media. Specific areas include the development of freedom of expression, the Charter of Rights and Freedoms, and statutory and common law limitations on freedoms of the press, including publication bans, libel and contempt of court. Also listed as COMS 2501, MPAD 2501.

Precludes additional credit for COMM 2501 (no longer offered).

Prerequisite(s): JOUR 1001, JOUR 1002, COMS 1001, COMS 1002, or enrollment in the Minor in News Media and Information, or enrollment in the Communication and Policy Studies specialization of the Bachelor of Public Affairs and Policy Management, or permission of the School of Journalism and Communication.

Lectures and discussion three hours a week.

JOUR 3105 [0.5 credit]

Questions of Documentary Practice

Theoretical implications of documentary film and documentary television practice.

Also listed as FILM 3105.

Prerequisite(s): 1.0 credit in Film Studies at the 2000-level, or permission of the School.

JOUR 3207 [0.5 credit] Audio Journalism

In this workshop students will build on the principles and practices of audio journalism to produce stories and audio in various formats suitable for radio and digital publication. Note: JOUR 3207 and JOUR 3208 may not be taken in the same term.

Includes: Experiential Learning Activity
Prerequisite(s): JOUR 2201, JOUR 2202, and
JOUR 2501 with a grade of C or higher in each.
Lectures and labs six hours a week.

JOUR 3208 [0.5 credit]

Video Journalism

In this workshop students will build on the principles and practices of video journalism to produce stories and video in various formats suitable for television and digital publication. Note: JOUR 3207 and JOUR 3208 may not be taken in the same term.

Includes: Experiential Learning Activity Prerequisite(s): JOUR 2201, JOUR 2202, and JOUR 2501 with a grade of C or higher in each. Lectures and labs six hours a week.

JOUR 3225 [0.5 credit] Reporting in Depth

Long-form journalistic writing skills development: techniques for thorough investigation of timely public issues. Study of outstanding feature and investigative writing examples. Students will pursue their own reporting projects.

Includes: Experiential Learning Activity Precludes additional credit for JOUR 3205 (no longer offered).

Prerequisite(s): JOUR 2201, JOUR 2202, and JOUR 2501 with a grade of C or higher in each. Lectures and practicum three hours a week.

JOUR 3235 [0.5 credit] **Digital Journalism**

Further development of digital journalism skills. Students will produce journalism for online audiences using formats including written and spoken language, still and moving images.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 3205 (no longer offered).

Prerequisite(s): JOUR 2201, JOUR 2202, and JOUR 2501 with a grade of C or higher in each.

Lectures and labs three hours a week.

JOUR 3300 [0.5 credit] Media Ethics in a Digital World

Ethical issues related to production and dissemination of news and other forms of content as they relate to digital environments. Different approaches to ethical decisionmaking and their application in contemporary settings. Also listed as MPAD 3300.

Precludes additional credit for JOUR 3215 (no longer offered).

Prerequisite(s): JOUR 2201, JOUR 2202 and JOUR 2501 with a grade of C or higher in each, or JOUR 2003 and JOUR 2501 with a grade of C or higher in each and enrollment in the Minor in News Media and Information. Lectures three hours a week.

JOUR 3400 [0.5 credit]

Selected Topic in Journalism

Examination of a topic in journalism not covered in depth in other courses.

Prerequisite(s): third-year standing in the Bachelor of Journalism or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 3401 [0.5 credit]

Selected Topic in Journalism

Examination of a topic in journalism not covered in depth in other courses.

Prerequisite(s): third-year standing in the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information, or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 3402 [0.5 credit]

Selected Topic in Journalism

Examination of a topic in journalism not covered in depth in other courses.

Prerequisite(s): third-year standing in the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information, or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 3407 [0.5 credit]

Comparative Media Studies

The comparative study of one or more media organizations and/or types of media content with reference to their operation, audiences, and impacts.

Also listed as COMS 3407.

Precludes additional credit for COMM 3407 (no longer offered).

Prerequisite(s): third-year standing in B.J. Hons. or permission of the School of Journalism and Communication.

Lectures three hours a week.

JOUR 4001 [0.5 credit]

Journalism Now - and Next

Changes occurring in the media, in the public's relationship with the media and how journalists and news organizations respond. Practical issues and challenges in the professional life of a journalist.

Also listed as MPAD 4001.

Precludes additional credit for JOUR 4000 (no longer offered).

Prerequisite(s): fourth-year standing in the Bachelor of Journalism or in the Bachelor of Media Production and Design, or fourth-year standing and enrollment in the Minor in News Media and Information, or fourth-year standing in the Strategic Public Opinion stream of the Communication and Policy Studies specialization of the Bachelor of Public Affairs and Policy Management. Lectures and discussion three hours a week.

JOUR 4003 [0.5 credit]

The Digital Hub: Advanced Multimedia

A workshop designed to give students instruction in digital reporting and publishing as they produce stories from across the city and beyond.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3235 with a grade of C or higher

and fourth-year standing in B.J. Hons.

Also offered at the graduate level, with different requirements, as JOUR 5003, for which additional credit is precluded.

Workshops averaging eight hours a week.

JOUR 4004 [0.5 credit]

The Digital Hub: Advanced Audio

A workshop designed to give students instruction in audio journalism as they produce stories from across the city and beyond.

Includes: Experiential Learning Activity
Precludes additional credit for JOUR 4206 (no longer offered)

Prerequisite(s): JOUR 3207 with a grade of C or higher and fourth-year standing in B.J. Hons.

Also offered at the graduate level, with different requirements, as JOUR 5004, for which additional credit is precluded.

Workshops averaging eight hours per week.

JOUR 4005 [0.5 credit]

The Digital Hub: Advanced Video

A workshop designed to give students instruction in video journalism as they produce stories from across the city and beyond.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4207 (no longer offered).

Prerequisite(s): JOUR 3208 with a grade of C or higher and fourth-year standing in B.J. Hons.

Also offered at the graduate level, with different requirements, as JOUR 5005, for which additional credit is precluded.

Workshops averaging eight hours a week.

JOUR 4100 [0.5 credit]

Special Topic

Examination of a topic in journalism not covered in depth in other courses. Seminar three hours a week. Seminar three hours a week.

JOUR 4101 [0.5 credit] Special Topic

An examination of a topic in journalism not covered in depth in other courses. Topics may vary from year to year. Seminar three hours a week.

JOUR 4300 [0.5 credit]

Specialized Journalism: Special Topic

Examination of a topic not covered in depth in other specialized journalism courses. Topics may vary from year to year. Emphasis on explanatory/analytical reporting, culminating in an extended work of journalism.

Also listed as MPAD 4300.

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5300, for which additional credit is precluded

Lectures, discussion and seminars three hours a week.

JOUR 4301 [0.5 credit]

Specialized Journalism: Business and the Markets

Core skills development for business journalism: reading financial documents, covering activities of corporations, functioning of stock and other markets, trade policy and the broader economy, focus on contemporary business news and local publicly-traded companies. Emphasis on explanatory/analytical reporting, production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5301, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4302 [0.5 credit]

Specialized Journalism: Business and Canadian Society

The intersection between business and public policy, from climate change to taxation, pensions, labour and corporate social responsibility. What business does and how the media covers it. Emphasis on explanatory/ analytical reporting, production of a related data project as an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5302, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4303 [0.5 credit]

Specialized Journalism: Health and Science

The culture of health science research and major trends; key challenges confronting researchers and health science journalists around the world. Emphasis on explanatory/analytical reporting, production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5303, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4304 [0.5 credit]

Specialized Journalism: Environment and Science

Major trends and research culture in climate and environmental sciences, focusing on key global concerns. Issues facing researchers and journalists. Focus on explanatory/analytical reporting; production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School

Also offered at the graduate level, with different requirements, as JOUR 5304, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4305 [0.5 credit]

Specialized Journalism: Canada and the U.S.

Exploration of the unique issues in Canada-U.S. relations, from diplomacy to trade. Emphasis on explanatory/ analytical reporting; production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5315, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4306 [0.5 credit]

Specialized Journalism: Canada and the World

Diplomacy, war, terrorism, migration, the international economy, development and other issues of interest to journalists who want to write about Canada and international affairs. Emphasis on explanatory/analytical reporting; production of an extended work of journalism. Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5306, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4308 [0.5 credit]

Specialized Journalism: Sports and Sport Culture

Workshop equipping students with the skills to move beyond the clichés of sports writing and live event coverage. Emphasis on explanatory/analytical reporting; production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Honours or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5308, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4309 [0.5 credit]

Specialized Journalism: Arts and Culture

Students are introduced to arts and culture journalism, exploring issues and trends that are key to understanding and covering the arts and related cultural policy in Canada. Emphasis on explanatory/analytical reporting, culminating in an extended work of journalism. Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Honours or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5309, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4311 [0.5 credit]

Specialized Journalism: Justice and The Supreme Court

Examination of the Supreme Court of Canada, and the role of journalists in covering it. Students attend hearings and gain insight into the court's role in the making and shaping of Canada. Emphasis on explanatory/analytical reporting; production of an extended work of journalism. Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Honours or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5311, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4313 [0.5 credit]

Specialized Journalism: Reporting in Indigenous Communities

Working in teams to produce multimedia news stories from Indigenous communities in the city of Ottawa and Ottawa Valley region, students will be challenged to confront misrepresentation in the news media and learn to consider new strategies and ethical frameworks for covering Indigenous Peoples.

Includes: Experiential Learning Activity
Also offered at the graduate level, with different
requirements, as JOUR 5313, for which additional credit is
precluded.

3 hours per week

JOUR 4314 [0.5 credit]

Specialized Journalism: Parliament, Policy and the Press

This seminar course is designed to make students familiar with the way government works; how political parties function within the overall political system; how policies are formulated and implemented; and most importantly, how to report on all of these processes, institutions and events. Prerequisite(s): Third or Fourth year B.J. Honours standing, or permission of the School. Also offered at the graduate level, with different requirements, as JOUR 5314., for which additional credit is precluded.

3 hours per week.

JOUR 4400 [0.5 credit]

Professional Skills: Special Topic

Examination of a topic in journalism not covered in depth in other courses.

Includes: Experiential Learning Activity
Prerequisite(s): third- or fourth-year standing in B.J.
Honours or permission of the School.
Seminar three hours a week.

JOUR 4401 [0.5 credit]

Professional Skills: Data Storytelling

Instruction in telling stories from data. Focus on searching for, analyzing and mapping data, turning numbers into powerful narratives.

Includes: Experiential Learning Activity
Precludes additional credit for JOUR 4208 (no longer offered).

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing.

Lecture and practicum three hours a week.

JOUR 4402 [0.5 credit]

Professional Skills: Longform Writing

Instruction in longform story production. Focus on researching and writing, including the art and craft of writing for magazines.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4208 (no longer offered).

onereu).

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing.

Lecture and practicum three hours a week.

JOUR 4403 [0.5 credit]

Professional Skills: Strategic Communication

Workshop pairing student teams with non-profit groups that are in need of strategic communication advice. Instruction in planning and implementation.

Includes: Experiential Learning Activity

Also listed as MPAD 4403.

Precludes additional credit for JOUR 4208 (no longer

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing.

Also offered at the graduate level, with different requirements, as JOUR 5508, for which additional credit is precluded.

Lecture and practicum three hours a week.

JOUR 4404 [0.5 credit]

Professional Skills: Freelancing for Media Professionals

Workshop preparing students to compete in a market that values the skills and mindset of entrepreneurial media workers.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher

and fourth-year standing.

Lecture and practicum three hours a week.

JOUR 4500 [0.5 credit]

Investigating Journalism: Special Topic

Examination of a topic in journalism not covered in depth in other courses.

Also listed as MPAD 4500.

Honours or permission of the School.

Seminar three hours a week.

JOUR 4501 [0.5 credit]

Investigating Journalism: Gender, Identity and Inequality

How social concepts of gender, identity and inequality influence journalism. Theoretical and textual analysis. Historical and contemporary case studies from mainstream and alternative media exploring journalistic expression, professional practices, status and expectations, and cultural representations. Includes: Experiential Learning Activity

includes: Experiential Learning Activ

Also listed as MPAD 4501.

Precludes additional credit for JOUR 4307 (no longer offered).

Prerequisite(s): third- or fourth-year standing in B.J. Hons. or permission of the School.
Seminar three hours a week.

JOUR 4502 [0.5 credit]

Investigating Journalism: Journalism and Conflict

For as long as there has been conflict between peoples, there have been those who bear witness and recount their observations. This course examines journalism and conflict with an emphasis on journalistic perspectives but also through discussion of interdisciplinary literature and academic research.

Includes: Experiential Learning Activity

Also listed as MPAD 4502.

Prerequisite(s): fourth-year B.J. Honours standing, or

permission of the School. Seminar three hours a week.

JOUR 4504 [0.5 credit]

Investigating Journalism: The Media and International Development

A critical examination of the use of journalism as an instrument of international development, historically and currently. To what extent have these efforts been successful? On what grounds are they justified? In what regard have they been instruments of propaganda?. Includes: Experiential Learning Activity

includes. Experiential Learning Activi

Also listed as MPAD 4504.

Prerequisite(s): third-year standing in the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information, or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 4505 [1.0 credit]

Investigating Journalism: The Power and Politics of Government

In-depth exploration of Canada's government, public policy and politics; parliamentary debate and committee hearings. Explanatory/analytical reporting; production of an extended work of journalism.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4201 (no longer

offered).

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year B.J. Honours standing, or permission of the School.

Seminar three hours a week.

JOUR 4506 [0.5 credit]

Investigating Journalism: Trauma-Informed Journalism

Journalists often swoop in at the most difficult moments of a person's life- aftermath of violent incident/catastrophe, tragic death of loved one, or culmination of painful criminal trial. Students will be prepared for ethical, practical and emotional challenges of reporting accurately, sensitively to traumatic events.

Includes: Experiential Learning Activity

3 hours per week

JOUR 4507 [0.5 credit]

Investigating Journalism: History of Black Journalism

Charts the development of Canada's Black press from its beginnings in the 1850s to present day. The course explores the role Canada's Black press has played in Black communities and considers how Black media outlets have covered the most significant stories of the day. Prerequisite(s): Third or Fourth-year B.J. Honours standing, or permission of the school. 3 hours per week.

JOUR 4508 [0.5 credit]

Investigating Journalism: Inclusive Reporting in Practice

Students will learn strategies for inclusive journalism through practical application, focusing on diversity, inclusion, and belonging in Canadian media. Learn to identify biases, self-reflection, and apply inclusive reporting techniques. Write stories that foster belonging, reflect diverse voices, and report with respect, care and cultural awareness.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year B.J. Honours standing, or permission of the School.

Seminar three hours a week.

JOUR 4900 [1.0 credit] Honours Tutorial

Students analyze some major achievements in contemporary journalism, through individual or group research. Students also have the opportunity to acquire background and experience in the managerial aspects and production of print and broadcast journalism.

Prerequisite(s): fourth-year B.J. (Honours) standing.

JOUR 4999 [0.0 credit]

Science Communication Certificate Professional Development Workshop

A one-day workshop providing practical skills development for becoming an effective science communicator. Topics for discussion will include defining the audience and framing of information, reviews of effective science communication, career opportunities for science communicators, and one-to-one analysis of participants writing skills. Graded SAT/UNS.

Includes: Experiential Learning Activity

Also listed as ISAP 4999.

Prerequisite(s): This course is restricted to students enrolled in the Certificate of Science Communication, and who have completed at least 2.0 credits towards the certificate, including one of COMS 2500 or ISAP 3003. A one-day workshop

Total Credits

Notes

- For Item 9 above, students who transfer into the B.J. Hum. may use up to 1.0 credit of any previously completed art and/or music courses (with the exception of advanced placement courses). Students normally take HUMS 2101 and HUMS 2102, or HUMS 3102 and HUMS 3103. Other combinations of these requirements may be allowed at the discretion of the College of the Humanities.
- 2. For Items 13 and 14 above, students who must take a beginner's level Modern language prerequisite to their intermediate level Modern language requirement should do so in place of RELI 1731 and 0.5 credits in electives. Students who are already able to demonstrate a proficiency in an Intermediate level Modern language or a Beginner's level Ancient language may have the requirement waived, and in that case may be required to take an additional 1.0 elective credit at the 2000-level or above in order to bring their total number of credits up to the required 20.0.
- Students fulfilling the language requirement are not permitted to register in HIST 2304 to fulfill the requirement for Item 6a.

Regulations

In addition to the requirements described here, students must satisfy the University regulations (see the *Academic Regulations of the University* section of this calendar).

Students should consult with the School of Journalism and the College of Humanities when planning their program and selecting courses.

Progression into Second Year

Students may not continue into 2000-level or higher JOUR courses unless the following minimum requirements are met:

- Successful completion of JOUR 1001
- Successful completion of JOUR 1002

General Prerequisites

- Students may only continue into the 3000-level Journalism courses JOUR 3207, JOUR 3208, JOUR 3235, JOUR 3300 if they attain a minimum grade of C in each of the following: JOUR 2201, JOUR 2202, and JOUR 2501.
- Students may only continue into the 4000-level Journalism production courses JOUR 4003, JOUR 4004, JOUR 4005 if they attain a minimum grade of C in each of the following: JOUR 3207, JOUR 3208, JOUR 3235, and JOUR 3300.

Graduation Requirements

In addition to the graduation requirements of the University, a graduation candidate for the degree of Bachelor of Journalism and Humanities (Honours) must present:

- 1. a Core Humanities CGPA of at least 6.50, and
- a minimum grade of C in each of the 2000-level and above JOUR courses presented for the degree, and
- 3. an overall CGPA of 6.50 or higher.

Requirement for Full Time Study

20.0

Students in second and higher years in the Bachelor of Journalism and Humanities program must complete a minimum of 4.0 credits by the end of the summer session. The School of Journalism and the College of the Humanities may permit students to study abroad for a year while remaining registered in the program. For those students permitted to study abroad, Carleton credits commensurate to studies taken abroad will be determined by the School of Journalism and the College of the Humanities and awarded towards the student's degree. In exceptional circumstances (usually financial need or sickness), the School of Journalism and the College of the Humanities may also permit students to take a leave of absence for one year while remaining registered in the program.

Prohibited Courses

Courses below the 1000 level may not be used for credit in the Bachelor of Journalism and Humanities program.

Academic Continuation Evaluation for Bachelor of Journalism and Humanities

Students in the Bachelor of Journalism and Humanities degree follow the Academic Continuation Evaluation (ACE) regulations described in Section 3.2 of the *Academic Regulations of the University* with the following additions and amendments.

The Bachelor of Journalism and Humanities degree defines an Overall CGPA, a Journalism Major CGPA, and a Humanities Core CGPA.

HUMANITIES CORE COURSES

HUMS 1000 [1.0]	Foundational Myths and Histories
HUMS 2000 [1.0]	Reason and Revelation
HUMS 3000 [1.0]	Culture and Imagination
HUMS 4000 [1.0]	Politics, Modernity and the Common Good

Whenever a student is assessed in ACE, Bachelor of Journalism and Humanities students are evaluated on the basis of their Overall CGPA. The Humanities Core CGPA is assessed only at the end of each winter term.

- 1. A student is required to leave the program if:
 - a. the student was on Academic Warning (AW) and does not achieve a decision of Eligible to Continue (EC) at the next Academic Continuation Evaluation;
 - b. the student's Overall CGPA is less than 1.00;
 - c. the student's Humanities Core CGPA is less than 6.00 when assessed.
- Students who have completed between 5.5 and 15 credits who do not maintain an Overall CGPA of 4.00 and a Humanities Core CGPA of 6.5, but who have an Overall CGPA of at least 1.00 and a Humanities Core of at least 6.00, will be placed on *Academic Warning* (AW). Students who have completed at least

15.5 credits and who do not meet the graduation requirements of an Overall CGPA of 6.50, a Journalism Major CGPA of 6.50, and a Humanities Core CGPA of 6.50 will be required to leave the program.

See the Academic Regulations of the University section of the Calendar for additional information.

Admissions Information

Admission Requirements are for the 2025-26 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. The cut-off averages for admission may be considerably higher than the minimum. See also the General Admission and **Procedures** section of this Calendar. An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca for further details.

Note: Courses listed as recommended are not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Admissions Information

Admission requirements are based on the Ontario High School System. Prospective students can view the admission requirements through the Admissions website at admissions.carleton.ca. The overall average required for admission is determined each year on a program-by-program basis. Holding the minimum admission requirements only establishes eligibility for consideration; higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. All programs have limited enrolment and admission is not guaranteed. Some programs may also require specific course prerequisites and prerequisite averages and/or supplementary admission portfolios. Consult admissions.carleton.ca for further details.

Note: If a course is listed as recommended, it is not mandatory for admission. Students who do not follow the recommendations will not be disadvantaged in the admission process.

Degree

• Bachelor of Journalism and Humanities (B.J.Hum.) (Honours)

First Year

The Ontario Secondary School Diploma (OSSD) or equivalent including a minimum of six 4U or M courses. The six 4U or M courses must include 4U English.

Note: students who already hold an undergraduate degree are not eligible to apply for the B.J.Hum. (Honours).

Advanced Standing/Transfer into the Second Year of the B.J.Hum.

The school maintains a number of places in second year for students who wish to transfer from Carleton or elsewhere. Normally, offers are made to students with an Overall CGPA equivalent to 9.00 (B+) or higher. Transfer also requires a Core Humanities CGPA of at least 6.00. An additional year may be necessary for transfer students to complete their degree requirements. Transfers into higher years will not be considered.

Humanities (HUMS) Courses

HUMS 1000 [1.0 credit]

Foundational Myths and Histories

Recurring symbols in myth, epic and ritual representing the relation between the sacred and the profane, the origin of the cosmos, the basis of community, and formative human experiences. Primary sources drawn from ancient India and China, Mesopotamia, the Hebrew Bible, and Indigenous cultures.

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lectures three hours a week and tutorials one and a half hours a week.

HUMS 1200 [0.5 credit]

Humanities and Classical Civilization

The ideas which animated ancient Greek and Roman civilization and which influenced later western cultural movements through a reading of literary, historical, and philosophical works. Authors include Homer, Herodotus, Thucydides, the Greek Tragedians, Plato, Vergil, and Cicero.

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lecture three hours a week.

HUMS 1300 [0.5 credit]

Classical Literature and Its Reception

The study of different types of ancient literature and the reception of Classical works in later periods. A focus on writing a research essay.

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lectures three hours a week.

HUMS 1500 [0.5 credit]

Introduction to the Humanities: Five Books that Changed the World

A reading-intensive course on five influential books from Antiquity to the present day. Works may include the Bible, the Bhagavad Gita, Homer's Odyssey, Plato's Republic, Dante's Inferno, Machiavelli's The Prince, Shakespeare's Hamlet, Mary Shelley's Frankenstein, Nietzsche's Beyond Good and Evil, Marx's Communist Manifesto. Prerequisite(s): enrolment in a degree program in the Faculty of Arts and Social Sciences, or the Faculty of Public Affairs. Students enrolled in the BHum. program are not eligible to register in this course. Lecture three hours per week.

HUMS 2000 [1.0 credit] Reason and Revelation

The origins of philosophy in ancient Greece and its pursuit in the medieval West, with special attention to knowledge, happiness, and love. Readings include works by Plato, Aristotle, Plotinus, Augustine, Boethius, Aquinas, and Dante.

Prerequisite(s): HUMS 1000 and enrolment in the Bachelor of Humanities program.

Lectures three hours a week and tutorials one and a half hours a week

HUMS 2101 [0.5 credit] Art from Antiquity to the Medieval World

A chronological and thematic survey of the Arts from the earliest times to ca. 1400.

Precludes additional credit for HUMS 4101 (no longer offered).

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lecture three hours a week.

HUMS 2102 [0.5 credit] Modern European Art 1527-2000

A chronological and thematic survey of the Arts from the sixteenth to the twenty-first century.

Precludes additional credit for HUMS 4101 (no longer offered) and HUMS 3101 (no longer offered).

Prerequisite(s): HUMS 2101 and restricted to students in the Bachelor of Humanities program.

Lectures three hours a week.

HUMS 3000 [1.0 credit] Culture and Imagination

Major forms of literary, artistic, and philosophical expression from 1500-1800. Sources drawn from renaissance humanism, reformation theology, enlightenment and romantic philosophy.

Prerequisite(s): HUMS 2000 and enrolment in the Bachelor of Humanities program.

Lectures three hours a week and tutorials one and a half hours a week.

HUMS 3102 [0.5 credit] Western Music 1000-1850

Introduction to basic theory, harmony, history and interpretation of Western music including the Medieval, Renaissance, Baroque, Classical and early Romantic periods.

Includes: Experiential Learning Activity

Precludes additional credit for HUMS 4102 (no longer offered).

Prerequisite(s): restricted to students in the Bachelor of Humanities program.

Lectures three hours a week.

HUMS 3103 [0.5 credit] Western Music 1850-2000

Western music from the mid-nineteenth century to the present with emphasis on the seminal contributions of Liszt, Wagner, Mahler, Debussy, Stravinsky, Schönberg and others.

Includes: Experiential Learning Activity

Precludes additional credit for HUMS 4102 (no longer offered).

Prerequisite(s): HUMS 3102 and restricted to students in the Bachelor of Humanities program.

Research Seminar: Antiquity to the Middle Ages

An interdisciplinary seminar on a selected topic in the humanities from Antiquity to the Middle Ages. The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of Humanities program.

Seminar three hours a week.

HUMS 4902 [0.5 credit]

Research Seminar: Renaissance to Enlightenment

An interdisciplinary seminar on a selected topic in the humanities from the Renaissance to the Enlightenment. The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of

Humanities program.

Seminar three hours a week.

HUMS 4903 [0.5 credit]

Research Seminar: Romanticism to the Present

An interdisciplinary seminar on a selected topic in the humanities from Romanticism to the present. The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of

Humanities program.

Seminar three hours a week.

HUMS 4904 [0.5 credit]

Research Seminar: Non-Western Traditions

An interdisciplinary seminar on a selected topic in the humanities as expressed in aboriginal and Non-Western cultures. The topic will vary from year to year.

Includes: Experiential Learning Activity

Prerequisite(s): fourth-year standing in the Bachelor of Humanities program.

Seminar three hours a week.

Journalism (JOUR) Courses

JOUR 1001 [0.5 credit]

Foundations: Journalism in Context

Charting evolution of journalism in the West from roots as community creator to guardian of democracy, including greatest scoops and worst misdeeds. From ancient newssharing to 21st Century digital journalism, surveying ethical, political, economic and technological contexts that shaped news media as institutions/industries.

Includes: Experiential Learning Activity
Precludes additional credit for JOUR 1102.

Prerequisite(s): Open to all programs, with priority to BJ

students.

Lectures and discussion three hours a week.

JOUR 1002 [0.5 credit]

Foundations: Practicing Journalism in a Diverse Society

Introduces students to concepts, issues and challenges in the contemporary Canadian media environment that shapes their professional role as practicing journalists. Also provides students with initial opportunity to practice basic writing, editing and reporting skills in preparation for professional online journalism, media or fact-driven fields. Includes: Experiential Learning Activity

Precludes additional credit for JOUR 1103.

Prerequisite(s): Registration in the BJ or BJHUM program or the minor in News Media and Information.

Lectures and discussion three hours a week.

JOUR 1004 [0.5 credit] Special Topic

Examination of a topic in journalism not covered in depth in other courses

Lecture two hours a week, discussion one hour a week.

JOUR 1101 [0.5 credit] Indigenous Storytelling

Storytelling is a traditional method used in Indigenous cultures that teaches cultural beliefs, values, customs, history, and ways of life. In this course, storytelling will be the foundation for experiential/holistic learning and relationship-building. You'll examine how Indigenous storytelling traditions intersect and contrast with Western journalism.

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program.

Combination of in-person intensives and online classes.

JOUR 1102 [0.5 credit]

Foundations of Journalism

This course introduces you to the context, concepts, issues and challenges in contemporary Canadian media that will shape your professional role as practicing journalist. You'll examine the state of the media, advocacy, social media and ethics, plus discuss Indigenous representation in the mainstream media.

Precludes additional credit for JOUR 1001.

Prerequisite(s): Enrolment in Certificate in Journalism in Indigenous Communities program.

Online, biweekly classes, 6 hours per week.

JOUR 1103 [0.5 credit]

Fundamentals of Journalism

Learn how to think and work like a journalist in this course. You'll receive detailed feedback, mentoring from experienced journalist-instructors and teaching assistants. You'll build skills in interviewing, writing, storytelling, editing and ethics while covering wide scope of topics in your Indigenous community.

Precludes additional credit for JOUR 1002.

Prerequisite(s): Enrolment in Certificate in Journalism in Indigenous Communities program.

Online, biweekly classes, 6 hours per week.

JOUR 1104 [0.5 credit] Introduction to Audio Journalism

Radio is a popular media format in Indigenous communities. In this intensive workshop course, you will learn to pitch stories, report from the field, write conversationally, record voice and natural sound, edit audio files and produce compelling audio reports, radio newscasts and podcasts.

Includes: Experiential Learning Activity
Prerequisite(s): Enrolment in Journalism in Indigenous
Communities Certificate program and JOUR 1102 and
JOUR 1103.

In-person intensive, 3 hours per week.

JOUR 1105 [0.5 credit]

Digital and Photojournalism

Further development of your digital journalism skills. Students will receive instruction in online reporting and publishing, as well as learn the fundamentals of news storytelling through smartphone photography, including how to find visually newsworthy stories, and the ethics of photojournalism in Indigenous settings.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and JOUR 1103.

Online, biweekly classes, 6 hours per week.

JOUR 1106 [0.5 credit]

Entrepreneurial Journalism

Beginning with freelancer's toolkit, you'll learn to compete in a workforce that increasingly values an entrepreneurial mindset. You'll be trained to find and sell real stories and grow your brand. You'll explore innovative ways to reach audiences, fund your career as media professional. Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and JOUR 1103.

Online, biweekly classes, 6 hours per week.

JOUR 1107 [1.0 credit] Internships

During a two-week internship in a news or media organization, you'll have an opportunity to apply what you learned in the classroom to actual day-to-day work of reporting, writing, and producing news for an audience. Evaluations and student reflections round out the internship experience.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and JOUR 1103.

In-person intensive

JOUR 1108 [0.5 credit]

Introduction to Video Journalism

Pictures are powerful, and this is where you'll learn how to handle them. As you master visual literacy skills, you'll report, shoot and edit video stories. You'll work "live" in studio and from field, producing range of material using smartphones and DSLR cameras.

Includes: Experiential Learning Activity

Prerequisite(s): Enrolment in Journalism in Indigenous Communities Certificate program and JOUR 1102 and

JOUR 1103.

In-person intensive.

JOUR 2003 [0.5 credit]

Delivering Journalism: Innovators v. Imposters

Activists, imposters and innovators increasingly crowd in on traditional journalism's role of presenting reliable news and fair discussion. How is public awareness now shaped – and misshaped – and how must journalism reshape, update and defend its borders to serve communities better?.

Prerequisite(s): JOUR 1001, JOUR 1002, or permission of the School of Journalism and Communication.

Lecture and discussion three hours a week.

JOUR 2106 [0.5 credit] The Documentary

Examination of the work of individual film makers, of documentary styles and of organizations and institutions in the context of the history of documentary film making, including documentaries made for television. Non-fiction films other than documentaries may be considered. Also listed as FILM 2106.

Precludes additional credit for JOUR 2105, FILM 2105. Prerequisite(s): FILM 1101 or FILM 1120, or second-year standing, or permission of the Discipline.

Lecture and screening three hours a week, lecture one hour a week.

JOUR 2201 [1.0 credit] Fundamentals of Reporting

Intro to techniques journalists use gathering information quickly, accurately and ethically, to present reports and features in clear, engaging ways. Newsroom exercises provide experience in reporting, writing, editing, using digital tools, including audio editing software, spreadsheets, digital cameras, social media and emerging web-based digital tools.

Includes: Experiential Learning Activity
Prerequisite(s): JOUR 1001 and JOUR 1002 and second
year standing in the Bachelor of Journalism program.
Lectures, discussion and practicum six hours a week.

JOUR 2203 [0.5 credit] Civics for Journalists

This course offers an overview of key public institutions and civil society organizations in Canada to prepare aspiring journalists to effectively and critically engage with these actors in generating important and illuminating coverage of public affairs.

Also listed as MPAD 3002.

Prerequisite(s): JOUR 1001 and JOUR 1002 and second year standing in the BJ program or BJHUM program or the minor in News Media and Information.

Lectures and discussion three hours a week.

JOUR 2501 [0.5 credit] Media Law

A survey of laws that affect the Canadian media. Specific areas include the development of freedom of expression, the Charter of Rights and Freedoms, and statutory and common law limitations on freedoms of the press, including publication bans, libel and contempt of court. Also listed as COMS 2501, MPAD 2501.

Precludes additional credit for COMM 2501 (no longer offered).

Prerequisite(s): JOUR 1001, JOUR 1002, COMS 1001, COMS 1002, or enrollment in the Minor in News Media and Information, or enrollment in the Communication and Policy Studies specialization of the Bachelor of Public Affairs and Policy Management, or permission of the School of Journalism and Communication. Lectures and discussion three hours a week.

JOUR 3105 [0.5 credit] Questions of Documentary Practice

Theoretical implications of documentary film and documentary television practice.
Also listed as FILM 3105.

Prerequisite(s): 1.0 credit in Film Studies at the 2000-level, or permission of the School.

JOUR 3207 [0.5 credit] Audio Journalism

In this workshop students will build on the principles and practices of audio journalism to produce stories and audio in various formats suitable for radio and digital publication. Note: JOUR 3207 and JOUR 3208 may not be taken in the same term.

Includes: Experiential Learning Activity
Prerequisite(s): JOUR 2201, JOUR 2202, and
JOUR 2501 with a grade of C or higher in each.
Lectures and labs six hours a week.

JOUR 3208 [0.5 credit] Video Journalism

In this workshop students will build on the principles and practices of video journalism to produce stories and video in various formats suitable for television and digital publication. Note: JOUR 3207 and JOUR 3208 may not be taken in the same term.

Includes: Experiential Learning Activity
Prerequisite(s): JOUR 2201, JOUR 2202, and
JOUR 2501 with a grade of C or higher in each.
Lectures and labs six hours a week.

JOUR 3225 [0.5 credit] Reporting in Depth

Long-form journalistic writing skills development; techniques for thorough investigation of timely public issues. Study of outstanding feature and investigative writing examples. Students will pursue their own reporting projects.

Includes: Experiential Learning Activity
Precludes additional credit for JOUR 3205 (no longer

Prerequisite(s): JOUR 2201, JOUR 2202, and JOUR 2501 with a grade of C or higher in each. Lectures and practicum three hours a week.

JOUR 3235 [0.5 credit] Digital Journalism

Further development of digital journalism skills. Students will produce journalism for online audiences using formats including written and spoken language, still and moving images.

Includes: Experiential Learning Activity
Precludes additional credit for JOUR 3205 (no longer

Prerequisite(s): JOUR 2201, JOUR 2202, and JOUR 2501 with a grade of C or higher in each. Lectures and labs three hours a week.

JOUR 3300 [0.5 credit] Media Ethics in a Digital World

Ethical issues related to production and dissemination of news and other forms of content as they relate to digital environments. Different approaches to ethical decision-making and their application in contemporary settings. Also listed as MPAD 3300.

Precludes additional credit for JOUR 3215 (no longer offered).

Prerequisite(s): JOUR 2201, JOUR 2202 and JOUR 2501 with a grade of C or higher in each, or JOUR 2003 and JOUR 2501 with a grade of C or higher in each and enrollment in the Minor in News Media and Information. Lectures three hours a week.

JOUR 3400 [0.5 credit] Selected Topic in Journalism

Examination of a topic in journalism not covered in depth in other courses.

Prerequisite(s): third-year standing in the Bachelor of Journalism or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 3401 [0.5 credit]

Selected Topic in Journalism

Examination of a topic in journalism not covered in depth in other courses.

Prerequisite(s): third-year standing in the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information, or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 3402 [0.5 credit]

Selected Topic in Journalism

Examination of a topic in journalism not covered in depth in other courses.

Prerequisite(s): third-year standing in the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information, or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 3407 [0.5 credit]

Comparative Media Studies

The comparative study of one or more media organizations and/or types of media content with reference to their operation, audiences, and impacts. Also listed as COMS 3407.

Precludes additional credit for COMM 3407 (no longer

Prerequisite(s): third-year standing in B.J. Hons. or permission of the School of Journalism and Communication.

Lectures three hours a week.

JOUR 4001 [0.5 credit] **Journalism Now - and Next**

Changes occurring in the media, in the public's relationship with the media and how journalists and news organizations respond. Practical issues and challenges in the professional life of a journalist.

Also listed as MPAD 4001.

Precludes additional credit for JOUR 4000 (no longer offered).

Prerequisite(s): fourth-year standing in the Bachelor of Journalism or in the Bachelor of Media Production and Design, or fourth-year standing and enrollment in the Minor in News Media and Information, or fourth-year standing in the Strategic Public Opinion stream of the Communication and Policy Studies specialization of the Bachelor of Public Affairs and Policy Management. Lectures and discussion three hours a week.

JOUR 4003 [0.5 credit]

The Digital Hub: Advanced Multimedia

A workshop designed to give students instruction in digital reporting and publishing as they produce stories from across the city and beyond.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3235 with a grade of C or higher and fourth-year standing in B.J. Hons.

Also offered at the graduate level, with different requirements, as JOUR 5003, for which additional credit is

precluded. Workshops averaging eight hours a week.

JOUR 4004 [0.5 credit]

The Digital Hub: Advanced Audio

A workshop designed to give students instruction in audio journalism as they produce stories from across the city and beyond.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4206 (no longer

Prerequisite(s): JOUR 3207 with a grade of C or higher and fourth-year standing in B.J. Hons.

Also offered at the graduate level, with different requirements, as JOUR 5004, for which additional credit is precluded.

Workshops averaging eight hours per week.

JOUR 4005 [0.5 credit]

The Digital Hub: Advanced Video

A workshop designed to give students instruction in video journalism as they produce stories from across the city and beyond.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4207 (no longer

Prerequisite(s): JOUR 3208 with a grade of C or higher and fourth-year standing in B.J. Hons.

Also offered at the graduate level, with different requirements, as JOUR 5005, for which additional credit is precluded.

Workshops averaging eight hours a week.

JOUR 4100 [0.5 credit]

Special Topic

Examination of a topic in journalism not covered in depth in other courses. Seminar three hours a week.

Seminar three hours a week.

JOUR 4101 [0.5 credit]

Special Topic

An examination of a topic in journalism not covered in depth in other courses. Topics may vary from year to year. Seminar three hours a week.

JOUR 4300 [0.5 credit]

Specialized Journalism: Special Topic

Examination of a topic not covered in depth in other specialized journalism courses. Topics may vary from year to year. Emphasis on explanatory/analytical reporting, culminating in an extended work of journalism.

Also listed as MPAD 4300.

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5300, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4301 [0.5 credit]

Specialized Journalism: Business and the Markets

Core skills development for business journalism: reading financial documents, covering activities of corporations, functioning of stock and other markets, trade policy and the broader economy, focus on contemporary business news and local publicly-traded companies. Emphasis on explanatory/analytical reporting, production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5301, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4302 [0.5 credit]

Specialized Journalism: Business and Canadian Society

The intersection between business and public policy, from climate change to taxation, pensions, labour and corporate social responsibility. What business does and how the media covers it. Emphasis on explanatory/ analytical reporting, production of a related data project as an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5302, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4303 [0.5 credit]

Specialized Journalism: Health and Science

The culture of health science research and major trends; key challenges confronting researchers and health science journalists around the world. Emphasis on explanatory/analytical reporting, production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5303, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4304 [0.5 credit]

Specialized Journalism: Environment and Science

Major trends and research culture in climate and environmental sciences, focusing on key global concerns. Issues facing researchers and journalists. Focus on explanatory/analytical reporting; production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School

Also offered at the graduate level, with different requirements, as JOUR 5304, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4305 [0.5 credit]

Specialized Journalism: Canada and the U.S.

Exploration of the unique issues in Canada-U.S. relations, from diplomacy to trade. Emphasis on explanatory/ analytical reporting; production of an extended work of journalism.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5315, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4306 [0.5 credit]

Specialized Journalism: Canada and the World

Diplomacy, war, terrorism, migration, the international economy, development and other issues of interest to journalists who want to write about Canada and international affairs. Emphasis on explanatory/analytical reporting; production of an extended work of journalism. Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Hons. or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5306, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4308 [0.5 credit]

Specialized Journalism: Sports and Sport Culture

Workshop equipping students with the skills to move beyond the clichés of sports writing and live event coverage. Emphasis on explanatory/analytical reporting; production of an extended work of journalism. Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Honours or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5308, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4309 [0.5 credit]

Specialized Journalism: Arts and Culture

Students are introduced to arts and culture journalism, exploring issues and trends that are key to understanding and covering the arts and related cultural policy in Canada. Emphasis on explanatory/analytical reporting, culminating in an extended work of journalism. Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Honours or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5309, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4311 [0.5 credit]

Specialized Journalism: Justice and The Supreme Court

Examination of the Supreme Court of Canada, and the role of journalists in covering it. Students attend hearings and gain insight into the court's role in the making and shaping of Canada. Emphasis on explanatory/analytical reporting; production of an extended work of journalism. Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing in B.J. Honours or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5311, for which additional credit is precluded.

Lectures, discussion and seminars three hours a week.

JOUR 4313 [0.5 credit]

Specialized Journalism: Reporting in Indigenous Communities

Working in teams to produce multimedia news stories from Indigenous communities in the city of Ottawa and Ottawa Valley region, students will be challenged to confront misrepresentation in the news media and learn to consider new strategies and ethical frameworks for covering Indigenous Peoples.

Includes: Experiential Learning Activity
Also offered at the graduate level, with different
requirements, as JOUR 5313, for which additional credit is
precluded.

3 hours per week

JOUR 4314 [0.5 credit]

Specialized Journalism: Parliament, Policy and the Press

This seminar course is designed to make students familiar with the way government works; how political parties function within the overall political system; how policies are formulated and implemented; and most importantly, how to report on all of these processes, institutions and events. Prerequisite(s): Third or Fourth year B.J. Honours standing, or permission of the School.

Also offered at the graduate level, with different requirements, as JOUR 5314., for which additional credit is precluded.

3 hours per week.

JOUR 4400 [0.5 credit]

Professional Skills: Special Topic

Examination of a topic in journalism not covered in depth in other courses.

Includes: Experiential Learning Activity

Prerequisite(s): third- or fourth-year standing in B.J.

Honours or permission of the School.

Seminar three hours a week.

JOUR 4401 [0.5 credit]

Professional Skills: Data Storytelling

Instruction in telling stories from data. Focus on searching for, analyzing and mapping data, turning numbers into powerful narratives.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4208 (no longer offered).

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing.

Lecture and practicum three hours a week.

JOUR 4402 [0.5 credit]

Professional Skills: Longform Writing

Instruction in longform story production. Focus on researching and writing, including the art and craft of writing for magazines.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4208 (no longer offered).

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing.

Lecture and practicum three hours a week.

JOUR 4403 [0.5 credit]

Professional Skills: Strategic Communication

Workshop pairing student teams with non-profit groups that are in need of strategic communication advice. Instruction in planning and implementation.

Includes: Experiential Learning Activity

Also listed as MPAD 4403.

Precludes additional credit for JOUR 4208 (no longer offered).

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year standing.

Also offered at the graduate level, with different requirements, as JOUR 5508, for which additional credit is precluded.

Lecture and practicum three hours a week.

JOUR 4404 [0.5 credit]

Professional Skills: Freelancing for Media Professionals

Workshop preparing students to compete in a market that values the skills and mindset of entrepreneurial media workers

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher

and fourth-year standing.

Lecture and practicum three hours a week.

JOUR 4500 [0.5 credit]

Investigating Journalism: Special Topic

Examination of a topic in journalism not covered in depth in other courses.

Also listed as MPAD 4500.

Prerequisite(s): third- or fourth-year standing in B.J.

Honours or permission of the School.

Seminar three hours a week.

JOUR 4501 [0.5 credit]

Investigating Journalism: Gender, Identity and Inequality

How social concepts of gender, identity and inequality influence journalism. Theoretical and textual analysis. Historical and contemporary case studies from mainstream and alternative media exploring journalistic expression, professional practices, status and expectations, and cultural representations.

Includes: Experiential Learning Activity

Also listed as MPAD 4501.

Precludes additional credit for JOUR 4307 (no longer offered).

Prerequisite(s): third- or fourth-year standing in B.J. Hons. or permission of the School.

JOUR 4502 [0.5 credit]

Seminar three hours a week.

Investigating Journalism: Journalism and Conflict

For as long as there has been conflict between peoples, there have been those who bear witness and recount their observations. This course examines journalism and conflict with an emphasis on journalistic perspectives but also through discussion of interdisciplinary literature and academic research.

Includes: Experiential Learning Activity

Also listed as MPAD 4502.

Prerequisite(s): fourth-year B.J. Honours standing, or permission of the School.

Seminar three hours a week.

JOUR 4504 [0.5 credit]

Investigating Journalism: The Media and International Development

A critical examination of the use of journalism as an instrument of international development, historically and currently. To what extent have these efforts been successful? On what grounds are they justified? In what regard have they been instruments of propaganda?.

Includes: Experiential Learning Activity

Also listed as MPAD 4504.

Prerequisite(s): third-year standing in the Bachelor of Journalism, or third-year standing and enrollment in the Minor in News Media and Information, or permission of the School of Journalism and Communication.

Seminar three hours a week.

JOUR 4505 [1.0 credit]

Investigating Journalism: The Power and Politics of Government

In-depth exploration of Canada's government, public policy and politics; parliamentary debate and committee hearings. Explanatory/analytical reporting; production of an extended work of journalism.

Includes: Experiential Learning Activity

Precludes additional credit for JOUR 4201 (no longer

offered).

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year B.J. Honours standing, or permission of the School.

Seminar three hours a week.

JOUR 4506 [0.5 credit]

Investigating Journalism: Trauma-Informed Journalism

Journalists often swoop in at the most difficult moments of a person's life- aftermath of violent incident/catastrophe, tragic death of loved one, or culmination of painful criminal trial. Students will be prepared for ethical, practical and emotional challenges of reporting accurately, sensitively to traumatic events.

Includes: Experiential Learning Activity

3 hours per week

JOUR 4507 [0.5 credit]

Investigating Journalism: History of Black Journalism

Charts the development of Canada's Black press from its beginnings in the 1850s to present day. The course explores the role Canada's Black press has played in Black communities and considers how Black media outlets have covered the most significant stories of the day. Prerequisite(s): Third or Fourth-year B.J. Honours standing, or permission of the school. 3 hours per week.

JOUR 4508 [0.5 credit]

Investigating Journalism: Inclusive Reporting in Practice

Students will learn strategies for inclusive journalism through practical application, focusing on diversity, inclusion, and belonging in Canadian media. Learn to identify biases, self-reflection, and apply inclusive reporting techniques. Write stories that foster belonging, reflect diverse voices, and report with respect, care and cultural awareness.

Includes: Experiential Learning Activity

Prerequisite(s): JOUR 3225 with a grade of C or higher and fourth-year B.J. Honours standing, or permission of the School.

Seminar three hours a week

JOUR 4900 [1.0 credit]

Honours Tutorial

Students analyze some major achievements in contemporary journalism, through individual or group research. Students also have the opportunity to acquire background and experience in the managerial aspects and production of print and broadcast journalism.

Prerequisite(s): fourth-year B.J. (Honours) standing.

JOUR 4999 [0.0 credit]

Science Communication Certificate Professional Development Workshop

A one-day workshop providing practical skills development for becoming an effective science communicator. Topics for discussion will include defining the audience and framing of information, reviews of effective science communication, career opportunities for science communicators, and one-to-one analysis of participants writing skills. Graded SAT/UNS.

Includes: Experiential Learning Activity

Also listed as ISAP 4999.

Prerequisite(s): This course is restricted to students enrolled in the Certificate of Science Communication, and who have completed at least 2.0 credits towards the certificate, including one of COMS 2500 or ISAP 3003. A one-day workshop

Korean Language (Minor)

This section presents the requirements for programs in:

· Minor in Korean Language

Minor in Korean Language (4.0 credits)

Open to all undergraduate degree students.

Students are required to present a Minor CGPA of 4.00 or higher at graduation in order to be awarded a Minor in Korean Language.

Requirements:

1. 3.0 credits in KORE

Total Credits	4.0
The remaining requirements of the major discipline(s) and degree must be satisfied	
3. Subject to approval of the School, a maximum of 2.0 credits may be substituted for the above by taking courses at the 2000-level or higher in another discipline relevant to the language.	
2. 1.0 credit in KORE at the 3000-level or higher	1.0

3.0

Placement for Language Students

Note: A placement test is required for students who have previous training and/or experience, but who have not taken a course in this language at Carleton. For details, please consult carleton.ca/slals/modern-languages and follow the placement test instructions before registering.

Students who are found to be registered in an inappropriate level of the course will be deregistered following assessment by their instructor (and/or the

Director of the School). It is crucial for students to complete the placement test in a manner that truly demonstrates their language proficiency.

Students should note that they cannot go backward in a sequence of levels in language courses.

Regulations

In addition to the requirements listed here, students must satisfy:

1. the University regulations including the process of Academic Continuation Evaluation (see the Academic Regulations of the University section of this Calendar).

Korean (KORE) Courses

Placement for Language Students

KORE 1010 [0.5 credit] First-Year Korean I

For students with no knowledge of Korean. Oral skills, reading and writing. Compulsory attendance. Precludes additional credit for LANG 1010, when the language of instruction was Korean. Four hours a week.

KORE 1020 [0.5 credit] First-Year Korean II

Continuation of first-year Korean. Oral skills, reading and writing. Compulsory attendance.

Precludes additional credit for LANG 1020, when the language of instruction was Korean.

Prerequisite(s): grade of C or higher in KORE 1010, or in LANG 1010 (when the language of instruction was Korean), or permission of the School. Four hours a week.

KORE 2010 [0.5 credit] Second-Year Korean I

Further study of Korean to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance. Precludes additional credit for LANG 2010, when the language of instruction was Korean.

Prerequisite(s): grade of C or higher in KORE 1020, or in LANG 1020 (when the language of instruction was Korean), or permission of the School.

Four hours a week.

KORE 2020 [0.5 credit] Second-Year Korean II

Continuation of second-year Korean. Further study of Korean to reach a more advanced level of proficiency in a range of situations. Equal emphasis on oral and written language. Compulsory attendance.

Precludes additional credit for LANG 2020, when the language of instruction was Korean.

Prerequisite(s): grade of C or higher in KORE 2010, or in LANG 2010 (when the language of instruction was Korean in Fall 2016), or permission of the School. Four hours a week.

KORE 3010 [0.5 credit] Third-Year Korean I

Continuation of the study of Korean to reach a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for LING 3009 (when the language of instruction was Korean).

Prerequisite(s): grade of C or higher in KORE 2020 or LANG 2020 (if taken in winter 2017), or permission of the School.

Seminar three hours a week.

KORE 3020 [0.5 credit] Third-Year Korean II

Continuation of third-year Korean. Progress toward a more advanced level, including the ability to handle authentic materials and primary texts required for academic studies. Compulsory attendance.

Precludes additional credit for LING 3009, when the language of instruction was Korean.

Prerequisite(s): grade of C or higher in KORE 3010 or LING 3009 (if taken in Fall 2018), or permission of the School.

Seminar three hours a week.

KORE 4010 [0.5 credit] Fourth-Year Korean I

Development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance.

Includes: Experiential Learning Activity

Precludes additional credit for LING 3009, when the language of instruction was Korean.

Prerequisite(s): grade of C or higher in KORE 3020 or LING 3009 (if taken in Winter 2019), or permission of the School.

Seminar three hours a week.

KORE 4020 [0.5 credit] Fourth-Year Korean II

Continuation of Fourth-Year Korean. Further development of speaking and writing abilities more complex than those used in daily communication. Development of language use for specific purposes and in specific contexts such as the academic, business and technical domains. Compulsory attendance.

Prerequisite(s): grade of C or higher in KORE 4010, or permission of the School.

Seminar three hours a week.

Latin American and Caribbean Studies
